LOS ANGELES TRADE-TECHNICAL COLLEGE

2011 - 2012 GENERAL CATALOG

2011-2012 CALENDAR

FALL SEMESTER 2011
August 29 - December 18, 2011

WINTER INTERSESSION 2012
January 3 - February 4, 2012

SPRING SEMESTER 2012
February 6 - June 4, 2012

SUMMER SEMESTER 2012
June 11 - August 26, 2012

Catalog available in alternate media format
Welcome to Los Angeles Trade-Technical College!

This college has a rich 86-year history of career-technical training, and truly building the Los Angeles-area workforce. We are committed to your success in achieving your educational goals. If you look at the pages of this catalog, you will see a wide variety of courses meant to provide cutting-edge training to fulfill a degree or certificate, as well as transfer offerings for those looking to continue their higher education at a four-year institution.

In addition, you are coming to Trade Tech at a time when we are experiencing new growth and construction. Our new South Campus stands as a re-designed entrance to this cherished campus and provides the space and technology to enhance your learning experience. Our renovation of the Learning Resource Center (library) also will provide students with an excellent location to access resources and complete assignments.

We believe Trade Tech is a special college, one that features an amazing faculty, a supportive staff and administrators that have made student success a top priority. We appreciate you choosing Trade Tech to further your academic goals, and welcome you to one of the finest community colleges around!

Dr. Roland “Chip” Chapdelaine

President
2011-2012 ACADEMIC CALENDAR

ABOUT LOS ANGELES TRADE TECHNICAL COLLEGE (LATTC)

MISSION STATEMENT OF LOS ANGELES TRADE TECHNICAL COLLEGE

Provide our students and community with high-quality technical and professional educational options that flexibly meet their life-long career development and academic goals; foster a climate of life-long learning; prepare our students to participate effectively in our democratic society; and generate economic development with our educational, governmental, community and business partners.

COLLEGE ADVISORY COMMITTEES

The demands of industry determine the various phases of business, technical and trade training carried on by the college. Placement and successful progress of students are the measures of effectiveness of the pre-employment training. Increased productivity, job satisfaction, and advancement of the employed trainee attest to the effectiveness of the program. For these reasons all training is developed and carried on with the advice and assistance of the college advisory committees.

Membership in each of the groups is composed of community-wide representatives from labor and management, and from federal, state and local agencies who are concerned with the business, trade and technical programs offered. These advisory committees meet on the invitation of the college administration at least once a year and on additional occasions when considered necessary. They give counsel and advice in regard to evaluating training programs, approve plans to meet current training needs, review past accomplishments, and forecast trends affecting training and employment. Members of the various advisory committees are an important part of the educational program of the college. The people who serve on the committees are selected because of their leadership in the economic life of Los Angeles. The advisors bring to the college expert advice and sound thinking on business, trade and technical problems. Thus the work of the classroom reflects the rapid changes in community and industry.

ACCREDITATION

Los Angeles Trade-Technical College, a California public, tax-supported community college, is officially accredited by the Western Association of Schools and Colleges and is fully approved by the Board of Governors of the California State University and independent colleges and universities to give full credit for appropriate courses completed. The Culinary Arts program is also accredited by the American Culinary Federation and Educational Institute. The Registered Nursing program is also accredited by the National League of Nursing.

ACCURACY STATEMENT

The Los Angeles Community College District and Los Angeles Trade-Technical College have made every effort to make this catalog accurate and may, without notice, change general information, courses, or programs offered. The reasons for change may include student enrollment, level of funding, or other issues decided by the district or college. The district and college also reserve the right to add, change, or cancel any rules, regulations, policies and procedures as provided by law.
ABOUT THE LOS ANGELES COMMUNITY COLLEGE DISTRICT (LACCD)

EDUCATIONAL PHILOSOPHY OF LACCD
The Los Angeles Community Colleges affirm the principle that individuals should have opportunities to develop to their full potential. To that end, our main responsibility is to students and to the provision of education, which benefits students and enables them to contribute to society.

Our colleges, therefore, should be accessible to all individuals who have the capacity and motivation to profit from higher education. Curricula and services of our colleges should provide means for fulfilling the promise of open access.

We recognize the necessity to adapt to the changing educational needs of the Los Angeles Community Colleges' communities and to the growing diversity among students. The quality of the educational experience is to be judged by its value to students and communities, not merely by quantitative appeal. We further recognize that academic freedom is essential to excellence in education.

FUNCTIONS OF THE LOS ANGELES COMMUNITY COLLEGE DISTRICT

Consistent with the educational philosophy and mission of the Los Angeles Community Colleges, Los Angeles Trade-Technical College offers the following types of educational programs and services:

- **Transfer.** A college transfer program which enables the student who completes two years of study to continue upper division (third year) work at accredited four-year colleges and universities through careful and continuous articulation with accredited collegiate institutions and high schools.

- **Occupational.** An occupational education program planned to offer the student basic business, technical, and professional curricula to develop skills which can lead to employment, job advancement, certification, or the associate degree.

- **General Education.** A program of general education comprised of associate degree programs and other planned experiences which develop knowledge, skills, and attitudes necessary for the student to be effective as a person, a family member, a worker, and a citizen, thereby enhancing the quality of life for the individual and for the society-at-large.

- **Transitional Education.** A program of remedial and basic skills education for students needing preparation for community college level courses and programs; and English as a Second Language instruction for immigrants, foreign students and other students with limited English proficiency.

- **Counseling and Guidance.** A counseling and guidance program incorporating academic, career, and personal counseling and assistance in matters of admissions, financial aid, job placement and student activities; to assist the student in the establishment of educational goals and in the selection and pursuit of a life work compatible with his or her interests, aptitudes, and abilities.

- **Continuing Education.** A program of continuing education comprised of graded and un-graded classes to provide opportunities for personal and occupational competence that supplement formal full-time college attendance.

- **Joint Programs.** Joint programs with business, industry, labor, education, government and other institutions which are of mutual benefit to sponsoring institutions, enhance the educational opportunities of program participants, and advance the mission and functions of the District.
MISSION STATEMENT OF THE LACCD

“Changing Lives in a Changing Los Angeles”
In an era of civic renewal, economic change, and cultural revitalization that is unprecedented in the history of Los Angeles, we—the faculty, staff, and administrators of the nine Los Angeles community colleges—dedicate ourselves to the goal of expanding access to educational opportunity across the many, diverse communities that contribute to the greater Los Angeles area.

We serve all Angelenos by providing an unparalleled array of educational offerings, including programs that prepare students for successful careers, for transfer to four-year colleges and universities, for the improvement of essential life and workplace skills, and for civic engagement and life-long learning.

To achieve this mission, we strive to create supportive instructional environments that challenge students to meet rigorous academic standards, to become active, self-directed learners, to develop critical and creative habits of mind, and to develop an abiding appreciation for other peoples and other cultures.

District Guiding Principles...

ACCESS & OPPORTUNITY—We are committed to expanding educational opportunity and access to everyone who has the desire to learn, and we welcome all students, including those from communities that have been traditionally underserved.

EXCELLENCE & INNOVATION—In all of our services and institutional activities, we strive to create a culture of excellence and innovation, and we challenge our students to meet the highest educational standards.

STUDENT LEARNING & SUCCESS—All of our institutional efforts and resources are dedicated to one central purpose—the support of our students as they work toward the achievement of their academic and professional goals.

FREE INQUIRY—We value the vigorous, critical and free exchange of ideas and opinions, and we work actively to create communities of mutual respect and shared concern that support and sustain open debate and constructive, democratic discourse.

THE POWER OF DIVERSITY—We embrace diversity as a central part of our civic and institutional identity and as a powerful element in the education and development of every individual.

COMMUNITY CONNECTION—Our colleges must be rooted in the communities they serve, and we are determined to build and maintain strong, durable, and responsive collaborations with our educational partners across Los Angeles, and with business, labor, and other organizations that contribute to the fabric of our larger community.
TRADE-TECH: A PROUD HISTORY

Los Angeles Trade-Technical College (LATTC) has been proud to serve the greater Los Angeles community for over eighty years.

Our history began shortly after the close of World War I, when members of the Los Angeles Board of Education, the Chamber of Commerce, and business and labor leaders held a series of conferences to talk about Los Angeles’ need for a centralized vocational training program. Out of those meetings came the initial concept of what would become Trade-Tech, modeled on a class in power sewing offered to downtown garment workers. By the end of 1924, training programs in “beauty culture”, printing, plumbing, and the building trades were offered at various locations around the city and briefly consolidated in a soon-to-be outgrown building located at Eighth and Grand Avenues.

In the early Spring of 1925, the Los Angeles Board of Education created the Frank Wiggins Trade School, naming it after a prominent Los Angeles Chamber of Commerce member who had been a driving force in promoting the development of vocational training. The school relocated to a new building at 1646 South Olive Street in 1926, and through the ensuing years gained a reputation for the success of its graduates in industrial careers as well as the dedication of its faculty and staff.

The advent of World War II created an exponential demand for the college’s training programs in support of the war effort. The college’s Aircraft and Welding Trades departments operated directly under the supervision of the federal War Production Training Program, while the majority of other programs were quickly reformatted to provide short-term training of six to ten weeks’ duration, often at war production plants located throughout the city.

The end of the war and the return to a civilian economy, together with the infusion of federal funds for training veterans, led to an expanded demand for education and training at the college. In July of 1948, in response to veteran’s retraining needs as well as Los Angeles’ post-war population boom, the college was granted the authority to expand their curriculum and offer an Associate in Arts degree in vocational disciplines as well as academic and Liberal Arts areas.

LATTC moved to its current location in 1957. In 1966, an existing educational institution with a strong business program, Metropolitan College, was merged with Trade-Tech, resulting in an even broader range of educational offerings. Finally, in 1969, LATTC joined the newly formed Los Angeles Community College District (LACCD), making LATTC one of the nine colleges that comprise the District.

Trade-Tech occupies a unique position among institutions of higher education. Throughout eight decades, the college has remained true to its’ founding premise of vocational education, while expanding to provide transfer programs, adapt to rapidly changing technologies and remain responsive to the needs of the surrounding community. Students come from all over the Los Angeles basin to participate in our unique mix of programs, some of which have been in existence since the school’s inception. As of Fall 2006, the campus is undergoing massive renovation and building programs under the auspices of Proposition A and AA bond funds, and we look forward eagerly to the next eighty years of community service.
EMERGENCY INFORMATION

The college is concerned about your safety in case of an emergency. Detailed instructions are posted in every classroom and throughout the LATTC campus. Additionally, you may visit the Environmental Health and Safety Website for more information: http://college.lattc.edu/safety/

In case of emergency, remember these key points. “S.A.F.E.”
- **S**ecure yourself
- **A**ssess the situation
- **F**orward information
- **E**nact according to the campus disaster plan

EMERGENCY RESPONSE INFORMATION

LATTC-Sheriff Telephone Numbers For Emergency

In case of an emergency, you should immediately contact the College’s Sheriff’s Office on campus. Dial Ext 3611 or 911 to reach the College Sheriff’s office from any campus phone.
- You may also press the extension button marked “EMERGENCY”, on all campus phones.
- Pick up the campus emergency blue telephone station “dial direct” to the College Sheriff’s Office.
- If you are using a campus pay phone, you may dial *80 to reach the College Sheriff’s office.
- If you use your cell phone you may dial 213-763-3611 to connect to the College Sheriff’s office.

Please note if you dial 911 from your cell phone or pay phone on campus, it will not connect directly to the College Sheriff’s, but it will connect to outside emergency services.

MEDICAL EMERGENCY
- Take the injured person to the student health center for medical attention OR
- Call the College Sheriff if the injury is life threatening and calmly provide;
- Stay on the line to answer any questions.
- Comfort the injured person by talking to them until help arrives.

EARTHQUAKE
In the event of earthquake:
- **Stay Calm.**
  - **If inside**
    - Stay inside.
    - IMMEDIATELY get away from windows and large objects that may topple; DROP, COVER, and HOLD ON
    - DROP to the ground.
    - COVER by getting under a sturdy desk or table, and
    - HOLD ON to it until the shaking stops.
  - **If outside**
    - Stay outside.
    - Go to an open area away from buildings, trees, and power lines.
  - **If in auditorium**
    - Crouch in front of your seat covering your head with your hands.
    - **DO NOT RUSH FOR EXITS!**

FIRE/SMOKE
If you detect fire or smoke
- Immediately activate the nearest fire alarm pull station.
- Call the College Sheriff and notify them of the location of the fire.

If you hear a fire alarm
- **Immediately EVACUATE** the area.
- Turn off all equipment and close doors as you leave.
- Proceed to the nearest exit and to your designated “Evacuation Area”.
- Remain calm and await further instructions from Emergency Coordinator.

ELEVATOR ENTRAPMENT
If you become trapped in an elevator, remain calm.
- Press the red emergency button to activate the audible elevator alarm system which automatically notifies College Sheriff and Physical Plant Ext: 3612, then
- Wait for qualified personnel to respond and assist. **DO NOT ATTEMPT TO STEP OFF THE ELEVATOR** unless specifically instructed to do so.

CHEMICAL SPILLS
In the event of a chemical spill:
- Proceed to the nearest “chemical spill control kit”.
- Select personal protective equipment and absorbent materials as outlined on the instruction sheet for the specific type of chemical.
- After cleaning up the spill, place waste material(s) in the container provided and affix a hazardous chemical waste for disposal tag to the outside.
- Notify your instructor of incident and Environmental Health and Safety Ext: 3632 for hazardous waste pick-up and to replace used item.

Note: if chemical comes in contact with skin or eyes, flush with water for a minimum of 15 minutes and immediately seek medical attention.

Los Angeles Trade-Technical College has approval from the District Board of Trustees and the State Chancellor’s Office to offer the following occupational programs and to grant the degrees and/or certificates as indicated.
ACADEMIC FREEDOM
The Faculty shall have the academic freedom to seek the truth and guarantee freedom of learning to the students.

CAMPUS SECURITY ACT
Los Angeles Trade-Technical College, in compliance with the Federal Student Right to Know and Campus Security Act of 1990, provides the campus crime statistics for three calendar years. The College Security Report is posted at the college Sheriff’s office website which can be accessed through the web address: http://college.lattc.edu/sheriff/crime-statistics. A paper copy of the report is also available upon request at the college Sheriff’s office.

CONOCIMIENTO LIMITADO DEL INGLÉS
Las clases para aprender oficios están abiertas a todos los estudiantes, aún para los que tienen dificultad con el idioma. Aunque la falta de conocimiento del idioma inglés no es una barrera para matricularse en estas clases, se recomienda a los alumnos que utilicen los servicios que el colegio ofrece con este fin.

DRUG-FREE WORKPLACE POLICY
In accordance with SECTION 22 of the DRUG-FREE SCHOOLS ANDCOMMUNITIES ACT OF 1989, Los Angeles Trade-Technical College strives to maintain a drug and alcohol free campus for its students and employees. The unlawful manufacturer, distribution, dispensation, use or possession by students and college employees of illegal controlled substances or alcohol in all buildings, property, facilities, service areas, or on District business is prohibited (per Board Rules regarding Standards Of Conduct, Section 9803.19).

The College shall maintain a drug and alcohol free awareness policy to inform students and employees about the dangers and health risk of drug and alcohol abuse in the workplace, on the campus and during college sponsored activities. Students and employees will be informed of the sanctions that will be imposed for policy violations and the availability of drug/alcohol counseling, treatment and rehabilitation assistance. This information will be distributed yearly to all students and employees.

All students and employees are required to comply with this policy as a condition of their continued student status or employment. Any student or employee violating this policy may be required to participate satisfactorily in a Substance Abuse Rehabilitation Program, and/or may be subject to disciplinary action, up to and including dismissal or exclusion under applicable District Policies. In addition, an employee convicted of any workplace drug crime, must notify the college personnel office within five (5) days of conviction.

FAMILY EDUCATION RIGHTS AND PRIVACY ACT (FERPA)
See Student Records and Directory Information on page 18. For more information on student rights under the FERPA, please go to our LA Community College web link http://www.laccd.edu/admin_regs/documents/E-105.pdf.

EQUAL EMPLOYMENT OPPORTUNITY
The policy of the Los Angeles Community College District is to implement affirmatively, equal opportunity to all qualified employees and applicants for employment without regard to race, color, national origin, ancestry, religion, creed, sex, age, handicap, marital status, medical condition (cancer related), sexual orientation, or veteran status. Positive action will be taken to ensure that this policy is followed in all personnel practices, including recruitment, hiring, placement, upgrading, transfer, demotion, treatment during employment, rate of pay or other forms of compensation, selection for training, layoff, or termination. A vigorous Equal Employment Opportunity Program will be maintained to ensure appropriate utilization of certain protected groups in specific areas and levels within the district workforce through the implementation of specific result oriented procedures and activities (Board Rule 101301). Inquiries regarding Equal Employment Opportunity at Los Angeles Trade-Technical College should be directed to the College Equal Employment Opportunity Representative, Dr. Letia Royal-Burnett, Compliance Office, (213) 763-7066.

FREEDOM OF SPEECH AREA AND PROCEDURES
Board Rule 9902, Article IX, States, “The college president shall designate an area or areas on the college campus as areas for free discussion and expression by all persons. A Free Speech Area may only be located where there is a normal flow of student traffic with unlimited accessibility. Necessary campus rules governing the operation of such areas shall govern only the time, place and manner in which said areas are to be used. All such rules shall be applied equally and fairly to all persons desiring to use the Free Speech Areas. No restrictions shall be placed on subject matter, topics or viewpoints expressed in Free Speech Areas.

In compliance with the above Board Rule, the college president has designated the K-Mall Quad as the Free Speech Area. All individuals or organizations wanting to use the Free Speech Area, fill out an application and approval from the Vice President of Student Services office, located in ST-512, prior to use of this area. The guidelines and rules for use of this area, along with time, place, manner will be distributed to the interested party. This procedure does not apply to activities sponsored by the college.

GRADUATION RATES
More information about Student Right-to-Know Rates can be found at the California Community Colleges “Students Right-to-Know Rates Information Clearinghouse Website” located at http://srilk.cccco.edu.
HIGHER EDUCATION OPPORTUNITY ACT/PEER-TO-PEER – (HEOA P2P) COMPLIANCE IMPLEMENTATION (ILLEGAL FILE SHARING):

Unauthorized distribution of copyrighted material, including unauthorized peer-to-peer file sharing, may subject students to civil and criminal liability. Civil liability for copyright infringement may include payment of monetary damages to the copyright owner. Criminal penalties for copyright infringement may include fines up to $250,000 and imprisonment up to ten years. Students who violate the District’s computing facilities usage policy (LACCD Administrative Regulation B-28) may also be subject to college disciplinary action, including, but not limited to, suspension or expulsion.

LIMITED ENGLISH PROFICIENCY

Occupational education classes are open to all students. Although the lack of proficiency in English is not a barrier to enrollment in occupational education courses, it is recommended that students needing remedial English assistance utilize the services of the college that are provided for persons who are limited in English proficiency or have English as a second language as a bridge for entry into the vocational program.

NONDISCRIMINATION POLICY

All programs and activities of the Los Angeles Community College District shall be operated in a manner which is free of discrimination on the basis of race, color, gender, national origin, ancestry, religion, creed, pregnancy, marital status, medical condition (cancer related), gender orientation, age, disability, or veteran status (Reference: Board Rule 1202). Inquiries regarding Equal Employment Opportunity issues should be directed to Dr. Letia Royal-Burnett, Compliance Officer, at (213) 763-7066. Inquiries relating to disabilities and special accommodations per the Americans with Disabilities Act should be directed to Ms. Donna Lichtman, Director of Disabled Students Programs and Services, (213) 763-3773, TDD (213)763-5375.

POLÍTICA SIN DISCRIMINACIÓN

Los Angeles Community College District ofrece igualdad de oportunidades en todos los programas y actividades educativas, libre de discriminación en cuanto se refiere a raza, color, lugar de origen, ascendencia, religión, creencias, sexo, estado de gestación, estado civil, estado de salud (tratándose de cáncer), orientación sexual, edad, incapacidad física o estado como veterano. (Referencia: Board Rule 1202). Las indagaciones o quejas acerca de la Equal Employment Opportunity deberán ser dirijidas a la Srita. Letia Royal-Burnett al teléfono (213) 763-7066. Las indagaciones relacionadas con la incapacidad o arreglos especiales para incapacitados, según el Acta para Americanos Incapacitados, deberán ser dirijidas a la Srita. OPEN ENROLLMENT

Unless specifically exempted by law, every course for which State apportionment is claimed is fully open to any person who has been admitted to the College and who meets the appropriate academic prerequisites.

SEXUAL ASSAULT

In compliance with AB 1088, the Los Angeles Community College District is committed to providing a safe environment for its students, faculty, and staff. The Los Angeles Community College District Board of Trustees condemns any act of sexual assault committed on any of its facilities. In the event of sexual assault committed on the grounds or in facilities maintained and/or used by the District, any victim of a sexual assault who is one of the District’s students, faculty, staff, or visitors shall promptly receive appropriate treatment and full and accurate information. Individuals who commit sexual assault while on properties within the control of the District shall be subject to appropriate criminal prosecution and/or District disciplinary procedures. Confidentiality is fundamental to all aspects of cases dealing with sexual assault. The names of sexual assault victims shall not be revealed by persons responsible for implementing and enforcing the provisions of this Chapter, except with the consent of the victim. District Office of Equal Employment Opportunity/Diversity (213) 891-2315 or College Sheriff (213) 763-3600. LATTC HART (Healthy Advocacy Response Team) provides information resources and referrals on sexual assault and domestic violence. For more information contact HART Co-chairs Ashraf Hossein, (213) 763-7157, Donna Lichtman, (213) 763-3779, or Angie Abraham, (213) 763-7117.

SMOKING/NON-SMOKING PROCEDURE

In an effort to preserve the rights of both smokers and non-smokers, the college has designated both smoking and non-smoking areas. This policy ensures that drifting smoke will not be sucked into classrooms, offices and other non-smoking areas. Non-smoking areas of the College are designated as any classroom, building or other enclosed facility, including hallways, porches, decks, arcades, and sidewalk adjacent to the building which any student is required to occupy or which is customarily occupied by non-smoking students.
STANDARDS OF STUDENT CONDUCT

A student enrolling in one of the Los Angeles Community Colleges may rightfully expect that the faculty and administrators of the colleges will maintain an environment in which there is freedom to learn. This requires that there be appropriate conditions and opportunities in the classroom and on the campus. As members of the college community, students should be encouraged to develop the capacity for critical judgment and to engage in the sustained and independent search for truth. All persons shall respect and obey civil and criminal law, and shall be subject to legal penalties for violation of laws of the city, county, state and nation.

All visitors making use of the facilities or grounds of any college of the District will be asked to sign a statement that they have received the Standards of Conduct and the rules relating to campus visitors adopted by the Board of Trustees. A signature will not be a prerequisite to activities on campus. A record will be kept of all persons who use the facilities or grounds of the college.

Conduct in all of the Los Angeles Community Colleges must conform to District and college rules and regulations. Violations of such rules and regulations may result in disciplinary action depending on the individual’s status as student, faculty, staff or visitor. Violations of conduct on campus rules and regulations include but are not limited to the following:

Board Rule 6201.12
COMPETENCY REQUIREMENT: Students entering prior to Fall 2009 must demonstrate competence in reading, in written expression, and in mathematics. This requirement may be met by achieving a grade of “C” or better in appropriate courses, recommended by the District Academic Senate, and approved by the Chancellor or by achieving a passing score on an examination or examinations recommended by the District Academic Senate and approved by the Chancellor.

Effective for all students entering on or after the Fall 2009 semester, competence in written expression shall be demonstrated by obtaining a satisfactory grade in English 101, or another English course at the same level and with the same rigor as recommended by the District Academic Senate and approved by the Chancellor. Competence in mathematics shall be demonstrated by obtaining a satisfactory grade in Mathematics 125 (Intermediate Algebra), or another mathematics course at the same level and rigor, or higher, and with elementary algebra or higher as a prerequisite, as recommended by the District Academic Senate and approved by the Chancellor.

The competency requirements in written expression or mathematics may also be met by completing an assessment, conducted pursuant to Title 5, CCR, section 55500 and achieving a score determined to be comparable to satisfactory completion of English 101 or Mathematics 125 respectively. That is, students may either place into English or mathematics courses above level of English 101 or Mathematics 125, or they may achieve a satisfactory score on a competency exam or other approved exam as recommended by the District Academic Senate and approved by the Chancellor.

The competency requirements may also be met by obtaining a satisfactory grade in courses with English and mathematics content (but taught in subjects other than English and mathematics), which require entrance skills at a level equivalent to those necessary for English 101 and Mathematics 125, respectively, and are taught at the same level and with the same rigor. The District Academic Senate shall recommend such courses to the Chancellor for approval.

Board Rule 6202.
CATALOG RIGHTS: For these purposes, a catalog year is defined as beginning Fall semester and continuing through the proceeding summer. A Student remaining in the College District may elect to satisfy the degree, certificate or graduation requirements in effect at the college from which the student will either earn his/her degree, certificate or graduate:
1. At the time the student began such attendance at the college, or
2. at the time of graduation.

For the purposes of implementing this policy, the college may develop a policy to:
1. authorize or require substitutions for discontinued courses; or
2. require a student changing his/her major to complete the major requirements in effect at the time of the change; and
3. allow students to select an intervening catalog in years between time student began continuous attendance and time of graduation.

The college’s policy shall be developed in consultation with the college Academic Senate in accordance with the provisions of Chapter XVIII of the Board Rules - ACADEMIC SENATE AND THE BOARD OF TRUSTEES SHARED GOVERNANCE POLICY, and published in all college catalogs under appropriate headings.

This policy does not apply to college programs which are governed or regulated by outside government agencies or which require licensure or certification through one of these agencies.

Board Rule 6703.11
Acceptance of Credits.
All courses and units used to satisfy LACCD curriculum requirements, including graduation requirements (Chapter VI, Article II, LACCD Board Rules), educational program requirements (Board Rule 6708) and transfer core curriculum requirements (Board Rule 6600), shall be from accredited institutions, unless otherwise specified in this Board Rule.

For purposes of this Board Rule, “accredited institution” shall mean a postsecondary institution accredited by an accreditation agency recognized by either the U.S. Department of Education or the Council on Postsecondary Accreditation. It shall not mean an institution “approved” by the California Department of Education or by the California Council for Private Postsecondary and Vocational Education.

Courses which have a grade of “C - ” do not satisfy any LACCD curriculum requirement that requires a grade of “C” or higher.
Board Rule 9803.10
Willful Disobedience. Willful disobedience to directions of College officials acting in the performance of their duties.

Board Rule 9803.11
Violation of College Rules and Regulations. Violation of College rules and regulations, including those concerning student organizations, the use of College facilities, or the time, place, and manner of public expression or distribution of materials.

Board Rule 9803.12
Dishonesty. Dishonesty, such as cheating, or knowingly furnishing false information to the colleges.

Board Rule 9803.13
Unauthorized Entry. Unauthorized entry to or use of the college facilities.

Board Rule 9803.14
College Documents. Forgery, alteration, or misuse of college documents, records, or identification.

Board Rule 9803.15
Disruption of Classes. Obstruction or disruption of classes, administration, disciplinary procedures, or authorized college activities.

Board Rule 9803.16
Theft of or Damage to Property. Theft of or damage to property belonging to the college, a member of the college community, or a campus visitor.

Board Rule 9803.17
Interference With Peace of College. The malicious or willful disturbance of the peace or quiet of any of the Los Angeles Community Colleges by loud or unusual noise, or any threat, challenge to fight, fight, or violation of any rules of conduct as set forth in this Article. Any person whose conduct violates this section shall be considered to have interfered with the peaceful conduct of the activities of the college where such acts are committed.

Board Rule 9803.18
Assault or Battery. Assault or battery, abuse or any threat of force or violence directed toward any member of the college community or campus visitor engaged in authorized activities.

Board Rule 9803.19
Alcohol and Drugs. Any possession of controlled substance which would constitute a violation of Health and Safety Code section 11350 or Business and Professions Code section 4230, any use of controlled substances the possession of which are prohibited by the same, or any possession or use of alcoholic beverages while on any property owned or used by the District or colleges of the District. “Controlled substances,” as used in this section, include but are not limited to the following drugs and narcotics:

- opiates, opium and opium derivatives
- mescaline
- hallucinogenic substances
- peyote
- marijuana
- stimulants and depressants
- cocaine

Board Rule 9803.20
Lethal Weapons. Possession, while on a college campus or at a college sponsored function, of any object that might be used as a lethal weapon is forbidden for all persons except sworn peace officers, police officers, Sheriff, and other governmental employees charged with policing responsibilities.

Board Rule 9803.21
Discriminatory Behavior. Behavior while on a college campus or at a college-sponsored function, inconsistent with the District’s non-discrimination policy, which requires that all programs and activities of the Los Angeles Community College District be operated in a manner which is free of discrimination on the basis of race, color, national origin, ancestry, religion, creed, sex, pregnancy, marital status, sexual orientation, age, handicap or veterans status.

Board Rule 9803.22
Unlawful Assembly. Any assemblage of two or more persons to 1) do an unlawful act, or 2) do a lawful act in a violent, boisterous or tumultuous manner.

Board Rule 9803.23
Conspiring to Perform Illegal Acts. Any agreement between two or more persons to perform illegal acts.

Board Rule 9803.24
Threatening Behavior. A direct or implied expression of intent to inflict physical or mental/emotional harm and/or actions, such as stalking, which a reasonable person would perceive as a threat to personal safety or property. Threats may include verbal statement, written statements, telephone threats or physical threats.

Board Rule 9803.25
Disorderly Conduct. Conduct which may be considered disorderly includes: lewd or indecent attire or behavior that disrupts classes or college activities; breach of the peace of the college; aiding, or inciting another person to breach the peace of the college premises or functions.

Board Rule 9803.26
Theft or Abuse of Computer Resources. Theft or abuse of computer resources including but not limited to:

a. Unauthorized entry into a file to use, read, or change the contents, or for any other purpose.
b. Unauthorized transfer of a file.
c. Unauthorized use of another individual’s identification and password.
d. Use of computing facilities to interfere with the work of a student faculty member or college official, or to alter college or district records.
e. Use of unlicensed software.
f. Unauthorized

g. Use of computing facilities to access, send or engage in messages which are obscene, threatening, defamatory, present a clear and present danger, violate a lawful regulation and/or substantially disrupt the orderly operation of a college campus.
h. Use of computing facilities to interfere with the regular operation of the college or district computing system.
Board Rule 9803.27
Performance of an Illegal Act. Conduct while present on a college campus or at a location operated and/or controlled by the District or at a District-sponsored event, which is prohibited by local, State, or federal law.

Board Rule 9804
Interference with classes. Every person who, by physical force, willfully obstructs, or attempts to obstruct, any student or teacher seeking to attend or instruct classes at any of the campuses or facilities owned, controlled or administered by the Board of Trustees of the Los Angeles Community College District, is punishable by a fine not exceeding five hundred dollars ($500) or imprisonment in a county jail not exceeding one year, or both such fine and imprisonment. As used in this section, “physical force” includes, but is not limited to, use of one’s person, individually or in concert with other, to impede access to or movement within or otherwise to obstruct the students or teachers of the classes to which the premises are devoted.

Board Rule 9805
Interference with performance of duties of employees. Every person who attempts to cause, or causes, any officer or employee of any of the Los Angeles Community Colleges or any public officer or employee to do or refrain from doing, any act in the performance of his/her duties, by means of a threat to inflict any injury upon any person or property, is guilty of a public offense.

Board Rule 9805.10
Assault or abuse of Instructor. Every parent, guardian, or other person who assaults or abuses any instructor employed by the District in the presence or hearing of a community college student or in the presence of other community college personnel or students and at a place which is on District premises or public sidewalks, streets, or other public ways adjacent to school premises, or at some other place where the instructor is required to be in connection with assigned college activities is guilty of a misdemeanor.

Board Rule 9806
Unsafe Conduct. Conduct which poses a threat or harm to the individual and/or to others. This includes, but is not limited to, the following types of conduct: Unsafe conduct in connection with a Health Services Program (e.g., Nursing, Dental Hygiene, etc.); failure to follow safety direction of District and/or college staff; willful disregard to safety rules as adopted by the District and/or college; negligent behavior which creates an unsafe environment.

STUDENT DISCIPLINE PROCEDURES
Community college districts are required by law to adopt standards of student conduct along with applicable penalties for violation (Education Code Section 66500). The Los Angeles Community College District has complied with this requirement by adopting Board Rule 9803, Standards of Student Conduct (See above).

The District has adopted Board Rule 9804, Student Discipline Procedures, to provide uniform procedures to assure due process when a student is charged with a violation of the Standards of Student Conduct. All proceedings held in accordance with these procedures shall relate specifically to an alleged violation of the established Standards of Student Conduct. These provisions do not apply to grievance procedures, or residence determination and other academic and legal requirements for admission and retention.

Disciplinary measures may be taken by the College independently of any charges filed through civil or criminal authorities, or both.

Copies of the Student Discipline Procedures are available in the Vice President of Student Services Office, Student Services Building, ST-512.

COMPLIANCE OFFICER
Pursuant to the Student Grievance Procedure, the College compliance officer has been appointed by the President to assist the student in obtaining informal resolution of his or her grievance. If an informal resolution is not obtained, then the compliance officer will arrange for the formation of a formal Grievance Hearing Committee to hear the student’s grievance and will facilitate the hearing process pursuant to District Administrative Regulation E-55. The Compliance Officer, Dr. Letia Royal-Burnett, may be contacted at (213) 763-7066.

STUDENT GRIEVANCE PROCEDURES
The purpose of the Student Grievance Procedures is to provide a prompt and equitable means for resolving student grievances, per Board Rules 91101-91102.

The procedures enumerated in Administrative Regulation E-55 shall be available to any student or applicant for admission, who believes a College decision or action has adversely affected his or her status, rights, and/or privileges as a student. The procedures shall include, but not be limited to, alleged violations of Title IX of the Higher Education Amendments of 1972 (and applicable regulations), grievances relating to disabled students as defined by Section 504 of the Rehabilitation Act of 1973, and grievances relating to course grades to the extent permitted by Education Code Section 76224(a). Section 76224(a) provides:

“When grades are given for any course of instruction taught in a community college district, the grade given to each student shall be the grade determined by the instructor of the course and the determination of the student’s grade by the instructor, in the absence of mistake, fraud, bad faith, or incompetency, shall be final.”

For additional information regarding the procedures for filing a student grievance, or for copies of the adopted Student Grievance Procedures, contact the College Compliance Officer.

STUDENT RECORDS AND DIRECTORY INFORMATION
The Los Angeles Community College District, in compliance with Federal and State law, has established policies and procedures governing student records and the control of personally identifiable information. The Los Angeles Community College District recognizes that student records are a confidential matter between the individual student and the College. At the same time the District has a responsibility to fulfill public information needs (i.e., information about students participating in athletics, announcement of scholarships and awards, etc.). To meet this responsibly the District may release Directory Information unless the student states in writing that he or she does not want it released. The responsibility for carrying out these provisions is charged to the College Registrar, designated by the chief administrative officer on each campus. The Registrar may be contacted via the Office of Admissions.

Copies of Federal and State laws and District policies and procedures are maintained by the Registrar and are available for inspection and inquiry.
All student records maintained by the various offices and departments of the College, other than those specifically exempted by law, are open to inspection by the student concerned. The accuracy and appropriateness of the records may be challenged in writing to the Registrar. A student has the right to receive a copy of his or her record, at a cost not to exceed the cost of reproduction. (Requests for transcripts should be made directly to the Office of Admissions).

No student records, including Directory Information, will be released without the written consent of the student concerned except as authorized by law. A log of persons and organizations requesting or receiving student record information is maintained by the Registrar. The log is open to inspection only to the student and the community college official or his or her designee responsible for the maintenance of student records.

Directory Information includes the student’s name, city of residence, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, and the most recent previous educational agency or institution attended by the student. This information will not be released to anyone if the student marks “NO” on question “permission to Release Student Information” on the College Application or if the student marks “NO” on the College’s Release of Directory Information form. This form is available in the Admission Office.

In addition, under federal law, the military is entitled to receive the following student information for recruitment purposes: student directory information as defined above, student address, telephone number, date and place of birth, and major field of study. This information will not be released to the military if the student marks “NO” on question “permission to Release Student Information” on the College Application or if the student marks “NO” on the College’s Release of Directory Information form.

All inquiries regarding student records, Directory Information, and policies for records access, release, and challenge should be directed to the Registrar via the Office of Admissions. Students have the right to file a complaint with the United States Department of Education concerning alleged violations of Federal and State laws governing student records.

STUDENT RIGHT TO KNOW

ACCESS TO CAMPUS FACILITIES

Most campus buildings are open from 6:00 a.m. to 10:00 p.m. Monday through Thursday. Persons may be asked to produce identification if there is a question regarding their authorization to be in a certain area. Campus buildings are normally locked from 5:30 p.m. Friday to 6:00 a.m. Monday. The college Sheriff will open specific areas for Saturday classes and special events.

POLICY FOR RESPONSIBLE COMPUTING USE

The Los Angeles Community College District and Los Angeles Trade-Technical College provide computing facilities (computers, networks, software and computerized records) for use by students and college personnel to facilitate education, research, academic development and service to the public. Each individual user of these facilities is expected to do so responsibly, to use computing resources ethically, to respect the rights and privacy of others, and to use computing facilities so as not to violate copyright or patent protections or license agreements.

College computing facilities are not to be used for commercial purposes or non-College related activities without written authorization from the College. The College reserves the right to limit, restrict, or extend computing privileges and access to its information resources as it deems necessary to ensure the rules and regulations of the District and College are followed.

Students receive computer lab user guidelines as part of their course information. To obtain more specific information about College policies and standards for computing use, or to obtain a copy of the full text of Los Angeles Community College Administrative Regulation, E-76, Use of District and College Computing Facilities, contact the Administrative Projects Office/College Computing, ST-532, (213) 763-7040.
ATTENDANCE AND ENROLLMENT

ATTENDANCE
Only students who have been admitted to the college and are in approved active status may attend classes.

Students should attend every meeting of all classes for which they register. To avoid being dropped from class, students should contact the instructor when they are absent for emergency reasons.

Please Note: Students who are pre-registered in a class and miss the first meeting may lose their right to a place in the class, but the instructor may consider special circumstances. The instructor will consider whether there are mitigating circumstances which may justify the absences. If the instructor determines that such circumstances do not exist, the instructor may exclude a student from the class.

Students are responsible for dropping a class that they stop attending. If the class is not dropped, the student may receive an “F” in that class and be responsible for enrollment fee. Any drops or exclusions that occur between the end of the 4th week and the end of the 12th week will result in a “W” on the student’s record which will be included in the determination of progress probation. Drops are not permitted beyond the end of the 12th week. An evaluative grade (“A”, “B”, “C”, “D”, “F”, “P”, or “NP”) will be assigned to students who are enrolled past the end of the 12th week even if they stop attending class, except in cases of extenuating circumstances. After the last day of the twelfth week (or 75% of the time the class is scheduled, whichever is less) the student may withdraw from class upon petition demonstrating extenuating circumstances and after consultation with the appropriate faculty. For further details, refer to “W” section of “Grading Symbols and Definitions.”

FINAL EXAMINATIONS
Final examinations are required in all courses; no student will be excused.

UNITS OF WORK/STUDY LOAD
Maximum and minimum unit requirements may apply, as follows:

Unit Maximum
- The maximum study load is 18 1/2 units during a regular semester, 12 units in two summer sessions, and 7 units during winter session. The normal class load for students in the Fall or Spring semester is from 12 to 18 units a semester for full-time students. A college program of 15 units is equal to at least a 50-hour workweek for most students. Students who desire to take 19 or more units must obtain approval from the Registrar through petition.

- Those students who will be employed while attending college should consider reducing their programs accordingly. It is suggested that those students who are employed full-time should enroll in no more than one or two classes or 9 units maximum.

Full-Time Definition
- A study program of 12 units or more (4 units or more in Summer and Winter session) is considered a full time study program.

Minimum study loads for specific programs:
- Veterans and veterans’ dependents: 12 units
- Social Security benefits: 12 units
- Foreign Students (F-1 visa): 12 units
- Athletes: 12 academic units

The Veterans Administration uses the following definition for eligibility:
- full-time benefits: 12 or more units
- 3/4-time benefits: 9 through 11 units
- 1/2-time benefits: 6 through 8 units
- less than 1/2 time: 3 through 5 units (Reservist and National Guard)
ACADEMIC STANDARDS

ACADEMIC PROBATION

Academic Standards - Probation

The following standards for academic and progress probation shall be applied as required by regulations adopted by the Board of Governors of the California Community Colleges. Probation shall be determined based on all student course work dating from Fall, 1981; course work completed prior to Fall of 1981 is excluded from probation calculations. A student shall be placed on probation if any one of the following conditions prevail:

a. ACADEMIC PROBATION. The student has attempted a minimum of 12 semester units of work and has a cumulative grade-point average less than a “C” (2.0).

b. PROGRESS PROBATION. The student has enrolled in a total of at least 12 semester units and the percentage of all units in which a student has enrolled and for which entries of “W” (Withdrawal), “I” (Incomplete), and “NP” (No Pass) are recorded reaches or exceeds fifty percent of all units attempted.

c. TRANSFER STUDENT. The student has met the conditions of “a” or “b” at another college within the Los Angeles Community College District.

Units Attempted

“Units Attempted,” for purposes of determining probation status only, means all units of credit in the current community college of attendance for which the student is enrolled.

Removal from Probation

A student shall be removed from probation upon meeting the criteria specified in this section.

Academic Probation

A student on academic probation for a grade point deficiency shall be removed from probation when the student’s cumulative grade-point average is 2.0 or higher.

Progress Probation

A student on progress probation because of an excess of units for which entries of No-Pass (NP), Incomplete (I), and/or Withdrawal (W) are recorded shall be removed from probation when the percentage of units in this category drops below fifty percent (50%).

Academic Standards - Dismissal

A student shall be subject to dismissal and subsequently be dismissed under the conditions set forth within this section. Dismissal shall be determined based on student course work dating from Fall, 1981; course work completed prior to Fall of 1981 is excluded from dismissal calculations.

Academic Probation

A student who is on academic probation shall be subject to dismissal if the student has earned a cumulative grade-point average of less than 2.0 in all units attempted in each of 3 consecutive semesters. A student who is on academic probation and earns a semester grade-point-average of 2.0 or better shall not be dismissed as long as this minimum semester grade-point-average is maintained.

Progress Probation

A student who is on progress probation shall be subject to dismissal if the cumulative percentage of units in which the student has been enrolled for which entries of No-Pass (NP), Incomplete (I), and/or Withdrawal (W) are recorded in at least three consecutive semesters reaches or exceeds fifty percent (50%). A student who is on progress probation shall not be dismissed after a semester in which the percentage of units in which the student has been enrolled for which entries of “W,” “I,” and “NP” are recorded is less than fifty percent (50%).

DISMISSAL

A student who is subject to dismissal, and who has not been continued on probation through the appeal process, shall be notified by the College President, or designee, of dismissal which will become effective the semester following notification. Dismissal from any one college in the District shall disqualify a student from admission to any other college in the District.

Appeal of Dismissal

A student who is subject to dismissal may appeal to the College Dismissal Committee by submitting a Return From Disqualification Petition to the College Admissions Officer (see a counselor to initiate petitions). Dismissal may be postponed and the student continued on probation if the student shows significant improvement in academic achievement but has not been able to achieve to a level that would meet the requirements for removal from probation.

Readmission After Dismissal

A student who has been dismissed may request reinstatement after 2 semesters have elapsed. The student shall submit a written petition requesting Return From Disqualification in compliance with College procedures. The College Dismissal Committee will meet in the first week of August and the first week of December each year to review these petitions. See the current College schedule for the date of the next meeting. Readmission may be granted, denied, or postponed subject to fulfillment of conditions prescribed by the college.
ACADEMIC RENEWAL

Students may submit a petition to the Office of Admissions and Records to have their academic record reviewed for academic renewal action of substandard academic performance (less than “C”) under the following conditions:

1. Students must have achieved a grade-point-average of 2.5 in their last 15 semester units, or 2.0 in their last 30 semester units completed at any accredited college or university. These units must be completed after the coursework to be renewed; and
2. At least two calendar years must have elapsed from the time the course work to be removed was completed. If the above conditions are met, academic renewal shall be granted, consisting of:
3. Eliminating from consideration in the cumulative grade-point average up to 18 semester units of course work, and
4. Annotating the student academic record indicating where courses have been removed by academic renewal action. Academic renewal actions are irreversible. Graduation honors and awards are based on the student’s cumulative grade-point average for all college work attempted. This policy is adopted for use in the Los Angeles Community College District only. Other institutions may differ and students planning to transfer to another college should contact that institution regarding its policy.

Academic Petition/Administrative Petition

Students should file an Academic Petition form when they are requesting assistance with: course repetition, course substitution, enrollment in more than 18-1/2 units, catalog rights and other related concerns. The petition forms may be obtained from the Counseling Office. Petitions must be signed by the counselors before submittal to Admissions and Records Office, Building ST-416. Students should file an Administrative Petition form when they are requesting assistance with Academic renewal, return from disqualification (dismissal), and other related concerns. Administrative Petition forms are available in the Office of Admissions and Records, ST-Lobby, and submitted in the same office. When filing for return from disqualification, the petition forms must be reviewed and signed by the counselors before submittal to Admissions and Records Office. Specific petition forms are available for requesting permission for: grade changes, Credit By Examination, and lining out successfully repeated course.

CREDITS AND GRADES

CREDIT FOR ADVANCED PLACEMENT (AP)

The College offers credit for grades of 3 or better on a variety of College Board Advanced Placement Exams. Students should file a General Petition in the Admissions Office, ST-Lobby and have an official copy of their test results sent to the school.

COLLEGE LEVEL EXAMINATION PROGRAM (CLEP)

The college grants credit for scores of 500 points (or 50%) or better on a variety of CLEP examinations. Students should contact counseling (ST-416) or Admissions (ST-Lobby) for additional information.

CREDIT FOR PREREQUISITES

Students may not concurrently enroll in and receive credit for an advanced course and its prerequisite(s). Students may not enroll in and receive credit for the prerequisite(s) to an advanced course if they have previously completed the advanced course. Violation of this regulation will result in exclusion from class and denial of course credit.

CREDIT BY EXAMINATION

Some courses in the college catalog are eligible for credit by examination.

1. Methods of obtaining credit by examination
   a. Achievement of a score of 3 or higher on an Advanced Placement Examination administered by the College Entrance Examination Board.
   b. Credit by satisfactory completion of an examination administered by the college in lieu of completion of a course listed in the college catalog.
   c. Achievement of a score that qualifies for credit on an examination administered by other agencies approved by the college.

2. Determination of Eligibility to take College Administered Examinations
   a. Must be currently registered in the college, in good standing, and with a minimum grade point average of 2.0 in any work attempted at the college.
   b. Must have completed 12 or more units in the LACCD.
   c. May petition for credit by examination if they are 1) eligible to take such course for credit under existing regulations. 2) have not completed a course or are not in the process of taking a course which is more advanced than the course for which credit is requested. This requirement may be waived at the discretion of the appropriate administrator.

3. Maximum credit allowable for credit by examination
   The maximum number of units allowable for credit by examination for the Associate Degree shall be fifteen (15) units. Credit by examination transferred from other institutions is counted towards this maximum.

4. Limitations
   Credits acquired by examination are not applicable to meeting such unit load requirements as Selective Service deferment, Veteran’s or Social Security benefits.

5. Recording of Credit
   a. If a student passes the examination, the course shall be posted on his/her cumulative record indicating “Pass” in the “Grade” column.
   b. The number of units of credit recorded for any course may not exceed those listed in the college catalog.

6. Acceptance Towards Residence
   Units for which credit is given pursuant to the provision of this section shall not be counted in determining the 12 units of credit in residence requirement.
7. Recording of Grade
Students who successfully pass an approved examination shall have the record of such examination entered on their record as “P” as provided by the District Grading Symbols and Definitions Policy. The student’s records shall also be annotated “Credit by Examination”.

PASS/NO-PASS OPTION

The College President may designate courses in the College Catalog wherein all students are evaluated on a “Pass/No-Pass” basis or wherein each student may elect on registration or no later than the end of the first 30% of the term, whether the basis of evaluation is to be “Pass/No-Pass” or a letter grade. These courses will be noted in the College Catalog as being eligible for the Pass/No-Pass Option.

1. USAGE FOR SINGLE PERFORMANCE STANDARD. The Pass/No-Pass grading system shall be used in any course in which there is a single satisfactory standard of performance for which unit credit is assigned. A grade of Pass (P) shall be assigned for meeting that standard, and a grade of No-Pass (NP) shall be assigned for failure to do so.

2. ACCEPTANCE OF CREDITS. All units earned on a “Pass/No-Pass” basis in accredited California institutions of higher education or equivalent out-of-state institutions shall be counted in satisfaction of community college curriculum requirements.

3. RECORDING OF GRADE. A student who is approved to be evaluated on the “Pass/No-Pass” basis shall receive both course credit and unit credit upon satisfactory completion of the course. Satisfactory completion for credit is equivalent to the grade of “C” or better. A student who does not perform satisfactorily will be assigned a “No-Pass” (NP) grade.

4. GRADE POINT CALCULATION. Units earned on a “Pass/No-Pass” basis shall not be used to calculate grade-point averages. However, units attempted for which “No-Pass” (NP) is recorded shall be considered in probationary and dismissal procedures.

5. STANDARDS OF EVALUATION. The student who is enrolled in a course on a “Pass/No-Pass” basis will be held responsible for all assignments and examinations required in the course and must meet the standards of evaluation which are identical for all students.

6. CONVERSION TO LETTER GRADE. A student who has received credit for a course taken on a “Pass/No-Pass” basis may not convert this credit to a letter grade.

7. COURSE REPETITION. A student who has received a grade of “No-Pass” (NP) may repeat the course by meeting the requirements set forth by the District Course Repetition to Improve Substandard Grades Policy.

Designated Courses - Pass/No-Pass

3. Credit for Law Enforcement Academy Training
Credit for basic recruit academy training instructional programs in Administration of Justice or other criminal justice occupations shall be granted as follows:

a. Credit will be given for training from institutions which meet the standards of training of the California Peace Officers Standards and Training Commission.
b. A single block of credit will be given and identified as academy credit.
c. One (1) unit of credit may be granted for each 50 hours of training, not to exceed ten (10) semester units or their equivalent. Credits granted by an institution of higher education for basic recruit academy training, under the above provisions, shall not be identified as equivalent to any required course in the major.

COURSE REPETITION

Course Repetition to Improve Sub-standard Grades
No specific course or categories of courses shall be exempt from course repetition. This policy applies to courses taken at colleges within the Los Angeles Community College District. Courses completed through the provisions of Board Rule 6704 - Credit by examination may not be used to remove a substandard grade.

First Course Repetition to Remove a Sub-standard Grade
Upon completion of a repeated course the highest grade earned will be computed in the cumulated grade point average and the student's academic record so annotated. All grades awarded will show on student's permanent records to insure a true and complete academic history.

Second Course Repetition to Remove a Sub-standard Grade
Upon completion of the second repetition, the grade used in computing the student's cumulative grade point average shall be the highest grade earned, and the student's record so annotated. The two lower substandard grades will not be used in the computation of the grade point average. All grades awarded will show on student's permanent records to insure a true and complete academic history.

Third Course Repetition to Remove a Sub-standard Grade
A student may repeat the same course for a third time provided the student has:

1. Received two substandard grades for the same district course
2. Filed a petition specifying the course(s) to be repeated and stating the extenuating circumstances upon which the petition is based. “Extenuating circumstances” are verified cases of accidents, illness, or other circumstances beyond the control of the student.
3. The petition is approved by the local academic senate or a committee acting on behalf of the academic senate, and by the college president or designee.

Upon completing the third repeat, the grade earned will not be used in the computation of the grade point average. All grades awarded will show on student's permanent records to insure a true and complete academic history.

CREDIT FOR COURSES COMPLETED AT NON-ACCREDITED INSTITUTIONS
Students transferring from non-accredited institutions may, after successful completion of 30 units with a "C" or better grade-point average, apply for up to 15 units of credit in courses which parallel the offerings of the College. The following exceptions may be made to this regulation:

1. Credit for Graduates of Diploma Schools of Nursing
   The following amount of credit is authorized for graduates of Diploma Schools of Nursing who enter the Los Angeles Community Colleges:
   a. Thirty (30) semester units of credit will be given to graduates of Diploma Schools of Nursing under the following conditions:
      i) The student presents a valid, current California certificate as a licensed registered nurse to the designated administrative officer;
      ii) The student has completed at least 12 units of credit at the College to which application is made.
   b. The work of graduates of Diploma Schools of Nursing outside California will be recognized if the student has a valid, current California license. Credit will be given even though the license was obtained on the basis of reciprocity with another state rather than by examination.
   c. Candidates for the Associate of Arts or Associate of Science Degree are exempt from Health Education as a general education requirement. No other general education requirements will be waived.
   d. Additional courses in Nursing may be taken for credit only upon approval of the Nursing Department.
   e. The transcript is not to reflect the major field nor should the diploma, where given, indicate Nursing as a major.

2. Credit for Military Service Training
   Students who are currently serving in or have served in the military service, should, after successful completion of at least one course with the Los Angeles Community Colleges, request an evaluation of credit earned through military service training schools and/or military occupational specialties.

Course Repetition: Special Circumstances

Repetition of courses for which substandard work (less than “C”) has not been recorded shall be permitted only upon advance petition of the student and with written permission of the College President or designee based on a finding that circumstances exist which justify such repetition. In such repetition under special circumstances, the student’s permanent academic record shall be annotated in such a manner that all work remains legible. Grades awarded for repetition under special circumstances shall not be counted in calculating a student’s grade-point average.

Campus Procedure

Student will be notified of an Administrative Exclusion from a class if the student is enrolled in a class under above circumstances and has not filed a petition in advance and received approval. In this case the student may file a petition to repeat under special circumstances in the Student Services Building, ST-Lobby following receipt of a Drop notice.

Course Repetition and Activity Repetition

Certain courses in the Catalog may be repeated for additional unit credit. These courses, marked “RPT” in the Course Section of the Catalog, allow the student an expanded educational experience each time the student enrolls in the course. Enrollment in these courses is limited in any similar activity to a maximum of three repeats for a total of four (4) enrollments, regardless of the repeatability of individual courses. The activity limitation also applies to courses which are not repeatable in themselves but for which similar activities exist. For example, there are several similar course titles in Art, Music, Theater, and Physical Education which are considered to be the same activity. A student may enroll four times in courses which are considered to be the same activity, such as twice in Theater 279, Musical Theater (RPT 3), and twice in Theater 280, Musical Theater Workshop (RPT 3). Any combination may be used as long as four enrollments in one activity is not exceeded.

This activity enrollment limitation begins with the Fall 1983 term. Excess enrollment will result in administrative exclusion. Consult a counselor for the latest restricted activity enrollment list.

NOTE: Whenever the student’s record is reviewed for the purpose of determining his or her unit credits, all of the student’s record is reviewed, not just the course work since the beginning of Fall 1983.

PETITIONS

Students should file a petition form when they are requesting assistance with: academic renewal, course substitution, enrollment in more than 18-1/2 units, return from disqualification (dismissal), and other related concerns. Specific petition forms are available for course repetition to improve substandard grades, grade change, and lining out successfully repeated courses. The petition forms may be obtained in the Office of Admissions and Records, room, ST-Lobby, and filed in the same office. Students must consult a counselor, advisor, mentor or Department Head when filing a petition.

GRADING SYMBOLS AND DEFINITIONS

Only the symbols in the grading scale given in this section shall be used to grade all courses offered in fulfillment of the requirements for an associate or baccalaureate degree, a certificate, diploma, or license. Grades shall be averaged on the basis of the point equivalencies to determine a student’s grade-point-average, using the following evaluative symbols:

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Definition</th>
<th>Grade Point</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent</td>
<td>4</td>
</tr>
<tr>
<td>B</td>
<td>Good</td>
<td>3</td>
</tr>
<tr>
<td>C</td>
<td>Satisfactory</td>
<td>2</td>
</tr>
<tr>
<td>D</td>
<td>Passing, less than satisfactory</td>
<td>1</td>
</tr>
<tr>
<td>F</td>
<td>Failing</td>
<td>0</td>
</tr>
<tr>
<td>P-CRX</td>
<td>Credit by exam</td>
<td></td>
</tr>
<tr>
<td>NP</td>
<td>No-Pass (equal to a “D” or “F” grade – units are not counted in GPA)</td>
<td>(P and NP grades may be given only in courses authorized by the District)</td>
</tr>
</tbody>
</table>

Grade Point Average (GPA), cumulative and semester, may be calculated by dividing the total Grade Points by the total units attempted. (The symbol for Units Attempted is U-A, the symbol for grade points is G-P). The following non-evaluative symbols may be entered on a student’s record:

Symbol Definition

(I) Incomplete

Incomplete academic work for unforeseeable emergency and justifiable reasons at the end of the term may result in an “I” symbol being entered in the student’s record. The condition for removal of the “I” shall be stated by the instructor in a written record. This record shall contain the conditions for removal of the “I” and the grade assigned in lieu of its removal. This record shall be given to the student, with a copy on file in the college Admissions Office until the “I” is made up or the time limit has passed. A final grade shall be assigned when the work stipulated has been completed and evaluated, or when the time limit for completing the work has passed. The “I” symbol shall not be used in calculating units attempted nor for grade points. THE “I” MUST BE MADE UP NO LATER THAN ONE YEAR FOLLOWING THE END OF THE TERM IN WHICH IT WAS ASSIGNED. The student may petition the instructor for a time extension due to unusual circumstances. Note: Courses in which the student has received an Incomplete (“I”) may not be repeated unless the “I” is removed and has been replaced by a grade of “D” or “F”. This does not apply to courses which are repeatable for additional credit.

(IP) In Progress

The “IP” symbol shall be used only in those courses which extend beyond the normal end of an academic term. “IP” indicates that work is “in progress,” but that assignment of a substantive grade must await its completion. The “IP” symbol shall remain on the student’s permanent record in order to satisfy enrollment documentation. The appropriate evaluative grade and unit credit shall be assigned and appear on the student’s record for the term in which the required work of the course is completed. The “IP” shall not be used
in calculating grade-point averages. If a student enrolled in an "open-entry, open-exit" course is assigned "IP" at the end of an attendance period and does not complete the course during the subsequent attendance period, the appropriate faculty will assign an evaluative symbol (grade) as specified above to be recorded on the student's permanent record for the course.

(W) Withdrawal
Withdrawal from a class or classes shall be authorized through the last day of the twelfth week of instruction or 75% of the time the class is scheduled to meet, whichever is less. No notation ("W" or other) shall be made on the record of a student who withdraws during the first four weeks, or 30% of the time the class is scheduled, whichever is less. Withdrawal between the end of the fourth week (or 30% of the time the class is scheduled to meet, whichever is less) and the last day of the twelfth week of instruction (or 75% of the time the class is scheduled to meet, whichever is less) shall be authorized after informing the appropriate faculty. A student who remains in class beyond the twelfth week or 75% of the time the class is scheduled shall be given a grade other than a "W," except in cases of extenuating circumstances. After the last day of the twelfth week (or 75% of the time the class is scheduled, whichever is less), the student may withdraw from class upon petition demonstrating extenuating circumstances and after consultation with the appropriate faculty. Students should obtain a petition in the Admissions Office. Extenuating circumstances are verified cases of accidents, illness, or other circumstances beyond the control of the student. Withdrawal after the end of the twelfth week (or 75% of the time the class is scheduled, whichever is less) which has been authorized in extenuating circumstances shall be recorded as "W." The "W" shall not be used in calculating units attempted nor for the student's grade-point-average. 'Ws' will be used as factors in progress probation and dismissal.

STUDENT GRADE CHANGE PETITIONS
The instructor of the course shall determine the grade to be awarded to each student. The determination of the student’s grade by the instructor is final in the absence of a mistake. Petition for grade change forms can be obtained and filed in the Office of Admissions and Records.

A grade change petition can be submitted if you feel an error has been made on your record. These petitions must be approved by the instructor of the course specified, and must be submitted within one year after the grade is assigned.

STUDENT GRADE GRIEVANCE PROCEDURES
Education Code Section 76224(a) defines the circumstances under which a student may initiate a grade grievance. Section 76224(a) provides: “When grades are given for any course of instruction taught in a community college district, the grade given to each student shall be the grade determined by the instructor of the course and the determination of the student's grade by the instructor, in the absence of mistake, fraud, bad faith, or incompetence, shall be final.” For additional information, contact the college Ombudsperson at (213) 763-7066.

STATE COMPLAINT PROCESS
Final federal regulations published October 29, 2010, and effective July 1, 2011, included in the State Authorization section of the package a new requirement that eligible institutions have and disclose a state administered complaint process (HEA Title IV, CFR, Sections 600.9 and 668.4(3)(b)). The intention behind the new requirement is that students and others have a method and process outside of the institution that takes, investigates and responds to complaints regarding the institution.

For more info. regarding the State Complaint Process, please go to http://californiacommunitycolleges.cccco.edu/ComplaintsForm.aspx.

GRADE REQUEST PROCEDURES
Students can receive information on their grades through the internet at www.laccd.edu. See Grade Request Procedures in the class schedule for instruction on how to receive grade information by the internet. If you need an Official Transcript or a Verification of Enrollment, you may request them from the Admission Office.

TRANSCRIPTS
Upon written request of the student, a copy of the student's academic record shall be forwarded to the student or his or her designated addressee in ten (10) working days or less by U.S. mail or other responsible forwarding agency.

A student or former student shall be entitled to two free copies of the transcript of his or her record or to two free verifications of the student's records or combination of both. Additional copies shall be made available to the student, or to an addressee designated by the student at a cost of $3.00 each. Students may request same day processing to expedite their requests for an additional fee of $7.00 per transcript. This option is subject to the college’s ability to provide this service. Requests for transcripts or verifications may be obtained in the Office of Admissions and Records, ST-Lobby. Transcripts from another institution are not available for copying.

The student's transcript may be withheld if 1) any library books or other library materials are charged to the student and are unreturned, or 2) there are any unpaid fees, charges or other obligations due to the College or District. The transcript may be withheld until these obligations of the student are discharged.

Incoming transcripts: academic official transcripts submitted to the college will only be honored if they are addressed to the Los Angeles Trade-Technical College, Admissions Office via U.S. mail.

PREREQUISITE POLICY
Many courses listed in the class schedule will indicate suggested prerequisite, co-requisite/concurrent enrollment or recommended preparation/advisory listed after the name of the course. These recommendations were made after careful consideration by the faculty of that department. The Los Angeles Community College District has adopted a policy based upon a model developed by the State Chancellor's Task Force in conjunction with the State Academic Senate and Chief Instructional Officers and based upon Title V Article 2.5 Section 55200 and Article 4 Section 55530 of the Matriculation Regulations. In other words, your success is our primary goal. Your rights entitle you to file a ‘Challenge Form’ to challenge any prerequisite if you believe one or more of the following:

1. I have the knowledge, ability or skill to succeed in the course despite not meeting the prerequisite or co-requisite.
2. I will be subject to undue delay in attaining the goal of my educational plan because of the enrollment limitation, or because the prerequisite or co-requisite course has not been made reasonably available.
3. The prerequisite or co-requisite has not been established in accordance with applicable college policies and procedures.

4. The prerequisite or co-requisite is in violation of Title 5, Section 55200-55202 of the California Code of regulations.

5. The prerequisite or co-requisite, or enrollment limitation is either unlawfully discriminatory or is being applied in an unlawfully discriminatory manner.

6. The basis upon which the college established the enrollment limitation does not exist. Note: You have the right to participate in all activities related to matriculation components whether eligible for exemption or not. The matriculation program is our plan to ensure your success. For more information contact the Matriculation Department in Student Services Building, ST-303, Tel. 213-763-5348 or the Assessment Center, ST-303, 213-763-5339.

Challenge Process Information:
1. Complete the Challenge Application; provide an explanation and supporting documentation for your reason to challenge. You will need to present a valid photo ID to the Assessment proctor at the time of challenging.

2. Complete the Subject Exam of the prerequisite course you are challenging. This exam is to be completed in the Assessment Center in ST-303.

3. This is a one-time test. You will not be given any credit or grade for successfully passing the Challenge Exam. You will need to receive at least 70% to pass. If you are challenging several levels within the same subject you will need to pass the first test before you can challenge the next level.

4. Once you have completed the Challenge Exam it will be reviewed for approval by the Challenge Committee.

5. The Matriculation Department along with the committee has five business days (working) to notify you of your results. The committee consists of the following: Matriculation/Student Services Dean, General Counselor, and a Faculty of the subject you are challenging. Once your challenge results are in, you will be notified by phone or in-person. You will also receive a copy of the challenge application for your records.

6. Deadline to challenge: If you plan to enroll for the course in the most current term you will need to complete the challenge exam one month before the semester begins. Otherwise, you will need to wait for the next semester to enroll in the course.

For more information contact the Matriculation Department in ST-303, 763-5348 or the Assessment Center in ST-303 at 213-763-5339.

ACADEMIC HONORS

DEAN’S HONOR LIST
Each semester (Fall and Spring) - an Honor List is composed of students who have satisfactorily completed 12 or more units in a given semester with a 3.5 grade point average OR have completed 6 to 11.5 units in a semester with a 3.5 grade point average and have completed a cumulative total of 12 or more units with a 3.5 grade-point average in all work attempted. In recognition of this scholastic accomplishment, each student is honored and awarded a certificate. The certificate issued for the first and second semesters is titled DEAN’S HONOR LIST. For more information visit C-105 or call 213-763-7205.
ASSOCIATE DEGREE
The Board of Governors of the California Community Colleges has authorized the Los Angeles Community College District Board of Trustees to confer the degrees of Associate in Arts and Associate in Science. The program of study leading to the Associate Degree requires sufficient depth in a field of knowledge (the major) to contribute to lifetime interest and broad exposure to other areas of learning (the general education requirements).

Philosophy of General Education
General Education symbolizes a successful attempt on the part of the college to lead students through patterns of learning experiences designed to develop certain capabilities and insights. Among these are the ability to think and to communicate clearly and effectively, both orally and in writing, to use mathematics, to understand the modes of inquiry of the major disciplines, to be aware of other cultures and times, to achieve insights gained through experience in thinking about ethical problems, and to develop the capacity for, and sense of, self-understanding.

Associate Degree Requirements
The following Associate Degree requirements apply to students entering for the first time after July 1, 1983. Continuing students with uninterrupted attendance and demonstrating satisfactory graduation requirements listed in the catalog in effect at the time of their initial enrollment (Catalog Rights). A continuing student is one who has completed a minimum of one course calendar year, except that completion with a "W" will be accepted for one semester only. Students who interrupt their attendance become subject to any new requirements which are in effect at the time they re-enroll.

I. Unit Requirement
60 to 64 units of degree applicable course credit in a selected curriculum. One credit hour of community college work is approximately three hours of recitation, study, or laboratory work per week throughout a term of 16 weeks.

II. Scholarship Requirement
A "C" (2.0) grade average or better in all college work attempted in the curriculum upon which the degree is based.

III. Competency Requirement
Students must demonstrate competence in reading, in written expression, and in mathematics. The following courses and examinations are approved to meet the competency requirement for the associate degree as defined in Board Rule 6201.12:

A. The competency requirement in reading and written expression may be met by:
1. Completion of a course in College Reading and Composition with a grade of "C" or better. Or
2. Completion of any one of the following courses (or its equivalent at another college) with a grade of "C" or better:
   English 101; Journalism 101

B. The competency requirement in Mathematics* may be met by:
1. Completion of one of the following courses (or its equivalent at another college) with a grade of "C" or better:
   Math 125 or any higher level mathematics with a prerequisite of mathematics 115 or its equivalent (Math 125, 215, 216, 225, 227, 230, 235, 236, 240, 245, 260, 265, 266, 267, 270, 275);
   Statistics 1** Or
2. Achievement of a score of 15 or higher on the District Mathematics Competency Examination.
   *Board Rules 6201.14, 62201.12, & 8012.12
   **Not offered at L.A. Trade-Tech

IV. Residence Requirement
Completion of at least 12 units of work in residence and attendance at the college during the semester in which the graduation requirements are completed. Exceptions may be made under special circumstances.

V. Course Requirements
Majors requiring 18-35 units complete Graduation Plan A. Majors requiring 36 or more units complete Graduation Plan B. Effective for all students admitted for the Fall 2009 term or any term thereafter, each course counted toward the major requirements must be completed with a grade of "C" or better or a "P" if the course is taken on a "Pass-No Pass" basis.

ASSOCIATE TRANSFER DEGREE (AA-T or AS-T)
The Student Transfer Achievement Reform Act (Senate Bill 1440, now codified in California Education Code sections 66746-66749) guarantees admission to a California State University (CSU) campus for any community college student who completes an "associate degree for transfer", a newly established variation of the associate degrees traditionally offered at a California community college. The Associate in Arts for Transfer (AA-T) or the Associate in Science for Transfer (AS-T) is intended for students who plan to complete a bachelor's degree in a similar major at a CSU campus. Students completing these degrees (AA-T or AS-T) are guaranteed admission to the CSU system, but not to a particular campus or major. In order to earn one of these degrees, students must complete a minimum of 60 required semester units of CSU-transferable coursework with a minimum GPA of 2.0. Students transferring to a CSU campus that accepts the AA-T or AS-T will be required to complete no more than 60 units after transfer to earn a bachelor’s degree (unless the major is a designated "high-unit" major). This degree may not be the best option for students intending to transfer to a particular CSU campus or to university or college that is not part of the CSU system. Students should consult with a counselor when planning to complete the degree for more information on university admission and transfer requirements.

At the time of catalogue publication, no majors for the AA-T or AS-T have been approved. Majors are under development. Please see a counselor for more information.
Associate Transfer Degree Requirements
The following is required for all AA-T or AS-T degrees:

1. Minimum of 60 CSU-transferable semester units.
2. Minimum grade point average (GPA) of at least 2.0 in all CSU-transferable coursework. While a minimum of 2.0 is required for admission, some majors may require a higher GPA. Please consult with a counselor for more information.
3. Completion of a minimum of 18 semester units in an "AA-T" or "AS-T" major as detailed in the section of the catalog. All courses in the major must be completed with a grade of C or better or a "P" if the course is taken on a "pass-no pass" basis (title 5 § 55063).
4. Certified completion of the California State University General Education-Breadth pattern (CSU GE Breadth) (see page 33 for more information); or the Intersegmental General Education Transfer Curriculum (IGETC) pattern (see page 34 for more information).

Graduation Application for Degree/Certificate
Applications are available in ST-Building lobby at the Information Desk. Students must complete an application with a Counselor and submit the application in the Admissions & Records drop box located at the Information Desk during the first 6 weeks of the Fall/Spring semester in which the student expects to complete the Degree/Certificate requirements. All students must file an application for degree/certificate evaluation during the first 6 weeks of the semester in which they expect to complete their degree/certificate requirements with a Counselor. Students completing the course work during the Winter/Summer semester Session must submit an application during the first 6 weeks of the preceding Fall/Spring semester. Late applications will NOT be accepted. Applications for Degree/Certificate, of a discontinued instructional program, will NOT be accepted beyond 3 years after the program is removed from the College Catalog. Students should see a counselor for evaluation of requirements for graduation.

Students will be informed by mail of the results of their Degree/Certificate evaluation before the end of the semester in which the application is submitted:
• Fall/Winter Candidate will be notified by December/January
• Spring/Summer Candidate will be notified by May/June

Students who do not meet the graduation requirements must submit a new application during the first 6 weeks of the semester (Fall/Spring) in which they expect to complete all the requirements (excluding Winter/Summer).

By submitting an application the student has the option to participate in the graduation ceremony whether they meet the requirements or not. Students will be notified by mail regarding the Graduation Ceremony held in June.

Students successfully completing all the requirements will be notified through the mail when the degrees/certificates are ready for pick up:
• Fall/Winter semester – will be ready for pick up after June
• Spring semester – will be ready for pick up after August
• Summer session – will be ready for pick up after September

Transcripts from other institutions must be mailed directly to the Admissions & Records Office by the respective colleges for credit.

STUDENTS MUST PRESENT THE NOTIFICATION CARD AND PICTURE IDENTIFICATION WHEN PICKING-UP DEGREE/ CERTIFICATE.

CERTIFICATE OF ACHIEVEMENT
A Certificate of Achievement is issued in State-approved programs designed for students who are looking for instruction with a high degree of specialization. Certificate programs vary in length, but most have 18 or more semester units, and may be pursued on a full-time or part-time basis. Certificate programs are usually one year educational programs that offer courses needed to prepare students for immediate employment. A Certificate program is specific, and no course substitution will be permitted unless approved by the department. A grade of "C" or better is required in each course required for the major.

The Certificate of Achievement shall be granted by Los Angeles Trade-Technical College to any student who successfully completes a sequence of courses established by the department and approved by the college in certain designated programs. That sequence of courses shall include but not be limited to the essential occupational courses required in the major. All courses applied to a certificate program must be completed with a grade of "C" or better.

Application for a Certificate of Achievement must be filed in the semester in which the certificate is granted with a Counselor. Students completing the course work during the summer session must file an application during the first six weeks of the prior spring semester.
### General Education Requirements

Students who are interested in transferring to a four-year college or university should visit the University Transfer Center, ST-203 or consult with a counselor regarding which courses can transfer.

#### Major Requirement

- **Student's Name:** ______________________________________________________
- **(Please print)**
- **Last**  ____ **First**  ____ **Middle**  ____ **SSN (or student ID#)**

#### Units Requirement

You must apply for graduation. Forms and instructions are available in the Admissions and Records Office, Student Services Building, ST-Lobby.

#### Scholarship Requirement

- Successful completion of at least 30 semester units of general education as indicated in the areas below.
- A "C" (2.0) grade average or better in all college work attempted in the curriculum upon which the degree is based.
- At least 18 semester units of study taken in a single discipline or related disciplines.

#### D. LANGUAGE & RATIONALITY (12 units minimum)

**COMPETENCY REQUIREMENT**

- Completion of one of the following courses (or its equivalent at another college) with a grade of "C" or better.

**English 101**

**2. Communication & Analytical Thinking**

Select two courses from the list below to meet the mathematics competency. Complete at least one course listed in Section A below (or an equivalent at another college) must be completed with a grade of "C" or better OR Achievement of a score of 15 or higher on the District Mathematics Competency Examination

- Math 125 (Elective only; Math 114 & 115)

**General Education Requirements:**

- Successful completion of at least 30 semester units of general education as indicated in the areas below.
- A "C" (2.0) grade average or better in all college work attempted in the curriculum upon which the degree is based.
- At least 18 semester units of study taken in a single discipline or related disciplines.

### Note:

- Nursing students are exempted from the Health requirement. Persons requiring exemption from physical education for medical purposes or extenuating circumstances must file a general petition in the Office of Admissions & Records, ST-Lobby.
- Students who take and pass competency examinations are awarded competency credit but no unit credit.

Certification of these units is not automatic and must be requested. First, see a counselor to have records evaluated for certification. Counselors forward completed certification form to Admissions Office Evaluation Technicians. Coursework from other colleges or universities must be on file (official transcript) in the Admission Office.
The Intersegmental General Education Transfer Curriculum (IGETC) is a series of courses that community college students can use to satisfy lower division general education requirements at any CSU or UC campus. The IGETC provides an option to the California State University General Education Requirements. Students in high unit majors are encouraged to follow a particular UC campus' breadth requirements instead of the IGETC.

See a counselor for additional information. IMPORTANT: The IGETC must be certified prior to transfer! If not certified, a student will be required to complete the four-year university's own general education/breadth requirements and additional lower-division coursework may be required. All courses must be completed with “C” grade or higher. (See your counselor for certification)

### 2011-2012 UC/CSU – IGETC GENERAL EDUCATION CHECK SHEET

PRE-PROFESSIONAL EDUCATIONAL PATHWAYS

Please see the Counseling Department on the 4th Floor of the Student Services (ST) Building, Room ST-428.

COOPERATIVE WORK EXPERIENCE EDUCATION

PROGRAM OVERVIEW

Cooperative Work Experience Education (CWEE) combines on-the-job experience with regular classroom instruction. It is designed to expand students’ skills and knowledge, and to improve self-understanding by integrating classroom study with supervised work experience.

CWEE is based on the principle that well educated individuals develop most effectively through the incorporation of related education and work experience. By monitoring structured work experiences in business, industry, government and human services settings, LATTC provides enrichment to college studies which enhance the student’s total development.

In the Cooperative Work Experience Education program, individual students’ educational objectives are carefully planned and coordinated between the College and employer to ensure a positive and realistic employment experience.

Cooperative Work Experience Education has the following objectives:

- To provide opportunity for the student to secure employment on a part-time or full-time basis.
- To gain realistic work experience that is meaningfully related to the student’s college study program.
- To provide the student the opportunity to acquire knowledge, skills, and attitudes essential for successful employment.

A student enrolled in Cooperative Work Experience Education:

- Has the opportunity to learn or improve employment skills under actual working conditions.
- Gains perspective on career goals through application of classroom theory to “real life experience.”
- Builds self-identity and confidence as a worker through individual attention given by instructor/coordinators and employers.
- Has opportunities to test personal abilities in work environments.
- Has a more realistic approach to the Job market.
- May refer to work experience education in future job applications.
- Benefits financially while learning, and can begin a career earlier.

Students employed in a job not related to their major should enroll in:

COOP ED General Course: 395
Section: 9001
Units: 3
Room: D-236

Students employed in a job related to their major should enroll in:

COOP ED MAJOR Course: 941
Section: See schedule
Units: 4
Room: D-236

STUDENT QUALIFICATIONS

OCCUPATIONAL WORK EXPERIENCE (PARALLEL PLAN)

Hours by arrangement: 1-4 units
Prerequisite: Approval of Work Experience Coordinator.
This is a program of on-the-job learning experience for students employed in a job related to an occupationally oriented major. The program may be repeated three times for a maximum of 16 units. To receive credit a student must complete a minimum of seven units during the semester, including work experience.

OCCUPATIONAL WORK EXPERIENCE (ALTERNATE PLAN)

Hours by arrangement: 1-8 units
Prerequisite: Approval of Work Experience Coordinator
This is a program of on-the-job learning experiences full-time one semester and work full-time the following semester. Work must relate directly to the student’s educational goal. students must have satisfactorily completed at least seven units of credit and not be enrolled concurrently in more than one other course. The program may be repeated three times for a maximum of 16 units.

CALIFORNIA STATE UNIVERSITY: APPROVED COOPERATIVE EDUCATION SUBJECT AREAS

Los Angeles Community College District policy provides that a maximum of eight (8) semester units in cooperative education courses completed in the subject areas listed below may be applied toward the California State University 56 unit admission requirement.

COOPERATIVE EDUCATION

■ COURSE DESCRIPTIONS

The following courses provide Cooperative Work Experience Education credit:

911 WORK EXPERIENCE IN MAJOR I (1) RPT3 (CSU)
921 WORK EXPERIENCE IN MAJOR I (2) RPT3 (CSU)
931 WORK EXPERIENCE IN MAJOR I (3) RPT3 (CSU)
941 WORK EXPERIENCE IN MAJOR I (4) RPT3 (CSU)

Prerequisite: Employment in a field related to the students’ major as verified by the signature of the cooperative education advisor. Supervised training is conducted in the form of on-the-line job training in an employment area that will enhance the students’ educational goals on campus.
Additional courses within the disciplines listed below provide Cooperative Work Experience Education credit:

- Automotive Technology
- Business
- Carpentry
- Child Development
- Computer Application and Office Technology
- Cooperative Education
- Culinary Arts
- Diesel Technology
- Electrical Construction and Maintenance
- Fashion Design
- Fashion Merchandising
- Labor Studies
- Machine Tool Technology
- Nursing
- Operating/Maintenance Engineer
- Plumbing Technology
- Refrigeration and Air Conditioning Mechanic
- Solid Waste Management Technology
- Supply Water Systems Technology
- Waste Water Management
- Welding/Gas and Electric
ADMISSION AND REGISTRATION

Phone: (213) 763-5300
Location: ST-Lobby
Hours: Monday – Thursday, 8:00 a.m. – 7:00 p.m
     Friday, 8:00 a.m. – 3:00 p.m

The following procedure should be followed to enroll in Los Angeles Trade-Technical College: Students must disclose any previous enrollment in institutions of collegiate level. Failure to list any school, college, or university which you previously attended, or any deliberate falsification of information, is basis for dismissal from the college. Obtain an Application Packet and Enrollment Appointment from the Information Center in ST-Lobby.

Submit the completed APPLICATION with picture ID. Effective July 24, 2006 the college will no longer use social security numbers to identify students. A new student identification number will be assigned to all students because of recently passed state laws. Once a new student I.D. number is assigned, this number shall be used when students apply at another LACCD campus. Non-U.S. Citizens should bring proof of their immigration status so that the College may determine their residency for tuition purposes. You may also submit your application online at www.lattc.edu. If you are a returning student or have attended one of the LACCD colleges, you may submit your application online. The ORIENTATION is designed to introduce our many educational programs, services and explain how to complete the enrollment process.

The ASSESSMENT will help students determine which level classes are most appropriate for your skill level. This is NOT a pass or fail nor a graded test. It will be used with other factors to help the counselor or faculty mentor assist students with course selection. Please allow approximately 2 hours for this portion of your enrollment. NOTE: If students have an Associate degree or higher, completed a college level English or Math class, or have taken an assessment within the last two years, they may be exempted from this assessment. However, we want students to be aware of the many services and programs available at Los Angeles Trade-Technical College.

After the Orientation and/or the Assessment, students may speak to a counselor. Counselors will recommend appropriate courses based on educational goals; students may then register for classes. See class schedule or college website (www.lattc.edu) for exact registration dates.

After registration students can now proceed to the Business Office, ST-Lobby, to pay all fees. Student I.D. Cards with the new student I.D. number will be issued in ST-Lobby.

COLLEGE DEADLINE POLICY
The college strictly enforces the published deadlines for admissions application, dropping, adding classes, fee refunds and graduation applications.

RESIDENCY REQUIREMENTS

California Residence Requirement
To attend any of the Los Angeles Community Colleges as a resident of California, a student is required to have been a California resident for more than one year immediately preceding the Residence Determination Date. The "Residence Determination Date" is that day immediately preceding the opening day of instruction of the semester or summer session. Residence is defined as a union of act and intent.

District Residence Requirement
At the time of application each student is required to file a Statement of Residence to ascertain the college district jurisdiction in order to comply with requirements of the law. The information given by each student is subject to certification, and any falsification can result in immediate cancellation of registration and exclusion from the College Residence Appeal.

A student may appeal the residence classification determined by the college. The appeal must be made within 30 calendar days of receipt of notification of the residence classification from the Admissions Office. The appeal must be submitted in writing to the college Admissions Officer who will forward it to the District Residency Appeal Officer.

Residence - More Than 60 Miles From Nearest College
Full time students under 21 years of age and honorably discharged veterans under 25 years of age who live 60 miles from any college are eligible for a maintenance allowance. See Registrar for additional information.

Non-Resident
A non-resident student is one who has not had residence in the State of California for more than one year immediately preceding the Residence Determination Date.

Residence is defined as a union of act and intent. Physical presence alone is not sufficient to establish California residency nor is intent when not coupled with continuous physical presence in the State. Certain non-U.S. citizens are permitted to establish residency and certain others are not. Check with the Admissions Office regarding your particular status.

A student classified as a non-resident will be required to pay nonresident tuition fees as established by the District Board of Trustees. Failure to pay fees on time will result in student being dropped from classes.
IMPORTANT INFORMATION
Effective January, 2002, all students regardless of their immigration status, who meet all the requirements set under the new law AB540, can be exempted from Non-Resident Tuition. Please see Admissions & Records Office, ST-Lobby, for details.

Residence Reclassification
Students who have been classified as non-residents must petition to be reclassified as residents if they feel their status has changed. The Residence Reclassification forms are available in the Admissions Office and must be submitted prior to the semester in which reclassification as a resident is to be effective.

ADMISSION ELIGIBILITY
You are eligible to attend LA Trade-Technical College if you meet any of the following criteria:

1. You have graduated from high school or have successfully passed the California High School Exit Examination.
2. You are over 18 years of age and are no longer attending high school and are capable of profiting from the instruction offered.
3. You are under 18 years of age and not a high school student, with special permission as a full-time student, or concurrently enrolled student.

CONCURRENT ENROLLMENT AT LA TRADE-TECHNICAL COLLEGE
As a high school student you may enroll concurrently at L.A. Trade-Technical College. In addition to the application for admission, you must submit a separate concurrent enrollment form, approved by your high school counselor and your parents. All K-12 students require special processing. Call (213)-763-5560 for details. Concurrent students are given the last priority for registration.

ENROLLMENT POLICIES
Adding Classes
Only students who have been admitted to the college and are in approved active status may add classes. Enrolled students who wish to add a class prior to the first day of classes should complete an “ADD/DROP Card” and take the form to the Admissions Office prior to the first day of classes or use the internet system at www.lattc.edu. After the ADD/DROP Card is processed, the student will receive a Station 4 Completion Form, indicating that the student’s schedule adjustment has been processed. The student must take the Completion form to the Business Office. Official confirmation of a student adding a class validated by a computer generated REGISTRATION/FEE RECEIPT from the Business Office showing the class changes and fees paid.

Late Add
After classes have started, a student may be permitted to add an OPEN class (es), defined as a class section with five (5) or more open seats on the daily basis. The Late Add period is defined as the first six (6) business days (including Saturday) after a class begins. During this period, students may receive an ADD PERMIT approved and signed by the instructor who teaches the section. The ADD PERMIT is available from the departments, the instructors.

The student must submit the signed ADD PERMIT to the Office of Admissions and Records within the same day that the ADD PERMIT is issued, and return the copy to the instructor the next class meeting date. After the Late Add Period, only the instructor who teaches the section(s) has the right to issue and sign an ADD PERMIT for regular term classes.
Auditing Classes
Students may be permitted to audit a class under the following conditions:

1. Complete an application and be authorized to register in the college.
2. Obtain permission of the instructor of the class at the beginning of the semester.
3. Pay a fee of $15 per unit. Fees may not be refunded. Students enrolled in classes to receive credit for ten or more semester units shall not be charged a fee to audit three or fewer semester units per semester. Students who drop below ten units will be required to pay the 3 units audit fee.

No student auditing a course shall be permitted to change his or her enrollment in that course to receive credit for the course. Student taking course for credit shall not be permitted to drop to audit the same course. Priority in class enrollment shall be given to students desiring to take the course for credit.

Enrollment in Same Course
Concurrent enrollment in more than one section of the same course during a semester is not permitted with the exception of certain Physical Education classes on a limited basis. Concurrent enrollment in courses which are cross-referenced to each other is not permitted (i.e., courses designated “same as” in the District Directory of Educational Programs and Courses). Violation of this regulation will result in exclusion from class and denial of course credit in both courses. Enrolling in classes scheduled or conducted during overlapping times is not permitted. Students will be excluded from both classes and denial of credits and subject to disciplinary action (See Standards of Student Conduct).

Dropping Classes
Students wishing to drop one or more classes must do so through the Admissions Office by filing an ADD/DROP form or DROP CARD or use the internet system (www.lattc.edu). It is the student’s responsibility to DROP the class. If the class is not dropped, the student may receive an “F” in that class and may be liable for any fees. Classes dropped before the end of the 4th week or 30% of the class length (whichever is less) will not appear on the student’s record. Any drops or exclusions that occur between the end of the 4th week and the end of the 12th week will result in a “W” on the student’s record. After the last day of the twelfth week (or 75% of the class length) drops are not permitted. If the class is not dropped, the student may receive an “F” in that class.

Violation of this regulation will result in exclusion from class and denial of course credit in both courses. Enrolling in classes scheduled or conducted during overlapping times is not permitted. Students will be excluded from both classes and denial of credits and subject to disciplinary action (See Standards of Student Conduct).

Verification of Enrollment
Verification of the Student’s Enrollment may be obtained upon written request. Verification Request Forms are available in the Admissions Office. District policy prohibits the acceptance of Verification Requests over the phone. Please allow ten (10) working days for processing. The first two verifications or transcripts (see Transcripts section on this page) EVER requested are free. Each additional request is $3.00 per copy. Students may request same day processing to expedite their request for an additional fee of $7.00 per verification. Requests for Verification of Enrollment by Agencies or Individuals other than the student must be accompanied by a signed release permitting the College to release that student’s information. A valid photo ID is required when picking up the verification.

INTERNATIONAL STUDENTS ADMISSION (F-1 VISA)

Phone: (213) 763-5345
Fax: (213) 763-5991
Location: Student Services Building ST-415
Office Hours: Monday through Friday, please call for an appointment
Website: http://college.lattc.edu/international
Email: intstud@lattc.edu

F-1 International Students Admission
Los Angeles Trade-Technical College (LATTC) welcomes applications from international students. We also accept transfer applications for F-1 Visa students currently studying in the U.S. as well as Change of Status applications for visitors who currently have other visas. Applications may be obtained by contacting the office or on-line.

Application Deadlines:
- Fall Semester: July 1
- Spring Semester: December 1

F-1 students transferring from schools within the United States (US) and students who are applying for a Change of Status have a more flexible deadline. Call our office for more information.

The applicant must provide:
1. The supplemental International Students Application
2. Official TOEFL scores sent directly from Educational Testing Services – this may be waived if you are from a country that uses English as its primary language of instruction or if you are transferring from a school within the United States. We also accept the International English Language Test Skills (IELTS) report and the Step Eiken in lieu of the TOEFL. Please contact us for all test cut scores.
3. Two recent passport sized photographs of applicant
4. Official transcripts and/or diplomas from secondary school or colleges attended – Student must be a high school/secondary school graduate.
5. LATTC Affidavit of Support with an attached official bank statement or letter with a minimum of $17,000 USD in available funds dated within the last 6 months
6. Non-refundable $35 application fee – check, cash, or money order (do not send cash in the mail)
7. Copy of valid passport identification page
8. Transfer students must also submit the following documents: the LATTC Transfer Eligibility Form, a copy of your current I-20, a copy of your visa, and a copy of the front and back of your I-94

Please allow 2 – 4 days for application processing time once ALL documents are received by the college. Eligible students will be issued an I-20A form by LATTC. This document can be used by the student to obtain an F-1 Visa from a US Embassy in his/her home country. Students who are already in the country may use this new I-20 to change their visa status or to complete their transfer process from another educational institution.
International student fees are approximately $243 per unit, which is subject to change by the California legislature. Health care in the United States can be costly without proper insurance coverage. Starting the Fall 2007 semester, LATTC International Students will automatically be enrolled in an insurance plan through Renaissance Insurance. The cost for a 6-month period of coverage is $474, which is subject to change. The $474 will be included as part of your LATTC fees every Fall and Spring Semester (no waivers). Please visit our office for a copy of your benefits.

Per U.S. Citizenship and Immigration Services (USCIS) regulations, all F-1 International Students must maintain a full-time course load during the Fall and Spring semesters – certain exceptions apply, please see your Designated School Official (DSO) for more information. A full-time course load is defined as a minimum of 12 units. Dropping below 12 units without PRIOR written permission from the DSO places your student status at risk. F-1 students are not required to attend the Winter and Summer Sessions but may do so if they wish.

MATRICULATION SERVICES

Phone: (213) 763-5348
Location: Building ST-303
Hours: Monday, Tuesday, Thursday, 8:00 a.m. to 7:00 p.m.
       Wednesday, 8:00 a.m. to 8:00 p.m.
       Friday, 8:30 a.m. to 3:00 p.m.

Matriculation is a process that brings Trade-Technical College and students (who enroll in credit courses) into an agreement to assist students in attaining their educational goal through the college’s programs, policies and requirements. It involves a partnership between the student and the college which begins when students apply for admission and ends after completing your studies.

ASSESSMENT

LATTC offers a self-paced computerized assessment placement test. LATTC also offers a timed paper and pencil assessment placement test (Companion). Students receive an assessment summary that may be used to select their courses and to plan their educational career goals. Course recommendations are advisory and should be discussed with a counselor.

The Assessment Center provides services to complete the Prerequisite/Co-requisite Challenge Exams and course prerequisite/co-requisites clearances.

The Assessment Center offers “Tests of Adult Basic Education (TABE)” a diagnostic test. This test will measure the student’s grade level in Language, Math, and Reading. This is not a pass/fail test. This is a timed test. Testing is available through department referral. Please see the Assessment Center for further information.

ORIENTATION

Orientation – provides students with a variety of programs and services at LATTC. Students who would like to speak directly with college representatives and receive information regarding the programs and services may attend an in-person orientation (see Matriculation webpage for dates).

EARLY ALERT

Early Alert provides mid-semester evaluation and feedback of a students’ academic progress according to their classroom instructors. Referrals to support services are made when needed or requested and College Success workshops are offered throughout the semester (see Matriculation webpage for dates).
ASSOCIATED STUDENT ORGANIZATION (ASO) FEE

ASO programs are supported by a $7.00 membership fee, available at the Business Office, for day and evening students. These fees are necessary to utilize A.S.O. services. Any student, upon enrolling, is eligible to become a paid member of the Associated Student Organization. Associated Student Organization members are entitled to all rights and privileges, including preferred parking, loan application, dances, athletic contests, and all activities of the Associated Students. Also, all students must also pay one dollar Student Representation Fee that supports student issues, policy and procedures, and advocacy activities that benefit students.

ENROLLMENT FEE

The State Education Code requires Community Colleges to charge enrollment fees* of each student enrolling in college. The fee prescribed by these sections shall be thirty-six dollars ($36) per unit per semester with no maximum amount per semester. For example, if you enroll for ten units, the fee will be $360. If you enroll for fifteen units, the fee will be $540. See the Financial Aid Office prior to payment for enrollment fee waiver assistance.

Non-resident students paying non-resident fees are required to pay the sixty-three dollars ($63) per unit enrollment fee. All students who pay fees are provided with a Registration Fee Receipt at the time of payment. Los Angeles Trade-Technical College does not automatically drop students from a class for nonpayment of enrollment fees.

ENROLLMENT FEE REFUND POLICY

For full term courses: a student may receive a full refund for classes dropped (and refunds requested from the Business Office) through the end of the second week of instruction. There will be no refunds for classes dropped after that, unless a class is canceled or rescheduled by the college administration. After the second week of classes, the student may drop a course and use the fee previously paid that semester to add another class. Therefore, we advise the student to drop and add at the same time.

For short term, Summer session, and Winter Intersession courses: The student may receive a full refund for classes dropped (and refunds requested in the Business Office) through the end of a period of time equal to 10% of total class time usually during the first week of classes. There will be no refunds after that, unless a class is canceled or rescheduled by the administration. Students are required to request refunds at the Business Office at the time they drop their classes even if dropping by telephone. If college expenses have been paid by federal financial aid funds, any refund due will revert to the financial aid program rather than to the student. Expenses paid by financial aid may be subject to a special pro-rata refund calculation.

Contact the Financial Aid Administrator or the College Financial Administrator for specific information regarding refund calculations for financial aid recipients.

HEALTH SERVICES FEE

The Board of Trustees has required that each college collect a mandatory eleven-dollar ($11) health services fee during the Fall and Spring semesters and an eight-dollar ($8) fee during Summer session and Winter Intersession. This fee must be paid at the time of registration. Los Angeles Community College District Policy exempts the following students from paying the student health fee: (a) students who depend exclusively on prayer for healing in accordance with the teaching of a bonafide religious sect, (b) students who are attending classes under an approved apprenticeship training program, (c) non-credit education students, (d) students enrolled in District colleges exclusively at sites where student health services are not provided, (e) students who are enrolled District colleges exclusively through Instructional Television or distance education classes, (f) student who are enrolled in District colleges exclusively through contract education. Students exempted under the provisions of (b), (c) above are eligible to receive the services of the college health program; all other exempted students are not eligible to receive the services of the college health program. Students who are exempted may obtain a Health Services Exemption Form from the Admission Office (ST-Lobby). Completed forms must be returned to the Admissions Office for approval. See the Financial Aid Office (ST-214) for other possible exemptions.

INSTRUCTIONAL MATERIALS

Students may be required to provide and/or pay for instructional and other materials for credit or noncredit courses. Such materials shall be of continuing value to a student outside of the classroom setting and shall not be solely or exclusively available from the District. If class materials are provided, the student may be assessed those costs for materials. Payment and verification of material fees is to be completed at the college Bookstore, K-102 or Business Office, ST-Lobby.

NON-RESIDENT TUITION FEE

The 2011-2012 tuition for non-resident students is $186 per unit plus the $36 per unit enrollment fee. Fees must be paid at the time of registration. The 2011-2012 tuition for foreign students is $204 per unit plus the $36 per unit enrollment fee and the Board of Trustees adopted $10 per unit fee pursuant to Education Code Section 76140. These fees are subject to change each academic year. International students must first pay a non-refundable $35 application fee. The Board established a twenty-five dollar $25.00* per semester processing fee for students classified as nonresidents who are both citizens and residents of a foreign country. These fees are subject to change each academic year.

*Subject to change by the California Legislature

Notes:
1. Fees paid by federal financial aid funds will be subject to a special refund calculation.
2. Non-resident students are also required to pay the community college enrollment fee.
A non-resident student who formally drops or otherwise separates from part or all of his/her enrollment may request a refund of previously paid non-resident tuition in accordance with the schedule below. Such request must be made in writing at the Business Office at the time the classes are dropped. The date used for non-resident refund purposes is the date on which such request is filed and time stamped, regardless of when separation may have occurred. All non-resident refunds will be made by mail.

Non-resident refunds will be computed as follows:

<table>
<thead>
<tr>
<th>CLASS TYPE</th>
<th>DATE REQUEST FILED</th>
<th>REFUND</th>
</tr>
</thead>
<tbody>
<tr>
<td>Regular Length</td>
<td>Through second week of instruction</td>

</table>

STUDENT REPRESENTATION FEE

The student representation fee is a mandatory $1.00 (one dollar) per semester fee to provide support for students/representatives who support student viewpoints before various governmental offices and agencies. Students may for religious, political, financial or other reasons, refuse to pay the fee in writing on a form provided for this purpose.

PARKING FEE

To encourage membership in the Trade-Tech Associated Students’ Organization (ASO), the College Administration has entered into an agreement with the ASO whereby students who pay both the District parking fee and join the ASO will receive as a benefit of membership preferred parking privileges in Fall and Spring Semesters. A limited number of Preferred Student Parking Permits sold on a first come basis are available for purchase at the Business Office for $27.00 (includes $7.00 ASO fee), General Student Parking Permits cost $20.00 at the 18th Street & Grand Avenue Lot and at Glory Church located at Washington Boulevard & Grand Avenue. General Student Parking for Winter and Summer Session is $10.00. Parking in areas marked “parking by permit only” is restricted to vehicles displaying a valid permit. Vehicles parking on college property without a valid permit will be subject to citation.

MTA MONTHLY TAP CARD FEE

Full-time students with a minimum of 12 units may purchase a monthly MTA TAP Card which allows them unlimited rides on Metro bus and rail lines at a reduced rate and must be applied for in advance. The monthly cost is $36.00. Go to the MTA website for more information.
FINANCIAL AID
Phone: (213) 763-7082
Location: Student Services Building ST-214
Hours: Monday - Thursday: 8:00 a.m. to 7:00 p.m.
       Friday: 8:00 a.m. to 3:00 p.m.

Financial Aid Staff Assisted Lab
Location: Student Services Building ST-314
Hours: Monday - Thursday: 9:00 a.m. to 6:00 p.m.
       Friday: 8:00 a.m. to 3:00 p.m.

GOAL
The goal of the Financial Aid Program is to provide access to various types of post-secondary education for those who otherwise would be unable to start or continue their schooling and/or training.

FINANCIAL AID - WHAT IS IT?
Financial Aid is funding provided by the federal and state governments, and private sources in the form of grants, scholarships, loans and employment. These funds are available to make it possible for students to continue their education beyond high school even if they and/or their family cannot meet the full costs of the post secondary school they choose to attend. The basis for such programs is the belief that students and their families have the primary responsibility to meet educational costs. Financial aid is meant to supplement your existing income and/or financial resources and should not be depended upon as your sole mean of income to support all educational and other non-educational expenses.

WHO CAN APPLY?
To be considered for financial aid, a student must meet the following minimum requirements:

- Be a U.S. citizen or an eligible non-citizen. An eligible non-citizen is a U.S. permanent resident as determined by the Immigration and Naturalization Service verifying that their stay in the U.S. is for other than a temporary purpose.
- Show financial need.
- Enroll as a regular student in an eligible program.
- Make satisfactory progress in a course of study leading to an AA or AS degree, certificate, or transfer to a baccalaureate degree program.
- Must not be in default on a Federal Perkins Loan (formerly National Direct Student Loan), Stafford Loan (formerly Guaranteed Student Loan (GSL), Supplemental Loans for Students (SLS), or Direct Loan at any school the student attended.
- Must not owe a refund on a Federal Pell Grant, Federal Supplemental Educational Opportunity Grant (FSEOG) or Leveraging Educational Assistance Partnership (LEAP) Grant.
- Register with the Selective Service if required to do so.
- Have a valid Social Security Number (SSN).
- Have a valid State picture ID or Driver License.
- Have a high school diploma or its equivalency, such as GED, or pass an Ability to Benefit Test (ATB).

Note: Students who are not high school graduates must provide documentation of ability to benefit by passing a federally approved, independently administered test or successfully completed six college units applicable to a degree or certificate offered by the college.

WHEN TO APPLY
- January 1 of each calendar year is the beginning of the application period for Federal and State financial aid.

PRIORITY and DEADLINE DATES FOR 2011-2012:
- March 2, 2011 - CAL GRANT DEADLINE for both high school seniors and community college students
- September 2, 2011 - Second deadline for community college students to apply for CAL GRANT B
- June 30, 2012 is the deadline for filing a Free Application for Federal Student Aid (FAFSA) for 2011-2012
- May 2, 2011 – is the Priority date for Fall & Spring

Students should continue filing their Free Application for Federal Student Aid (FAFSA) even if they miss the PRIORITY DATE because PELL GRANTS, ENROLLMENT FEE WAIVERS, JOBS and LOANS will continue to be awarded to qualified applicants throughout the academic year if funds are available.

HOW TO APPLY
Students can apply for the Free Application for Federal Student Aid (FAFSA) on line. The financial aid staff in the Financial Aid Staff Assisted Lab located at Student Services Building ST-314 provides application assistance to students. The web-site for the application is www.fafsa.gov. Make sure you enter the school code: 001227 on your application. Student should come to the Financial Aid Office to submit the required documents and forms to complete the process after applying on-line for about two weeks. An award letter and financial aid disbursements will be deposited into student’s Higher One Debit Card after the application is completely processed.

FINANCIAL AID PROGRAMS
The Financial Assistance Programs available at Trade-Tech are:

- FEDERAL PELL GRANT
- FEDERAL SUPPLEMENTAL OPPORTUNITY GRANT (FSEOG)
- FEDERAL WORK STUDY (FWS)
- FEDERAL PERKINS LOAN
- FEDERAL DIRECT LOAN
- CALIFORNIA STATE GRANTS (CAL GRANTS)
- SCHOLARSHIPS
- BOARD OF GOVERNORS FEE WAIVER

Students can apply for one or more of these programs by filing a Free Application for Federal Student Aid (FAFSA). Campus scholarships and the Board of Governors Fee Waiver require separate applications.
ENROLLMENT FEE ASSISTANCE

For immediate enrollment fee assistance, students who are unable to pay the enrollment fee should complete the Board of Governors’ Enrollment Fee Waiver application and submit it to the college Financial Aid Office for processing prior to payment of their enrollment fees. Students who had a fee waiver last year must submit a new application for the new year which includes Summer 2011, Fall 2011, Winter Intersession 2012, and Spring 2012. Applications are available in the class schedule, the Information Center, and the Financial Aid Office.

There are three ways to qualify:

*Method A (BOG A) – For families or students who receive TANF/ CALWORKS, General Relief (GR), Supplemental Security Income (SSI/ SSP).

Method B (BOG B) – For families or students whose family income and size fall with the following limits:

BOARD OF GOVERNORS FEE WAIVER PROGRAM (BOGFW-B)

2011-2012 INCOME STANDARDS

<table>
<thead>
<tr>
<th>FAMILY SIZE</th>
<th>2010 INCOME</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>$16,245</td>

<td>$44,295</td>
</tr>
<tr>
<td>7</td>
<td>$49,905</td>
</tr>
<tr>
<td>8</td>
<td>$55,515</td>
</tr>
</tbody>
</table>

Each additional family member add $5,610

Special Classification Enrollment Fee Waivers:
You are also eligible for a BOG if:

- A dependent of a deceased or disabled veteran of the U.S. Military
- A recipient of a Congressional Medal of Honor or a child of a recipient
- A dependent of a victim of the September 11, 2001 terrorist attack
- A dependent of a deceased law enforcement/ fire suppression person killed in the line of duty.

*Proof of these benefits is required.

Method C (BOG C) – Students who do not meet the above criteria, but have financial need as established by the College Financial Aid Office, may also be eligible for an Enrollment Fee Waiver. To qualify, students must complete a Free Application for Federal Student Aid (FAFSA) and provide proof of prior year income. Processing of this type of fee waiver takes approximately five working days.

Note: Effective Fall 2006, the health fees are no longer part of the fee waiver. All BOG fee waiver recipients are required to pay the student health fee. Financial Aid recipients can have health fee deducted from their financial aid disbursement.

SCHOLARSHIPS

Because of the nature of the College and the close cooperation with business, industry and alumni, there is an on-going scholarship program available to students of the College. In addition to the availability of college-wide general scholarships, various departmental scholarship opportunities are offered to students majoring in those areas. Specific information on the availability of campus scholarships is located in the Financial Aid Office website.

SATISFACTORY ACADEMIC PROGRESS FOR FINANCIAL AID

To be eligible for federal and state financial aid, students are required by the U.S. Department of Education and the State of California to maintain satisfactory progress toward completing their degrees or certificates. In compliance with prescribed regulations, the Los Angeles Community College District (LACCD) has established guidelines designed to promote timely advancement toward specific degree and certificate objectives. Effective July 1, 2011, to satisfy academic progress requirements, financial aid students must meet the following:

- Maintain a cumulative Grade Point Average (GPA) of 2.0.
- Have less than 90 units attempted at the beginning of the academic year.
- Non-grades (W, INC, NCR) must be 33% or less of cumulative units attempted.

Disqualification – Students will be disqualified and will not receive financial aid if they have one or more of the following deficiencies at the end of each semester:

- Total units attempted (excluding ESL and 30 units of Basic Skill/ Remedial classes) are equal to or greater than ninety (90);
- Associate or higher degree has been earned outside of LACCD;
- Cumulative GPA is less than 2.0;
- Cumulative non-grades are more than 33%

Warning letter – Students will receive a warning letter at the end of the fall semester if they have one or more of the following academic deficiencies:

- Cumulative GPA is less than 2.0;
- Cumulative non-grades are greater than 33%
- Number of units attempted reaches forty-five (45).

Appeal – Students who are disqualified from receiving financial aid may submit a written appeal to the financial aid office. The appeal must include an education plan signed by a counselor and an explanation of why the satisfactory academic progress requirements were not met. The appeal form must be received by the Financial Aid Office on or before the deadline day of the semester that the students are appealing for.
If you have any questions, call or visit your college Financial Aid Office. Staff members are available to answer your questions and to help you complete any of the forms. Keep in mind that it takes two months, sometimes longer, between the time you apply for aid and the time your award is completely processed. For additional information related to the programs offered and the application process, contact the campus Financial Aid Office at (213) 763-7082 or stop by the office during our office hours to pick-up a copy of the “Financial Aid Guide”

IMPORTANT NOTICE

Effective Fall 2000, students who drop below 6 units or who withdraw from all classes before 60% of the term of enrollment has passed will be required to pay back a percentage of the Federal financial aid grant funds they have received. Contact the Financial Aid Office before withdrawing from all or part of your classes! (213) 763-7082, Student Services Building ST-214.

For detailed explanations related to filing, awarding, and receipt of funds please call the above telephone number and arrange an appointment with a Financial Aid Technician located at Student Services Building ST-214.

IMPORTANT INFORMATION REGARDING GAINFUL EMPLOYMENT DISCLOSURE REQUIREMENTS

To qualify for federal financial aid, the law requires that an educational program at a community college must lead to a degree (associate, bachelor’s, graduate, or professional) or prepare students for “gainful employment in a recognized occupation. Further, federal regulations [75 FR 66832] require community colleges that participate in the Federal student financial assistance programs to report certain information about students who are enrolled in Gainful Employment Programs. At Los Angeles Trade-Technical College, Gainful Employment programs are programs that prepare students for obtaining a Certificate of Achievement.

In accordance with the Gainful Employment disclosure regulations, a website has been developed to provide students with important information on each Certificate of Achievement program (e.g., Gainful Employment program) at the college including, but not limited to: program costs, employment projections and profiles related to the occupation(s) the program trains students for, and program completers. The Certificate of Achievement website is available at: http://college.lattc.edu/certificates/. The information provided for each Certificate of Achievement program on this website fulfills the Gainful Employment federal reporting requirements described above.
CAREER CENTER

Phone: (213) 763-7104  
Location: C-107A  
Hours: Monday – Friday, 8:30 a.m. to 4:00 p.m.

The Career Center’s mission is to promote effective career planning for all students. Experienced staff will assist with career options and provide the testing and interpretation of career assessments, career guidance, and develop the student’s awareness of the educational opportunities available. The following career inventories are available: The Myers/Briggs Personality Assessment, the COPS-COPESCAPS career inventory, the EUREKA Career Information System, Career/Life Skills workshops, a library with Career Books, Videotapes and Pamphlets and computer aided Job Development are available to assist with career and job opportunities.

CHILD DEVELOPMENT CENTER

Phone: (213) 763-3690  
Location: Corner of Olive and 21st Street  
Hours: See below

The Campus Child Development Center is designed to provide a supportive educational environment for children while parents attend classes, job training, and/or are working. The center believes that a warm and nurturing atmosphere is the best for both children and adults to learn and grow. Therefore, our focus is to provide developmentally appropriate activities for children and to provide opportunities for parents to enhance their parental skills. The center is staffed by dedicated teachers trained in the field of early childhood education. Student assistants and college lab students work with the staff to provide an environment that is developmentally appropriate for young children. Activities are planned to meet the child’s emotional, social, physical and intellectual needs. Programs are as follows:

Day Program:  
Hours: Half Day Care - 6:30 a.m. to 12:00 p.m., Monday - Friday  
Full Day Care - 6:30 a.m. to 4:00 p.m., Monday - Friday

Ages: Infants through Preschool Children, 16 months to 5 years of age (before entrance to kindergarten)

Meals served: Breakfast, Lunch and Snack

To receive an application contact the Center located on the corner of Olive and 21st Street. Each application is to be completed and returned to the Child Development Center with current income verification in order to establish enrollment priority for your child’s admission. Child care is free for income eligible parents.

COUNSELING SERVICES

Phone: (213) 763-7354  
Location: ST-416  
Hours: Monday - Thursday: 8:00 a.m. to 6:30 p.m.  
Friday: 8:00 a.m. to 3:00 p.m.

The mission of the Counseling Department is to provide the opportunity for our students and the community to receive professional counseling services to assist them in the exploration, planning and successful completion of coursework leading toward obtaining their academic, career and personal goals. The Counseling Department support success and promotes achievement through persistence, retention and the use of technology in order to foster life-long learning and effective participation in our democratic society. Advisement in Spanish is available upon request. Students may consult with a Counselor to discuss any of the following:

- Student Educational Plan
- Orientations
- Early Alert Workshops
- Financial Aid Advisement
- Transcript Evaluation
- Graduation Requirements
- General Education Certification (UC/CSU)
- Transfer Requirements to Four-Year Colleges and Universities (see “University Transfer Center” for more information)
- Interpreting Assessment Results
- Personal Concerns
- Personal Development Classes
- Substance Abuse Counseling Referrals
- Intervention Planning

DISABLED STUDENTS PROGRAMS AND SERVICES (DSP&S)

Phone: (213) 763-3773  
TDD: (213) 763-5375  
Location: E-110  
Hours: Monday – Thursday, 8:30 a.m. – 4:30 p.m.

The services provided by the DSP&S program are designed to minimize the effect a disability may have on a student’s academic, social and cultural performance while attending Los Angeles Trade Technical College. A primary goal of the statewide Disabled Students’ Program and Services is to assure an equal educational opportunity for students with disabilities. DSP&S is an integral part of the college and provides the following support services to students with long-term and short-term disabilities:

- Specialized counseling and advisement for students with disabilities.
- Priority Registration - Assistance provided in scheduling classes and completing the registration process.
**PARKING** - issued to students with medical documentation of a physical disability or health impairment. A disabled placard is usually required.

**Special accommodations:** Sign Language Interpreters, tutors, test proctoring, readers, and note takers available upon request.

**Materials available in alternate media format upon request.**

**Liaison with the college’s instructional staff.**

**High Tech Computer Center lab** that offers computer-assisted instruction in a format accessible to students with disabilities. The tables and computer keyboards can be adapted, and text may be enlarged and/or read out loud. Voice activated systems are available for students who may not be able to use a keyboard. The computers may be used for coursework or skill-building activities. Internet access is also available.

**Liaison with the State Department of Rehabilitation and other agencies providing services for the disabled.**

To request services please call 213-763-3773.

***ATTENTION DISABLED PLACARD HOLDERS ONLY***

If the building elevators are not functioning. Please contact the Sheriff's Office at 213-763-3600, or you may also use the emergency blue phone next to the elevator.

---

**EXTENDED OPPORTUNITY PROGRAM AND SERVICES (EOPS) COOPERATIVE AGENCIES RESOURCES FOR EDUCATION (CARE)**

Phone: (213) 763-7098/7117
Location: ST-205
Hours: Monday - Friday: 8:30 a.m. - 4:00 p.m.
Counseling Hours: Monday - Friday: 9:00 a.m. - 11:00 a.m.
Evenings only: Monday, Tuesday, Thursday: 4:00 p.m. - 6:30 p.m.

Extended Opportunity Program and Services (EOPS) is designed to supplement existing college programs and to provide assistance to aid financially and educationally disadvantaged full-time students.

To be eligible, potential EOPS students need to apply for Financial Aid, have a BOGG A or B (fee waiver), enroll in at least 12 units, have less than 70 college units total, not more than 6 consecutive semesters in the EOPS program and be a California resident for 1 year and 1 day. The Extended Opportunity Program and Services includes the following:

- Priority Registration
- Counseling (academic, career, personal)
- Tutoring
- Book Grants (amount varies)
- Health and Cultural Workshops
- Field Trips to Universities
- Personal Development 2: Volunteer Program
- Personal Development 2: Interpersonal Relationships
- Personal Development 4: Career Planning

The EOPS program is managed and operated by professional staff with specialized skills in counseling and instruction. EOPS provides excellent training and placement opportunities for students through their Volunteer Program. In addition, EOPS provides personal development, cultural and health awareness activities.

CARE is a special program for a unique group of EOPS students. Administered through EOPS, the CARE program provides additional services to students who are single parents, head-of-household, receive public assistance (AFDC) and have at least one child age 14 or younger.

**Services offered:**

- Assistance with childcare expenses
- Counseling
- Educational and developmental workshops
- Access to community resources
- Meal tickets and transportation assistance

---

**GAIN/CALWORKS PROGRAM**

Phone: (213) 763-7109
Location: ST-403
Hours: Monday – Friday, 8:00 a.m. to 4:00 p.m. and posted evening hours.

GAIN/CalWORKs is a job training program that provides extensive services for the participants receiving Temporary Aid for Needed Families (TANF). Educational services include instructional programs in Adult Basic Education, GED Preparation, Tutoring, English as a Second Language, Vocational ESL, AA/AS Degree Programs, Short-term, Career Technical/vocational educational training and Personal Development.

The GAIN/CalWORKs staff provides extensive services for the participants receiving Temporary Aid for Needed Families (TANF). Our highly trained staff provide academic, career and personal counseling and case management. Job development including career/lifeskills workshops, work study, work experience, community service and post employment services are also available. Childcare is provided through our campus Child Development Center.

The collaborative services with the County Department of Public Services/GAIN (DPSS) include: contracts, childcare, transportation, textbooks, and supplies, progress reports, training and employment and outside agency verifications. Collaborative partnerships with the campus Student Employment Center, Employment Development Division (EDD) and County DPSS/GAIN involve: Job Fairs, Job Assistance, Employment Skills and Career Workshops. We work closely with One Stops, Work Source Centers, Workforce Investment Boards and other community based agencies including our CalWORKs Advisory Board.

The ultimate program goal is to provide quality training and services to all eligible students in their transition from welfare-to-work.
INFORMATION CENTER

Phone: (213) 763-5337  
Location: ST-Lobby  
Hours: Monday – Thursday, 8:00 a.m. – 7:00 p.m  
Friday, 8:00 a.m. – 3:00 p.m.

The College Information Center is the place to visit! The Center provides information about the campus, various programs, and provides assistance with all student related inquiries. The Center issues ticket numbers for department services. The center conducts group campus tours and issues student identification card. Bilingual assistance is available.

OMBUDSPERSON

Phone: (213) 763-7066  
Location: ST-523

The College Ombudsperson, Dr. Letia Royal-Burnett, is available to assist students to informally seek resolution to concerns and problems they encounter.

PUENTE PROJECT

Phone: (213) 763-3771 
Location: ST-413  
Hours: Monday - Thursday, 8:30 a.m. – 4:30 p.m.

The Puente Project is an academic preparation program whose mission is to increase the number of educationally disadvantaged students who:
- Enroll in four-year colleges and universities
- Earn college degrees
- Return to the community as mentors and leaders for future generations.

The Puente Project will prepare students to successfully transfer to four-year colleges and universities and return as role models in the community.

Puente uses a combination of teaching, counseling and mentoring to achieve its educational objectives. These three components combine to provide a focused and engaging learning community that allows students to achieve greater gain than would be possible using any single component alone-the whole is greater than the sum of its parts. To be eligible for the program prospective Puente students must:
- Attend a Puente orientation in the spring or summer prior to entering the program in the Fall semester
- Enroll in four-year colleges and universities
- Take a half-hour writing prompt the day of the orientation
- Be interested in transferring to a four-year university
- Be eligible to register for English 28 in the Fall semester
- Be willing to make a one year commitment to the program
- Be willing to take Puente English and Personal Development classes during Fall and Spring semesters
- Be available to participate in extracurricular activities

STUDENT EMPLOYMENT CENTER

Phone: (213) 763-7124  
Location: C-107A  
Hours: Monday - Thursday, 8:00 a.m.-1:00 p.m. and 3:00 p.m.- 6:00 p.m.  
Friday, 8:00 a.m. – 1:00 p.m.

The Student Employment Center assists students in finding full-time, part-time or temporary jobs. It also provides information on internships, working abroad and summer employment, as well as employment information for alumni. The Center maintains a file of current job bulletins from city, state, county and federal government agencies, as well as school districts and private industry. Individual employment advising is available by appointment, as well as assistance with resumes and cover letters. Computers and printers are available for students to use for job search and completing their resume and cover letter.

STUDENT HEALTH CENTER

Phone: (213) 763-3764  
Location: E-102  
Hours: Fall and Spring  
- Monday–Wednesday: 8:00 a.m. – 6:00 p.m.,  
- Tuesday – Thursday: 8:00 a.m. – 4:00 p.m.  
- Friday: 8:00 a.m. – 2:00 p.m.

The LATTC Student Health Center in partnership with Mosaic Health Services provides many services for enrolled students. Student Health Fee provides the majority of services free of charge.
- Non-emergency care, including health screenings, general physical exams and limited treatment of illnesses
- Health and nutrition Information; health education literature
- Free immunizations
- Laboratory tests
- TB skin tests
- Mental health and substance abuse counseling
- Women’s health services
- Health workshops
UNIVERSITY TRANSFER CENTER

Phone:  (213) 763-7154
Location:  ST-203
Hours:  Monday: 9:00 a.m. – 6:00 p.m.
       Tuesday: 9:00 a.m. – 3:30 p.m.
       Wednesday: 9:00 a.m. – 3:30 p.m.
       Thursday: 9:00 a.m. – 4:00 p.m.
       Friday: 9:00 a.m. – 1:00 p.m.

The University Transfer Center’s primary purpose is to assist students interested in transferring to a four-year college or university. The Center serves as a valuable resource to students who have questions regarding course preparation, admission requirements, transfer admission guarantee programs, college and university searches, articulation agreements, financial aid, housing, and other transfer issues. Representatives from the University of California, the California State University, as well as private institutions such as USC, visit the Center to provide up-to-date information to students via workshops or individual appointments. Catalogs, brochures and applications are available for the UC, CSU, and private institutions, including a wealth of on-line resources. Visit our website: http://college.lattc.edu/transfer/

VETERANS SERVICES

VETERANS STUDENT CENTER

Phone:  (213) 763-5305
Location:  C-100A
Hours:  Monday – Thursday: 8:00 a.m. – 5:00 p.m.
       Friday: 8:00 a.m. – 3:00 p.m.

Los Angeles Trade-Technical College courses are approved for the training of eligible Veterans, Reservist, National Guard, and eligible dependents, under Federal and State Assistance programs. In order to start training under any of these programs, eligible students should visit the Veterans Student Center located in the Admissions Office.

The following regulations apply to all eligible students attending a Los Angeles Community College and receiving benefits under Chapter 30, 31, 33, 35 & 1606 of the United States Code.

CREDIT FOR PRIOR MILITARY SERVICE TRAINING

Veterans and other eligible persons who are receiving benefits must provide the College with documentation of all previous educational and training experience, including Military Service Training Schools and/or Military Occupational Specialties. This experience will be evaluated and appropriate credit granted.

ATTENDANCE AND WITHDRAWAL

Students are required to attend all meetings of every class in which they are registered. The last day of a student’s attendance in class must be reported to the Veterans Administration (VA) to avoid overpayments. It is the responsibility of the student to immediately inform the Office of Veterans Affairs of any reduction in unit load. It is the responsibility of the instructor to notify the Admissions Office of the last day of attendance of students. The Veterans Administration will then be notified in a timely manner of the students who withdraw from class.

PROGRAM PLANNING FOR VETERANS

To be eligible for VA Education Benefits the student must select a major and choose courses from those listed under the major in the catalog. The student is advised to seek counseling from Counseling Services. The Veterans Administration will not pay benefits for courses that do not fit in a student’s selected major. If a student has prior training and education from another institution, it is the student’s responsibility to have the transcripts forwarded to the Admissions Office.

ACADEMIC REQUIREMENTS

All students are subject to the academic standards for probation and dismissal as listed in this catalog. If a Veteran or other eligible person fails to obtain a cumulative grade point average of 2.0 or better after 3 consecutive semesters, the student’s educational benefits will be discontinued.

60 UNIT RULE AND UNIT WORKLOAD

Once the student has received units sufficient to equal or exceed the normal program printed in the catalog, the Office of Veteran’s Affairs must certify the additional units needed for the student to complete the Associate degree in any major. The student is eligible for further training at the college only by taking courses which are required for upper division status at a transfer institution, or by changing the objective. These courses must be approved by the Veterans Administration. The 60 Unit Rule requires that an eligible student see a counselor before any more courses can be certified by the Office of Veteran’s Affairs for payment of benefits.

The Veterans Administration uses the following definition for eligibility:

- full-time benefits:  12 or more units
- 3/4-time benefits:  9 through 11 units
- 1/2-time benefits:  6 through 8 units
- less than 1/2 time:  3 through 5 units
  (Reservist and National Guard)
HONORS PROGRAM
The Los Angeles Trade-Technical College (LATTCC) Honors Program is designed to encourage the development of talent and ability in highly motivated students as they begin their academic studies and prepare to transfer to a four-year college or university. The program provides:
- Interaction with other highly motivated honors students
- A Certificate of Achievement upon program completion
- Increased scholarship opportunities
- Enrichment seminars and activities
- Priority consideration when transferring

Approved Honors classes:
- Anthropology 101
- Chemistry 221
- English 101
- Anthropology 102
- Chemistry 222
- English 102
- Art 101
- English 205
- English 103
- English 206
- History 11
- Music 141
- Speech 122
- English 220
- English 212

Website: http://college.lattc.edu/honors/

LEARNING SKILLS CENTER
Phone: (213) 763-3738
Location: C-106

The Learning Skills Center is here to provide academic instruction and support services in a caring environment to help students become successful in their classes and stay in school. The Learning Skills Center focuses on responding to the individual needs of students and provides courses, tutoring, computer access, and instructional resources to all students to help ensure success in their academic, career, and personal goals. A Los Angeles Trade-Technical College student ID card is required for all Learning Skills Center services.

Learning Skills Computer Lab
The Learning Skills Computer Lab is available to all LATTCC students taking Learning Skills courses in basic reading, writing, math, spelling, vocabulary, computer literacy, and GED preparation or using the lab for other instructional purposes. The Learning Skills Lab hours are Monday through Thursday from 8:00 a.m. to 8:00 p.m., Friday 8:00 a.m. to 2:00 p.m. in room C-102. Winter and summer hours may vary. For more information, please call (213) 763-3738 or visit college.lattc.edu/learningskills.

Tutoring Center
Free tutoring services are available to all LATTCC students. Tutoring is conducted in one-on-one and small group formats. For some of the traditionally difficult courses, Supplemental Instruction (SI) is also offered. SI is an academic assistance program that offers peer-led study groups that are facilitated by trained SI leaders who have already completed the course with a grade of A. The Tutoring Center hours are Monday through Thursday from 8:00 a.m. to 6:00 p.m. and Friday 8:00 a.m. to 2:00 p.m. in room C-106B. Winter and summer hours may vary. For more information, please call (213) 763-3738.

Reading Center
The lab has reading, spelling, vocabulary, and study skills materials for use. All materials may be used in the laboratory during open hours. The Reading Center hours are Monday through Thursday from 8:00 a.m. to 6:00 p.m. and Friday 8:00 a.m. to 2:00 p.m. in C-107. Winter and summer hours may vary. For more information, please call (213) 763-3753.

The Open Computer Lab
The Open Computer Lab (“Open Lab”) is available to all LATTCC students and faculty free of charge. Students must be enrolled at LATTCC and have a current student ID card. Students may use the Open Lab for general computer use and Internet and online class access. For basic computer literacy instruction or comprehensive technical assistance for online classes, students may sign up for a class or for tutoring. The Open Lab hours are Monday through Thursday from 8:00 a.m. to 8:00 p.m., Friday 8:00 a.m. to 2:00 p.m. in room C-109. Winter and summer hours may vary. For more information, please call (213) 763-3738.

Writing Center
The Writing Center provides one-on-one, and small group tutoring. Tutors help with overall critical thinking (close reading), organization (structure or format), and helping you to find and correct your errors. Each session is 30 minutes for walk-ins. DSPS students receive one 45 minute tutoring session when making an appointment. Our goal is to help you become a better writer. We are located in the Student Success Center in Room C-100. We are open Monday through Thursday from 8:00 a.m. to 7:00 p.m. We are closed Fridays. For more information, please call (213) 763-3797.

LIBRARY

Circulation Desk: (213) 763-3950
Reference Desk: (213) 763-3962
Location: Oak Grove Village - South Campus
Hours: Monday – Thursday, 8:00 a.m. – 7:00 p.m.,
Friday, 8:00 a.m. – 1:00 p.m.,
Closed Saturdays, Sundays & school holidays.
Summer and winter intersession - Library hours may vary. For more information, please call (213) 763-3950.

The Library is located in the Oak Grove Village - South Campus. The Library offers a diverse collection of curriculum-centered, academic and vocational education materials. Research resources include Library subscription databases, books, a selection of Faculty Reserve course textbooks, print periodicals, and internet access. The book collection, research databases and online periodicals are accessible 24/7 via the online public access catalog and the Library research databases remote access, password-protected website: http://library.lattc.edu. The Library offers free, time-limited internet access to currently enrolled LATTCC students and individual study areas and small group rooms are available. Students need a valid, current student identification card to qualify for Library borrowing privileges. Loan periods are four weeks for circulating books and two hours or one week for selected Library Reserve materials.
Faculty Librarians offer individualized research assistance at the Reference desk and educate students in developing research skills to enable them to succeed in their course work and research interests. Library Faculty also offer Library resources instruction in Library workshops, Faculty-scheduled Library orientations, and one-unit Library Science 101 Library Research Methods classes. Library Reference (213) 763-3962.

COMMUNITY PROGRAMS AND ALTERNATIVE EDUCATION

LATTC ON-LINE PROGRAM

For a current listing of LATTC On-Line Program courses go to http://moodle.lattc.edu

What do you need to take an on-line class?
- Computer access where you can regularly connect to Internet, plus
- Sufficient computer skills to send/receive email and to navigate the World Wide Web, and
- A valid and currently-used email address in the Student Information System (SIS) plus ability to log into the SIS.

How to register for on-line classes:
- If you are an existing LATTC student, just enroll in the online class as you would any other class, or
- If you are a new LATTC student, enroll in the college first. Please go to http://www.lacolleges.net/admissions/ to enroll online. Once you are enrolled in the college, you can proceed to register for your online class. You should print the confirmation of online enrollment page at the end of the process. The online applications takes two days to process.

What to do after you register for an on-line class:
- Go to the LATTC Online Program Moodle home page at http://moodle.lattc.edu
- Download the Online Student Guide and read it carefully. A new Guide is created for each term, so get the correct Guide.
- Be sure to check if your class requires a campus edition of a textbook to coordinate with your online class. If you purchase the textbook at another campus, the key may not work for your LATTC class.
- Check the Help For New Online Student link to get information on preparing your computer to take online classes. You’ll need to be able to enable pop-ups and cookies on your computer.

Students who will be using the Moodle course management system will be able to log into one week prior to the start of the class. Login is identical to that for the Student Information System. Login id = Student ID number and password was originally set to mmdd of date of birth. If a student changes the PIN for the SIS, then it changes the password for Moodle since they use the same authorization process.

Students who will be using a course management system other than Moodle for their online class will need to either attend the scheduled class orientation or follow all directoins on the class home page to set up the software.

Are there any special meetings, either on campus or online? Do I have to log in at a specific time?
Each teacher has the right to request either on-campus or online meetings if they feel it is best to do so. Some of the reasons they may choose to require these meetings is to ensure the student is who s/he claims to be and is the person actually doing the work. This is a new Federal mandate. Or, teachers may require an on-campus meeting to provide materials or an orientation to help students get off to a great start.

Most online classes are done asynchronously. This means a student logs in at regular intervals of his/her choosing during the week. Some classes do schedule chats where students gather online at the same time. Some instructors have online office hours at set times for students to log on and get help. Students should log into their class every couple of days and more often for short term classes.

Class have already started. How do I get into an online class?
Send the instructor an email request to add the class. This email needs to come from the same ID listed in the SIS. Include your name, student ID number and the class name and section number in your email.

How do I contact my instructor?
The Online Student Guide has a list of instructor phone numbers and email addresses. If you are not successfully contacting your instructor that way, call the department office or the LATTC Online Program office.

What if I need additional information?
You can contact the Online Program Director, Linda Delzeit-McIntyre at 213-763-3733, or email her at delzei@lattc.edu. If you need to fax forms, the fax number is (213) 406-1237.

INSTRUCTIONAL TELEVISION (ITV)

Each semester, the District-wide Instructional Television program presents, via television, transferable undergraduate college credit courses. Instructional Television courses are convenient, flexible and especially suitable for college students needing to supplement their oncampus program or to add classes for those times when campus attendance is not possible.

Students enroll by mail, telephone or the Internet, view telecourse lessons at home or at a Learning Center at one of the Colleges, complete reading and study assignments, attend seminars held approximately once a month on weekends at a Los Angeles Community College near their home, and complete a midterm and final exam. Interested students are invited to attend the ITV class orientations held at the beginning of each semester or to visit the Instructional Television program on the campus of Los Angeles Mission College, 13356 Eldridge Avenue, Sylmar, CA 91342. Call 800-917-9277 or (818) 833-3594 for information.
BRIDGES TO SUCCESS CENTER
Location: ST-316
Hours: Monday-Thursday 7:30am-7:00pm Friday 7:30am – 1:00pm
Telephone (213) 763-5560
Fax (213) 763-5979
E-mail: bridge@lattc.edu

BRIDGES TO SUCCESS CENTER PROGRAMS AND SERVICES
• Bridge to College Program: K-12 Concurrent Enrollment
  Provides students the opportunity to concurrently enroll in college courses while still in high school, getting early college experience and take advantage of advance scholastic and educational enrichment opportunities for eligible students
• High School and GED Diploma Program
  Instructor-led college preparation courses strengthen students' reading, writing, math, critical thinking and study skills in preparation for college placement, ATB, CAHSEE, GED and HS diploma completion
• Assistance for AB 540 Students
  Assist and inform eligible nonresident students of existing law establishing that California High School graduates are authorized to attend community college district and be exempt from nonresident tuition
• Continuing Education
  Provides non-credit courses, free of charge, in subject areas such as ESL (English as a Second Language), Citizenship, Basic Computer Skills, and CPR/First Aid Courses.
• Career and Job Training
  Provides training free of charge to facilitate student entry into various fields such as:
  - Green Construction/Clean Energy
  - Healthcare Prep
  - Bank Teller Training
  - Employment Prep

EARLY COLLEGE/CONCURRENT ENROLLMENT
Phone: (213) 763-5560
Location: ST-316
The Early College Program at Los Angeles Trade-Technical College (LATTC) provides students the opportunity to concurrently enroll in college courses while still in high school. The purpose of the program is to provide advanced scholastic and educational enrichment opportunities for eligible students. Students who desire to participate in concurrent enrollment must be recommended by their principal or counselor and have parental permission. Early College students can take degree-applicable, noncredit, vocational and transferable courses. Students are required to complete a Special K-12 Admission Application for each semester. Special admissions criteria apply for K-8 students. For additional information contact the Early College Program at 213-763-5560 or by email at bridge@lattc.edu

21ST CENTURY GRANT
Phone: (213) 763-5509
Location: E-314
The 21st Century Program, funded by the No Child Left Behind act, offers an enriching experience that is specifically designed to boost middle school students' performance in Mathematics, English, Reading and Science. This after-school program is designed to enhance students' knowledge and prepare them for future college or university coursework. Students are given the opportunity to take college-level courses that may be credited towards high school electives or an associate's or bachelor's degree. For more information call (213) 763-5509. The 21st Century office is located in E-314.

FOSTER & KINSHIP CARE EDUCATION PROGRAM
Director: Dr. Dione Washington
Phone: (213) 763-3665
Location: D-324
The Los Angeles Trade-Technical College Foster and Kinship Care Education Program is highly dedicated to meeting the educational needs of foster/kinship youth, foster parents, adoptive parents, relative care providers, non-relative extended-family care providers and legal guardians.

Our primary goal is to produce the 4 E's: Enlightened, Effective, Efficient, and Encouraged care providers and foster youth.

We are currently offering motivating and resourceful events, seminars and workshops. Available workshops include: Foster & Kinship Care Education (FKCE); Independent Living Program – “Project YESS Program”; Working With Special Needs Children (D-Rate Certification & Renewal); Working With The Medically Fragile Child (F-Rate Renewal); and Partnering for Permanence and Safety, Model Approaches to Partnerships in Parenting (PS–MAPP/Foster Parent Certification).
STUDENT ACTIVITIES

Phone: (213) 763-7209
Location: C-105

The Student Activities Office provides opportunities for students and staff to engage in educational, social and community service activities in and outside the classroom. Services such as Dean’s Honor Awards Ceremony, club activities, discounts to social events, publicity through the student bulletin and bulletin boards are offered. Other activities handled by this office include: weekly A.S.O. student government board meetings, ethnic and multicultural programs, club fairs, blood drives and scholarships, etc. Students will participate in the civic and legislative process.

ASSOCIATED STUDENT ORGANIZATION
(ASO)

Membership
A.S.O. programs are supported by a $7.00 membership fee, available at the Business Office for day and evening students. These fees help support the services A.S.O. provides. Any student, upon enrolling, is eligible to become a paid member of the Associated Student Organization. Members are entitled to all rights and privileges, including book loan applications, educational, social and community services programs and all associated activities.

Organization
The governing body of the Associated Students, the Student Council, is composed of the Executive Board which consists of the President, Vice-President, Parliamentarian, Treasurer, Historian and the a Recording Secretary. The Senators serve as the representative liaisons for every department on campus. The Commissioners are also voting board members who serve in specialized positions. At Los Angeles Trade Technical College, student government strives to reach all students and attempts to meet the many diverse needs represented in our student body.

The purpose of student government is best expressed in the preamble to the constitution: “We the students of Los Angeles Trade-Technical College, in order to guide and encourage cultural, social, athletic, and scholastic activities, to promote the welfare of the students, and to provide a representative student government, do hereby establish this constitution, and assume the powers of self-government delegated to us by the President of the College.”

All students are encouraged to become involved in the governance of their affairs by becoming department representatives by running for an elected office. Governance flow is from individual students to department representatives to the student council and in reverse. Elections are held every spring for the Executive Board positions. Officers are elected for a one year term.

Trade-Tech College is a member of the California Community College Student Affairs Association (CCCSAA) and the California Student Association of Community Colleges (CAL-SACC). The two organizations meet separately each semester to discuss topics in Student Government and activities of importance to the member schools. The groups were organized to help promote better relations among the community colleges of the state and to help solve problems relative to each. Trade-Tech regularly sends delegates to these statewide and regional meetings.

Qualifications for ASO Officers (Administrative Regulation S-9)

Los Angeles Community College District Administrative Regulation S-9 pertains to elected Associated Student Organization (ASO) officers only. Other appointed such as Senators and Commissioners are governed by the ASO By-Laws.

Regulation S-9 is as follows: “A student cannot be a candidate for ASO office if he or she has served more than four semesters in a student government elected and/or appointed office, or in any office or position where he or she voted on the expenditure of ASO funds in any college. An officer may serve a fifth semester if he or she is eligible at the time of assuming office (e.g., has served three semesters and is a candidate for an office with a one-year term). Ten weeks or more of student service in office or service anytime after the tenth week, will be counted as a full semester. All students running for office must be paid members in good standing in the Associated Students Organization at the college where the election is being held.

A student officer or a candidate for office must be actively and continuously enrolled, attending and successfully completing classes in a minimum of 5 units with a cumulative and current GPA of 2.0 at the College during the semester in which the student government office is applied for or held. All units must be taken at the college where the office is sought or held. Student officers reducing units below the required number automatically forfeit their student office.

Student Trustee Election Procedure

The Los Angeles Community College District conducts an election annually whereby each student in the District has an opportunity to be involved in the process of selecting a student representative to the Los Angeles Community College district Board of Trustees. Student Trustee eligibility requirements can be found on the LACCD website.

CAMPUS CLUBS AND ORGANIZATIONS

Inter-Club Council

The Inter-Club Council is composed of the A.S.O. Vice-President, who serves as chairman, and the Vice-Presidents of all campus clubs. It is the purpose of the Inter-Club Council to serve as a coordinating and planning body for club activities, for an improved program of student activities and, as a liaison between the college clubs. LATTC has had a number of consistent clubs.
STUDENTS ARE ENCOURAGED TO ORGANIZE NEW SPECIAL INTEREST CLUBS ON CAMPUS. Before a group is recognized officially, a constitution must be submitted and approved by the A.S.O. Advisor and Executive Board. Every club is required to have a Faculty Advisor. An approved Administrator can also serve as a Club Advisor.

COLLEGE COLORS AND MASCOT
The college colors are purple and gold. The college mascot is the Beaver, and Trade-Tech students are known as Beavers.

STUDENT INTERCOLLEGIATE ATHLETICS
Phone: (213) 763-3726
Location: J-200

Trade-Tech College is a member of the South Coast Conference of which there are 10 colleges. The other colleges are: East Los Angeles College, Los Angeles City College, El Camino College, Cerromos College, Long Beach City College, Mt. SAC College, Pasadena City College, Los Angeles Southwest College, and Compton College. In the Fall, sports offered are Men’s and Women’s Cross Country Men’s and Women’s Water Polo, Men’s and Women’s Basketball. In the Spring, sports offered are Men’s and Women’s Track and Field and Men’s and Women’s swimming.

To be eligible for intercollegiate athletic program participation, students must be enrolled and attending 12 or more units. Between seasons of competition in a sport, students must complete 24 units and maintain a 2.0 G.P.A.
BUSINESS OFFICE

Phone: (213) 763-7225  
Location: ST-Lobby  
Hours: Monday thru Thursday: 8:30 a.m. to 7:00 p.m.  
Friday: 8:30 a.m. to 3:00 p.m.

Student accounts are managed through the College Business Office. Student fees including enrollment fees, nonresident tuition, health fees, parking, Associated Student Organization, child care, transcripts and Community Service fees are payable at the Business Office. Upon payment of fees, the Business Office then issues student’s official confirmation of course enrollment. In addition, the Business Office accepts, disburses and accounts for some student financial aid, loan and scholarship checks, and issues all student refunds. Metropolitan Transit Authority bus passes and tokens are also available for sale at the Business Office.

BOOKSTORE

Phone: (213) 763-7210  
Location: K-102  
Hours: Monday thru Thursday: 7:15 a.m. to 6:15 p.m.  
Friday: 7:15 a.m. to 3:00 p.m.

See Bookstore website: http://www.lattc.bkstr.com

Bookstore Return / Refund Policy

A. Textbooks

Textbooks must be returned within the first 15 school days of the Fall and Spring semester, and within the first 5 days of Summer, and Winter Sessions, and short-term courses. Textbooks purchased after the 15th school day must be returned within 24 hours.

All textbooks being returned must be accompanied by an ORIGINAL DATED CASH REGISTER SALES RECEIPT issued by the bookstore. NO EXCEPTIONS!

Refunds and/or exchanges will not be allowed on textbooks purchased during the last 4 (four) weeks of the semester. No refunds will be allowed after the 1st week of the Summer Session.

Textbooks must be returned in the same condition as when purchased, with final determination of condition made by the Bookstore Staff. New textbooks must be in new condition (no writing or marks of any kind). Textbooks failing to meet the policy will be considered Used and be governed by the Used textbook policy. Catalogs, Class Schedules, Paperbacks, Study Guides, Dictionaries, Clothing, Workbooks, Computer Discs, and specially assembled kits are not refundable.

B. Supplies and Tools

Materials required by a specific class may be returned during the first 15 days of the Fall and Spring semesters and within the first 5 days of the Summer Session. Items must be accompanied by a dated cash register receipt and must be in NEW condition. After the 15-day all returns must be made within 24 hours. NO REFUNDS will be given for any clothing, athletic supporters, sweat socks, safety goggles, and other “personal items” governed by California Health Laws.

C. Policy For Personal Checks

A current LATTC Registration Receipt or A.S.O. card must be presented when making purchases by personal check PLUS a valid California Driver’s License or California Identification Card. Checks must be imprinted with the student’s name and current address, and drawn on a local bank. Checks will be accepted only for the amount of purchase.

D. Book Buy-Back Period

Book Buy-Back periods occur during the final exam week of each Fall and Spring semester. Summer buyback dates are not predictable. Buyback dates are posted with signs and on the receipt.

COLLEGE CROSSROADS CAFETERIA

Phone: (213) 763-7331  
Location: H Building

The Trade-Tech Crossroads Cafeteria offers a wide variety of exceptional menu choices for your dining pleasure. Students enrolled in the Culinary Arts and Professional Baking programs prepare fresh food daily that is served in the on-campus bakery, cafeteria, and Garden Room. Selections include hot entrees, hot off the griddle breakfasts, grab and go sandwiches and salads, as well as a variety of fresh baked goods. Join us in the Garden Room on Wednesdays for our international buffet, an all you can eat themed menu based on food from all over the world!! The College Cafeteria can also provide on-site catering for your special events. Please contact 213-763-7331 for more details.

SHERIFF’S DEPARTMENT

Phone: (213) 763-3600  
Location: D-150

The college contracts with the Los Angeles County Sheriff’s Department for all of its law enforcement services. These officers undergo specialized training through the Los Angeles County Sheriff’s Academy designed to meet the needs and problems of a contemporary college.

The college prides itself on its safety record maintained on campus. However, effective law enforcement and protection require citizen cooperation and assistance. To that end, please follow a few basic safety tips: if you must remain in campus buildings after closing time, make an effort to do so in the company of at least one other co-worker, or student. The campus is well lighted but it is wise, again, to employ the “buddy system” when walking to your car or traveling to other locations. Refrain from using shortcuts, staying on the well-traveled thoroughfares.
Personal property, purses, briefcases, etc., should never be left unattended. Take such items with you if you are leaving the office, classroom, or library study area. Keep your auto locked, never leave the keys in the ignition, and avoid leaving property where it is visible on the seats. Give your car the quick "once over with a critical eye" before entering, for possible break-in or persons in the rear seat or floor area.

The rapid and successful detection of crime and apprehension of criminals depends heavily on speedy reporting and dissemination of facts to the College Sheriff's Department. For information, inquire at the "D" building, Room 150 or call (213) 763-3600.

The lost and found is located in the College Sheriff's Department, Rm. D-150. A valid California Driver's License, California Identification Card or LATTC Student Identification Card is required for claimed property.

STUDENT PARKING
See Also: Parking Fees and Permit Sales

GENERAL INFORMATION

Please note: At the time of this publication, every effort was made to indicate available parking at the college. Construction demands will create changes and Information will always be available through the College Sheriff’s Office, D150, (213) 763-3600, 24 hours per day, 7 days a week.

Parking permits must be displayed at all times when a vehicle is parked on campus, including week-ends. Individuals who are unsure as to where they may park, or where a permit is recognized as valid, are encouraged to contact the College Sheriff or Main Gate parking attendant for clarification prior to parking their vehicle in a College parking lot.

Lot identification signs showing which lots are for use by students, visitors, and/or employees are posted at the entrance to College parking lots unless specifically re-directed by College Sheriff personnel. Students may not park in any space designated for specific use. Parking in a space designated for specific use can result in a citation for failure to display a valid permit.

Vehicles displaying an invalid parking permit are subject to citation. Invalid permits include, but are not limited to: permits that have been altered, reported lost or stolen, or issued to an individual other than the permit holder (in which case are subject to confiscation), and also permits in which the authorization period has expired, or are not clearly and completely visible. Individuals using or obtaining a permit illegally are subject to confiscation, and also permits in which the authorization period has expired, or are not clearly and completely visible. Individuals using or obtaining a permit illegally are subject to administrative disciplinary action.

Student and visitor parking is allowed in designated lots as follows:
• Preferred Student Parking ($27.00 and includes $7.00 ASO fee) is in the Olive Street Parking Facility, F-Building Roof Lot and 22nd Street Lot B.
• General Student Parking ($20.00) is in the 18th Street & Grand Avenue Lot and at Glory Church located at Washington Boulevard & Grand Avenue.
• Summer & Winter Sessions ($10.00) for General Student Parking and is accepted in Preferred Student Parking areas above.
• Disabled Parking: Students/Visitors, Roof Lot and Olive Street Parking Structure and 22nd Street Lot B or as directed by parking attendant. A valid LATTC parking permit and a DMV placard must be displayed on any vehicle parked in a designated handicapped stall. Students with a verified disability should go to the Disabled Students Program and Services Office, E-110, to arrange for an accommodation. If for any reason the elevator is not available, contact College Sheriff at 213-763-3600.
• Motorcycle and Moped Parking: No permit required; parking is, however, restricted to the designated motorcycle/moped parking area located on the east side of Building D only (enter from Grand Ave.).
• Bicycle Parking: No permit required but restricted to designated areas; bike racks are located throughout the campus.
• Guest Parking: Guests coming to the campus may obtain a guest permit at the Main Gate (entrance to the Roof Lot) or from the College Sheriff Office, D-150. Guest permits are issued on a limited day basis only. Parking is available on the Roof, and 22nd Street, Lot B.

Saturday/Sunday Parking Permit Adjustment
Unless directed otherwise by College Sheriff personnel due to a special event or other College activity, lot designations are enforced on weekends as printed on the parking permit.

PARKING RULES AND REGULATIONS

Parking rules and regulations are enforced 24 hours a day, including Saturdays, Sundays, and holidays. A valid parking permit must be displayed at all times the vehicle is parked on campus. The permits are made of removable mylar and should be affixed to the inside rear window, (lower right side, facing outward.) Failure to display a valid parking permit will result in issuance of a citation.

Student parking permit regulations are enforced from the first day of classes each semester through the last day of final examinations. Student vehicles parked in places not authorized for student parking are subject to citation or tow away at owner’s expense. Permits are not valid at parking meters.

All traffic and road signs must be obeyed. Speed limit on campus is eight (8) miles per hour. All vehicles shall be parked clearly within the designated lines. Vehicle parking regulations applicable to motorcycles and mopeds will be enforced at all times.

Regulations governing handicapped parking, red curbs, no parking zones, fire lanes, loading docks, special permit areas, and areas having time limitations are enforced at all times. Illegally parked vehicles may be towed away at owner’s expense.

• Trade-Tech recognizes other student parking permits in the Los Angeles Community College District.
• Construction zones and special college events may cause access to parking areas and roadways to change. Please follow directions on signs carefully.
• No vehicle, motorcycle, or moped may be parked overnight on campus.

ENFORCEMENT OF TRAFFIC AND PARKING REGULATIONS

All persons driving a motor vehicle on campus are required to comply with the traffic laws of the State of California and the rules and regulations pursuant to Section 21113A of the California Vehicle Code. Violations of the regulations set forth above will result in a citation being issued. The College reserves the right to remove vehicles from parking lots as follows: abandoned vehicles; vehicles parked in such a manner as to constitute a serious hazard; vehicles which impede the operation of emergency equipment; vehicles which park illegally on a recurring basis. The registered owner is responsible for any removal costs which may occur.
Liability
Los Angeles Trade-Technical College, the Board of Trustees, and the Los Angeles Community College District shall not be responsible for damage to any motor vehicle, theft of its contents, or injury to persons operating a vehicle parked on or off the campus unless liable under Government Codes including, but not limited to Government Code 810 to 9666.6 inclusive (Reference: LACCD Board Rules 7401 and 7402) Direct inquiries to College Sheriff, D-150, (213) 763-3600.

CITATIONS AND BAIL
Citations will be issued to all vehicles on college property in violation of parking rules and regulations and must be paid within 21 days of the date issued. Parking Citation Appeals: Individuals who believe a parking citation was issued to them in error must appeal it immediately by completing an Administrative Review form (available at the College Sheriff Office, D-150, or the LATTC Sheriff Department website under Parking Citations and Appeals). Appeals must be mailed to: Los Angeles Trade Technical College, c/o Parking Citation Service Center, P.O. Box 11923, Santa Ana, CA 92711. Failure to immediately pay or appeal a citation may result in substantial penalties and a Department of Motor Vehicle (DMV) hold on vehicle registration. Please call or contact the Sheriffs Department in person to obtain the results of your appeal.

PARKING INFORMATION AND ASSISTANCE
Inquiries regarding the College’s parking program should be directed to the offices listed below during normal business hours. College Sheriff personnel are, however, on duty 24 hours a day, seven days a week to assist with permit use and enforcement issues.

- Parking Rules, Regulations, Permit Use, and Enforcement: College Sheriff, D-150 (213) 763-3600.

NOTE: The parking information shown above is subject to change without notice.

PARKING FEES AND PERMIT SALES

Parking Fees
A limited number of student parking permits are available for purchase at the Business Office for $27.00 for Preferred Student Parking (includes $7.00 ASO fee), or $20.00 for General Student Parking is in the 18th Street & Grand Avenue Lot and at Glory Church located at Washington Boulevard & Grand Avenue per permit per semester. The purchase of a parking permit does not guarantee a parking space; it is only a license to park one vehicle in designated parking lots as posted at the entrance of each parking lot. Parking permit sales begin at the time of registration for the effective semester on a first-come, first serve basis while supplies last. Student parking permits are purchased at the Business Office, ST-Lobby, as part of the registration process. All enrollment fees must be paid in full before the permit can be issued.

Refunds
Student parking fees are refundable each semester through the enrollment refund period. (Please see the current semester’s schedule of classes for the exact deadline date.) The parking permit must be returned at the time the refund is requested.

Lost or Stolen Permits
There is no replacement for lost or stolen permits. A student may, however, purchase another parking permit should one be available. Lost or stolen permits should be reported to the College Sheriff, D-150, immediately. Additional sales for replacement permits are made on or after the third Thursday of each semester.

TRANSPORTATION
The college is located near the intersection of the Harbor and Santa Monica freeways, and is directly across the street from the Metro Blue Line’s Grand Avenue station. In addition to the light rail system, there are more than 40 bus lines stopping at or within two blocks of the College. For more information, please consult the College website at www.LATTC.edu.

Core Competencies

A. Students will use critical thinking skills to gather, identify, analyze, synthesize information, and evaluate problems and solutions.

B. Students will use visual, numerical, verbal, written, and practical skills to create useful and original products.

C. Students will demonstrate technical skills that meet industry and/or employment standards.

D. Students will demonstrate effective communication and comprehension skills.

E. Students will demonstrate ability to interface in a culturally diverse socio-economic environment.
LATTC CERTIFICATE AND DEGREE PROGRAM BY DEFINITION:

Many certificate and degree programs are available within each department and discipline at Los Angeles Trade-Technical College. A description and requirements for each program offered at the college is provided in this section.

ASSOCIATE DEGREE PROGRAMS

Associate in Science (AS) and Associate in Arts (AA) degree programs are composed of three parts: general education, a major or an area of emphasis, and additional graduation requirements or electives to bring the total units to a minimum of 60 semester units. However, the associate degree represents more than an accumulation of units. Instead, it embodies completion of a well-defined pattern of learning experiences that are designed to develop certain capabilities. All the general requirements for the associate degree at Los Angeles Trade-Technical College are specified in the Associate Degree Requirements section of this catalog. The specific degree requirements—majors or areas of emphasis, electives, and general education graduation plan—is provided for each degree program on the following pages.

CERTIFICATE OF ACHIEVEMENT PROGRAMS

A Certificate of Achievement is issued in State-approved programs designed for students who are looking for instruction with a high degree of specialization. Certificate of Achievement programs vary in length (typically ranging anywhere from 12 to 48 units), but most have 18 or more semester units, and may be pursued on a full-time or part-time basis. Certificate of Achievement programs are usually less than a two-year educational program comprised of courses needed to prepare students for immediate employment. In addition, a website is provided by Los Angeles Trade-Technical College to equip students with important information on each Certificate of Achievement program offered at the college including, but not limited to: program costs, employment projections and profiles related to the occupation(s) the program trains students for, and program completers. The website is available at: http://college.lattc.edu/certificates

SKILLS CERTIFICATE OR OTHER SHORT-TERM CERTIFICATE PROGRAMS

The college also offers a number of Skills Certificates or other short-term Certificate programs. These programs are less than 12 units, typically can be completed in one semester or less, and are intended to prepare students with a specific skill-set enabling them to become either more “specialized” or to “broaden” their skills and abilities within a particular career or occupation. Students completing a Skills Certificate (or other short term certificate) program receive a certificate document from the college but it will not be noted on the student’s transcript.

NONCREDIT PROGRAMS

Noncredit programs are an organized sequence of two or more courses leading to a defined objective, certificate, a diploma, or license. Noncredit programs at Los Angeles Trade-Technical College generally fall into these two program areas: career development and college preparation or career technical programs with “high employment potential” that provide 288 hours or more of instruction. Courses comprising noncredit programs are not applicable to a credit certificate or degree program.

APPRENTICESHIP PROGRAMS

Apprenticeship programs prepare students for any profession, trade, or craft that are learned through a combination of supervised, on-the-job training with off-the-job formal education. Los Angeles Trade-Technical College’s apprenticeship programs are intended for students who are indentured to learn a trade under agreement with the State of California Division of Apprenticeship Standards. As such these programs are restricted to indentured apprentices only.

PROGRAM AND STUDENT LEARNING OUTCOMES

In addition, the college has established learning outcomes for the courses and programs it offers. Throughout this section, program learning outcomes are provided. The college has established a website with further information on the course-level student learning outcomes. This website is available at: http://college.lattc.edu/slo/department-and-area-assessments-and-slos

If you are not sure what a student learning outcome is, provided below are commonly referred to definitions.

THE WESTERN ASSOCIATION OF SCHOOLS AND COLLEGES (WASC)

Outcomes are used to describe the anticipated or achieved results of programs or the accomplishment of institutional objectives, as demonstrated by such indicators as student attitudes, knowledge, and/or performance. (WASC Handbook of Accreditation/2001)

THE ACCREDITING COMMISSION FOR COMMUNITY AND JUNIOR COLLEGES (ACCJC)

Student Learning Outcomes are the knowledge, skills, abilities, and attitudes that a student has attained at the end (or as a result) of his or her engagement in a particular set of collegiate experiences. (p.49, Accreditation Standards—ACCJC Standards Glossary)

THE ACADEMIC SENATE FOR CALIFORNIA COMMUNITY COLLEGES

Student Learning Outcomes refer to overarching specific observable characteristics developed by local faculty that allow them to determine or demonstrate evidence that learning has occurred as a result of a specific course, program, activity, or process. Outcomes are broader statements of intent or vision that are not necessarily measurable, but observable. Objectives are small steps that lead toward an outcome or goal. Measurability refers to both quantitative and qualitative means of measuring. (p.9, Standards and Practices Committee: Faculty Role in Accreditation.)
PROGRAM OVERVIEW

The Accounting program offers occupational training to the student who plans to work in general and corporate accounting. Instruction is provided in financial and managerial accounting theory and in various practical aspects of the accounting field. General accountants record transactions involving receivables, payables, payroll, and property into a general ledger and examine the financial records for compliance with accounting standards and applicable laws. Corporate accountants record financial transactions, analyze and evaluate financial records, apply tax law and finance techniques, and may design and implement accounting/ bookkeeping systems and procedures. Many of the courses offer practical accounting training to the owner/operators of a small business. Courses required in the Associate Degree program are basic to the study of more advanced accounting for the student who wishes to continue formal education at a four-year institution. Courses required for the Accounting Certificate, Accounting Clerk Certificate, and short-term skills certificates are designed to prepare students for entry-level positions in specialized occupational areas after 2 to 3 semesters of study.

In 2008, there were 69,200 bookkeeping, accounting, and auditing positions in industry. Their average annual wages were $40,000. (Source: Occupational Employment Statistics Program, U.S. Bureau of Labor Statistics)

Upon successful completion of the program, students will be proficient in the application of basic financial and managerial accounting principles and techniques. They will be adept at analyzing and recording economic transactions using Generally Accepted Accounting Principles (GAAP) and relevant computer applications. They will understand the application of the accounting principles and techniques to service, merchandising, and manufacturing businesses. Typical positions are bookkeeper, accounting clerk, junior-accountant and tax preparer. The program will prepare students for advancement to senior accountant or chief bookkeeper. This major may also lead to many other careers in business and industry.

PROGRAM LEARNING OUTCOMES - PLOs

- Perform, recognize and understand ethical issues related to the accounting profession.
- Demonstrate competency in preparing complex financial statements.
- The ability to transfer to four-year institutions.

ACCOUNTING

Requirements for the Associate in Arts degree in Accounting may be met by completing the 44 units of the required courses listed below and 18 units of general education courses to meet the Plan B graduation requirement.

ADMINISTRATION OF JUSTICE

Division: C/O - Construction, Design, and Manufacturing.
Department Chair: Mr. William (Bill) Elarton, Room B-122, (213) 763-3701, ElartoWD@lattc.edu

MISSION STATEMENT

Provide our students and community with high quality technical and professional instruction in the police science fields; that continually evolves to meet the needs of our educational, governmental, community and business partners.

PROGRAM OVERVIEW

LATTC’s Correctional Science program will prepare you to enter the rapidly growing field of corrections. The correctional field has an enormous range of career options, and with the proper training a future filled with job opportunity and flexibility will be opened. Substantial and growing employment opportunities exist in corrections, public and private detention facilities, law enforcement, private security, immigration and customs, secret service, FBI, ATF, homeland security are just some of the areas open to you. Students will also have the opportunity to gain experience in the field participating in ride-a-longs and internships with local agencies.

PROGRAM LEARNING OUTCOMES - PLOs

- Write clear and accurate reports.
- Work independently and interdependently to accomplish shared professional outcomes.
- Use critical observation skills.
- Communicate with a diverse population in a culturally sensitive manner.

CORRECTIONAL SCIENCE

Associate in Science Degree (60 Units)

To obtain an AS Degree in Correctional Science, the student will need to complete the 36-unit curriculum for a certificate of achievement. In addition, he or she will have fulfilled the college’s 24 units “Plan B” general education requirements in force at the time that they enrolled at LATTC.
ARCHITECTURE TECHNOLOGY
ENVIRONMENTAL DESIGN

Division: Construction, Design, and Manufacturing.
Department Chair: Mr. William (Bill) Elarton, Room B-122, (213) 763-3701, ElartoWD@lattc.edu

MISSION STATEMENT:
In alignment with LATTC and CDM mission, we provide transfer and assistance with job placement in architecture, urban planning and engineering offices, construction management firms, construction manufacturing industry and government agencies. We use sustainable design strategies, LEED standards and current computer tools to record, organize, design and maintain the life cycle of the built environment: GIS, CFM, CAD, BIM, 3-D modeling and others.

PROGRAM OVERVIEW
In keeping with the LATTC and CDM mission, we offer transfer courses and provide assistance with job placement in various venues, including architectural, urban planning and engineering offices; construction management firms; the construction manufacturing industry; and government agencies. We meet LEED standards and use sustainable design strategies and current computer tools (including GIS, CFM, CAD, BIM, 3-D modeling and others) to record, organize, design and maintain the life cycle of the built environment.

Because of the intensity and relevance of our offerings, classes are always available, even during difficult budget times. Our courses are integrated and comprehensive, covering four clusters of study: 1) design/space planning/programming; 2) construction documents/BIM; 3) building systems/historical context; and 4) sustainable tools, such as BIM, GIS, CAD, 3-D modeling and simulation. Every class includes training in organizational skills, time management, teamwork, communication and digital file management, and the equipment used in the classroom is the same found in professional offices.

In the architecture and environmental design program, students learn additional skills, such as prototyping, visualization, conceptualization, 3-D composition, lighting, proportion, sketching and modeling.

This critical foundational knowledge can be applied to the fields of industrial design, toy design, furniture design, interior design, landscape architecture, set design and virtual reality spaces.

People need places in which to live, work and play; they need places to learn, worship, meet, govern, shop and eat. These places may be private or public, indoors or outdoors, rooms, buildings or complexes. Together, they make up neighborhoods, towns, suburbs and cities. Architecture and environmental design professionals are trained in both the art and the science of creating such spaces: they take these basic and universal needs, create innovative designs and then transform them into reality.

Architecture and environmental design is a social mechanism that stimulates the sensory system, affecting the intellect and the desire to create by means of spatial languages and computer technologies. Our program provides innovative templates to create spaces, objects, and solutions for local needs — with cutting-edge innovation in particular demand in the Los Angeles area — as well as the global market. We recognize the untapped talent of visual thinkers in our communities and we provide them with a nurturing environment in which learning can happen in the context of doing.

In addition, these new tools can process multiple layers of information, helping us to understand the complex ways in which a single building interacts with its neighborhood, city and world, and thus enhancing our ability to create the necessary innovate solutions.

Given the importance of the built environment and its place in society, a revolution in architecture and design has taken place. New tools — GIS/CAD and 3-D modeling — facilitate an unprecedented analytical and comprehensive means of looking at human-made ecosystems, with these new lenses, we are able to see patterns and relationships we never saw before, helping us to sustain ourselves on the planet.

While some of these tools have been used successfully in design and construction for many years, they now support a broad range of additional applications, such as first response, national intelligence, operations planning, emergency management, Americans with Disabilities Act (ADA) compliance, safety and security planning, space utilization, LEED neighborhood planning, and land optimization.

Architecture and environmental design professionals are used throughout the life cycle of a building — from site selection, design and construction to use, maintenance and adaptation, and, ultimately, through closing, repurposing and reclamation. The new challenge is to facilitate each step of the process in a way that maximizes the benefits of the built environment to society while at the same time minimizing the short- and long-term impact on the natural environment.

Architecture and environmental design professionals service our communities with solutions for rooms, buildings, campuses, cities, countries and even the global market.

Experience in the field and credits from other institutions can be transferred, by examination on a one-to-one basis, for up to 15 units.

PROGRAM LEARNING OUTCOMES - PLOs
- Develop clear and accurate document & reports.
- Work independently and interdependently to accomplish shared professional outcomes.
- Use critical observation skills.
- Communicate with a diverse population in a culturally sensitive manner.

ARCHITECTURAL TECHNOLOGY

Associate in Arts Degree

Requirements for the Associate in Arts degree in Architectural Technology may be met by completing the 48 units of required courses along with 18 units of general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer requirements.
Upon successful completion of this program, students will have the skills needed to enter the field as an Architectural Technician who is both a problem solver and an integral part of the design process. Students will master the skills necessary to work in the construction, drafting, estimating, building inspection, civil, electrical, mechanical and structural engineering, construction computer rendering, and computer-aided drawing arenas. General education classes provide a well rounded education, imparting the knowledge and skills needed to successfully participate in all aspects of society.

**ARCHITECTURAL TECHNOLOGY**

- **Certificate of Achievement**

**Program Requirements**

A Certificate of Achievement is awarded for successful completion of 48 units of the required core courses for the Associate in Arts degree (above) with a “C” or better grade in each course.

Upon successful completion of this program, students will have the skills needed to enter the field as an Architectural Technician who is both a problem solver and an integral part of the design process. Students will master the skills necessary to work in the construction, drafting, estimating, building inspection, civil, electrical, mechanical and structural engineering, construction computer rendering, and computer-aided drawing arenas.

**AUTOMOTIVE COLLISION REPAIR**

**Division:** Transportation.

**Department Chair:** Mr. Rudy Serrato, Room F-106A, (213) 763-3908, SerratRC@lattc.edu

**PROGRAM OVERVIEW**

Los Angeles is a leading collision capital center in the automotive design world. Insurance companies are increasingly demanding Auto Collision Technicians trained in damage cost estimations. The demand for fully trained Automotive Repair Technicians is very high where skilled technicians are readily employable and command excellent incomes. These Technicians use highly sophisticated devices, such as laser for straightening frames, computer for mixing paint, and dust control contamination vacuum tools for smoothing paint.

The Trade-Tech Automotive Collision Repair program is designed for students who want to enter this growing field. Classes are a combination of classroom instruction coupled with hands-on training. Students learn welding procedures, diagnostic and repair procedures, body part alignment processes, metal finishing/shrinking/filling techniques, auto body electrical wiring systems, body section replacement and structural sectioning practices, body damage estimating techniques, auto body construction methods, paint color application skills, and body shop practices.

Upon successful completion of the program students will be proficient in a variety of automotive collision techniques and will have the knowledge and skills necessary to maintain, repair, and diagnose body and fender repair procedures. They will be proficient at all aspects of preparation and painting, including computerized mixing and matching, damage estimation, creating computerized reports and digital imaging. Students who complete this degree will be able to perform jobs as estimators, service managers equipped to repair problems occurring in automotive collision systems.
Course requirements for the Associate in Science degree program leading to DuPont Paint Systems Certification, may be fulfilled by completing 18 units of general education courses, all core courses for the four semesters as listed below, and nine units of core electives.

PROGRAM LEARNING OUTCOMES - PLOs

Upon completion of the Auto Collision program, students will be able to:

- Identify different types of vehicle frame types, components, and structure chemistries and outline the procedures of repair on the various materials.
- Demonstrate efficiency in the use of various paints, primers, sealers and the tools required to complete collision repairs on a vehicle using the latest trade proficiencies
- Use the various computer software available to create collision repair estimates in accordance to the latest industry standards.

AUTOMOTIVE AND RELATED TECHNOLOGY

■ Certificate of Achievement

A Certificate of Achievement is awarded for the completion of 36 units in the first through fourth semester courses listed, above, along with the core electives. This program includes DuPont Paint Systems Certificate of Achievement for Rule 1151.

PROGRAM OVERVIEW

Los Angeles’ long-time infatuation with the motorcar has made it a leading center in automotive design. Employment opportunities continue to thrive, and the demand for trained automotive technicians in the filed continues to increase. The Automotive and Related Technology program trains students to work as professionals in this field, offering instruction in maintenance, diagnosis and overhaul procedures of electrical and fuel injection systems.

PROGRAM LEARNING OUTCOMES - PLOs

Upon completion of the Automotive and Related Technology program, students will be able to:

- Diagnose and repair various types of vehicles using specialty shop tools and diagnostic equipment.
- Perform vehicle repairs using manufacturer technical programs while demonstrating proficiency in adhering to all applicable shop safety regulations.
- Ability to write mechanical repair estimates in accordance to the latest industry standards.

AUTOMOTIVE AND RELATED TECHNOLOGY

■ Associate in Science Degree

Course requirements for the Associate in Science degree may be met by completing the required courses listed below, along with 18 units of general education courses meeting the Plan B graduation requirement. Students who complete this degree will be able to perform jobs as a diagnostician, to troubleshoot and repair problems occurring in automotive ABS brake systems, electrical/electronic systems, engine performance, drivability, suspension and steering, automatic and manual transmissions, transaxles, engine repair, heating and air conditioning.
Students should take the 10 basic courses during the 1st year.

**BAKING, PROFESSIONAL**

**Division:** Culinary Arts/Professional Baking  
**Department Chair:** Mr. Steve Kasmar, Room H-117,  
(213) 763-7332, KasmarSL@lattc.edu

**PROGRAM OVERVIEW**

The Professional Baking program is a two year educational process that prepares the student for a successful career within the hospitality community. Baking program students, under the direct supervision of their chef instructor, will discuss, prepare, and analyze various baked goods including quick breads, yeast breads, laminated dough, specialty and wedding cakes, cookies, batters, and restaurant-style plated desserts. Baking formulas, cost controls, ingredient identification and usage is practiced throughout the program.

Students prepare baked goods on a daily basis for a retail bakery located on the LATTC campus, the college cafeteria and faculty dining room as well as catering for special events and holiday functions.

The greater Los Angeles area hosts many bakeries, markets, hotels, restaurants, and theme parks where baking graduates readily find employment as bakers, retail bakers, cake decorators, pastry cooks, managers, and production assistants.

The Professional Baking program will prepare students for employment in areas of baking and pastry arts. Upon successful completion of the program, students will demonstrate the ability to prepare and formulate baking/pastry recipes and formulas, assess food costs and sales price, and organize daily tasks for successful completion of baked goods. The National Restaurant Association Serve Safe Exam is administered at the completion of the first semester.

**BAKING, PROFESSIONAL**

**Associate in Arts Degree**

Upon completion of 48 units of the baking program with a “C” grade or better and successful completion of an additional 18 units of general education under plan “B” in the college catalog, the student may apply for and receive an Associate in Arts degree.

TOTAL 48

BAKING, PROFESSIONAL

Certificate of Achievement

The Certificate of Achievement in Professional Baking is awarded to students who successfully complete the 48 units of required professional baking classes with a “C” grade or better. The Professional Baking Certificate prepares the student for a career as a baker, retail baker, pastry cook, production assistant or as a cake decorator.

Upon successful completion of the program the student will demonstrate the ability to prepare and formulate baking/pastry recipes and formulas, assess food costs and sales price, and organize daily tasks for successful completion of baked goods.

BUSINESS

Division: Business/CIS/CAOT/Community Planning/ Mortgage Finance
Department Chair: Ms. Paulette Bailey, Room K-225, (213) 763-7269, BaileyP@lattc.edu

PROGRAM OVERVIEW

The Business program offers occupational training in a variety of business skills and techniques required by supervisors and managers in both private industry and public agencies. Management personnel are responsible for planning, organizing, budgeting, purchasing, operations, maintenance, directing the work of employees and directing the activities of an organization. Instruction is provided in management theory and practical application techniques required by entry-level positions, those seeking career advancement, and the owner/operator(s) of a small business.

Major areas of emphasis in Business leading to an A.A. degree include Accounting, Management/Supervision, Marketing and Public Relations, Real Estate, and Retail Merchandising. A variety of Certificates are offered in Accounting, Governmental Supervision, Management/Supervision, Marketing and Public Relations, Real Estate, and Small Business Entrepreneurship. Many of the courses are applicable to a number of specific Business majors and provide great latitude in course selection to allow students to customize the program to meet their goals. In addition, students planning to transfer to four-year institutions in Business and related fields may complete the lower division requirements of many colleges and universities. Students should confer with a counselor as soon as practicable in the program to determine the specific requirements of the particular institution to which they plan to transfer.

Courses required for a variety of Business Certificate designations and short-term Skills Certificates are designed to prepare students for entry-level positions in specialized occupational areas after 2 to 3 semesters and are also applicable to the Associates in Arts degree.

See separate pages for the following AA degrees and certificates:
- Accounting
- Governmental Supervision
- Management and Supervision
- Marketing and Public Relations
- Real Estate
- Retail Merchandising
- Small Business Entrepreneurship

PROGRAM LEARNING OUTCOMES - PLOs

- Have a working knowledge of information technology related to technically-oriented and competitive world of marketing.
- Ability to understand, analyzes, and describes leadership theories.
- Applies legal and ethical principles of business.
- The ability to effectively transfer to a four-year institution.

CARPENTRY

Division: Construction, Design, and Manufacturing.
Department Chair: Mr. William (Bill) Elarton, Room B-122, (213) 763-3701, ElartoWD@lattc.edu

MISSION STATEMENT

To provide our carpentry students with the necessary training and skills to obtain and sustain and advance their employment in the construction industry.

PROGRAM OVERVIEW

Carpenters are involved in many different kinds of construction activity, from the building of highways and bridges, to the installation of kitchen cabinets. Carpenters construct, erect, install, and repair structures and fixtures made from wood and other materials. Working from blueprints or instructions from supervisors, carpenters first perform the layout—measuring, marking, and arranging materials—in accordance with local building codes. They cut and shape wood, plastic, fiberglass, or drywall using hand and power tools. They join the materials with nails, screws, staples, or adhesives. In the final step, carpenters check the accuracy of their work with levels, rules, plumb bobs, framing squares, or electronic versions of these tools and make any necessary adjustments.

Carpenters employed outside the construction industry perform a variety of installation and maintenance work. They may replace panes of glass, ceiling tiles, and doors, as well as repair desks, cabinets, and other furniture. Depending on the employer, carpenters install partitions, doors, and windows; change locks; and repair broken furniture. In manufacturing firms, carpenters may assist in moving or installing machinery.

To meet the training needs of persons interested in becoming a Carpenter, Los Angeles Trade Technical College offers a Carpentry Associate in Science degree and a Carpentry Construction Technologies Associates in Arts degree as well as their equivalent Certificates of Completion.

The Associate in Science degree is designed for individuals seeking entry level positions in the field. Students enrolling in this program should be able to commit to full-time student status, which is approximately 24 hours per week. This time commitment is necessary to allow for hands-on training with the laboratory applications used during the course of instruction.

The Associate in Arts degree is an evenings-only course of study designed for individuals currently in the field who want to improve their skills or learn new ones. Due to limitations on available evening hours, the utilization of hands-on laboratory application is assumed to be provided at the students’ place of employment.

Carpenters are employed throughout the country in almost every community and make up the largest building trades occupation. They held about 1.3 million jobs in 2004. About one-third worked in building construction and about one-fifth worked for special trade contractors. Most of the rest of the wage and salary workers worked for manufacturing firms, government agencies, retail establishments and a wide variety of other industries. About one-third of all carpenters were self-employed.

Job opportunities for carpenters are expected to be excellent throughout the 2006-14 period. Employment of carpenters is expected to increase about as fast as average for all occupations through 2014, and turnover also creates a large number of openings each year. Contractors report having trouble finding skilled carpenters to fill many of their openings and the need for carpenters is expected to grow as construction activity increases in response to demand for new housing, office and retail space, and for modernizing and expanding schools and industrial plants. A strong home remodeling market is also projected to create a large demand for carpenters.

In May 2006, median hourly earnings of carpenters were $19.78. The middle 50% earned between $15.91 and $25.62, while the highest 10% earned more than $31.65 per hour.

PROGRAM LEARNING OUTCOMES - PLOs

- Use hand and power tools to perform work within the building construction industry.
- Demonstrate sustainable industry principles and practices.
- Perform calculations & measurements required for work in the building construction industry.
- Work independently & interdependently to safely accomplish shared professional outcomes.
CARPENTRY

■ Associate in Science Degree

Requirements for the Carpentry Associate in Science degree may be satisfied by completing a minimum of 48 units in the required courses listed below and an additional 18 units in general education courses (Plan B).

Upon successful completion of this program the student will have the necessary knowledge and skills for a career as a Carpenter in the Construction or Maintenance arena. The construction, installation, and repair of structures and fixtures made from wood and other materials. Working from blueprints, layout, measuring, marking, and arranging materials in accordance with local building codes, cutting and shaping wood, plastic, fiberglass, or drywall using hand and power tools, joining materials with nails, screws, staples, or adhesives are just some of the skills that will be mastered during this program.

BLDGCTQ 102  (OSHA) Safety Standards: Construction and Industry  2
BLDGCTQ 7  Weatherization - Practical Energy Efficiency Techniques  3
BLDGCTQ 8  Weatherization - Energy Efficiency Practices  1
BLDGCTQ 9  Energy Auditor – Residential  3
BLDGCTQ 12  Energy Auditor – Residential Practice  1
BLDGCTQ 921  Cooperative Education – Residential Practice  2

**Certification of Achievement**

A Certificate of Achievement is awarded for successful completion of 48 units of the required courses listed for the Associate in Science degree, above, with a “C” or better grade in each course.

Upon successful completion of this program the student will have the necessary knowledge and skills for a career as a Carpenter in the Construction or Maintenance arena. The construction, installation, and repair of structures and fixtures made from wood and other materials. Working from blueprints, layout, measuring, marking, and arranging materials in accordance with local building codes, cutting and shaping wood, plastic, fiberglass, or drywall using hand and power tools, joining materials with nails, screws, staples, or adhesives are just some of the skills that will be mastered during this program.

**Carpentry: Construction Technologies**

■ Associate in Arts Degree

Requirements for the Carpentry Construction Technologies Associate in Arts degree may be satisfied by completing a minimum of 48 units in the required courses listed below and an additional 18 units in general education courses (Plan B).

Upon successful completion of this program the student will have the necessary knowledge and skills for a career as a Carpenter in the Construction or Maintenance arena. The construction, installation, and repair of structures and fixtures made from wood and other materials. Working from blueprints, layout, measuring, marking, and arranging materials in accordance with local building codes, cutting and shaping wood, plastic, fiberglass, or drywall using hand and power tools, joining materials with nails, screws, staples, or adhesives are just some of the skills that will be mastered during this program.

CARPENTRY: CONSTRUCTION TECHNOLOGIES

Certificate of Achievement

A Certificate of Achievement is awarded for successful completion of 48 units minimum in the required courses listed for the Associate in Arts degree above with a “C” or better grade in each course. Upon successful completion of this program the student will have the necessary knowledge and skills for a career as a Carpenter in the Construction or Maintenance arena. The construction, installation, and repair of structures and fixtures made from wood and other materials. Working from blueprints, layout, measuring, marking, and arranging materials in accordance with local building codes, cutting and shaping wood, plastic, fiberglass, or drywall using hand and power tools, joining materials with nails, screws, staples, or adhesives are just some of the skills that will be mastered during this program.

CHEMICAL TECHNOLOGY

Division: Sciences.  
Department Chair: Mr. Ricky Wong, Room K-405,  
(213) 763-7295, WongRK@lattc.edu

PROGRAM OVERVIEW

The Chemical Technician (CT) occupations are becoming the fastest growing occupational category in the United States. The chemical technician generally performs laboratory analysis or testing in a wide variety of biological and physical science settings such as; environmental, water, drinking and wastewater and pharmaceutical, cosmetics and petroleum refineries; grading studies of materials, and quality control of industrial chemicals. Training is provided in applied chemistry, physics and mathematics as well as instrumentation, industrial processes, computerized analysis and quality control. The CT program is also designed to help students prepare for a smooth transition into other science related BA/BS degree programs. At the conclusion of this program, students will have the skills necessary for:

- Working in the chemical process industry, including treatment plants
- Monitoring safety/health and environmental regulations
- Sampling and handling chemical materials
- Measuring physical properties
- Performing chemical analysis
- Performing instrumental analysis
- Planning, designing and conducting experiments, and
- Synthesizing compounds
PROGRAM LEARNING OUTCOMES - PLOs

- Evaluate and apply knowledge of laboratory and chemical processes
- Demonstrate good verbal and written communication
- Practice basic knowledge of GLP
- Evaluate and apply knowledge of regulatory policies for laboratory business practices
- Demonstrate and apply knowledge of Environmental Health and Safety.

CHEMICAL TECHNOLOGY

■ Certificate of Achievement

The Certificate of Achievement in Chemical Technology may be earned by completing the 47 units of required courses listed above in the A.S. curriculum.

CHILD DEVELOPMENT

Division: Behavioral/Social Sciences/Child Development.
Department Chair: Ms. Alicia Rodriguez-Estrada, Room TE-516, (213) 763-3938, RodriqAI@lattc.edu

PROGRAM OVERVIEW

The Los Angeles Trade-Technical College Child Development Program is designed to meet the needs of those students who wish to prepare themselves for employment or who are currently employed in the Early Childhood Education or Elementary Education field. This curriculum prepares student to teach in programs for children including: private facilities, parent cooperative, Head Start programs, Children’s Centers and infant/toddler or school age programs. In addition, this program also prepares students to transfer to four-year universities in either Child Development or Teacher Education majors.
The Child Development Program offers various educational options. Completion of each program leads to a certificate, transfer option and/or an Associate in Arts degree. With additional general education units and required experience, the student will be eligible for the Child Development Permit as defined under Title 5. Meeting this requirement will enable the student to teach in both Federal and State preschool programs.

The Child Development courses provide training in infant and toddler care; working with school age children; supervising and administering childcare programs, as well as working with special needs children. Students who complete this degree program will be proficient in the methodology of working with young children through the extensive overview of theories and application of child development, the development of curriculum and lesson planning techniques, ways to observe and record child behavior, and classroom management techniques.

PROGRAM LEARNING OUTCOMES - PLOs

- Successfully manage an ECE classroom and provide children with responsive care, developmentally appropriate and anti-bias curriculum, and healthy and safe environment.
- Operate a high-quality ECE program that complies with Licensing and Title V regulations.
- Demonstrate professionalism while working with children, parents, staff, and community.

CHILD DEVELOPMENT

- Associate in Arts Degree

The Child Development courses required for the Associate in Arts degree provide training in infant and toddler care; working with school age children; supervising and administering childcare programs, and working with special needs children.

The need for qualified personnel to work with young children has risen over 100% over the last 10 years. Early childhood centers are requiring teaching staff to have AA and BA degrees in Child Development. Los Angeles Universal Preschool is creating 5000 preschool spaces and so this requires highly qualified teaching staff with the college training in child development. [LAUP Feb 2006]. Students who complete this degree program will be proficient in methodology of working with young children through the extensive overview of theories and application of child development, development of curriculum and lesson planning techniques, ways to observe and record child behavior, and classroom management techniques.

Planning Ahead:

Mantoux Test: Some Child Development courses may require you to obtain a Mantoux test for Tuberculosis. The college Health Center provides this service. Please call ahead for days and times the Health Center provides this service.

Criminal Clearance: In order to fulfill State licensing requirements for employment in private and public programs you must receive a Criminal Clearance to work with young children. Consult with faculty for additional information.

CPR Class: Your employer may require you to take a 15-hour Cardiopulmonary Resuscitation class. This class covers training on basic first aid for infants and children, CPR techniques as well as information on basic health and sanitation procedures.

CHILD DEVELOPMENT

- Associate in Arts Degree – Plan A (Transfer)

Requirements for the Associate in Arts degree in Child Development may be met by completing the required courses below with at least 28 units in Child Development, 3 units in the core electives and 30 units of general education courses to meet the Plan A graduation requirements.

COMMUNITY PLANNING AND ECONOMIC DEVELOPMENT

Division: Business/CIS/CAOT/Community Planning/ Mortgage Finance
Department Chair: Ms. Paulette Bailey, Room K-225, (213) 763-7269, BaileyP@lattc.edu

PROGRAM OVERVIEW

The Community Planning program at LATTC is the only program offered at an accredited community college in the United States. Our unique program provides students the knowledge and training needed for successful employment in the field of community and economic development. The community and economic development industry focuses on revitalizing low and moderate income communities. Rebuilding the economic, physical and social infrastructure of urban communities represents a new, growing and exciting career opportunity.

Students can learn basic planning terminology, development strategies, and other technical skills needed to enter the industry, earning a Certificate of Achievement in two semesters. Students who want to further develop their skills and advance their careers in the community planning and economic development field while earning a college degree can do so by completing the requirements for an Associate in Arts degree.

The Community Planning curriculum and courses are regularly reviewed and refined to ensure that courses are relevant, industry appropriate and cutting-edge. Industry experts and professionals develop, design and teach our courses. Our industry partnerships provide critical resources for our students, providing them with invaluable employment, volunteer, internship and networking opportunities. Our courses are structured to be laboratories that combine lecture, project driven learning and hands-on application of knowledge to contemporary issues affecting communities. Community planning courses are taught during the evening/weekends on campus, online and in the community to provide students with the greatest range of educational opportunities.

The Community Planning program is designed as the entry point for students wanting to begin a rewarding career in the community and economic development industry by working to build livable communities. Community development specialists are needed to help local residents, government and businesses solve complex neighborhood problems. Community developers work in community-based organizations; banks, city, state and federal governments; foundations; real estate development companies; social service agencies; job training and placement organizations; investment firms; and think tanks.

The community and economic development industry has three main goals. First, to change the economy of a community for the better increasing the income and wealth of residents and stimulating investments in the community, while placing assets and economic opportunities in the hands of resident leaders. A second goal is to improve the physical nature of the neighborhood, from its housing to its shopping areas, transportation, public spaces, and environment. The third is to strengthen the social bonds among residents and strengthen the infrastructure in communities – organizing the community, building leadership, civic engagement and quality social services.

The community and economic development industry allows individuals to improve the quality of life in communities while getting paid competitive salaries. Many community developers begin with community organizing and transition to housing and workforce development as a natural growth of the industry. The skills and knowledge learned in the Community Planning program allow students to be marketable in the non-profit and for-profit corporations. Companies and organizations are interested in hiring individuals that have solid skills and a good understanding of the problems and conditions facing low and moderate income cities across the country.

PROGRAM LEARNING OUTCOMES - PLOs

- Students will examine and understand the issues in the community and economic development field, and apply strategies to engage various issues.
- Students will develop and implement a work plan consisting of goals, objectives and timelines to evaluate the effectiveness of programs aimed at addressing a community need.

COMMUNITY PLANNING AND ECONOMIC DEVELOPMENT

Associate in Arts Degree

Requirements for the Associate in Arts degree in Community Planning and Economic Development may be met by completing the required 36 units of core courses listed below with a grade of "C" or better and 3 units of COMPLAN core electives:

In addition, all COMPLAN major students must successfully complete a minimum of 21 units of general education courses to meet the Plan B graduation requirement.

**TOTAL UNITS**: 21

---

**COMMUNITY PLANNING AND ECONOMIC DEVELOPMENT**

**Certificate of Achievement**

A Certificate of Achievement in Community Planning and Economic Development can be earned by the successful completion of a total of 21 units from the following community planning components. A total of 6 units must be completed in each development component area and 3 units in professional development area – economic, community organizing/social, physical/built environment/real estate and professional development.
COMPUTER APPLICATIONS AND OFFICE TECHNOLOGIES

Division: Business/CIS/CAOT/Community Planning/ Mortgage Finance
Department Chair: Ms. Paulette Bailey, Room K-225, (213) 763-7269, BaileyP@lattc.edu

DEGREE AND CERTIFICATE OPTIONS OVERVIEW

The Computer Applications and Office Technologies degree and certificate programs are designed to provide students with administrative and clerical skills required for employment in a variety of areas, such as business and industry, government agencies, schools, and hospitals. Office workers use a variety of computer software applications, produce correspondence, maintain databases, organize meetings, manage records and projects, and schedule appointments. The degree and certificate options include courses that are integral to many different administrative fields, and most include specific technical skills, relevant computer applications, and the necessary training in communicating, problem solving, and decision-making required for a variety of administrative and clerical entry-level positions as well as promotion and career advancement opportunities. The course content is designed to meet the varying needs of a wide spectrum of students, including those seeking:

- Associate in Arts degree (s)
- Certificate that is specific to a discipline or area
- Entry into the job market
- Advanced training and/or retraining
- Lifelong learning

Employment of secretaries and administrative assistants is expected to increase by 11 percent, which is about as fast as the average for all occupations, between 2008 and 2018. Projected employment varies by occupational specialty. Executive assistants in the areas of legal and medical will account for about 46 percent of all secretaries and administrative assistants. As reliance on technology continues to expand in offices, the role of the office professional has greatly evolved. Office automation and organizational restructuring have led secretaries and administrative assistants to assume responsibilities once reserved for managerial and professional staff. (Source: Occupational Outlook Handbook, 2008-2018).

Upon successful completion of the degree and certificate options, students will be prepared for entry-level positions, promotion, and career advancement in a variety of office occupations. They will be adept at analyzing business situations and using critical thinking skills to apply technological solutions in an office environment. The student will be proficient in the use of current software applications such as Microsoft Word, Excel, PowerPoint, Access, and Internet-related skills and techniques. Typical positions: Administrative Assistant, Office Assistant, Medical Office Assistant, Information Processing, and a variety of data entry/officeworker/clerical occupations.

Instruction in this program focuses on four specialty areas: (1) Administrative Assistant (2) Information Processing (3) Medical Office Assistant (4) Office Assistant – Clerical.

Note: Completion of English 21 with a grade of "C" or better prior to enrollment is recommended for success in the classes.

PROGRAM LEARNING OUTCOMES - PLOs

- The ability to successfully use the computer to process, organize and present data and information in basic business format with no errors.
- The ability to communicate effectively via spoken words, print and media, and work collaboratively with others in an office setting.

COMPUTER APPLICATIONS AND OFFICE TECHNOLOGIES

■ Associate in Arts Degree Options

The degree options in Computer Applications and Office Technologies (CAOT) can be met by completing the required courses listed within the degree options, and 18 units of the general education requirements for the Graduation Plan B. Certificates with CAOT are met when the listed requirements are completed.

ELECTIVES

The following courses may be used as electives provided that the course is NOT a requirement in the major. Please see the Department Chair for initial guidance on what elective to take.

COMPUTER APPLICATIONS AND OFFICE TECHNOLOGIES

■ Associate in Arts Degree - Administrative Assistant

The Administrative Assistant program prepares students for employment in business, government, and educational offices using automated systems and procedures. Emphasis is placed on the development of basic business office procedure and language skills, and training in the use of relevant computer application programs and office equipment.

Upon successful completion of the degree program, students are prepared to assume intermediate office duties and decision-making office responsibilities. The program prepares students for career advancement and retraining in the use of current computer application programs. The program provides the foundation for entry into office management positions. Typical positions: Administrative Assistant, Secretary, Senior Office Clerk.

COMPUTER APPLICATIONS AND OFFICE TECHNOLOGIES

■ Associate in Arts Degree - Information Processing Specialist

The Information Processing program prepares students for employment in business, government, and educational offices using computerized systems and procedures. Emphasis is placed on training and competency in the use of relevant computer applications software programs including word processing, spreadsheets, databases, presentation graphics, desktop publishing, utilization of the Internet, and popular operating systems. The development of basic business office procedure and language skills, and training in the use of office equipment are also emphasized.

Job prospects will be most favorable for those with the best technical skills – in particular, expertise in appropriate computer software applications. (Source: U.S. Bureau of Labor Statistics)

Upon successful completion of the degree program, students are prepared to assume intermediate automated office duties and decision making office responsibilities. The program prepares students for career advancement and retraining in the use of current computer application programs. Selected courses provide the background and skills to help students prepare to take MOS certification exams. The program provides the foundation for entry into office data management positions and the skills that promote success in the workplace. Typical positions include data entry clerk and office clerk.

COMPUTER APPLICATIONS AND OFFICE TECHNOLOGIES

■ Certificate of Achievement - Administrative Assistant

Upon successful completion of the Certificate of Achievement, students are prepared to assume entry-level office duties and responsibilities. The program prepares students for retraining in the use of current computer application programs. Typical positions include entry-level secretary, office clerk, and receptionist.

UNITS 10

Certificate of Achievement - Medical Office Assistant

The Medical Office Assistant Certificate of Achievement prepares students for entry-level employment in a medical/dental front office, such as a doctor/dentist’s office, hospital, clinic, and/or medical insurance company.

Upon completion of the certificate program, students are prepared to assume entry-level medical/dental office duties and responsibilities. The program may also prepare students for career advancement and retraining in the use of current computer application programs. The program also provides the basic skills that promote success in the workplace. Typical positions include medical clerk, medical transcriber, medical office assistant, and assistant medical office manager.

UNITS 10
COMPUTER APPLICATIONS AND OFFICE TECHNOLOGIES

■ Associate in Arts Degree - Office Assistant-Clerical

The Office Assistant - Clerical Associate in Arts degree prepares students for employment in business, government, and educational offices using automated systems and procedures. Emphasis is placed on the development of basic business office procedure and language skills, acquiring basic accounting knowledge, and training in the use of relevant computer application programs and office equipment.

General office clerks held about 3.3 million jobs in 2008. Most are employed in relatively small businesses. Although they work in every sector of the economy, about 46% worked in local government; healthcare and social assistance; administrative and support services; finance and insurance; or professional, scientific, and technical industries. (Source: U.S. Bureau of Labor Statistics)

Upon successful completion of the degree program, students are prepared to assume intermediate office duties and decision-making office responsibilities. The program prepares students for career advancement and retraining in the use of current computer application programs. The program provides the foundation for entry into office management positions and the skills that promote success in the workplace. Typical positions include assistant office manager, secretary, and senior office clerk.

REQUIRED COURSES

The following suggested sequence of required courses can be taken in any order provided prerequisites are met:

FIRST SEMESTER

CAOT 2* Computer Keyboarding II (Must have completed CAOT 1 or equivalent) 3

UNITS 15-17

TOTAL UNITS 31-33

*Degree required courses
**PROGRAM LEARNING OUTCOMES - PLOs**

- When given program specifications, successful students should create and debug code for those specifications and write comprehensive program documentation.
- Demonstrate comprehensive understanding of language tools by synthesizing and integrating multiple languages constructs in a single project.
- Demonstrate basic understanding of computer hardware and software.

**COMPUTER INFORMATION SYSTEMS**

**Associate in Science Degree**

Requirements for the Associate in Science degree in Computer Information Systems may be met by completing the required 21 units of courses listed below, with a grade of “C” or better. Students are also required to take 21 units of required CO INFO electives or related classes and 18 units of general education courses to meet the Plan B graduation requirements. Students planning to continue studies at a four-year institution should consult a counselor concerning a transfer curriculum.

Employment of computer software engineers is expected to increase by 32 percent from 2008-2018, which is much faster than the average for all occupations. In addition, this occupation will see a large number of new jobs, with more than 295,000 created between 2008 and 2018. Demand for computer software engineers will increase as computer networking continues to grow. For example, expanding Internet technologies have spurred demand for computer software engineers who can develop Internet, intranet, and World Wide Web applications. Programmers are employed in almost every industry, but the largest concentration is in computer systems design and related services. Large numbers of programmers also work for telecommunications companies, software publishers, financial institutions, insurance carriers, educational institutions, and government agencies. Prospects should be best for college graduates with knowledge of, and experience working with, a variety of programming languages and tools – including C++ and other object-oriented languages such as Java, as well as newer, domain-specific languages that apply to computer networking, database management, and Internet application development. (Source: U.S. Bureau of Labor Statistics)

Upon successful completion of the program, students will be proficient in the use of current software application programs. They will be adept at integrating computer-based technology by applying both data and word processing aspects of information systems. They will understand how computers and software applications are utilized in today’s information systems that support business decisions. Computer Information Systems personnel are involved in a variety of administrative, clerical, and accounting functions required to efficiently operate and maintain computerized business systems. This program leads to entry-level positions that maintain databases, manage projects, create presentations, design, develop, and maintain websites. Typical positions are website creator, data entry/records clerk, computerized business systems supervisor, and self-employment.
COMPUTER INFORMATION SYSTEMS

Certificate of Achievement

The Computer Information Systems Certificate of Achievement is designed to prepare students for entry-level careers in exciting Information Technology fields such as entry-level programming, multimedia, and web technologies. Microcomputer usage continues to grow at an ever increasing pace as does the demand for workers with solid technical skills and knowledge of programming, and website development and management. The primary goal of the program is to prepare students for entry-level employment as well as providing marketable career advancement knowledge and skills.

Upon successful completion of the Certificate, students will have a background in the use of current software application programs. They will understand how computers and software applications are utilized in today's information systems that support business decisions. This program leads to entry-level positions that maintain databases, create presentations, and design, develop, and maintain websites. Typical positions are website creator and entry-level data entry/records clerk.

Requirements for the Computer Information Systems Certificate may be met by completion of the 21 units of core courses plus 18 units of Co Info electives or related courses listed under the Associate in Science degree requirement.

COSMETOLOGY

Division: Cosmetology.
Department Chair: Ms. Marilyn Maine, Room H-130, (213) 763-7139, MaineMK@lattc.edu

MISSION STATEMENT

Our mission is to provide all students with high-quality technical and innovative education for a successful career in the profession of Cosmetology. The faculty and staff stand united in providing a positive, nurturing, and student centered learning environment. Students will be prepared for State Board examination licensing and entry level positions that meet industry demands.

PROGRAM OVERVIEW

Cosmetology is the study and practice of professional care of the hair, skin and nails. The Trade-Tech Cosmetology program offers training in hair styling, and cutting; chemical treatments, waving, straightening and coloring; skin care and make-up techniques; nail art, manicures, and pedicures. The Cosmetology occupation is governed by stringent state laws which stipulate that all who enter the field must complete 1600 hours of instruction. The LATTTC Cosmetology program is carefully designed to prepare students to pass the State Board examination and integrates a mock state board exam to help familiarize the students with the examination procedures.

The beauty industry is a 3 billion-dollar business in the United States and the demand for professional and creative cosmetologists is always high. Professionals in the beauty industry can be found in runway dressing rooms, movie sets, and in salons and day spas. Emphasis on skin and hair care for men and women is at the forefront of services in this high visibility industry. In addition the beauty industry holds a wide array of entrepreneurial opportunities. The Cosmetology department prides itself in working with each individual graduate to assist them with job placement upon completion of the program and successfully passing the State Board examination.

Upon program completion, students will have the knowledge and skills needed to successfully compete in the beauty industry. The Cosmetology program will prepare students to enter the beauty industry as stylists, salon managers, educators, make-up artists (both conventional and theatrical), product sales, manicurists and business owners.

Important Notes: All hours and operations on time cards are kept for five years per state requirements.

Please note regarding transfer hours: Transfer students with more than 300 hours from another Cosmetology program who have not received college level units from an accredited institution (i.e. community colleges or non-private institutions) may not transfer into Los Angeles Trade Technical College. However, students who cannot transfer hours can start the LATTTC Cosmetology program at the freshman level.

CULINARY ARTS

Division: Culinary Arts/Professional Baking.
Department Chair: Mr. Steve Kasmar, Room H-117, (213) 763-7332, KasmarSL@lattc.edu

PROGRAM OVERVIEW

The Culinary Arts department at Trade-Tech has the proud history of being one of the oldest cooking schools in the nation. We offer an extensive “hands on” and theory based culinary arts education that prepares students to enter the highly competitive hospitality industry. The department hosts professional industry-seasoned chefs as faculty, bringing their experiences from around the world. In addition to rigorous classroom instruction, students are trained in a working foodservice facility while attending classes. The Culinary Arts department Associate in Arts degree and Certificate of Achievement is recognized and accredited by the American Culinary Federation Educational Institute.

Los Angeles is a major hub to the ever changing, dynamic hospitality industry. The melting pot of cultures within the LA area dictates a cosmopolitan dining environment, and restaurants, hotels, caterers, cruise ships, theme parks and private homes readily employ Trade Tech students and graduates. On graduating from the Trade-Tech Culinary Arts program, students will be qualified to work as cooks, line cooks, caterers, private chefs, chef assistants, and sous chefs.

The Culinary Arts program has successfully prepared students for the hospitality industry for many years. Upon successful completion of the program, students will illustrate a working foundation of a professional industry kitchen. Students will be proficient in cooking techniques and terminology including meat fabrication and cookery, hot and cold sauce preparation, vegetable identification and production, task organizing and time management. Successful students will graduate with a working knowledge of culinary nutrition and fundamental management skills, as well as National Restaurant Association Serve Safe Certification.

PROGRAM LEARNING OUTCOMES - PLOs

- Student will recognize industry standards for entry, supervisory, and management level employment
- Demonstrate Professional culinary techniques according to industry standards
- Evaluate proper practices in various industry segments.
CULINARY ARTS

■ Associate in Arts Degree

The foodservice industry provides a wealth of career opportunities, with employers seeking successful graduates of Culinary Arts programs around the nation and the world. Los Angeles Trade Tech offers a Certificate of Achievement that allows the student to open the door to a successful career in the foodservice industry.

The Culinary Arts program has successfully prepared students for the hospitality industry for many years. Upon successful completion of the program, students will possess a working foundation of skills necessary to work in a professional industry kitchen. Students will be proficient in cooking techniques and terminology including meat fabrication and cookery, hot and cold sauce preparation, vegetable identification and production, task organizing and time management. Successful students hold the National Restaurant Association Serve Safe Certificate as well as a working knowledge of culinary nutrition and fundamental management skills.

Requirements for the Associates in Arts degree in Culinary Arts may be met by completing the required 48 units of culinary classes with a passing grade of “C” or better and 18 units of general education requirements listed under graduation requirements listed under plan “B”.

CULINARY ARTS

■ Certificate of Achievement

The Certificate of Achievement in Culinary Arts is awarded to students who successfully complete the 48 units of required classes listed above with a “C” grade or better. Upon successful completion of the program, the students will possess a working foundation of skills necessary to work in a professional industry kitchen.

DIESEL AND RELATED TECHNOLOGY

Division: Transportation.
Department Chair: Mr. Rudy Serrato, Room F-106A, (213) 763-3908, SerratRC@lattc.edu

PROGRAM OVERVIEW

If you live in the United States, almost every single thing you eat, wear or use was delivered by a diesel-powered vehicle. Our trucks, trains, busses are almost all diesel fueled; freighters, ocean liners, and electrical generators are also diesel powered. Trade-Tech trains the professionals who keep this vast pool of machines productive. Graduates of the Diesel Technology program are well paid and have a diverse choice of areas in which to specialize. In recent years, the demand from local employers has exceeded our supply of qualified graduates as the program continues to grow.
Requirements for the Associate in Science, Diesel and Related Technology may be met by completing the four semester courses below, and 18 units of general education courses to meet the Plan “B” requirement listed in this catalog under Graduation/Transfer Requirements.

Upon successful completion of the program, students will be proficient in all aspects of diesel engine fundamentals, electrical components, fuel systems, overhaul procedures, air brake system and the construction and operation of diesel engines.

*Note: Students are required to provide basic hand tools, navy blue coveralls and personal safety equipment.

**PROGRAM LEARNING OUTCOMES - PLOs**

Upon completion of the Diesel Technology program, students will be able to:

- Identify and explain the operation of diesel vehicle systems such as engine, transmissions, brakes, electrical and suspension along with the related subsystems.
- Utilize the various manufacturer diagnostic software to accurately diagnose and repair diesel powered vehicles.
- Demonstrate proficiency in utilizing specialized tools and shop equipment in the repair of diesel vehicles while adhering to all applicable industry safety standards.

**DIESEL AND RELATED TECHNOLOGY**

An Associate Degree in Diesel and Related Technology may not be earned in the evening program.
ELECTRICAL CONSTRUCTION AND MAINTENANCE

Division: Construction, Design, and Manufacturing.
Department Chair: Mr. William (Bill) Elarton, Room B-122, (213) 763-3701, ElartoWD@lattc.edu

MISSION STATEMENT

In corroboration with the Mission Statements of both, Los Angeles Trade - Technical College, and the Department of Construction, Design, and Manufacturing; the faculty and staff of “Electrical Construction and Maintenance” will continually endeavor to provide our students with a high quality education, cutting edge technology, and the necessary skill sets to succeed in the electrical profession. In an effort to promote student success we will instill a positive work ethic and a desire for academic achievement into each of our students. We will also promote a culture of lifelong learning, so that every graduating student from our program will enter the workforce as a highly educated professional; making Los Angeles Trade - Technical College the quintessential choice for electrical training.

PROGRAM OVERVIEW

We flick on the lights, turn on a television set, switch on the computer, hardly ever giving a thought to the miracle of electricity. And yet, electricity is the one thing that has made our lives utterly comfortable. It warms us, cools us, helps us eat and entertain ourselves. And who are the people responsible for this? Electricians.

Electricians install, test, repair and maintain electrical systems. Knowledge of electricity, understanding blueprints and other technical documents, manual dexterity, color vision, good sense of smell, physical stamina are all required for this career. Electricians are the people who wire homes, offices, and factories for electricity. They route and connect electrical wires, install light fixtures and other electrical devices. They also install and maintain all the electronic controls used for machines at both home and work.

To meet the training needs of persons interested in becoming an Electrician LATTC offers an Electrical Construction and Maintenance Associate in Science degree, and Electrical Construction and Maintenance Construction Technologies Associates in Arts degree, as well as their equivalent Certificates of Completion.

The Associate in Science degree is designed for individuals seeking entry level positions in the field. Students enrolling in this program should be able to commit to full-time student status, which is approximately 24 hours per week. This time commitment necessary to allow for hands-on training in the laboratory applications used during the course of instruction.

The Associate in Arts degree is an evenings-only course of study designed for individuals currently in the field who want to improve or expand their skills. Due to limitations on available evening hours, the utilization of hands-on laboratory application is assumed to be provided at the student’s place of employment. Depending on availability, the Associate in Arts degree may require slightly longer to complete. Check with the Department Chair for more details prior to enrolling.

For students seeking a shorter-term educational experience, LATTC also offers several specialized Skills Certificates: Electrician Trainee, Motor Control, Programmable Logic Controllers, Voice Data Video (Low Voltage), and National Electrical Code. These Certificates are valuable to current employees as proof of continuing education and skills improvement to aid in job advancement. In addition, classes that are incorporated as part of the Skills Certificate can also be utilized for the degrees and certificates of completion.

Employment of electricians is expected to increase as fast as average for all occupations through the year 2014. As the population and economy grow, more electricians will be needed to install and maintain electrical devices and wiring in homes, factories, offices, and other structures. New technologies also are expected to continue to stimulate the demand for these workers. For example, buildings need to increasingly accommodate the use of computers and telecommunications equipment. Also, the increasing prevalence in factories of robots and other automated manufacturing systems will require more complex wiring systems to be installed and maintained. Additional jobs will be created as older structures are rehabilitated and retrofitted, which usually requires that they are brought up to meet existing electrical codes.

In addition to jobs created by the increased demand for electrical work, many openings are expected to occur over the next decade as a large number of electricians are expected to retire.

Employment of construction electricians, like that of many other construction workers, is cyclical in nature as construction activity declines employment of construction electrician’s declines. Maintenance electrician’s jobs are far steadier than that of construction electricians. Those working in the maintenance side of the industry tend to be in the 40 hour a week plus benefits types of employment and are not as affected by the changes in the economy as those working on the construction side.

In May 2006, median hourly earnings of electricians were $23.33. The middle 50% percent earned between $18.43 and $29.90, while the highest 10% earned more than $36.63 per hour.

PROGRAM LEARNING OUTCOMES - PLOs

- Use hand and power tools to perform electrical construction & maintenance work.
- Demonstrate sustainable electrical construction & maintenance practices.
- Perform trade calculations related to electrical construction & maintenance work.
- Work independently & interdependently to safely accomplish shared professional outcomes.

ELECTRICAL CONSTRUCTION AND MAINTENANCE - ELECTRICIAN

- Associate in Science Degree

Requirements for the Electrical Construction and Maintenance Associate in Science degree may be satisfied by completing a minimum of 48 units in the required courses listed below and an additional 18 units in general education courses (Plan B).
Upon successful completion of this program the student will have the necessary knowledge and skills for a career in Residential, Commercial, and Industrial Construction and Maintenance of Electrical Systems. Electrical theory, electrical controls, conduit installation, blueprints, low voltage systems, maintenance practices, equipment installation are just some of the skills that will be mastered during this program.

**ELECTRONICS COMMUNICATIONS**

Division: Electronics & Computer Technology  
Department Chair: Mr. Eric Chavez, Room K-325,  
(213) 763-3782, ChavezEL@lattc.edu

**PROGRAM LEARNING OUTCOMES - PLOs**

- Demonstrate knowledge of reading electronic symbols and schematic diagrams.
- Perform mathematical calculations and measurements related to electronics circuit analysis.
- Demonstrate basic understanding of semiconductors devices, digital circuits, and electronics communications theory.
- Be prepared to transfer to an accredited, 4-year college or university with junior class standing in electronics technology or a related major.
■ Associate in Science Degree

The Electronics Communications program covers, circuit analysis of several complete FM systems including wideband microwave multiplex system and several mobile communication systems. Students will be able to apply basic radio fundamentals necessary to understand transmitters and receivers used in modern AM and FM communication systems. The program also prepares students to passing the F.C.C. general radiotelephone license examination. F.C.C theory and regulations, and marine and aeronautical rules are covered and students are offered a sample test.

Upon successful completion of the program students will be proficient in the operation of AM/FM Transmitters and troubleshoot AM/FM Receivers. Students will be able to install C Band, K/U Band, and DSS satellites systems. Students will have an understanding of cordless phones, microwave receivers/transmitters, and cell phone systems.

An Associate in Science degree in Electronics Communications may be earned by completing the required courses listed below during day or evening session, and 18 units of general education courses.

ELECTRONICS COMMUNICATIONS

■ Certificate of Achievement

A Certificate of Achievement is awarded upon successful completion of a minimum of the 44 required courses listed above. Upon successful completion of the program students will be proficient in the operation of AM/FM Transmitters and trouble shoot AM/FM Receivers. Students will be able to install C Band, K/U Band, and DSS satellites systems. Students will have an understanding of cordless phones, microwave receivers/transmitters, and cell phone systems.

ENGLISH

Division: English.
Department Chair: Ms. Janice Gangel-Vasquez, Room TE-515, (213) 763-5516, GangelJM@lattc.edu

PROGRAM OVERVIEW

English courses offered at Trade-Tech are designed to meet the needs of students requiring developmental English course work and to satisfy general education requirements for graduation and/or transfer, to fulfill major requirements for the Associate in Arts degree, and to prepare students for transfer as English majors.

The English Associate in Arts degree is designed for students interested in general studies or who plan to transfer to a four-year institution for a Bachelor of Arts (B.A.) degree. This program provides students with an opportunity to read widely in American, British and world literature. Students are trained in writing, and analytical and critical thinking skills that will prepare them for various academic and business-related pursuits.

PROGRAM LEARNING OUTCOMES - PLOs

• Student will be able to write a coherent college-level in-class essay with clear syntax and varied sentence structure, and exhibiting knowledge of Standard American English rules of punctuation and grammar.
• Students will be able to conduct and present research, conforming to MLA Standards.
• In an essay, students will be able to analyze a literary piece.

ENGLISH

■ Associate In Arts Degree

Requirements of the two-year curriculum for the Associate in Arts (A.A.) Degree with a major in English may be met by completing the required courses below with sufficient electives to fulfill the minimum of 18 units in English and other graduation requirements.
The English major may not be declared as a double major with Liberal Arts.

Requirements for the English major may be met by taking the minimum 30 units in general education courses under Graduation Plan A for an Associate in Arts degree concurrently with a minimum of 18 units in English and sufficient electives to total 60 degree applicable units.

**FASHION DESIGN**

Division: Art Trades/Fashion.
Department Chair: Ms. Carole Anderson, Room D-222, (213) 763-3640, AndersCL@lattc.edu

**PROGRAM OVERVIEW**

The Fashion Design program is formulated to provide specialized training in the latest methods of garment construction, illustration, draping, and pattern making, including the most widely used apparel software programs. Students are encouraged to continually experiment with creative design problems during the two-year program. The fashion department is staffed by professional instructors who have spent many years in the fashion industry as designers, pattern makers, production managers and manufacturers in all categories of apparel. The Fashion Design classrooms are equipped like design rooms complete with industrial sewing machines, pressing equipment, grading machines and dress forms. In addition, the college has state-of-the-art computer lab classrooms where instruction is offered in Gerber Technology, Lectra Inc. and Tukatech, which allows students to master technology along with traditional skills. The newest computer lab was developed to answer industry demand for training in fashion and technical illustration using Adobe Photoshop and Illustrator.

The fashion community contributes to the program through student scholarships donated by professional groups, companies and individuals. Fashion professionals are invited to work with and critique student designs and prominent speakers visit the campus on a regular basis to lecture on current fashion industry trends. Foreign and domestic fashion publications are available for student reference as well as an extensive collection of historical fashion magazines. The Sharon Tate Costume Collection houses a vast collection of apparel from noted designers and historical costumes, used to inspire students and offer creative solutions to design problems.

Los Angeles is the leading center for apparel manufacturing in the United States. These firms require personnel trained in the design and technical aspects of clothing production. Many local apparel manufacturing firms employ LATTC graduates as designers, assistant designers, grader/marker makers, pattern makers, technical designers, specification writers, and production managers.

The Fashion Design program prepares students for careers in all areas of apparel manufacturing from assistant designers to production management. Upon successful completion of the program, students will be proficient in construction and assembly, pattern making and grading, technical and fashion illustration, and draping techniques used to manufacture soft goods. In addition they will understand and be able to apply computer technology to industry related tasks. The comprehensive two-year program stresses industrial problem solving using professional techniques.
PROGRAM LEARNING OUTCOMES - PLOs

Upon completion of the Fashion Design program, students will be able to:

- Perform mathematical calculations for apparel.
- Use industrial sewing machines for apparel construction.
- Communicate design ideas visually using flat sketches or illustration.
- Use and manipulate a basic pattern block.
- Understand the 3 major design principles as related to pattern making.
- Use fabric manipulation to create 3d forms.
- Use apparel computer technology.
- Understand textile application in apparel.
- Research historical design for current styling.

FASHION DESIGN

■ Associate in Arts Degree

The daytime fashion design classes are part of a structured program, which each student must take in sequential order. Each semester is divided into two segments, and classes meet five days per week. The Fashion Design Certificate of Achievement consists of 46 units that may be completed in two years. Courses in the major must be completed with a “C” or better. Students may add 18 units of general education listed in “Graduation Plan B” and receive an Associate in Arts degree.

FASHION DESIGN

■ Certificate of Achievement

The Fashion Design Certificate of Achievement is comprised of the same core courses as the AA degree. Upon successful completion of the Certificate, students will be proficient in the grading, technical and fashion illustration, and draping techniques and will be prepared for employment in any area of apparel manufacturing. In addition they will understand and be able to apply computer technology to industry related tasks. A Certificate of Achievement is awarded for successful completion of all 46 units of the required courses listed above with a grade of “C” or better in each course.
PROGRAM LEARNING OUTCOMES - PLOs

Upon completion of the Fashion Technology program, students will be able to:

• Perform mathematical calculations for apparel or illustration
• Use industrial sewing machines for apparel construction
• Communicate design ideas visually using flat sketches or illustration
• Use and manipulate a basic pattern block
• Understand the 3 major design principles as related to pattern making
• Use fabric manipulation to create 3d forms
• Use apparel computer technology
• Understand textile application in apparel
• Research historical design for current styling

FASHION DESIGN

■ Certificate of Achievement – Fashion Technology

A full range of condensed lab courses in clothing construction, sketching, grading, draping and pattern making are offered during the evening and on Saturdays. These courses may be taken in any order, and lead to a Certificate in Fashion Design. Upon successful completion of the program students will be proficient in construction and assembly methods, illustration, both technical and fashion, pattern making, grading, and draping techniques. These courses will prepare students for apparel computer courses where they will apply skills using the latest computer technology.

Evening students may receive a Certificate of Achievement after taking 28 units that include:

FASHION DESIGN

■ Associate in Arts Degree - Fashion Technology

The Fashion Technology Associate in Arts degree is designed for those students attending in the evening and on Saturday. Since the structure of the evening courses does not allow for extensive lab experience, the department has a comprehensive internship program offered through the Cooperative Education Office which allows students to obtain valuable on the job experience. Courses are offered as enrollment dictates. Requirements for the Fashion Technology Associate in Arts degree may be satisfied by completing the courses listed below and an additional 18 units of general education listed in “Graduation Plan B”. Certain Fashion Design courses from the day program may be substituted for required courses with approval of the department head.

Los Angeles is the leading center for apparel manufacturing in the United States. These firms require personnel trained in the design and technical aspects of clothing production. This evening/Saturday program allows industry professionals the opportunity to upgrade their skills and advance in the latest technology.

Upon successful completion of the program students will be proficient in construction and assembly methods; illustration, both technical and fashion; pattern making, grading, and draping techniques. In addition, students will be able to apply computer technology to industry related tasks.

FASHIONS MERCHANDISING

Division: Art Trades/Fashion.
Department Chair: Ms. Carole Anderson, Room D-222, (213) 763-3640, AndersCL@lattc.edu

PROGRAM OVERVIEW

Fashion Merchandising is the planning, organization, and development of fashion products to be sold at a profit. The program at Los Angeles Trade-Technical College is unique in that it offers instruction covering both manufacturing processes and retail expertise. Computer technology plays an important role in the program offering instruction on AIMS 2000 and Electronic Data Interchange (EDI). The Fashion Merchandising Certificate consists of 45-46 units. An Associate in Science degree can be earned by adding 18 units of general education courses under Graduation Plan B.

Retail is a major industry in Southern California and fashion constitutes one of its largest segments. Retail positions range from major department stores to specialty outlets, and from personal stylists to employment in wholesale manufacturing. Los Angeles has taken the lead as the largest apparel manufacturing center in the United States, and the Fashion Merchandising curriculum is designed to provide specialized training in fashion trends, and consumer demand, as well as wholesale concepts.

Upon completion of the program, students will understand the cultural aspects of fashion in history, entrepreneurial opportunities in the fashion industry, and how to communicate the latest fashion trends and styling. Students will also be proficient in international business processes preparing them for the global apparel market.

PROGRAM LEARNING OUTCOMES - PLOs

Upon completion of the Fashion Merchandising program, students will be able to:
- Evaluate business ideas and develop strategies
- Research and analyze industry data
- Perform calculations related to industry
- Use various forms of communication to complete projects
- Use technology to assimilate data and make presentations
- Contribute and work in a group to complete a project
- Merchandise apparel assortments

FASHIONS MERCHANDISING

Associate in Sciences Degree

An Associates in Sciences degree in Fashion Merchandising may be earned upon completion of the required courses listed below and 18 units from the general education listed in “Graduation Plan B” required courses.

HYBRID & ELECTRIC PLUG-IN VEHICLE TECHNOLOGY

Division: Transportation.
Department Chair: Mr. Rudy Serrato, Room F-106A,
(213) 763-3908, SerratRC@lattc.edu

The courses listed in this certificate compile a comprehensive list of job related skills needed to acquire hybrid and electric plug-in vehicle maintenance and repair technical skills. They cover basic, intermediate and advanced level training of these vehicles including the different configurations used in the automotive, transit and trucking industries. These skills will prepare an individual for entry-level employment or career advancement in the maintenance and repair of hybrid vehicles in all sectors of the transportation industry.

PROGRAM LEARNING OUTCOMES - PLOs

Upon completion of the Hybrid & Electric Plug-In Vehicle Technology program, students will be able to:
- Identify alternative fuel and hybrid vehicles, explain their operation and related safety repair procedures.
- Safely remove and replace various hybrid and plug-in electric vehicle components using specialty tools and equipment according to manufacturer and industry safety guidelines.
- Perform complex hybrid and plug-in electric vehicle troubleshooting using manufacturer diagnostic software, schematics, and specialty tools designed for hybrid and electric vehicle repair.

LABOR STUDIES

Division: Labor Studies.
Department Chair: John McDowell, Room LA-117,
(213) 763-7129, McDoweJR@lattc.edu

THE LABOR CENTER

The Labor Center, located in LA-117, offers Labor Studies classes leading to an Associate in Arts Degree or Certificate of Achievement in Labor Studies. These classes cover a wide range of topics from labor law and workers rights to union organizing and strategic bargaining. Classes and programs are held both on campus and off site at union halls and community organizations. Students can register by mail, online, on site in class or at the Labor Center Office.

The Labor Center maintains strong relationships with leaders of organized labor and the community. This includes the active participation of a strong and broad based Advisory Board. These leaders help promote participation in the Labor Studies program, and assure evaluation and feedback from the private sector to help shape future programs. The Labor Center staff also advise Labor Studies students and prospective students, and maintains a collection of labor DVDs available for free loan.

MISSION STATEMENT

Educate and train students, workers and worker representatives to:
- prepare for or advance in careers in unions and labor relations
- understand workers rights, strategies and techniques to advance workers’ interests
- better communicate with and involve union members in organizing and collective bargaining
- increase civic participation of workers through political and community involvement
PROGRAM OVERVIEW

Labor Studies is designed to train students, union leaders, human relations professionals, and workers in the practical, applied skills and up-to-date knowledge of labor relations and for positions in union leadership. Employees in labor and human relations can develop career skills and prepare for positions or advancement in labor unions, labor relations, human relations and government.

Leaders of union organizations come from the same occupations and professions as the members they represent. This ranges from teachers and fire fighters, to electricians, janitors and office workers. Seldom, if ever, are they trained in the skills required for effective union leadership prior to assuming leadership positions. Usually, they learn by experience. The Labor Studies program offers classes in the practical applied skills needed for effective union representation, including negotiations, labor law and workers rights, and grass roots political campaign work, to name a few. The instructors are all experts who are active in the field.

The Labor Studies Program offers the following alternative patterns of learning: 1) courses may be completed as desired to develop specific skills to meet the needs of the individual student; 2) courses may be completed to meet the requirements of the Associate Degree; 3) courses may be completed to meet the 24 units required to earn the Certificate of Achievement in Labor Studies.

The Associate in Arts Degree requirements may be met by successfully completing 36 units of Labor Studies classes (which must include at least 18 units of required 3-unit Labor Studies courses) and 18 units of required general education courses specified in Plan B. These Labor Studies classes are often given in cooperation with organized labor and held off site in union halls with free parking. Students may earn a Certificate of Achievement by successfully completing 24 units of Labor Studies classes, which must include at least 15 units of required, 3-unit courses.

Upon successful completion of Labor Studies classes, the student will have a greater understanding of the contributions of labor and the necessary skills for union leadership. This is particularly applicable to Los Angeles, with 340 local unions with a combined membership approaching one million union members.

Students who complete the requirements for the Associate Degree in Labor Studies will have a working knowledge of labor organizations, their structure, philosophy and day to day operation. Graduates will be qualified for positions in labor organizations, human relations, and government.

PROGRAM LEARNING OUTCOMES - PLOs

• Students will use effective communication, mobilizing and leadership skills to organize, build and strengthen unions.

LABOR STUDIES

■ Associate in Arts Degree

To fulfill the 36-unit Labor Studies major requirement, students must earn at least 18 of the 36 units by successfully completing “Required Courses” listed below.

COOPERATIVE WORK EXPERIENCE

COOP ED 911 Work Experience in Major I 1
COOP ED 921 Work Experience in Major II 2
COOP ED 931 Work Experience in Major III 3
COOP ED 941 Work Experience in Major IV 4

NOTE: A maximum of 3 units of COOP ED may be applied to meet the 36 units AA Degree requirement in Labor Studies.

LIBERAL ARTS

Division: Language Arts & Humanities.
Department Chair: Dr. John Glavan, Room TE-520, (213) 763-3931, GlavanJJ@lattc.edu

PROGRAM OVERVIEW

Students planning to transfer to a four-year college or university may choose the Associate in Arts degree with a major in Liberal Arts and Sciences by choosing one of the options listed below.

LIBERAL ARTS AND SCIENCES

■ Associate in Arts Degree

ASSOCIATES OF ARTS DEGREE – LIBERAL ARTS AND SCIENCES

The Liberal Arts degree is designed for students who desire a broad base of knowledge in the liberal arts and sciences. The Liberal Arts degree is one option for students who plan to transfer to a four-year university, including the California State University (CSU) or the University of California (UC).

The Liberal Arts degree consists of a core of general education units combined with 16 units chosen from ONE area of emphasis plus additional elective units to reach a total of 60 units.

To complete the degree students must:
I. Choose one option for the General Education Core
   A. Los Angeles Trade-Technical College Graduation Plan A OR
   B. CSU/GE Minimum GE units required for CSU/GE Certification OR
   C. IGETC Minimum GE units required for IGETC Certification

II. Choose ONE Area of Emphasis
   - Courses used to meet General Education requirements may NOT be used to complete requirements in the following areas of emphasis: Natural Sciences.
   - Courses taken to complete the Multiple Subject Teacher Prep option may be used to complete General Education Requirements.

III. Complete any additional electives chosen from DEGREE APPLICABLE courses necessary to complete the 60 units required for the Associates of Arts Degree.

IV. Complete all DEGREE APPLICABLE course work with a cumulative grade point average (G.P.A.) of “C” (2.0) or better
   (Note: Students should be aware that not all courses on this list are offered every semester. Students should check with the department listing the course to verify when the course will be offered.)

Liberal Arts and Sciences: Emphasis in Natural Sciences

This area of emphasis examines the physical universe, its life forms, and its natural phenomena. Emphasis is placed on students using the methodologies of science as an investigative tool. The Natural Sciences area of emphasis allows the students to take courses that MAY satisfy lower-division requirements with the fields of science including Biology, Chemistry, Allied Health fields, Nursing preparation, Health Science and related fields, Kinesiology, Pre-Med, Dental Hygiene and more.

Students planning for transfer are cautioned that this curriculum may not provide for the completion of lower division requirements for transfer. Students should consult with a counselor for specific information regarding an intended major if transfer to a four-year university is a goal.

Degree Requirements in Natural Sciences: Complete 18 units of coursework from courses listed below. At least one course requiring lab work is required. Lab courses, marked with * cannot apply in this area unless the lecture courses that are prerequisite or co requisite to the lab courses are also taken.

Anthropology 101 – Human Biological Evolution (3)
Astronomy 1 – Elementary Astronomy (3)
Astronomy 2* – Elementary Astronomy Lab (1)
Astronomy 5* -- Fundamentals of Astronomy Lab (1)  
Biology 3 -- Intro to Biology (4)  
Biology 6 - General Biology I (5)  
Biology 7 - General Biology II (5)  
Biology 20 - Human Anatomy & Physiology (8)  
Biology 36 - The Bioscience for Health Occupations (4)  
Chemistry 51 - Fundamentals of Chemistry (5)  
Chemistry 65 - Introductory General Chemistry (4)  
Chemistry 70 - Introductory Organic and Biochemistry (4)  
Chemistry 101 - General Chemistry I (5)  
Chemistry 102 - General Chemistry II (5)  
Chemistry 211 - Organic Chemistry I for Science Majors (5)  
Chemistry 212 -- Organic Chemistry II for Science Majors (5)  
Chemical Technology 111 - Applied Chemistry I (5)  
Chemical Technology 121 - Applied Chemistry II (5)  
Electronics 2 - Introduction to Electronics (3)  
Environmental Science 1 - The Human Environment: Physical Processes (3)  
Geography 1 - Physical Geography (3)  
Geology 1 - Physical Geology (3)  
Geology 6* -- Physical Geology Laboratory (2)  
Microbiology 1 - Introductory Microbiology (5)  
Microbiology 20 - General Microbiology (4)  
Physics 1 - Mechanics of Solids (4)  
Physics 2 - Mechanics of Fluids, Heat, and Sound (4)  
Physics 3 - Electricity and magnetism (4)  
Physics 4 - Optics and Modern Physics (4)  
Physics 6 - General Physics I (4)  
Physics 7 - General Physics II (4)  
Physics 12 - Physics Fundamentals (3)  
Physics 14 - Physics Fundamentals Laboratory (1)  
Physics 29 - Basic Physics for Technicians (4)  
Physics 32 - Laboratory in Applied Optics (2)  
Psychology 2 - General Psychology II (3)  

Liberal Arts and Sciences: Emphasis in Multiple Subject Teacher Preparation

The Multiple Subject Teacher Preparation option is designed for future elementary school teachers.

Students planning for transfer are cautioned that this curriculum may not provide for the completion of lower division requirements for transfer. Students should consult with a counselor for specific information regarding an intended major if transfer to a four-year university is a goal.

**MACHINE SHOP-CNC**

Division: Construction, Design, and Manufacturing.  
Department Chair: Mr. William (Bill) Elarton, Room B-122, (213) 763-3701, ElartoWD@lattc.edu

### MISSION STATEMENT

Provide our students and community with high quality technical and professional instruction in the machining fields; that continually evolves to meet the needs of our educational, governmental, community and business partners.

### PROGRAM OVERVIEW

Machinists use machine tools, such as lathes, milling machines, and machining centers, to produce precision metal parts. They use their knowledge of the working properties of metals and their skill with machine tools to plan and carry out the operations needed to make machined products that meet precise specifications. Many modern machine tools are computer numerically controlled (CNC). CNC machines, following a computer program,
control the cutting tool speed, change dull tools, and perform all of the necessary cuts to create a part. Frequently, machinists work with computer control programmers to determine how the automated equipment will cut a part. The programmer may determine the path of the cut, but the machinist determines the type of cutting tool, the speed of the cutting tool, and the feed rate. Because most machinists train in CNC programming, they write basic programs and often set offsets (modify programs) in response to problems encountered during test runs.

Because the technology of machining is changing rapidly, machinists must learn to operate a wide range of machines. Along with operating machines that use metal cutting tools to shape work pieces, machinists operate machines that cut with lasers, water jets, or electrified wires. As engineers create new types of machine tools and new materials to machine, machinists must constantly learn new machining properties and techniques.

Los Angeles Trade Technical College offers an Associate in Science degree in Machine Shop CNC (Core major plus general education classes) or a Certificate of Achievement (Core major classes only). In addition, we offer a Certificate of Achievement - Adjunct in Machine Shop CNC.

The Associate in Science degree, or equivalent Certificate of Achievement, is designed for individuals seeking entry level positions in the field. Students enrolling in this program should be able to commit to full-time student status, which is approximately 21 hours per week. This time commitment is necessary to allow for hands-on training in the lab applications used during the course of instruction.

The Certificate of Achievement- Adjunct is an evenings-only course of study designed for individuals currently in the field who want to improve their skills or learn new ones. Due to limitations on available evening hours, the utilization of hands-on lab application is assumed to be provided at the students place of employment.

Machinists held about 370,000 jobs in the United States in 2006. Most machinists work in small machining shops or in manufacturing industries, such as machinery manufacturing and transportation equipment manufacturing (motor vehicle parts and aerospace products and parts). Maintenance machinists work in most industries that use production machinery.

Despite relatively slow growth, job opportunities for machinists should continue to be good. Many young people with the necessary educational and personal qualifications needed to obtain machining skills are not currently entering production occupations; therefore, the number of workers obtaining the skills and knowledge necessary to fill machinist jobs is expected to be less than the number of job openings arising each year from the need to replace experienced machinists who transfer to other occupations or retire, and from job growth.

According to the State of California EDD, median hourly earnings of machinists May 2006.

PROGRAM LEARNING OUTCOMES - PLOs

- Use hand and power tools to perform work within the machining technology industry.
- Demonstrate sustainable industry principles and practices.
- Perform calculations & measurements required for work in the machining technology industry.
- Work independently & interdependently to safely accomplish shared professional outcomes.

MACHINE SHOP-CNC

Associate in Science Degree

The Associate in Science degree in Machine Shop - CNC requirements may be met by completing 48 units of required courses listed below plus 18 units of Plan "B" general education courses. Or it may be awarded for the completion of a minimum of 62 units, including the 32 units listed under the Certificate of Achievement-Adjunct, and 30 units of Plan "A" general education courses. Plan "A" and "B" are listed in the catalog under Graduation/Transfer Requirements.

Upon successful completion of this program the student will have the necessary knowledge and skills for a career in the Machining Industry. Students will properly use related terminology. Safely set-up and operate numerous conventional and CNC machine tools, use computers to program various CNC machines directly or with CAM, and interpret most related parts and assembly drawings. The general education component classes will give the student a well rounded education and provide knowledge and skills to assist in successful participation in all aspects of society.

### MACHINE SHOP-CNC

#### Certificate of Achievement

A Certificate of Achievement is awarded for the completion of the 48 units in the required courses listed above. A grade of “C” or better is required in each course.

Upon successful completion of this program the student will have the necessary knowledge and skills for a career in the machining industry. Students will properly use related terminology, safely set-up and operate numerous conventional and CNC machine tools, use computers to program various CNC machines directly or with CAM, and interpret most related parts and assembly drawings.

#### MACHINE SHOP-CNC - MSCNC

A Certificate of Achievement - Adjunct is awarded for the completion of 32 units in the courses listed below. A grade of “C” or better is required in each course.

Upon successful completion of this program the student will have the necessary knowledge and skills for a career in the machining industry. Students will properly use related terminology, safely set-up and operate numerous conventional and CNC machine tools, use computers to program various CNC machines directly or with CAM, and interpret most related parts and assembly drawings.

### MANAGEMENT/ SUPERVISION

Division: Business/CIS/CAOT/Community Planning/Mortgage Finance

Department Chair: Ms. Paulette Bailey, Room K-225, (213) 763-7269, BaileyP@lattc.edu

#### PROGRAM OVERVIEW

The Management/Supervision program is designed to comprehensively cover the major aspects of business, management, and supervision necessary to advance and succeed in business and industry. Course work will cover the basic business management skills with emphasis on human relations, leadership, and written and oral communications specifically related to managerial/supervisory positions. It is designed to meet the needs of those who plan to (1) prepare for supervisory positions, (2) existing supervisors/management personnel seeking advancement to more responsible positions, and (3) individuals planning to own and operate their own business.

Administrative services managers perform a broad range of duties in virtually every sector of the economy. They coordinate and direct support services to organizations as diverse as insurance companies, computer manufacturers, and government offices. (Source: U.S. Bureau of Labor Statistics)

This program prepares students to move into positions as supervisors, team-leaders, or first-line managers by adding basic management/supervisory skills to the occupational/technical skills they may already possess. Upon successful completion of the program, students will be adept at problem solving, decision-making, communicating, motivating people in groups and teams, and understanding and applying management skills required for
entry-level positions in business and industry, or for their own businesses. Typical positions are supervisor/manager in business, industry, government, and nonprofit sectors, self-employed business owners/operators.

MANAGEMENT/SUPERVISION

Associate in Arts Degree

Requirements for the Associate in Arts degree in Management/Supervision may be met by completing the required 47 units of courses listed below, and 18 units of general education courses to meet the Plan B graduation requirement.

 MANAGEMENT/SUPERVISION

Certificate of Achievement - Governmental Supervision

A Certificate of Achievement in Governmental Supervision is offered to students who complete a total of 30 units of the required courses listed below. The certificate is regarded by management agencies as evidence of significant achievement.

Upon successful completion of the program the students will be proficient in the application of basic business and management principles and techniques in a governmental environment. They will be adept at analyzing basic business situations as related to governmental agencies. This program prepares students to advance to positions of responsibility in governmental organizations and trains them in fundamental aspects of supervision and management in city, state, and federal agencies.

MARKETING AND PUBLIC RELATIONS

Division: Business/CIS/CAOT/Community Planning/ Mortgage Finance
Department Chair: Ms. Paulette Bailey, Room K-225, (213) 763-7269, BaileyP@lattc.edu

PROGRAM OVERVIEW

This program is designed for students who wish to enter the fields of marketing or public relations. It is designed to meet the needs of those who wish to become store managers, department store buyers, or retail/wholesale salespersons. Publicity, sales, and business writing are stressed.

Upon successful completion of the program, the student will have a background in the principles and practices involved in the promotion and distribution of products and services from producers through middleman to the ultimate consumer. This program leads to entry-level positions in public relations and marketing careers in business, industry, agency, government, and nonprofit sectors of society. Typical positions are retail, wholesale, industrial sales, buyer, merchandising supervisor, and self-employment.

MARKETING AND PUBLIC RELATIONS

■ Associates in Arts Degree

Requirements for the Associate in Arts degree in Marketing/Public Relations may be met by completing the required 18-units of courses below, the required 26 unit core courses required for all business majors, and 18 units of general education courses to meet the Plan B graduation requirement.

MARKETING AND PUBLIC RELATIONS

■ Certificate of Achievement

The Certificate of Achievement is awarded for successful completion of 33 units of the core courses below. All of the courses may be applied toward the fulfillment of the Marketing/Public Relations Associate in Arts degree.

Upon successful completion of the Certificate program, students will have a background in the principles and practices involved in the promotion and distribution procedures for products and services.

MICROCOMPUTER TECHNICIAN I.T. ESSENTIALS

Division: Electronics & Computer Technology  
Department Chair: Mr. Eric Chavez, Room K-325, (213) 763-3782, ChavezEL@lattc.edu

■ Associate in Science Degree

The Microcomputer Technician I. T. Essentials program is designed to prepare a technician to install, configure, and add auxiliary equipment for a microcomputer. The technician is also able to load software and suggest programs to answer the needs of individuals and companies. Microcomputer Technicians must be above average in knowledge of mechanical systems. They must also have interest and ability in mathematics to successfully apply the training presented in this program.

Daytime and evening classes are offered as a part of a two-year training program that leads to the Associate in Science degree. The first year is spent developing basic concepts and skills in networking cabling both copper and fiber optics, basic electronics, software tools for electronics technicians, and networking fundamentals. The second year specializes in microcomputer systems as used in industry. Cisco Networking 1, 2, 3, 4 which leads to a certification in CCNA (Cisco Certified Networking Associate), I. T. Essentials is taught at the fourth semester for students to be certified by Cisco Systems.

Requirements for the Associate in Science degree in Microcomputer Technician I. T. Essentials may be met by completing the required courses listed below, with a grade of "C" or better in each, and 18 units of general education courses as listed in Graduation Plan B to meet the 60-unit requirement. The computer industry is expanding due to the continuing drop in the price of computers and the introduction of new models with greater power. The fastest growing segment of this field is the microcomputer segment. The power and speed of these units continue to increase and, at the same time, the price continues to decrease. This has placed the computer within financial reach of many small businesses and individuals. With more systems being manufactured and installed, more technicians are needed.

Upon successful completion of the program the students will be able to format a computer, install the operating system, and install all the necessary drivers. The students will be able to successfully configure and create a network system consisting of a number of computers.

MICROCOMPUTER TECHNICIAN I.T. ESSENTIALS

■ Certificate of Achievement

This Certificate is designed for students who wish to train for employment as a microcomputer technician but do not wish to transfer to a four year university. A Certificate of Achievement is awarded for the successful completion of 42 units in the first through fourth semester courses listed above. Students completing the Certificate program will be able to program a computer, install the operating system and install necessary drivers as well as configure and create a network system consistent in a number of computers all for employment in a field related to microcomputer technician.

MORTGAGE FINANCE

Division: Business/CIS/CAOT/Community Planning/ Mortgage Finance
Department Chair: Ms. Paulette Bailey, Room K-225, (213) 763-7269, BaileyP@lattc.edu

PROGRAM OVERVIEW

The LATTC Mortgage Finance program is one of three programs nationwide created for the purpose of developing a pipeline of well-trained and diverse workers for the mortgage finance industry. As part of the Community & Economic Development Department, the Mortgage Finance Program focuses its education and training on the wealth and asset building of its students (both as consumers and workers) and the inner city communities it serves. In recent years, the program has been expanded to address consumer education needs around financial and credit management, homeownership, and general asset building. The Mortgage Finance program continues to develop a robust and comprehensive offering of education and training that serves consumers, students preparing to enter the mortgage industry and current mortgage professionals.

Our unique program provides students the knowledge and training needed for successful employment, career advancement, and professional development in the residential mortgage and real estate industry. Our courses are organized into three tracks: 1) consumer education; 2) core Mortgage Finance courses; and 3) professional development/continuing education. Our consumer education classes consist of credit (tuition) and non-credit (free) courses to accommodate the different needs of students. Our courses are scheduled to accommodate the working person, therefore, the majority of our courses are taught in the evening, weekends, online, hybrid online, or as one-day seminars. The Mortgage Finance curriculum is regularly reviewed and refined to ensure the courses are relevant, appropriate and cutting-edge – providing our students with the necessary skills and knowledge to be successful in the industry and remain at the top of their profession.

Industry leaders participate in the Mortgage Finance Industry Advisory Board and help guide the development of new curriculum, teach courses, recruit instructors and mentors, assist with internships and employment of our students, provide industry training and network opportunities, and provide resources for the program. Our industry partners include mortgage bankers, mortgage brokers, non-profit housing counselors, federal regulators, bankers, and realtors.

MORTGAGE FINANCE

■ Associate in Arts Degree

This program is appropriate for those students who wish to earn a bachelor’s degree and continue their education by transferring to a four-year college or university. Most students who earn their Associate in Arts degree in Mortgage Finance major in business and finance while attending a four-year college or university. Requirements for this program may be met by completing a total of 60 units, consisting of 24 units of core courses, 6 units of approved electives, and 30 units of general education courses.

**Division:** Transportation.
**Department Chair:** Mr. Rudy Serrato, Room F-106A,
(213) 763-3908, SerratRC@lattc.edu

**PROGRAM OVERVIEW**

The Los Angeles basin is the leader in off road motorcycle racing. The Certificate of Achievement in Motorcycle Repair is designed for both new students as well as industry professionals who want to upgrade their skills and show validation of technology training.

Courses leading to the Certificate are offered during evenings and on weekends. The Certificate may be earned by completing the required courses, below, along with sufficient core electives to meet the 25-unit minimum requirement. Upon completion of the program, students will have the skills necessary to maintain, repair, and diagnose electrical and fuel induction systems, and will be proficient in tune-up overhaul procedures and basic shop practices.

*Note: Students are required to furnish their own hand tools. Consult with the instructor for more information.*

Satisfactory completion of the “Required Courses” plus one “Core Elective” together with 30 units of general education courses to meet the requirements of “Plan A”, will entitle the student to an Associate Degree.

**NURSING, REGISTERED**

**Division:** Allied Health.
**Department Chair:** Dr. Rita Weingourt, Room MH-165A,
(213) 763-7182, WeingoRL@lattc.edu

**PROGRAM OVERVIEW**

The Registered Nursing Program at Los Angeles Trade-Technical College combines nursing and general education courses with selected laboratory experiences during which students provide nursing care to clients in hospitals and other health care facilities. Nursing courses include medical-surgical nursing, geriatric nursing, maternal child health nursing, pediatric nursing, psychiatric nursing, pharmacology, and nursing management and leadership/preceptorship. The program is designed to be completed within four semesters after admission for non-licensed candidates and within three semesters for candidates who have a valid California LVN license.

Applicants must meet health as well as other requirements mandated by the program and affiliating hospitals/clinic prior to entry. Candidates are admitted to the program in the Fall and Spring semesters. Candidates must enter the program with a minimum overall 2.5 grade point average and a 2.5 grade point average in the science prerequisites. A candidate may file an application only after all prerequisites have been completed. At that time the student will be eligible to take the nursing entrance examination called TEAS (Test of Essential Academic Skills). If the student achieves a passing score on the TEAS, he or she will be placed on the waiting list. If a student...
does not achieve a passing score on the TEAS, he or she will be provided with remediation opportunities and permitted to retake the exam. Students may retake the entrance exam once. Program flyers with prerequisites and admission information may be obtained from the Counseling Office or the Department of Allied Health.

Nursing is a field that is in high demand and is one that is personally rewarding and constantly stimulating. Well paying jobs for nurses are available in almost every city in America. The American Hospital Association announced that hospitals across the country need 118,000 RNs. They predict that by 2014 there will be a need for 1.2 million new and replacement nurses. Salaries have been going up too. In 2002, 34% of RNs were earning from $40,000-$55,000; and 22% were earning $55,000 to $75,000 per year. More importantly, nurses have the opportunity to improve and even save lives; teach people how to achieve better health; and advocate for patients/clients and their families. Please visit the Department of Allied Health to learn more about this exciting field.

The Registered Nursing Program is approved by the California Board of Registered Nursing. Upon completion of the program, graduates are eligible to apply for the State Board of Registered Nursing licensing examination (NCLEX). Student graduates will be able to:

1. Use nursing process to assess, diagnose, plan, implement, and evaluate care for clients of all ages who are experiencing acute or chronic health problems.
2. Collaborate with other health care personnel to provide coordinated care for clients of all ages who are experiencing acute or chronic health problems.
3. Function within the scope of the California Nurse Practice Act.
4. Demonstrate commitment to the profession of nursing.

PROGRAM LEARNING OUTCOMES - PLOs

- Utilize nursing process and Maslow’s Hierarchy of Needs to provide nursing care to clients along the health-illness curriculum across the life span.
- Demonstrate ability to apply theoretical knowledge and clinical skills to practice as an entry level registered nurse.

NURSING, REGISTERED

- Associate in Science Degree

PREREQUISITE COURSES

A G.P.A. of 2.5 or better must be earned in all prerequisite courses. A G.P.A. of 2.5 or better must be earned in Biology and Microbiology. High school diploma, G.E.D., U.S. university degree or A.S./A.A. degree is required. Foreign education may be considered after transcript evaluation.

Requirements for the Associate in Science degree in Registered Nursing may be met by completing the required courses below and 18 units of general education courses to meet the Plan B graduation requirement.

Nursing courses must be taken in sequence and completed with a grade of “C” or better.
OPERATION AND MAINTENANCE ENGINEERING

Division: Construction, Design, and Manufacturing.
Department Chair: Mr. William (Bill) Elarton, Room B-122, (213) 763-3701, ElartoWD@lattc.edu

MISSION STATEMENT

Provide our students with high quality education, including sustainable techniques and other green technologies that meet or exceed the expectations of the stationary engineers and related industries, thus providing a steady stream of highly qualified workers.

PROGRAM OVERVIEW

Most craft workers specialize in one kind of work, such as plumbing or carpentry. General maintenance and repair workers, however, have skills in many different crafts. They repair and maintain machines, mechanical equipment, and buildings and work on plumbing, electrical, and air-conditioning and heating systems. They build partitions, make plaster or drywall repairs, and fix or paint roofs, windows, doors, floors, woodwork, and other parts of building structures. They also maintain and repair specialized equipment and machinery found in cafeterias, laundries, hospitals, stores, offices, and factories.

A general maintenance worker’s typical duties include troubleshooting and fixing faulty electrical switches, repairing air-conditioning motors, and unclogging drains. In addition, newer buildings sometimes have computer-controlled systems that allow maintenance workers to make adjustments in building settings and monitor for problems from a central location; for example, they can remotely control light sensors that turn off lights automatically after a set amount of time or identify a broken ventilation fan that needs to be replaced.

General maintenance and repair workers inspect and diagnose problems and determine the best way to correct them, frequently checking blueprints, repair manuals, and parts catalogs. They obtain supplies and repair parts from distributors or storerooms. Using common hand and power tools such as screwdrivers, saws, drills, wrenches, and hammers, as well as specialized equipment and electronic testing devices, these workers replace or fix worn or broken parts, where necessary, or make adjustments to correct malfunctioning equipment and machines.

General maintenance and repair workers also perform routine preventive maintenance tasks to ensure that machines continue to run smoothly, building systems operate efficiently, and the physical condition of buildings does not deteriorate. Following a checklist, they may inspect drives, motors, and belts, check fluid levels, replace filters, and perform other maintenance actions. Maintenance and repair workers keep records of their work.

The “Certified Steam Boiler License” is a specialized certification required for many maintenance workers. Los Angeles Trade Technical College offers a Certificate of Achievement-Steam Plant to address this need. The core of the program is designed to prepare students to take the Boiler/Steam Plant certification exam, while the remainder is structured to create students who possess an array of skills which would be transferable to a variety of job settings, creating a highly capable general maintenance worker.

General maintenance and repair workers held 1.3 million jobs in 2006. They were employed in almost every industry. Around 1 in 5 worked in manufacturing industries, almost evenly distributed through all sectors, while about 1 in 6 worked for different government bodies. Others worked for wholesale and retail firms and for real estate firms that operate office and apartment buildings.

Employment of general maintenance and repair workers is expected to grow about as fast as average for all occupations through 2014. Employment is related to the number of buildings—for example, office and apartment buildings, stores, schools, hospitals, hotels, and factories—and the amount of equipment needing maintenance and repair.

Job opportunities should be favorable, especially for those with experience in maintenance or related fields. General maintenance and repair is a large occupation with significant turnover. Additionally, many job openings are expected to result from the retirement of many experienced maintenance workers over the next decade.

PROGRAM LEARNING OUTCOMES - PLOs

- Use and interpret technical manuals to properly identify all major components of a high & low pressure boiler system and state and describe their function.
- Demonstrate sustainable industry principles and practices.
- Apply the proper procedures for calculation and measurement necessary in the operations and maintenance field.
- Safely use appropriate materials, test equipment and tools in order to connect and or troubleshoot a high and low pressure boiler system in addition use charging, evacuation, and recovery equipment properly and safely on a HVACR system.

OPERATION AND MAINTENANCE ENGINEERING

Certificate of Achievement - Steam Plant

A Certificate of Achievement in Operation and Maintenance Engineering-Steam Plant may be earned by successfully completing a minimum of 36 units, 12 of which must be the required courses listed below, and 24 units of core electives with a “C” or better grade in each course.

Upon successful completion of this program the student will have the necessary skills for entry and mid level jobs in the general maintenance industry. This program prepares the student for basic electrical, heating and refrigeration, plumbing, and carpentry work, and to pass the “Certified Boiler/ Steam Plant” License exam.

mission statement

In order to provide a career path to the plumbing industry, we will impart the necessary knowledge and skill sets to our students. This training will include the maintenance, repair and construction of plumbing systems and equipment.

program overview

Most people are familiar with plumbers, those individuals who come to their home to unclog a drain or install an appliance. Plumbers install, maintain, and repair many different types of pipe systems. Some systems move water to a municipal water treatment plant and then to residential, commercial, and public buildings. Other systems dispose of waste, provide gas to stoves and furnaces, or provide for heating and cooling needs. Pipe systems in power plants carry the steam that powers huge turbines, while pipes also are used in manufacturing plants to move material through the production process. Specialized piping systems are critical in both pharmaceutical and computer-chip manufacturing. The existence of such various pipe systems generate the need for trained plumbers.

Plumbers must be able to follow building plans or blueprints and instructions, lay out the job, and work efficiently with the materials and tools of their trade. Computers and specialized software are used to create blueprints and plan layouts. To meet the training needs of persons interested in becoming a service and repair plumber or a commercial construction plumber, Los Angeles Trade Technical College offers a Plumbing Associate in Science degree and a Plumbing Construction Technologies Associate in Arts degree, as well as their equivalent Certificates of Completion.

The Associate in Science degree is designed for individuals seeking entry level positions in the field. Students enrolling in this program should be able to commit to full-time student status, which is approximately 24 hours per week. This time commitment is necessary to allow for hands-on training with the laboratory applications used during the course of instruction.

The Associate in Arts degree is an evenings-only course of study designed for individuals currently in the field who want to improve or expand their skills. Due to limitations on available evening hours, the utilization of hands-on laboratory application is assumed to be provided at the student's place of employment. Depending on availability, the Associate in Arts degree may require slightly longer time to complete due to limited hours available. Check with the Department Chair for more details prior to enrolling

Plumbers work in commercial and residential settings where water and septic systems need to be installed and maintained. They also work outdoors, sometime in remote areas, as they build the pipelines that connect sources of oil, gas, and chemicals with the users of these materials. Because plumbers frequently must lift heavy pipes, stand for long periods, and sometimes work in uncomfortable or cramped positions, they need physical strength as well as stamina.

Job opportunities are expected to be excellent, as demand for skilled plumbers is expected to outpace the supply of workers trained in this craft. Many employers report difficulty finding potential workers with the right qualifications. In addition, many people currently working in these trades are expected to retire over the next 10 years, which will create additional job openings.

Employment of plumbers is expected to grow about as fast as average for all occupations through the year 2014. Demand for plumbers will stem from new construction and building renovation. Bath remodeling, in particular, is expected to continue to grow and create more jobs for plumbers. In addition, repair and maintenance of existing residential systems will keep plumbers employed. Plumbers are generally less sensitive to changes in economic conditions than jobs in other construction trades: even when construction activity declines, maintenance, rehabilitation, and replacement of existing piping systems, as well as the increasing installation of fire sprinkler systems, provide many jobs for plumbers.

Plumbers are among the highest paid construction occupations. In May 2006, median hourly earnings were $22.68. The middle 50 percent earned between $16.05 and $24.69. The lowest 10 percent earned less than $12.19, and the highest 10 percent earned more than $31.07.

- Use hand and power tools to perform plumbing operations
- Demonstrate sustainable plumbing practices
- Perform trade calculations related to plumbing practices
- Create and use construction documentation

PLUMBING

■ Associate in Science Degree

Requirements for the Plumbing Associate in Science degree may be satisfied by completing a minimum of 48 units in the required courses listed below and an additional 18 units in general education courses (Plan B).

Upon successful completion of this program the student will have the necessary knowledge and skills for a career in residential, commercial, and industrial service and repair or construction plumbing. Reading of blueprints, layout, estimating, installation of piping systems and fixtures, repair of supply and waste water systems are just some of the skills that will be mastered during this program.

PLUMBING: CONSTRUCTION TECHNOLOGIES

■ Certificate of Achievement

A Certificate of Achievement is awarded for successful completion of 45 units minimum in the required courses listed for the Associate in Arts degree above with a “C” or better grade in each course.

Upon successful completion of this program the student will have the necessary knowledge and skills for a career in Residential, Commercial, and Industrial Service and Repair or Construction Plumbing.

PROCESS PLANT TECHNOLOGY

Division: Sciences.
Department Chair: Mr. Ricky Wong, Room K-405, (213) 763-7295, WongRK@lattc.edu

COURSE OVERVIEW

The chemical process industries (CPI) are a major part of U.S. business and represent a diverse industries ranging from pharmaceuticals to large-scale processing of gasoline and waste water treatment and food and beverage. Working in the CPI represents a particular challenge with regard to handling materials, which range from small quantities of specialized products to large quantities of potentially hazardous materials.

Process Technicians (PT’s) team with engineers and other technicians with specialties such as instrumentation, electronics, or maintenance to adjust and optimize conditions for the production of large quantities of products. The quality of the production is dependent on the skill and knowledge of the Process Technician in carrying out the operations of the plant. PT’s must be concerned with issues such as personal and co-worker safety, impact of materials on the environment, and process skills that deal with all aspects of controlling processes and maintaining equipment.

The chemical process industry is the fourth largest manufacturing industry in the United States. It encompasses plants manufacturing an almost endless range of products, such as chemicals, (both organic and inorganic), food and beverages, cleaning preparations, plastics, agricultural chemicals, paints, pharmaceuticals, cosmetics, power generation, pulp and paper, petroleum refining and wastewater treatment, to name just a few.

The LATTC Process Technology program is a member of the California Chemical and Process Technology Alliance (CCPTA) and the Pacific Technology Career Alliance, an education/industry consortia of major chemical industries both public and privates. The CCPTA was founded for the purpose of ensuring that Process Technology instructors and students are on the receiving end of current industry analytical methods, techniques, equipment and standards. The Alliance is also committed to providing a well skilled employee pool for chemical industry employment opportunities.

PROGRAM LEARNING OUTCOMES - PLOs

- Evaluate and apply basic knowledge of operations and industrial processes
- Demonstrate good verbal and written communication
- Practice basic knowledge of cGMP
- Evaluate and apply knowledge of regulatory policies for process practices
- Demonstrate knowledge of Environmental Health and Safety.
PROCESS TECHNOLOGY

■ Associate in Science Degree

The Process Technology program prepares students to become process operators in chemical industries such as:
- Petroleum refining
- Oil and gas exploration and production
- Power generation
- Alternative energy
- Pharmaceuticals
- Food and beverage
- Cosmetics
- Water and wastewater
- Chemical manufacturing
- Biotechnology
- and more...

Processing plants for most of the above mentioned industries can be found locally in Los Angeles County/City and adjoining counties and nationwide. The Associate of Science degree in Process Technology will lead to a highly skilled, high benefits and high-wage, life-long profession.

At the end of the Associate degree in Process Technology a student will be able to perform such task as:
- Operating a process plant
- Perform all task in a safe manner, protecting plant personnel and our environment
- Operate the plant economically
- Recognize abnormal situations
- Identify plant equipment
- Explain the important functions of the plant
- Explain interrelationships between components of a system
- Analyze the overall processing system
- Diagram control systems
- Analyze information

*The student will be trained in the proper use of safety, processing, and equipment.

High school students preparing for the PTEC program are encouraged to take courses in chemistry/chemical technology, physics, English, and at least one year of Algebra.

CURRICULUM STANDARDS (CRITERIA C)

PROPOSED SEQUENCE OF COURSE TITLES AND UNITS

REQUIRED COURSES FOR THE ASSOCIATE DEGREE IN PROCESS TECHNOLOGY

FIRST SEMESTER (FALL) UNITS
PRPLTEK 100 Introduction to Process Plant Technology 3
PRPLTEK 103 Process Plant Equipment 3
PHYSICS 11 Introduction to Physics 4
CHEM T 111 Applied Chemistry 1 5
UNITS 15

SECOND SEMESTER (SPRING) UNITS
PRPLTEK 102 Process Measure/Control Fundamentals 3
PRPLTEK 200 Petroleum Refining Fundamentals (Systems) 3
PRPLTEK 204 Process Instrumentation - Computer Applications 2
UNITS 8

THIRD SEMESTER (FALL) UNITS

PRPLTEK 210 Applied Instrumentation Analysis I - or -
CHEM T 132 Quantitative/Instrumental Analysis 4
PRPLTEK 104 Introduction to Process Plant Safety 3
UNITS 10

FOURTH SEMESTER (SPRING) UNITS
PRPLTEK 202 Introduction to Process Plant Troubleshooting 3
PHYSICS 29A/B Physics for Technician 4
MATH 125** Intermediate College Algebra 5
UNITS 12
TOTAL UNITS 45

**18 units of general education courses are required for the associate degree in Process Technology including **Math 125, Intermediate College Algebra.

**See Graduation Plan B, for other required general electives for graduation.

RECOMMENDED ELECTIVES UNITS
BUS 33 Tech Report Writing 3
CHEM T 100 Intro to Chem Tech 3
CO INFO 701 Intro to Computers 3
ENGLISH 28 Intermediate Reading and Comp 3
PER DEV 2 Inter Relations 3
PHILOS 6 Logical Thinking 3
LABR ST 4 Emerging Issues 3
SPEECH 101 Oral Communication I 3
ENG GEN 101 Introduction to Science, Engineering and Technology 2

PROCESS TECHNOLOGY

■ Certificate of Achievement

The Certificate of Achievement in Process Technology may be earned by completing the required courses listed above in the A.S. curriculum.
REAL ESTATE

Division: Business/CIS/CAOT/Community Planning/ Mortgage Finance
Department Chair: Ms. Paulette Bailey, Room K-225, (213) 763-7269, BaileyP@lattc.edu

PROGRAM OVERVIEW

The Real Estate program prepares students seeking careers as real estate professionals and equips the general public who are prospective property owners, present property owners, or real estate investors with important real estate knowledge. The program explores many aspects of the real estate profession allowing students to acquire entry-level marketable skills while gaining much of the necessary course work to obtain a California state license as a real estate sales agent and/or broker. The program also offers advanced courses for real estate agents or for individuals in real estate related fields and industries.

Note: Students should verify the broker’s and salesperson’s licensing requirements with the California Department of Real Estate.

Employment of real estate brokers and sales agents is expected to grow about as fast as average for all occupations through the year 2018, because of the increasing housing needs of a growing population, as well as the perception that real estate is a good investment. In 2008, real estate brokers and sales agents held about 517,800 jobs; real estate sales agents held approximately 76 percent of these jobs. (Source: U.S. Bureau of Labor Statistics).

Upon successful completion of the program, students are prepared for a variety of entry-level and advanced career opportunities in the real estate profession. Completion of the degree program satisfies most of the formal education requirements to obtain a California Real Estate Broker’s License. In October of 2007 the 18-month conditional license will be eliminated and potential licensees must take RE1 Principles, RE3 Practice and one other 3 unit course to qualify to sit for the Real Estate Salesperson’s examination. Many other industries are directly or indirectly related to real estate and often require a basic knowledge of the subject area for employment consideration. Typical positions: Real Estate agent, broker, appraiser, property manager, escrow officer, real estate office manager, land developer, urban planner, construction, and investor/owner of income producing properties.

PROGRAM LEARNING OUTCOMES - PLOs

• Demonstrate knowledge of Real Estate Principles and Practices in fulfillment of Department of Real Estate Licensure requirement.

REAL ESTATE

Associate in Arts Degree

Requirements for the Associate in Arts degree in Real Estate may be met by completing the required 45-units of courses listed below, and 18 units of general education courses to meet the Plan B graduation requirement.

UNITS 15

TOTAL UNITS 30

REFRIGERATION AND AIR CONDITIONING MECHANICS

Division: Construction, Design, and Manufacturing.
Department Chair: Mr. William (Bill) Elarton, Room B-122, (213) 763-3701, ElartoWD@lattc.edu

MISSION STATEMENT

In order to provide a career path to the refrigeration and air conditioning industry, we will impart the necessary knowledge and skill sets to our students. This training will include the maintenance, repair and construction of heating, air conditioning and refrigeration equipment.

PROGRAM OVERVIEW

The need for heating and air-conditioning exists everywhere, as residents in Tucson, without air-conditioning, would suffer from heat exhaustion in the summer while those in Buffalo in the winter would freeze without heating. Cooling and heating devices help regulate the temperature, humidity, and air quality in residential homes, commercial locations, and industrial facilities. Critical items like food and medicine require refrigeration to keep them from spoiling. Technicians repair, maintain, and install heating, air-conditioning, and refrigeration systems. Our program trains these technicians. Los Angeles Trade Technical College offers an Associate in Science (A.S.) degree and Associates in Arts (A.A.) degree in Refrigeration and Air Conditioning Mechanics, as well as their equivalent Certificates of Completion.

The Associate in Science degree is designed for individuals seeking entry level positions in the field. Students enrolling in this program should be able to commit to full-time student status, which is approximately 24 hours per week. This time commitment is necessary to allow for hands-on training with the laboratory applications used during the course of instruction.

The Associate in Arts degree is an evenings-only course of study designed for individuals currently in the field who want to improve their skills or learn new ones. Due to limitations on available evening hours, the utilization of hands-on application is assumed to be provided at the student’s place of employment.

A Fundamentals of Refrigeration and Air Conditioning Skills Certificate is also offered. This is a valuable certificate to show proof of continuing education and skills improvement to aid in job advancement. The classes that are part of the skills certificate can also be utilized for the degrees and certificates.

More than 249,000 positions were held by heating, air-conditioning, and refrigeration technicians in 2002. Close to 50 percent of the technicians were employed by cooling and heating contractors. The rest worked for various industries, including fuel oil dealers, refrigeration and air-conditioning service and repair shops, schools, and stores that sell heating and air-conditioning systems.

Local and federal governments, hospitals, offices, and other organizations that utilize huge climate controlling systems also employ refrigeration technician professionals. Approximately 15 percent of technicians are self-employed. Due to the increasing sophistication of heating, air-conditioning, and refrigeration systems, employers prefer to hire those with technical school or apprenticeship training.

PROGRAM LEARNING OUTCOMES - PLOs

- Use and interpret technical manuals to properly identify all major components of a refrigeration system and state and describe their function.
- Demonstrate sustainable industry principles and practices.
- Apply the proper procedures for calculation and measurement necessary in the air conditioning and refrigeration field.
- Safely use appropriate materials, test equipment and tools in order to connect or troubleshoot a refrigeration and air conditioning system in addition use charging, evacuation, and recovery equipment properly and safely.
# Refrigeration and Air Conditioning Mechanics

## Associate in Science Degree

The Associate in Science degree may be earned by completing the 48 units of required courses listed below, either the "Day Program" or "Evening Program" and 18 units of general education courses to meet the Plan "B" graduation requirements.

Upon successful completion of this program, the student will have the necessary knowledge and skills for a career in residential, commercial, and Industrial service and repair of air conditioning, heating and refrigeration systems. EPA refrigerant certification will be received. Electrical controls, piping installation, compressor installation and repair are just some of the skills that would be mastered during this program.

Courses from the day or evening programs should not be mixed in an attempt to meet the degree requirements.

REFRIGERATION AND AIR CONDITIONING MECHANICS

- Certificate of Achievement

A Certificate of Achievement may be earned by completing either 48 units of required courses listed above in the Associate of Science Degree “Day Program” or the “Evening Program” degree curriculum with a “C” or better grade in each course. Day and evening classes may not be mixed to complete a degree.

RESTAURANT MANAGEMENT

Division: Culinary Arts/Professional Baking.
Department Chair: Mr. Steve Kasmar, Room H-117, (213) 763-7732, KasmarSL@lattc.edu

PROGRAM OVERVIEW

The Greater Los Angeles area needs qualified individuals who can lead the numerous hotel, restaurant, and catering kitchens in our region. The Restaurant Management program at Trade-Tech offers a foundation in management theory, cooking fundamentals, sanitation, safety and restaurant supervision. Students practice and demonstrate culinary and management skills in a working foodservice facility located on the college campus.

The Restaurant Management program provides a foundation in kitchen fundamentals including preparation of hot and cold sauces, vegetable and meat cookery, identifying accounting procedures and reports, operating kitchen equipment, expression and employing management theory and supervision techniques.

Upon successful completion students will be prepared to find positions as restaurant managers, manager’s assistant, kitchen manager, dining room manager, or kitchen supervisors.

RETAIL MERCHANDISING

Division: Business/CIS/CAOT/Community Planning/ Mortgage Finance
Department Chair: Ms. Paulette Bailey, Room K-225, (213) 763-7269, BaileyP@lattc.edu

PROGRAM OVERVIEW

Retail merchandising is one of the fastest growing employment sectors in the Los Angeles region, and Trade-Tech has created a unique interdisciplinary Associate in Arts degree to prepare students for career opportunities in this field. Purchasing managers, buyers, and purchasing agents held about 527,400 jobs in 2008. About 42 percent worked in the wholesale trade and manufacturing industries and another 10 percent worked in retail trade. The remainder worked mostly in service establishments, such as management of companies and enterprises or professional, scientific, and technical services. A small number were self-employed. (Source: U.S. Bureau of Labor Statistics).

RESTAURANT MANAGEMENT

- Associate in Arts Degree

Requirements for the Associate in Arts degree include successful completion of 42 units of the required courses listed below with a “C” grade or better and successful completion of 18 units of general education requirements as outline in plan “B” of the college catalog.

This program will prepare students for employment in the retail sales industry by providing studies in a multitude of essential disciplines, including marketing, management, supervision and business, as well as fashion merchandising. Further, it will allow each student to select the ‘track’ that best suits his/her educational goals; Sales, Store Operations, or Personnel.

Upon completion of this program, students will be prepared to gain employment as a sales associate/retail clerk in retail operations with the chance to advance into management. In addition, this program provides a head start for those who aspire to a Bachelors Degree in Business Administration at one of the numerous CSU campuses.

RETAIL MERCHANDISING

- Associates in Arts Degree

Requirements for the Associate in Arts degree in Retail Merchandising may be met by completing the required courses below and 18 units of general education courses from graduation Plan B.

SIGN GRAPHICS

Division: Art Trades/Fashion.
Department Chair: Ms. Carole Anderson, Room D-222, (213) 763-3640, AndersCL@lattc.edu

PROGRAM OVERVIEW

Sign makers design and produce signs to advertise and identify business, industry, public services, entertainment, and other areas too numerous to count. Students learn how to design and execute a wide variety of signs including temporary signs like posters and paper banners plus permanent signs on wood, metal, canvas, vehicles, walls and glass. Students learn the fundamentals of lettering, design, composition, color while practicing hand and eye coordination. Students also learn to both draw and brush a diverse set of alphabets and a variety of both interior and exterior signs. In addition, students study how to design and execute signs on sign specific software including patterns, vinyl lettering, vinyl application plus how to use plotters, scanners, and clip art images.
Many sign makers are self-employed, work freelance or are employed in a commercial sign shop. Employment opportunities are competitive and only those with good hand skills and knowledge have the best chance for employment. Specialty skill instruction like dimensional letters, sandblasted signs, gold leaf and high-end layout and design are offered to advanced students. These students participate in a business module for pricing and eventual self-employment.

Upon completion of the program students will be proficient in basic hand lettering, sign design and layout, the production of temporary signs, exterior permanent signs, window signs and specialty signs, computer operation including printing, cutting and applying vinyl lettering and general production skills needed to complete a successful sign. Students will also understand basic pricing and sales techniques, record keeping or small business operation, and obtaining licenses.

SILKSCREEN
Silkscreening is a printing method for multiple or large number jobs. The student will learn how to make a screen, cut a variety of stencils, prepare the screen and print an image. Proper ink usage and clean-up will be taught. Students will print on a variety of substrates including multicolor prints on T-shirts.

MURAL CLASS
Techniques for producing large format murals are taught using a variety of methods including the grid method. Students will learn layout and design, pattern making and transferring artwork to the wall. Surface preparation, paints, tools and brushes will also be covered.

PROGRAM LEARNING OUTCOMES - PLOs

Upon completion of the Sign Graphics program, students will be able to:
- Draw, hand letter basic alphabets
- Design, layout signs
- Produce computer generated design and letters
- Construct sign blanks and prep for lettering
- Design, execute digital prints
- Construct a basic silk screen
- Silk-screen prints on various substrates
- Design, layout a mural
- Prep wall, layout a mural
- Paint finished mural

SIGN GRAPHICS

- **Associate in Arts Degree**

  The Associate in Arts degree in Sign Graphics is awarded for completing 44-48 units of course work within the major with a “C” or better grade, along with 18 units of general education courses meeting the “Grad Plan B” requirements.

SMALL BUSINESS ENTREPRENEURSHIP

Division: Business/CIS/CAOT/Community Planning/Mortgage Finance
Department Chair: Ms. Paulette Bailey, Room K-225, (213) 763-7269, BaileyP@lattc.edu

PROGRAM OVERVIEW

The Small Business Entrepreneurship Certificate of Achievement is designed to teach the student to understand the problems of organizing and operating a small business and how to analyze one’s own personal qualifications for small business management. Particular emphasis is placed on record keeping for the small business, hiring appropriate personnel, and selling techniques. This program is recommended for individuals who are planning to work in a small business or who are thinking of starting and operating their own business.

Self-employment continues to be an important source of jobs in the United States. In 2009, 15.3 million individuals were self-employed, including both those who had incorporated their businesses and those who had not. The self-employment rate, which is the proportion of total employment made up of the self-employed, was 10.9 percent of all self-employed persons, 9.8 million, or nearly two-thirds, were unincorporated; the remaining 5.5 million were incorporated. Small firms represent 99.7% of all employer firms and employ half of all private sector employees. (Source: Advocacy Small Business Statistics and Research).

Upon successful completion of the program the students will be proficient in the process and procedures needed to transform an initial entrepreneurial idea into a viable business operation. They will be adept at in-depth analysis of ways new business ventures are created, designed, developed, and operated. They will understand and perform the basic planning and management skills required to form and operate a small/entrepreneurial business.

SMALL BUSINESS ENTREPRENEURSHIP

Certificate of Achievement

A Certificate of Achievement in Small Business Entrepreneurship may be earned by completing the 32 units of required courses listed below with a "C" or better grade.

STREET MAINTENANCE TECHNOLOGY

Division: Construction, Design, and Manufacturing.
Department Chair: Mr. William (Bill) Elarton, Room B-122, (213) 763-3701, ElartoWD@lattc.edu

MISSION STATEMENT

Provide incumbent workers of the LA Cities Street Services Department with high quality education to equip themselves with the necessary knowledge and skill sets to sustain, or advance in their career path.

PROGRAM OVERVIEW

The Street Maintenance Technology program is designed primarily for those involved in public works maintenance operations. Asphaltic and concrete pavement, construction, plan reading, calculation of materials, state and municipal codes, report writing, and heavy equipment operation and maintenance are some of the skills required in this field. To meet the training needs of persons interested in becoming a street maintenance worker, Los Angeles Trade Technical College offers a Street Maintenance Associate degree and it’s equivalent Certificates of Completion.

The street maintenance field has evolved into a broader category of workers. A better name for the industry would be Street Services. Workers in this arena are primarily employed by governmental agency that perform maintenance operations on public highways and streets. Professionals in this field are involved at the ground level through upper level management. Job are generally 40 hours per week with benefits and overtime. Average salary ranges from $19 to $36 per hour.

PROGRAM LEARNING OUTCOMES - PLOs

- Use hand and power tools to perform street services work.
- Demonstrate sustainable industry principles and practices.
- Perform calculations & measurements required for street services work.
- Work independently & interdependently to safely accomplish shared professional outcomes.
STREET MAINTENANCE TECHNOLOGY

■ Associate in Arts Degree

Requirements for the Street Maintenance Technology Associate in Arts degree may be satisfied by completing 30 units in the required courses listed below and an additional 30 units in general education courses (Plan A).

Upon successful completion of this program the student will have the necessary knowledge and skills for a career as a street services worker. Knowledge and skills will be mastered in the area of installation and maintenance of various types of street construction and material including asphalt and concrete. Students will also gain the supervisory skills needed to promote into management.

STREET MAINTENANCE TECHNOLOGY

■ Certificate of Achievement

Requirements for the Street Maintenance Technology Certificate of Achievement may be satisfied by completing a minimum of 30 units in the Associate in Arts degree program.

TAILORING

Division: Art Trades/Fashion.
Department Chair: Ms. Carole Anderson, Room D-222, (213) 763-3640, AndersCL@lattc.edu

PROGRAM OVERVIEW

The LATTC Tailoring Certificate program is uniquely designed for the working adult. Courses are offered during evening and weekend hours and cover all aspects of the pattern making and construction techniques necessary to complete tailored garments. Courses include construction techniques for bespoke men’s and women’s garments including trousers, jackets and coats. Tailors are distinctly different from dressmakers in that they are specialized in constructed garments such as jackets, coats and trousers or slacks.

Requirements for the Certificate of Achievement may be met by successfully completing a minimum of 20 units with a grade of “C” or better, 12 of which must be in the major and 8 units of electives from the Fashion Design evening/Saturday courses.

The skills for custom tailoring are always in demand. Stylists work with tailors to outfit sports figures, celebrities, and specialty customers. Costume designers work with tailors to create multiple versions of garments needed in film production, and customers seeking individual design and fit seek out the assistance of professional tailors.

PROGRAM LEARNING OUTCOMES - PLOs

Upon completion of the Tailoring program, students will be able to:

- Perform basic tailoring techniques
- Construct a tailored jacket
- Construct tailored men’s pants
- Execute hand-made buttonholes
- Construct a man’s style shirt
- Draft basic men’s patterns
- Draft men’s jackets

TAILORING

■ Certificate of Achievement – Adjunct

The Tailoring Certificate of Achievement prepares students to construct trousers, jackets, vests and coats for personal fit and for custom tailoring. Upon completion of the program students will be able to draft patterns as well as construct tailored garments.

VISUAL COMMUNICATIONS

Division: Art Trades/Fashion.
Department Chair: Ms. Carole Anderson, Room D-222, (213) 763-3640, AndersCL@lattc.edu

PROGRAM OVERVIEW

The Visual Communications program at LATTC is the starting point for exciting careers in animation, art direction, digital imaging, graphic design, illustration, multi-media, web design and other related fields. The fast paced two-year program begins with fundamentals: color, design, drawing, prepress and typography. Advanced levels create finished portfolios on a Macintosh computer, utilizing industry standard digital software. Student portfolios demonstrate creativity and discipline, displaying dynamic art sensibilities and creating visual solutions for problems of marketing and publishing. The Visual Communications program focuses on four core areas:

Graphic Design: Beginning levels will study the areas of layout and design, typography, and advertising concepts. Advanced levels will develop logos and corporate identity programs, design brochures with extended text, and create original magazine advertising, which is directed to specific audience demographics. Problem solving, brainstorming and computer training will receive equal emphasis. Graduating portfolios incorporate a wide variety of projects showcasing the student’s ability to conceptualize, design and use typography as a communication tool.

Drawing: Beginning levels will study free hand observational drawing, perspective and the principles of light and shade. Black and white mediums will be explored in pencil, markers and ink. Advanced levels create comprehensive layouts in color marker and pencil as preliminary development. Finished designs and illustrations for advertising and on-line usage are then created traditionally or digitally and serve as portfolio samples.

Art Production: Thorough study of the preparation of art, graphics, photography, and typography for reproduction in print. Beginning levels concentrate on understanding the mechanics of color separations and print specifications. This knowledge is then applied as students create digital files that utilize specific print requirements. Advanced levels prepare complex graphic computer files for output at commercial printers.

Computer Graphics: The creation of art and design on the computer requires mechanical know-how and considerable familiarization with the workings of several graphic software applications. The Viscom program offers instruction in Adobe Creative Suites, Dreamweaver, Flash, Fireworks, HTML and QuarkXPress. Graduating portfolios demonstrate familiarity with each of these software applications and an ability to manipulate each for specific uses and creative affects.

Today's commercial marketplace for artists has never been more available. Flash motion graphics and web design have initiated new and creative directions. Traditional artists and conventional designers continue as before but have incorporated digital software within their accomplished collection of talents. This blending of tradition and technology is the primary emphasis within the Visual Communications program.

Upon successful completion of the program, students can pursue many different creative careers. While it is advisable for students to continue higher education, many graduates have entered the workplace upon completion of the Viscom program alone realizing creative and financial success. Graduating students will have acquired visual sensitivities with respect to type, images and graphics; they will be trained in the visual software used by industry, and will understand marketing as it applies to commercial art and understand how to tailor their work appropriately to specific audiences. Graduates must present their portfolio to a panel of industry professionals as a condition of course completion. With this review, students are measured in the scope and quality of their work, problem solving ability, presentation skills and ability to interact as they explain their ideas and work.

PROGRAM LEARNING OUTCOMES - PLOs

Upon completion of the Visual Communications program, students will be able to:

- Drawing; Composition & Design
- Use of computer applications & Formats for Graphic Design
- Use of advertising principles to guide graphic and visual problem solving
- Formalize business practice skills in preparation for employment
- Develop competencies for on-line design and publication
- Understand history, theories, and terminology of reproduction as applied to design
#### VISUAL COMMUNICATIONS

**Associate in Arts Degree**

Requirements for the Associate in Arts degree in Visual Communications may be met by completing the required courses within the program that total 48 units, and by completing an additional 18 units of academic courses to meet the graduation Plan B requirement.

PROGRAM OVERVIEW

The US Department of Labor projects a substantial increase in jobs in the field of water systems technology, brought about by the demand for services from new housing developments as well as regulations that require more monitoring and treatment of water sources. Projected retirements of existing operators will fuel this demand as well. The net result of these shifts will be increased openings for personnel in all areas: plant operations, distribution/collection field maintenance, administration, customer service, line supervision, meter readers, engineers, and plant maintenance (source: Opflow: vol.31, No. 5, May 2005).

The Water Systems Technology program at Trade-Tech offers students a choice of two concentrations within water systems industry. The Supply Water option offers courses focused on the operation and design of water systems, wells, pumps and meters; water treatment for potable water; and technical phases of automatic controls, including power and code considerations. The Wastewater option offers courses focusing on preliminary, primary, secondary, and tertiary treatment systems as well as disinfection methods, solids treatment, and solids and effluent disposal practices.

WATER SYSTEMS TECHNOLOGY

■ Associate in Science Degree - Supply Water Technology

The Associate in Science degree in Supply Water Technology may be earned by completing the required courses listed below, along with 30 units of general education courses listed in Graduation Plan A, and 6 additional units of elective courses to meet the 60 unit requirement.

Upon successful completion students will be prepared for certification by the AWWA as well as the State Department of Health. Students will also have the background to advance in the Supply Water Industry.

WATER SYSTEMS TECHNOLOGY

■ Associate in Science Degree - Wastewater Technology

The Associate in Science degree in Wastewater Technology may be earned by completing the required courses listed below, 30 units of general education courses listed in Graduation Plan A, and 9 additional units of elective courses to meet the 60 unit requirement.

In the State of California, there are five operator grade levels of profession in operating and maintaining publicly owned wastewater treatment facilities. Each grade level requires passing an examination administered by the State, after meeting qualifying experience and educational requirements. An Associates degree and 6 years of performance of an operator duty while holding a certificate, qualifies a person to be promoted to grade five level. Upon completion of the degree, students will have the potential for securing high-paying jobs.

### WELDING GAS AND ELECTRIC

**Division:** Construction, Design, and Manufacturing.  
**Department Chair:** Mr. William (Bill) Elarton, Room B-122, (213) 763-3701, ElartoWD@lattc.edu

#### MISSION STATEMENT

Our Mission is to offer innovative instruction and individualized guidance for the beginning welder as well as the professional welder. The welding program enhances the learning environment by generating a mix of classroom instruction with the latest technical welding processes in the lab. We are committed to offering a high quality educational experience in a compassionate and respectful environment. The Career opportunities in the Welding Program include options for AWS and LA City certification, two-year completion certificate, as well as an Associate Science degree in welding technology.

#### PROGRAM OVERVIEW

Some 600,000 to 700,000 welding professionals currently work in the United States. Many are engaged in work critical to the nation’s well-being, such as energy production, highway transportation, manufacturing, and military applications. The artistic community also utilizes welding in the creation of sculpture and other forms of expression. Our program trains these craftsmen.

Los Angeles Trade Technical College offers an Associate in Science degree and a Certificate of Achievement in Welding Gas and Electric. Additionally we offer a Certificate of Achievement in Welding Gas and Electric Technologies.

The Associate in Science degree or Certificate of Achievement in Welding Gas and Electric is a full-time program designed for individuals seeking entry level positions in the field. Students enrolling in this program should be able to commit to full-time student status, which is approximately 21 hours per week. This time commitment is necessary to allow for hands-on training with the lab applications used during the course of instruction.

The Certificate of Achievement, Welding Gas and Electric Technologies is an evenings-only course of study designed for individuals currently in the field who want to improve their skills or learn new ones.

Los Angeles Trade Technical Colleges welding program is also a Certified Welding Test Center. Individuals seeking certification as a welder can take the required certification exams on site.

The average age of welders in today’s workforce is 54. Many of these people will retire within the next 10 years, creating a tremendous need for skilled and experienced workers to replace them. The U.S. Bureau of Labor predicts a shortage of 250,000 welding professionals by the year 2010.

- High-tech manufacturing applications using newly developed materials are creating a greater need than ever for a highly educated workforce, and nowhere is this truer than in the field of joining and cutting.
- A significant portion of the U.S. energy and transportation infrastructure was constructed in the 1950s and 1960s. Now, 40 to 50 years later, skilled welders are in demand to maintain and update these facilities and structures.
Jobs that require significant technical skills, such as welding, are expected to increase 50 percent in the next ten years. Some 60 percent of the new jobs in the early 21st century will require skills that are currently held by only 20% of the current workforce. Welding is a prime example of such skills specialization; the Occupational Outlook Handbook refers to welding an “excellent job prospect” for 2007. Advanced technology is creating more uses for welding in the workplace, with a commensurate expansion in employment opportunities.

PROGRAM LEARNING OUTCOMES - PLOs

- Use hand and power tools to perform welding construction & maintenance work.
- Demonstrate sustainable welding construction & maintenance practices.
- Perform trade calculations related to welding construction & maintenance work.
- Work independently & interdependently to safely accomplish shared professional outcomes.

WELDING GAS AND ELECTRIC

Associate in Science Degree

The Associate in Science degree may be earned by completing 48 units of the listed required courses and a general education requirement that may be met by completing 18 units of general education to meet the Plan B requirements listed in this catalog under Graduation/Transfer requirements.

Upon successful completion of this program the student will have the necessary skills for all positions that are related to welding on plate. This program prepares the student for fabrication work, construction work, job shops and other entry-to-mid level related jobs.

WELDING GAS AND ELECTRIC

Certificate of Achievement

A Certificate of Achievement is awarded for successful completion of 48 units minimum in the Degree required courses above with a "C" or better grade in each course. Upon successful completion of this program a student will have the necessary skills for all position welding on plate. This program prepares the student for fabrication work, construction work, job shops and other entry to mid level related jobs.
WELDING GAS AND ELECTRIC: CONSTRUCTION TECHNOLOGIES

■ Certificate of Achievement

A Certificate of Achievement in Welding-Gas and Electric Construction Technologies may be earned by completing the 24 units of required courses listed below with a “C” or better grade in each course.

Upon successful completion of this program a student will have the basic knowledge and skills for all position welding on plate. This program prepares the student for fabrication work, construction work, job shops at the entry level.

**APPRENTICESHIP EDUCATION**

Division: Construction, Design, and Manufacturing.
Department Chair: Mr. William (Bill) Elarton, Room B-122, (213) 763-3701, ElartoWD@lattc.edu

Note: Available to Registered Apprentices only.

**MISSION STATEMENT**

Provide our apprentices with high quality related and supplemental instruction that meets or exceeds the expectations of our employee and employer partners, thus providing the apprentice with the knowledge and skill sets necessary to continue up the career ladder in their chosen industry while providing or employer partners a steady stream of highly qualified workers.

**EDUCATIONAL PROGRAMS AND COURSES**

- Electrical Lineman
- Engineer: Operating/Maintenance

LATTC’s Apprenticeship Education program offers classes to students who are registered to learn a trade under agreement with the State of California Division of Apprenticeship Standards, and are required to attend college classes during their registered apprenticeship program. The LATTC Apprenticeship Education program is part of a state approved industrial plan for training skilled workers. It is enabled nationally by the Federal Apprenticeship Law (known as the Fitzgerald Act of 1937) and on the state level by the Shelley-Malone Labor Standards Act of 1939. The program is authorized and supported by the California Apprenticeship Council under the supervision of the joint Apprenticeship Committee (equal employer and employee representation) for each trade under standards approved by the State of California.

Apprentices training under the cooperative direction of the college and Apprenticeship committees for their trade may petition to receive credit toward the Associate in Arts degree or the Associate in Science degree for all courses successfully completed. A Certificate of Achievement may be awarded when a student completes 18 units in this program. An example of topics studied, which are generally applicable to a majority of trades, includes applied math and science, blueprint reading and drawing, materials, equipment, processes, and health and safety.

Los Angeles Trade Technical College plays no part in the apprenticeship selection process. For further information about apprenticeship programs operating in California and the possibility of becoming an registered apprentice in any trade, contact the California State Division of Apprenticeship Standards at 8th floor, Room 8000,320 West Fourth Street, Los Angeles, California 90012. Their phone number is (213) 576-7750.

For more information, contact the LATTC apprentice information center located in room B-122. Phone: (213) 763-7151.

**ELECTRICAL LINEMAN APPRENTICES**

**PROGRAM LEARNING OUTCOMES - PLOs**

- Use hand and power tools to perform electrical line work operations.
- Demonstrate sustainable industry principles and practices.
- Perform calculations and measurements related to electrical line work.
- Work independently & interdependently to safely accomplish shared professional outcomes.

**Certificate of Achievement**

Prerequisites: Students enrolling in these classes must have been accepted into a California Indentured Apprenticeship Program. Student apprentices will be monitored and evaluated during this program by the joint apprenticeship committee for their trade and will gain the skills necessary to perform as a journeyman in their trade. A Certificate of Achievement may be awarded when a student completes 18 units in this program.

**701 ELECTRICAL LINEMAN APPRENTICESHIP I (6) RPT1**

*Instruction is given in the generation of electricity; hydro, steam, wind, the elements of electricity, static, magnetism, electric circuit, transmission lines and cables, sub-transmission lines and cables, distribution lines and cables. Students receive training in pole climbing; safe practices, installation of cross arms, insulator guys, hanging of transformer, stringing of lines, pulling cables, pole top rescue and vault rescue. Safety and first aid are emphasized.*
701A ELECTRICAL LINEMAN APPRENTICESHIP I A (3 1/3)
RPT1
Lecture: 3 hours; Lab: 1 hour
This is the first module of instruction in the generation of electricity: hydro, steam, wind, the elements of electricity, static, magnetism, electric circuit, transmission lines and cables, sub-transmission lines and cables, distribution lines and cables. Students receive training in pole climbing; safe practices, installation of cross arms, insulator guys, hanging of transformer, stringing of lines, pulling cables, pole top rescue and vault rescue. Safety and first aid are emphasized.

701B ELECTRICAL LINEMAN APPRENTICESHIP I B (2 2/3)
RPT1
Lecture: 2 hours; Lab: 2 hours
This course continues instruction in the generation of electricity: hydro, steam, wind, the elements of electricity, static, magnetism, electric circuit, transmission lines and cables, sub-transmission lines and cables, distribution lines and cables. Students receive training in pole climbing; safe practices, installation of cross arms, insulator guys, hanging of transformer, stringing of lines, pulling cables, pole top rescue and vault rescue. Safety and first aid are emphasized.

702 ELECTRICAL LINEMAN APPRENTICESHIP II (6)
RPT1
Lecture: 5 hours; Lab: 3 hours
Instruction is given in the review of electricity including: electrical math, series and parallel circuits, motors, induced emf, mutual and self induction, direct current, alternating current, transformers connections, transformer fusing, capacitors, voltage regulators, definitions, core losses, polarity, markings, oil insulation, cooling practices, loading and testing, and oil circuit breakers. Street light practices, circuits, utilitarian systems, lamps, sodium and mercury lights, glassware, refractors, control of streetlights, map reading, forms, test, regulators and safety in maintenance are all emphasized.

702A ELECTRICAL LINEMAN APPRENTICESHIP II A (3 1/3)
RPT1
Lecture: 3 hours; Lab: 1 hour
First module of instruction in the review of electricity including: electrical math, series and parallel circuits, motors, induced emf, mutual and self induction, direct current, alternating current, transformers connections, transformer fusing, capacitors, voltage regulators, definitions, core losses, polarity, markings, oil insulation, cooling practices, loading and testing, and oil circuit breakers. Street light practices, circuits, utilitarian systems, lamps, sodium and mercury lights, glassware, refractors, control of streetlights, map reading, forms, test, regulators and safety in maintenance are all emphasized.

702B ELECTRICAL LINEMAN APPRENTICESHIP II B (2 2/3)
RPT1
Lecture: 2 hours; Lab: 2 hours
Continuation of instruction in the review of electricity including: electrical math, series and parallel circuits, motors, induced emf, mutual and self induction, direct current, alternating current, transformers connections, transformer fusing, capacitors, voltage regulators, definitions, core losses, polarity, markings, oil insulation, cooling practices, loading and testing, and oil circuit breakers. Street light practices, circuits, utilitarian systems, lamps, sodium and mercury lights, glassware, refractors, control of streetlights, map reading, forms, test, regulators and safety in maintenance are all emphasized.

703 ELECTRICAL LINEMAN APPRENTICESHIP III (6)
RPT1
Lecture: 5 hours; Lab: 3 hours
Instruction is given in the stringent use of state law G.0.095, safety orders, OSHA requirements, overhead construction standards, overhead jobs, joint pole agreement of California, and electrical service requirements. Course reviews conductor sizes, splices, stringing, dead-ending, guy, rigging, transformer fusing, circulation current, trouble shooting, street lighting and public relations, live-line maintenance using live-line tools, safety and first aid.

703A ELECTRICAL LINEMAN APPRENTICESHIP III A (3 1/3)
RPT1
Lecture: 3 hours; Lab: 1 hour
First module of instruction in the stringent use of state law G.0.095, safety orders, OSHA requirements, overhead construction standards, overhead jobs, joint pole agreement of California, and electrical service requirements. Course reviews conductor sizes, splices, stringing, dead-ending, guy, rigging, transformer fusing, circulation current, trouble shooting, street lighting and public relations, live-line maintenance using live-line tools, safety and first aid.

703B ELECTRICAL LINEMAN APPRENTICESHIP III B (2 2/3)
RPT1
Lecture: 2 hours; Lab: 2 hours
Continuation of instruction in the stringent use of state law G.0.095, safety orders, OSHA requirements, overhead construction standards, overhead jobs, joint pole agreement of California, and electrical service requirements. Course reviews conductor sizes, splices, stringing, dead-ending, guy, rigging, transformer fusing, circulation current, trouble shooting, street lighting and public relations, live-line maintenance using live-line tools, safety and first aid.

709 ELECTRICAL CRAFT HELPER APPRENTICESHIP (4)
RPT1
Lecture: 4 hours
This course is designed as entry level preparation for a student interested in careers in the electrical power industry. This introductory course covers the basic fundamentals of planning, installation and maintenance of high and low voltage electrical systems. Basic functions of generation, both hydro and steam are covered. The transmission and distribution of electrical power will be reviewed. Fundamentals of electricity, identification, function, and operation of components will be surveyed. Ohms law, safety, ropes, knots, rigging, and tools required in the trade will be reviewed. Civil service exam assistance will also be covered.

702 CABLE SPLICER APPRENTICESHIP II (6)
RPT1
Lecture: 5 hours; Lab: 3 Hours
A study is made of the application of rigging principles to underground problems. Installation of equipment, splicing theory, distribution circuits, oil circuit breakers, transformer characteristics, and connections. State law requirements, safety and street lighting electrical systems are included.

702A CABLE SPLICER APPRENTICESHIP IIA (3 1/3)
RPT1
Lecture: 3 hours; Lab: 1 Hour
This is the first module of study in the application of rigging principles to underground problems. Installation of equipment, splicing theory, distribution circuits, oil circuit breakers, transformer characteristics, and connections. State law requirements, safety and street lighting electrical systems are included.

702B CABLE SPLICER APPRENTICESHIP IIB (2 2/3)
RPT1
Lecture: 2 hours; Lab: 2 Hours
This module continues study in the application of rigging principles to underground problems. Installation of equipment, splicing theory, distribution circuits, oil circuit breakers, transformer characteristics, and connections. State law requirements, safety and street lighting electrical systems are included.
Special Classes & Programs

Operation Maintenance Engineer Apprentices

Certificate of Achievement

Prerequisites: Students enrolling in these classes must have been accepted into a California Indentured Apprenticeship Program. A Certificate of Achievement may be awarded for completion of a combination of 36 units in this program and the A/C Refrigeration Mechanic program.

Student apprentices will be monitored and evaluated during this program by the joint apprenticeship committee for their trade and will gain the skills necessary to perform as a journeyman in their trade.

100 O.S.H.A. Based Safety Standards: Construction & Industry (2) RPT3
Lecture: 2 hours
This course provides instruction on industry safety and health rules as it applies to workers and employers within the construction industry. Topics such as fall protection, lock out tag out procedures, PPE, excavations, etc. are covered. Participants that meet the required hourly attendance and successfully pass the final exam will be eligible to receive their OSHA (30 hr) safety-training certificate.

703 Energy Management (4) RPT3
Lecture: 4 hours
The computer’s use in the HVACR industry and the application of energy management technology in the improvement of energy efficiencies. The goal is to prepare the maintenance engineer to use of modern technology, including computers in the continuing quest for improved energy management.

704 Motor Control I (4) RPT3
Lecture: 1 hour; Lab: 3 hours
This course provides instruction in basic motor control fundamentals, including the basic function of controlling devices, review of basic motors, selection of motors and definitions. The class will discuss definitions for controller components and symbols, familiarization of NEMA standards and review of one-line, wiring and schematic diagrams. The class will also introduce the use of digital controllers for use in industry.

720 HVACR - I (2) RPT3
Lecture: 1 hour; Lab: 3 hours
An introduction to the Principles and practices for the installation and maintenance of residential, commercial, and industrial heating, air conditioning, ventilation, and refrigeration systems. Equipment selection, maintenance, and safety will be covered.

724 Fundamentals of Electricity (2)
Lecture: 1 hour; Lab: 3 hours
This course covers the basic principles and practices of A/C & D/C electricity. Analyzing series, parallel and complex circuits, using Ohm’s law, the power equation, Kirchoff’s laws, and other applicable laws and equations.

727 Industrial Mechanics (2) RPT3
Lecture: 1 hour; Lab: 3 hours
Principles and practices for application of electro mechanics in environmental and manufacturing process control. The course will cover the use of devices and equipment in the control of industrial production and the maintenance of a healthy and comfortable environment in buildings.

739 Locksmithing and Security Systems for Apprentices (4)
Lecture: 3 hours
This course is designed to provide an opportunity to those students who are working with security systems to become familiar with the use of the systems used by locksmiths to make buildings secure. The various types of locks and the tools necessary for adapting various lock systems will be discussed.

740 Tenant Relations and Reports for Apprentices (3) RPT3
Lecture: 3 hours
The techniques used in maintaining wholesome and mutually beneficial relations with tenants and others is the primary purpose of this course. The need to understand the needs of all persons associated with a building is stressed. Instruction in the use of systems to maintain records and deliver timely and accurate reports is provided.

744 HVAC - Conditioning Controls (2) RPT3
Lecture: 1 hour; Lab: 3 hours
An introduction to the Principles and practices for the installation and maintenance of residential, commercial, and industrial heating, air conditioning, ventilation, and refrigeration control systems. System control equipment selection, maintenance, and safety will be covered.

745 Plumbing Code I (3) RPT3
Lecture: 1 hour; Lab: 3 hours
Instruction in plumbing principles and common practices. Theory and hands on application will be applied on various common maintenance plumbing installations and repairs operations.

747 Electrical Troubleshooting (1) RPT3
Lab: 3 hours
This course covers the basic principles and practices of electrical equipment and system troubleshooting. Proper use of tools and safety equipment will be covered.

748 Electrical Codes & Ordinances (NEC) (3) RPT3
Lecture: 3 hours
This course covers the basic principles and practices of electrical equipment and system troubleshooting. Proper use of tools and safety equipment will be covered.

749 HVACR II (2) RPT3
Lecture: 1 hour; Lab: 3 hours
Advanced principles and practices for the installation and maintenance of residential, commercial, and industrial heating, air conditioning, ventilation, refrigeration systems. Equipment selection, maintenance, and safety will be covered.

750 Indoor Air Quality (4) RPT3
Lecture: 4 hours
This course emphasizes on operation of systems to provide quality air to indoor environments. AQMD requirements and pending regulations are reviewed. Organizing and implementing maintenance programs that include indoor air quality assessment and air balancing HVAC systems are covered.

751 Print Reading (3) RPT3
Lecture: 3 hours
This class covers the instruction in basic blueprint reading including symbols identification. Various drawing types, the information contained, and the primary uses for each type drawing will be covered.

753 Boilers for Apprentices (4) RPT3
Lecture: 4 hours
Related engineering information concerning high pressure steam plants in office buildings and industrial establishments are studied in this course. Emphasis is given to steam power plant, use of steam tables, types of boilers, construction of boilers, boiler accessories, settings for combustion equipment and heating surfaces; operation of steam boilers and the combustion of fuels.
NONCREDIT - CONTINUING EDUCATION

Division: Noncredit-Continuing Education
Department Chair: Dr. Allison Tom-Miura, Room F-212E, (213) 763-3759, TommiuAJ@lattc.edu

PROGRAM OVERVIEW

Los Angeles Trade Technical College offers a variety of tuition-free noncredit courses on campus and at community-based organizations throughout Los Angeles. As a key aspect of lifelong learning, noncredit instruction at LATTC serves as a gateway to college and career preparation; provides programs for immigrants to actively engage in the economy and civic life; and provides access to basic skills and English as a Second Language. Students can register for classes through the Bridges to Success Center located in the Student Services building (ST), Room 316, online, or off-site at the first class meeting. For additional information and registration assistance, contact the Bridges to Success Center at (213) 763-5560 or via email at bridge@lattc.edu.

PROGRAM LEARNING OUTCOMES - PLOs

• Develop informed, confident and resourceful students that can successfully navigate and access campus and community resources to support their academic and career achievement.
• Strengthen and refresh students’ reading, comprehension, critical thinking, emotional intelligence, writing, fluency, computation, computer and study skills so they can effectively transition into college-level academic and career-technical classes and achieve their academic and career goals.
• Provide a safe and nurturing learning environment and supportive instructors that utilize effective, diverse, and technology-supported teaching practices and materials that address the different learning and leadership styles and cultural and socio-economic diversity of our students.

NONCREDIT CERTIFICATES OF COMPLETION

The California Community College’s Chancellor’s Office has approved several Noncredit Certificates of Completion. These Noncredit Certificates are programs that create opportunities for college preparation and career development through career-technical education (short-term vocational), educational development (basic skills, ESL and VESL) or workforce preparation. LATTC’s approved Noncredit Certificates are listed below:

ENGLISH AS A SECOND LANGUAGE: BEGINNING

■ Certificate

Students who earn this certificate will receive instruction in speaking, listening, reading and writing and the basic skills necessary for success in obtaining employment and/or advancement in the workforce.

REQUIRED COURSES

<table>

## Utilities and Construction Preparation

### Certificate

This noncredit certificate of completion provides students with training, education, resources and skills that will enable them to qualify for, apply to, and be successfully hired into entry-level apprentice training programs and jobs with utility companies and the construction trades. This training helps strengthen students’ basic skills in math, reading and test-taking and their fitness and conditioning in an applied, practical and contextualized learning environment appropriate for the utilities industry and construction trades.

## Basic Skills

### 2CE Basic English Skills (0)

Basic listening, reading, speaking, and writing skills for students with minimum English language skills. (54 hours)

### 23CE College and Scholastic Assessment Prep (0)

This course provides students with study, computational, writing, and critical thinking skills to prepare for the college assessment test. (72 hours)

### 35CE Basic Math Skills (0)

This course is designed to strengthen basic math skills. Topics include properties, rounding, estimating, comparing, converting, and computing whole numbers, fractions, and decimals. Upon completion, students should be able to perform basic computations and solve relevant mathematical problems. (54 hours)

### 41CE Softskills Basic 1A – Job Search Planning (0)

This course covers the basic knowledge and skills necessary for finding and gaining employment. Topics include job search planning, clarifying work/professional goals, identifying work opportunities using many resources, and developing a Work Opportunity Plan. (9 hours)

### 42CE Softskills Basic 1B - The Successful Job Search (0)

This course covers the basic knowledge and skills necessary for gaining employment. Topics include telephone contact of prospective employers, resume writing, employer expectations, and interviewing skills. (9 hours)

### 43CE Softskills Basic 1C - Pre-Employment Readiness (0)

This course provides an introduction for starting successful employment or a new job. Topics include: making good first impressions, basic workplace expectations, developing good work habits, time management, communication skills, dealing with job-related stress, and techniques for good interpersonal relationships. (9 hours)

### 45CE Microsoft Office Application Basics (0)

An introduction to basic functions of Microsoft Office® applications namely Word®, Excel®, Outlook®, and Powerpoint®. (36 hours)

### 46CE Microsoft Windows Basics (0)

An introduction to basic functions of Microsoft Windows®. Topics include: terminology; screen elements such as toolbars, title bars, and task bars; navigating in Windows®; file management; and much more. (9 hours)

### 47CE Microsoft Word Basics (0)

An introduction to basic functions of Microsoft Word®. Topics include: document management, editing techniques, and formatting text and documents. (9 hours)

### 48CE Microsoft Excel Basics (0)

An introduction to basic functions of Microsoft Excel®. Topics include: worksheet terminology. (9 hours)

### 50CE Microsoft PowerPoint Basics (0)

An introduction to basic functions and features of Microsoft Powerpoint®. Topics include: Powerpoint® definitions and terminology; using fonts, colors, graphics, and much more! (9 hours)

### 51CE Internet Basics (0)

An introduction to basic functions and features of the internet. Topics include internet providers, web browsers, search engines, navigating the internet, methods for handling worms and viruses, and more. (9 hours)
54CE SOFTSKILLS BASIC 3A – CUSTOMER SERVICE AND RELATIONS (0)
This course introduces basic customer service and relations skills. Topics include principles of customer service and relations, employee responsibilities in customer relations, communication skills, handling customer complaints, telephone skills, and using new technologies related to customer service. (9 hours)

55CE SOFTSKILLS BASIC 3B—IMAGE, ETIQUETTE, AND INTERPERSONAL COMMUNICATIONS (0)
This course covers the interpersonal and professional image skills necessary for succeeding in the workplace. Topics include basic business manners and etiquette, interacting with people or “people skills”, how to develop a professional image, problem solving, and handling workplace conflict. (9 hours)

60CE BASIC COMPUTER LITERACY (0)
This course introduces basic computer components and functions including computer hardware, software, using the internet, operating systems, and software applications, (e.g. word processing, spreadsheets, email and communications). (54 hours)

65CE FINANCIAL LITERACY – CREDIT BASICS (0)
Students will learn the basic skills involved in establishing and maintaining good credit, improving their credit scores, managing their debt responsibly, and preventing becoming victims of predatory lending. (9 hours)

66CE FINANCIAL LITERACY – PERSONAL MONEY MANAGEMENT (0)
Students will learn the basic skills involved in managing their personal finances and using basic savings and checking products and services offered by regulated financial institutions. (9 hours)

73CE INDUSTRY OVERVIEW AND CAREER OPPORTUNITIES (0)
This course provides students with the basic information about the targeted industry and sectors they are focused on for their career; including essential facts, key institutions, history, career pathways and trends. This course provides students with the basic research and networking skills to become well-informed job seekers so they can effectively prepare for their career and become employed. (18 hours)

74CE EMPLOYMENT TEST PREPARATION (0)
This course provides an orientation to test-taking, math, reading, mechanical and other contextualized basic skills to adequately prepare students for employer-based tests. (72 hours)

75CE INTRODUCTION TO POST-SECONDARY EDUCATION (0)
This course introduces students to the opportunities and benefits post-secondary education offers them. This course helps dispel many of the myths and reduce information overload that may discourage students and their caregivers from applying to and attending post-secondary education institutions. Students will learn tips and strategies that will help them select and successfully apply to and enroll in post-secondary institutions that best fit their education and career goals and needs. (9 hours)

77CE FUNDAMENTALS FOR WORKPLACE SUCCESS – TEAMWORK (0)
This course will prepare students to successfully collaborate and work effectively with their colleagues and co-workers in diverse settings by strengthening their employability, interpersonal and leadership skills. Students will gain insights about themselves and learn new tools and strategies that optimize their strengths and help them increase their effectiveness and efficiency at work. (36 hours)

78CE FUNDAMENTALS FOR WORKPLACE SUCCESS II – EFFECTIVE COMMUNICATION AND LEADERSHIP SKILLS (0)
This course gives students the opportunity to develop their listening, communication and leadership skills appropriate for the workplace in a supportive and interactive environment. Students will be introduced to skills that can help them become active, purposeful communicators and leaders for career success. (36 hours)

ENGLISH AS A SECOND LANGUAGE

1CE ENGLISH AS A SECOND LANGUAGE - BEGINNING I (0)
This course provides a basic introduction to the English language to the limited English speaker. Topics include listening, speaking, and reading English for the immediate need. (54 hours)

5CE ENGLISH AS A SECOND LANGUAGE (0)
This course provides listening, reading, speaking, and writing skills for ESL learners with basic English language skills. (36 hours)

6CE ENGLISH AS A SECOND LANGUAGE 0 (0)
This course basic listening, reading, speaking, and writing skills for ESL learners with zero to minimum English language skills. Students will learn basic pronunciation, survival vocabulary, cultural differences, self-sufficiency for tasks and activities, and basic English structure. (54 hours)

7CE ENGLISH AS A SECOND LANGUAGE - 1 (0)
This course basic listening, reading, speaking, and writing skills for ESL learners with zero to minimum English language skills. Students will learn basic pronunciation, survival vocabulary, cultural differences, self-sufficiency for tasks and activities, and basic English structure. (54 hours)

8CE ENGLISH AS A SECOND LANGUAGE - 2 (0)
Listening, reading, speaking, and writing skills for ESL learners with some English language skills. (54 hours)

VOCATIONAL EDUCATION

8CE PRE-EMPLOYMENT SKILLS/CONSUMER TRAINING (0)
Students will acquire conceptual, intra-, and inter-personal skills to prepare them for the world of work. Topics include communication skills, group effectiveness, problem-solving skills, and teamwork while working in “simulated” vocational settings. (270 hours)

80CE BANK TELLER TRAINING (0)
This course provides basic training for someone seeking an entry-level position as a bank teller. Topics include general work-place personal behavior and interpersonal relationships, specific common financial transaction procedures, and fundamental record processing principles. (72 hours)

108CE COMPUTER TECHNOLOGY IN THE WORKPLACE (0)
An introductory course to data-entry providing hands-on training. Students learn basic concepts of entering data using the numeric and alphabetic keyboard. (54 hours)
200CE SANITATION AND SAFETY FOR FOOD INDUSTRY PROFESSIONALS (0)
This class is designed for food industry professionals who need to renew their food handlers certificate, and for new food handlers who wish to obtain a certificate. Advance purchase of the servesafe essentials textbook is recommended. This class does not apply towards graduation requirements for certificate and/or AA degree. (9 hours)

252CE EXPLORATION OF CONSTRUCTION AND MAINTENANCE SKILLS (0)
This course introduces students to careers, basic skills and common practices in the construction and maintenance industries; helping them discover their aptitudes and interests in the construction field and make more informed decisions about their future careers, education and training. Students will learn and perform basic carpentry, masonry and mechanical skills and tasks. (108 hours)

311CE WORKPLACE SAFETY: FIRST AID/CPR BASICS (0)
This course combines lecture, demonstrations, video and hands-on practice to provide students with the knowledge and skills necessary to prevent, recognize and provide basic care for injuries and sudden illnesses at their workplace until advanced medical personnel arrive and take over. This course covers first aid, adult and youth CPR, automated external defibrillator (AED) training and basic injury control awareness modules. Course materials and hours are consistent with and meet American Heart Association, American Red Cross and National Safety Council certification requirements. (18 hours)

312CE WORKPLACE SAFETY: WATER SAFETY (0)
This course teaches safety and rescue skills to students working in and around water. This course focuses on developing students’ swimming techniques and fitness for their personal safety as well as their capacity to prevent and properly respond to water-related accidents and hazards. (36 hours)

313CE WORKPLACE FITNESS AND CONDITIONING (0)
This course helps students develop and improve their physical strength, endurance, agility and fitness required in their various occupations. Students will follow specific fitness and conditioning activities and goals based on their specific job requirements and duties. Students will create their own workouts based on scientific principles, follow their own training programs, test themselves and evaluate their changes during this course. (27 hours)
## ACCOUNTING

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1</strong> INTRODUCTORY ACCOUNTING I (5) UC:CSU</td>
<td>NOTE: Accounting 21 plus Accounting 22, (total, 6 units) are equivalent to Accounting 1, 5 units. Credit allowed only for Accounting I or the combination of Accounting 21 and Accounting 22. Recommended Preparation: Business 38 (Business Computations). Lecture: 5 hours Introduces the fundamental principles and concepts of accounting as a basis for financial communication in business. This includes the procedures for maintaining records in business transactions and the preparation of financial statements for the sole proprietorship in a service and merchandising firm. Procedures and techniques for internal control, deferrals and accruals, inventory, plant assets, accounts receivable, accounts payable, and payroll are included.</td>
</tr>
<tr>
<td><strong>3</strong> INTERMEDIATE ACCOUNTING (3) CSU</td>
<td>Lecture: 3 hours This course includes theory, practice, and problems pertaining to presentation of the financial statements - balance sheet and income statement, the accounting process; valuation of working capital, plant and equipment, intangibles, long-term liabilities, and stockholders’ equity accounts; financial statement analysis; and funds-flow and cash-flow reporting. Computerized output is offered along with manual projects.</td>
</tr>
<tr>
<td><strong>11</strong> COST ACCOUNTING (3) CSU</td>
<td>Lecture: 3 hours Cost systems and cost elements are studied in this course. Cost accounting for materials is covered by the study of purchases, inventories, pricing methods, requisitions, and vouchers. Labor cost accounting includes the subjects of payroll systems, records and analysis. Factory overhead is analyzed from the viewpoint of variable and fixed costs, direct and service costs and methods of application. Materials, labor and overhead costs are also studied for their application to job order, process and standard costs systems. Standard variances and cost factors are also presented in the cost practice set.</td>
</tr>
<tr>
<td><strong>15</strong> TAX ACCOUNTING I (3) CSU</td>
<td>Lecture: 3 hours This course presents the fundamentals of federal income taxation with emphasis on the taxation of individuals. Computerized output is offered along with manual preparation.</td>
</tr>
<tr>
<td><strong>17</strong> PAYROLL ACCOUNTING (2)</td>
<td>Lecture: 2 hours Methods and procedures of compiling the payroll records, and preparation of payroll tax returns required by State and Federal laws are covered. Included are State and Federal unemployment and social security and workers’ compensation reports.</td>
</tr>
<tr>
<td><strong>18</strong> COMPUTERIZED PAYROLL ACCOUNTING (3)</td>
<td>Lecture: 2 hours; Lab: 2 hours Concerned with procedures and practices involved in a manual or automated payroll system. Includes familiarizing students with current State and Federal laws affecting payroll, computation of payroll taxes, and preparation of payroll tax returns.</td>
</tr>
<tr>
<td><strong>21</strong> BOOKKEEPING AND ACCOUNTING I (3) UC:CSU</td>
<td>NOTE: Credit allowed only for Accounting I (5 units) or Accounting 21 and 22 (6 units) (UC limits credit for Accounting 21 and 22 to 5 units) Recommended Preparation: Business 38 (Business Computations) Lecture: 3 hours This course includes fundamentals of double entry bookkeeping; preparation of the trial balance; work sheets and simple financial statements; use of controlling accounts; the control of cash and bank reconciliation statements. Students may complete a mercantile firm practice set.</td>
</tr>
<tr>
<td><strong>22</strong> BOOKKEEPING AND ACCOUNTING II (3) UC:CSU</td>
<td>Lecture: 3 hours This course includes fundamentals of double entry bookkeeping; preparation of the trial balance, worksheets and simple financial statements; use of controlling accounts; the control of cash and bank reconciliation statements. Students may complete a mercantile firm practice set.</td>
</tr>
<tr>
<td><strong>25</strong> COMPUTERIZED ACCOUNTING METHODS AND PROCEDURES (3)</td>
<td>Lecture: 3 hours This course emphasizes the hands-on use of popular computer software applications to accounting and business, with special reference to the general ledger, billing, accounts receivable, accounts payable, payroll, and inventory control.</td>
</tr>
<tr>
<td><strong>55</strong> ACCOUNTING COMPUTER LAB (1)</td>
<td>Lab: 2 hours This is an accounting computer lab which provides the student with an opportunity to apply the accounting concepts being studied in a concurrent lecture/discussion Accounting class section.</td>
</tr>
</tbody>
</table>

## ADMINISTRATION OF JUSTICE - CORRECTIONAL SCIENCE

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>2</strong> CONCEPTS OF CRIMINAL LAW (3) UC:CSU</td>
<td>Lecture: 3 hours This course presents concepts associated with criminal law such as philosophy of law and constitutional provisions, definitions, classification of crime, research, case law and legal concepts in our society.</td>
</tr>
</tbody>
</table>
3 LEGAL ASPECTS OF EVIDENCE (3)
Lecture: 3 hours
The origins, development and philosophy of criminal evidence. This course looks at the many different types of evidence brought into the justice system. Also covered are the rules governing the admissibility of evidence in court.

14 REPORT WRITING FOR PEACE OFFICERS (3) CSU
Lecture: 3 hours
This course presents the various types of technical writing commonly used in police reports. The appropriateness of different styles in different contexts, the conceptualization of the material, and the use of these reports by analytical officers in police agencies are emphasized. Grammatical aspects of good report writing also are included.

41 OFFICER SAFETY (3)
Lecture: 3 hours
Protection against persons armed with dangerous and deadly weapons; the moral aspects, legal provisions, safety precautions and restrictions covering the use of firearms; the immediate and temporary care given in case of accident, illness and emergency child birth.

62 FINGER PRINT CLASSIFICATION (3)
Lecture: 3 hours
This is a practical course which covers the technical terminology of fingerprinting, pattern interpretation, and classification of fingerprints, the taking of fingerprints, searching and filing procedures and laboratory work in the classroom.

73 LAW & MINORITY GROUPS (3)
Lecture: 3 hours
This course examines the growing crises of race, ethnicity, gender and discrimination within the American justice system. Myths and realities about crime and minorities are analyzed. Racism, and inequities within the legal structures including court trials, corrections and the death penalty are discussed. Changes in criminal justice administration advocated by minority groups are reviewed.

75 INTRODUCTION TO CORRECTIONS (3) CSU
Lecture: 3 hours
This is a basic course dealing with the nature of the correctional systems. The aims and objectives of corrections, probation, practices, institutions, services, supervision of Inmates, and career opportunities are presented.

501 A TO Z GUIDE TO CRIMINAL JUSTICE CAREERS (3) CSU
Lecture: 3 hours
This course reviews the hot jobs in the criminal justice arena and outlines a method for the student to decide on their career path. Hiring process and interview skills will be explored. Fitness for duty and other physical and physiological characteristics will be discussed. An A to Z guide to Local, State, and Federal Criminal Justice Careers will be presented.

502 INTRODUCTION TO FORENSIC PSYCHOLOGY (3) CSU
Lecture: 3 hours
This is a basic course dealing with the nature of Psychology within the criminal justice system. The aims and objectives of Forensic Psychology as applied to corrections, probation practices, institutions, services, and inmate supervision will be discussed.

503 PROBATION OFFICER BASIC TRAINING (5) CSU
Lecture: 4 hours, Laboratory 3 hours
This course presents concepts associated with criminal law such as philosophy of law and constitutional provisions, definitions, classification of crime, research, case law and legal concepts in our society.

750 CRIMINAL ETHICS (3) CSU
Lecture: 3 hours
Students will learn ethics in the criminal justice system including police, courts, probation, parole, corrections and private security organizations. Strategies addressing unethical behavior by staff will also be discussed.

950 SELECTED TOPICS IN CORRECTIONS (1) CSU
Lecture: 1 hour
This course covers selected topics in the field of corrections including issues in health and safety, law, labor, technology, contract, equipment, procedures, and professional organizations. Instruction, discussion and networking with professionals, peers, and organizational members can be combined.

AMERICAN SIGN LANGUAGE

1 AMERICAN SIGN LANGUAGE I (4) UC:CSU
Lecture: 4 hours
This is an introductory course designed to develop basic conversational skills using the manual alphabet and American Sign Language. It is planned to assist in communicating with deaf individuals and have a better understanding of deaf culture. This course develops basic vocabulary and grammar of American Sign Language. Emphasis is placed on comprehension skills and vital aspects of the Deaf culture and community.

2 AMERICAN SIGN LANGUAGE II (4) UC:CSU
Lecture: 4 hours
This is an intermediate course in American Sign Language with special emphasis on vocabulary, grammar dialogue, and on the improvement of expressive and receptive skills. This course includes exposure to deaf culture and the history of sign languages.

ANTHROPOLOGY

101 HUMAN BIOLOGICAL EVOLUTION (3) UC:CSU
Lecture: 3 hours
Current evolutionary theory is applied to human populations, processes of race formation and evolution in the framework of population genetics and in relation to the evolution of ecosystems. Included are taxonomy, human phylogeny, primate evolution and the human fossil record.

101H HUMAN BIOLOGICAL EVOLUTION - HONORS (3) UC:CSU
Lecture: 3 hours
This course covers selected issues in the field of corrections including issues in health and safety, law, labor, technology, contract, equipment, procedures, and professional organizations. Instruction, discussion and networking with professionals, peers, and organizational members can be combined.

Scientific methodology, modern evolutionary theory, Mendelian genetics, biological classification of humans, non-human primates, primate behavior, the fossil record of human evolution, biological variation in modern human populations. Honors students will be assigned extensive reading and research assignments beyond the regular Anthropology 101 course.
102 HUMAN WAYS OF LIFE: CULTURAL ANTHROPOLOGY (3) UC:CSU
Lecture: 3 hours; Advisory: English 28
This course consists of a study of people and their culture on all levels from the non literate to the most complex. Among the many phases of culture considered will be races and racial relations, scientific, technological and economic progress, political organizations; morals, ethics, and religions, courtship, marriage, and family, as well as the languages and classical arts.

102H HUMAN WAYS OF LIFE: CULTURAL ANTHROPOLOGY - HONORS (3) UC:CSU
An introduction to cultural anthropology covers the concept of culture, cultural variation, and culture as an adaptation; discussion of cultural theory, and cultural variation in subsistence, marriage, gender roles, social and political organization and supernatural and spiritual beliefs. Honors students will be assigned extensive reading and research assignments beyond the regular Anthropology 102 course.

ARABIC

1 ELEMENTARY ARABIC I (5) UC:CSU
Lecture: 5 hours
This course focuses on learning the alphabet, pronunciation and basic grammar of the Arabic language. Elementary reading, practical vocabulary, useful phrases, basic geography, customs and culture of the Arabic speaking world are emphasized, along with cultural implications manifested in the modern and traditional usages of the language.

ARCHITECTURAL INTERIORS

200 RESIDENTIAL PLANNING (3)
Lecture: 1 hour; Lab: 4 hours (Formerly ARCH 30)
A study is made using a “small house project” layout, livability, functionality, size, orientation, cost, furnishing, equipment, ornamentation and future inhabitants. The “small house project” is put in context through a brief history of American shelters – their construction types and styles. At this point in the occurs, the student is ready for developing, retrofitting, adding and remodeling the “small house project” including basic construction details. Residential construction problems are explored with an emphasis placed in functional design.

ARCHITECTURE TECHNOLOGY

130 HISTORY OF ARCHITECTURE I (2) UC:CSU
Lecture: 2 hours (Formerly ARCH 2)
The development of architecture from prehistoric times to the beginning of the Renaissance with emphasis on the influences which determined its characteristics.

131 HISTORY OF ARCHITECTURE II (2) UC:CSU
Lecture: 2 hours (Formerly ARCH 3)
The development of the built environment from the onset of the Renaissance to the present.

135 HISTORIC PRESERVATION (3) CSU
Lecture: 3 hours
Introduction to the field of cultural resource management, providing an overview to the conservation of and advocacy for historic buildings, sites, districts and landscapes.

151 MATERIALS OF CONSTRUCTION (3) CSU RPT1
Lecture: 3 hours (Formerly ARCH 21)
A study is made of the basic building materials, such as wood, steel, concrete, and masonry, and their uses in the construction field. Non-structural materials such as glass, roofing, plastics and paint are explored, as well as the sixteen divisions of construction.

152 EQUIPMENT OF BUILDING (3) CSU
Lecture: 3 hours (Formerly ARCH 22)
A study of principles involved in the design and application of mechanical equipment to buildings for plumbing, heating, air conditioning, electrical power distribution, illumination, vertical transportation and acoustic systems.

160 COMPUTERS FOR DESIGNERS (3) CSU RPT2
Lecture: 1.5 hours; Lab: 4.5 hours
This is an introductory course aimed at 3D graphic use by, environmental and industrial designers such as architecture, landscape architecture, urban planners, product designers, virtual space designers, or any profession that uses computers in three-dimensional design virtually or physically.

172 ARCHITECTURAL DRAWING I (3) CSU
Lecture: 1 hour; Lab: 4 hours (Formerly ARCH 5)
This course covers the preparation of construction documents for a one-story, wood frame residence as well as the study of construction methods, materials, and building ordinances. It concentrates on the development of a floor plan layout and design. It includes graphic representation of a site foundation layout, floor and roof plans, schedules, cross-sections, details and interior/exterior elevations.

173 ARCHITECTURAL DRAWING II (3) CSU
Lecture: 1 hour; Lab: 4 hours (Formerly ARCH 6)
This course covers the preparation of construction documents for a two-story, wood frame residence and the study of construction methods and material. Special consideration is given to solving problems involving two story construction additions to existing one-story structures. Other topics include graphic representation on site design, building foundation, structural components, elevations and cabinet drawings with floor plans; schedules, cross-sections, details and interior/exterior design.
201 BASIC ARCHITECTURAL DESIGN I (3) UC:CSU
Lecture: 1 hour; Lab: 4 hours (Formerly ARCH 33)
Solution of architectural problems using two- and three-dimensional studies of form and composition.

202 BASIC ARCHITECTURAL DESIGN II (3) UC:CSU
Lecture: 1 hour; Lab: 4 hours (Formerly ARCH 34)
This course explores creative architectural design through the planning of buildings and public spaces with concern for function, orientation, structure and materials.

210 CONSTRUCTION ESTIMATION (3) CSU
Lecture: 3 hours
A study is made of methods used in determining quantities and cost estimates of labor and materials in Engineering and building construction such as excavation, concrete and finish.

222 BEGINNING ARCHITECTURAL GRAPHICS (3) CSU
Lecture: 1 hour; Lab: 4 hours
This course covers graphic communication techniques, including fundamentals of orthographic projection; paraline and perspective drawing; descriptive geometry.

261 COMPUTER AIDED DESIGN FOR ARCHITECTURE I (3) CSU
Lecture: 1 hour; Lab: 4 hours (Formerly ARCH 25)
A beginning Computer Aided Design course. Students learn the basic concepts involved in preparing computer drawings that communicate design ideas. Appropriate software is used such as Auto-Cad, 3D Studio and Micro station.

271 ARCHITECTURAL DRAWING III (3) CSU
Lecture: 1 hour; Lab: 4 hours (Formerly ARCH 7)
This course covers the study of concrete block or brick buildings along with wood frame construction, especially long span beam techniques. It includes further study of construction drawings, section layouts, materials and building ordinances as well as energy efficient methodologies, site orientation, roof, electrical, plumbing and air-conditioning; and an introduction to interior design colors, materials and furniture. Creative graphics representation on site analysis, floor plans and interior/exterior elevations also are covered.

272 ARCHITECTURAL DRAWING IV (3) CSU RPT1
Lecture: 1 hour; Lab: 4 hours (Formerly ARCH 8)
The design and construction of commercial buildings are studied with special emphasis on tilt-up concrete construction and wood frame long span beam techniques. This course also focuses on construction materials, structural details and building ordinances for commercial buildings. Students develop interior design presentations using sample materials for finished surfaces. Working drawings, creative architectural design and graphic presentation methods are also stressed.

341 GIS - METROPOLITAN ACCESS PLANNING I (3) CSU
Lecture: 1 hour; Lab: 4 hours (Formerly ARCH 46)
CAD, GIS, Data Systems, and Internet accessibility in one course. GIS technology and related digital technologies are used to explore intelligent drawings, as well as drawings that have multiple types of information associated with them. The collection of data will evaluate the environmental conditions of the city.

342 METROPOLITAN ACCESS PLANNING SYSTEMS II (MAP/GIS) (3) CSU
Lecture: 1 hour; Lab: 4 hours (Formerly ARCH 47)
CAD, GIS, Data Systems and Internet in one course. GIS technology and related digital technologies are used to explore intelligent drawings, as well as, drawings that have multiple types of information associated with them. Data collection will be used to evaluate environment of the city.

185 DIRECTED STUDY - ARCHITECTURAL (1)
Conference, 1 hour per unit.
These courses are designed to allow the student to pursue directed study in the architecture program on a contract basis under the close supervision of an architectural drafting instructor. These courses require that the student present a contract and that the instructor approves and evaluates the contract.

285 DIRECTED STUDY - ARCHITECTURAL (2) CSU
Conference, 1 hour per unit.
These courses are designed to allow the student to pursue directed study in the architecture program on a contract basis under the close supervision of an architectural drafting instructor. These courses require that the student present a contract and that the instructor approves and evaluates the contract.

385 DIRECTED STUDY - ARCHITECTURAL (3) CSU
Conference, 1 hour per unit.
These courses are designed to allow the student to pursue directed study in the architecture program on a contract basis under the close supervision of an architectural drafting instructor. These courses require that the student present a contract and that the instructor approves and evaluates the contract.

ART

101 SURVEY OF ART HISTORY I (3) UC:CSU
Lecture: 3 hours
A survey is made of the chronological development of Western art from prehistoric times through the Renaissance with special emphasis upon the cultural factors which contributed to its evolution. This course encompasses the historic study of architecture, painting, and sculpture, with incidental references to the related minor arts.

101H SURVEY OF ART HISTORY I - HONORS (3) UC:CSU
A survey is made of the chronological development of Western and non-European art from the Prehistoric to the Renaissance. Special emphasis is upon the cultural factors that contributed to its evolution. This course encompasses the historic study of architecture, painting and sculpture, with incidental references to the related minor arts. Honors students will be assigned extensive reading and research assignments beyond the regular Art 101 course.

102 SURVEY OF ART HISTORY II (3) UC:CSU
Lecture: 3 hours
This course provides a survey of the major visual arts of the Western world from the early Renaissance to the present time, linking art with social and economic aspects of Western culture. Individual artists are studied, from Michelangelo to Andy Warhol.
103 ART APPRECIATION I (3) UC:CSU
Lecture: 3 hours
This course is designed specifically for those students who desire to expand their visual awareness through training in visual perceptual skills. The course includes exploration of the basic elements of art; visual skills are enhanced by practice in drawing techniques based on perception. Students will acquire a broad understanding of the nature of art through study of selected works from art history.

104 ART APPRECIATION II (3) UC:CSU
Lecture: 3 hours
Students participate in art experiences through study of specific artists and works of art, basic drawing exercises stressing visual perception, and individual research projects on the art and artists of various cultures.

201 DRAWING I (3) UC:CSU (CAN ART 8)
Lecture: 2 hours; Lab: 2 hours
Beginning instruction is given in pencil drawing, charcoal, pastel and other sketching media. Painting in wash, water color and tempera, from still life, and from outdoor assignments, is included. This is a course for beginners and non-art majors, as well as a brush-up course for artists. Limits to transfer credit.

202 DRAWING II (3) UC:CSU
Lecture: 2 hours; Lab: 2 hours
This course is a continuation of Art 201 with particular emphasis on water color and its techniques. Limits to transfer credit.

300 INTRODUCTION TO PAINTING (3) UC:CSU
Lecture: 2 hours; Lab: 2 hours
This introductory painting course covers the basic skills and techniques in acrylic, oil, and watercolor. Emphasis is placed on color mixing, value, intensity and compositional organization.

304 ACRYLIC PAINTING I (3) CSU
Lecture: 2 hours; Lab: 2 hours
Introduction to acrylic painting. This course emphasizes developing skills in media, techniques, personal expression.

501 BEGINNING TWO-DIMENSIONAL DESIGN (3) UC:CSU
Lecture: 2 hours; Lab: 2 hours
This course introduces the elements and principles of two-dimensional (flat) design in the visual arts. Color, color theory, psychology of perception and historical and cultural foundations are explored.

502 BEGINNING THREE-DIMENSIONAL DESIGN (3) UC:CSU
Lecture: 2 hours; Lab: 2 hours
This course introduces the fundamentals of three-dimensional composition. A study is made of line, mass, texture, value, and shape in a variety of materials. Emphasis is on form and space.

185 DIRECTED STUDY (1) CSU
Conference, 1 hour per unit.
Allows students to pursue Directed Study in Art on a contract basis under the direction of a supervising instructor.

285 DIRECTED STUDY (2) CSU
Conference, 1 hour per unit.
Allows students to pursue Directed Study in Art on a contract basis under the direction of a supervising instructor.

385 DIRECTED STUDY (3) CSU
Conference, 1 hour per unit.
Allows students to pursue Directed Study in Art on a contract basis under the direction of a supervising instructor. Credit Limit: A maximum of 3 units in Directed Study may be taken for credit.

ASTRONOMY

1 ELEMENTARY ASTRONOMY (3) UC:CSU
Lecture: 3 hours
This course provides a non-mathematical survey of modern astronomy, including the properties and evolution of the solar system, stars and the universe.

2 ELEMENTARY ASTRONOMY LABORATORY (1) RPT1 UC:CSU
Recommended Preparation or concurrent enrollment: Astronomy 1
Lab: 2 hours
Provides the laboratory work to accompany or follow Astronomy 1. Includes constellation study, study of types of telescopes and other instruments, telescopic observations, simple surveying measurements, ephemeris and celestial globe study, planetary and solar system astronomy, work with optical systems and spectrosopes, and reduction of data. Requires occasional field trips to nearby astronomical facilities.

5 FUNDAMENTALS OF ASTRONOMY LABORATORY (1) UC:CSU
Recommended Preparation or concurrent enrollment: Astronomy 1
Lab: 3 hours
Provides the laboratory work to accompany or follow Astronomy 1. This course uses astronomical instruments and laboratory equipment. Includes work with celestial sphere, sky charts, optical bench, telescopes, spectroscope, and photometer. Requires field trips for evening observations.

AUTOMOTIVE COLLISION REPAIR

114 BASIC WELDING THEORY AND PRACTICES (3)
Lecture: 1 hour; Lab: 6 hours
Instruction is given in the theory and safety of MIG and plastic welding/plastic adhesives. Students will understand welding procedures, protection of sensitive components, weld selection. Students will identify weldable materials and/or adhesives, and perform required repairs to industry standards.

115 AUTO BODY CONSTRUCTION (3)
Lecture: 1 hour; Lab: 6 hours
A study is made of auto body construction and body part nomenclature. The student will disassemble and reassemble bolt-on parts on the automobile body. Students will understand diagnostic and repair procedures for movable and/or stationary glass and hardware. Students will inspect, adjust, repair or replace all power accessories, window glass and hardware to industry standards.

116 BASIC COLLISION REPAIR (3)
Lecture: 1 hour; Lab: 6 hours
Instruction is given in occupational information that includes body shop safety, work habits, job orientation and local laws and ordinances. The type of auto body tools and their uses are discussed and demonstrated. Laboratory experiences are provided for using basic hand and power tools in repairing minor sheet metal damage.

<tr>
<td>124</td>
<td>INTERMEDIATE COLLISION REPAIR - PARTS REPLACEMENT AND ALIGNMENT (3)</td>
<td>1</td>
<td>6</td>
<td>Lecture and demonstration of body parts alignment, devices and equipment used in checking alignment. Students will understand techniques of outer body panel repairs, replacements, and adjustments. Students will remove, repair, and replace steel, aluminum, and plastic composition body panels, doors, deck lids, hoods, adjust and align to manufacturers' specifications.</td>
</tr>
<tr>
<td>125</td>
<td>INTERMEDIATE COLLISION REPAIR - METAL REPAIR AND REFINISHING (3)</td>
<td>1</td>
<td>6</td>
<td>Instruction is given in metal finishing, shrinking, and filled application. Students will grind, sand, and restore contours with heat and plastic body fillers/fiberglass fillers/SMC (Sheet molded compound) fillers/adhesives to industry standards.</td>
</tr>
<tr>
<td>126</td>
<td>INTERMEDIATE COLLISION REPAIR - FRAME STRAIGHTENING (3)</td>
<td>1</td>
<td>6</td>
<td>Instruction is given in auto body electrical wiring systems. Lecture and demonstrations on types and usage of auto body pull equipment and pulling and anchor points on damaged vehicles are given. Laboratory projects include proper pulling of damaged parts in conjunction with alignment and body repair.</td>
</tr>
<tr>
<td>134</td>
<td>BODY PANEL REPLACEMENT (3)</td>
<td>1</td>
<td>6</td>
<td>Instruction is given in welding procedures of panel replacements and the application of heavy pull equipment for proper alignment. Students will understand the techniques of outer body panel repairs, replacements, and adjustments. Students will remove, repair, and replace steel/ aluminum/ SMC/Plastic body panels, doors, deck lids, and hoods, adjust and align to manufacturers' specifications.</td>
</tr>
<tr>
<td>135</td>
<td>BODY SECTION REPLACEMENT (3)</td>
<td>1</td>
<td>6</td>
<td>Instruction is given in body section replacement and structural sectioning, including removing and replacing mechanical parts, using manufacturers' body repair manual and I-CAR recommendations. Measuring for cutting and proper alignment of sections is stressed. Students will understand the proper techniques of body/structural sectioning and anti-corrosion protection.</td>
</tr>
<tr>
<td>136</td>
<td>UNITIZED BODY AND FRAME ALIGNMENT (3)</td>
<td>1</td>
<td>6</td>
<td>Students learn proper frame alignment and the methods of straightening damaged frames and unitized body construction. Body shop practices are also covered.</td>

<td>1 hr</td>
<td>6 hrs</td>
<td>Body estimating, labor analysis, painting and parts estimating and use of repair and estimate manuals are taught in this course.</td>
</tr>
<tr>
<td>144</td>
<td>ADVANCED COLLISION REPAIR – PRIMERS AND PAINTS (3)</td>
<td>1 hr</td>
<td>6 hrs</td>
<td>This course offers a review of auto collision repair techniques and includes lectures, demonstrations and guest speakers. Advanced instruction is offered in inspection, paint repair and repaint to I-CAR and industry standards.</td>
</tr>
<tr>
<td>145</td>
<td>ADVANCED COLLISION REPAIR – SPECIAL PROBLEMS AND SOLUTIONS (3)</td>
<td>1 hr</td>
<td>6 hrs</td>
<td>This course offers a review of auto collision repair techniques, including paint application problems and solutions.</td>
</tr>
<tr>
<td>148</td>
<td>PAINT PREPARATION AND APPLICATION (3)</td>
<td>1 hr</td>
<td>6 hrs</td>
<td>Students receive instruction in the types and properties of paint, solvent and spot painting. Cause and effect relationships of paint and surface blemishes, paint application problems and repairs, and repaints as required to I-CAR and industry standards are introduced.</td>
</tr>
<tr>
<td>149</td>
<td>ESTIMATING BODY DAMAGE (3)</td>
<td>1 hr</td>
<td>6 hrs</td>
<td>Students are taught body repair and computerized estimating collision service management systems. Damage reporting, structural and non-structural damage analysis, sequencing of inspections and use of collision estimating guides and damage reports are also addressed.</td>
</tr>
<tr>
<td>226</td>
<td>AUTOMOTIVE COLLISION REPAIR I (3)</td>
<td>1 hr</td>
<td>6 hrs</td>
<td>This course introduces students to MIG and plastic welding and adhesive techniques as well as cost estimating, customer relations, damage reporting, automotive mechanical and electrical operations and the impact of air bag deployment.</td>
</tr>
<tr>
<td>227</td>
<td>AUTO BODY &amp; FENDER II (3)</td>
<td>1 hr</td>
<td>6 hrs</td>
<td>This course offers advanced training in refinishing, color mixing and matching of OEM (Original Equipment Manufacturer) color codes. Proper paint gun operation and use of use of air pressure and spray patterns are emphasized, as well as VOC (Volatile Organic Compounds) log calculation systems. Students will learn to repair/repaint as required to I-CAR and industry standards.</td>

Emphasis is placed on safety power train, torque converter, hydraulic fundamentals and controls, fluid and seal, planetary systems, and electronic shift controls as well as diagnosis.</td>
</tr>
</tbody>
</table>
113B DRIVE TRAIN COMPONENTS PRINCIPLES & PRACTICES (3) CSU
Lecture: 1 hour; Lab: 6 hours
This course offers instruction in the principles of manual transmission and axles, including gears, gear reduction, ratios, gear combinations, bearing type of clutches. Laboratory instruction is offered in the repair and servicing of clutches, standard transmission and differentials.

114A STEERING, SUSPENSION, BRAKES, PRINCIPLES & PRACTICES (3) CSU
Lecture: 1 hour; Lab: 6 hours
This course offers instruction in the principles involved in steering, suspension, wheel alignment, wheel balancing, hydraulic and power brakes. This course also covers related sciences such as physics and mathematics applied to steering, suspension, principles. In conjunction, this course covers instruction in disassembly, inspection, reassembly and adjustment of suspension and steering systems.

114B STEERING, SUSPENSION, BRAKES, PRINCIPLES & PRACTICES (3) CSU
Lecture: 1 hour; Lab: 6 hours
This course offers instruction in the principles of the modern automobile braking system, including the hydraulic system, drum brake systems, disc brake system, power assist systems, and the antilock systems. This course also covers related sciences such as physics and mathematics applied to the braking system.

121 BASIC ENGINE THEORY, INSPECTION AND REPAIR (3) CSU
Lecture: 1 hour; Lab: 6 hours
This course offers instruction in the types, of operating principles and performance characteristics of automotive engines. Applied mathematics and related physics are emphasized throughout the course. Students will disassemble and assemble a complete engine and apply related theory to factory procedures.

122 ELECTRICAL/ELECTRONIC SYSTEMS THEORY, INSPECTION AND REPAIR (3) CSU
Lecture: 1 hour; Lab: 6 hours
This course offers instruction in basic electrical components and systems. Laboratory practices on testing, servicing and diagnosing of electrical components and systems are performed by the students.

123 FUEL AND EMISSIONS SYSTEMS THEORY, INSPECTION AND REPAIR (3) CSU
NOTE: Students are strongly advised to have successfully completed Auto and Related Technology 121, 122 with a grade of "C" or better prior to entering this class.
Lecture: 1 hour; Lab: 6 hours
This course offers instruction in engine performance, diagnosis and repair. Emphasis is placed on ignition, fuel, and emission systems. Instruction is given in related technologies of automotive fuels, carburetors, fuel injection, computer controls, ignition, induction and scavenging systems. The proper use of test equipment and automotive comprehension are stressed in this course. Additionally, proper work ethics, rules and regulations (State and Federal) are presented in the relation of importance to overall customer relations and community responsibility.

130 AUTOMOTIVE THEORY AND REPAIR I - SECTION A (3) CSU
Lecture: 1 hour; Lab: 6 hours
This course offers advanced instruction in review of engines, engine theory and diagnosis, engine diagnostic equipment. Actual diagnosis and repair of engine components, clutches, flywheels and standard transmissions clutches flywheel and standard transmissions.

131 AUTOMOTIVE THEORY AND REPAIR II - SECTION B (3) CSU
Lecture: 1 hour; Lab: 6 hours
Theory and practice is given on emission control and engine performance. Introduction to the mechanic certification program is stressed.

132 AUTOMOTIVE THEORY AND REPAIR III - SECTION C (3) CSU
Lecture: 1 hour; Lab: 6 hours
This course offers instruction in the review of chassis electrical wiring batteries, cranking systems, charging systems, and electronic ignition. Actual repair and diagnosis of automotive components are completed on American and imported cars.

135 COMPUTER CONTROL AND FUEL INJECTION (3) CSU
NOTE: Students are strongly advised to have successfully completed Auto and Related Technology 122, 123 with a grade of "C" or better prior to entering this class.
Lecture: 1 hour; Lab: 6 hours
This course offers instruction in Automotive Computer Control and Fuel Injection Systems. Emphasis is placed on computer control electronic and fuel systems construction, function and testing.

136 AUTOMOTIVE EMISSION CONTROL SYSTEMS (3)
Lecture: 1 hour; Lab: 6 hours
This course is designed to upgrade the knowledge of students who are currently employed in the automotive field. It will prepare students to take the Alternative Test for the State of California Bureau of Automotive Repair: These are the alternative to the ASE A6, A8, and L1 test. Materials and content comply with B.A.R. requirements. This is not to be considered and entry level class.

140 AUTOMOTIVE THEORY AND REPAIR IV (3) CSU
Lecture: 1 hour; Lab: 6 hours
Classroom lecture is offered in the areas of brakes, front suspension, batteries and starting systems, with emphasis on diagnosis and repair procedures. Shop practice is offered in most areas of automotive repairs: engine, transmissions, tune up, brakes, suspension, steering, and automotive accessories, and various other repairs using available vehicles.

141 AUTOMOTIVE THEORY AND REPAIR V (3) CSU
Lecture: 1 hour; Lab: 6 hours
Classroom lecture is offered in the areas of the use of electrical diagnostic equipment, interpretation of wiring diagrams, engine computer controls and charging systems. Shop practice is offered in most areas of automotive accessories, and various other repairs using available vehicles.

142 AUTOMOTIVE THEORY AND REPAIR VI – SECTION C (3) CSU
Lecture: 1 hour; Lab: 6 hours
This course is designed to upgrade the knowledge of the students who are currently employed in the automotive field. This course also prepares students for employment and licensing in the California State Smog Check Program and prepares them for the California State Smog License Examination. Materials and content comply with Bureau requirements.
BAKING, PROFESSIONAL

101 BAKING: BASIC CAKE DECORATING (2)
Lecture 1 Hour; Lab: 2 hours
This course provides an introduction to cake decorating and design. Students will recognize and prepare various piping methods as they pertain to a professional bakery.

111 CULINARY ARTS - ORIENTATION I (4) CSU
(Note: This course is also listed under Culinary Arts Section)
Prerequisite: CA 112
Lecture: 2 hours; Lab: 6 hours
With a combination of lecture and lab practice, the student is introduced to the world of commercial food production. Students are introduced to culinary theories and develop skills in knife handling, ingredient identification, small and large equipment use, weights and measures, recipe development, and cooking fundamentals.

112 CULINARY ARTS - SANITATION AND SAFETY (2) CSU
(Note: This course is also listed under Culinary Arts Section)
Lecture: 2 hours
This course discusses sanitation and safety as it applies to the restaurant industry. HACCP protocol, preventing food borne outbreaks, introduction to microbiology, and establishing "flow of food systems" will be covered. Federal, state, local legislation and employee training will be discussed. National Restaurant Association Safe Serve Test will be given at the conclusion of this class.

121 BEGINNING YEAST BREADS AND QUICKBREADS (6)
Recommended Preparation: Successful completion of a grade "C" or better in Culinary Arts 112 & Professional Baking 112
Lecture: 3.75 hours; Lab: 6.75 hours
This course allows the student to apply the techniques acquired in Professional Baking 112. The student will be learning how to use speed-scratch; industry-level convenience products are demonstrated, along with flour usage, and the effects of time and temperature on yeast products. Speed, accuracy and increased productivity are stressed along with preparation of a variety of yeast breads.

122 BAKING PROCESSES AND THEORY OF INGREDIENTS (4)
Lecture: 2 hours; Lab: 6 hours
Course covers the production of quick breads, introduction to puff pastry, laminated dough, and cookies with an emphasis placed on mixing methods. The role of leavening agents, starches, chemical reactions of ingredients and the effect on heat and cold on products; recipe and menu development, including ingredient selection will be discussed.

131 PLATED RESTAURANT STYLE DESSERTS I (6)
Recommended Preparation: Successful completion of a grade "C" or better in Culinary Arts 112 & Professional Baking 112, 121 & 122
Lecture, 3.75 hours; Laboratory, 6.75 hours
This course offers instruction in the area of experimental baking, with special concentration on selected topics. This class will debate various styles of plated desserts and compare and compose various restaurant style dessert items.

132 MULTI COMPONENT DESSERTS AND PASTRIES II (6)
Recommended Preparation: Successful completion of a grade "C" or better in Culinary Arts 112 & Professional Baking 112, 121, 122 & 131
Lecture, 3.75 hours; Laboratory, 6.75 hours
Students will discuss and demonstrate contemporary multi component plated desserts. Topics include composed desserts, menu fusion, international and classic dessert combinations.

141 ADVANCED BAKING CENTERPIECES AND DECORATIVE TECHNIQUES II (6)
Recommended Preparation: Successful completion of a grade "C" or better in Culinary Arts 112 & Professional Baking 112, 121, 122, 131 & 132
Lecture, 3.75 hours; Laboratory, 6.75 hours
Application procedures and techniques for preparing advanced decorative bakery items for display in a professional food service facility. Students will prepare and demonstrate various advanced techniques including: Molded and tempered chocolate show pieces, marzipan, nougatine, pastillage, pulled and molded sugar, wedding and other occasional cakes, rolled and poured fondant, and gum paste.

142 CULINARY ARTS - ADVANCED RESTAURANT PRACTICE II MENU PLANNING AND PURCHASING/SUPERVISION AND TRAINING (6) CSU
(Note: This course is also listed under Culinary Arts Section)
Recommended Preparation: Successful Completion of a C Grade or Better in Culinary Arts 111, 112,
Lecture: 3.75 hours; Lab: 6.75 hours
This course covers menu planning for restaurant, cafeteria, banquet, and specialty restaurant settings. Fundamentals of storeroom operations including ordering, receiving, storage controls, pars and inventory methods will be identified and best practices studied. Supervision and training of the foodservice worker will be discussed and practiced.

150 SPECIALTY BREADS CURRENT TRENDS (3) RPT2
Lecture, 1 hour; Laboratory, 4 hours
Learn to make artisan style breads. Topics include yeast, role of gluten, types of flours, and other ingredients, as well as production methods. Current trends in baking and sanitation procedures are reviewed.

170 CULINARY ARTS - CULINARY NUTRITION (2) CSU
(Note: This course is also listed under Culinary Arts Section)
Lecture: 2 Hours
This course provides a quick overview of applied culinary nutrition. Recipe and Menu development including ingredient selection and cooking techniques will be discussed. Special diet (low fat, low sodium, diabetic, and caloric intake) will be discussed. The class is appropriate for food service professionals who would like to work as personal chefs, with sports teams, at spas and resorts, major hospital chains, entertainment or transportation industries, or in health care.

235 CULINARY ARTS - MENU PLANNING AND PURCHASING (4)
(Note: This course is also listed under Culinary Arts Section)
Lecture: 3 hours; Lab: 3 hours
Advanced course in menu planning and purchasing using the menu as a tool for ordering, selection and procurement of food and beverage items. Menu, labor, and facility computer generated cost analysis and percentages will be addressed.

240 CULINARY ARTS – RESTAURANT SUPERVISION AND TRAINING (2) CSU
(Note: This course is also listed under Culinary Arts Section)
Lecture: 2 hours
Students are introduced to human resource management and supervision techniques. Students will identify the recruiting process, communication skills, leadership styles, legal issues in the workforce, employee motivation and discipline.
BIOLOGY

3 INTRODUCTION TO BIOLOGY (4) UC:CSU
Lecture: 3 hours; Lab: 3 hours
This is an introductory course dealing with the fundamental properties of living things. The structure and physiology of plants and animals, with emphasis on humans, are covered. Relationships between biological communities, genetics, and evolution are stressed.

6 GENERAL BIOLOGY I (5) UC:CSU
Prerequisite: Chem 51 and Math 125 with a grade of “C” or better
Lecture: 3 hours; Lab: 6 hours
This course is designed for all life science and pre-med majors. It focuses on the basic cellular and molecular processes of life including matter-energy relationships, metabolism, reproduction and genetics. The lower forms of life (monerans, protistans, plants and animals) as their structures, physiology and behavior illustrate the origin and evolutionary development of cells and organisms are also examined.

7 GENERAL BIOLOGY II (5) UC:CSU
Prerequisite: Biology 6 and Math 125 (or higher) with a grade of “C” or better
Lecture: 3 hours; Lab: 6 hours
Continues Biology I. Designed to complete the study of the basic principles of biology, this course covers reproduction, embryology and development, population ecology, genetics, and evolution. It also examines the higher forms of life (plants and animals) as their structures, physiology and behavior illustrate the evolution of all forms of life.

20 HUMAN ANATOMY AND PHYSIOLOGY (8) UC:CSU
Prerequisite: Biology 3 or 36 with a grade of “C” or better
Lecture: 6 hours; Lab: 6 hours
The course integrates the fundamentals of human anatomy with the fundamentals of molecular, cellular and organ system physiology. It also covers molecular histology and gross anatomy and physiology of all human organ systems.

36 BIOSCIENCE FOR HEALTH OCCUPATIONS (4)
Lecture: 3 hours; Lab: 3 hours
This is an elementary course including basic chemistry, basic microbiology and anatomy and physiology. Basic chemistry, as related to health care and microbiological principles including asepsis will be treated. Anatomy and physiology, both microscopic and gross, of the human body is studied using a systems approach.

40 THE SCIENCE OF BIOTECHNOLOGY (3) CSU
Lecture: 2 hours; Lab: 2 hours
Prerequisite: Biology 3
This course provides a comprehensive introduction to the science of biotechnology providing theory with hands-on experience with laboratory protocols that parallel the isolation, purification, and cloning of a gene.

BUILDING CONSTRUCTION TECHNIQUES

MISSION STATEMENT

Provide our students with high quality education, including sustainable construction techniques and other green technologies that meet or exceed the expectations of our students as well as those of the construction and its related industries.

PROGRAM OVERVIEW

Most craft workers specialize in one kind of work, such as electrical, plumbing, carpentry etc. However there are many skills and knowledge set which are common to the construction and maintenance industries. Contractors for example need to know basic law, contracts, and business practices. This is the area where Building Construction Techniques classes are utilized to give the necessary skills and knowledge sets that many different disciplines require.

2 PRE-EMPLOYMENT - APPLIED TRADES CALCULATIONS AND MEASUREMENTS (3) CSU
Lecture: 3 hours
This is an entry level course in applied calculations and measurements with special emphasis on application problems encountered in the utility, manufacturing, and construction industries.

3 MATERIALS OF THE BUILDING INDUSTRY (2) CSU
Lab: 3 hours
This course covers the identification and proper use of construction materials as well as their selection criteria for common items used in the utility and construction industries. An introduction to various codes and related publications will also included.

4 PRINCIPLES OF HAND AND POWER TOOLS (3) CSU
Lab: 9 hours
This course focuses in the care, use, and operation of basic hand, machine and portable electric tools used in the utility, construction, and maintenance industries. Basic skills are taught by class projects in the shop and field experiences.

7 WEATHERIZATION - PRACTICAL ENERGY EFFICIENCY TECHNIQUES (3)
Lecture: 3 hours
This course provides expertise advice on various techniques that can be used to weatherize homes and other structures. The course is suitable for application by a professional home or energy inspector. Homeowners would also benefit from the knowledge and application of the simpler techniques. Efficiency techniques related to: Energy basics, sealing, insulating, window replacement/installation, environmental air, water, appliance energy efficiency, and lighting are just some of the areas that will be covered.
8 WEATHERIZATION - ENERGY EFFICIENCY PRACTICES (1)  
CSU  
Lab: 3 hours  
This course provides laboratory exercises to build skills necessary for the effective application of energy techniques that can be used to weatherize homes and other structures. Course is suitable for application by a professional weatherization contractor training entry level workers or a homeowner looking to improve their own home. Efficiency practices related to: Energy basics, sealing, insulating, window replacement/installation, environmental air, water, appliance energy efficiency, and lighting are just some of the areas that will be covered.

9 ENERGY AUDITOR - RESIDENTIAL (3)  
CSU  
Lecture: 3 hours  
A course focusing on residential energy requirements, loss and efficiency. How energy is used and lost will be discussed, along with the testing techniques and approaches to measure the amount of energy lost. Students will learn the components of an energy audit report and complete necessary forms.

10 ENERGY AND UTILITY INDUSTRY CAREERS (3)  
Lecture: 3 hours  
This course reviews high demand jobs in the energy and utility industry and assists students in deciding on an appropriate career path. Hiring process and interview skills will be explored and fitness for duty and other physical and physiological characteristics will be discussed. An A to Z guide to private, State, Federal, and international career opportunities will be presented.

11 CADD FOR SUSTAINABLE LANDSCAPE DESIGN (3)  
Lecture: 3 hours  
Computer Aided Design/Drafting (CADD) applications specific to landscape professionals. Includes introduction to CADD skills, block functions, internet applications, three-dimensional design, presentation drawings, building systems, working drawings, and working drawing coordination.

12 ENERGY AUDITOR - RESIDENTIAL PRACTICES (1)  
Lab: 3 hours  
A course focusing on the practical application of residential energy requirements, loss and efficiency. Testing techniques and measurement of energy losses. Students will perform actual energy audits of simulated structures and complete necessary forms.

101 CONTRACT LICENSE LAW (3)  
CSU  
Lecture: 3 hours  
Contractor’s License Law is designed to prepare personnel in the construction industry on the California Law requirements for attaining a California State Contractor’s License. Topics covered are License Law, Mechanic’s Lien Law, Employment Regulations, Worker’s Compensation, Safety in Employment and Business Management.

135 INTRODUCTION TO HISTORIC PRESERVATION (3)  
CSU  
Lecture: 3 hours  
Introduction to the field of cultural resource management, providing an overview to the conservation of and advocacy for historic buildings, sites, districts and landscapes.

921 COOPERATIVE EDUCATION – RESIDENTIAL PRACTICE (2)  
CSU  
Lecture: 2 hours  
This is an individually tailored course that will develop a portfolio documenting several specific educational goals developed by the student, instructor and employer. The instruction will be accomplished on the job with activities undertaken by the student and supervised and evaluated by the employer and instructor of record.
32 BUSINESS COMMUNICATIONS (3) CSU  
Lecture: 2 hours; Lab: 2 hours  
This is a course designed to achieve the following: effective written communication in English for the transaction of business; development of letter writing principles and techniques; enrichment of general vocabulary. Practical experience is given in writing the basic types of letters used in business: order, complaint, adjustment, sales collection, and application. (Same as CAOT 32.)

33 TECHNICAL REPORT WRITING (3) CSU  
Lecture: 3 hours  
The written report as used in business, industry, and the technical profession is studied. Practice is given in organizing and presenting factual material with clarity, definiteness, and conciseness. The content of the course will be adapted to the business and professional needs of the student. (Same as English 129.)

34 LEGAL OFFICE PROCEDURES  
Lecture: 2 hours  
This course is designed to prepare students for employment as an entry-level law office clerk. It emphasizes law office procedures, preparation and maintenance of case calendars, and the preparation and maintenance of case files. Students will learn how to document phone calls, keep accurate correspondence files, organize case files, and perform other clerical duties relevant to a law office.

35 SPANISH LEGAL OFFICE TERMINOLOGY  
Lecture: 2 hours  
This course is designed to provide Spanish legal terminology for legal professionals, paraprofessionals, and law office support staff whose offices serve Spanish-speaking clients. Both civil and criminal legal terminology will be covered in this course. This course is suitable for both fluent and non-fluent speakers of Spanish.

37 BUSINESS COMPUTATIONS LAB (1)  
Lab: 2 hours  
A lab class which provides opportunity for students enrolled in Business Computations to solve problems directly related to business applications.

38 BUSINESS COMPUTATIONS (3) CSU  
Lecture: 3 hours  
The principles of mathematics are reviewed and applied to typical accounting, financial, and general business problems, including the following: Bank services including checking account and credit card account activity, payroll calculations, cash and trade discounts, merchandise mark-up and inventory valuation, simple and compound interest, annuities, stock and bond transactions, business and consumer loans, taxes and insurance, depreciation, financial statements and ratios, and business statistics.

40 BUSINESS PROJECT MANAGEMENT (3) CSU  
Lecture: 2 hours; Lab: 2 hours  
Students will study all phases of project management and learn the tools for bringing in projects on time and within budget. Specific topics will include project life cycles, setting objectives, identifying activities and resources, work breakdown structure, workflow, network analysis, contingency planning, scheduling, budgeting, work-in-progress and reporting. Special emphasis will be placed on MS Project.

---

CABINETMAKING AND MILLWORK

ELECTIVES TO CARPENTRY PROGRAM

150 DESIGN AND CONSTRUCTION TECHNIQUES I (4)  
Lecture: 2 hours; Lab: 6 hours  
This course covers applied mathematics, introductory detailing, fundamental cabinet design standards, basic machine operations and cabinet assembly methods.

151 DESIGN AND CONSTRUCTION TECHNIQUES II (4)  
Lecture: 2 hours; Lab: 6 hours  
This course focuses on advanced detailing, advanced cabinet design standards, advanced machine operations and advanced cabinet assembly methods.

170 INTRODUCTION TO CNC WOODWORKING MACHINING CENTER (3) CSU  
Lecture: 1.5 hours; Lab: 4.5 hours  
This course presents an introduction to the use of a CNC Woodworking Machinary Station. Topics include safety, speeds, feeds, tooling, setups, and programming, which will include related attachments and accessories for the machining center.

200 FURNITURE DESIGN, HISTORY, AND CONSTRUCTION (4)  
Lecture: 3 hours; Lab: 3 hours  
This course provides an exploration of three-dimensional furniture design through the media of wood, metal, glass, plastic and casting resins. Basic drawing and planning skills, design skills, and advanced woodworking skills are covered. Students will create their own interpretations of traditional and contemporary furniture.

210 WOODWORKING LAB (2) CSU  
Lab: 6 hours  
This course is a review of skills needed in woodworking. Substantial time is devoted to the practical application of these skills. Students are allowed to design and construct projects of their own determination.

---

CARPENTRY

105 CALCULATIONS AND MEASUREMENT FOR WOODWORKING STUDENTS I (3) CSU  
Lecture: 3 hours  
This course reviews the fundamentals of arithmetic used in the construction trade. Topics are selected upon the basis of their application to the woodworking industry.

111 CONSTRUCTION I (7) CSU  
Lecture: 3 hours; Lab: 12 hours  
This course covers use and operation of hand tools, machine tools and portable electric tools commonly in use in construction. Fundamentals of residential foundation and wall construction, use of rough and finish hardware, glues and adhesives, federal, state and local building codes and safety ordinances are studied in this course.

**Los Angeles Trade-Technical College**

**2011-2012 General Catalog**
251 UNIFORM BUILDING CODE I (3) CSU RPT1
Lecture: 3 hours
This is an introductory course to uniform building codes. Instruction is given in parts such as administrative, definitions, requirements based on occupancy, location in fire zones and types of construction, engineering regulations and detailed regulations on excavations, veneer and roof construction.

252 UNIFORM BUILDING CODE II (3) CSU RPT1
Lecture: 3 hours
This course covers instruction on fire-resistive standards for fire protection, use of public streets and projections over public property regulations, plaster and wallboard, special subjects, legislative matters, photographic and X-ray film, patio covers, fall-out shelters and excavation and grading.

123 APPLIED CHEMISTRY MATHEMATICS II (2)
Lecture: 2 hours
This course covers further applications of mathematical techniques in chemical technology including techniques used in chemistry and physics. The emphasis is on programming in BASIC and includes further topics in units, concentration, graphs, equilibrium, thermodynamics, and oxidation-reduction.

131 INDUSTRIAL PROCESSES (3)
Lecture: 1 hour; Lab: 6 hours
Instruction is given in the fundamental theories of chemical and physical processes used in various manufacturing industries. Also, instruction is given in operation of equipment used in these physical and chemical processes.

132 QUANTITATIVE AND INSTRUMENTAL ANALYSIS I (5) CSU
Lecture: 3 hours; Lab: 6 hours
This course is devoted to a study of the chemical and instrumental methods of analysis involving the use of gravimetric, titrimetric and instrumental procedures.

133 ORGANIC CHEMISTRY I (4) CSU
Lecture: 2 hours; Lab: 6 hours
This course includes a systematic study of hydrocarbons, and oxygen containing compounds. Laboratory methods include identification of compounds, using various types of distillations, extractions, chromatography and spectral techniques.

140 LABORATORY TECHNIQUES IN MICROBIOLOGY I (1)
(Same as Microbiology 40.)
Lab: 3 hours
This course emphasizes the preparation of media and reagents normally used in bacteriological laboratory. Use and care of laboratory equipment and supplies are studied.

141 BASIC EMPLOYMENT INFORMATION (1)
Lecture: 1 hour
Instruction covers safety precautions, professional ethics, health habits, responsibilities to the customer and management, personal appearance, employment trends and professional organizations. The course also includes writing resources and cover letters, and job search techniques.

142 QUANTITATIVE AND INSTRUMENTAL ANALYSIS II (5)
Lecture: 3 hours; Lab: 6 hours
This course is an advanced continuation of Quantitative and Instrumental Analysis I.

143 ORGANIC CHEMISTRY II (4) CSU
Lecture: 2 hours; Lab: 6 hours
The course includes a study of hydrocarbons, oxygen, nitrogen and sulfur containing compounds, organometallic compounds, natural products and synthetic polymers. Laboratory studies include synthesis and purification of organic compounds, qualitative and quantitative analysis using classical methods, chromatographic and spectral techniques.

161 SPECIAL PROJECTS I (1)
Lab: 3 hours
This is a course in which the student specializes in a particular laboratory instrument, device, or procedure.

162 SPECIAL PROJECTS II (2)
Lab: 6 hours
This is a course in which the student specializes in a particular laboratory instrument, device, or procedure.
**CHEMISTRY**

168 CHEMICAL QUALITY CONTROL I (2)
Lab: 6 hours
This course provides an introduction to quality control in industry, including applications in water analysis.

185 DIRECTED STUDY – CHEMICAL TECHNOLOGY (1)
Students will pursue directed study in chemical technology on a contract basis under the direction of a supervising instructor. A maximum of 1 unit may be taken for credit.

285 DIRECTED STUDY – CHEMICAL TECHNOLOGY (2)
Students will pursue directed study in chemical technology on a contract basis under the direction of a supervising instructor. A maximum of 2 units may be taken for credit.

385 DIRECTED STUDY – CHEMICAL TECHNOLOGY (3)
Students will pursue directed study in chemical technology on a contract basis under the direction of a supervising instructor. A maximum of 3 units may be taken for credit.

40 BASIC CHEMISTRY (3) CSU
Recommended Preparation: Math 115 or 114 with a grade of “C” or better.
Lecture: 3 hours
This course is an elementary survey of chemical science and its relationship to other chemical sciences, leading the student to a better understanding of his/her environment. The student is introduced to the language of chemistry, chemical families, methods of chemistry, scientific reasoning and uses of chemistry in industry. This course meets the physical science requirements for those students following a curriculum not requiring laboratory work. Limits to transfer credit.

51 FUNDAMENTALS OF CHEMISTRY (5) UC:CSU
Prerequisite: Math 115 or Math 113 and 114 with a grade of “C” or better.
Lecture: 4 hours; Lab: 3 hours
This course with laboratory emphasizes the principles of inorganic chemistry and introduces elementary organic and biological chemistry. It is planned primarily for health science majors, as a preparatory course for higher-level chemistry courses, and for non-science majors requiring a one-semester course with laboratory. This course can be used for high school credit.

65 INTRODUCTORY GENERAL CHEMISTRY (4) UC:CSU
Prerequisite: Math 115 or Math 114 with a grade of “C” or better.
Lecture: 3 hours; Lab: 3 hours
This course with laboratory presents the principles of inorganic chemistry. It primarily designed as a preparatory course for higher-level chemistry courses. This course can be used for high school credit.

70 INTRODUCTORY ORGANIC AND BIOCHEMISTRY (4) UC:CSU
Prerequisite: Chemistry 51 or 65 or 101 with a grade of “C” or better.
Lecture: 3 hours; Lab: 3 hours
This is an introductory course in organic and biochemistry. It fulfills the undergraduate requirement for organic chemistry required for Home Economics and Nursing majors.

101 GENERAL CHEMISTRY I (5) UC:CSU (CAN CHEM 2)
(CAN CHEM SEQ A, WHEN TAKEN WITH CHEM 102)
Prerequisite: Math 125
Lecture: 3 hours; Lab: 6 hours
Fundamental principles of chemistry, including modern atomic structure, chemical bonding, stoichiometry, gases, solids, liquids, descriptive inorganic chemistry, and a brief introduction to equilibrium and electrochemistry. The laboratory emphasizes the quantitative aspects of chemistry and instrumentation. This course is planned primarily for science, engineering and pre-medical majors.

102 GENERAL CHEMISTRY II (5) UC:CSU
Prerequisite: Chemistry 101 and Math 125 with a grade of “C” or better.
Lecture: 3 hours; Lab: 6 hours
This course provides a detailed study of chemical equilibrium with qualitative inorganic analysis as part of the laboratory. Special topics including chemical thermodynamics, chemical kinetics, coordination chemistry, organic and biological chemistry with environmental emphasis, nuclear chemistry. Inorganic preparations are part of the laboratory.

211 ORGANIC CHEMISTRY I FOR SCIENCE MAJORS (5) UC:CSU
Prerequisite: Chem 102 with a grade of “C” or better.
Lecture: 3 hours; Lab: 6 hours
This class covers the organization of classes of organic compounds, factors involved in classification, characteristic reactions of functional groups and subgroups, the application of physical and chemical methods of characterizing organic compounds. A mechanistic approach to reactions and a focus on multi-step synthesis will be emphasized throughout the course.

211H ORGANIC CHEMISTRY I FOR SCIENCE MAJORS - HONORS (5) UC:CSU
Structure, dynamics, equilibrium and nomenclature of organic compounds including conformational analysis, potential energy plots, hybridization, reaction mechanisms and molecular modeling. Students employ modern synthetic, chromatographic and spectroscopic techniques including infrared spectroscopy and gas chromatography. Guest speakers enhance the topics covered in class. This course is part of the transfer sequence for careers in the physical, biological, and health sciences and a requirement for the Associate of Sciences degree in Chemistry. Honors students will be assigned extensive reading and research assignments beyond the regular chemistry 211 course.

212 ORGANIC CHEMISTRY II FOR SCIENCE MAJORS (5) UC:CSU
Prerequisite: Chem 211 with a grade of “C” or better.
Lecture: 3 hours; Lab: 6 hours
This course completes the study begun in Chemistry 211, including a focus on the organic functional groups of aldehydes, ketones carboxylic acids and amines. Specialized topics including the following: amino acids and peptides, difunctional compounds, polycyclic benzenoid hydrocarbons, heterocyclic compounds, the organic chemistry of silicon, and strategies in modern organic synthesis are also covered. A mechanistic approach to reactions and a focus on multistep synthesis is emphasized throughout the course.

221 BIOCHEMISTRY FOR SCIENCE MAJORS I (5) UC:CSU
Prerequisite: Chem 211 with a grade of “C” or better.
Lecture: 3 hours; Lab: 6 hours
This course is part of the transfer sequence for majors in the physical, biological and health science requirement for the AS degree in chemistry or biology. This course introduces the structure and thermodynamics of the metabolism. Laboratory experiments show modern techniques of purification, structure determination and function characterization, including chromatography, electrophoresis, spectroscopy, molecular models and molecular modeling.
**CHILD DEVELOPMENT**

1 **CHILD GROWTH AND DEVELOPMENT (3) UC:CSU**  
Advisory: English 28  
Lecture: 3 hours  
This course examines the major physical, psychosocial, and cognitive/  
language developmental milestones for children, both typical and atypical,  
from conception through adolescence. There will be an emphasis  
on interactions between maturational processes and environmental  
Factors. While studying developmental theory and investigative research  
methodologies, students will observe children, evaluate individual  
differences and analyze characteristics of development at various stages.

2 **EARLY CHILDHOOD: PRINCIPLES AND PRACTICES (3) CSU**  
Prerequisite: CD 1 with a grade of “C” or better.  
TB clearance required  
Lecture: 3 hours  
An examination of the underlying theoretical principles of developmentally  
appropriate practices applied to programs, environments, emphasizing  
the key role of relationships, constructive adult-child interactions, and  
Teaching strategies in supporting physical, social, creative and intellectual  
development for all children. This course includes a review of the historical  
roots of early childhood programs and the evolution of the professional  
practices promoting advocacy, ethics and professional identity.

3 **CREATIVE EXPERIENCES FOR CHILDREN I (3) CSU**  
Prerequisite: CD 2 with a grade of “C” or better.  
Lecture: 3 hours  
A study of developmentally appropriate curriculum for young children.  
Course emphasis on promoting a creative environment that fosters  
children’s physical, cognitive, and socio-emotional development, and  
provides basic principles of lesson planning. Creative activities in art & craft,  
play & drama, puppetry, blocks, music & movement are introduced.

7 **INTRODUCTION TO CURRICULUM IN EARLY CHILDHOOD EDUCATION (3) CSU**  
Prerequisite: CD 1 and 2 with a grade of “C” or better.  
Lecture: 3 hours  
This course provides an introductory curriculum overview that enables  
students to provide both appropriate curriculum and environment for  
young children from birth to age 8. Students will examine a teacher’s role  
in supporting development and fostering the joy of learning for all young  
children using observational and assessment strategies that emphasize the  
essential role of play. Curriculum planning, implementation and evaluation  
will include but not be limited to the following areas: language and literacy,  
social and emotional learning, sensory learning, art and creativity, math,  
natural and physical sciences.

10 **CHILD HEALTH, SAFETY AND NUTRITION (3) CSU**  
Advisory: Eng 21  
Lecture: 3 hours  
This course introduces the laws, regulations, standards, policies and  
procedures and early childhood curriculum related to child health, safety,  
and nutrition. The key components that ensure physical health, mental  
health and safety for both children and staff will be identified along with  
the importance of collaboration with families and health professionals. This  
course also focuses on integrating the concepts into everyday planning and  
program development for all children. Students are required to participate in  
and pass the American Red Cross infant/child CPR and first aid course.

11 **HOME, SCHOOL AND COMMUNITY RELATIONS (3) CSU**  
Advisory: Eng 21  
Lecture: 3 hours  
An examination of the developing child in a societal context focusing on the  
teacher-child relationship. Focuses on the interrelationship of family, school and community and emphasizes historical  
and socio-cultural factors. The processes of socialization and identity  
development will be highlighted, showing the importance of respectful,  
reciprocal relationships that support and empower families.

22 **PRACTICUM IN CHILD DEVELOPMENT I (4) CSU**  
Prerequisite: Child Development 3 and 4 with grade of “C” or better.  
TB clearance required and approval of coordinator of fieldwork.  
Lecture: 2 hours; Lab: 6 hours  
This course provides a supervised practicum experience in a school setting.  
Developmentally appropriate early childhood teaching competencies are  
emphasized through the practical applications of child development theories  
and teaching techniques. Under guided supervision, students will develop  
professional behaviors and build a comprehensive understanding of children  
and families, child centered, play-oriented approaches to teaching, learning,  
and assessment. Curriculum content areas will focus on design, implement,  
and evaluate experiences that promote positive development and learning  
for all young children.

23 **PRACTICUM IN CHILD DEVELOPMENT II (4) CSU**  
Prerequisite: Child Development 22 with a grade of “C” or better.  
TB clearance required and approval of coordinator of fieldwork.  
Lecture: 2 hours; Lab: 6 hours  
This course provides a supervised practicum experience in a school setting.  
Practical applications of child development theories and teaching techniques  
are emphasized. An in-depth discussion of curriculum strategies for  
developmentally appropriate curriculum will be provided.

30 **INFANT AND TODDLER STUDIES I (3) CSU**  
Prerequisite: CD 1 with a grade of “C” or better.  
TB clearance required  
Lecture: 3 hours  
A survey of infant/toddler development and educational programs currently  
available. Provides an overview of major theories, principles of care giving,  
environment design and observation opportunities. Satisfies Title 22  
requirements for Infant Child Care Teachers.
31 INFANT AND TODDLER STUDIES II (3) CSU
Prerequisite: CD 30 with a grade of “C” or better.
TB clearance required
Lecture: 3 hours
This course focuses on group care for infants and toddlers, including
regulations, the role of the caregiver, the environment, positive relationships
and appropriate experiences. Home visits, assessments, intervention
and inclusion skills will be developed. Curriculum development and direct
observation in an infant/toddler program are requirements.

34 OBSERVING AND RECORDING CHILDREN’S BEHAVIOR
(3) CSU
Prerequisite: CD 1 with a grade of “C” or better. TB Clearance required
Lecture: 3 hours
This course focuses on the appropriate use of assessment and observation
strategies to document development, growth, play and learning to join
with families and professionals in promoting children’s success. Recording
strategies, rating systems, portfolios, and multiple assessment tools are
explored.

38 ADMINISTRATION AND SUPERVISION OF EARLY
CHILDHOOD PROGRAMS I (3) CSU
Prerequisite: CD 2, 10, & 11 with a grade of “C” or better.
Lecture: 3 hours
This course examines administrative principles and practices for early
childhood programs. Topics covered include: licensing regulations,
leadership skills, budget preparation and analysis, personnel management,
parent involvement programs and community resources. Professionalism
and quality standards are emphasized. The course partially fulfills licensing
requirement for the director.

39 ADMINISTRATION AND SUPERVISION OF EARLY
CHILDHOOD PROGRAMS II (3) CSU
Prerequisite: CD 38 with a grade of “C” or better.
Lecture: 3 hours
This course provides training for the owner/operator of an early childhood
ing program. Administrative principles and practices are studied.
Areas studies include organization, budgeting, personnel practices,
reporting and maintaining of records; interrelationships of community
resources, regulatory agencies and parents.

42 THE CHILD IN A DIVERSE SOCIETY (3) CSU
Co-requisite: CD 11 with a grade of “C” or better.
Lecture: 3 hours
Examination of the development of social identities in diverse societies
including theoretical and practical implications of oppression and privilege as
they apply to young children, families, programs, classrooms and teaching.
Various classroom strategies will be explored emphasizing culturally and
linguistically appropriate anti-bias approaches supporting all children in
becoming competent members of a diverse society. Course includes self-
examination and reflection on issues related to social identity, stereotypes
and bias, social and educational access, media and schooling.

44 EARLY INTERVENTION FOR CHILDREN WITH SPECIAL
NEEDS (3) CSU
Prerequisite: CD 1 with a grade of “C” or better.
TB Clearance required.
This course is designed for students interested in specializing in or working
with young children with special needs and their families. Instruction focuses
on accommodating and adapting the physical environment, instructional
strategies and curriculum to meet the needs of differently able children from
birth through preschool.

45 PROGRAMS FOR CHILDREN WITH SPECIAL NEEDS II
(3) CSU
Prerequisite: CD 1 with a grade of “C” or better.
This course is designed for students interested in working with children
with special needs from preschool to school age. It will include a study of
various programs for children with disabilities from a child development
perspectives. It comprises of definitions, characteristics, legislation and
educational implications.

46 SCHOOL AGE PROGRAMS I (3) CSU
Prerequisite: CD 1 with a grade of “C” or better.
Lecture: 3 hours
The student will be introduced to the care of school age children. This
course is designed for those currently working, or planning to work in
before and after school child care. Students will develop age-appropriate
curriculum, learn how to support the family and make use of community
resources.

47 SCHOOL AGE PROGRAMS II (3) CSU
Prerequisite: CD 46 with a grade of “C” or better.
Lecture: 3 hours
Introduction to before and after school age programs. Topics covered are
guidance of child behavior, the child in context of the family, community and
administration of programs. Hiring and supervision of staff, working with
parents and marketing and advertising the school age program will be also
covered.

57 CHILDREN ETHNIC IDENTITY DEVELOPMENT AND
AWARENESS (3) CSU
Prerequisite: CD 42 with a grade of “C” or better.
Lecture: 3 hours
This course explores children’s ethnic identity developmental process and
their awareness of identity issues. Students will examine ethnic identity
developmental stages, the impact of culture, ethnic traditions, values and
beliefs on children, and the challenges of identity formation process that
children encounter within multiple social and cultural contexts. Culturally
sensitive assessment methods and intervention programs to support
families from diverse backgrounds will also be discussed.

65 ADULT SUPERVISION/EARLY CHILDHOOD MENTORING
(2)
Prerequisite: Child Development 23 or 39 with a grade of “C” or better.
Lecture: 2 hours
This course is a study of the methods and principles of supervising teachers
and student teachers in early childhood classrooms. Emphasis is on role of
experienced early childhood teachers who function as mentors to teachers
while addressing needs of children, parents, and other staff.

COMMUNITY PLANNING
AND ECONOMIC DEVELOPMENT

1 INTRODUCTION TO COMMUNITY ECONOMIC
DEVELOPMENT (3) CSU
Lecture: 3 hours
Introduction to the theory, history, and practice of community development
as an anti-poverty strategy. The course covers neighborhood development
strategies; land-use and real estate development; and business and labor
force development strategies to revitalize low-income neighborhoods. The
course is also offered as three modules that run concurrently with the full
course. Students who prefer to take only one or two modules must enroll
separately in each of the desired section(s) as follow.

1A NEIGHBORHOOD DEVELOPMENT STRATEGIES (1) CSU
Lecture: 1 hour
This module introduces students to six major community development
methods: real estate, business development, capital formation, import
substitution, labor force development, and comprehensive community
strategies.
1B LAND-USE AND REAL ESTATE DEVELOPMENT (1) CSU
Lecture: 1 hour
This module exposes students to zoning, land planning, and the fundamentals of housing, commercial, and industrial development.

1C BUSINESS AND LABOR FORCE DEVELOPMENT (1) CSU
Lecture: 1 hour
This module compares traditional and contemporary approaches to strengthening the business environment and to creating jobs for low income populations.

2 INTRODUCTION TO COMMUNITY ORGANIZING (3) CSU
Lecture: 3 hours
This course focuses on community organizing — effort by people working together to improve their neighborhoods and cities. The course helps prepare you to become professional organizers, community developers, and effective citizen leaders. It explores the history, theory, and different approaches to grassroots organizing. This course is offered as three modules that run concurrently with the full course. Students who prefer to take only one or two of these modules must enroll separately in each of the desired sections as follows.

3 INTRODUCTION TO AFFORDABLE HOUSING DEVELOPMENT (3) CSU
Lecture: 3 hours
Students will become familiar with affordable housing policies, dilemmas, products, and strategies. Students will also develop a working knowledge of the housing development process, including pre-development and land acquisition phase, housing financing, design/constructions, and to property management issues.

4 SCHOOL BASED COMMUNITY DEVELOPMENT APPROACHES (3) CSU
Lecture: 3 hours
This course focuses on critical community development issues in school reform in Los Angeles. The goal is to facilitate the student’s understanding of the relationship between school outcomes and community self-sufficiency. The course is organized to draw on the student’s own experiences, cutting edge policy research, and best practices in school reform organizing.

5 MANAGING NON-PROFIT ORGANIZATIONS (3) CSU
Lecture: 3 hours
This course deals with the organizational opportunities and challenges facing directors and managers of public and non-profit agencies and organizations. Students will learn organizational development, financial management and proposal writing, and diversity strategies in management and outreach.

6 POPULAR EDUCATION AND ORGANIZING (3) CSU
Lecture: 3 hours
This course deals with citizen education through service-based organizations and in community organizing. The topics covered in the course are: an examination of current context for service and organizing work in L.A.; a review of current teaching methods and materials used in popular education projects, and development of participatory teaching methods and client generated materials.

7 COMMERCIAL REAL ESTATE DEVELOPMENT (3) CSU
Lecture: 3 hours
The course teaches the fundamentals of inner city retail and commercial development. Among the competencies learned are: commercial prototypes, retail market analysis, site and financial feasibility, financing, tenant improvements, operating and managing retail centers.

10 COMPREHENSIVE COMMUNITY VIOLENCE PREVENTION STRATEGIES (3) CSU
Lecture: 3 hours
The course prepares students for work in the field of community violence prevention. Students will learn to analyze root causes of youth and community violence and will become familiar with a variety of community development strategies to reverse those conditions. The course will also cover strategies for building community collaborations to engage youth, parents, community organizations, public sector agencies, schools, law enforcement agencies, and businesses in a comprehensive effort to prevent youth and community violence.

11 PROFESSIONAL DEVELOPMENT SKILLS AND ISSUES IN COMMUNITY DEVELOPMENT (3) CSU
Lecture: 3 hours
Students will learn to identify and understand a variety of personal and professional management strategies used by professionals in community development corporations, community-organizing networks, community-based organizations, and other non-profit sector organizations. Students will work with faculty to assess their current skills and capacities and to develop a personal and professional development plan to prepare for work as community development professionals.

12 FUNDRAISING BASICS FOR NONPROFIT ORGANIZATIONS (1) CSU
Lecture: 1 hour
This course provides students with a basic understanding of fund development concepts applied to Non-profit organizations. Students will become familiar with the language of fund raising, understand the differences between public and private sector funding. In addition students will learn how to put together proposal plans and learn about approaches that can help organizations achieve their revenue goals.

15 INTRODUCTION TO THE COMMUNITY DEVELOPMENT INDUSTRY AND CAREERS (1) CSU
Lecture: 3 hours
Students are introduced to the community and economic development industry, baseline skills required, positions and a basic terminology for the purpose of exploring both a professional and/or academic careers in the field.

17 LEADERSHIP DEVELOPMENT AND SKILL BUILDING (3) CSU
Lecture: 3 hours
The course will teach students to define leadership and examine leadership approaches in which all members of society play pivotal roles in improving the quality of life in low-income Communities. Students will demonstrate multicultural appreciation and have the confidence to see themselves as community change agents.

18 CAREER AND EDUCATION EXPLORATION (3) CSU
Lecture: 3 hours
The course will teach students to define leadership and examine leadership approaches in which all members of society play pivotal roles in improving the quality of life in low-income communities. Students will demonstrate multicultural appreciation and have the confidence to see themselves as community change agents.

22 STRATEGIC MEDIA AND COMMUNICATIONS FOR ORGANIZING (1) CSU
Lecture: 1 hour
This course will help students to become familiar with the current theories and methods used to devise a media campaign to advance a specific agenda and/or redefine the parameters of an issue in the market place of public opinion.
30 MARKET RESEARCH TOOLS FOR THE ECONOMIC DEVELOPMENT (3)
Lecture: 3 hours
This course is specifically designed for professionals in community economic development organizations who provide technical assistance to small businesses. This hands-on course will provide professionals with the tools needed to assess client needs and develop and implement effective market research and marketing plans for small businesses.

32 COMMUNITY BUILDING PRINCIPLES AND STRATEGIES (1)
Lecture: 1 hour
This course provides students with a basic understanding of community building principles, strategies and tools for community and economic development. The course is taught in a training/workshop format where students work in small groups to apply classroom lessons to the development of community building processes, addressing key neighborhood issues.

35 HEALTH LEADERSHIP AND COMMUNITY DEVELOPMENT (3)
Lecture: 3 hours
This course provides students with a basic understanding of community disparities and conditions affecting low-income, inner-city neighborhoods and the leadership skills and strategies required to improve them. Students are exposed to different types of community development strategies that incorporate policy development, community organizing and education to change the quality of health services, and resources, directed to low-income communities.

36 INTRODUCTION TO APPLIED COMMUNITY DEVELOPMENT RESEARCH (3)
Lecture: 3 hours
This course provides students with a basic understanding of community-based research principles, tools and strategies. The course is taught in a training/workshop format where students will work in small groups to apply classroom lessons to investigate local community issues, such as transportation, environment and economic health. Topics covered include participatory action research theory and methodology, history of Los Angeles, mobility issues in urban settings, sources and impacts of pollution and income and wealth inequality.

37 LEADERSHIP DEVELOPMENT: EFFECTIVE STRATEGIES FOR BUILDING THE CAPACITY OF INDIVIDUALS (1) CSU
Lecture: 1 hour
This course is intended for those individuals that want to improve their leadership skills as well as work to build the leadership skills of residents in low-income communities. The course explores different philosophies and approaches to leadership development, roles, responsibilities and application. Students will also learn how to build a base of community leaders using the recruitment, training and retention strategies developed in the course.

38 DEVELOPING SOCIAL NETWORKS FOR COMMUNITY BUILDING (1)
Lecture: 1 hour
The course examines the value of developing social networks in the process of community building. The course examines strategies for collaboration, collective problem solving, identification of neighborhood assets and developing support mechanisms across sectors of development.

39 PREVENTION WORKS: A COST-BENEFIT ANALYSIS TOOL TO IMPROVE COMMUNITIES (1) CSU
Lecture: 1 hour
This course is designed for professionals in community-based organizations. Course will provide students with the tools necessary to frame the debate around resource allocation and help answer a fundamental policy question: what programs or services yield the greatest health benefits? Students in this course will use the cost-benefit analysis tool to evaluate health and personal lifestyle choices, crime prevention, education and job training, and disaster preparedness.

40 NON-PROFIT PROGRAM DESIGN AND DEVELOPMENT (2)
Lecture: 2 hours
This course guides students to design a program and services that are highly integrated with an organization’s mission, vision and values. Topics included program goals, outcomes, strategies, and objectives. Students will also learn about service delivery, work plan creation, timeline and the similarities of program development with a business plan.

41 TIME MANAGEMENT SKILLS FOR COMMUNITY DEVELOPMENT SPECIALISTS (1)
Lecture: 1 hour
This course teaches participants to set priorities as the first step in learning how to manage time effectively. In addition, participants learn techniques to create a more efficient workplace, including developing strategies for skill improvement with respect to scheduling, analyzing, planning, avoiding procrastination, and handling interruptions.

42 EVALUATING COMMUNITY BASED PROGRAMS (1)
Lecture: 1 hour
This course provides students with a basic understanding of the principles and purpose of evaluation in community based organizations. This course is taught in a lecture format that infuses real world examples with group work where students will learn about evaluation methods, database management and practical application.

50 PRACTICAL MULTI-FAMILY/APARTMENT MANAGEMENT (3) CSU
Lecture: 3 hours
This course will provide students with an understanding of the necessary legal and practical aspects of apartment management, primarily focusing on building with 8+ units.

52 FAIR HOUSING AND FAIR LENDING (3) CSU
Lecture: 3 hours
This course covers the history of discrimination, along with federal and state regulations as they pertain to correcting discriminatory lending practices. Students will learn about regulatory agencies and their oversight of financial institutions. (This course is identical to Mortgage Finance 52. Students must complete a petition to officially substitute Mortgage Finance 52 with Community Planning 52 as part of their fulfillment of the requirements for a Certificate of Achievement and Associate in Arts degree in Mortgage Finance.)

61 EMERGENCY PREPAREDNESS AND DISASTER MANAGEMENT (3) CSU
Lecture: 3 hours
This course will prepare students to effectively create an emergency preparedness plan in the wake of a natural disaster. Students will analyze current disaster management plans and evaluate previous disaster responses. Topics include, planning, preparing, recovering after a disaster, locating existing resources for disaster relief and emergency preparedness, and dealing with trauma after a disaster.
65 COMMUNITY-BASED HEALTH POLICY ADVOCACY (3)
Lecture: 3 hours
The course examines the history and results of grassroots health policy campaign efforts that have successfully shifted public consciousness about serious public health issues; how social movements develop and advance. Students will gain understanding about the importance and limits of public participation in policy development and implementation.

70 INTRODUCTION TO SMALL PROJECT REAL ESTATE (3)
Lecture: 3 hours
Students learn how to develop a small-scale residential or mixed-use project (250 to 10,000 square feet). Topics include how to assemble a project team; roles and responsibilities of the owner, architect, engineer, contractor, attorney, and lender; the RFQ and RFP process; hard and soft development costs; an overview of project phases, including planning, preconstruction, and construction budgets; scheduling and the critical path; an overview of municipal agency requirements, including filing permits and the certificate of occupancy; and required insurances. Project based case study method is used. The course will focus on site selection, project finance, design management, construction issues and relevant community development issues of a project.

71 GREEN BUILDING BASICS FOR DEVELOPERS (2) CSU
Lecture: 2 hours
Green Building Basics for Developers is a non-technical course introducing community development practitioners, small contractors and individuals to the laws, strategies, practices, pros and cons of developing environmentally healthy buildings and projects. Students will learn the basics to plan, develop and guide a sustainable project, and the appropriate delivery system for green building. In order to remain competitive, developers and small businesses must understand the laws, requirements and opportunities related to the new green economy.

72 INTRODUCTION TO LOW INCOME HOUSING TAX CREDIT FINANCE (3)
Lecture: 3 hours
This course covers all basic information and the latest developments in the low income housing tax credit program: how the program operates; role of state housing credit agencies; the amount of tax credits and how they provide dollars for housing; raising investment equity through syndication; developers and investors; structuring the ownership of a tax credit project; non-profits, housing authorities, and government agencies as developers; the types of tax credit.

200 STRATEGIC PLANNING AND MANAGEMENT TRAINING FOR ECONOMIC DEVELOPMENT EXECUTIVES (3)
Lecture: 3 hours
This is a hands-on course for executives of community economic development organizations who want to learn the fundamentals of strategic business planning, practice their new tools and develop documents for their own organizations. The content of this course is geared towards individuals with 2-3 years of professional experience and whose organizations provide assistance to small businesses.

201 FINANCIAL MANAGEMENT ASSISTANCE FOR SMALL BUSINESSES: FOR ECONOMIC DEVELOPMENT PROFESSIONALS (3)
Lecture: 3 hours
This course focuses on developing the knowledge and capacity of individuals working in the community development and small business assistance industry. The course will provide the tools and information necessary to improve the opportunities for small business and community development organizations the ability to be successful, sustainable, apply a business framework with clear benchmarks and outcomes.

202 EFFECTIVE HUMAN RESOURCES MANAGEMENT FOR SMALL BUSINESS ASSISTANCE PROVIDERS (3)
Lecture: 3 hours
This course offers executive directors of community economic development organizations the opportunity to learn the fundamentals of strategic human resources management for non-profit organizations. This is a hands-on course in which students get the opportunity and guidance needed to formulate strategies and create specific plans for their own organizations. The content of this course is geared toward individuals with 2-3 years of professional experience and whose organizations provide assistance to small businesses and non-profit organizations.

203 MARKETING AND COMMUNICATIONS PLANNING FOR BUSINESS DEVELOPMENT ORGANIZATIONS (3)
Lecture: 3 hours
This course offers executive directors at community economic development organizations the opportunity to learn the fundamentals of strategic marketing and communications for non-profit organizations. This is a hands-on course in which students get the opportunity and guidance needed to formulate strategies and create specific plans for their own organizations. The content of this course is geared toward individuals with 2-3 years of professional experience and whose organizations provide assistance to small businesses.

COMPUTER APPLICATIONS AND OFFICE TECHNOLOGIES

1 COMPUTER KEYBOARDING I (3) CSU
Lecture: 2 hours; Lab: 3 hours
This is a beginning course designed to develop touch control of the keyboard and proper keyboarding techniques, using the microcomputer and printer, build basic speed and accuracy, and provide practice in applying these basic skills to the formatting of letters, tables, reports, and business forms using MS Word. The achievement of a speed of at least 30 words a minute for 5 minutes with no more than 5 errors is expected.

2 COMPUTER KEYBOARDING II (3) CSU
Lecture: 2 hours; Lab: 3 hours
This is an intermediate course designed to develop speed and accuracy and a review of computer keyboarding techniques. It also includes training in the production of letters, manuscripts, business forms, and legal documents using MS Word. An achievement of a speed of at least 40 words a minute for 5 minutes with no more than 5 errors is expected.

3 COMPUTER KEYBOARDING III (3) CSU
Lecture: 2 hours; Lab: 3 hours
This is an advanced course designed to develop speed and accuracy in computer keyboarding, to train in the handling of integrated office projects which includes: legal and medical documents; reports; insurance, banking, travel, government, energy and electronic forms; letters; and tables using MS Word. The achievement of a typing speed of at least 50 words a minute for 5 minutes with no more than 5 errors is expected.
4 COMPUTER KEYBOARDING IV (3) CSU
Lecture: 2 hours; Lab: 3 hours
This is an advanced course designed to develop high speed and accuracy, practice in planning and keyboarding advanced problems such as purchase orders, sales invoices, minutes, news releases, tables, form letters, travel expense reports, bar and line graphs, letter composition, outlines, legal documents, and business letters using MS Word. An achievement of a speed of at least 60 words a minute for 5 minutes with no more than 5 errors is expected.

7 MACHINE TRANSCRIPTION (3)
Lecture: 3 hours; Lab: 1 hour
This course provides an opportunity for students to develop skill in voice transcriptions, related English skills, and general office routines.

9 COMPUTER KEYBOARDING IMPROVEMENT (1) CSU RPT1
Lab: 3 hours
This course is designed to improve keyboarding skills for occupational and personal use. Timed writings, correctional drills, and visual aids will be used to develop speed and accuracy. Students will be required to appraise, diagnose, and select remedial exercises to improve their keyboarding skills.

15 SCRIPT SHORTHAND I (SPEEDWRITING) (3) CSU
Lecture: 3 hours
This is a beginning course in speedwriting. It is designed to broaden students' shorthand vocabulary, to build shorthand speed, to increase their ability to transcribe accurately and quickly, and to expand students' knowledge of business practices and terminology.

20 MEDICAL ASSISTANT OFFICE PROCEDURES (5)
Lecture: 5 hours
This course focuses on medical office procedures: proficiency in typing medical correspondence, case histories, insurance forms, and reports. Telephone techniques, medical records keeping, filing, and other office skills are some of the topics covered in this course.

30 OFFICE PROCEDURES (3) CSU
Lecture: 2 hours; Lab: 2 hours
The student is instructed in the development of attitudes and personality traits essential to successful office work. Training is received in office organization, duties of office workers, office problems and their solutions, receptionist and telephone techniques, processing written communication, administrative responsibility, and professional growth.

31 BUSINESS ENGLISH (3) CSU
Lecture: 3 hours
This course offers thorough training in the mechanics of English: spelling, grammar, punctuation, sentence structure, and word usage. It develops business vocabulary as well as the English skills necessary for business situations.

32 OFFICE ADMINISTRATION (3)
Lecture: 3 hours
This is a course designed to achieve the following: effective written communication in English for the transaction of business: development of letter writing principles and techniques; enrichment of general vocabulary; practical experience is given in writing the basic types of letters used in business: order, complaint, adjustment, sales collection, and application.

33 RECORDS MANAGEMENT AND FILING (2)
Lecture: 1 hour; Lab: 2 hours
This course discusses the importance of records management in an office. Indexing and filing rules are presented and applied to card and correspondence filing, using alphabetic, numeric, and subject filing systems.

34 BUSINESS VOCABULARY AND SPELLING (2)
Lecture: 2 hours
This course emphasizes improvement in spelling proficiency through the study of basic rules, as well as exercises in irregularly spelled words. Vocabulary is built by study of roots, prefixes, suffixes, synonyms, antonyms, homonyms, and words often confused.

44 MEDICAL TERMINOLOGY (3)
Lecture: 3 hours
The student develops a comprehensive medical vocabulary applicable to all specialties of medicine through the learning of Greek and Latin prefixes, word roots, etc. A basic understanding of anatomy and physiology is provided. Training in the spelling, pronunciation and definition of medical terms is given as well as training in the use of a medical dictionary.

46 MEDICAL TRANSCRIPTION (3)
Lecture: 2 hours; Lab: 2 hours
This course develops skill in correct transcription procedures and in transcribing medical materials. Production typing of recorded material stressing terminology from medical reports, diagnoses, case histories, is included. Correct spelling of medical terms is stressed.

47 APPLIED OFFICE PRACTICE (2) RPT3
Lab: 5 hours
This course reinforces office administration classroom knowledge by enabling students to develop practical office skills by working in an office on campus for five hours a week. Special attention is given to developing the personal/business qualities desirable in the office.

64 COMPUTER AND OFFICE TECHNOLOGY LAB (1) RPT3
Lab: 2 hours
Lab class which provides opportunity for students enrolled in Office Administration classes to use a variety of software.

76 KEYBOARDING ON MICROCOMPUTERS (1) RPT2
Lab: 2 hours
Develops fundamental keyboarding skills necessary to input information on the computer terminal efficiently and accurately. This course is designed to meet the needs of data processing students and other individuals interested in developing computer keyboarding skills.

82 MICROCOMPUTER SOFTWARE SURVEY IN THE OFFICE (3) CSU RPT2
Lecture: 1 hour; Lab: 4 hours
Introduction to office information systems and computer literacy by incorporating group discussions, research, and hands-on experience in a variety of windows applications. Software includes word processing, spreadsheets, databases, communications, graphics, desktop publishing, Operating Systems, scheduling, and the Internet.

84 MICROCOMPUTER APPLICATIONS: WORD PROCESSING (3) CSU RPT2
Lecture: 1 hour; Lab: 4 hours
This comprehensive course using Word 2007 develops skills in creating professional documents with emphasis on planning and creating, editing, formatting, desktop publishing, form letters and mailing labels, styles, outlines, hyperlinks, e-mail, advanced table techniques, integration with other programs and the World Wide Web, and customizing and automating tasks.
85 MICROCOMPUTER OFFICE APPLICATIONS: SPREADSHEET (3) CSU RPT2
Lecture: 1 hour; Lab: 4 hours
This comprehensive course using Excel 2007 develops skill in creating and updating databases with emphasis on design, creating, and updating tables, reports, custom forms with OLE fields, hyperlinks, sub-forms, queries, validation rules, application systems using macros, wizards, and the switchboard manager, data access pages, and integrating Excel worksheet with Access tables.

86 MICROCOMPUTER OFFICE APPLICATIONS: DATABASE (3) CSU RPT2
Lecture: 1 hour; Lab: 4 hours
This comprehensive course using Access 2007 develops skills in creating and updating databases with emphasis on design, creating, and using tables, reports, custom forms with OLE fields, hyperlinks, sub-forms, queries, validation rules, application systems using macros, wizards, and the switchboard manager, data access pages, and integrating Excel worksheet with Access tables.

88 MICROCOMPUTER OFFICE APPLICATIONS: DESKTOP PUBLISHING (3) CSU
Lecture: 1 hour; Lab: 4 hours
This course provides information and hands-on training in using state-of-the-art microcomputers, laser printers, and various desktop publishing software packages. Students will learn to produce camera ready, typeset quality art microcomputers, laser printers, and various desktop publishing software packages.

89 MICROCOMPUTER OFFICE APPLICATIONS: BEGINNING AND ADVANCED DOS (3)
Lecture: 1 hour; Lab: 4 hours
This course provides introductory and intermediate hands-on experiences to microcomputer operating systems using an IBM PC or compatible. The major components of MS/PC DOS, its command structure, terminology, interrelationships and dependencies of hardware, operating system, and application software are covered.

90 SCRIPT SHORTHAND II (SPEEDWRITING) (3)
Lecture: 3 hours
This is an intermediate course in speedwriting designed to follow principles of speedwriting shorthand and to develop a minimum dictation speed of 80 w.p.m. on new material and to develop transcription skill.

93 LEGAL DOCUMENT PRODUCTION (2) CSU
Lecture: 1 hour; Lab: 2 hours
This course prepares students to produce legal documents within the law firm setting, including briefs, memos, pleadings, Judicial Council forms, and all other legal documents, including Judicial Council forms, using a computer. Emphasis will be placed on the standards used in legal procedures for various areas of law. Recommended for Paralegal students and required for legal administrative assistants.

98 MICROCOMPUTER OFFICE APPLICATIONS: INTRODUCTION TO WINDOWS (3)
Prerequisites: Business English 31
Lecture: 1 hour; Lab: 4 hours
Designed to prepare students to operate a computer in the Windows environment. This course covers elements of Windows including: Windows operation, disk and file management, modification and customization of the Windows environment, application of Windows accessories, WEB page design, and the Internet.

100 WINDOWS BASED COMPUTER APPLICATIONS (3) CSU
Lecture: 1.5 hours; Lab: 4.5 hours
This course provides computer hardware concepts and end-user software applications in a Windows environment including operating systems, Windows, word processing, spreadsheets, data bases, graphics, OLE, integration of applications, telecommunications with Internet, desktop publishing, and presentation software.

101 HANDS-ON INTERNET (1)
Lab: 2 hours
This course focuses on hands-on introduction to the World Wide Web and its components with emphasis on using traditional Internet services, news groups, electronic mail, and search engines to browse the Internet.

103 ADVANCED WINDOWS BASED COMPUTER APPLICATIONS (3) CSU
Recommended Preparation: CAOT 82
Lecture: 1 hour; Lab: 4 hours
This course explores advanced end-user software applications in a Windows environment including advanced word processing, spreadsheets, databases, presentation software, desktop publishing, graphics, OLE, integration of applications, and telecommunications with the Internet.

114 ADOBE ACROBAT FOR THE OFFICE AND WEB (2)
Lecture: 1 hour; Lab: 2 hours
Adobe PDF (Portable Document File) is a workflow standard in most industries. Students will learn how to use Adobe Acrobat to create, review, and modify PDFs from Microsoft Office files, including Word and PowerPoint, as well as from Web pages. Emphasis is on the use of PDFs on the Web for various purposes, including creating multimedia presentations, adding interactive features, creating electronic forms, and adding electronic security to documents.

133 HOW TO SUCCEED IN AN ONLINE COURSE (1)
Lecture: 1 hour; Lab: 0.5 hour
This course is intended for students wishing to enroll for the first time in an online class. It covers the basic navigation of the online environment including how to post to forums, take quizzes, submit assignments, etc., as well as the soft skills needed to be successful in an online environment.

134 HOW TO TEACH AN ONLINE COURSE (1.5)
Lecture: 1 hour; Lab: 1 hour
This is a class that prepares instructors to use online components in both traditional classes and online classes and to use a common Course Management System to facilitate their course. This class will give instructors actual online class experience as students, expose them to pedagogy of online classes, and help them prepare their own course material.

11 NETWORK SECURITY FUNDAMENTALS (3) CSU
Lecture: 2 hours; Lab: 2 hours
This course provides instruction and hands-on training in the following computer information systems concepts: Basic security principles, methods of establishing security baselines, and the most recent attack and defense techniques and technologies. It will also help prepare for CompTIA's examination and professional security certification.
12 WEB SECURITY (3) CSU
Lecture: 3 hours
This course is designed to educate users in the technologies, terms, and processes related to Internet Security. Methods for testing security and implementing proper defense measures are covered for both Linux and Windows Operating Systems.

35 MULTIMEDIA PRESENTATIONS FOR THE INTERNET I (3) CSU
Lecture: 1.5 hours; Lab: 3 hours
This course examines the power of using the Internet as a presentation tool and includes Internet history, simple document conversion for the World Wide Web, use of FrontPage, PowerPoint, and Producer. Students will prepare presentations for the Internet by assembling ready-made digital audio, video, and images.

36 ORACLE DEVELOPMENT (3) CSU
Prerequisite: CO INFO 733
Lecture: 2 hours; Lab: 2 hours
Examines the process of analysis, design, and implementation of computer database systems as applied to business. Using Oracle Developer, project work will be assigned in table design and data retrieval missing SQL forms and report development.

40 BEGINNING LEVEL PROGRAMMING/COMPUTER GAMES (3)
Lecture: 2 hours; Lab: 2 hours
This course provides students with a basic understanding of how a game “idea” is transformed into a marketable product, while also educating them on the roles and duties of a game development team and the practices exercised within the game development industry. This course is an in-depth study of level plans for video games.

41 JAVA PROGRAMMING WITH GAME APPLICATIONS (3)
Lecture: 2 hours; Lab: 2 hours
This is a hands-on class that is perfect for beginner-level game programmers who want to quickly and easily learn how to create games using Java. Students begin with the basics of writing a simple 2D game program utilizing the Java library to add animation and sound effects, and end by creating a professional, sprite-based game full of interesting artwork and details that students can share on a website.

42 VIDEO GAME PROGRAMMING I (3)
Lecture: 2 hours; Lab: 2 hours
This hands-on course teaches the technical skills behind 3D game programming, using the latest version of Torque from GarageGames, and provides the very best tools available to the game maker. Students will gain practical experience needed to create their own games. As students create a first person shooter, the class will cover the techniques behind the programming, textures, and models that go into successful game creation. Students will cover the Torque Engine and will learn how to integrate sound and music into their games.

43 VIDEO GAME PROGRAMMING II (3)
Lecture: 2 hours; Lab: 2 hours
This hands-on course builds on basic 3D game programming skills acquired during Video Game Programming I. Students will focus on sound, input, networking, and methods such as artificial intelligence to drive these games.

44 INTRODUCTION TO FLASH GAME PROGRAMMING (3)
Lecture: 2 hours; Lab: 2 hours
This course focuses on flash game programming with interactive media applications. Students will learn beginning level game programming and scripting language to build and execute codes for multimedia platforms using Flash Actionscript.

100 COMPUTER WEB GRAPHICS APPLICATIONS (3) CSU
Lecture: 3 hours
This course develops skills necessary to digitally manipulate graphic images and text in industry standard multimedia computer applications. Emphasis is placed on creating graphics for web pages and applying design principles to web projects.

700 COMPUTER CONCEPTS (3) CSU
Lecture: 2 hours; Lab: 2 hours
This course provides an overview of computer concepts. It emphasizes the physical components of a computer system, an introduction to operating systems with emphases on Windows and DOS, and an introduction to programming concepts. It is intended for students who want to understand the basic concepts of both computer hardware and software.

702 BEGINNING MICROCOMPUTER SKILLS (1)
Lab: 3 hours
This is an introduction to the basic computer methods and techniques in the use of a personal computer. It consists of personal computer projects that are practical examples of applications in many subject areas. It is intended for students who have very little or no previous experience in using personal computers.

701 INTRODUCTION TO COMPUTERS AND THEIR USES (3)
UC: CSU
Lecture: 2 hours; Lab: 2 hours
The student will be introduced to computer applications using Microsoft Office—Word, Excel, Access, and PowerPoint are covered. Also, the student will learn to integrate different applications, and understand the fundamentals of the Windows operating system.

709 VISUAL BASIC PROGRAMMING (3) UC:CSU
Lecture: 2 hours; Lab: 2 hours
This course covers object oriented programming operations with the most commonly used objects of the Visual Basic programming system. The work of the class consists of projects that provide experience in the fundamental Visual Basic procedures. It is intended for students who want a general understanding of object oriented programming methods.

733 MICROCOMPUTER DATA BASE PROGRAMMING (3)
CSU
(Formerly Computer Science 48)
Recommended Preparation: CAOT 82 or CO INFO 701 or equivalent with a grade of “C” or better.
Lecture: 2 hours; Lab: 2 hours
The course covers fundamental operations with all of the basic objects of a database system. The Access system in the Microsoft Office Suite is used as a model. The work of the class consists of projects that provide experience in all of the common database procedures. It is intended for students who want a general understanding of database processing.

734 OPERATING SYSTEMS (3) CSU
Prerequisite: CO INFO 700 with a grade of “C” or better.
Lecture: 2 hours; Lab: 2 hours
This course covers details of a Windows client operating system. It is designed to allow the student to work toward Microsoft Certification. It will concentrate on installing and configuring a client system in a network environment.

736 INTRODUCTION TO DATA STRUCTURES (3)
Lecture: 2 hours; Lab: 2 hours
This course develops an understanding of data structures. Topics include use of pointers, lists, stacks, queues, linked-lists, trees, and binary trees. Search and sort algorithms are included. This class describes use of data structures, such as stacks, queues, trees, and linked-lists. It builds on the basics covered in CIS 739.
739  PROGRAMMING IN C++ (3) UC:CSU  
(Formerly Computer Science 75)  
Lecture: 2 hours; Lab: 2 hours  
This class provides an overview of computer programming in C++. It emphasizes the syntax and grammar of the language, problem solving methods, development of algorithms, the programming structures of sequence, selection, and loops, use of functions, arrays and strings, and how different data types work.

741  PROGRAMMING WINDOWS APPLICATIONS IN C++ (3) UC:CSU  
Recommended Preparation: CO INFO 743 with a grade of "C" or better. Lecture: 2 hours; Lab: 2 hours  
This is a continuation of Programming in C++. It uses the student’s knowledge of C and introduces object-oriented analysis and design to create applications that interface with the Windows operating environment.

743  OBJECT-ORIENTED PROGRAMMING WITH C++ (3) UC:CSU  
Recommended Preparation: CO INFO 739 with a grade of "C" or better. Lecture: 2 hours; Lab: 2 hours  
This class provides an overview of computer programming in C++. It emphasizes the syntax and grammar of the language, problem solving methods, development of algorithms, the programming structures of sequence, selection, and loops, use of functions, arrays and strings, and how different data types work.

750  DREAMWEAVER CONCEPTS AND TECHNIQUES (3) CSU  
Lecture: 2 hours; Lab: 2 hours  
This course covers concepts and techniques of the Dreamweaver system. It consists of projects that provide experience in the methods used to produce and modify documents for the World Wide Web.

757  XHTML PROGRAMMING APPLICATIONS (3) CSU  
Recommended Preparation: CO INFO 701 with a grade of "C" or better. Lecture: 2 hours; Lab: 2 hours  
The course covers the fundamental operations of the eXtensible HyperText Markup Language (XHTML) system. It consists of projects that provide experience in the methods used to produce and modify documents for the World Wide Web.

758  COMPUTER LITERACY (3) CSU  
Lecture: 3 hours  
This class is intended for non-Co Info majors. It will give the student an understanding of computers: computer components, types of computers, Internet, business and home applications, using the operating system, computer security, ethics, and privacy.

762  JAVASCRIPT PROGRAMMING (3) CSU  
Lecture: 2 hours; Lab: 2 hours  
This course covers the fundamental operations of the JavaScript system. It consists of projects that provide experience in the methods used to incorporate programming operations and procedures in web page design and maintenance.

770  LOCAL AREA NETWORK ADMINISTRATION (3) CSU  
Recommended Preparation: CO INFO 787 with a grade of "C" or better. Lecture: 2 hours; Lab: 2 hours  
This course will enable a student to administer a server-based network using state-of-the-art operating systems. The student will learn to administer the directory system, file and print resources, network infrastructure, monitor and troubleshoot the network server.

771  LOCAL AREA NETWORK TECHNICAL SUPPORT (3) CSU  
Recommended Preparation: CO INFO 770 with a grade of "C" or better. Lecture: 2 hours; Lab: 2 hours  
Provides students with skills necessary to install, configure, customize, and troubleshoot Microsoft Windows NT, Windows NT, and Novell NetWare networks. It will help prepare for the Microsoft Certified Professional exams 70-073 and 70-067.

787  NETWORK ESSENTIALS (3) CSU  
Recommended Preparation: CO INFO 700 with a grade of "C" or better. Lecture: 2 hours; Lab: 2 hours  
The purpose of this course is to provide a baseline level of knowledge for success in industry and preparation for networking certifications. Students are exposed to new industry topics and get hands on experience networking the lab and configuring the network. Local area and Wide area networks are covered.

790  PROGRAMMING IN JAVA (3) UC:CSU  
Recommended Preparation: CO INFO 739 with a grade of "C" or better. Lecture: 2 hours; Lab: 2 hours  
This course covers the fundamental operations of the Java programming system. It consists of projects that provide experience in the methods used to create applets that will run in Internet web pages.

---

**CONSTRUCTION ENGINEERING**

113  CONSTRUCTION CONTRACT LAW (3)  
Lecture: 3 hours  
The principles of construction contracts and subcontracts; terms and conditions of construction contracts and subcontracts; public works projects in the state of California; management of the construction work; liens and stop notices; and disputes, claims and arbitration.

---

**COSMETOLOGY**

101  INTRODUCTION TO COSMETOLOGY (3)  
Lecture: 3 hours  
This course will introduce the student to the opportunities in the field of cosmetology. Students will learn how vocabulary, math skills, and study skills are applicable to the field, and will be better prepared to enter a full-time cosmetology program.

111  FRESHMAN COSMETOLOGY (6)  
Lecture: 3 hours; Lab: 9 hours  
The course covers basic manipulative skills and proper application of shampooing, scalp treatments, finger waving, curl construction, hair design, haircutting, and manicuring. Basic lecture and theory include topics on bacteriology, trichology, decontamination.
112  JUNIOR SALON I (6)
Prerequisite: Cosmetology 111 with a grade of "C" or better.
Lecture: 3 hours; Lab: 9 hours
The course covers basic applications of skin care and facial massage manipulations, permanent waving, haircutting techniques, and all phases of thermal texture hair designing. Theories related to all areas mentioned above are also discussed.

121  JUNIOR SALON II (6)
Prerequisite: Cosmetology 112 with a grade of "C" or better.
Lecture: 3 hours; Lab: 9 hours
The students are exposed to intermediate instruction in permanent waving, chemical straightening, thermal straightening and curling, skin and hair care, with instruction on the use of facials, hair cutting and nail care. Theories that are related to all areas mentioned above will be discussed.

122  JUNIOR SALON III (6)
Prerequisite: Cosmetology 121 with a grade of "C" or better.
Lecture: 3 hours; Lab: 9 hours
The students are instructed in advanced permanent waving, soft permanent wave, chemical straightening, thermal straightening and cutting, hair cutting, and electricity. Theories related to the above mentioned subjects will be discussed.

131  TINTING I (6)
Prerequisite: Cosmetology 112 with a grade of "C" or better.
Lecture: 3 hours; Lab: 9 hours
The course covers basic, intermediate and advanced hair coloring, bleaching, toning, highlighting, frosting and color correction techniques. A variety of artificial nail procedures will be demonstrated. Theories for the above mentioned subjects will be discussed.

132  TINTING II (6)
Prerequisite: Cosmetology 131 with a grade of "C" or better.
Lecture: 3 hours; Lab: 9 hours
The course covers all aspects of hair coloring, bleaching, toning, "special effect" highlighting, foiling, cap frosting and color correction techniques. Additional subjects are: haircutting, thermal and wet hair styling, and the study and applications of artificial nail products. Theories related to the above mentioned subjects will be discussed.

141  SENIOR SALON I (6)
Prerequisite: Cosmetology 122 and 132 with a grade of "C" or better.
Lecture: 3 hours; Lab: 9 hours
The course reviews all areas of cosmetology, rules, regulations and State Board requirements for licensing. Students will perform client services, conduct consultations, record services, track client appointments and tickets. Theories that are related to all areas mentioned above will be discussed.

142  SENIOR SALON II (6)
Prerequisite: Cosmetology 141 with a grade of "C" or better.
Lecture: 3 hours; Lab: 9 hours
The student will be introduced to clinic floor practicum and advanced client services. Mock State Board procedures for licensure will be employed. Business practices include: client services, effective communication, job search skills, networking, and strategies for building a clientele, selling techniques, starting and operating a business.

210  INTRODUCTION TO HAIR COLORING AND STYLING (3)
Prerequisite: Successful completion of Cosmetology 112 with a grade of "C" or better.
Lecture: 1.5 hours; Lab: 4.5 hours
Students are offered an introduction to basic hair coloring categories, applications and bleaching techniques. In addition, the course will concentrate on hair cutting, hair styling, and permanent waving procedures.

211  INTERMEDIATE HAIR COLORING AND STYLING (3)
Prerequisite: Successful completion of Cosmetology 112 with a grade of "C" or better.
Lecture: 1.5 hours; Lab: 4.5 hours
Students are offered an introduction to intermediate hair coloring, bleaching and toning applications and techniques. In addition, the course will concentrate on hair cutting, hair styling, and skin care procedures.

214  ADVANCED HAIR COLORING AND STYLING (3)
Prerequisite: Successful completion of Cosmetology 112 with a grade of "C" or better.
Lecture: 1.5 hours; Lab: 4.5 hours
Students are offered instruction in permanent hair coloring applications, color correction techniques, zonal and block highlighting effects. In addition, the course will concentrate on hair cutting, thermal hair styling, long hair designing and nail technology.

215  CONTEMPORARY STYLING TECHNIQUES (3)
Prerequisite: Successful completion of Cosmetology 112 with a grade of "C" or better.
Lecture: 1.5 hours; Lab: 4.5 hours
Students receive instruction in advanced hair designing, hair coloring, hair sculpting, and chemical texture services.

217  MULTI-TEXTURE DESIGN (LEVELS 1-2) (3)
Lecture: 2 hours; Lab: 3 hours
This class teaches the basic techniques of the five most popular methods for applying hair additions: strand by strand, braiding, bonding, track and sew and netting.

221  ADVANCED MAKEUP TECHNIQUES (3)
Lecture: 2 hours; Lab: 3 hours
This course is designed to teach students makeup applications, in contouring techniques, correct shaping of eyes, lips and eyebrow; makeup applications for women of all ages and ethnicities, and tool knowledge and camouflage procedures. Lecture relates to all subjects mentioned above.

222  INTRODUCTION TO SPECIAL EFFECTS MAKEUP TECHNIQUES (3)
Lecture: 2 hours; Lab: 3 hours
The purpose of this course is to offer introductory FX Special Effects Makeup Techniques for basic applications utilized in the movie and television industry.

CULINARY ARTS

100  INTRODUCTION TO CULINARY ARTS (2) CSU
Lecture: 1 hour; Lab: 2 hours
This class is designed as an introduction to the culinary field. Topics include basic food service sanitation, introduction to knife skills, Preparation of soups, sauces, stock and cold salad dressings are also covered.

111  CULINARY ARTS - ORIENTATION I (4) CSU
(Nota: This course is also listed under Baking, Professional Section)
Prerequisite: CA 112
Lecture: 2 hours; Lab: 6 hours
With a combination of lecture and lab practice, the student is introduced to the world of commercial food production. Students are introduced to culinary theories and develop skills in knife handling, ingredient identification, small and large equipment use, weights and measures, recipe development, and cooking fundamentals.
112 CULINARY ARTS - SANITATION AND SAFETY (2) CSU
(Note: This course is also listed under Baking, Professional Section)
Lecture: 2 hours
This class discusses sanitation and safety as they apply to the restaurant industry. HACCP protocol, preventing food borne outbreaks, introduction to microbiology, and establishing “flow of food systems” will be covered. Federal, state, local legislation and employee training will be discussed. National Restaurant Association Serve Safe Test will be given at the conclusion of this class.

120 CULINARY ARTS - FRONT OF HOUSE DINING ROOM SERVICES (4)
Lecture: 2 hours; Lab: 6 hours
Front of House topics pertinent to restaurant & hospitality management, dining room management, service, use of POS system, money management, stewarding.

121 CULINARY ARTS - GARDE MANGER I - BAKING (6) CSU
Prerequisite: Culinary Arts 111, 112
Lecture: 3.75 hours; Lab: 6.75 hours
This course familiarizes students with the operation of a pantry: how to identify, produce, display and select classic cold kitchen items; practice portion, food cost controls; identify characteristics and uses of herbs and spices, sandwich production, basic pantry items garnishes, and wine selection. Students will recognize and practice classical baking preparations such as basic dough, batters, pastries, fillings, and plate presentation. Teamwork and leadership will be practiced.

122 CULINARY ARTS - GARDE MANGER II - CHARCUTERIE (6) CSU
Prerequisite: Culinary Arts 111, 112
Lecture: 3.75 hours; Lab: 6.75 hours
Students will become proficient in the historical features of the garde manger stations including planning and preparation of cold soups, hors d’oeuvres, appetizers, canapés, mousse, timbale, cold sauces, relishes, forcemeat, galantines, terrine, pâté en croute components. Preparation and uses of specialty meats, sweetbreads and sausage will be defined; gelée, aspic, chaud froid, glazing, marinating, curing and smoking will be practiced; also buffet presentation, the display of carved fruit and vegetable garnishes and centerpieces will be studied. Projects will include international cuisine, salt dough sculpting and ice carving.

131 CULINARY ARTS - BREAKFAST COOKERY/ MANAGEMENT (6) CSU
Prerequisite: Culinary Arts 111, 112
Lecture: 3.75 hours; Lab: 6.75 hours
Upon completion of this class the student will be able to identify and safely employ the tools and equipment of a breakfast station. Students will learn about egg cookery, breakfast meats, cereals, beverages, hot sandwiches, a la minute preparation, brunch item, pancakes, and waffles. Other areas covered include portion control, inventory pars, weights and measures, labor and cost control. Management, supervision, leadership, customer relations, communication, and teamwork and time management methods are introduced, discussed and practiced. Effective evaluation, discipline and delegation methods are outlined.

132 CULINARY ARTS - ENTREMETIER, SAUCIER (6) CSU
Prerequisite: Culinary Arts 111, 112
Lecture: 3.75 hours; Lab: 6.75 hours
Upon completion of this course, students will be able to examine the theory and production techniques involved in the preparations of stocks, soups, starches and vegetable items as they pertain to modern food service requirements. Students will develop a practical understanding of “convenience food” application and the role of sauces as they apply to the enhancement of produce and pastas.

141 ADVANCED RESTAURANT PRACTICE/MEAT FABRICATION AND COOKERY, QUANTITY FOOD COOKERY (6) CSU
Prerequisite: Culinary Arts 111, 112, 121, 122, 131, 132
Lecture: 3.75 hours; Lab: 6.75 hours
This course covers quantity and quality food production of meats, fish and poultry. Students will practice center of the plate food preparation, meat identification and fabrication with an emphasis on portion control, sauce pairing and accompanying compatibility. Students will discuss, compare and prepare various international foods.

142 ADVANCED RESTAURANT PRACTICE II MENU PLANNING AND PURCHASING/SUPERVISION AND TRAINING (6) CSU
(Note: This course is also listed under Baking, Professional Section)
Recommended Preparation: Successful Completion of a C Grade or Better in Culinary Arts 111, 112
Lecture: 3.75 hours; Lab: 6.75 hours
This course covers menu planning for restaurant, cafeteria, banquet, and specialty restaurant settings. Fundamentals of storeroom operations including ordering, receiving, storage controls, pars and inventory methods will be identified and best practices studied. Supervision and training of the foodservice worker will be discussed and practiced.

170 CULINARY ARTS - CULINARY NUTRITION (2) CSU
(Note: This course is also listed under Baking, Professional Section)
Lecture: 2 Hours
This course provides a quick overview of applied culinary nutrition. Recipe and Menu development including ingredient selection and cooking techniques will be discussed. Special diet (low fat, low sodium, diabetics, and caloric intake) will be discussed. The class is appropriate for food service professionals who would like to work as personal chefs, with sports teams, at spas and resorts, major hospital chains, entertainment or transportation industries, or in health care.

220 SPECIALTY FOOD MANAGEMENT - ENTREPRENEURIAL FOR CULINARY ARTS (3) CSU
Lecture: 3 hours
This course provides an overview of the issues surrounding opening and operating a retail food business/catering and specialty food store. It examines what it takes to succeed in a highly competitive, trend-driven segment of the food service industry, focusing on self-assessment of entrepreneurial skills, finding an appropriate location, crafting a winning business concept, corporate culture and implementation of a plan to open a successful retail food business.

225 CULINARY ARTS - INTRODUCTION TO FOOD TECHNOLOGY CAREERS (1)
Lecture: 1 hour
Introduces students to basic concepts of the food industry, including career opportunities, types and kinds of food production facilities, rules and regulations affecting the food industry and current topics in the food industry.

235 CULINARY ARTS - MENU PLANNING AND PURCHASING (4) CSU
(Note: This course is also listed under Baking, Professional Section)
Lecture: 3 hours; Lab: 3 hours
Advanced course in menu planning and purchasing using the menus as a tool for ordering, selection and procurement of food and beverage items. Menu, labor, and facility computer generated cost analysis and percentages will be addressed.

240 CULINARY ARTS – RESTAURANT SUPERVISION AND TRAINING (2) CSU
(Note: This course is also listed under Baking, Professional Section)
Lecture: 2 hours
Students are introduced to human resource management and supervision techniques. Students will identify the recruiting process, communication skills, leadership styles, legal issues in the workforce, employee motivation and discipline.
250 INTRODUCTION TO FOOD SCIENCE FOR CULINARY ARTS (3) CSU
Lecture: 3 hours
An introduction to the fundamentals of food science and its technology as associated with providing safe, nutritious, and innovative supplies of fresh processed food products. Students are introduced to the nature and scope of national and international food processing in scientific and culinary terms.

CULTURAL GEOGRAPHY

2 CULTURAL ELEMENTS OF GEOGRAPHY (3) UC:CSU
Lecture: 3 hours
An overview of human cultures and cultural elements across the globe. The class covers globalization of culture, population distribution patterns, transportation and energy, language and religion, the social causes of war and global warming, etc.

DEVELOPMENTAL COMMUNICATIONS

21 FUNDAMENTALS OF WRITING (3) NDA
Lecture: 3 hours
This course focuses on developing skills in English grammar and punctuation essential to writing. Students will gain skills in writing sentences according to structure and form and be introduced to paragraph development.

23 READING AND STUDY IMPROVEMENT (3) RPT1 NDA
Lecture: 3 hours
This course introduces basic reading strategies and an introduction to study skills. Emphasis is on reading comprehension, vocabulary development, spelling patterns, and study skills.

35 READING1: FUNDAMENTALS (3) RPT3 NDA
Lecture: 3 hours
A basic reading class designed to diagnose reading problems, improve word-attack skills, increase sight and speaking vocabularies, develop dictionary skills, help students acquire the ability to identify main ideas, and develop reading strategies.

DIESEL AND RELATED TECHNOLOGY

112 DIESEL ENGINE FUNDAMENTALS (11)
Lecture: 6 hours; Lab: 15 hours
The theory of operation of diesel engine components, shop safety, basic employment information, fastening devices, mechanical procedures, use of measuring instruments, and electrical system are subjects covered in this course.

122 DIESEL FUEL SYSTEMS AND ELECTRICAL COMPONENT THEORY (11)
Lecture: 6 hours; Lab: 15 hours
This course covers the principles of fuel injection systems. Emphasis is placed on the proper disassembly, diagnosis, reassembly and testing and calibrating of different type pumps and fuel injectors. Various models will be examined.

132 HEAVY DUTY DRIVE TRAIN FUNDAMENTALS (11)
NOTE: Students are strongly advised to have successfully completed Diesel and Related Technology 112, 122 with a grade of “C” or better prior to entering this class
Lecture: 6 hours; Lab: 15 hours
This course provides the theory and skills necessary to troubleshoot, repair and replace air brakes, specialized clutches, multi-speed transmissions, and the differential of heavy duty trucks.

142 DIESEL ENGINE OVERHAUL FUNDAMENTALS (11)
NOTE: Students are strongly advised to have successfully completed Diesel and Related Technology 112, 122 with a grade of “C” or better prior to entering this class
Lecture: 6 hours; Lab: 15 hours
This course provides the theory to develop the skills necessary for the selection of methods to be used in the repairing of the diesel engine and the accessories. The proper procedures for disassembling, measuring and rebuilding are covered. The complete engine is reviewed and the emphasis is on gaining the skills necessary to make determinations as to the status of the engine components and to return it to service after proper reassembly, adjustments and testing.

148 TRUCK AIR AND HYDRAULIC BRAKE SYSTEM THEORY AND REPAIR (3)
Lecture: 3 hours; Lab: 3 hours
The operating principles of hydraulic, pneumatic, combination and vacuum brake systems are studied. The student is given shop experience in service and repair in various types of truck brake systems.

261 CONSTRUCTION AND OPERATION OF DIESEL ENGINES (4)
Lecture: 3 hours; Lab: 3 hours
The theory and operation of diesel engines, the construction of diesel engines and the electrical systems are covered. The proper use of tools, fastening devices, mechanical procedures and safety practices in the shop are part of the course.

262 TUNE-UP AND TROUBLESHOOTING (4)
Lecture: 3 hours; Lab: 3 hours
A course of instruction designed to instruct the student in the theory and procedures for tune up and troubleshooting of diesel engines. All engine systems, including the air, fuel, lube and cooling systems will be examined and the student will be provided with a hands on experience in working with these systems.
263 DIESEL FUEL SYSTEMS (4)
Lecture: 3 hours; Lab: 3 hours
This course covers the fuel injection systems of diesel engines and the components necessary for efficient operation of the diesel engine. A review of the operation of the two and four cycle engine is a part of the course. A variety of fuel injection systems will be covered. The second part of the course covers the charging and cranking systems necessary for operation of the engine.

264 HEAVY DUTY DRIVE TRAIN (4)
Lecture: 3 hours; Lab: 3 hours
This course covers the heavy duty clutch, transmission, drive line, steering axle, drive axle theory and overhaul.

265 HEAVY DUTY ELECTRICAL/ELECTRONIC SYSTEMS (4)
Lecture: 3 hours; Lab: 3 hours
Provides an understanding of electrical/electronic terms, electrical circuit concepts, starting and charging systems, failure diagnosis and repair techniques. Classroom instruction and hands-on training on how to use electrical wiring diagrams, digital multi-meters and specialized automotive test equipment.

266 DIESEL ENGINE OVERHAUL (4)
Lecture: 3 hours; Lab: 3 hours
Heavy-duty diesel engine overhaul including disassembly, cleaning and inspection, adjustments and reassembly. All engines are live and will be started upon completion in class.

HYBRID & ELECTRIC PLUG-IN VEHICLE TECHNOLOGY

301 INTRODUCTION TO ALTERNATIVE FUELS & HYBRID VEHICLE TECHNOLOGY (1) CSU
Lecture: 1 hour
This course provides an introduction to various alternative fuel technologies being used in the automotive and heavy-duty diesel fields. Covers description and basic operation of Ethanol, Biodiesel, Compressed Natural Gas (CNG), Liquefied Natural Gas (LNG), Fuel Cell and hybrid vehicle technologies.

302 HYBRID AND PLUG-IN ELECTRIC VEHICLE (6) CSU
Lecture: 3.5 hours; Lab: 5 hours
This course covers hybrid vehicle system fundamentals including hybrid vehicle safety, special tools, different hybrid system configurations, high voltage battery construction and maintenance, de-power procedures and basic service.

303 ADVANCED HYBRID AND PLUG-IN ELECTRIC VEHICLES (5) CSU
Lecture: 2 hours; Lab: 6 hours
This course covers advanced hybrid vehicle system diagnostics and replacement of hybrid and plug-in electric components such as high voltage battery, electric motor, capacitors, etc. Troubleshooting of gasoline/diesel engine will also be covered.

DIGITAL MEDIA

PROGRAM OVERVIEW

As advances in new media continue to revolutionize the development and dissemination of content, digital technologies are becoming increasingly important tools for creative artists and craftspeople to master. The mission of the Digital Media program is to advance students to the cutting edge of these new technologies, so that they will be prepared to enter this rapidly evolving field, armed with the tools they need to succeed. This discipline will grow to encompass everything from the study of the origins of media to the exploration of creativity within each medium using modern tools. Students in the Digital Media program will get hands-on experience using the latest technology in the areas of audio, video, and web deployment to harness their creativity and apply what they learn to their craft.

100 INTRODUCTION TO DIGITAL VIDEO (3) CSU
Lecture: 2 hours; Lab: 2 hours
Students are introduced to the process and tools of non-linear video editing. Basic skills will be developed in editing techniques, video formats, compression types, industry terminology, and understanding key concepts of shooting for digital systems. Students will produce short video sequences that are appropriately compressed for delivery via web/Internet and various digital media.

101 FUNDAMENTALS OF MASS MEDIA (3) CSU
Lecture: 3 hours
Students will survey a range of mass media fields operating today with a particular attention to the development of media in modern history. From the history of print media through radio and television up to the internet age, students will engage in analysis of the ever-changing adaptations of mass media as it relates to globalization, politics, entertainment and consumerism.

103 FUNDAMENTALS OF DIGITAL AUDIO (3) CSU
Lecture: 2 hours; Lab: 2 hours
Students are introduced to the principles and process of digital audio recording and reproduction. Topics include such aspects as sound design, acoustics, Dolby surround sound, microphones, mixers, outboard gear, signal flow, and recording and editing audio. Further exploration will involve analog over digital formats and destructive over non-destructive editing.

105 VISUAL STORYTELLING: FILM AND VIDEO (3) CSU
Lecture: 3 hours
The course will introduce students to the basic visual components and will teach them how to create an effective visual structure for their film or video project.

110 VIDEO PRODUCTION: FOOTAGE ACQUISITION (3) CSU
Lecture: 2 hours; Lab: 2 hours
Students will learn the craft of video production through hands-on producing of short digital video projects. Over the duration of the course, the students will discover planning, pre-producing, shooting, and post-production of short projects. Projects will emphasize resourcefulness, collaboration and group discourse and introduce students to the technical and creative crafts of shooting and directing digital video.

115 VIDEO PRODUCTION: NON-LINEAR EDITING (3) CSU
Lecture: 2 hours; Lab: 2 hours
Students will engage in film and video editing techniques on a non-linear editing platform. A series of video editing projects will explore technical non-linear editing system skills and editing tools in the service of storytelling craft. Topics covered include theme, structure, continuity, rhythm, flow, suspense, and dramatic irony.
199 DIGITAL MEDIA LAB (1) CSU
Lab: 2 hours
This is an open lab to offer students access to professional creative applications such as Adobe Illustrator, Flash, Dreamworks, AfterEffects, Photoshop, Premiere, and Soundbooth, and Apple Final Cut Pro, as well as video production equipment to complete coursework in the Digital Media prrogram.

EDUCATION

1 INTRODUCTION TO TEACHING (3) CSU
Advisory: English 28
Lecture: 3 hours
This course introduces students to the field of professional education and the concepts and issues that are related to K-8 education. Topics of this course include a basic understanding of a teacher’s role and challenges in society, contemporary education issues within historical, social, philosophical, legal, and political contexts, impact of government policies on schools and children, and the various perspectives on curriculum and instruction. Students are required to complete a minimum of 45 hours of fieldwork in an approved elementary, self-contained classroom.

ECONOMICS

1 PRINCIPLES OF ECONOMICS I (MICROECONOMICS) (3) UC:CSU
Lecture: 3 hours
This course is designed to give the student some understanding of the economic forces and conditions which govern society. Among the topics studied are the theory of prices, competition and monopoly, the theory of distribution, and the organization of business. The price and market approach is used to introduce subject matter.

ELECTRICAL CONSTRUCTION AND MAINTENANCE

1 RESISTIVE CIRCUIT ELECTRICAL FUNDAMENTALS (3) NDA
Lecture: 3 hours
This course will cover the basic principles of atomic structure, resistors, static electricity, and magnetism. Series and parallel resistive circuits will be analyzed using Ohm’s law, power equations, and Kirchhoff’s laws.

2 SECURITY AND FIRE ALARM TECHNICIAN CERTIFICATION (3) CSU
Lecture: 1.5 hours; Lab: 4.5 hours
This course offers instruction in the installation of fire and security alarms. Upon successful completion of the course the student will be ready to test for an installer certification by the National Alarm Association of America.

3 HOME THEATER AND COMMERCIAL AUDIO VIDEO INSTALLATION THEORY AND PRACTICES (3) CSU
Lecture: 1.5 hours; Lab: 4.5 hours
This course offers instruction in the installation of home theater video and audio systems as well as commercial and industrial applications for audio and video technology. Upon successful completion of the course the student will have the skills to enter this area of the electrical trade.
100  **(OSHA) SAFETY STANDARDS: CONSTRUCTION AND INDUSTRY (2) CSU**  
**Lecture:** 2 hours  
This course provides instruction on industry safety and health rules as it applies to workers and employers within the construction industry. Topics such as fall protection, lock out tag out procedures, PPE, excavations, etc. are covered. Participants that meet the required hourly attendance and successfully pass the final exam will be eligible to receive their OSHA (30 hr) safety-training certificate.

101  **ELECTRICAL CRAFT HELPER (4) CSU**  
**Lecture:** 4 hours  
This course is designed as entry level preparation for a student interested in careers in the electrical power industry. It covers the basics of planning, installation and maintenance of high and low voltage electrical systems, as well as generation, both hydro and steam. Transmission and distribution of electrical power will be reviewed, as well as a survey of Ohms law and safety practices. Ropes, knots, rigging, and tools required in the trade will be used, and Civil service exam preparation will be covered.

105  **FUNDAMENTALS OF SOLAR ENERGY (3) CSU**  
**Lecture:** 3 hours  
This course is designed for students interested in a career in the solar industry. The fundamental principles and functions of photo voltaic industry will be introduced along with the planning, installation and maintenance of all necessary components for a photo voltaic system. The transmission and distribution of electric power will be reviewed and basic concepts of electricity, identification, functions and operations of components will be surveyed.

110  **RENEWABLE ENERGY SYSTEMS (3) CSU**  
**Lecture:** 3 hours  
This course will cover energy basics, solar basics; active and passive solar, solar-thermal, solar-electric, wind, water, hydropower, wave and tidal power, bio-fuel and biomass resources, geothermal power, energy storage, and hydrogen fuel cells. Both large and small scale, grid interactive and stand alone systems will be discussed. Energy collection, site evaluation, design analysis of various systems, material use, and methods of construction ("green building") will also be covered, along with overviews of California and US energy policy and global energy use. This course is designed for students interested in a career in the solar industry.

115  **FUNDAMENTALS OF D.C. ELECTRICITY (3) CSU**  
**Lecture:** 3 hours  
The basic principles of resistive circuits, Ohm’s Law, Kirchhoff’s Laws, and circuit analysis are covered in this course.

116  **HAND TOOLS AND WIRING PRACTICES (2) CSU**  
**Lab:** 6 hours  
This course offers study of proper use of tools, wiring methods, identification, selection, splicing and termination of conductors. Trade practices, introduction to codes and related publications are also covered.

117  **ELEMENTARY CIRCUIT PRACTICES (4) CSU**  
**Lab:** 12 hours  
This course studies sign, signal, communication and elementary wiring practices. Topics include operation of basic devices such as lights, buzzers and relays.

119  **APPLIED ELECTRICAL CALCULATIONS AND MEASUREMENTS (3) CSU**  
**Lecture:** 3 hours  
This is an entry-level course in electrical calculations with special emphasis on the application problems encountered in the construction industry.

120  **INDUSTRIAL CONTROL SYSTEMS (3) CSU**  
**Recommended Preparation:** ECONMT 117 or (181 and 182) with a grade of “C” or better.  
**Lecture:** 3 hours  
This course is a study of motors, circuits and devices used for controlling electric motors.

128  **INDUSTRIAL CONTROL SYSTEMS PRACTICES (3) CSU**  
**Recommended Preparation:** ECONMT 117 or (181 and 182) with a grade of “C” or better.  
**Lab:** 9 hours  
The development and application of control circuitry through the use of instructional wiring panels is studied in this course.

128A  **INDUSTRIAL CONTROL SYSTEMS PRACTICES (1) CSU**  
**Recommended Preparation:** ECONMT 117 or (181 and 182) with a grade of “C” or better.  
**Lab:** 9 hours  
The development and application of control circuitry through the use of instructional wiring panels module one.

128B  **INDUSTRIAL CONTROL SYSTEMS PRACTICES (1) CSU**  
**Recommended Preparation:** ECONMT 117 or (181 and 182) with a grade of “C” or better.  
**Lab:** 9 hours  
A continuation module in the development and application of control circuitry through the use of instructional wiring panels.

128C  **INDUSTRIAL CONTROL SYSTEMS PRACTICES (1) CSU**  
**Recommended Preparation:** ECONMT 117 or (181 and 182) with a grade of “C” or better.  
**Lab:** 9 hours  
A continuation module in the development and application of control circuitry through the use of instructional wiring panels.

129  **FUNDAMENTALS OF ALTERNATING CURRENT (3) CSU**  
**Recommended Preparation:** ECONMT 115 with a grade of “C” or better.  
**Lecture:** 3 hours  
This course focuses on the generation of electrical sine waves and response of various circuits when A.C. is applied. Mathematical analyses of resistive circuits are studied.

130  **PRINCIPLES OF INDUSTRIAL ELECTRIC POWER (3) CSU**  
**Recommended Preparation:** ECONMT 120 and 169 with a grade of “C” or better.  
**Lecture:** 3 hours  
This course offers a study in operating principles and maintenance procedures and code requirements for electrical power systems. Theory of D.C. and A.C. generators and motors, load calculations, efficiencies and power factor correction are also covered.

136  **INDUSTRIAL POWER APPLICATIONS (3) CSU**  
**Recommended Preparation:** ECONMT 120 and 169 with a grade of “C” or better.  
**Lab:** 9 hours  
This course offers a practical study on shop experience in testing, servicing and repairing industrial plant electrical equipment, connection and operation of generators, as well as motors and their control systems.

137  **INDUSTRIAL ELECTRONIC CONTROL SYSTEMS (3) CSU**  
**Recommended Preparation:** ECONMT 120 and 169 with a grade of “C” or better.  
**Lecture:** 3 hours  
In this course fundamental electronic and semiconductor theory as well as applications of electronic devices to industrial control systems are studied.
138 APPLICATIONS OF ELECTRICAL AND ELECTRONIC DEVICES (2) CSU
Recommended Preparation: ECONMT 120 and 169 with a grade of "C" or better.
Lab: 6 hours
This course studies identification and operational tests on various types of electrical and electronic equipment, including transformers, electronic motor speed control systems and other industrial control devices.

139 ELECTRICAL MAINTENANCE PRACTICE (2) CSU
Recommended Preparation: ECONMT 120 and 169 with a grade of "C" or better.
Lab: 6 hours
This course provides practical training in identification and operational tests on electrical equipment including transformers, motor controllers and starters, as well as A.C. motors and generators.

140 CONSTRUCTION WIRING PRINCIPLES AND PRACTICES (3) CSU
Recommended Preparation: ECONMT 130 and 136 with a grade of "C" or better.
Lecture: 3 hours
This course offers training in wiring for interior electrical systems including layout and construction methods, and code requirements including both sizing and installation standards as well as practices.

142 BASIC PROGRAMMABLE LOGIC CONTROLS (PLC) (1) CSU
Lab: 3 hours
This course provides a practical study of digital control methods, microprocessor control applications, programmable controllers, ladder logic diagrams and industrial robotics.

143 SOLID STATE FUNDAMENTALS OF AUTOMATION (4) CSU
Lecture: 2.5 hours; Lab: 4.5 hours
This course offers a study of solid state electronic components and circuits used to control automated equipment. Discrete components such as Diodes, transistors, unijunction transistors, diacs, silicon controlled rectifiers, triacs, light emitting diodes, cad photo cells, photo transistors are covered.

150 INTRODUCTION TO THE ELECTRICAL CODES (3) CSU
Recommended Preparation: ECONMT 130 and 136 with a grade of "C" or better.
Lecture, 3 hours
This course is a study and interpretation of the basic electrical codes and ordinances. Regulations covering wiring installations and principal circuit requirements are covered in this course.

159 PROGRAMMABLE LOGIC CONTROLS (PLC) (4) CSU
Lecture, 2.5 hours; Laboratory, 4.5 hours
This course is a survey of the various types of robots presently being used in industry. Topics covered include principal types of robots, robotic programming, and interfacing. Main physical components, practical uses and applications are explored.

160 ANALYSIS OF ELECTRICAL MAINTENANCE (3) CSU
Recommended Preparation: ECONMT 120 and 169 with a grade of "C" or better.
Lecture, 3 hours
Instruction is given on Trouble shooting and preventative maintenance of plant and production electrical systems and equipment. Topics included are maintenance of electrical circuits, lighting installations, motor control, power systems and industrial electronics.

163 ELECTRO-MECHANICAL PRINCIPLES AND PRACTICES (4) CSU
Lecture, 2.5 hours; Laboratory, 4.5 hours
This course focuses on principles and practices of electro-mechanical devices such as relays, controllers, and starters. Industrial application of control devices, circuits and maintenance are covered in this course.

164 SUSTAINABLE LIGHTING PRINCIPLES AND PRACTICES (4) CSU
Lecture, 3 hours
The design of sustainable residential and commercial lighting systems. Including both indoor and outdoor applications. Utilizing drawings, lumen calculations, traditional and energy efficient light sources, color, lamp type, efficiency and maintenance requirements of lighting systems.

167 ELECTRICAL CONSTRUCTION WIRING TECHNIQUES (3)
Recommended Preparation: ECONMT 130 and 136.
Laboratory, 9 hours
This course provided shop training in acceptable rough-in methods, emphasizing material practices and compliance with the national electrical code.

168 INSTALLATION OF ELECTRICAL WIRING (2)
Recommended Preparation: ECONMT 130 and 136.
Laboratory, 6 hours
This course provides practical training in calculation and layout of interior electric wiring systems followed by practical installation including both rough-in and finish work.

169 ALTERNATING CURRENT PRACTICES (2)
Recommended Preparation: ECONMT 115 with a grade of "C" or better.
Laboratory, 6 hours
Principles of alternating current, installation of devices in A.C. circuits, response of circuits to A.C. excitation are covered in this course.

171 ELECTRICAL CODES AND ORDINANCES I (3) RPT1
Lecture, 3 hours
Basic electrical codes and ordinances are the focus of this course. General codes, wiring methods and fittings, and circuit requirements specified in the various ordinances are reviewed.

172 ELECTRICAL CODES AND ORDINANCES II (3) RPT1
Recommended Preparation: ECONMT 130 and 136 with a grade of "C" or better.
Lecture, 3 hours
Advanced electrical codes and ordinances are discussed in this course. Code requirements on equipment installation, motor installation, various types of occupancies, and high voltage circuits are covered.

173 ELECTRICAL MATHEMATICS I (3)
Lecture, 3 hours
This course studies the mathematics of varied problems encountered in the electrical trades. The course reviews prime numbers, fractions, and decimals, powers, signed numbers, algebraic and simultaneous equations and applications involving electrical formulae.

174 ELECTRICAL MATHEMATICS II (3)
Recommended Preparation: ECONMT 119 or 173.
Lecture, 3 hours
Topics covered in this course are problems relating to A.C. power applications, use of the scientific calculator, percentage ratio and proportions, wire sizing, voltage drops, energy and efficiency calculations, trigonometric functions, phasor diagrams, A.C. single and poly-phase circuits, transformers, star and delta connections and mathematics for logic controls.
177 ELECTRIC MOTOR CONTROL I (3)
Lecture, 3 hours
This course studies basic motor control fundamentals including the basic functions of control. Magnetic principles of D.C. and A.C. motors, types of motors, motor selection fundamentals are reviewed. Topics covered also include definitions for controller components and symbols, familiarization with N.E.M.A. standards and review of one-line, wiring and schematic diagrams.

178 ELECTRIC MOTOR CONTROL II (3)
Recommended Preparation: ECONMT 177 with a grade of “C” or better.
Lecture, 3 hours
This course focuses on a brief review of material covered in Electric Motor Control I and the selection and application of D.C. and A.C. controllers with emphasis on the A.C. devices. Study areas include manual, magnetic, across-the-line starters, as well as most forms of reduced voltage starters including the auto transformer, primary resistor, star-delta, part-winding and wound rotor type reduced voltage starters. Synchronous, multi-speed starters and the many methods of decelerating and braking and static components are discussed.

181 BASIC WIRING PRACTICES (3)
Lecture, 3 hours
Electrical diagrams including fundamental, ladder, schematic, cable, and conduit are studied in this course. Topics of discussion include architectural symbols and drawings, reading plans and specifications, as well as drawing circuits and plans.

182 BASIC DIAGRAM AND CIRCUIT PRACTICES (1)
Laboratory, 3 hours
This course provides practical shop practice in the wiring of signal, communication and control circuits. Connection of device mechanisms such as lights, buzzers and relays are specifically reviewed.

183 RESIDENTIAL ELECTRIC WIRING (3)
Lecture, 3 hours
This course covers design and layout of residential electric wiring in accordance with code requirements and recognized good practice.

184 MOTOR CONTROL PRINCIPLES AND PRACTICES (3)
Lecture, 1.5 hours; Laboratory, 4.5 hours
This course reviews testing, adjusting, servicing and connecting motors, generators and associated controllers.

186 INDUSTRIAL ELECTRICAL PRINCIPLES AND PRACTICES (3)
Lecture, 1.5 hours; Laboratory, 4.5 hours
Topics such as use of measuring instruments, connecting and testing transformer banks, and connecting and testing industrial electronic control devices are explored in this course.

187 ADVANCED PROGRAMMABLE CONTROLLERS (4)
Recommended Preparation: ECONMT 142 or 159 with a grade of “C” or better.
Lecture, 2.5 hours; Laboratory, 4.5 hours
This course focuses on advanced programmable controller techniques including ladder logic and Boolean algebra in a hands-on laboratory environment.

188 OFFLINE PLC PROGRAMMING (3)
Recommended Preparation: ECONMT 142
Lecture, 1.5 hours; Laboratory, 4.5 hours
This course is a study of programmable controller laboratory for off line programming in a computer environment.

190 ELECTRICAL CODE CALCULATIONS (3)
Recommended Preparation: ECONMT 115
Lecture, 3 hours
This course covers calculation of wire sizes, outlet boxes, conduit fill, ampacities, voltage drop, motor circuit components, and service loads based on National Electrical Code standards.

191 ELECTRICAL WIRING SYSTEMS (2)
Recommended Preparation: ECONMT 173 with a grade of “C” or better.
Lecture, 1 hour; Laboratory, 3 hours
Instruction is given in installation of wiring systems such as non-metallic sheathed cable, armored cable, flexible metal conduit, electrical metallic tubing, and PVC. Emphasis is given on National Electric Code standards.

192 RESIDENTIAL WIRING AND PRACTICES (2)
Recommended Preparation: ECONMT 181 with a grade of “C” or better.
Lecture, 1 hour; Laboratory, 3 hours
Instruction is given in residential wiring methods including non-metallic sheathed cable, armor cable and flexible metal conduit for outlet, appliances and lighting.

193 CONDUIT BENDING AND CALCULATIONS (3)
Recommended Preparation: ECONMT 173 with a grade of “C” or better.
Lecture, 1.5 hours; Laboratory, 4.5 hours
This course studies calculations involved in bending, cutting, and threading conduit operations. IMC, EMT, and rigid conduit will be sent with hand benders and hydraulic benders.

193A CONDUIT BENDING LABORATORY (1)
Recommended Preparation: ECONMT 173 with a grade of “C” or better.
Laboratory, 3 hours
This course involves the bending, cutting, and threading of conduit. IMC, EMT, and rigid conduit will be bent with hand benders and hydraulic benders.

194 DOCUMENTATION CONTROL IN CONSTRUCTION PROJECTS (2)
Lecture: 2 hours
This course presents an in-depth and hands on understanding of the documentation that controls, maintains and implements a construction project. Communication through proper paperwork enables the builder to efficiently manage and control the project.

195 GROUNDING: FUNDAMENTALS, APPLICATIONS AND PRACTICES (3)
Recommended Preparation: ECONMT 115 & 129 with a grade of “C” or better.
Lecture: 3 hours
This course will cover the fundamentals of electrical system grounding principles of reviewing definitions, theory, and equipment installations. Application to accepted industry practices, compliance to the National Electrical Code, review of lightning protection and electronic equipment grounding will be covered.

196 INFRASTRUCTURE WIRING PRACTICES (4)
Lecture: 1 hour; Lab: 6 hours
This course offers instruction in the installation, termination and documentations of infrastructure wiring as used in the industry today, including the following. Coaxial cable, category 3, 5, SE (UTP) and fiber optics.

197 LOW VOLTAGE ELECTRICAL PRACTICES (3)
Lecture: 1.5 hours; Lab: 4.5 hours
This course offers instruction in the installation, termination and documentation of low voltage systems, such as lighting, communication, telephone, data, control systems, and similar low voltage applications.
199  JOURNEY ELECTRICIAN EXAM PREPARATION (3)
Lecture: 1.5 hours; Lab: 4.5 hours
This course will prepare the student for the State of California Electricians’ Certification Examination. The distance education version of the class uses the Internet, World Wide Web and personal mail.

200  ELECTRICAL CONSTRUCTION INSPECTION (3)
Lecture: 3 hours
This class provides specific inspector training in inspecting electrical construction with an intense study of the National Electrical Code (NEC). This course will prepare the student to take the voluntary Electrical Inspector voluntary certification exam given by the International Conference of Building Official (ICBO).

205  FUNDAMENTALS OF SOLAR ENERGY (2)
Lab: 6 hours
This course is designed for individuals that have the basic electrical and mechanical skills of an energy technician or electrician and are looking to expand into the renewable energy field. This is a hands on class to develop the fundamental principles and practices for installation and maintenance of solar, wind, and similar renewable energy systems. This course covers basic planning, installation, and maintenance of the necessary components for various renewable energy systems.

210  FUNDAMENTALS OF PROCESS INSTRUMENTATION (3)
Lecture: 3 hours
This class provides a study of the measurement and control of temperature, pressure, level, flow, humidity and other factors that can be analyzed and controlled. It includes a study of instrumentation symbols. Process and Instrumentation Diagrams, and the use of pneumatic and electric sensors, transmitters, controllers, valves, actuators, positioners, Programmable Logic Controllers, and computers to implement control strategy.

ELECTRICAL LINEMAN

MISSION STATEMENT
In cooperation with the Mission Statements of both, Los Angeles Trade - Technical College, and the Department of Construction, Design, and Manufacturing; the faculty and staff of “Electrical Lineman” will continually endeavor to provide our students with a highest quality education, cutting edge technology, and the necessary skill sets to succeed in the in electric utility industry.

601  POWER LINE MECHANIC TRAINEE (15)
Lecture: 6 hours  Laboratory: 27 hours
The goal of this course is to produce candidates for an Electrical Distribution Mechanic (EDM) training program. Development of basic skills needed to be successful trainees will be emphasized. These skills include: overall safety considerations, power pole climbing skills, knowledge of the basic tools and materials involved with the electrical line crafts, general construction standards, basic rigging principles, and basic electrical theory that is specific to this trade. A 175 hour power pole-climbing certificate of completion is granted to students who successfully complete this course. A component of this course includes preparation for Civil Service Examination.

SPECIAL NOTE: During the course of instruction students will be required to lift up to 60 lbs with repetition and will be required to climb and perform installation and maintenance operations at the top of 30 foot power poles. Physical or psychological limitations should be taken into account when enrolling in the class.

ELECTRONICS

2  INTRODUCTION TO ELECTRONICS (3) CSU
Lecture: 3 hours
This course provides an overview of the field of applied electronics. Typical topics included are a study of the natural forces that make electronics possible, science, communications, and the start of the digital invasion into our homes and work.

ELECTRONICS TECHNOLOGY

150  SOLDERING SURFACE MOUNT TECHNOLOGY (3) CSU
Lecture: 2 hours; Lab: 3 hours
This course provides an introduction of through hole soldering technology as well as principles of surface mount rework, show the range of specific equipment used in that process and provide a framework for learning about various rework methods. Recommended procedures for removal and replacement of surface mount chip components are also covered.

151  DC THEORY AND CIRCUIT FUNDAMENTALS (3) CSU
Lecture: 3 hours
Instruction is given in basic electrical concepts, electron theory. Ohm’s Law, Kirchoffs Laws, series circuits, Parallel circuits, combination circuits, principles of magnetism; and the care, use, and construction of basic meters for voltage, current, and resistance measurements. Problems illustrating accuracy necessary in measurements are given.

152  DC THEORY AND CIRCUIT FUNDAMENTALS LAB (2)
Lab: 6 hours
Instruction is given in constructing basic electrical circuits. Series, parallel and series/parallel circuits are constructed and troubleshot to understand the concept of troubleshooting techniques. Problems illustrating accuracy necessary in measurements are given.

153  APPLIED DC CALCULATIONS (1)
Lecture: 1 hour
This course offers a review on basic arithmetic including addition, subtraction, multiplication, division, fractions, decimals, square roots, signed numbers, powers of ten, an introduction to algebra, and problems solving Ohm’s Law and power calculations. Instruction is also provided in algebra, calculators, logarithms, graphs, phasors, and basic trigonometry as used in electronics.

154  AC THEORY AND CIRCUIT FUNDAMENTALS (3)
Lecture: 3 hours
Recommended Preparation: Electronics Technology 151 with a grade of “C” or better.
This course offers the Theory of AC Electronics as it applies to basic and advanced circuits found in analog electronics. The course prepares the student for more advanced studies in communications and digital electronics. Subjects covered include capacitors, magnetic circuits, inductors, sinusoidal alternating waveforms, basic elements and phasors, series and parallel AC circuits, series-parallel AC networks, methods of analysis, network theorems (AC), power (AC), resonance, filters and bode plots, pulse waveforms, and an introduction to system analysis. Basic algebra and trigonometry will be used as the tools for understanding the AC circuit as it applies to electronics systems.
155 AC THEORY AND CIRCUIT FUNDAMENTALS LAB (2)
Lab: 6 hours
Recommended Preparation: Electronics Technology 152 with a grade of "C" or better.
This course provides an overview of the field in AC electronics that measures and analyzes the parameters and characteristics of AC circuits. Students will study their applications in electronic systems and becomes familiar with the various components used to make a viable circuit. In class, the students will also learn to construct and troubleshoot AC circuits.

156 APPLIED AC CALCULATIONS (1)
Lecture: 1 hour
Recommended Preparation: Electronics Technology 153 with a grade of "C" or better.
At the completion of this course, students will be able to perform mathematical functions used in AC circuit analysis. The topics include solving various algebraic equations, fractional equations, simultaneous equations, trigonometric functions, vector algebra, and logarithms. An emphasis is placed on calculations involving series, parallel, and series-parallel AC circuits.

157 SEMICONDUCTORS DEVICES AND APPLICATIONS (3)
Lecture: 3 hours
Recommended Preparation: Electronics Technology 154 with a grade of "C" or better.
This course covers the various applications of semiconductor devices. Included are PN junction diodes, Zener diodes, rectifiers, transistors, class A, B, AB amplifiers and operational amplifiers.

158 SEMICONDUCTORS DEVICES AND ELECTRONICS LABORATORY (3)
Lab: 9 hours
Recommended Preparation: Electronics Technology 155 with a grade of "C" or better.
In this course, students measure and analyze the parameters and characteristics of semiconductor devices and become familiar with the use of transistor testers. The student also constructs, tests, and analyzes power supply circuits, receivers, amplifier circuits, oscillator circuit, and converter circuits. Trouble-shooting procedures and techniques are introduced, and integrated circuits are also constructed and tested.

159 DIGITAL CIRCUITS AND APPLICATIONS (3)
Lecture: 3 hours
Recommended Preparation: Electronics Technology 154 with a grade of "C" or better.
This is an introductory course in digital electronics and applications. The course covers the number systems, including the decimal, binary, octal, and hexadecimal number systems. The topics covered include the characteristics of TTL and CMOS logic families, combinational logic circuits, minimizing logic circuits, minimizing logic circuits using Boolean Operations and Karnaugh maps, encoders and decoders, sequential logic devices such as flip-flops, counters, shift registers, and memory devices.

160 DIGITAL CIRCUITS AND APPLICATIONS LAB (2)
Lecture: 6 hours
Recommended Preparation: Electronics Technology 159 with a grade of "C" or better.
This is an introductory course in digital electronics and applications. The course covers the number systems, including the decimal, binary, octal, and hexadecimal number systems. Lab activities include the characteristics of TTL and CMOS logic families, combinational logic circuits, minimizing logic-circuits using Boolean Operations and Karnaugh maps, encoders and decoders, sequential logic devices such as flip-flops, counters, shift registers, and memory devices. Some lab activities include the use of software simulators such as Electronics Workbench.

161 F.C.C. RADIO OPERATOR LICENSE (3)
Lecture: 3 hours
Recommended Preparation: Electronics Technology 154 with a grade of "C" or better.
This course provides information needed by the electronics technician to aid in passing the F.C.C. General Radiotelephone License examination. The F.C.C. rules, regulations, and theory areas are explained and sample F.C.C. type tests are given. Marine and aeronautical rules and regulations are also studied and are necessary for passing the general radiotelephone examination.

162 INTRODUCTION TO ELECTRONICS COMMUNICATIONS (3)
Lecture: 3 hours
Recommended Preparation: Electronics Technology 157 with a grade of "C" or better.
This course covers circuit analysis of several complete AM/FM systems. The installations of C Band, K/U Band, and DSS satellite systems, the theory of cordless phones, microwave receivers/transmitters, cell phones, and TV video are covered.

163 INTRODUCTION TO ELECTRONICS COMMUNICATIONS LAB (3)
Lab: 9 hours
Recommended Preparation: Electronics Technology 158 with a grade of "C" or better.
This course allows students direct laboratory application of the radio principles and techniques acquired in the lecture sessions. Laboratory experiments will include the construction and analysis of circuits, AM modulation, AM detection, FM modulation, frequency multiplication, limiting, FM discrimination, and the construction, testing and alignment of a complete AM super-heterodyne radio receiver. Microprocessor, digital and solid state troubleshooting techniques are analyzed and performed, as are system level to component level troubleshooting and repair. Basic antenna measurements, troubleshooting and repairs are made.

165 ADVANCED AUTOMOTIVE ELECTRONICS (3)
Lecture: 3 hours
This course teaches electricity and electronics from an automotive perspective. Traditional subjects such as Ohm's Law, Series Circuits, and parallel Circuits are presented using examples from automotive systems and calculations that are based on actual values found in automotive electricity. An emphasis placed on automotive electronics systems such as Turn Signal, Starting, Ignition, Charging, Fuel Injection, Engine Cooling, and Climate Control systems.

254 COMPUTER APPLICATIONS FOR ELECTRONICS TECHNOLOGY (3) RPT1
Lecture: 2 hours; Lab: 3 hours
This course introduces students to computer hardware, computer software related technology, and their impact on society and education. Hands-on experience will be provided with applications of software, such as Excel, Word, and PowerPoint. Special emphasis will be provided on electronics applications software such as Electronic Workbench, and VISIO.

255 COMPUTER-BASED ELECTRONICS (1)
Lab: 3 hours
An introduction to Electronics Workbench (MultiSim), Electronics Technology Computer-Aided Instruction (ETCAI), and MultiSim Computer-Based Training (CBT) software. This course is designed to enable students to construct and analyze circuits using Electronics Workbench. It also enables students to increase their knowledge of electronics using CAI.
ENGLISH

21 ENGLISH FUNDAMENTALS (3) NDA
Prerequisite: Developmental Communications 21 or English 64 with a grade of “C” or better or placement process
Lecture: 3 hours
This beginning composition course reviews the essentials of good sentence writing: grammar, usage, and mechanics. The main emphasis is on practice of paragraph and essay construction. This course focuses on the fundamentals of academic reading, writing, and critical thinking. It reinforces basic skills such as the correct use of punctuation, spelling, and sentence structure. Students incorporate these skills, along with sentence combining techniques, to write paragraphs that have a topic sentence, support, and unity.

68 READING LABORATORY (0.5) NDA RPT3
Lab: 1 hour
Students will improve their writing skills through one-to-one conferences, workshops, and computer instruction with oversight from an instructor and assistance from tutors. Students will develop their understanding of purpose, audience, drafting, revision, and editing. Students will also focus on improving sentence and paragraph structure, and grammar and punctuation. This class is open to all students.

94 INTENSIVE GRAMMAR REVIEW (3) NDA RPT1
Prerequisite: English 21 with a grade of “C” or better or placement process
Lecture: 3 hours
This course offers an intensive review of the principles of standard American English: sentence structure and variety, diction, and grammar, including parts of speech, verb forms and tenses, fragments, run-ons, and other issues in grammar and usage. Students will learn to identify errors and correct errors in selected texts. Instruction will also include research paper format and avoidance of plagiarism.

101 COLLEGE READING AND COMPOSITION I (3) UC:CSU
Prerequisite: English 28 or ESL 8 with a grade of “C” or better or placement process.
Lecture: 3 hours
In English 101, students extend their knowledge of the principles and structure of academic writing beyond the level of English 28 through the practice of writing essays and the analysis of non-fiction and short full-length fiction. The course includes an introduction to persuasive discourse, research skills, critical reading and thinking, and argumentation. Various compositions and extensive research assignments are required. English 101 fulfills the writing requirement for the Associate of Arts degree and fulfills the transfer requirement to a four-year college.

101H COLLEGE READING AND COMPOSITION I - HONORS (3) UC:CSU
Prerequisite: English 28 or ESL 8 with a grade of “C” or better or placement process.
Lecture: 3 hours
In English 101H, students extend their knowledge of the principles and structure of academic writing beyond the level of English 28 through the practice of writing essays and the analysis of non-fiction and short full-length fiction. The course includes an introduction to persuasive discourse, research skills, critical reading and thinking, and argumentation. Various compositions and extensive research assignments are required. English 101H fulfills the writing requirement for the Associate of Arts degree and fulfills the transfer requirement to a four-year college. Honors students will be assigned readings and written analyses that extend well beyond the scope of the regular English 101 course.

102 COLLEGE READING AND WRITING II: INTRODUCTION TO LITERATURE (3) UC:CSU
Prerequisite: English 101 with a grade of “C” or better or placement process.
Lecture: 3 hours
English 102 is a survey course that introduces students to the critical reading of short stories, novels, plays, and poems. Reading selections will represent the ancient through the modern. The course further develops skills taught in English 101, including analytical thinking, research, and essay writing.

102H COLLEGE READING AND WRITING II: INTRODUCTION TO LITERATURE - HONORS (3) UC:CSU
Prerequisite: English 101 with a grade of “C” or better
Lecture: 3 hours
English 102H is a survey course that introduces students to the critical reading of short stories, novels, plays, and poems. Reading selections will represent the ancient through the modern. The course further develops skills taught in English 101, including analytical thinking, research, and essay writing. Honors students will be assigned extensive readings and research papers beyond the regular English 102 course.

103 COMPOSITION AND CRITICAL THINKING (3) UC:CSU
Prerequisite: English 101 with a grade of “C” or better
Lecture: 3 hours
This course is designed to help students clarify and refine their thinking and reasoning processes, allowing them more effectively solve problems and analyze complex issues. Students will develop skills in critical thinking, reading, and writing which will help them to succeed in their other academic coursework, regardless of discipline. Writing assignments will emphasize critical analysis and argumentation.

103H COMPOSITION AND CRITICAL THINKING (3) UC:CSU
Prerequisite: English 101 with a grade of “C” or better
Lecture: 3 hours
This course is designed to help students clarify and refine their thinking and reasoning processes, allowing them more effectively solve problems and analyze complex issues. Students will develop skills in critical thinking, reading, and writing which will help them to succeed in their other academic coursework, regardless of discipline. Writing assignments will emphasize critical analysis and argumentation. Honors students will be assigned readings and written analyses that extend well beyond the scope of the regular English 101 course.
127 CREATIVE WRITING (3) RPT3 CSU
Prerequisite: English 28 with a grade of "C" or better
Lecture: 3 hours
This course is an introductory "workshop" offering "hands-on" exercises in crafting short stories, poetry, literary sketches, and screenwriting. Students will present their writings for informal discussion by class members to exchange ideas and improve creative technique.

150 PEER TUTORING IN WRITING: THEORY AND PRACTICE (0.5)
Prerequisite: English 28 with a grade of "C" or better
Laboratory: 1 hour
Instruction will take place in a center serving student writers. This course introduces students to writing theory and methods of effective tutoring in writing. Tutors will be given concrete guidance on observing, participating, and analyzing sessions with student writers. Covers special topics in writing across the curriculum. Focuses on challenges of tutoring writing and on designing a rewarding experience for both the peer tutor and the student writer and instructor.

203 WORLD LITERATURE I (3) UC:CSU
Prerequisite: English 101 with a grade of "C" or better
Lecture: 3 hours
This course provides a survey of literature from throughout the world up to the year 1700. Readings include Greek and Roman masterpieces, the Bible, and medieval and renaissance classics from Europe, Asia, Africa, and Central America. Students will learn to explore the relationship between the written works and their cultures as well as their significance to modern society.

205 ENGLISH LITERATURE I (3) UC:CSU
Prerequisite: English 101 with a grade of "C" or better
Lecture: 3 hours
The course provides a historical survey of English literature, from inception to the decline of neo-classicism in the 18th century. An emphasis is placed on major figures and works from each era.

205H ENGLISH LITERATURE I - HONORS (3) UC:CSU
Prerequisite: English 101 with a grade of "C" or better
Lecture: 3 hours
The course provides a historical survey of English literature, from inception to the decline of neo-classicism in the 18th century. An emphasis is placed on major figures and works from each era. Honors students will be assigned extensive reading and research papers beyond the regular English 205 course.

206 ENGLISH LITERATURE II (3) UC:CSU
Prerequisite: English 101 with a grade of "C" or better
Lecture: 3 hours
Chronological survey of major authors and texts of British literature from the Romantic period, the Victorian Age, the Twentieth Century, and after. Extensive reading and discussion of works; strong writing component and emphasis on textual analysis. Examination of the relationship between historical events and literary works.

206H ENGLISH LITERATURE II - HONORS (3) UC:CSU
Prerequisite: English 101 with a grade of "C" or better
Lecture: 3 hours
Chronological survey of major authors and texts of British literature from the Romantic period, the Victorian Age, the Twentieth Century, and after. Extensive reading and discussion of works; strong writing component and emphasis on textual analysis. Examination of the relationship between historical events and literary works. Honors students will be assigned extensive reading and research papers beyond the regular English 206 course.

207 AMERICAN LITERATURE I (3) UC:CSU
Prerequisite: English 101 with a grade of "C" or better
Lecture: 3 hours
This course surveys American literature from 1608 to the Civil War, emphasizing major writers and works, as well as writers who suggest the diversity of subject and opinion in American literature.

208 AMERICAN LITERATURE II (3) UC:CSU
Prerequisite: English 101 with a grade of "C" or better
Lecture: 3 hours
Course provides a survey of the literature of the United States from the Civil War to the present with emphasis on the major writers and their works.

212 POETRY (3) UC:CSU RPT1
Prerequisite: English 101 with a grade of "C" or better
Lecture: 3 hours
The course is designed to increase the students' understanding and enjoyment of poetry through the reading, discussion, and analysis of selected American, British, and world poetry. Students will also write and critique poetry of their own.

212H POETRY - HONORS (3) UC:CSU
Prerequisite: English 101 with a grade of "C" or better
Lecture: 3 hours
English 212 features the reading, discussion, and analysis of selected American, British, and world poetry. Students will also write poetry. The course is designed to increase the students' understanding and enjoyment of poetry. Honors students will be assigned extensive readings and research papers beyond the regular English 212 course.

213 DRAMATIC LITERATURE (3) UC:CSU
Prerequisite: English 101 with a grade of "C" or better
Lecture: 3 hours
This course includes reading, discussion and interpretation of selected American, British, Continental, Asian and African dramatic literature. Activities are coordinated with the Theater Arts Department and include videos and field trips to theaters and to theatrical performances.

214 CONTEMPORARY LITERATURE (3) UC PENDING:CSU
Prerequisite: English 101 with a grade of "C" or better
Lecture: 3 hours
A survey of the 20th Century trends and development in English and American poetry, fiction, and criticism is presented in this course. Reading and discussions focus upon literary innovations, cultural influences, and historical comparisons.

215 SHAKESPEARE I (3) UC:CSU
Prerequisite: English 101 with a grade of "C" or better
Lecture: 3 hours
This course introduces students to Shakespeare's prose and poetry through several major plays and sonnets with an additional examination of Elizabethan England and the relationship between historical events and literary works. The course features a strong reading and writing component with an emphasis on class discussion, research, and textual analysis.

215H SHAKESPEARE I - HONORS (3) UC:CSU
Prerequisite: English 101 with a grade of "C" or better
Lecture: 3 hours
This course introduces students to Shakespeare's prose and poetry through several major plays and sonnets with an additional examination of Elizabethan England and the relationship between historical events and literary works. The course features a strong reading and writing component with an emphasis on class discussion, research, and textual analysis. Honors students will be assigned extensive readings and research papers beyond the regular Shakespeare 215 course.
218  CHILDREN’S LITERATURE (3) CSU  
Prerequisite: English 101 with a grade of “C” or better  
Lecture: 3 hours  
Course provides a survey of the literature suitable for children of different age levels, preschool through high school. Emphasis is placed on storytelling, acquaintance with authors, and developing positive attitudes toward literature in young children. Recommended for prospective nursery, kindergarten, elementary, and secondary teachers.

219  THE LITERATURE OF AMERICAN ETHNIC GROUPS (3) UC:CSU  
Prerequisite: English 101 with a grade of “C” or better  
Lecture: 3 hours  
This course surveys significant literary writings of American ethnic groups: Black Americans, Asian Americans, Hispanic Americans, Indian Americans, and Jewish Americans, with emphasis upon their aesthetic, cultural, and historical insights and values.

220  CONTEMPORARY LATIN AMERICAN SHORT STORY (3) UC:CSU  
Prerequisite: English 101 with a grade of “C” or better  
Lecture: 3 hours  
This course offers a study of contemporary Latin-American short stories from Mexico, Central America as well as the United States. The course covers themes of social realism, magical realism, and the Chicano Literary Movement. Writers studied include Paz, Borges, Garcia-Marquez, Cossio, and Vranmontes.

234  AFRICAN AMERICAN LITERATURE (3) UC:CSU  
Recommended: English 101 with a grade of “C” or better  
Lecture: 3 hours  
This course analyzes the major literary, social and historical aspects of essays, novels, drama, short stories, and poetry written by African Americans, revealing the progression of black awareness in America as interpreted by African American writers.

240  LITERATURE AND THE MOTION PICTURE I (3) UC:CSU  
Prerequisite: English 101 with a grade of “C” or better  
Lecture: 3 hours  
This course is designed to give the student opportunities to view, analyze, and evaluate films of artistic and cultural significance. The relationship between literature and film is discussed and evaluated.

270  SCIENCE FICTION AND FANTASY (3) UC:CSU  
Prerequisite: English 101 with a grade of “C” or better  
Lecture: 3 hours  
Course covers the study of science fiction and fantasy works as literature. Class discussions emphasize the use of mythology, the history and traditions of the genre, science fiction and fantasy as escape literature, and political and philosophical commentary in the works studied.

---

ENGLISH AS A SECOND LANGUAGE

1  INTEGRATED SKILLS (12) CR/NCR NDA  
Lecture: 12 hours  
This is an intensive multi-skills beginning level course introducing simple grammatical structures, vocabulary, simplified reading material, and conversational sentences relating to topics presented.

2  INTEGRATED SKILLS (12) CR/NCR NDA  
Prerequisite: ESL 1 with a grade of “CR” or placement process.  
Lecture: 12 hours  
This is a higher beginning level class in which review of basic material is very strongly emphasized. Students practice basic speaking, listening, and grammar, high-beginning level reading, and pre-paragraph writing of strings of five to ten sentences.

3A  WRITING AND GRAMMAR (6)  
Prerequisite: ESL 2 with a grade of “CR” or placement process.  
Lecture: 6 hours  
Students continue to learn good sentence writing, which includes basic punctuation and grammar. Students are also introduced to beginning level paragraph writing. ESL 3A is part of a sequence of ESL writing courses that prepare students for college level composition.

3B  READING AND VOCABULARY (3)  
Prerequisite: ESL 2 with a grade of “CR” or placement process.  
Lecture: 3 hours  
In this class, students learn and review low-intermediate level English reading skills including previewing, skimming, scanning, identifying the main idea, understanding simple charts and graphs, and basic dictionary skills. Students learn new vocabulary and practice figuring out new words from the context of the surrounding sentence.

3C  LISTENING AND SPEAKING (3)  
Prerequisite: ESL 2 with a grade of “CR” or placement process.  
Lecture: 3 hours  
This is a low-intermediate level class in which students learn to understand and practice following directions spoken at normal speeds on topics and functions related to everyday communication in the academic and employment world. Listening practice discriminates between statements of fact and opinion, questions and commands. Speaking practice will produce short answers and simple sentences expressing fact and personal opinion.

4A  WRITING AND GRAMMAR (6)  
Prerequisite: ESL 3A with a grade of “C” or better or placement process.  
Lecture: 6 hours  
In this course, students continue to study grammar, sentence writing and paragraph writing, and move forward to producing simple essays. ESL 4A is part of a sequence of ESL writing courses that prepare students for college level composition.

4B  READING AND VOCABULARY (3)  
Prerequisite: ESL 3B with a grade of “C” or better or placement process.  
Lecture: 3 hours  
Students review the skills learned in 3B and practice new intermediate level skills, including taking notes on readings and summarizing main ideas from notes, understanding the concept of outlining and filling in partial outlines, distinguishing the difference between fact and opinion in readings, and expanded dictionary skills. Students also learn new vocabulary, including the various forms (noun, verb, adjective and/or adverb) of new words.

4C  LISTENING AND SPEAKING (3)  
Prerequisite: ESL 3C with a grade of “C” or better or placement process.  
Lecture: 3 hours  
This is an intermediate level course whereby students learn to identify and understand standard English spoken by various voices. Listening practice discriminates among verb tenses. Speaking practice will produce statements and questions in the appropriate verb tenses. Students learn to interpret American culture through body language and common idioms. Students will give brief presentations.

5A  WRITING AND GRAMMAR (6)  
Prerequisite: ESL 4A with a grade of “C” or better or placement process.  
Lecture: 6 hours  
Students consolidate grammar and paragraph writing skills. They also practice writing organized, well-developed essays. ESL 5A is part of a sequence of courses that prepare students for college level composition.
Course Descriptions

5B READING AND VOCABULARY (3)
Prerequisite: ESL 4B with a grade of “C” or better or placement process.
Lecture: 3 hours
Students review the skills learned in 4B and practice new high-intermediate level skills, including understanding inferences, taking notes and organizing them into a complete outline, writing and presenting a summary and reader response, basic library skills, and strategic reading skills for the purpose of test-taking. Students also learn new vocabulary, and learn to use prefixes and suffixes as an aid to understanding new words.

5C LISTENING AND SPEAKING (3)
Prerequisite: ESL 4C with a grade of “C” or better or placement process.
Lecture: 3 hours
In this high-intermediate class, students learn to communicate in everyday situations in the real world using expected probes and responses. Students will understand difference in meaning expressed through spoken intonation and non-verbal communication. Students will orally improvise in conversational situations and will make brief formal presentations. Students will become familiar with idiomatic expressions.

6A WRITING AND GRAMMAR (6)
Prerequisite: ESL 5A or English 64 with a grade of “C” or better or placement process.
Lecture: 6 hours
Students practice prewriting, editing, and rewriting skills that will lead to organized, well developed essays. A short research paper is also included. ESL 6A is part of sequel of ESL writing courses that leads to college level composition.

7C SPEAKING AND LISTENING (AMERICAN ACCENT TRAINING) (3) NDA
Prerequisite: ESL 3 (A, B or C) or placement process.
Lecture: 3 hours
This course provides intermediate level practice in improving the pronunciation of spoken English by non-native speakers. Students develop an American pronunciation pattern so that greater clarity is achieved.

8 ADVANCED ESL COMPOSITION (6) UC:CSU
Prerequisite: ESL 6A or English 21 with a grade of “C” or better or placement process.
Lecture: 6 hours
This is an advanced course in written composition and critical reading skills. It is a prerequisite to English 101. The emphasis is on writing based primarily on critical reading and secondarily on life experiences. Advanced grammar skills are emphasized throughout each lesson.

10 ENGLISH GRAMMAR AND SENTENCE PATTERNS (3) NDA
Prerequisite: ESL 3A with a grade of “C” or better
Lecture: 3 hours
This course is an intermediate level course that focuses on English sentence patterns, which inherently teach punctuation and sentence structure. There will also be a strong emphasis on grammar, particularly verb tenses.

11 IDIOMS FOR ENGLISH LANGUAGE CONVERSATION (3) NDA
Prerequisite: ESL 3 (A, B or C) with a grade of “C” or better
Lecture: 3 hours
In this intermediate level course, ESL students expand their ability to understand and use naturally spoken American English through idiom study and conversation practice.

ENVIRONMENTAL DESIGN

101 ELEMENTS OF ARCHITECTURE (3)
Lecture: 1 hour; Lab: 4 hours (Formerly ARCH 9)
Basic architectural elements, form and composition are studies mainly through two-dimensional drawing media to organize space. Some two-dimensional concepts are translated and transformed into a three-dimensional conceptual model. Emphasis is placed in analytic techniques and problem solving in the design process.

ENVIRONMENTAL SCIENCE

1 THE HUMAN ENVIRONMENT: PHYSICAL PROCESSES (3) UC:CSU
Lecture: 3 hours
Introduction to the environmental mechanism that constitute our life support systems and the social, political and economic factors that are the ultimate cause of these problems. This includes an examination of the difference between science and technology and the limits to technological solutions to our environmental problems. The basic science required to understand how our environmental system work is presented followed by analysis of the essential issues are analyzed along with potential solution to these problems where they exist.

FASHION DESIGN

1 FASHION INDUSTRY EMPLOYMENT INFORMATION (1)
Lecture: 1 hour
This course provides students with basic information about the Fashion industry and related occupations; including essential facts, key institutions, history, career pathways and trends; and competencies necessary to be successful in the career pathways of the industry. This course provides students with the basic research and networking skills in the fashion industry to make a well-informed decision about pursuing a career-pathway within the industry, as well as, an understanding of the requisite technical (fashion-related), academic, and interpersonal competencies they will need to acquire to be successful.

3 FASHION DESIGN ESSENTIAL SKILLS (2)
Lab: 2 hours
This course provides basic essential skills to be successful as a fashion design student. Basic machine operations and pattern manipulations will be covered.

101 INTRODUCTION TO FASHION DESIGN (2)
Lecture: 1.5 hours; Lab: 1.5 hours; Out of class work: 3 hours
This course will introduce the student to the opportunities in the field of fashion design. Students will learn how vocabulary, math skills, and study skills are applicable to the field, better preparing them to enter a full-time program. Course will include hands-on activities demonstrating the applicability of the above skills.
### Course Descriptions

**APPAREL ASSEMBLY METHODS (1)**  
Lab: 3 hours  
This class is designed to allow assembly instruction while working on construction of projects. Students will select sewing projects under the guidance of the instructor.

**INTRODUCTION TO COMPUTER FASHION ART (2)**  
Lecture: 1 hour; Lab: 2 hours  
This course offers introduction to Adobe Photoshop and Adobe Illustrator or current software using MAC computers. Emphasis is placed on the preparation and input of fashion design ideas for a fashion design portfolio and presentation as required by industry standards.

**CLOTHING CONSTRUCTION I (4) CSU**  
Lecture: 1.5 hours; Lab: 7.5 hours  
The student will be given instruction in single needle machine operation, sewing technique projects, garment assembly projects, occupational information and method of evaluation and relationship to the Fashion Industry. Basic information needed for entry level employment is provided.

**BEGINNING FASHION ART AND DESIGN (4) CSU**  
Lecture: 1.5 hours; Lab: 7.5 hours  
Instruction includes drawing of women's fashion figure, drawing children and men's figures, flats, various clothing styles and details. Introduction to color, design theory, fabric properties and rendering. Merchandising a garment line.

**HISTORY OF COSTUME (3)**  
Lecture: 3 hours  
This course surveys the origins and development of clothing from prehistoric times through the 20th century. Students will explore costume from its earliest origins through adaptation and assimilation into popular "fashion" in each century. Instruction will include in-depth study of fashion trends, creators, and political climate that has influenced the creation of men's and women's fashion. The influence of historical costume on contemporary dress is discussed.

**BASIC PATTERN MAKING AND DESIGN (4) CSU**  
Prerequisites: Successful completion of a grade of "C" or better in Fashion Design 111 and 112.  
Lecture: 1.5 hours; Lab: 7.5 hours  
Instruction is given in drafting the basic block, multiple darts and gathers, style lines, sleeves, collars, skirts, and bodice silhouettes.

**GRADING AND MARKER MAKING (4)**  
Instruction is given in grading the basic block, multi-patterns, and complete patterns for men, women and children, in a variety of sizes, make a marker, manipulate the one and two dart block, draft the basic dart positions, demonstrate the slash and pivot methods, draft extensions, button placement and facing.

**BASIC FITTING PROBLEMS (1)**  
Lecture: 1 hour  
Instruction is given in the general principles of garment fitting according to industry standards. Fitting problems and solutions will be discussed for all types of garments.

**TEXTILES, FIBERS AND FABRICS, PROPERTIES AND MANUFACTURING (3) CSU**  
Lecture: 3 hour  
This course provides an overview of the terminology and characteristics of fabric and the difference between cellulose, protein and man-made fibers. Topics discussed include: types of yarns and properties, twist yarn, yarn numbering systems and factors in yarn influencing quality. Woven, knit, tuffed, non-woven fabrics and additional fabrication methods will be discussed.

**MANUFACTURING AND DESIGN ROOM PROCESSES (1) CSU**  
Lecture: 1 hour  
Instruction is provided on manufacturing and design room process including industry overview and terminology. Cost sheets, specification sheets and inspiration boards will be emphasized in the course.

**TWENTIETH CENTURY DESIGNERS (1) CSU**  
Lecture: 1 hour  
Instruction is focused on the development of the French Couture starting with events in the mid-19th century which lead to the international couture market of the mid-20th century. American designers are also discussed.

**CINEMA COSTUME HISTORY (1) CSU**  
Lecture: 1 hour  
This course follows the development of cinema costuming by tracing the evolution of film styles and the fashion trends of each period. Individual histories of the costume designers who influenced visual life styles through film and television are studied.

**COSTUME FOR THE THEATER (1)**  
Lecture: 1 hour  
Students will select and/or design appropriate costumes for a series of plays and musicals. Video of plays will be shown to enable students to analyze and contrast various designers' concepts of theatrical costuming.

**DRAPING AND DESIGN (4) CSU**  
Prerequisite: Fashion Design 120  
Lecture: 1.5 hours; Lab: 7.5 hours  
Instruction is given in fundamental draping procedures. Basic block and dart variations, yoke styles, torso styles, advanced skirts, cowls, stretch knits, and current style adaptation are practiced.

**ADVANCED PATTERNS AND DESIGN (4) CSU**  
Prerequisites: Successful completion of Fashion Design 111, 112, 120 and 122 with a grade of "C" or better.  
Lecture: 1.5 hours; Lab: 7.5 hours  
Instruction is given in torso, jacket and pant blocks, sleeves-in-one with bodice, neckline variations and style adaptations according to current styling.

**DESIGN A LINE AND CHILDREN'S WEAR (1)**  
Lecture: 1 hour  
Instruction is given in theory of planning the color story, the designer work sheet and merchandising the cost of the garment.

**DESIGN AND USAGE OF TRIMS (1)**  
Lecture: 1 hour  
Instruction will be given in designing Schiffli embroidery, designing screen printing, eyelet, Viennese and string laces, assorted findings comprising braids, cords, ribbons and buttons, local supply sources and specialized design problems with trims.

**BUSTIER CREATION (2)**  
Prerequisites: Successful completion of a grade of "C" or better in Fashion Design 111, 112 and 120  
Lab: 6 hours  
Research historical bustier (corset foundation) designs and construction methods and adapt them to create currently fashionable bustier.
138 TAILORING TECHNIQUES FOR READY TO WEAR (2)
Prerequisite: Successful completion of a grade of “C” or better in Fashion Design 111 or Fashion Design 222
Lab: 4 hours
The objective of this course is to advance the tailoring skills of fashion design students. Instruction will be given on preparation and cutting of fabric, basic hand stitching, the use of steam pressing equipment, and basic elements of tailored apparel.

139 COORDINATED SPORTSWEAR (2) CSU
Prerequisite: Fashion Design 132
Lecture: 1 hour; Lab: 3 hours
Instruction is given on the development of coordinated sportswear including story board presentation and critique. This class has been developed to focus on this most important component of the local apparel industry with concentration on jacket and pant construction and coordination of multiple fabrications within a group.

140 ADVANCED DRAPING AND DESIGN (2)
Prerequisite: Fashion Design 130 or Fashion Design 239
Lecture: 1 hour; Lab: 2 hours
This course includes the draping of selected types of garment and style innovations. Students use either muslin or fashion fabric according to design and fabrication. Original designs are created and executed in fabric.

141 ADVANCED DESIGN (4) CSU
Prerequisites: Successful completion of a grade of “C” or better in Fashion Design 111, 112, 120, 122, 130 and 132.
Lecture: 1.5 hours; Lab: 7.5 hours
Instruction is given in knit blocks, specialized fabrics, dartless blocks, knock-offs, and specialized projects relating to current trends.

142 MANUFACTURING PRODUCTION (4) CSU
Prerequisites: Successful completion of a grade of “C” or better in Fashion Design 111, 112, 120, 122, 130, 132, and 141
Lecture: 1.5 hours; Lab: 7.5 hours
Instruction is given in design and creation of garments for showing to the apparel industry. Included is the creation of children’s and men’s designs along with evening and avant garde styles and the development of a perfect production patterns for a minimum of two ensembles. Field trips, senior evaluation and job orientation are also included.

144 ORIENTATION FOR DESIGNERS (1) (INACTIVE)
Lecture: 1 hour
A course designed to help the Fashion Design student enter the sportswear field with a working knowledge of design procedures, including research and development of a product line following a group concept.

145 DESIGN AND PATTERN ANALYSIS (2) CSU
Recommended Preparation: Successful completion of a grade of “C” or better in Fashion Design 120
Lecture: 1 hour; Lab: 2 hours
Instruction is given in design analysis and the identification of the component parts, as well as analyzing the silhouette and discussing line balance and harmony. The necessary skills for pattern analysis will be studied.

146 DESIGN AESTHETICS AND PRESENTATION (1)
Lecture: 1 hour
Instruction is given in the basic principles of fashion merchandising and costing, including geographical and sociological effects on the garment merchandise. Students will learn to analyze the methods used in costing a garment and preparing it for shipping.

147 FASHION SHOW PRODUCTION (2)
Lecture: 1.5 hours; Lab: 1.5 hours
Instruction is given on developing a theme and overall concept for presenting a fashion show. Topics include history of fashion presentations, model selection, fitting, stage design and execution plus behind the scenes production of a department fashion show.

148 ACTIVEWEAR DESIGN (2)
Prerequisite: Fashion Design 132 or Fashion Design 225
Lecture: 1 hour; Lab: 2 hours
Instruction is given in the specialized area of activewear, focusing on fabrications, design, inner-construction, and sewing techniques. The student will draft basic pattern blocks, design and construct an activewear garment.

150 INTRODUCTION TO APPAREL SYSTEMS (1)
Lecture: 1 hour
This course is an introduction to apparel computer operating systems and their capabilities. In addition, information is provided on the various software applications utilized in the fashion design and merchandising industries.

151 ADVANCED FASHION ART AND DESIGN (2)
Prerequisite: Fashion Design 112 or Fashion Design 236
Lecture: 1 hour; Lab: 2 hours
Introduction is given on design and creation of garments for showing to the apparel industry. Included is the creation of children’s and men’s designs along with evening and avant garde styles and the development of a perfect production pattern for a minimum of two ensembles. Field trips, senior evaluation, and job orientation are also included.

207 SHOE AND HANDBAG DESIGN AND CONSTRUCTION (2) RPT1
Recommended Preparation: Successful completion of a grade of “C” or better in Fashion Design 111 or 222 and 120 or 225
Lab: 6 hours
Instruction is given in the basic design and construction of shoes and handbags. The student will supply their own materials to construct basic constructed shoes or handbags. Students will learn to construct by using single needle power sewing machines.

222 SAMPLE MAKING AND DESIGN I (2)
Lab: 6 hours
The course covers the fundamentals of garment construction using industrial patterns, marker making and industrial power machines. Students are assigned sample projects which demonstrate basic techniques, combining classical with modern manufacturing techniques, with special emphasis on pattern layouts for plaid and prints.

223 SAMPLE MAKING AND DESIGN II (2)
Prerequisite: Fashion Design 222
Lab: 6 hours
The objective of this course is to advance the sewing skills of fashion design students. Students are assigned to create and construct a coordinated group using industrial patterns. Selected blouses, shirts, pants and jacket are made.

224 SAMPLE MAKING AND DESIGN III (2)
Prerequisite: Fashion Design 223
Lab: 6 hours
Instruction is provided in construction and fitting of selected commercial patterns adapted to industry standards. Students receive instruction in the theory of color, line and proportion. They create or select designs suitable to the individual and occasion. Selected soft dressmaker type coats, suits, vests, blouses, and dresses are made.

225 PATTERN MAKING AND DESIGN I (2)
Recommended Preparation: Fashion Design 222
Lab: 6 hours
Entry level class offering instruction in development of a basic block, test fitting, and additional basic pattern making fundamentals.

226 PATTERN MAKING AND DESIGN II (2)
Prerequisite: Fashion Design 225
Lab: 6 hours
Intermediate level class offering instruction on the torso bodice, dartless block and drafting a basic pant then using the blocks to create dresses, shirt styles and pant variations. Advanced skirts styling is also included.
227  PATTERN MAKING AND DESIGN III (2)
Prerequisite: Fashion Design 226
Lab: 6 hours
Advanced level class offering instruction on jackets, advanced sleeve styles, contouring fundamentals, and basic bodysuits and leotards.

228  PATTERN GRADING AND DESIGN I (2)
Lab: 6 hours
This course offers training in increasing and decreasing the pattern size for basic slopers in the several size ranges of men’s, women’s and children’s wearing apparel. Also includes practice in selected methods and in the use of “grading machines” currently used in industry.

229  PATTERN GRADING AND DESIGN II (2)
Lab: 6 hours
Selected whole garments are graded. Research and study is done on the laws of proportionate growth, size ranges, and difficult pattern shapes. Principles of design are correlated to grading problems.

230  CONTEMPORARY GARMENT CONSTRUCTION TECHNIQUES (1) RPT 2
Corequisite: Any fashion design course
Lab: 3 hours
This course provides the opportunity for students to review and practice various hand and machine sewing techniques. Students concentrate on garment assembly projects using industrial methods.

231  CONTEMPORARY PATTERN MAKING TECHNIQUES (1) RPT 2
Corequisite: Any fashion design course
Lab: 3 hours
This course provides fashion students the opportunity to review and practice various pattern making techniques. Students concentrate on pattern drafting projects using industry methods.

236  FASHION SKETCHING AND DESIGN I (2)
Lab: 6 hours
Instruction includes fashion figure drawing, rendering fabrics and garments on figures, designing selected garments, study of color theory and techniques.

237  FASHION SKETCHING AND DESIGN II (2)
Prerequisite: Fashion Design 236
Lab: 6 hours
Instruction includes women’s day dresses, children’s fashion figures and garment designs, watercolor or gouache techniques, technical illustrations, contemporary graphic layouts and the portfolio development.

238  FASHION SKETCHING AND DESIGN III (2)
Prerequisite: Fashion Design 236 & 237
Lab: 6 hours
Instruction includes developing male croquis models, designing formal wear for men, women and children, exploring marker techniques, developing illustrations with markers and other mediums combined in categories of interest and concentration, writing a resume, cover letter and calling card and developing a refined professional portfolio in preparation for job interviews.

239  DRAPING I: FUNDAMENTALS (2)
Lab: 6 hours
Instruction is offered in draping, fitting basic blocks, and transferring the drape to a paper pattern. Students will drape basic type bodices, sleeves, skirts, collars, and construction details. Theory includes basic principles of design, line, proportion, and fabric use.

240  DRAPING II: INTERMEDIATE (2)
Lab: 6 hours
This course includes the draping of casual knit garments and dress and jacket style innovations. Students use either muslin or fashion fabric according to their capabilities. Fashion trends are studied and original designs are created.

241  DRAPING III: GOWN DRAPING AND DESIGN (2)
Lab: 6 hours
This course correlates the designer’s knowledge of designing, sketching, draping, pattern making and construction. Students develop confidence as they study the problems of merchandising and manufacturing. Original designs for special occasion garments are executed in various fabrics.

244  COMPUTER FASHION ART (2)
Recommended Preparation: Fashion 112 or 236 with a grade of “C” or better.
Lab: 6 hours
This course offers computer fashion art instruction using the MAC computer. Emphasis is placed on the preparation and input of fashion images for portfolios and design presentations as required by industry standards.

250  COMPUTERIZED GRADING (2)
Lab: 6 hours
This course concentrates on grading the commercial pattern using a computer. Inputting the pattern, establishing grade rules and correcting the pattern are included. Marker making, with emphasis on difficult garments and fabric problems is covered. Housekeeping and tape routines are explained.

251  COMPUTERIZED MARKER MAKING (2)
Lab: 6 hours
This course introduces the student to computer assisted pattern making. Basic block for digitizing as well as MPLOT routines are included; housekeeping and job streams are also covered.

253C  CAPITOL AND SALES MANAGEMENT (1)
Lecture: 1 hour
This course presents a critical overview of the specialized areas of marketing, product development, capitalization and accounting methods in the apparel industry. Special emphasis will be placed on manufacturing methodology and wholesale marketing of apparel.

254  COMPUTERIZED PRODUCT MANAGEMENT (2)
Lab: 6 hours
This course offers training utilizing the latest versions of apparel pattern making software technology. Students will concentrate on transferring basic pattern and design principles from a manual format to a computerized one.

255  COMPUTERIZED PRODUCT DESIGN (2)
Lab: 6 hours
This course offers advanced training and development of skills in apparel utilizing the latest versions of apparel pattern making software. Design students will concentrate on working on advanced pattern and design projects ranging from haute couture to ready-to-wear clothing.

256  CAD APPAREL PRE-PRODUCTION TECHNIQUES (2)
Lecture: 1.5 hours; Lab: 1.5 hours
This course offers advanced training in apparel pre-production process, and marker making as it applies to computerized apparel production. The class will cover specialized computer software applications, such as Lectra Systems, used for marker making. Students will learn to identify menus associated with marker making applications and composing a full scale marker using industry standards.
257 APPAREL PATTERN DESIGN SYSTEMS (2)
Lecture: 1.5 hours; Lab: 1.5 hours
This course provides an overview of current computer-aided design applications used in apparel pattern development. The class will cover manual pattern development and demonstrate how two-dimensional patterns translate to the computer. Students will learn to identify menus associated with pattern applications, used for Tokatech software, and will compose a full-scale pattern on the computer as it applies to industry.

258 COMPUTER-AIDED PATTERN SYSTEMS (2)
Recommended Preparation: FD120 or 225.
Lab: 6 hours
This course is designed to introduce computer aided pattern-making using Lectra Systems software programs. Class instruction will cover translating manual patterns to the computer as well as pattern creation using technology. Instruction will be given on system menus in their relation to pattern applications.

259 CAD APPAREL DESIGN (GERBER ARTWORKS) (2)
Lecture: 1.5 hours; Lab: 1.5 hours
This course provides an overview of apparel computer design techniques as they apply to textiles and apparel production. The class will cover specialized computer software applications, such as Gerber systems “Artworks” and similar design software geared toward apparel design and manufacturing. Students will learn to identify menus associated with design applications and create projects using industry standards.

261 ADVANCED CAD SYSTEMS (1) RPT2
Recommended Preparation: One of the following: FASHDSN 250, 254, 255, 256, 257
Lab: 3 hours
This course will provide advanced studies in computer apparel systems. Students will practice and perfect beginning skills in an advanced lab in pattern-making, grading, and marker-making on the Gerber, Tukatech, and Lectra systems.

262 INTRODUCTION TO CAD DESIGN AND PRE-PRODUCTION APPLICATIONS (2) RPT1
Lab: 6 hours
This course offers new and existing design and pre-production applications using Lectra Ulita and Gerber Artworks for textile design, Gerber classic PDS, and Lectra DIAMINO (marker making)

263 INTRODUCTION TO TEXTILE DESIGN (3)
Lecture: 2 hours; Lab: 2 hours
This course provides an overview of the role of a Textile Designer and an CAD Textile Artist. It emphasizes basic design concepts of creating a croquis for the apparel, home furnishing, and industrial markets. It features an introduction to computer aided design applications for the CAD textile artist, PDM Web applications, and resources and trend services in the textile market.

264 APPAREL COMPUTER SYSTEMS ANALYSIS (2) CSU
Recommended Preparation: Fashion Design 120
Lecture: 1 hour; Lab: 2 hours
This lab course demonstrates how the apparel industry uses commercial and vendor apparel technology in the global market. Topics covered are apparel software and commercial hardware used to design and manufacture products.

270 ILLUSTRATOR FOR FASHION ART (2) RPT1
Recommended Preparation: Fashion Design 112 or 236
Lab: 6 hours
This course offers Adobe Illustrator instruction using the Macintosh computer. Emphasis is placed on the preparation and input of fashion design ideas in flat drawings for portfolios, pattern information cards, and cost sheets as required to meet industry standards.

FASHION MERCHANDISING

1 ENTREPRENEURIAL FASHION (3) CSU
Recommended Preparation: English 28 and Math 105 with a grade of “C” or better
Lecture: 2.5 hours; Lab: 1.5 hours
This course delivers the information needed to develop an effective business plan and provides a background in entrepreneurship for apparel related businesses. Students will examine the development of a fashion retail business from concept evaluation to strategy articulation. Procedures and resources for researching and opening a business are covered, as well as assortment planning, pricing and financing.

10 RETAIL MERCHANDISING (3) CSU
Recommended Preparation: English 28 and Math 105 with a grade of “C” or better
Lecture: 3 hours
This course introduces all phases of fashion retailing from the creative to the financial. It is designed to familiarize students to the crucial functions of merchandising and product management in a modern retail company. The course covers special aspects of retailing including: the evolution of the industry, merchandising roles and careers, market knowledge, consumer behavior, planning and control and retail pricing.

20 ADVANCED APPAREL PRODUCT DEVELOPMENT (3) CSU
Recommended Preparation: English 28 and Math 105 with a grade of “C” or better
Lecture: 2.5 hours; Lab: 1.5 hours
This course covers the step-by-step development of apparel products in a retail or wholesale environment. Students will use research, merchandising knowledge and the application of merchandising concepts and theories in a simulated process. The course includes visual presentation of design concepts, raw materials sourcing, overviews of production technology, wholesale marketing and retail distribution. Special emphasis is placed on the California apparel industry.

21 CULTURAL PERSPECTIVES OF DRESS (3) CSU
Recommended Preparation: English 28 and Math 105 with a grade of “C” or better
Lecture: 3 hours
This course covers the factors that influence human behavior in the selection of dress in societies and cultural groups, and the ultimate influence of these factors on the design and production of textiles and apparel. Understanding the function of dress helps us relate to other cultures, facilitates our interaction with others and gives us insight as to why consumers purchase clothing and other dress related products. Topics include the cultural context of dress, dress as nonverbal communication, dress through life stages, dress in the workplace, ethnic influences on dress and technological change.

25 FASHION INDUSTRY INTERCHANGE (3) CSU
Recommended Preparation: English 28 with a grade of “C” or better
Lecture: 3 hours
This course covers current trends and relationships in the Fashion Industry between apparel, accessories, cosmetics, and home goods. Each category of goods is reviewed from the perspectives of historical development, organization and operation, merchandising and marketing in order to gain broad insight to the unique aspects of these industry segments.

27 ADVANCED RETAIL MERCHANDISING (3) CSU
Prerequisite: FASHMER 10 with a grade of “C” or better
Lecture: 2.5 hours; 1.5 hours
An advanced retail research and study course covering retail demographics, site selection, stock assortments, planning, retail budgets, and sales applicable to all retail environments. Merchandise coordination and seasonal planning are given detailed coverage.
30 WHOLESALE MERCHANDISING (3) CSU
Recommended Preparation: English 28 and Math 105 with a grade of "C" or better.
Lecture: 3 hours
This course prepares students for a merchandising position with an apparel manufacturing company. All phases, including line development, design, costing, sales, production, contracting and distribution are covered. Current trends and specialized knowledge in merchandising a saleable line are emphasized.

35 FASHION PROMOTION (3) CSU
Recommended Preparation: English 28 and Math 105 with a grade of "C" or better.
Lecture: 3 hours
This course covers the promotional aspects of the retail fashion industry. Emphasis is given to the processes of fashion communication and how they connect company profit and performance with skilful and creative promotional strategies. Sales promotion, advertising formats, public relations, and direct marketing are presented.

40 MODERN MERCHANDISING MATH (3) CSU
Recommended Preparation: FASHMER 27, 30; CAOT 82 or CO INFO 701 with a grade of "C" or better.
Lecture: 3 hours
Students will learn to use the computer for costing, pricing, inventory control as well as vendor analysis. All current concepts in wholesale and retail merchandise planning are presented, with an emphasis on practical knowledge and the use of computers and software in today’s apparel business.

41 FASHION MERCHANDISE BUYING (3) (CSU)
Recommended Preparation: FASHMER 10, English 28, Math 113 with a grade of "C" or better.
Lecture: 2.5 hours; Lab: 1.5 hour
This course provides specific instruction on fashion/merchandise buying tasks such as identifying target customers, creating six month merchandise plans, departmental assortment plans, shopping the market and placing orders, in-season sales planning and forecasting, and calculating open-to-buy. Covers the process of retail buying for a small business as well as for larger companies.

50 INTERNATIONAL FASHION BUSINESS (3)
Recommended Preparation: English 28 with a grade of "C" or better.
Lecture: 3 hours
An active study of the dynamics and challenges of the international apparel industry. Topics covered include: International business today; cultural diversity and dynamics; international legal issues; global opportunities in marketing; importing/exporting strategies; international fashion business vocabulary

FINANCE

8 PERSONAL FINANCE AND INVESTMENTS (3) CSU
Lecture: 3 hours
This course is designed to provide students with an understanding of a person’s financial affairs, including family budgeting, consumer credit, home ownership, insurance, investment/savings, banking services, and major consumer purchases.

FRENCH

1 ELEMENTARY FRENCH I (5) UC:CSU
Lecture: 5 hours
This course provides instruction in the fundamentals of French pronunciation and grammar and includes laboratory practice with multi-media aids. Emphasis is placed on basic vocabulary and reading, writing, and speaking in simple French.

2 ELEMENTARY FRENCH II (5) UC:CSU
Recommended Preparation: French 1 with a grade of "C" or better or two years of high school French
Lecture: 5 hours
This course is a continuation of French 1 and includes completion of elementary grammar principles. Further study includes compound and simple tenses and irregular verbs. Readings emphasize French literature.

GEOGRAPHY

1 PHYSICAL GEOGRAPHY (3) UC:CSU
Lecture: 3 hours
This course studies the physical environment of earth. Emphasis is placed on climate, soils, vegetation, land forms, maps, weather systems, oceans, and the atmosphere, and their pattern on Earth.

2 CULTURAL ELEMENTS OF GEOGRAPHY (3) UC:CSU
Lecture: 3 hours
This course examines a broad array of the elements and expressions of human culture including population distribution, use and re-use of natural resources, principle modes of transportation and commerce, sources of energy, languages and religions, the globalization of culture, as well as the social, political, and economic courses of war and global warming.

GEOLOGY

1 PHYSICAL GEOLOGY (3) UC:CSU
Lecture: 3 hours
This is an elementary course dealing with the earth’s surface features and the geological laws governing their origin and development.

6 PHYSICAL GEOLOGY LABORATORY (2) CSU
Recommended Preparation: Physical Geology 1 with a grade of "C" or better
Lecture: 1 hour; Lab: 2 hours
This course supplements Geology 1 with additional exercises in identification of rocks and minerals, reading of maps, and study of rock structures. Studies of local geology are made based upon field trips and the collection of specimens.
HEALTH

2 HEALTH AND FITNESS (3) UC:CSU
Lecture: 2 hours; Lab: 2 hours
This course includes a survey of basic health issues that particularly affect one's physical fitness and health. Lab activities will develop an understanding of the need for and kinds of activities that can be utilized to develop lifelong fitness.

6 NUTRITION FOR HEALTHFUL LIVING AND FITNESS ACTIVITY (3) UC:CSU
Lecture: 2 hours; Lab: 2 hours
Basic nutrition theories, information for healthful food purchasing, relationship of nutrition to disease, general health concerns of women and optional weight loss plan are discussed. Benefits of exercise and techniques for body composition are learned. Class time includes participation in fitness activities including aerobic, developmental and flexibility exercises.

8 WOMEN’S PERSONAL HEALTH (3) UC:CSU
Lecture: 3 hours
A study of factors affecting physical, social and emotional well-being of women in our society.

11 PRINCIPLES OF HEALTHFUL LIVING (3) UC:CSU
Lecture: 3 hours
This course offers concepts to use today and tomorrow as guidelines for self-directed responsible living. Emphasis is placed on relating health concepts for the individual’s well being in personal, community, vocational and leadership roles.

12 SAFETY EDUCATION AND FIRST AID (3) UC:CSU
Lecture: 3 hours
This course follows the American National Red Cross Program of first aid and CPR. Instruction includes the immediate care given to a person who has been injured or has suddenly taken ill. Lifesaving procedures include rescue breathing and CPR for infants, children, and adults. Successful completion will lead to Red Cross certification in Community First Aid and CPR for the Professional Rescuer.

21 HUMAN SEXUALITY (3) UC:CSU
Lecture: 3 hours
Anthropological, biological, psychological, and sociological aspects of Human Sexuality. This course stresses: the various definitions of sexuality; the history of sexuality; the scientific method and sexuality; the psychology of sex; sex and gender; sexuality; behavior and relationships; sexuality across the life span; and sex as a social and medical issue.

43 MEN’S HEALTH (1) CSU
This course explores men’s health issues, life long health practices, attitudes and hurdles that contemporary men experience in urban areas. It studies topics important to men such as domestic abuse and violence, stress, alcoholism, disease transmission and other physical, emotional and social topics related to men’s health and wellness.

44 SPORTS NUTRITION AND ERGOGENIC AIDS (3) UC:CSU
Lecture: 3 hours
This course will examine the nutrient classes – protein, carbohydrate, fat, vitamins, minerals, and water – and their effects on physical performance. Topics covered include basic principles, pre- and post-exercise nutrition, eating for weight control/gain, proper hydration practices, and eating disorders. Also examined are the various pharmacological, hormonal, physiological, and nutritional agents that have been proposed to have ergogenic properties.

HEALTH OCCUPATIONS

CERTIFIED NURSING ASSISTANT/HOME HEALTH AIDE

COURSES OVERVIEW

These courses prepare the student to provide physical care to patients and supportive care to their families in acute care settings, long-term care facilities, home health agencies and in the home. After completing HOC 37, students are eligible to take the California Nurse Assistant Examination. To enroll in any of these courses candidates must be at least 16 years old, demonstrate basic reading and math computation ability, have the legal right to work in California, and complete a background check.

The Certified Nurse Assistant course is an 8-week course, which consists of 150 hours of theory and clinical experience. The Home Health Aide course is a 40-hour course that requires C.N.A. certification as a prerequisite. Often, these courses are the entry points that lead to other health care/nursing careers.

37 HEALTH OCCUPATIONS (CERTIFIED NURSE ASSISTANT) (5)
Lecture: 3 hours; Lab: 6 hours
This is an 8 week course of 150 hours approved by the State of California. It prepares students to perform basic nursing tasks and educates students about the role and responsibilities of the Certified Nurse Assistant. Skills include principles of safety, infection control, and basic patient care skills. After successfully completing this course students are eligible to take the State Certification Exam.

38 HEALTH OCCUPATION (HOME HEALTH AIDE) (2)
Prerequisite: Health Occupations 37 - Certified Nurse Assistant Certificate.
Lecture: 1.2 hours; Lab: 1.2 hours
This 40 hour course is approved by the State of California. Students will learn to provide quality in-home care to patients and assist them with activities of daily living. Students will provide care to the client for their needs in the areas of comfort, hygiene, nutrition, elimination, sleep and rest.

50 CARING FOR CLIENTS WITH MEMORY LOSS (3)
Lecture: 3 hours
This course is for Certified Nurses Aides and Home Health Aides who want further education and training in the art of caring for clients with memory loss. Memory loss associated with head injuries and forms of dementia including Alzheimer’s Disease will be studied. Concrete interventions that assist patients, families, Certified Nurse Aides and Home Health Aides to work together to provide physical and emotional care will be studied and practiced.
HISTORY

11 POLITICAL AND SOCIAL HISTORY OF THE UNITED STATES I (3) UC:CSU
UC limits credit when History 11 and 41 are combined to one course.
Lecture: 3 hours; Advisory: English 28
This course will examine the historical development of the United States of America from 1492 to the close of the Civil War. Emphasis is placed on the relationship of regions, the role of major ethnic and social groups, the continuity of the American experience, and its derivation from other cultures, politics, economics, social movements, and geography.

12 POLITICAL AND SOCIAL HISTORY OF THE UNITED STATES II (3) UC:CSU
UC limits credit when History 12 and 42 are combined to one course.
Lecture: 3 hours; Advisory: English 28
This course will examine the historical development of the United States of America from the close of the Civil War to the present. Emphasis is placed on the role of major ethnic and social groups, the continuity of the American experience, and its derivation from other cultures, politics, economics, social movements, and geography.

41 THE AFRICAN-AMERICAN IN THE HISTORY OF THE UNITED STATES I (3) UC:CSU
UC limits credit when History 11 and 41 are combined to one course.
Lecture: 3 hours; Advisory: English 28
This course will examine the historical development of the United States of America from the early colonial era through the Civil War with special emphasis on the contributions of the Afro-American. Emphasis is placed on the relationship of regions, both internal and external, the role of major ethnic and social groups, the continuity of the American experience, and its derivation from other cultures, politics, economics, social movements, and its geography.

42 THE AFRICAN-AMERICAN IN THE HISTORY OF THE UNITED STATES II (3) UC:CSU
UC limits credit when History 12 and 42 are combined to one course.
Lecture: 3 hours; Advisory: English 28
This course will examine the historical development of the United States of America from the close of the Civil War to the present. Emphasis is placed on the role of major ethnic and social groups, the continuity of the American experience, and its derivation from other cultures, politics, economics, social movements, and its geography.

86 INTRODUCTION TO WORLD CIVILIZATION I (3) UC:CSU
Lecture: 3 hours; Advisory: English 28
Introductory survey of World Civilization to 1500. This course will examine and compare the social, economic, and political formations of various governments, societies, and world cultures. Major topics will include religion, philosophy, technology, and migration and settlement patterns.

87 INTRODUCTION TO WORLD CIVILIZATION II (3) UC:CSU
Lecture: 3 hours; Advisory: English 28
Introductory survey of World Civilization from 1500 to the Present. This course will examine and compare the social, economic, and political formations of various governments, societies, and world cultures. Major topics will include the development of the nation state, economic systems and technology, industrialization, colonization, and global conquest, revolutions, and migrations and settlement patterns.

HUMANITIES

1 CULTURAL PATTERNS OF WESTERN CIVILIZATION (3) UC:CSU
Lecture: 3 hours
An introduction to the general concepts of the humanities. Music, painting, sculpture, and architecture are studied and compared in relation to their background, medium, organization, and style. Included is a survey of the most productive periods of Western history, from classical Greek through the Medieval period. Stress is placed on awareness of difference in cultural values, and perspective as revealed in the arts.

2 STUDIES IN SELECTED CULTURES (3) UC:CSU
Lecture: 3 hours
Students study in-depth the social, political, economic and cultural features of a particular culture or set of related cultures. Customs, traditions, values, historical events and trends, religious traditions, pop culture practices, achievements and trends in the arts and the sciences of the culture(s) studied are also examined. Western, Eastern, Mid-Eastern, African and other cultures and societies both past and present may be studied.

185 DIRECTED STUDY I (1) UC:CSU RPT2
Conference, 1 hour
Allows students to pursue Directed Study in humanities on a contract basis under the direction of a supervising instructor.

INTERNATIONAL BUSINESS

1 INTERNATIONAL TRADE (3) CSU
Lecture: 3 hours
A study of the principles of international trade, including the basics of operating an import and export business. Topics covered include marketing, terminology, documentation, financial procedures, credits, collections, and communications.

LABOR STUDIES

1 U.S. LABOR HISTORY (3) CSU
Lecture: 3 hours
A neglected yet critical element of American History is the fascinating struggle by American workers for justice and equality. Tracing the origins and growth of the American labor movement from the craft guilds to industrial unions to public sector organizations, this course will analyze Labor’s challenges into the twenty first century.
2 COLLECTIVE BARGAINING (3) CSU  
Lecture: 3 hours  
The central component of American labor relations is the collective bargaining agreement. Negotiating and enforcing a contract are the union’s most critical tasks. Topics include strategy, tactics, tricks of the trade, preparation of bargaining demands, impasse, contract language, and mock bargaining.

3 LABOR RELATIONS LAW (3) RPT1 CSU  
Lecture: 3 hours  
Instruction is given in how labor relations law impacts the rights and obligations of workers, unions and employers in the workplace. Focus is placed on the national labor relations act, including: (1) employee organization rights; (2) unfair labor practices (employer and union); (3) union representation election procedures; (4) NLRB structure and operation; (5) the collective bargaining process.

4 LABOR IN AMERICA (3) CSU  
Lecture: 3 hours  
This course tackles the sweeping changes facing working men and women brought about by global economics and national policies. Labor’s political program, new organizing techniques, immigrant workers and more are covered in this broad and cutting edge class. This course meets the GE requirement for American Institutions and U.S. History in both Plan A and B.

5 GRIEVANCE AND ARBITRATION PROCEDURES (3) RPT1 CSU  
Lecture: 3 hours  
The union contract is a powerful tool to defend worker and union rights. But enforcing the contract is an ongoing and difficult job. This step-by-step class on the union grievance and arbitration process will cover the full range of responsibilities of grievance handling and arbitration. This course is designed to help union officers and stewards develop the confidence and skills to enforce the contract effectively.

6 LABOR COMMUNITY SERVICES (3) RPT2 CSU  
Lecture: 3 hours  
Unions are critically valuable civic resources. This class prepares union staff and stewards to help members in need. Financial assistance, legal services, mortgage relief, debt counseling, and food and banks are some of the topics covered. Excellent training for union “counselors.”

7 LABOR AND POLITICAL ACTION (3) CSU  
Lecture: 3 hours  
This course will examine legislation, lobbying, and campaign techniques, precinct walking, campaign contributions, election laws, and the voting pattern of union workers. The foundation of American labor’s political philosophy and practices is explored in this course.

8 LABOR IN THE GLOBAL ECONOMY (3) CSU  
Lecture: 3 hours  
Instruction is given on how labor and the labor movement affect wages and working conditions, the economic forces affecting the labor market, the conditions of employment, and collective bargaining. An examination of wage rates, productivity, inflation, multinational companies is explored.

9 UNION ORGANIZING STRATEGIES (3) CSU  
Lecture: 3 hours  
This course emphasizes on how unions organize new workers to gain market share and power and mobilize their members to effectively counter employer strategies. Students will learn basic skills and techniques needed to organize new workers, build and strengthen their ranks, and learn about relevant laws and winning strategies.

10 WORKPLACE GENDER AND RACE ISSUES (3) UC:CSU  
Lecture: 3 hours  
This course studies legal framework and strategies to combat discrimination and promote diversity and equal opportunity as an asset for more effective workplace and stronger unions. Skills learned include overcoming workplace divisions by developing respect for difference based on race, sex, ethnicity, disability, age, and sexual orientation.

11 LABOR IN THE PUBLIC SECTOR (3) CSU  
Lecture: 3 hours  
This course covers public employment practices, policies, laws and labor relations at the federal, state and local levels. It also addresses the importance of the public sector to the quality of public service, public policy, the future of government. Topics covered include issues and challenges faced by public sector workers and their unions.

12 BUILDING STRONG UNIONS (3) CSU  
Lecture: 3 hours  
Unions are complex and sophisticated organizations, requiring effective leadership skills and techniques to successfully manage. The course will examine techniques for successful union administration, including strategic planning, goal setting, effective communication techniques, budgeting, team building, staff development, supervision, problem solving, and increasing member participation.

13 UNION LEADERSHIP (3) CSU  
Lecture: 3 hours  
Unions are democratic organizations. Effective union leadership requires many diverse skills such as administering bargaining and enforcing the contract, communicating with members, interacting with the media, working with political and civic leaders. This course will help students understand what it takes and what’s at stake in running a labor organization.

16 LEADERSHIP FOR CHANGE (3) CSU  
Lecture: 3 hours  
This course focuses on skills and techniques necessary to lead and manage organizational change in unions. Instruction is given on how making “strategic choices” develops organizational capacity and industry leverage today, and how a leadership development program that includes diversity is the key to the future of labor. Timely reviews of current issues in labor law, collective bargaining, union grievance and arbitration are covered.

20 LABOR LAW (3) RPT3 CSU  
Lecture: 3 hours  
This class focuses on federal and California labor law. Overview is given on federal labor laws, such as the railway labor act, the fair labor standards act; the employee retirement income security act, the labor-management reporting and disclosure act, a brief examination of state and local labor laws for public employees is also covered.

21 THE WORKING CLASS IN MOVIES (3) UC:CSU  
Lecture: 3 hours  
This course will combine the study of America’s working class and how Hollywood portrays their experience through film. Using classic films such as On the Water Front, The Grapes of Wrath and many other, students will look at how Hollywood depicts such things as class, racial and gender roles and divisions in American working-class life, as well as how history shapes the present and future.

101 INTRODUCTION TO UNIONS (1) CSU  
Lecture: 1 hour  
Overview of union impact on wages, benefits, working conditions and public policies by industry. Surveys basic union structures, operation and governance.
102 CONTRACT NEGOTIATIONS SKILLS (1) RPT3 CSU
Lecture: 1 hour
The course teaches the basic tactics and skills needed for union contract negotiations. It covers preparation of demands, negotiations strategies and tactics, contract language, and major bargaining trends. Students will integrate techniques learned and apply to real life situations in hands-on, "mock" bargaining.

103 LABOR LAW UPDATE (1) RPT3 CSU
Lecture: 1 hour
This course studies applied labor relations law including the legal rights and obligations of employees, the relationships of unions and employers, the structure and procedures of government regulatory agencies, employee rights to organize, picket and strike, and the interpretation and application of collective bargaining agreements.

104 CURRENT ISSUES FOR LABOR (1) RPT3 CSU
Lecture: 1 hour
Challenges to the American Labor Movement including: new corporate structures, global markets, immigration patterns and the changing nature of work in America. Surveys the extensive structural changes in the Labor Movement such as the change to win split from AFL-CIO, union mergers and consolidations.

105 GRIEVANCE HANDLING SKILLS (1) RPT3 CSU
Lecture: 1 hour
Designed for union stewards and staff, this course is a step-by-step approach to handling disciplinary grievances and union contract interpretation cases. Topics include investigating and writing grievances, documenting evidence, evaluating cases, and settlement techniques. Duty of fair representation, Weingarten rights, and using the grievance process for union building are also discussed.

106 LABOR AND DISASTER RELIEF (1) RPT3 CSU
Lecture: 1 hour
This course offers specialized training and current information for labor representatives interested in aiding and assisting members in need. Instruction is given on how to provide relief in the event of earthquakes, floods and other natural disasters. Survey of public and private helping agencies is also explored.

107 POLITICAL ACTION SKILLS (1) CSU
Lecture: 1 hour
This course is a primer for union activists. Survey of grassroots political organizing strategies, including phone banks, precinct walks, polling, GOTV, vote-by-mail campaigns, and overview of campaign financing laws that apply to unions are covered in this course. Discussions of issues development, communications, and other effective strategies and techniques to win are also a part of the instruction in this course.

108 LABOR AND GLOBALIZATION (1) CSU
Lecture: 1 hour
The world economy is changing with dramatic consequences for American workers. This course explores the financial and political forces behind these changes and America’s transition from an industrial to a service economy with emphasis on migration, immigration, taxes and the distribution of income.

109 UNION BUILDING STRATEGIES (1) CSU
Lecture: 1 hour
Internal organizing is essential to maintaining effective representation and bargaining leverage. Techniques to inform and mobilize members are explored in this course. The value of one-on-one communications and effective committee structures, and the organizing model of unionism are also discussed.

110 WORKPLACE DIVERSITY (1) CSU
Lecture: 1 hour
Instruction is given on the process of identifying and overcoming gender and race divisions and discrimination in the workplace. This class will explore changing laws and attitudes and the value of understanding and respecting different life experiences among various cultures.

112 STRATEGIC PLANNING FOR UNIONS (1) CSU
Lecture: 1 hour
This course is designed to teach union leaders on how to move from operating in a crisis driven environment to a union administration capable of long term planning, delegation of authority, effective communications, and a proactive approach to change.

113 UNION LEADERSHIP SKILLS (1) RPT3 CSU
Lecture: 1 hour
Designed for union activists, stewards, staff and officers, this course examines the critically important qualities and skills required to lead. Classes will focus on such topics as negotiations, communications and more.

114 WORKERS’ LEGAL RIGHTS (1) CSU RPT3
Lecture: 1 hour
Students will learn about basic employee rights and employer obligations in such increasingly important areas as workplace privacy, rights to leaves, accommodations for permanent and temporary disabilities (including pregnancy), as well as protections against wrongful discharge. Also, how union contracts work to expand these rights for workers is discussed.

115 WORKPLACE HEALTH AND SAFETY (1) CSU
Lecture: 1 hour
Instruction is given on how to analyze and address current health and safety issues in the workplace such as job stress, understaffing, hazardous waste, ergonomic problems, and diseases including AIDS. Students will learn about hazard identification, legal rights, government agencies and outside resources.

118 EMPLOYEE BENEFIT PLANS (1) CSU RPT3
Lecture: 1 hour
A comprehensive examination of employee health and retirement benefits is explored in this course. Topics include how employee health and retirement benefits work, how they are funded, how workers can improve their security, the role of labor in bargaining and preserving benefits, proposed benefit changes and the issues and political forces framing the debate.

119 UNION ORGANIZING (1) CSU RPT1
Lecture: 1 hour
New approaches and techniques for educating the changing workforce about unions are explored. Analysis of the changing workforce, the power within an industry, issues of women and immigrant workers, effective communications, and taking concerted action is studied.

121 LABOR COMMUNICATIONS (1) CSU RPT3
Lecture: 1 hour
Modern techniques for unions to communicate effectively with members, prospective members, employers, media, public officials, citizen groups and the general public, coordinated campaigns, new strategies and tactics, and image building.

123 STEWARD TRAINING (1) CSU
Lecture: 1 hour
Surveys the role of union stewards and practice basic skills necessary. Overviews skills and procedures for communicating with members, processing grievances, solving problems, organizing and mobilizing members.
Cooperative Work Experience Education - CSU

Labor Studies is approved for cooperative work experience education credit. See Cooperative Education courses for prerequisites, course description and credit limits. A maximum of 3 units of work-experience may be used to meet the Labor Studies Certificate requirement, and 6 units to meet the Labor Studies AA Degree requirement.

125 LABOR ARBITRATION (1) CSU
Lecture: 1 hour
This course examines the process of labor arbitration, including background of arbitration, preparation of cases, selection, duties, scope and cost of arbitrators, typical cases, presentation cases, how arbitrators decide cases, settlement techniques and effective use of arbitration.

126 ISSUES IN LABOR ARBITRATION (1)
Lecture: 1 hour
This course is an overview of two major issues of arbitration, discipline and discharge and contract interpretation cases. It covers just cause, absenteeism, insubordination, substance abuse, theft/dishonesty, standards for interpreting contract language, case studies on discipline, discharge and contract interpretation are included.

127 WORKERS’ COMPENSATION (1) CSU RPT3
Lecture: 1 hour
This course examines California workers’ compensation including the purpose, financing and administration of the program, entitlement to benefits ranging from partial to total, temporary and permanent, medical care, rehabilitation, eligibility criteria, how to file a claim, appeals procedures, and new legislation.

128 SEXUAL HARASSMENT AND DISCRIMINATION (1) CSU
Lecture: 1 hour
This topical subject will be sensitively and thoroughly examined to prepare union representatives to meet their responsibilities. Ways to identify and prevent discrimination and harassment will be explored. The employer’s role and the union’s role are also discussed.

132 STRATEGIC BARGAINING TECHNIQUES (1) CSU
Lecture: 1 hour
This course covers the analysis of various social, economic, and political conditions that affect the application of the basic elements of collective bargaining to the development and application of appropriate negotiations strategies and tactics.

134 CALIFORNIA WORKERS’ RIGHTS (1) CSU RPT3
Lecture: 1 hour
A student who takes this course will learn the basics of wage and hour law under both federal and California law as well as a host of employee rights and employer obligations arising under both the California labor code and the various California wage orders.

136 WHEN THE PAYCHECK STOPS (1) CSU RPT2
Lecture: 1 hour
Union representatives occasionally must counsel members when the paycheck stops due to strikes, layoff, or plant closure. This course overviews professional services available for referral and teaches strategies for negotiating with landlords, mortgage companies, utility companies and other creditors.

LEARNING SKILLS

1 READING (3) RPT3 NDA
Lab: 9 hours
Students will learn a variety of strategies to increase their comprehension of college level reading materials. Students will learn how to use context clues to determine the meaning of unfamiliar words and to increase critical thinking skills. Study skills and critical thinking skills will be developed.

1A READING – (BEGINNING) (1) RPT3 NDA
Lab: 3 hours
This course will teach students how to apply the basic features of reading to improve their oral and silent reading fluency, draw upon a variety of learning skills and comprehension strategies to understand and respond to beginning-level reading material, and distinguish between the structural features of expository and narrative texts. Students will progress from reading sentences to paragraphs to short selections and excerpts from longer pieces of writing. This course is open-entry/open-exit and provides individualized and computer-assisted instruction. Grades are on a pass/no-pass basis. The course is repeatable up to three times to enhance skills and proficiencies. This course is the first in a sequence of three progressive modules and prepares students for academic and vocational success.

1B READING – (INTERMEDIATE) (1) RPT3 NDA
Lab: 3 hours
This course will teach students how to apply the basic features of reading to improve their oral and silent reading fluency, draw upon a variety of learning skills and comprehension strategies to understand and respond to intermediate-level reading material, and distinguish between the structural features of expository and narrative texts. Students will progress from reading sentences to paragraphs to short selections and excerpts from longer pieces of writing. This course is open-entry/open-exit and provides individualized and computer-assisted instruction. Grades are on a pass/no-pass basis. The course is repeatable up to three times to enhance skills and proficiencies. This course is the second in a sequence of three progressive modules and prepares students for academic and vocational success.

1C READING – (ADVANCED) (1) RPT3 NDA
Lab: 3 hours
This course will teach students how to apply the basic features of reading to improve their oral and silent reading fluency, draw upon a variety of learning skills and comprehension strategies to understand and respond to advanced-level reading material, and distinguish between the structural features of expository and narrative texts. Students will progress from reading sentences to paragraphs to short selections and excerpts from longer pieces of writing. This course is open-entry/open-exit and provides individualized and computer-assisted instruction. Grades are on a pass/no-pass basis. The course is repeatable up to three times to enhance skills and proficiencies. This course is the third in a sequence of three progressive modules and prepares students for academic and vocational success.

2 ENGLISH FUNDAMENTALS (3) RPT3 NDA
Lab: 9 hours
This course covers standard English writing conventions and language structure including grammar, punctuation, capitalization, spelling mechanics and sentence and paragraph structure. Students will learn to use the stages of the writing process, such as pre-writing, drafting, revising, and editing successive versions to assist them in writing clear and coherent sentences, focused paragraphs, and short essays. Students will apply organizational, evaluation, and revision strategies for vocational and academic writing.

2A ENGLISH FUNDAMENTALS – (BEGINNING)(1) RPT3 NDA
Lab: 3 hours
This course covers standard English writing conventions and language structure including grammar, punctuation, capitalization, spelling mechanics, and sentence structure. Students learn how to write simple sentences.
**2B ENGLISH FUNDAMENTALS – (INTERMEDIATE) (1) RPT3 NDA**

Lab: 3 hours

This course covers the standard English writing conventions and language structure including grammar, punctuation, capitalization, spelling mechanics, and sentence structure. Students learn how to write simple, compound, and complex sentences. The past, present, and future present and progressive tenses are introduced. Students also learn to recognize and correct sentence fragments, run-on sentences, and demonstrate proofreading skills. Students are introduced to paragraph structures and learn to identify topic sentences, supporting details, and concluding sentences.

**3A VOCABULARY DEVELOPMENT (1) RPT 3 NDA**

Lecture: 1 hour

This is a beginning level lecture course focused on reading and vocabulary development. The course teaches students the skills that will help them deal with unfamiliar vocabulary. Students will develop skills using timed word recognition and reading exercises to help improve reading rates.

**4 SPELLING (1) RPT3 NDA**

Lecture: 1 hour

This is a lecture class. Based on diagnostic assessment, the student will receive group and individualized spelling instruction designed to improve spelling skills to the level at which the student will be able to succeed in college/vocational coursework. Basic spelling rules, syllabification, vowel and consonant patterns are reviewed and practiced.

**10 MATH (3) RPT3 NDA**

Lecture: 1 hour; Lab: 4 hours

Students will receive individualized, small group or computer-assisted instruction designed to build skills for entry into basic math classes and other college courses. The course covers addition and subtraction of whole numbers up to pre-algebra and geometry.

**10A MATH FUNDAMENTALS – (BEGINNING)(1) RPT3 NDA**

Lecture: 1 hour

This basic math course covers addition and subtraction of whole numbers, progressing into multiplication and division. Students will receive individualized, small group instruction designed to build skills for entry into basic skills math classes and other college courses.

**10B MATH FUNDAMENTALS – (INTERMEDIATE) (1) RPT3 NDA**

Lab: 2 hours

This is a lab course which focuses on the skills needed to succeed in computing and understanding the relationship between fractions, decimals, ratios, and percentages. Students will add, subtract, multiply, and divide related problems and use strategies, skills and concepts in finding solutions to word problems and real world situations. This class provides individualized and computer-assisted instruction. The course is repeatable up to three times to enhance skills and proficiency and is the second in a sequence of three progressive modules which prepare students for academic and vocational success.

**10C MATH FUNDAMENTALS – (ADVANCED) (1) RPT3 NDA**

Lab: 2 hours

This basic math fundamental course focuses on the learning skills needed to succeed in pre-algebra up to beginning algebra, and is designed to help students develop symbolic reasoning and calculations with symbols that are central in algebra and geometry. This open-entry/open-exit class provides individualized and computer-assisted instruction. The course is repeatable up to three times to enhance skills and proficiency. This course is the third in a sequence of three progressive modules and prepares students for academic and vocational success.

**36 READING FOR COLLEGE SUCCESS (3) RPT1 NDA**

Lab: 6 hours

This course covers vocabulary development, critical reading and comprehension skills. Time management, study skills, memorization techniques and note-taking are also covered.

**36A READING FOR COLLEGE SUCCESS: LITERAL LEVEL (1) RPT1 NDA**

Lab: 2 hours

This course focuses on literal reading comprehension skills and vocabulary development. Students will be able to identify, classify, and sequence directly stated main ideas, details, and facts from a variety of written materials.

**36B READING FOR COLLEGE SUCCESS: INFERENTIAL LEVEL (1) RPT1 NDA**

Lab: 2 hours

This course helps develop inferential reading comprehension skills and strategies, allowing students to move beyond stated ideas as they appear on the printed page and helping them to draw conclusions based on unstated information.

**36C READING FOR COLLEGE SUCCESS: CRITICAL LEVEL (1) RPT1 NDA**

Lab: 2 hours

This course emphasizes critical reading in which students learn how to identify, examine and describe advanced level abstract themes and ideas.

**40 INTRODUCTION TO LEARNING DISABILITIES (1) RPT3 NDA**

Lab: 3 hours

This course consists of individualized diagnostic assessment procedures administered to students with suspected learning disabilities. Students with learning disabilities will identify strengths and weaknesses in achievement and learning skills. Individual educational plans are developed outlining goals, objectives, strategies, and recommendations.

**41 STUDY STRATEGIES FOR STUDENTS WITH LEARNING DISABILITIES (3) RPT3 NDA**

Lab: 3 hours

This course is designed to assist students with identified Learning Disabilities develop strategies to cope with the demands of the regular classroom environment. Topics covered include: development and enhancement of study skills, understanding Learning Disabilities, and accessing support services available on and off campus.

**62 GENERAL EDUCATION DEVELOPMENT (GED) PREPARATION: LANGUAGE, READING (1) RPT2 NDA**

Advisory: Learning Skills 1B or College Placement Process
Lab: 3 hours

This course is designed to prepare students for the General Educational Development (GED): Literature and the Arts Test. The class will include critical thinking skills - reading comprehension skills, interpreting graphs, analyzing literature and the arts including tone and style/prose fiction, interpreting poetry, drama, plays, non-fiction and commentaries. Grading is on a pass/no pass basis.

**63 GENERAL EDUCATION DEVELOPMENT (GED) PREPARATION: WRITING (1) RPT2 NDA**

Advisory: Learning Skills 2B or College Placement Process
Lab: 3 hours

This course is designed to prepare students for the Language, Writing Skills component of the General Educational Development (GED) examination. It will include sentence structure, English usage, mechanics, and writing 5-paragraph essays. Grades are based on a credit/no-credit basis.

**64 GENERAL EDUCATION DEVELOPMENT (GED) PREPARATION: SCIENCE (1) RPT2 NDA**

Advisory: Learning Skills 1B or College Placement Process
Lab: 3 hours

This course is designed to prepare students to pass the General Education Development (GED) Science test. It includes biology, earth science, astronomy, geology, meteorology, chemistry, and physics.
65 GENERAL EDUCATION DEVELOPMENT (GED) PREPARATION: MATHEMATICS (3) RPT2 NDA
Advisory: Learning Skills 10B or College Placement Process
Lecture: 2 hours; Lab: 3 hours
This course is designed to prepare students for the mathematics component of the General Education Development (GED) test. It covers operations with polynomials (addition, subtraction, multiplication, and division), linear and quadratic equations, and basic geometry.

66 GENERAL EDUCATION DEVELOPMENT (GED) PREPARATION: SOCIAL STUDIES (1) RPT2 NDA
Advisory: Learning Skills 1B or College Placement Process
Lab: 3 hours
This course is designed to assist students prepare for the Social Studies component of the General Education Development (GED) examination. This course enhances students’ ability to read, understand, and use information in the context of social studies. Students will focus on five basic social studies content areas: United States history, civics and government, economics, and geography. Grades are based on a credit/no-credit basis.

67 READING FOR COLLEGE SUCCESS (3) RPT3 NDA
Recommended Preparation: Learning Skills 36 or Developmental Communications 23 or College Placement Process
Lecture 9 hours
This course is designed to improve critical thinking and inferential reading comprehension. Students will learn critical thinking strategies, logical reasoning skills, and textbook critical reading methods. Students will solve analogy, logic problem, and sentence relationship exercises. Students will be required to evaluate arguments and formulate logical written explanations to substantiate their responses to reading questions and logic problems. This course also covers paragraph organization, and transitional word usage.

67A READING FOR COLLEGE SUCCESS: CRITICAL THINKING (3) RPT3 NDA
Recommended Preparation: Developmental Communications 23, Learning Skills 36, or College Placement Process
Lecture. 3 hours
This course is designed to improve critical thinking, inferential reading comprehension, and verbal reasoning skills. Students will apply these strategies by identifying the main idea, drawing valid inferences and conclusions, and summarizing paragraphs and short essays. Students will be required to evaluate arguments and formulate logical written explanations to substantiate all responses to reading questions and logic problems.

67B READING FOR COLLEGE SUCCESS: CRITICAL READING: (3) RPT3 NDA
Lecture: 3 hours
This course is designed to improve critical reading and logical reasoning skills. Critical reading strategies and processes will be developed to help students employ logical reasoning to interpret, evaluate, and critically analyze reading selections. Students will apply these strategies by solving analogy, logic problem, and sentence relationship exercises.

67C READING FOR COLLEGE SUCCESS: TEXTBOOK CRITICAL READING (3) RPT3 NDA
Lecture: 3 hours
This course is designed to develop textbook critical reading strategies. Students will analyze textbook selections; formulate objective and essay questions; prepare for tests using underlining, highlighting, and marginal note-taking strategies; construct graphic organizers, and utilize strategies to organize main ideas and details.

68 STUDY SKILLS (1) RPT3 NDA
Lecture: 0.5 Lab: 1 hour
This course helps students develop basic study skills needed for college success. Study skills covered include but are not limited to: time management, organization skills, vocabulary building, reading, note-taking, and listening strategies.

LIBRARY SCIENCE

101 LIBRARY RESEARCH METHODS (1) CSU
Formerly Library Media/Technology 15
Lecture: 1 hour
This introductory course designed to teach students basic library research methods. This course will provide students with a broad knowledge of the use of libraries utilizing both print and electronic information sources. Information search techniques and specialized information tools are examined with an emphasis on finding research resources, writing research papers, citation styles, and plagiarism.

MACHINE SHOP-CNC

10 ROBOTICS LAB (2)
Lab: 6 hours
This is an introductory course to basic robotics construction. A hands-on experience in designing and building of a basic robot is provided in this course.

10A ROBOTICS LAB (1)
Lab: 3 hours
This is an introductory course to basic robotics construction. A hands-on experience in designing and building of a basic robot is provided in this course.

10B ROBOTICS LAB (1)
Lab: 3 hours
This is a continuation of the introductory course to basic robotics construction. A hands-on experience in designing and building of a basic robot is provided in this course.

20 INTRODUCTION TO ROBOTIC THEORY (3)
Lecture: 3 hours
This course covers the basic principles of robotic terminology, application and operational theory will be discussed.

20A INTRODUCTION TO ROBOTIC THEORY (1)
Lecture: 1 hour
This is the continuation of the introduction course which covers the basic principles of robotic terminology, application and operational theory.

20B INTRODUCTION TO ROBOTIC THEORY (1)
Lecture: 1 hour
This is the continuation of the introduction course which covers the basic principles of robotic terminology, application and operational theory.
20C INTRODUCTION TO ROBOTIC THEORY (1)
Lecture: 3 hours
This is a continuation of the introduction course which covers the basic principles of robotic terminology, application and operational theory.

111 PRINCIPLES OF MACHINE TOOLS I (2) CSU
Lecture, 1.5 hours; Laboratory, 1.5 hours
Basic principles of Safety, hand and precision measuring tools, set-up and operation of band saws, drill presses, lathes, mills, pedal grinders, power saws, and CNC machines. Topics covered include application of basic hand tools and measuring tools.

112 TECHNOLOGY AND APPLICATION OF MACHINING I (4) CSU
Lab: 12 hours
This is an introductory course to safety, speed, feed, set-up, operation and terminology of basic machine tools such as band saws, drill presses, lathes, mills, pedal grinders, power saws, and CNC machines. Topics covered include application of basic hand tools and measuring tools.

112A TECHNOLOGY AND APPLICATION OF MACHINING IA (3) CSU
Lab: 9 hours
This is an introductory course to safety, speed, feed, set-up, operation and terminology of basic machine tools such as band saws, drill presses, lathes, mills, pedal grinders, power saws, and CNC machines. Topics covered include application of basic hand tools and measuring tools.

112B TECHNOLOGY AND APPLICATION OF MACHINING IB (1) CSU
Lab: 3 hours
This is an introductory course to CAD/CAM as related to machine shop-CNC.

114 PRINT INTERPRETATION AND SKETCHING (BLUEPRINT II) (3) CSU
Lecture: 3 hours
This course covers the basic principles of interpreting the information located on engineering drawings related to machine shop-CNC operations. Basic shop sketching is introduced.

115 BASIC APPLIED MATHEMATICAL CALCULATIONS (3) CSU
Lecture: 3 hours
This course emphasizes on mathematical calculations related to machine shop-CNC problems. Topics include introduction and application of hand held electronic calculators.

121 PRINCIPLES OF MACHINE TOOLS II (2) CSU
Lecture: 1.5 hours; Lab: 1.5 hours
Principles of lathes, milling machines, including attachments, accessories, and special lathe and milling operations are covered in this course, as well as an introduction to other special machinery and basic CNC programming.

122 TECHNOLOGY AND APPLICATION OF MACHINING II (4) CSU
Lab: 12 hours
This course addresses implementation of safety, speeds, feeds, form tools, set-ups including related attachments and accessories for lathe and milling machine operations. Topics include inspection, and CNC machine operation.

122A TECHNOLOGY AND APPLICATION OF MACHINING IIA (3) CSU
Lab: 9 hours
This course addresses implementation of safety, speeds, feeds, form tools, set-ups including related attachments and accessories for lathe and milling machine operations. Topics include inspection, and CNC machine operation.

122B TECHNOLOGY AND APPLICATION OF MACHINING (CAD/CAM) IIB (1) CSU
Lab: 3 hours
This is an introductory course to CAD/CAM as related to machine shop-CNC.

124 PRINT INTERPRETATION AND INSPECTION (BLUEPRINT II) (3) CSU
Lecture: 3 hours
This course studies advanced interpretation of machine shop-CNC related drawings with introduction to inspection, geometric tolerancing, and SPC.

125 INTERMEDIATE APPLIED MATHEMATICAL CALCULATIONS (3) CSU
Lecture: 3 hours
This course emphasizes algebra and geometry problems that apply to machine tools, and basic machining calculations for CNC programs.

131 PRINCIPLES OF MACHINE TOOLS III (5) CSU
Lecture: 4.5 hours; Lab: 1.5 hours
Theory of precision and specialized machines including related accessories, attachments and operations is introduced. Information on materials and heat treating methods is covered.

131A PRINCIPLES OF MACHINE TOOLS IIIA (2) CSU
Lecture: 1.5 hours; Lab: 1.5 hours
Theory of precision and specialized machines including related accessories, attachments and operations is introduced. Information on materials and heat treating methods is covered.

131B PRINCIPLES OF MACHINE TOOLS (CNC) IIIB (3) CSU
Lecture: 3 hours
This course covers safely set-up and operate precision and specialized machines such as, surface grinders, jig borers, jig grinders, cylindrical grinders, tool and cutter grinders, sinker EDM, wire EDM, and CNC machines. Topics include inspection principles.

132 TECHNOLOGY AND APPLICATION OF MACHINING III (4) CSU
Lab: 12 hours
This course covers safely set-up and operate precision and specialized machines such as, surface grinders, jig borers, jig grinders, cylindrical grinders, tool and cutter grinders, sinker EDM, wire EDM, and CNC machines. Inspection principles are also covered in this course.

132A TECHNOLOGY AND APPLICATION OF MACHINING IIIA (3) CSU
Lab: 9 hours
This course studies safely set-up and operate precision and specialized machines such as, surface grinders, jig borers, jig grinders, cylindrical grinders, tool and cutter grinders, sinker EDM, wire EDM, and CNC machines. Inspection principles are also covered in this course.

132B TECHNOLOGY AND APPLICATION OF MACHINING (CAM) IIIB (1) CSU
Lab: 3 hours
This lab provides practical training on intermediate CAD/CAM as applied to CNC programming and machining.

135 ADVANCED APPLIED MATHEMATICAL CALCULATIONS (3) CSU
Lecture: 3 hours
Trigonometry and right triangle problems that apply to machine tools and machining calculations for CNC cutter compensation are emphasized in this course. The sine bar theory and use is also studied in this course.

</tbody>
</table>
161 COMPUTER ASSISTED MACHINE PROGRAMMING (CAM) 1 (4) CSU
Lecture: 3 hours, Lab: 3 hours
This course is a practical study of application of Computer Aided Manufacturing (CAM) systems for development of computer numerical control (CNC) programs for complex two and three axis machined parts. Topics include Use 3-D graphics and part verification software systems.

161A COMPUTER ASSISTED MACHINE PROGRAMMING (CAM) 1A (3) CSU
Lecture: 3 hours
Application of Computer Aided Manufacturing (CAM) systems for development of computer numerical control (CNC) programs for complex two and three axis machined parts are studied in this course. Topics include Use 3-D graphics and part verification software systems.

161B COMPUTER ASSISTED MACHINE PROGRAMMING (CAM) 1B (1) CSU
Lab: 3 hours
This course focuses on practical study of application of conventional CNC systems for numerical control (CNC) programs for complex two and three axis machined parts. Topics include Use 3-D graphics and part verification software systems.

162 COMPUTER ASSISTED MACHINE PROGRAMMING (CAM) II (4) CSU
Lab: 12 hours
This course is practical study of intermediate and advanced application of CAM system related to CNC programming and machining operations.

162A COMPUTER ASSISTED MACHINE PROGRAMMING (CAM) IA (2) CSU
Lab: 6 hours
This course is practical study of intermediate and advanced application of CAM system related to CNC programming and machining operations.

162B COMPUTER ASSISTED MACHINE PROGRAMMING (CAM) IB (2) CSU
Lab: 6 hours
This course is an intense practical study of intermediate and advanced application of CAM system related to CNC programming and machining operations.

184 INSPECTION PROCEDURES I (3)
Lecture: 3 hours
This course reviews principles, application, nomenclature and applied technology of precision measuring instruments. An introduction to CMM and hands-on use of instruments including safe, and proper care are studied in this course.

186 INSPECTION PROCEDURES II (3)
Lecture: 3 hours
This course covers statistical control procedures for inspectors and other manufacturing personnel. Topics include data collection, chart construction, random sampling, limits, standard practices and use of CMM.

250 SELECTED TOPICS MACHINE SHOP CONVENTIONAL, CNC AND CAD/CAM (6) RPT3
Lecture: 6 hours
This course is a practical study of conventional machine shop. Topics such as CNC and Computer applications with an introduction to safety, set-up, operation and terminology of basic machine tools such as band saws, drill presses, lathes, mills, pedestal grinders, power saws, and CNC machines are studied in this course.

250A SELECTED TOPICS MACHINE SHOP CONVENTIONAL & CNC (3) RPT3
Lecture: 3 hours
This course focuses on conventional machine shop. Topics such as CNC and Computer applications with an introduction to safety, set-up, operation and terminology of basic machine tools such as band saws, drill presses, lathes, mills, pedestal grinders, power saws, and CNC machines are studied in this course.

250B SELECTED TOPICS MACHINE SHOP CAD/CAM (3)
RPT3
Lecture: 3 hours
This course covers computer applications and introduction to safety, set-up, operation and terminology of basic machine and application of basic CAD/CAM.

251 SELECTED APPLICATIONS MACHINE SHOP; CONVENTIONAL AND CNC (2) RPT3
Lab: 6 hours
This course is a practical study of conventional machine shop, CNC applications with an intermediate presentation of safety, set-up, operation and terminology of machine tools such as band saws, grinders, lathes, mills, pedestal grinders, power saws and CNC machines, and their attachments. Application of hand tools and measuring tools are also covered with an introduction to intermediate specialized machining.

251A SELECTED APPLICATIONS MACHINE SHOP; CONVENTIONAL AND CNC (1) RPT3
Lab: 3 hours
This is module one of two for the course covering the practical study of conventional machine shop, CNC applications with an intermediate presentation of safety, set-up, operation and terminology of machine tools such as band saws, grinders, lathes, mills, pedestrian grinders, power saws and CNC machines, and their attachments. Application of hand tools and measuring tools are also covered with an introduction to intermediate specialized machining.

251B SELECTED APPLICATIONS MACHINE SHOP / CNC (1) RPT3
Lab: 3 hours
This is module two of two for the course covering the practical study of conventional machine shop, CNC applications with an intermediate presentation of safety, set-up, operation and terminology of machine tools such as band saws, grinders, lathes, mills, pedestrian grinders, power saws and CNC machines, and their attachments. Application of hand tools and measuring tools are also covered with an introduction to intermediate specialized machining.

252 SELECTED APPLICATIONS MACHINE SHOP CAD/CAM (2) RPT3
Lab: 6 hours
This course is a practical study on computer topics on advanced presentation of safety, set-up, operation and terminology of machine tools such as boring machines, EDM machines, grinders, lathes, mills and CNC machines, including accessories, attachments, hand tools and measuring tools. An introduction to advanced specialized machining is also covered in this course.

252A SELECTED APPLICATIONS MACHINE SHOP CAD (1) RPT3
Lab: 3 hours
This is the CAD portion of the course covering the practical study on computer topics on advanced presentation of safety, set-up, operation and terminology of machine tools such as boring machines, EDM machines, grinders, lathes, mills and CNC machines, including accessories, attachments, hand tools and measuring tools. An introduction to advanced specialized machining is also covered in this course.
252B  SELECTED TOPICS MACHINE SHOP CAM (1) RPT3
Lab: 3 hours
This is the CAM portion of the course covering practical study on computer topics on advanced presentation of safety, set-up, operation and terminology of machine tools such as boring machines, EDM machines, grinders, lathes, mills and CNC machines, including accessories, attachments, hand tools and measuring tools. An introduction to advanced specialized machining is also covered in this course.

MANAGEMENT

2  ORGANIZATION AND MANAGEMENT THEORY (3) CSU
Lecture: 3 hours
As part of the study of industrial organization, this course covers such topics as financing the enterprise, building the internal organization, and plant layout. The study of industrial operations includes production planning and control, inventory and material handling, quality control, and methods analysis and work simplification. In addition, this course includes a consideration of the principles of industrial relations and personnel management, office management, and internal coordination and environmental issues.

13  SMALL BUSINESS ENTREPRENEURSHIP (3) CSU
Lecture: 3 hours
This course is designed to teach the student to understand the problems of organizing and operating a small business and how to analyze one’s own personal qualifications for small business management.

33  PERSONNEL MANAGEMENT (3) CSU
Lecture: 3 hours
This course is concerned with the development of the personnel function, personnel tools and records, and the use of psychology in personnel administration. Training and education of employees, incentives, special problems of personnel administration and management, employee representation, and social controls are included as topics of discussion.

50  LOCAL GOVERNMENT FOR THE MANAGER (3) CSU
Lecture: 3 hours
A course designed to develop an understanding of the principles and functions of management in large governmental agencies, especially at the municipal level. The course will emphasize management in the areas of personnel, finance, controls, organization, and planning.

MARKETING

1  PRINCIPLES OF SELLING (3) CSU
Lecture: 3 hours
Study is made of the development of the fundamental principles of wholesale and specialty selling, including such phases as developing the sales plan, securing prospects, effective goods and service presentation, product analysis, closing the sale, and service after the sale.

11  FUNDAMENTALS OF ADVERTISING (3) CSU
Lecture: 3 hours
This course covers the principles and practice of advertising, including copy, layout, slogans, trademarks, mechanics, media, and the organization and execution of advertising campaigns.

21  PRINCIPLES OF MARKETING (3) CSU
Lecture: 3 hours
This course is a managerial approach to marketing principles. It covers marketing research, sales forecasting, sales cost analysis, domestic and international markets, customer motivation, production analysis, consumer and industrial markets, retailing and wholesaling, distribution channels, sales promotion and advertising, personal selling, pricing policies, market legislation and environment factors which impact marketing.

25  MARKETING INTERNSHIP LAB (3) RPT3
Lecture: 2 hours; Lab: 2 hours
A lab class which provides opportunity for students to implement a marketing plan directly with actual business from industry.

MATHEMATICS

101  WORLD OF NUMBERS (3) NDA
Lecture: 3 hours
This is the first course in the sequence of courses in mathematics. Students learn reading and writing whole numbers; addition, subtraction, multiplication, division and order of operations with whole numbers; divisibility tests, factorization, finding greatest common factor and least common multiple; and solving simple application problems with whole numbers.

105  ARITHMETIC FOR COLLEGE STUDENTS (3) NDA
Prerequisite: Successful completion of Mathematics 101 with a grade of “C” or better or placement process
Lecture: 3 hours
Topics include operations in addition, subtraction, multiplication and division of fractions, decimals; using prime number factorization; percentages and applications.

112  PRE-ALGEBRA (3) NDA
Prerequisite: Successful completion of Mathematics 105 with a grade of “C” or better or placement process.
Lecture: 3 hours
This course prepares students for their first course in Algebra. Topics include a brief review of arithmetic operations with signed numbers, variables, expressions, linear equations, and word problems.

113  ELEMENTARY ALGEBRA A (3)
Prerequisite: Successful completion of Mathematics 112 with a grade of “C” or better or placement process.
Lecture: 3 hours
Topics include review of signed numbers, variables, the order of operations; addition, subtraction of polynomials; solve and graph linear equations, ; solve linear inequalities, solve systems of equations.

114  ELEMENTARY ALGEBRA B (3)
Prerequisite: Successful completion of Mathematics 113 with a grade of “C” or better.
Lecture: 3 hours
Review of Elementary Algebra A. Multiplication and Division of polynomials, Factoring, Rational Expressions, Radicals, Solving quadratic equations, Rational equations, Radical equations and word problems.
115 **ELEMENTARY ALGEBRA (5)**  
Prerequisite: Successful completion of Mathematics 112 with a grade of "C" or better or college placement process.  
Lecture: 5 hours  
Topics include signed numbers, variables, the order of operations; addition, subtraction, multiplication and division of signed numbers and polynomials. Solve linear equations, inequalities; factor; graph. Solve word problems, systems of equations, rational equations, radicals and quadratic equations.

120 **ELEMENTARY GEOMETRY (5)**  
Prerequisite: Math 115 or Math 113 and Math 114 with a grade of "C" or better or placement process.  
Lecture: 5 hours  
This course is an introduction to Euclidean geometry and it is equivalent to one year of high school geometry. This course reviews basic geometric constructions, definitions, postulates, theorems and their proofs, elements of mathematical logic, and analytical reasoning.

121 **ESSENTIALS OF PLANE GEOMETRY (3)**  
Prerequisite: Math 113 and 114 or Math 115 with a grade of "C" or better or placement process.  
Lecture: 3 hours  
This course is an introduction to Euclidean geometry and it is equivalent to one year of high school geometry. This course reviews basic geometric construction, definitions, postulates, theorems and their proofs.

125 **INTERMEDIATE ALGEBRA (5)**  
Prerequisite: Math 113 and 114 or Math 115 with a grade of "C" or better or placement process.  
Lecture: 5 hours  
This course is a study of the properties of real numbers, laws of exponents, radicals, equations and inequalities in linear and quadratic form, systems of equations, matrices, graphing in two variables, rational expressions and equations, complex numbers, conic sections and their graphs, exponential and logarithmic functions.

215 **PRINCIPLES OF MATHEMATICS I (3) UC:CSU**  
**215 and 216 combined: maximum credit, one course**  
Prerequisite: Mathematics 125 with a grade of "C" or better or placement process.  
Lecture: 3 hours  
This course is primarily for students who plan to teach arithmetic in elementary schools. In this course, systems of numeration, language of sets, the nature of numbers and fundamental operations, number theory, functions and field of real numbers are studied.

216 **PRINCIPLES OF MATHEMATICS II (3) UC:CSU**  
**215 and 216 combined: maximum credit, one course**  
Prerequisite: Mathematics 125 with a grade of "C" or better or placement process.  
Lecture: 3 hours  
This course is the second of two in a sequence for prospective elementary school teachers. Topics in this course include decimal and real numbers, rational numbers, abstract mathematical systems, geometry and metric system.

225 **INTRODUCTORY STATISTICS (3) UC:CSU**  
**225 and 227 combined: maximum credit, one course**  
Prerequisite: Mathematics 125 with a grade of "C" or better or placement process.  
Recommended: Concurrent enrollment in Mathematics 226.  
Lecture: 3 hours  
Students will discuss basic concepts and techniques of descriptive and inferential statistics including: sampling, probability, statistical distributions, tables and graphs, central limit theory, hypothesis testing, confidence interval estimation, correlation and regression.

226 **ELEMENTARY STATISTICS PROBLEM SOLVING (1) CSU**  
Lecture: 1 hour  
Supplements Math 225 class lectures by introducing the student to various statistical applications.

227 **STATISTICS (4) UC:CSU**  
**225 and 227 combined: maximum credit, one course**  
Prerequisite: Mathematics 125 with a grade of "C" or better or placement process.  
Lecture: 4 hours  
This course discusses basic concepts and techniques of descriptive and inferential statistics including: sampling, probability, statistical distributions, tables and graphs, central limit theory, hypothesis testing, confidence interval estimation, correlation and regression. Most of analysis will be done using Excel spreadsheet program.

230 **MATHEMATICS FOR LIBERAL ARTS STUDENTS UC:CSU**  
Prerequisite: Math 125 with a grade of "C" or better or placement process.  
Lecture: 3 hours  
This is a survey course for prospective teachers and Liberal Arts students. Emphasis is on Mathematical concepts and problem-solving rather than basic skills. Some history of mathematics is included. This course is intended to enhance the student’s appreciation of mathematics. Included are topics such as numeration systems, algebraic models and graphing set theory, and logic.

235 **FINITE MATHEMATICS (5) UC:CSU**  
Prerequisite: Mathematics 125 with a grade of "C" or better or placement process.  
Lecture: 5 hours  
This course consists of the basic concepts and operations of algebra essential to business, life and social science majors. The course includes the study of rational exponents, quadratic equations, graphs, logarithms, mathematics of finance, linear programming and an introduction to probability and statistics.

236 **CALCULUS FOR BUSINESS AND SOCIAL SCIENCES (5) UC:CSU**  
Prerequisite: Mathematics 125 with a grade of "C" or better or placement process.  
UC limits credit for Math 236 combined with Math 265 and 266 to 2 courses.  
Lecture: 5 hours  
This course is an introduction to one and two variable calculus as applied to business, economics, and social sciences, included are applications of partial derivatives and multiple integrals to extreme problems.

240 **TRIGONOMETRY (3) CSU**  
Prerequisite: Math 121/125 with a grade of "C" or better or placement process.  
Lecture: 3 hours  
Topics include trigonometric functions; circular functions; trigonometric equations; trigonometric identities; solutions of right and oblique triangles; inverse trigonometric functions, graphing; complex numbers and Demoivre’s Theorem; polar coordinates; vectors and applications.

245 **COLLEGE ALGEBRA (3) UC:CSU**  
Prerequisite: Mathematics 125 with a grade of "C" or better or placement process.  
Lecture: 3 hours  
Upon successful completion of this course, students will reinforce the concept of functions and their graphs important in later courses of mathematics, science, business, nursing, or computer science. Polynomial, rational, radical, exponential, and logarithmic equations, both linear and nonlinear systems, sequences and series, and basics of probability are covered to allow students to solve a wide variety of real-life applications.
187

MEDICAL ASSISTANT

SEE HEALTH OCCUPATIONS

MICROBIOLOGY

1  INTRODUCTORY MICROBIOLOGY (5) UC:CSU
Prerequisites: BIO 3, 6, 36 or 20 and Chem 51, 65 or 101 with a grade of “C” or better.
Lecture: 3 hours; Lab: 6 hours
This course examines the nature, distribution and physiological activities of microorganisms; the place of microorganisms in nature; the microbiology of water, soil, dairy products and other foods, and industrial applications, including medical aspects of microbiological techniques.

20  GENERAL MICROBIOLOGY (4) UC:CSU
Prerequisites: Chemistry 51, 65 or 101 and BIO 3, 6, 36 or 20 with a grade of “C” or better
Lecture: 3 hours; Lab: 3 hours
This is a comprehensive course for the Health Occupations and pre-nursing majors. It demonstrates the interdependence and impact of microorganism upon modern thought and living. Emphasis is placed upon the handling of microorganisms.

MICROCOMPUTER

TECHNICIAN I.T.

ESSENTIALS

77  CISCO NETWORKING ACADEMY – SEMESTER I (3) RPT1 CSU
Lecture: 2 hours; Lab: 3 hours
This is the first course in a four course sequence that qualifies the student to take the CISCO CCNA Certification Test; and covers fundamentals of computer internetworking, including safety terminology, protocols, network topology and standards, cabling, electrical considerations, the OSI models, IP addressing, bridges, switches, hubs, and routers, and basic network design.

78  CISCO NETWORKING ACADEMY – SEMESTER II (3) RPT1 CSU
Recommended Preparation: Microcomputer Technician 77
Lecture: 2 hours; Lab: 3 hours
This is the second course in a four course sequence that qualifies the student to take the CISCO CCNA Certification Test; and covers router fundamentals, beginning router setup and configurations, routed and routing protocols, wide area internetworking fundamentals, network troubleshooting and network management.
### Course Descriptions

<tbody>
<tr>
<td>253</td>
<td>Fiber Optics (3) RPT1</td>
<td>2 hours</td>
<td>3</td>
<td>This course is designed to provide students with more advanced knowledge and skills to become entry-level technicians in the network cabling industry with a concentration in fiber optics and leads to industry certification by C-Tech Associates, Inc.</td>
</tr>
<tr>
<td>252</td>
<td>Network Cabling Specialist (3) RPT1</td>
<td>2 hours</td>
<td>3</td>
<td>Course work includes identification, description, application and configurations of various cables and terminations. Troubleshooting cables for shorts, opens, transposals and reversals, and understanding pin configurations are included. Successful completion of this course leads to industry certification by C-Tech Associates, Inc.</td>
</tr>
<tr>
<td>164</td>
<td>I.T. Essentials Networking Personal Computers (4) CSU</td>
<td>2 hours</td>
<td>5</td>
<td>The course will assist students in designing, selecting, configuring and installing local area networks. System administration and troubleshooting is also covered in detail.</td>
</tr>
<tr>
<td>160</td>
<td>I.T. Essentials Application Software Fundamentals (2) CSU</td>
<td>1 hour</td>
<td>3</td>
<td>Instruction and demonstrations are provided on the application, set-up, configurations and operation of a wide range of computer programs</td>
</tr>
<tr>
<td>80</td>
<td>Cisco Networking Academy – Semester IV (3) RPT1</td>
<td>2 hours</td>
<td>3</td>
<td>This is the fourth course in a four-course sequence that qualifies the student to take the Cisco CCNA Certification Test; and covers advanced WAN theory and design; PPP, frame relay, ISDN; threaded case studies; and national SCANS skills.</td>
</tr>
<tr>
<td>79</td>
<td>Cisco Networking Academy – Semester III (3) RPT1</td>
<td>2 hours</td>
<td>3</td>
<td>This is the third course in a four-course sequence that qualifies the student to take the Cisco CCNA Certification Test; and covers advanced router set-up and configurations, LAN switching theory and VLAN’s, advanced LAN and LAN switched design, Novell IPS, and threaded case studies.</td>
</tr>
<tr>
<td>32</td>
<td>Applied Computations in Mortgage Finance (2)</td>
<td>2 hours</td>
<td>3</td>
<td>Students will learn basic calculations for mortgage finance, including how to calculate income and monthly mortgage payments, taxes and insurance expenses. Students will learn percentage and ratio calculations to determine loan-to-value, debt service and qualifying calculations for mortgage lending purposes.</td>
</tr>
</tbody>

---

**Los Angeles Trade-Technical College**

2011-2012 General Catalog
This course provides students with a basic foundation in financial and credit management as it pertains to their personal finances as well as tools and resources to assist their mortgage finance and real estate clients.

This course covers the basic principles, terminology and calculations essential in originating, underwriting, processing and administering residential mortgage loans. Topics covered include types of residential mortgage loans, risk evaluation, appraisal, legal requirements and secondary mortgage market.

This course covers the history of discrimination and federal and state regulations as they pertain to correcting discriminatory lending practices. This course provides advanced Mortgage Finance students practical and applied training in working directly with prospective and new clients interested in buying or refinancing a home. Students will learn & practice analyzing a client’s credit history and FICO score, counseling clients on how to improve their credit, and identifying appropriate loan products and programs their clients may be eligible for. Students will practice using cutting-edge industry software that helps manages clients, helps clients improve their credit and identifies potential mortgage products.

This course provides students with specialized skills in the use of the financial calculator (HP 12C) for mortgage lending. While learning specifics of this calculator, students will learn asset, liability and housing calculations as they pertain to current lending practices in the industry.

This course provides students with a basic foundation in understanding special credit, borrowing, “high-touch” and comparable professional experience. This course will provide residential lending professionals with a basic foundation in sales strategies needed to effectively penetrate the emerging inner city markets.

This course introduces students to programs and guidelines that encourage and facilitate homeownership. This course includes homebuyer education, budgeting, credit analysis, affordable housing and community lending products and non-traditional underwriting and subsidies for low-to-moderate-income borrowers.

This course provides students with specialized skills in the use of the financial calculator (HP 12C) for mortgage lending. While learning specifics of this calculator, students will learn asset, liability and housing calculations as they pertain to current lending practices in the industry.

This course will provide residential lending professionals with a basic foundation in subsidy products and programs for first-time homebuyers and/or low-to-moderate income borrowers. Special emphasis will be on assessing and using subsidies with conventional loan products.

This course will provide advanced Mortgage Finance students practical and applied training and experience in working directly with prospective and new clients interested in buying or refinancing a home. Students will learn & practice analyzing a client’s credit history and FICO score, counseling clients on how to improve their credit, and identifying appropriate loan products and programs their clients may be eligible for. Students will practice using cutting-edge industry software that helps manages clients, helps clients improve their credit and identifies potential mortgage products.

207 UNDERSTANDING REAL ESTATE & LOAN DOCUMENTS REQUIRED TO CLOSE TRANSACTIONS (0.5) CSU  
Lecture: 0.5 hour  
This course will provide residential lending professionals with a basic foundation in understanding real estate and loan documents that will facilitate their successful closing of residential real estate transactions in emerging inner city markets.

285 DIRECTED STUDY (2) CSU  
This course provides students with the opportunity for advanced study of various mortgage finance topics. Students must have instructor approval prior to enrollment and participation a directed study course.

385 DIRECTED STUDY (3)  
This course provides students with the opportunity for advanced study of various mortgage finance topics. Students must have instructor approval prior to enrollment and participation a directed study course.

MUSIC  

111 MUSIC APPRECIATION (3) CSU  
Lecture: 3 hours  
An introductory survey course designed to develop an understanding of the literature of Western art music from the Middle Ages through the present day. Emphasis is given to music heard in concert, motion pictures, radio and television and to techniques of perceptive listening.

141 JAZZ APPRECIATION (3)UC:CSU  
Lecture: 3 hours  
A survey of twentieth-century blues, ragtime, New Orleans and Chicago jazz, swing, bebop, cool jazz, hard bop, third stream, avant-garde and free jazz, fusion and experimental jazz styles. Emphasis is placed on the music and personalities of those artists who made original contributions and whose work influenced that of other important jazz figures.

650 BEGINNING GUITAR (2) UC:CSU  
Lecture: 1 hour; Lab: 2 hours  
This is a beginning course in guitar playing. Skills studied include performance of single line melodies, accompaniment patterns, sight reading, improvisation, and solo repertoire.  
Note: Student must supply his/her own classical guitar.

MOTORCYCLE REPAIR MECHANICS  

210 INTERNAL COMBUSTION ENGINE THEORY AND REPAIR (4)  
Lecture: 3 hours; Lab: 3 hours  
A study is made of engine types, construction operating principles and performance. Shop practice is given on engine disassembly and inspection, valve reconditioning, bearing replacement, piston and ring service and engine reassembly.

212 MOTORCYCLE SERVICE AND TUNE-UP THEORY AND REPAIR (4)  
Lecture: 3 hours; Lab: 3 hours  
Lecture and laboratory experiences are given on routine motorcycle service and tune-up as well as trouble-shooting and repairing engine performance problems.

214 MULTI-CYLINDER ELECTRICAL PRINCIPLES AND REPAIR (4)  
Lecture: 3 hours; Lab: 3 hours  
Instruction is offered in electrical theory, diagnosis, and repair as applied to the electrical systems of multi-cylinder motorcycles. Shop practices are given on testing procedures and test equipment, and repair.

216 MULTI-CYLINDER ENGINE DIAGNOSIS AND OVERHAUL (4)  
Lecture: 3 hours; Lab: 3 hours  
Multi-cylinder engine principles, operation and overhaul methods are stressed. Shop instruction on diagnosis, disassembly, repair, overhaul and assembly of multi-cylinder engines is offered.

NURSING SCIENCE  

100 TRANSITION FROM VN TO RN (2) CSU  
Prerequisite: Declared major - Registered Nursing and possession of a current California license as a Vocational Nurse. This course must be taken after all other prerequisites have been completed.  
Lecture: 2 hours  
This bridge course provides students holding a current California Vocational Nursing license with an understanding of the role change from Licensed Vocational Nurse to Registered Nurse. The focus of the content is on ethical and legal issues affecting nursing practice, effective communication skills, transcultural assessment techniques, implementation of the nursing process and the program’s conceptual framework. The course introduces the students to professional nursing and is taught in eight weeks.

101 BASIC NURSING PRACTICE (3) CSU  
Prerequisite: Official admission to the Registered Nursing Program. Corequisite: NS 103 NS 105  
Lecture: 2.25 hours; Lab: 13 hours  
This course is an introduction to the philosophy of nursing, nursing history, Maslow’s Hierarchy of needs, and legal and ethical issues in nursing. Concurrent with the theory, the nursing student will have basic client care experience in the skills lab and hospital setting.

102 FUNDAMENTALS OF NURSING (3) CSU  
Prerequisite: Successful completion of NS 101 and NS 103 with grade of “C” or better.  
This course will be an introduction to medical-surgical nursing concepts and issues based on Maslow’s hierarchy of needs. The course content will be presented within the framework of wellness-illness continuum, and normal physiologic, psychological, and sociocultural needs of the client. The client care issues will range from mild to moderate. The A.T.I exam in nursing fundamentals will be administered.
103 NURSING PROCESS (1) CSU
Prerequisite: Admission to the Registered Nursing Program
Corequisite: NS 101
Lecture: 2.25 hours
This course is designed to acquaint the student with the components of Nursing Process: assessment, nursing diagnosis, planning, implementation and evaluation. Students will use Nursing Process in conjunction with Maslow’s Hierarchy of Needs to make appropriate nursing judgments.

104 COMMUNICATION IN NURSING (1) CSU
Prerequisite: Successful completion of NS 101 and NS 103 with grade of “C” or better
Corequisite: NS 102
Lecture: 2.25 hours
The course is designed to acquaint the student with the elements of therapeutic communication and how communication is affected by culture and variations in wellness and illness. Included in the course is a discussion on how use of nursing process and critical thinking will assist the student to form therapeutic alliances with clients and healthcare team.

105 PHARMACOLOGY IN NURSING (2) CSU
Prerequisite: Admission to the Registered Nursing Program
Corequisite: First semester courses
Lecture: 1.75 hours, Lab: 1.75 hours
This course focuses on the effects of drug therapy on human body systems including the central nervous system, autonomic nervous, cardiovascular, renal, endocrine, respiratory and Gastrointestinal systems. Anti-inflammatory, anti-infective, immune and biological modifiers, chemotherapeutic, hematological, dermatologic, ophthalmic and optic agents are also covered.

106 MEDICAL-SURGICAL NURSING I (5) CSU
Prerequisite: Successful completion of first semester courses with a grade of “C” or better
Lecture: 6.75 hours; Lab: 12.5 hours
This basic course focuses on the nursing care of the adult client with moderate stress posed by common endocrine, gastrointestinal, cardiac, musculoskeletal, neurological and respiratory disorders. The student will function as a member of the health care team and beginning leadership skills will be presented. Emphasis will be placed on classroom and clinical application of critical thinking and therapeutic nursing interventions in acute, chronic and community health care settings.

107 MEDICAL-SURGICAL NURSING II (5) CSU
Prerequisite: Successful completion of second semester courses with grade of “C” or better
Lecture: 6.75 hours Lab: 12.5 hours
This intermediate level medical/surgical nursing course focuses on nursing care of adult clients with high acuity problems within hospital and community settings. Students will use nursing process and Maslow’s Hierarchy of needs to plan and implement nursing care. The course builds on the theory and skills presented in NS 106 and continues the focus on leadership that was introduced in NS 106. Assessment Technologies Institute (ATI) materials will be incorporated into the course.

108 MEDICAL-SURGICAL NURSING III (3) CSU
Prerequisite: Successful completion of third semester courses with grade of “C” or better
Corequisite: NS 112
Lecture: 3.5 hours Lab: 10.25 hours
This course focuses on the nursing care of medical-surgical clients in a variety of setting. Emphasis will be on classroom and clinical application of critical thinking and caring interventions in chronic, acute, critical care and community health care settings. Assessment Technologies Institute (ATI) materials will be incorporated into the course. The ATI med/surg proctored exam will be administered.

109 GERONTOLOGY AND COMMUNITY BASED NURSING (2) CSU
Prerequisite: Successful completion of first semester courses with grade of “C” or better
Corequisite: NS 110
Lecture: 2.25 hours Lab: 6.75 hours
This course focuses on nursing care of the older adult client with common health and illness needs. Emphasis will be on classroom and clinical application of critical thinking and therapeutic nursing interventions in acute, chronic and community health care settings for the older adult population.

110 PSYCHIATRIC MENTAL HEALTH NURSING (3) CSU
Prerequisite: Successful completion of first semester courses with grade of “C” or better.
Corequisite: NS 109
Lecture: 3.5 hours Lab:10.25 hours
This course focuses on nursing care of clients with common psychiatric mental health needs/disorders across the lifespan. Students will apply the nursing process, critical thinking, psychosocial theory and Maslow’s Hierarchy of Needs to care of clients in acute, chronic and community-based psychiatric-mental health settings. A.T.I. exam will be administered.

111 REPRODUCTIVE AND WOMEN’S HEALTH NURSING (3.5) CSU
Prerequisite: Successful completion of second semester courses with grade of “C” of better.
Corequisite: NS 108
Lecture: 4.5 hours Lab: 10.25 hours
This course focuses on the nurse as a provider of care, manager of care and a member of the profession in a variety of maternal/newborn and women’s health settings. Assessment Technologies Institute materials will be incorporated into the course.

112 NURSING CARE OF CHILDREN & FAMILIES (3.5) CSU
Prerequisite: Successful completion of third semester with grade of “C” or better
Corequisite: NS 108
Lecture: 4.5 hours Lab: 10.25 hours
This course focuses on the nurse as a provider of care, manager of care and member of the profession in a variety of settings involving children and families. Course content includes physiological, psychological, developmental and sociocultural needs of children and families. Assessment Technologies Institute materials will be included in the course.

114 NURSING LEADERSHIP AND MANAGEMENT/ PRECEPTORSHIP (3) CSU
Prerequisite: NS 108 NS 112
Lecture: 0.5 hours Lab: 135 hour Preceptorship
This course focuses on the transitional role of the graduating Associate Degree nurse as a provider of care, manager of care and member of the profession. Concepts and issues to be examined include effective leadership styles, advanced therapeutic communication, delegation, conflict resolution, time management, nursing ethics and professional issues. Clinical experience is in the form of a preceptorship.

115 BASIC SKILLS ENHANCEMENT LAB (1) CSU
116 BASIC SKILLS ENHANCEMENT LAB (2) CSU
117 BASIC SKILLS ENHANCEMENT LAB (3) CSU
Prerequisite: Enrollment in the Registered Nursing Program
One hour of study equates to one unit. These courses may not be offered each semester. The course allows students to enhance theory, clinical skills and computer skills under the direction of a supervising instructor. May be repeated.
OFFICE MACHINES

2 ADDING AND CALCULATING MACHINES (1) CSU
Lab: 2 hours
This course emphasizes the touch method of skill development in the use of electronic calculating machines. It also provides a review of basic math functions with emphasis on practical business problems.

OPERATION AND MAINTENANCE ENGINEERING

228 STEAM PLANT OPERATION I (6)
Lecture: 6 hours
Related engineering information concerning high pressure steam plants in office buildings and industrial establishments are studied in this course. Emphasis is given to steam power plant, use of steam tables, types of boilers, construction of boilers, boiler accessories, settings for combustion equipment and heating surfaces; operation of steam boilers and the combustion of fuels.

229 STEAM PLANT OPERATION II (6)
Lecture: 6 hours
Instruction is given in steam water-tube and fire-tube boilers covering safe operation and maintenance. Course covers steam turbines, pumps, and auxiliary power plant equipment, steam plant efficiencies, boiler water treatment, troubleshooting, and power transmission. Completion of this second course prepares trainee to take Los Angeles City examination for steam engineer’s license.

PARALEGAL AND LAW OFFICE

PROGRAM OVERVIEW

LATTC offers a range of courses designed for students who are interested in paralegal studies or work in a legal environment.

The Paralegal and Law Office Program is designed to prepare students to assist attorneys in both private and public sectors in all phases of legal work and to equip the student with the knowledge necessary to enter the legal service fields as an entry-level paralegal. It will also insure a quality paralegal education at the community college level.

3 CIVIL RIGHTS AND THE LAW (3) CSU
Lecture: 3 hours
This course will analyze civil rights decisions in the context of their historical period. It is designed to give the student an understanding of the relationship of the role social movements have played in creating civil rights law.

4 LEGAL INTERNSHIP (3)
Prerequisite: Paralegal 10
Lecture: 1 hour; Lab: 2 hours
Under the instructor’s direction and according to guidelines, the paralegal student will be assigned to a law related institution: a local court, district attorney’s office, city attorney’s office, private law firm, or law library to demonstrate their vocational skills and abilities.

10 INTRODUCTION TO LEGAL ASSISTANT I (3) CSU
Lecture: 3 hours
Introductory course providing an introduction to legal terminology, research problems, law and ethics, and the role of the paralegal as a legal assistant.

11 INTRODUCTION TO LEGAL ASSISTANT II (3) CSU
Lecture: 3 hours
Continuation of Paralegal I with the study of composition, location, and jurisdiction of all courts including an introduction to legal drafting and writing with continued study of document production and administration within the judiciary and a detailed examination of civil and criminal litigation.

12 TORT LAW AND CLAIMS INVESTIGATION (3)
Lecture: 3 hours
Overview of the fundamentals of Tort Law including intentional torts, negligence, and strict liability. Additionally, students will study personal injury investigation, preparation of legal pleadings, preparation and analysis of discovery materials, and how to prepare for trial.

13 WILLS, TRUSTS, AND PROBATE ADMINISTRATION (3)
Lecture: 3 hours
Study of the fundamental principles of the law of wills, trusts, and probate including an examination of the organization and jurisdiction of the California Probate Court and the administration of estates through that court.

14 LAW OFFICE MANAGEMENT
Lecture: 3 hours
Study of the basic objectives of the management of a law office including examining the hardware and software used in a law office, office manuals, and law office correspondence.

16 CIVIL AND CRIMINAL EVIDENCE
Lecture: 3 hours
Students will examine the rules of court including deposition and interrogatory preparations and how each affects the admissibility of evidence in a civil or criminal proceeding.

17 LEGAL WRITING (3)
Lecture: 3 hours
Advanced legal drafting and writing, including special research and projects.

18 MARRIAGE AND FAMILY LAW
Lecture: 3 hours
Course surveys practice and procedures relating to issues concerning family law. An examination of parental prerogatives, marriage, separation, divorce, custody and support, adoption and guardianship.

19 PROPERTY AND CREDITOR RIGHTS (3)
Lecture: 3 hours
Study of property including community property, tenancies, leases, deeds, other property interests, a study of the system of recording and search of public documents, and bankruptcy laws. The student will also explore the ramifications of secured transactions.
PERSONAL DEVELOPMENT

Personal Development classes are designed to help students develop the personal skills necessary to succeed in college; effectively utilize both on- and off-campus resources; enhance interpersonal relationships, and engage in effective career planning. For more information about Personal Development classes, please contact the Counseling Department at (213) 763-7354 or visit ST-416.

INTERPERSONAL RELATIONSHIPS (1) CSU RPT3
Lecture: 1 hour
This course enhances interpersonal skills for building effective communication for personal and professional growth. It utilizes group dynamics by enhancing self-esteem through self-awareness, acceptance, ability to listen and workplace habits. An honest appraisal of individual strengths and weaknesses is made in an effort to help remove barriers to social and academic growth.

CAREER PLANNING (1) CSU
Lecture: 1 hour
This is a career planning course designed to assist the student in selecting an appropriate career goal by introducing critical strategies, and information which is essential in selecting a career. The main areas covered in this course are self assessment, problem solving, discovering your strengths and weaknesses, and understanding your personality style. Some tools which will be used to help identify the areas of concern are the Myers Briggs and the C.O.P.E.S. You will also learn how to prepare a functional and chronological resume, as well as a standard cover letter.

COLLEGE SURVIVAL (2) CSU
Lecture: 2 hours
This course provides the student with information enabling him/her to succeed or survive in a college program. Emphasis will be placed on development of making informed decisions, study skills, productive time management, financial planning, an understanding of college terminology and utilization of college support services.

POST SECONDARY EDUCATION: THE SCOPE OF CAREER PLANNING (3) CSU
Lecture: 3 hours
This course introduces students to the role of higher education in society and to their role as students. Students explore personal attributes needed for college success, critical thinking and effective study strategies, relating to others in a diverse world, the career planning and decision making process, and transfer and educational planning. This course will also provide students with an overview of campus resources and policies.
PHYSICAL EDUCATION (KINESIOLOGY) - AQUATICS

101 SWIMMING, NON-SWIMMER SKILLS (1) UC:CSU
Lab: 3 hours
This course offers instruction and practice in the fundamental skills of swimming and water safety for non-swimmers. This class covers the five basic swimming strokes, treading water, survival floating, jumping and diving into deep water, cramp release, and elementary forms of rescue. A wonderful class for all to begin to learn how to swim.

102 SWIMMING SKILLS (1) UC:CSU
Lab: 3 hours
This course offers instruction and practice in the fundamental skills of swimming and water safety for those who have mastered the basic swimming skills and want to improve their depth and range of aquatic skills. This course will cover all competitive strokes and those recognized by the American Red Cross. It will include information on hydrodynamics, theory of propulsion in the water, principles of using levers, water safety, and elementary forms of rescue, springboard diving, and flips turns. Cardiovascular conditioning will be done as the lap swimming distance increases during the semester.

131 AQUA AEROBICS ACTIVITY (1) UC:CSU
Lab: 3 hours
Introduction is provided in water exercise that may be used for maintenance of individual fitness programs. No swimming skills required. Water Exercise equipment are used in circuits and a variety of individual exercises to help tone the body. Other Basic Metabolic functions are covered.

628 SWIM AND RUN FITNESS (1) UC:CSU
Lab: 3 hours
This course will develop cardiovascular conditioning and fitness through running and swimming. Since both activities will usually be done each session, the transition skills will also be acquired. This is a triathlon lead-up course.

PHYSICAL EDUCATION (KINESIOLOGY) - DANCE

462 MODERN DANCE (1) UC:CSU
Lab: 2 hours
This course offers instruction and practice in the basic skills and techniques of modern dance.

465 AEROBICS FOR DANCE (1) UC:CSU
Lab: 2 hours
This course introduces movement skills from dance to condition the body and develop increased strength, flexibility, movement memory, balance, endurance, and coordination.

800 INTRODUCTION TO DANCE AND DANCE HISTORY (3) UC:CSU
Lecture: 3 hours
An introduction to dance exploring its many forms and purposes including social, ethnic, ritual, art and therapy. Opportunities to observe, study and discuss dance and to understand how dance influences our culture.

814 DANCE PRODUCTION I (2) RPT3 UC:CSU
Lecture: 1 hour; Lab: 2 hours
Provides laboratory experience in developing the skills involved in dance production; choreography, set design, lighting, directing, and costume design.

PHYSICAL EDUCATION (KINESIOLOGY) - INDIVIDUAL AND TEAM ACTIVITIES

170 WALKING FOR FITNESS (1) UC:CSU
Lab: 3 hours
Walking for Fitness focuses on achieving cardiovascular fitness and a healthy lifestyle through walking. Includes such topics as shoe selection, posture, gait, walking styles, flexibility, clothing, creating a walking program and assessing fitness level. Measures of condition levels, such as Heart Rate and Body Composition and basic metabolic functions will also be discussed.

500 BASKETBALL THEORY (3) UC:CSU RPT1
Corequisite: P.E. 504
Lecture: 2 hours; Lab: 2 hours
This course will help the advanced basketball student to acquire more depth and breadth of the various offensive and defensive theories in the sport of basketball. Analysis of strategies and outcomes will be emphasized.

504 BASKETBALL (INTERCOLLEGIATE MEN AND WOMEN) (2) UC:CSU
Lab: 10 hours
Designed for intercollegiate basketball players, minimum of 10 hours a week.

506 CROSS COUNTRY (INTERCOLLEGIATE MEN AND WOMEN) (2) UC:CSU
Lab: 10 hours
Designed for intercollegiate cross country runners, minimum of 10 hours a week.

513 SWIMMING (INTERCOLLEGIATE MEN AND WOMEN) (2) UC:CSU
Lab: 10 hours
Designed for intercollegiate swimmers, minimum of 10 hours a week.

515 TRACK AND FIELD (INTERCOLLEGIATE MEN AND WOMEN) (2) UC:CSU
Lab: 10 hours
Designed for intercollegiate runners and track participants, minimum of 10 hours a week.
516  VOLLEYBALL (INTERCOLLEGIATE MEN AND WOMEN)  
(2)  
Lab: 10 hours  
This course provides the skills, training and allows for participation in the intercollegiate volleyball team minimum of 10 hours a week.

517  WATER POLO (INTERCOLLEGIATE MEN AND WOMEN)  
(2) UC:CSU  
Lab: 10 hours  
Designed for intercollegiate water polo players, minimum of 10 hours a week.

552  PRESEASON CONDITIONING (1) UC:CSU  
Lab: 3 hours  
This course involves an overview of all aspects of competitive teams with lectures and student participation.

628  RUN AND SWIM FOR FITNESS (1) UC:CSU  
Lab: 3 hours  
This course will develop cardiovascular conditioning and fitness through running and swimming. Since both activities will usually be done each session, the transition skills will also be acquired. This is a triathlon lead-up course. The distance education version of the class uses the Internet, World Wide Web and personal email.

665  BASKETBALL (1) UC:CSU  
Lab: 3 hours  
Students will learn the fundamentals of individual and team basketball; learn the rules, skills and structure of organized basketball, as well as provide unstructured, yet organized, play. Students will be coached to perform skills through drills and structured play.

666  BODY CONDITIONING (1) UC:CSU  
Lab: 3 hours  
This course teaches body fitness. It emphasizes aerobics, proper nutrition, weight control, and strength training in accordance with the American College of Sports Medicine Guidelines. A variety of exercises and techniques will be used, based on personal needs, to establish programs that will achieve these goals.

690  WEIGHT TRAINING AND CONDITIONING SKILLS (1) UC:CSU  
Lab: 3 hours  
This course offers instruction and practice in warm-up, stretching, and physical fitness conditioning through weight training. Class covers such topics as nutrition, body building, weight management, sport specific training, and injury prevention and response. Students develop a personal weight training plan and follow it.

742  CARDIO KICKBOXING (1) CSU  
Lab: 3 hours  
A laboratory physical education fitness course designed to improve the areas of cardiovascular efficiency and muscular strength using kickboxing techniques.

**PHYSICAL EDUCATION (KINESIOLOGY) - NON-ACTIVITY**

750  SPORT ETHICS (3) CSU  
Lecture: 3 hours  
This course addresses a wide range of moral and ethical issues in sports. Topics include values, principles, racial and gender equity, coaching, commercialization, enhancing stimulants and ergogenic aids, eligibility, violence, sportsmanship and Code of Ethics in sports. Examines current and historical events, rules, laws and governing organizations.

762  ANCIENT OLYMPIC GAMES (3) CSU  
Lecture: 3 hours  
This course addresses a wide range of topics that are specific to the field of the ancient Olympic games. Topics include prehistory of the games, athletics and education, the Olympic games in ancient Greece, and sport in the Hellenistic and Roman periods. Students will learn the historical and continuing effect of the ancient games on the present day Olympic movement.

**PHYSICS**

1  MECHANICS OF SOLIDS (4) UC:CSU  
Prerequisite: Physics 11 or equivalent and Prerequisite or corequisite: Math 265  
(LC limits credit; see Counselor for details.)  
Lecture: 3 hours; Laboratory/Demonstration, 3 hours  
This course is designed to cover the field of mechanics, both static and dynamic, transitional and rotational motion, work and energy, elasticity and simple harmonic motion, and gravitational theory.

2  MECHANICS OF FLUIDS, HEAT, AND SOUND (4) UC:CSU  
Prerequisite: Physics 1 and prerequisite or corequisite: Math 266 with a grade of “C” or better or equivalent.  
(LC limits credit; see Counselor for limitations.)  
Lecture: 3 hours; Laboratory/Demonstration, 3 hours  
This course covers elements of classical mechanics, thermodynamics, fluid dynamics, mechanical waves and geometrical optics, including universal gravitation, hydrostatics, hydrodynamics, oscillations, wave motion, sound, superposition of waves, temperature, first and second laws of thermodynamics, kinetic theory, entropy, nature of light and lenses. Differential and integral calculus are often needed.

3  ELECTRICITY AND MAGNETISM (4) UC:CSU  
Recommended: Physics 2  
Prerequisite: Physics 1 with a grade of “C” or better and prerequisite or corequisite: Math 266  
Lecture: 3 hours; Lab: 3 hours  
This course covers the elements of electricity and magnetism, including electric and magnetic fields and circuits and their application as well as inductance, Capacitance, Gauss’s law, Ampere’s law, Faraday’s law, and resonance.
4  OPTICS AND MODERN PHYSICS (4) UC:CSU
   Recommended Preparation: Physics 3 with a grade of "C" or better. Prerequisite or corequisite: Math 267
   Lecture: 3 hours; Lab: 3 hours
   This course covers the fundamentals of physical optics including radiation, spectra; wave mechanics, uncertainty principle, radioactivity and nuclear physics.

6  GENERAL PHYSICS I (4) UC:CSU
   Prerequisite: Physics 11 and Math 241
   Lecture: 3 hours; Lab: 3 hours
   This course provides a survey of physics at the pre-calculus level, with emphasis on mechanics, wave motion, fluids, heat and thermodynamics. The laboratory consists of engineering applications and problem solving.

7  GENERAL PHYSICS II (4) UC:CSU
   Prerequisite: Physics 6 with a grade of "C" or better.
   Lecture: 3 hours; Lab: 3 hours
   This course provides a survey of physics at the pre-calculus level, with emphasis on electricity and magnetism, optics and modern physics. The laboratory consists of engineering applications and problem solving.

11 INTRODUCTORY PHYSICS (4) UC:CSU
   Prerequisite or corequisite: Math 114 or 115
   Lecture: 3 hours; Lab: 3 hours
   This is a survey course describing the major areas of physics. Mathematical solution of simple physics problems are covered. This course is not open to students receiving credit for Physics 12.

12 PHYSICS FUNDAMENTALS (3) UC:CSU
   Credit allowed for only one of Physics 12 and 11; see Counselor for limitations.
   Prerequisite or corequisite: Math 114 or 115 with a grade of "C" or better.
   Lecture: 3 hours
   This course covers basic measurements, mechanical, thermal, and electrical phenomena at an introductory level.

14 PHYSICS FUNDAMENTALS LABORATORY (1) UC:CSU
   Prerequisite or corequisite: Physics 12 with a grade of "C" or better.
   Lab: 3 hours
   Course covers laboratory exercises in basic measurements, mechanical, thermal, and electrical phenomena at an introductory level.

29 BASIC PHYSICS FOR TECHNICIANS (4)
   Prerequisite or corequisite: Math 114 or 115
   Lecture: 3 hours; Lab: 3 hours
   This course addresses basic mechanical, electrical, magnetic, optical, and acoustic topics at an introductory level.

29A BASIC PHYSICS FOR TECHNICIANS A (3)
   Prerequisite or corequisite: Math 114 or 115
   Lecture: 3 hours

29B BASIC PHYSICS FOR TECHNICIANS B (1)
   Prerequisite or corequisite: Physics 29A
   Lab: 3 hours

32 LABORATORY IN APPLIED OPTICS (2)
   Recommended Preparation: Physics 14 and 29B with a grade of "C" or better.
   Lab: 6 hours
   Includes laboratory training in basic geometrical and physical optics, theory and uses of lasers, holography, and opto-electronic devices.

32A LABORATORY IN APPLIED OPTICS A (1)
   Lab: 3 hours

32B LABORATORY IN APPLIED OPTICS B (1)
   Lab: 3 hours

105 INTRODUCTION TO NANOTECHNOLOGY (3) CSU
   Recommended Preparation: Math 245; Physics 12, Chemistry 40 completed with a "C" or better.
   This course covers the principles of nanoscience and nanotechnology, including physical principles, the quantum behavior of matter, nanoscales, nanotubes, nanodevices, molecular circuits, molecular logic, and applications of nanoscience and nanotechnology to medicine and manufacturing. It involves demonstrations with models, nanostructures, and an atom force microscope with a haptic device.

185 DIRECTED STUDY - PHYSICS (1) CSU RPT2
   Allows students to pursue directed study in physics on a contract basis under the direction of a supervising instructor. A maximum of 3 units may be taken for credit.

285 DIRECTED STUDY - PHYSICS (2) CSU
   Allows students to pursue directed study in physics on a contract basis under the direction of a supervising instructor. A maximum of 3 units may be taken for credit.

385 DIRECTED STUDY - PHYSICS (3) CSU
   Allows students to pursue directed study in physics on a contract basis under the direction of a supervising instructor. A maximum of 3 units may be taken for credit.

PLUMBING

26 PLUMBING LAYOUT AND ESTIMATING I (3)
   Lecture: 3 hours
   Instruction is given in symbols and abbreviations, pipe fittings and pipe measurement, orthographic, isometric and freehand drawing, blueprint reading and fundamentals of piping layout.

27 PLUMBING LAYOUT AND ESTIMATING II (3)
   Lecture: 3 hours
   This course emphasizes on layout procedures for one- and two-story residential, commercial and industrial units. Topics such as estimating procedures for each of these unit, such as pricing methods and bidding practices are covered.

28 PLUMBING CODE I (3) RPT1
   Lecture: 3 hours
   Instruction is given in plumbing codes and ordinances that affect rough-in work, in city and county areas. Installation of wastes, vents, cleanouts, traps, gas fittings and gas vents, and water pipe requirements are reviewed.

31 BACKFLOW PREVENTION DEVICES (3)
   Lecture: 1.5 hours; Lab: 4.5 hours
   Fundamentals of cross-connection controls including state and municipal codes, rules and regulations are reviewed in this course. Emphasis is given to laboratory work in operating, testing and maintaining vacuum breakers, double check valves and reduced pressure devices.
33 PLUMBING CODE III (3)
Recommended Preparation: Plumbing 28 and 29 with a grade of "C" or better.
Lab: 3 hours
This course presents in-depth coverage of plumbing standards, including acceptable installation practices and acceptable materials. All standards are based on the current IAPMO uniform plumbing code.

111 INTRODUCTION TO PLUMBING (3)
Lecture: 1 hour; Lab: 6 hours
This is a study of survey of the history of the industry, occupational information, job ethics and career information. Occupational hazards, health and safety practices are reviewed.

112 FUNDAMENTALS OF PLUMBING (3)
Lecture: 3 hours
This course studies fundamentals of plumbing, mathematics and elementary drawings for beginners. Instruction is given in the principles and design of water supply and distribution.

113 BASIC PLUMBING PRINCIPLES AND PRACTICES (6)
Lecture: 3.5 hours; Lab: 7.5 hours
Fundamentals of plumbing are explored in this course. Topics include pipe sizes and calculations, flow in pipe, friction, design, application and general specification of pipes and fittings.

121 WORKING DRAWINGS AND LAYOUT I (3)
Recommended Preparation: Plumbing 111, 112 and 113 with a grade of "C" or better.
Lecture: 3 hours
Instruction is provided in applied drafting as related to the plumbing industry. The proper methods and procedures of plan interpretation and application with emphasis on plumbing specifications are reviewed.

122 PLUMBING MEASUREMENTS AND CALCULATIONS II (3)
Recommended Preparation: Plumbing 111, 112 and 113 with a grade of "C" or better.
Lecture: 3 hours
This course studies mathematics as applied to the plumbing industry with emphasis on formulas peculiar to the industry.

123 PLUMBING PRACTICES AND INSTALLATION (6)
Recommended Preparation: Plumbing 111, 112 and 113 with a grade of "C" or better.
Lecture: 1.5 hours; Lab: 13.5 hours
The study and practice of the proper methods and procedures used in installing plumbing fixtures and accessories are explored in this course. Installing, fabricating, and testing fixtures applicable to residential and commercial plumbing are covered.

131 WORKING DRAWINGS II (3)
Recommended Preparation: Plumbing 121, 122, and 123 with a grade of "C" or better.
Lecture: 3 hours
This course is a study of blueprints, plans, and drawings as related to the plumbing trade skills, including the interpretation of applicable code and standards. Basic principles of estimating, including materials and their quantities are reviewed.

132 PLUMBING MATHEMATICS AND PROCEDURES II (3)
Recommended Preparation: Plumbing 121, 122, and 123 with a grade of "C" or better.
Lecture: 1 hour; Lab: 6 hours
Instruction is given in layout procedures involving applied mathematics concerning the plumbing trades. Instruction is given in both layout and design criteria.

133 INSTALLATION AND PLUMBING FIXTURES (6)
Recommended Preparation: Plumbing 121, 122, and 123 with a grade of "C" or better.
Lecture: 3.5 hours; Lab: 7.5 hours
This course covers fabrication and erection of plumbing systems, including the finished plumbing fixture installed and test asper UPC data.

141 ADVANCED LAYOUT AND PROCEDURES (3)
Recommended Preparation: Plumbing 121, 122, and 123 with a grade of "C" or better.
Lecture: 3 hours
Proper methods of layout and installation procedures in fabrication and erection of piping in commercial buildings are reviewed in this course. Local and national codes are also studied.

142 SERVICING OF PLUMBING FIXTURES AND APPLIANCES (3)
Recommended Preparation: Plumbing 121, 122, and 123 with a grade of "C" or better.
Lecture: 1.5 hours; Lab: 4.5 hours
This course focuses on proper methods of repairing plumbing fixtures and appliances. Students are trained in preparing for the repair job and costing the job.

143 PLUMBING CODE I (3)
Recommended Preparation: Plumbing 121, 122, and 123 with a grade of "C" or better.
Lecture: 1.5 hours; Lab: 4.5 hours
This course is a study of the plumbing code as it relates to building with emphasis on the effective use of the code.

144 SPECIAL PURPOSES INSTALLATION (3)
Recommended Preparation: Plumbing 121, 122, and 123 with a grade of "C" or better.
Lecture: 1.5 hours; Lab: 4.5 hours
Fabrication and erection of piping for the proper installation of special appliances and fixtures are studied in this course. Special methods used in the construction of these fixtures as well as special testing procedures are also reviewed.

145 PLUMBING INSTALLATION AND SERVICE (3)
Recommended Preparation: Plumbing 112 with a grade of "C" or better.
Lecture: 1.5 hours; Lab: 4.5 hours
This course is an introduction to plumbing system that involves both design and the installation of small segments of water, gas. Plumbing service work is assessed and practical application experience is provided.

246 PRINCIPLES AND PRACTICES OF PLUMBING DESIGN AND LAYOUT (4)
Lecture: 2.5 hours; Lab: 4.5 hours
Students are trained on skills such as measuring with an architect’s scale, construction drawings that include piping layout, fixture layout, disability requirements, orthographic drawings, and basic isometric drawings.

250 DESIGN AND CONSTRUCTION SPECIALTIES (4)
Lecture: 2.5 hours; Lab: 4.5 hours
Instruction is given in plumbing layout drawing, blueprint reading, principles and practices of water supply and distribution, special waste piping practices, use of elementary backflow prevention devices, plumbing installation techniques, introductory principles and practices of solar domestic water heating.
**POLITICAL SCIENCE**

1. **THE GOVERNMENT OF THE UNITED STATES (3) UC:CSU**  
   Lecture: 3 hours; Advisory: English 28  
   This course will examine the principles, structure, and problems of the American government. Topics covered include: The Constitution of the United States of America, the Constitution of the State of California, political philosophies, political institutions, amendments and interpretations, the rights and obligations of citizens, federal/state, state/local, and contemporary state/local/federal government relationships.

2. **MODERN WORLD GOVERNMENTS (3) UC:CSU**  
   Lecture: 3 hours; Advisory: English 28  
   This course studies a selected variety of major national states to secure a comparative picture of political philosophies, constitution, political processes and governmental institutions. Emphasis is placed on those factors as geographic, historic, demographic, and cultural, which contribute to difference in governmental experiences and behaviors.

7. **CONTEMPORARY WORLD AFFAIRS (3) UC:CSU**  
   Lecture: 3 hours; Advisory: English 28  
   This course examines the structure and operation of the international system. Emphasis is placed on the nature and sources of conflict and cooperation and issues of war and peace among states in the international system.

**PROCESS PLANT TECHNOLOGY**

100. **(PT) INTRODUCTION TO INDUSTRIAL PROCESSES (3)**  
   Lecture: 3 hours  
   The purpose of this course is to provide an overview or introduction into the field of Process Operations within the Chemical Process Industries, such as the oil refinery and wastewater industries. Students will be introduced to the roles and responsibilities of Process Technicians, the environment in which they work, and the equipment and systems in which they operate.

102. **PROCESS MEASUREMENT AND CONTROL FUNDAMENTALS (3)**  
   Lecture: 3 hours  
   The purpose of this course is to provide an introduction to the fundamentals of process variables and a variety of instruments used to sense, measure, transmit, and control process plant operations within chemical manufacturing, oil refineries and wastewater treatment industries.

103. **PROCESS PLANT EQUIPMENT (3)**  
   Lecture: 2 hours; Lab: 2 hours  
   The purpose of this course is to provide an overview into the use of Process Technology equipment within the chemical manufacturing and wastewater treatment industries. Students will be introduced to many process industry related equipment concepts including purpose, components, operation, and the Process Technician’s role for operating and troubleshooting the equipment.

104. **INTRODUCTION TO PROCESS PLANT SAFETY (3)**  
   Lecture 3 hours  
   This course provides an introduction to the fields of environment, health and safety in the process industry. Students will be introduced to various types of plant hazards, as well as safety and environmental systems and equipment, and the state and federal regulations under which plants are governed.

200. **PETROLEUM REFINING FUNDAMENTALS (3)**  
   Lecture: 3 hours  
   The purpose of this course is to provide an introduction to the unique combinations of equipment and systems used to separate materials in chemical manufacturing, oil refineries, wastewater treatment, pharmaceutical industries and others. The study will include process systems such as, reactions, water treatment, distillation, absorbing/striping, evaporation, extraction and fundamental organic chemistry principles involved in process systems.

202. **INTRODUCTION TO PROCESS PLANT TROUBLESHOOTING (3)**  
   Lecture: 3 hours  
   This course introduces students to the troubleshooting processes involved in the investigation, identification and eliminating of the type of faults which are common to process plant operations.

204. **PROCESS TECHNOLOGY INSTRUMENTATION - COMPUTER APPLICATIONS (2)**  
   Lecture: 2 hours  
   This advanced course introduces students to the computerized software used to manipulate process operations in chemical industries including petrochemical, wastewater, pharmaceutical and numerous other operations.

206. **PROCESS TECHNOLOGY – ADVANCED INSTRUMENTATION II (3)**  
   Lecture: 3 hours  
   This course provides students with exposure to advanced process operation variables and a variety of instruments used to sense, measure, transmit and control plant operations within the chemical manufacturing, oil refinery and wastewater treatment industries.

208. **PROCESS TECHNOLOGY – INSTRUMENTATION III (4)**  
   Lecture: 4 hours  
   In this advanced course, students will gain the skills to identify and operate a variety of controls used by process technicians and operators in process plant industries. Topics include digital controls, programmable logic control, distributed control systems, instrumentation power supply, emergency shutdown and instrumentation malfunction.

210. **APPLIED INSTRUMENTATION ANALYSIS I (4)**  
   Lecture: 2 hours; Lab: 2 hours  
   This class offers students hands-on experience with the analytical instruments used in typical laboratories, including gas chromatographs and chemical titrating instruments. Students will learn to apply various methods of sampling and analyzing to determine the composition of typical liquids, solids and gases used by the chemical industry.

214. **PROCESS TECHNOLOGY IV – QUALITY PERFORMANCE (3)**  
   Lecture: 3 hours  
   This course provides an introduction to the field of quality assurance in the process industry. Students will be introduced to process industry related quality concepts including operating consistency, continuous improvement, plant economics, team skills and statistical process control (SPC).
## PSYCHOLOGY

### GENERAL PSYCHOLOGY I (3) UC:CSU
Advisory: English 28  
Lecture: 3 hours  
This survey course covers learning, motivation, intelligence, personality, and methods of adjustment, as well as sensation, disorders, therapies, social psychology, health and stress.

### GENERAL PSYCHOLOGY II (3) UC:CSU
Prerequisite: Psychology I  
Lecture: 3 hours  
A study is made of the integrative relations of psychological processes to nervous, muscular, and glandular features of the response mechanism, including the structure and functions of the sense organs. Emphasis is given to recent experimental studies and research in the field of physiological psychology.

### ABNORMAL PSYCHOLOGY (3) CSU
Lecture: 3 hours  
This course is a review of the historical as well as the recent approaches to the study of behavior disorders. Topics include definitions of normality, theories or causation and symptoms of the various traditional classifications of abnormality, and current methods of behavior modification.

### PSYCHOLOGY OF WOMEN (3) UC:CSU
Advisory: English 28  
Lecture: 3 hours  
This course explores the biological and cultural determinants of women’s personality development. Explores cultural stereotypes, sex role development, female sexuality, and women’s health issues in terms of the implications for personal and social change.

### LIFE SPAN PSYCHOLOGY: FROM INFANCY TO OLD AGE (3) UC:CSU
Prerequisite: Psych 1; Advisory: English 28  
Lecture: 3 hours  
Human development from conception to old (life span) is studied with emphasis in the areas of physical, social, intellectual, and emotional aspects of development. The varied aspects of development will focus on growth and change affecting individuals during their many life stages.

### PSYCHOLOGY IN FILM (3) CSU
Prerequisite: Psych 1; Advisory: English 28  
Lecture: 3 hours  
This course will survey a variety of films that portray selected disorders including neuroses and psychoses, as well as intelligence, learning, memory, health, therapy and other topics as discussed in general psychology.

## PUBLIC RELATIONS

### PRINCIPLES OF PUBLIC RELATIONS (3)
Lecture: 3 hours  
This course offers the student an understanding of the broad aspects of relationships with the public as they apply to business, education, public agencies, and other organizations. It includes methods of either promoting favorable relations with various segments of the public or coping with situations involving adverse public opinion.

### PUBLIC RELATIONS TECHNIQUES (3) CSU
Lecture: 3 hours  
This course is a comprehensive study of various public relations techniques utilized in campaigns by businesses, educational institutions, public agencies, and other organizations. Case histories are used to stimulate student initiative in problem solving. The social impact of the various communications media and their role in public relations also are stressed.

### WRITING FOR PUBLIC RELATIONS (3)
Lecture: 3 hours  
The persuasive powers of the written and spoken word are explored and utilized in creating viable communicative messages such as news releases, feature stories, interviews, public service announcements, speeches and institutional advertising.

## REAL ESTATE

### REAL ESTATE PRINCIPLES (3) CSU
Lecture: 3 hours  
This course is a preparation for the examination given by the Department of Real Estate for real estate brokers, agents, and salespersons. It includes laws pertaining to estates in real estate and the real estate business, property, contracts, titles, trust deeds, mortgages, liens, encumbrances, assessments, taxes, zoning, community property, title insurance, and escrow procedures. Emphasis is placed on federal, state, and local antidiscrimination laws and their impact on one’s real estate career.

### REAL ESTATE PRACTICES (3) CSU
Lecture: 3 hours  
This course deals with the challenges of establishing and conducting a real estate business. Among the major topics considered are: establishing the office, securing listings and prospects, showing properties and closing sales, financing, property management, rentals and leases, appraising, and the California Real Estate Law. Steering, redlining, and other illegal discrimination actions are discussed. The responsibility of the real estate agent as an employee and as an independent contractor is explored.

### LEGAL ASPECTS OF REAL ESTATE I (3) CSU
Lecture: 3 hours  
This is an introductory course in real estate law. Emphasis is placed upon the study of contracts, agency, negotiable instruments, personal property, sales, forms of business torts, current ownership of land and goods, and real property. Attention is also given to logical reasoning and the application of rules of law to everyday affairs in business.
7 REAL ESTATE FINANCE I (3) CSU
Lecture: 3 hours
This course is designed to study the forms and sources of financing property, construction and permanent financing. Topics covered include the procedures for FHA, Cal. Vet., and VA financing as well as conventional loans; mortgage capital from savings and loan associations, commercial banks, insurance companies, and other sources; junior mortgages; appraising for mortgages; loan ratios; and leaseholds. The role of the secondary mortgage market is also presented.

9 REAL ESTATE APPRAISAL I (3) CSU
Lecture: 3 hours
The principles and methods for the estimation of value and price of land and improvements, factors affecting income and values of real estate, and trends in real property values are covered in this course. The role of the appraiser in determining the highest and best use for a particular site is presented. The importance of appraisal to the lender, insurer, seller, and potential buyer are discussed as are appraisal of partial real estate interests.

10 REAL ESTATE APPRAISAL II (3) CSU
Recommended Preparation: Real Estate 9 with a grade of “C” or better.
Lecture: 3 hours
Advanced appraisal includes a review of the appraisal process, critical analysis of appraising data, and preparation of appraisal reports. The methods of appraising single-family residential income, and commercial properties are studied, as is the determination of capitalization rates.

14 PROPERTY MANAGEMENT (3)
Lecture: 3 hours
The fiduciary duty owed to a client, the nature and types of property management; organization for management, leases and contracts, rent scheduling, managing of space and techniques of renting; tenant mix, selection and supervision; relations with owners and budgets; purchasing and accounts; accurate reports, ethics, and legal and professional relationships are covered in this course. PUDs, CC&Rs (covenants, conditions, and restrictions) and common area maintenance and management are reviewed.

REFRIGERATION AND AIR CONDITIONING MECHANICS

100 AIR CONDITIONING PROJECT MANAGEMENT (3)
Lecture: 3 hours
This course provides HVAC Industry Project Manager instruction. Topics covered will include blueprint reading, Microsoft spreadsheets, Microsoft Word documents, Microsoft Project, design build criteria, estimating, change orders, request for information, GANTT Charts, scheduling, schedule of values, purchase orders, submittals, transmittals, reading of air balance reports, warranty letters and close out packages.

111 FUNDAMENTALS OF REFRIGERATION (3)
Lecture: 3 hours
The physical and thermodynamic properties of refrigerants as applied to the compression cycle of refrigeration are studied in this course. Basic orientation to the refrigeration industry is given.

113 REFRIGERATION COMPONENT CONSTRUCTION (3)
Lab: 9 hours
Instruction is given on the construction of the basic components of the refrigeration system.

114 REFRIGERATION MAINTENANCE PROCEDURES (3)
Lab: 9 hours
This course focuses on preventive maintenance and housekeeping routines including record keeping and safety procedures.

123 PIPE AND TUBE JOINING PROCESSES (3)
Recommended Preparation: REF A/C 111, 113, 114, and ECONMT 119 or 173 with a grade of “C” or better.
Lab: 9 hours
This course assesses assembly of components into operating systems using techniques employed by the industry.

124 REFRIGERATION ELECTRICAL CIRCUITS AND CONTROLS (3)
Recommended Preparation: REF A/C 111, 113, 114, and ECONMT 119 or 173 with a grade of “C” or better.
Lab: 9 hours
Students are trained in practical electrical installation for operation as well as safety.

125 REFRIGERATION SYSTEM COMPONENTS (3)
Recommended Preparation: REF A/C 111, 113, 114, and ECONMT 119 or 173 with a grade of “C” or better.
Lab: 9 hours
Instruction is given in basic electricity and electrical components. Compression system components and their functions and inter-relationships are reviewed.

133 REFRIGERATION SERVICE PROCEDURES I (3)
Recommended Preparation: REF A/C 123, 124, 125, and ECONMT 174 with a grade of “C” or better.
Lab: 9 hours
Servicing procedures applied to commercial refrigeration systems including restaurants, supermarkets and industrial process cooling. Students are required to inspect and analyze coolers, freezers and ice makers.

134 REFRIGERATION MECHANICS (3)
Lab: 9 hours
Troubleshooting procedures in diagnosing and repairing malfunctions in domestic and commercial refrigeration systems with an emphasis on mechanical and electrical problems.

135 AIR CONDITIONING AND REFRIGERATION (3)
Recommended Preparation: REF A/C 123, 124, 125, and ECONMT 174 with a grade of “C” or better.
Lecture: 3 hours
Refrigeration principles including theory of heat, automatic controls, electric motors and commercial refrigeration.

141 APPLIED REFRIGERATION AND AIR CONDITIONING PRINCIPLES (3)
Recommended Preparation: REF A/C 123, 124, 125, and ECONMT 174 with a grade of “C” or better.
Lecture: 3 hours
This course focuses on Chemistry as applied to the HVAC and R industry. Areas covered include hydronics, heating and cooling load calculations, control wiring, introduction to the uniform mechanical code, pneumatic controls, troubleshooting approaches, and employment.
Course Descriptions

143 **REFRIGERATION SERVICING PROCEDURES II (3)**
Recommended Preparation: REF A/C 123, 124, 125, and ECONMT 174 with a grade of "C" or better.
Lab: 9 hours

This course is a preparatory course for the industry standard NATE A/C Specialist - Certification.

145 **AIR CONDITIONING AND REFRIGERATION MECHANICS (3)**
Recommended Preparation: REF A/C 123, 124, 125, and ECONMT 174 with a grade of "C" or better.
Lab: 9 hours

This course is a study on diagnosis and repair of refrigeration, air conditioning, and gas heating systems with emphasis on the correct application of electrical theory.

159 **PRINCIPLES AND PRACTICES OF ELECTRICAL CIRCUITS AND CONTROLS (4)**
Lecture: 2.5 hours; Lab: 4.5 hours

This course covers Basic electricity, magnetic starters, contactors and relays. Pressure and temperature controls, millivolt and low voltage systems, modulating controls, time clocks and defrost systems are studied.

160 **REFRIGERATION SYSTEM PRINCIPLES AND PRACTICES (4)**
Lecture: 2.5 hours; Lab: 4.5 hours

Students learn fundamental refrigeration system principles, system components and refrigerants, basic electricity, motors and controls, and test equipment in domestic and commercial refrigeration.

161 **AIR CONDITIONING SYSTEM PRINCIPLES AND PRACTICES (4)**
Lecture: 2.5 hours; Lab: 4.5 hours

This is a study of human comfort, psychometrics and heat loads. Air distribution and duct sizing, air conditioning equipment, test instruments and measurements and servicing are explored.

162 **PIPING PRINCIPLES AND PRACTICES (4)**
Lecture: 2.5 hours; Lab: 4.5 hours

This course covers piping principles and practices including refrigerant tubing and fittings, water piping and fittings, pipe sizing, soft soldering, silver brazing and schematic drawings.

164 **GAS HEATING SYSTEMS (4) CSU**
Lecture: 1.5 hours; Lab: 4.5 hours

This course will develop the necessary skills needed for proper installation, servicing and troubleshooting of natural gas furnaces. Topics include principles of gas combustion, gas ignition, controls, installation and ventilation.

165 **THERMAL ENERGY STORAGE AND HEAT RECOVERY (4)**
Lecture: 1.5 hours; Lab: 4.5 hours

Thermal energy storage and heat recovery principles of TES and basic definitions are the focus of study in this course. Load profile and electric cost are introduced and system design including space requirements and component selection based on load profiles and costs are covered.

166 **HEATING AND AIR CONDITIONING I (3)**
Lecture: 3 hours

Instruction is given in heating for workers in the heating and air conditioning field. Fundamentals of fuels, venting, heat transfer and calculation, equipment selection, distribution systems, and necessary controls are studied.

177 **HEATING AND AIR CONDITIONING II (3)**
Lecture: 3 hours

The cooling portion of the air conditioning field for employed mechanics is explored in this course. Types of system, refrigeration cycle, heat gain and calculation, air distribution equipment, selection of controls, and sales procedures are reviewed.

187 **SERVICING I (3)**
Lecture: 3 hours

This course reviews servicing procedures, manufacturers' recommendations, installation and service of commercial and industrial refrigeration and air conditioning systems.

188 **SERVICING II (3)**
Recommended Preparation: REF A/C 187 or equivalent with a grade of "C" or better.
Lecture: 3 hours

Topics covered in this course include electrical diagrams for testing control circuits, the total electrical system and protection devices on package units, analysis of failure and compressor motor burnout cleanup procedures.

199 **MECHANICAL CODE I - HVACR (3)**
Recommended Preparation: REF A/C 187 or equivalent with a grade of "C" or better.
Lecture: 3 hours

An introduction to the California Mechanical Code for the installation and maintenance of heating, ventilating, cooling, and refrigeration systems.

202 **REFRIGERATION FUNDAMENTALS (3) CSU**
Lecture: 3 hours

This course covers applied thermodynamics and laws of mechanics with laws of gases and change of state in substances and heat transfer.

203 **COMPRESSION SYSTEMS OF REFRIGERATION (3) CSU**
Lecture: 3 hours

Instruction is given in vapor cycle in refrigeration systems including the study of refrigerants and their behavior in the system.

204 **FUNCTIONS OF COMPRESSION SYSTEM COMPONENTS (3)**
Lecture: 3 hours

This course is a study of application of the Mollier Diagram to system analysis reciprocating and Centrifugal Chiller Theory and Operation. Areas covered include compressor failure, rotary, helical screw, and scroll compressors, capacity control, and use of the gauge manifold latest developments in the industry.

208 **REFRIGERANT MANAGEMENT – EPA 608 CERTIFICATION (4) CSU**
Lecture: 4 hours

This course is a preparatory course for the EPA Section 608 Technician Certification Type I, II, III, and the Universal Certification. Students are trained in refrigerant management including the EPA Section 608 ruling, the Montreal Protocol, Ozone Depletion and Global Warming. Note: Certification testing is will be available at the end of the semester for an additional fee.

209 **NORTH AMERICAN TECHNICIAN EXCELLENCE (NATE) - AIR CONDITIONING SPECIALIST - CERTIFICATION PREPARATION (4)**
Lecture: 4 hours

Preparatory course for the industry standard NATE A/C Specialist certification examination. Includes safety, thermodynamics, electrical system diagnostics, airflow measurements, mechanical code, installation, service, tools, and more!
210 REFRIGERATION SYSTEM EFFICIENCY FACTORS (4)
Lecture: 4 hours
This course will cover refrigerants, pressure enthalpy diagram, refrigeration piping, system evacuation and charging and maintenance. The beginning of the class will include a review of terminology and the refrigeration cycle.

250 INDOOR AIR QUALITY (3)
Lecture: 3 hours
This course emphasizes on operation of systems to provide quality air to indoor environments. AQMD requirements and pending regulations are reviewed. Organizing and implementing maintenance programs that include indoor air quality assessment and air balancing HVAC systems are covered.

SIGN GRAPHICS

101 INTRODUCTION TO LETTERING (10)
Lecture: 5 hours; Lab: 15 hours
Instruction covers identification of materials, tools, and brushes. Training is offered in drawing and brush lettering of Gothic, Roman, Script, and Casual letter styles. This course also includes training in techniques of layout, letter spacing arrangement, color mixing in reference to the sale and production of temporary signs. Students prepare showcards, paper signs, and other temporary display salable items.

Prerequisite: Successful completion of Sign Graphics 101 with a grade of “C” or better.

102 EXTERIOR DISPLAY SIGNS (10)
Prerequisite: Successful completion of Sign Graphics 102 with a grade of “C” or better.
Lecture: 5 hours; Lab: 15 hours
This course covers the tools and materials used to produce outdoor signs. In addition, students design, paint and letter signs inside and outside of the classroom. Students will work on a variety of materials including canvas, plywood, aluminum and plastic substrates. Also introduction to computer generated lettering and application techniques for vinyl letters. Instruction will emphasize sign layout and design. Students will produce a 4X8 plywood sign and an exterior wall sign.

103 WINDOW SIGNS (10)
Prerequisite: Successful completion of Sign Graphics 103 with a grade of “C” or better.
Lecture: 5 hours; Lab: 15 hours
Instruction covers the use of specialized tools and materials used to produce window signs. Training includes painting on exterior and reverse windows, stippling techniques and applications of vinyl letters on glass, both exterior and reverse. In addition students will paint a temporary splash window and apply 23K gold leaf (water gilding). Intermediate computer design including the use of plotters and application techniques.

104 ADVANCED COMPUTER AND DESIGN (10)
Prerequisite: Successful completion of Sign Graphics 103 with a grade of “C” or better.
Lecture: 5 hours; Lab: 15 hours
Students will learn advanced design techniques, backgrounds and color theory. Practical experience will be gained on advanced computer study, applications and a variety of computer sign software. In addition information will be given on small business practices including management and pricing. Students will produce a sandblasted sign, a custom contour-cut sign and an antique sign.

201 FUNDAMENTALS OF MURAL PAINTING (2)
Lecture: 6 hours
This course will teach basic mural painting techniques including; design, layout, and execution. Students will be introduced to the proper tools and paints for exterior, long term murals.

202 SILK SCREEN PROCESSING I (2)
Lab: 6 hours
This course will provide an introduction to the screen printing trade. Students will learn how to make silk screens and will learn about copy preparation, mesh selection, frames, stencil systems, printing techniques, ink & substrate compatibility, reclamation of screens. Students will print on a variety of surfaces.

203 SILK SCREEN I (2)
Prerequisites: Successful completion of Sign Graphics 203 with a grade of “C” or better.
Lab: 6 hours
Students will be introduced to the use of solvent based inks; including; color mixing, application, and clean-up. This course also offers practice on a variety of substrates and uses including four-color process printing.

204 SILK SCREEN II (2)
Prerequisites: Successful completion of Sign Graphics 203 with a grade of “C” or better.
Lab: 6 hours
Students will be introduced to water based inks; including; color mixing, application, and clean-up. Students will print on a variety of surfaces.

205 SILK SCREEN III (2)
Prerequisites: Successful completion of Sign Graphics 203 with a grade of “C” or better.
Lab: 6 hours
Students will be introduced to spray paint inks; including; color mixing, application, and clean-up. Students will print on a variety of surfaces.

206 SILK SCREEN IV (2)
Prerequisites: Successful completion of Sign Graphics 203 with a grade of “C” or better.
Lab: 6 hours
Students will be introduced to airbrushing techniques and maintenance.

211 AUTOMOTIVE GRAPHICS (2)
Lecture: 1 hour; Lab: 2 hours
This course will teach the fundamentals of computer software in producing vinyl graphics, patterns, and stencils for application of vehicle graphics. Students will design and cut various materials for the production of painted and vinyl graphics on vehicles. They will learn various application techniques and the use of paints including basic lettering and design for vehicle appropriate graphics.

SKIN THERAPY

35 SKIN THERAPY I (6)
Lecture: 3 hours; Lab: 9 hours
Students will be introduced to sanitation, disinfection, draping, cleansing, massaging, and plain facial techniques.

36 SKIN THERAPY II (6)
Prerequisite: Successful completion of Skin Therapy I with a grade of “C” or better.
Lecture: 3 hours; Lab: 9 hours
Students will be introduced to waxing techniques, makeup applications, electrotherapy treatments, hair removal procedures, facial machines and airbrushing techniques and maintenance.

37 SKIN THERAPY III (6)
Prerequisite: Successful completion of Skin Therapy II with a grade of “C” or better.
Lecture: 3 hours; Lab: 9 hours
Students will be introduced to hand, foot, body scrubs, body warps, aromatherapy and reflexology treatments.

38 SKIN THERAPY IV (6)
Prerequisite: Successful completion of Skin Therapy III with a grade of “C” or better.
Lecture: 3 hours; Lab: 9 hours
Students will be introduced to client consultations procedures, advanced facial treatments, facial machines and body units, advance makeup techniques and state board review.
SOCIOLOGY

1  INTRODUCTION TO SOCIOLOGY (3) UC:CSU
Advisory: English 28
Lecture: 3 hours
This course is a general survey of the field of sociology. Study is made of the origins, development and functioning of major social institutions, and of related social problems in a changing society.

2  AMERICAN SOCIAL PROBLEMS (3) UC:CSU
Advisory: English 28
Lecture: 3 hours
This course provides identification and analysis of contemporary social problems in the United States with an attempt to establish criteria by which an individual can judge the probable effectiveness of various schemes for social betterment.

28  THE FAMILY: THE SOCIOLOGICAL APPROACH (3)
UC:CSU
Lecture: 3 hours
This course provides a sociological analysis which contributes to an understanding of the origin, structure, and functions of marriage and family life. This course includes, but is not limited to, studies of sex roles, legal controls, religious attitudes, mixed marriages and financial and family planning.

SOLID WASTE MANAGEMENT TECHNOLOGY

101  INTRODUCTION TO SOLID WASTE MANAGEMENT (3)
Lecture: 3 hours
This course offers instruction in the fundamentals of solid waste management including characteristics of solid wastes, refuse storage, collection, transportation, and disposal methods, financing methods and solid waste planning.

102  COLLECTION SYSTEMS, ROUTING, AND MANAGEMENT (3)
Lecture: 3 hours
This course offers in-depth instruction in the techniques and fundamentals involved in efficient solid waste routing, including topographical variables such as: alleys, one-way streets, hilly areas, downtown areas and residential communities. The course studies routing for mechanized solid waste collection activities, routing to affect increased productivity, cost reduction, and improved public relations through proper route planning and safety.

107  WASTE REDUCTION AND RECYCLING (3)
Lecture: 3 hours
This course is an introduction to the science of resource recovery. It presents a broad overview of the methods and techniques, equipment and facilities required in recovery processes. Emphasis is placed on costs and management of the recovery process. Nuclear and non-nuclear types of resource recoveries are studied.

108  SOLID WASTE FACILITIES (3)
Lecture: 3 hours
This course covers history and legislation of solid waste generation and the need for effective transfer stations and landfills. It contains an overview of the handling of materials for both resource recovery and disposition of hazardous and non-hazardous waste. The future needs of the public and private sectors are studied.

SPANISH

NOTE: One year of high school foreign language study equals one semester of community college instruction.

1  ELEMENTARY SPANISH I (5) UC:CSU
Lecture: 5 hours
This course stresses the fundamentals of pronunciation and grammar, practical vocabulary, useful phrases, and the ability to understand, read, write and speak simple Spanish. It includes basic facts on geography, customs, and culture of Spain and Latin America.

2  ELEMENTARY SPANISH II (5) UC:CSU
Prerequisite: Spanish 1 with a grade of “C” or better.
Lecture: 5 hours
This second course comprises review and further study of the fundamentals of Spanish grammar with emphasis upon correct pronunciation and mastery of a practical vocabulary, including useful phrases and idioms. Practice is given in oral and written expression. A continued study of Spanish and Latin American civilization is made through selected readings, instructor comments and audio visual materials.

35 SPANISH FOR SPANISH SPEAKERS I (5) UC:CSU
Lecture: 5 hours
Spanish 35 is designed to address the needs of the bilingual student. An introduction to written Spanish with an emphasis on the acquisition of a solid grammatical base, vocabulary enrichment, and spelling. Addresses all four skills in Spanish, but focuses on reading and writing. Includes readings on the geography, customs and culture of Spain and Latin America.

36 SPANISH FOR SPANISH SPEAKERS II (5) UC:CSU
Prerequisite: Completion of Spanish 35 with grade of “C” or better.
Lecture: 5 hours
A continuation of Spanish 35. Completes the study of grammar and continues the development of reading and writing skills. Further study of Spanish and Latin American culture and civilization.

SPEECH COMMUNICATIONS

101  ORAL COMMUNICATIONS I (3) UC:CSU
Lecture: 3 hours
This course is designed to develop student’s speaking skills. Activities include selecting speech subjects; defining purposes and analyzing audience needs; gathering materials; organizing, outlining and presenting, and constructive listening. Students will gain experience in job interviewing, informative and persuasive speaking, as well as speeches for special occasions. The use of logic, evidence, and emotional appeals is studied and applied.
STREET MAINTENANCE TECHNOLOGY

103 APPLIED CALCULATION IN PUBLIC WORKS (3)
Lecture, 3 hours
This course is a practical mathematics exploration with an emphasis on application problems encountered in street maintenance, street services, and other areas of public works.

200 SURVEY OF STREET SERVICES (3)
Lecture, 3 hours
This is a survey course for the street services career path, providing an overview of the area and the day-to-day requirements of the job. Opportunities and career development will be discussed.

201 STREET MAINTENANCE I: INTRO TO STREET MAINTENANCE (3)
Lecture, 3 hours
This is a basic course on history and current practices in street maintenance techniques and programs. Study includes general theory covering concrete and cleaning.

202 STREET MAINTENANCE II (3)
Lecture, 3 hours
This course is an in-depth study of asphalt, preventative maintenance of asphaltic and concrete pavements, and applicable codes for improvement and repair.

203 STREET MAINTENANCE III (3)
Lecture, 3 hours
This course covers engineering plan reading, and the math concepts necessary for the calculation of amounts of material required for public works maintenance operations. Emphasis is given on solving practical math problems in estimating concrete, asphalt, and other material necessary for the completion of street, sidewalk and other types of maintenance work.

204 STREET MAINTENANCE IV: REPORT WRITING FOR PUBLIC WORKS (3)
Lecture, 3 hours
Students are trained on report writing in the public works arena. English mechanics as well as the analysis and preparation of reports for public works is emphasized.

205 STREET MAINTENANCE V: ISSUE AND PRACTICES IN PUBLIC WORKS (3)
Lecture, 3 hours
This course covers street use, street lighting, street tree, lot cleaning, sanitation, engineering and personnel management. Also covered are State and municipal codes, property descriptions and public relations.

206 STREET MAINTENANCE VI: HEAVY DUTY EQUIPMENT OPERATIONS AND MAINTENANCE (3)
Lecture, 3 hours
This course is an overview and hands on experiences with heavy equipment used in street maintenance. Safety and preventative maintenance are included.

207 STREET MAINTENANCE VII: HAZARDOUS MATERIALS EMERGENCY MANAGEMENT FOR FIRST RESPONSE (3)
Lecture, 3 hours
This course covers the prescribed responses in the first hour of a hazardous materials incident and satisfies OSHA “Standards in Hazardous Waste Operations Code 29 CFR 1910.120”. The course includes specific training requirements of hazardous waste workers and emergency responders.

208 STREET MAINTENANCE VIII: SUPERVISION IN PUBLIC WORKS (3)
Lecture, 3 hours
The basic concepts of management and supervision in the area of public works are introduced. Topics include motivating employees, effective communication, problem solving, leadership skills and current practices.

209 DRIVERS LICENSE PREPARATION CLASS “B” (2)
Lecture, 1.5 hours, Laboratory, 1.5 hours
This class prepares the student to successfully obtain a California Class B Drivers License. Information is provided to prepare the student for the written portion of the exam and laboratory/field driving is provided to prepare the student for the driving portion of the exam.

210 MOTOR SWEEPER OPERATOR (3)
Lecture, 1.5 hours, Laboratory, 4.5 hours
Motor Sweeper Operator School is to serve as the focal point for the development and training of Street Services personnel to enhance the capability and effectiveness of street cleaning operations. This course spans the entire spectrum of safety, maintenance, and operations.

SUPERVISION

1 ELEMENTS OF SUPERVISION (3) CSU
Lecture: 3 hours
This is a basic introductory course covering in general terms the total responsibilities of a supervisor in industry, such as organization, duties, human relations, grievances training, rating, promotion, quality-quantity control, management-employee relations, and related topics.

2 BASIC PSYCHOLOGY FOR SUPERVISORS (3) CSU
Lecture: 3 hours
Instruction will focus on “how to succeed” orientation in handling problems and situations frequently encountered at work. The emphasis is on psychological aspects, perceptions, learning processes, emotions, attitudes and personalities. This approach is useful in development of the practical insights and specific skills — yet is academically respectable.

3 HUMAN RELATIONS (DEVELOPING SUPERVISORY LEADERSHIP) (3)
Lecture: 3 hours
Instruction will focus on those human relation skills the supervisory student needs to be well rounded and thoroughly prepared for a work environment characterized by economic volatility, constant change, and a new level of competitiveness. This interpersonal skills approach places greater emphasis on the application of knowledge through practice, followed by feedback and reinforcement.

6 LABOR-MANAGEMENT RELATIONS (3)
Lecture: 3 hours
Instruction covers the history and development of the labor movement, the Wagner Act, the Taft-Hartley Act, the Landrum-Griffin Act, and other federal labor laws including civil rights legislation, state and local labor laws relating to the public sector, and related topics in the field of labor management relations.
## Course Descriptions

### 11 ORAL COMMUNICATIONS FOR SUPERVISORS (3)

**Lecture:** 3 hours

A practical understanding of the communication process, listening, and group dynamics is gained through the use of structured experiences and role playing. Students also learn to develop and deliver effective oral presentations through the application of speech principles and presentation media.

### 12 WRITTEN COMMUNICATIONS FOR SUPERVISORS (3)

**Lecture:** 3 hours

This fundamental course is written communications for supervisors. A study of the basic forms of supervisory writing that includes memos, e-mails, research proposals, policies and procedure manuals. Additional topics may include: writing and analyzing resumes, developing employee career plans, and preparing worker performance appraisals.

### 14 DEVELOPING EMPLOYEES THROUGH TRAINING (3)

**Lecture:** 3 hours

The supervisor is given insight into responsibility for developing employees through training. Included are such topics as orientation; on-the-job techniques; job instruction principles; supervisory training; management development; training needs; and evaluating training.

</table>

This course offers training in construction operations which require the highest degree of skill and knowledge of the tailoring craft such as putting on shoulders and collars; setting in sleeves; shaping fronts, lapels and collars; fitting and remodeling. Students make complete garments.
233  MEN'S CUSTOM PATTERN DRAFTING AND DESIGN I (2)
Lab: 6 hours
Instruction is given in the proper use of the tailor’s square and curved ruler. Training is given in basic pattern drafting of slacks and vests, manipulating of patterns, and taking of measurements.

234  MEN'S CUSTOM PATTERN DRAFTING AND DESIGN II (2)
Lab: 6 hours
This course continues training in the pattern drafting of single or double breasted suits, coats, semi-drape and full drape model top coats, tuxedos, overcoats, raglan coats, manipulating of patterns, and taking of measurements.

250  TAILORING TECHNIQUES I (2)
Recommended Preparation: Fashion Design 111 or 222.
Lecture: 6 hours
Training is offered in basic tailoring techniques. Students will be instructed in welt pockets, hand tailored stitching, and finishing techniques. This course will consist of basic tailored vests and trousers.

251  TAILORING TECHNIQUES II (2)
Prerequisite: Tailoring 250 or 226
Lecture: 6 hours
Students will receive training in basic tailored jackets. Instruction will include yokes, vents, pockets, and tailored techniques as applied to jacket styles.

252  TAILORING TECHNIQUES III (2)
Prerequisite: Tailoring 251 or 227
Lecture: 6 hours
Students receive training in men’s or women’s suits. Instruction on advanced techniques as applied to suits including 2 piece sleeves with vents, back vents, and hand stitched buttonholes.

253  TAILORING TECHNIQUES IV (2)
Prerequisite: Tailoring 252 or 228
Lecture: 6 hours
Students receive training in tailored coats, men’s style shirts and blouses. Instruction will include styled seams, cold weather techniques.

255  MEN'S PATTERN DRAFTING I (2)
Recommended Preparation: Fashion Design 111 or 222
Lecture: 6 hours
In this course students will learn the fundamentals of taking and using men’s measurements for pattern making. Students will draft patterns for basic trousers, men’s sport shirts, and a basic man’s vest. Each pattern will be tested for fit.

256  MEN'S PATTERN DRAFTING II (2)
Prerequisite: Tailoring 233 or 255
Lecture: 6 hours
This course in men’s pattern making will introduce students advanced styling including, jackets, and styled pants. Students will make complete patterns for each element of a three piece suit.

270  BEGINNING ACTING (3) UC:CSU
Lecture: 3 hours
This course introduces students to performing in front of a live audience. Exercises for the body and voice are demonstrated and sensory identification is used to explore and reenact situations. Students will perform readings from a variety of published plays and practice the technical skill of “cold” reading without rehearsal. They will practice psychological interpretation of characters with the help of character analysis, memorize scenes and monologues, and learn to improvise on stage.

100  INTRODUCTION TO THE THEATER (3) UC:CSU
Lecture: 3 hours
This course surveys the history of theater from the ancient Greek to modern times. Stage vocabulary, production crafts and acting techniques are introduced. Students will analyze how theater relates to motion pictures, television, and radio in contemporary American life, as well as compare themes in literature, compare and contrast adaptations of famous plays to their original written form and apply critical analysis to live dramatic productions.

103  BASIC COMPUTER SYSTEMS (2) CSU
Lecture: 0.5 hour; Lab: 4.25 hours
Introduction to using the Macintosh computer for graphic design. Students will learn basic computer functionality, with an emphasis on an understanding of the operations systems, configuration for use with graphic applications, file management and working in a network environment.

105  DIGITAL PREPRESS I (2) CSU
Lecture: 0.5 hour; Lab: 4.25 hours
Beginning level course in the preparation of art for the reproduction process, and its application to the industries of Advertising and Graphic Design. Students will study the history of graphic design, typesetting, paste-up to digital prepress (in black and white and two color reproduction) as an emphasized focus within the course.

106  DRAWING I (2) CSU
Lecture: 0.5 hour; Lab: 4.25 hours
Introduction to concepts of basic observational drawing, perspective and the principles of light and shade. Black and white and color mediums will be utilized.

**Course Descriptions**

108 **2D DESIGN FUNDAMENTALS (2) CSU**  
Lecture: 2 hours  
A course in the principles and elements of 2D design. Principles of unity, variety, emphasis, balance and proportion guide every mark a designer creates. Elements of line, shape, form, value, color, and texture provide for a control that all visual artists seek as they manipulate their work.

112 **DIGITAL PREPRESS II (2) CSU**  
Recommended Preparation: VIS COM 105 with a grade of “C” or better.  
Lecture: 0.5 hour; Lab: 4.25 hours  
Intermediate level course where students design and produce projects that utilize the Macintosh computer. Line art projects in single color and two colors are created in Adobe Illustrator. Technical processes for reproduction will be covered with instruction in the use of QuarkXPress.

114 **DIGITAL TYPESETTING (2) CSU**  
Lecture: 0.5 hour; Lab: 4.25 hours  
Introduction of the principles of computer typesetting as a career. The course will cover the standards and guidelines used to set type for ads, brochures, and stationery. Proofreading and setting copy in multiple computer programs will be stressed.

115 **GRAPHIC DESIGN II (2) CSU**  
Recommended Preparation: VIS COM 100 with a grade of “C” or better.  
Lecture: 0.5 hour; Lab: 4.25 hours  
Intermediate level course that will stress Graphic Design as a profession. Problems will emphasize the development of creativity, typography as communication, art production and the computer, and methods for developing brochures, ads and web pages.

116 **ADVERTISING CONCEPTS (2) CSU**  
Lecture: 0.5 hour; Lab: 4.25 hours  
Introduction to the development of advertising concepts for magazines, television, and the internet. Use research, brainstorming and standard advertising methodology to plan, design and produce an advertising campaign.

117 **SCALE DRAWING TECHNIQUES (2)**  
Lecture: 2 hours  
This course covers the basic elements of measurement; the inch, foot, and yard. The major aspects of converting the foot to the inch with a proportionate scale will be covered, working from existing installations and fixtures toward completed scale drawings of elevations and floor plans. In addition, the students will learn to place objects in perspective, using a perspective grid of mechanical projection.

118 **ADOBE ILLUSTRATOR (2) CSU**  
Recommended Preparation: VIS COM 103 with a grade of “C” or better.  
Lecture: 1 hour; Lab: 3 hours  
Basic training in computer illustration using the Adobe software application “Illustrator”. Toolbox familiarity and manipulation, menu items and general skill application will constitute this beginning level course.

119 **DIGITAL PAGE LAYOUT (2) CSU**  
Recommended Preparation: VIS COM 103 with a grade of “C” or better.  
Lecture: 2 hours  
An introduction to the graphics software application QuarkXPress. This course will teach students how to use QuarkXPress as a design tool to enhance other applications such as Adobe Illustrator and Adobe Photoshop. From the basic of the tool palettes to more advanced concerns like setting trape for final output, Digital Page Layout will examine all.
132 PORTFOLIO DEVELOPMENT II (2) CSU
Recommended Preparation: VIS COM 120, 124, and 126 with a grade of "C" or better.
Lecture: 0.5 hour; Lab: 4.25 hours
An advanced course in the production of a finished portfolio. Preparation of 10 completed works with preliminary developmental books culminates in a simulated job interview with Advisory Board members.

133 DIGITAL PORTFOLIO PREPARATION (2) CSU
Recommended Preparation: VIS COM 127 with a grade of "C" or better.
Lecture: 0.5 hour; Lab: 4.25 hours
Preparation of the digital portfolio required for employment as a Graphic Designer or as an Art Director. Theories of resume preparation, job interview techniques and the development of the students' personal stationary will be stressed. The digital portfolio will show advanced Adobe Illustrator, Photoshop and QuarkXPress files needed for review by prospective employers.

134 GRAPHIC DESIGN BUSINESS PRACTICES (2) CSU
Lecture: 2 hours
Introduction to the financial aspects of running a Graphic Design business. Lecture and projects will include billing procedures, business overhead costs, taxes and retirement planning. Taxes, small business legal issues and understanding business ethics are stressed.

135 WEB PAGE GRAPHICS ON THE MACINTOSH (2) CSU
Recommended Preparation: VIS COM 116 and 129 with a grade of "C" or better.
Lecture: 1 hour; Lab: 3 hours
An introductory course in the use of the MacIntosh computer to construct web page graphics for the internet. Macromedia Dreamweaver is utilized and particular emphasis is placed on the construction process, design, art and photographic images, typography, RGB Color, HTML and DHTML.

204 FLASH MOTION GRAPHICS (BEGINNING LEVEL) (2) CSU
Recommended Preparation: VIS COM 135 with a grade of "C" or better.
Lecture: 1 hour; Lab: 3 hours
This course concentrates on the software application Macromedia Flash MX. It teaches beginning Flash users principles and techniques for designing web sites with motion graphics: how to layout pages, use color and text effectively, work with multiple image types, build navigation, and incorporate sound and video.

203 VISUAL COMMUNICATIONS - DIGITAL TYPE MANIPULATION (2)
Lecture, 1 hour; Lab: 3 hours
This course concentrates on the software application Adobe Photoshop, and its specific application to typography, logos and trademarks. Instruction includes techniques for creating unique surfaces, textures and patterns, and applying these techniques to original logos, film titles, packaging and graphics.

210 OPEN LAB (2)
Corequisite: Enrollment in any Visual Communications course or Sign Graphics course.
Lab: 6 hours
This course is an open lab which allows Macintosh users to work in a non teaching environment. Available software programs include Adobe InDesign, Illustrator, Photoshop, Dreamweaver and Flash. Also available on some computers is Microsoft Word. Scanners and printers are accessible but require a per page fee for black and white or color printing.

229 PHOTOSHOP II (2) CSU
Recommended Preparation: VIS COM 129 with a grade of "C" or better.
Lecture: 1 hour; Lab: 3 hours
This course continues to explore and apply the tools and techniques of the software application Adobe Photoshop as introduced in Photoshop I. Instruction includes creative uses of filters, channels, masking, history, and layer effects as these techniques apply to illustration, as well as advanced methods of color correction, retouching, and the preparation of files for both print and digital media.

WASTEWATER TECHNOLOGY

The courses listed below in wastewater technology have been approved by the California State Water Resource Control Board and are eligible for eight (8) educational points, for each 3 unit course completed toward the Wastewater Treatment Plant Operators Certification educational requirements.

12 WASTEWATER OPERATIONS I (3)
Lecture: 3 hours
This course is a survey and introductory course into wastewater systems for operations and maintenance personnel, administrative, engineering and laboratory personnel may benefit from this course.

13 WASTEWATER OPERATIONS II (3)
Recommended Preparation: Successful completion of Waste Water Technology 12 with a grade of "C" or better.
Lecture: 3 hours
A comprehensive study is made of preliminary, primary, and secondary treatment systems and operations including selected field studies.

14 WASTEWATER OPERATIONS III (3)
Lecture: 3 hours
This is a comprehensive study of disinfection methods, tertiary treatment, water reclamation, solids treatment, solids and effluent disposal practices.

15 WASTEWATER OPERATIONS IV (BASIC LABORATORY ANALYSIS) (4)
Lecture: 3 hours; Lab: 3 hours
This is an introduction into the fundamentals of chemistry and laboratory techniques used to monitor wastewater treatment operations.

16 WASTEWATER OPERATIONS V (MECHANICS, FLUIDS, ELECTRICITY) (3)
Lecture: 3 hours
The practical application of engineering fundamentals, such as hydraulics mechanics, electricity and instruments as practiced in wastewater treatment.

17 WASTEWATER OPERATIONS VI (PUBLIC HEALTH, ENVIRONMENTAL, MANAGEMENT) (3)
Lecture: 3 hours
Public health, the environment, regulations, management/ supervision and report writing as practiced in wastewater and water reclamation plants safety are covered.
WELDING GAS AND ELECTRIC

2 MANUAL FLAME CUTTING AND PLASMA ARC CUTTING (2)
Lecture: 1 hour; Lab: 2 hours
This is an introductory course to oxyacetylene flame cutting, plasma arc cutting and related cutting process.

100 METAL SCULPTURE I (3) CSU RPT2
Lecture: 1.5 hour; Lab: 4.5 hours
This course studies basic welding skills and metal working techniques used in the exploration of metal sculpture. Topics covered include hot and cold working of steel, shielded metal arc welding, oxy-fuel and plasma arc cutting, weld design and finishing techniques. Technical skills are emphasized through hands on instruction and practice with the opportunity for creative expression and practical application.

111 ACETYLENE WELDING, CUTTING AND BRAZING (6)
Lecture: 1.5 hour; Lab: 13.5 hours
This course focuses on basic applications in oxy-acetylene welding, brazing and cutting in all positions. Topics included are safety procedures and metal welding characteristics.

112 WELDING RELATED TECHNICAL INSTRUCTION I (3)
Lecture: 3 hours
This course emphasizes on principles of oxy-acetylene welding, brazing, and cutting. Safety, material selection, equipment assembly, fuels, torch adjustments, and movements are some of the topics covered in this course.

113 APPLIED MATHEMATICS I (3)
Lecture: 3 hours
This course covers elementary arithmetic problems related to welding technology and solutions in whole numbers, fractions, and decimals.

121 ELECTRIC WELDING I (6)
Recommended Preparation: Welding 111, 112, and 113 with a grade of "C" or better.
Lecture: 1.5 hours; Lab: 13.5 hours
This course focuses on basic manipulative exercises in electric welding using low alloy and mild steel materials in all positions, safety precautions and fire prevention.

124 BLUEPRINT READING I (3)
Recommended Preparation: Welding 111, 112, and 113 with a grade of "C" or better.
Lecture: 3 hours
This course studies the principles of reading and interpreting basic industrial blueprints as applied to the welding trade.

125 APPLIED MATHEMATICS II (3)
Recommended Preparation: Welding 111, 112, and 113 with a grade of "C" or better.
Lecture: 3 hours
This course covers related mathematical problems in welding, project design, and construction using the fundamental principles of algebra.

131 ELECTRIC WELDING II (6)
Recommended Preparation: Welding 121, 124, and 125 with a grade of "C" or better.
Lecture: 1.5 hours; Lab: 13.5 hours
This course studies horizontal, vertical, and overhead groove welding on different thickness of high and low alloy steel plates using different types of coated electrodes. Training for practical welding examinations is given by various civil service organizations in A.S.M.E., API and pipeline welding.

132 BLUEPRINT READING II (3)
Recommended Preparation: Welding 121, 124, and 125 with a grade of "C" or better.
Lecture: 3 hours
This course emphasizes on the principles of lines, views, size, descriptions, print formats, fasteners, and different types of fabrication drawings, and industrial welding prints.

133 WELDING RELATED TECHNICAL INSTRUCTION III (3)
Recommended Preparation: Welding 121, 124 and 125 with a grade of "C" or better.
Lecture: 3 hours
This course is designed to prepare the student for present day welding conditions. Emphasis is placed on materials, design, assembly procedures, electrode selection, equipment, weld joints and welding terminology. In addition, welding metallurgy is also covered.

141 ELECTRIC WELDING III (6)
Recommended Preparation: Welding 121, 124 and 125 with a grade of "C" or better.
Lecture: 1.5 hours; Lab: 13.5 hours (15 total)
This course explores applications in sheet metal welding, cast iron welding, inert gas welding (MIG and TIG) and semi-automatic gas shielded welding.

142 INERT GAS WELDING (TIG AND MIG) (3)
Recommended Preparation: Welding 121, 124, and 125 with a grade of "C" or better.
Lecture: 3 hours
Through this course, principles in welding aluminum, stainless steel, carbon steel, and the maintenance, and operation of welding equipment are explored.

143 WELDING RELATED TECHNICAL INSTRUCTION IV (3)
Recommended Preparation: Welding 121, 124 and 125 with a grade of "C" or better.
Lecture: 3 hours
This course reviews principles and theory of operating semi-automatic gas shielded welding equipment and the metallurgy of metals.

150 PREPARATION FOR ASW D1.1 CERTIFICATION (6)
Lecture: 3 hours; Laboratory: 9 hours
This class provides both theoretical and practical laboratory exercises to improve one’s welding techniques in preparation for the ASW D1.1 Certification exam.

151 SHIELDED METAL, FLUX CORE & GAS TUNGSTEN ARC WELDING LABORATORY (2)
Laboratory: 6 hours
Practical laboratory exercises to improve one’s welding techniques in SMAW, FCAW & GTA and to prepare for certification testing.
152 AWS D1.1 CERTIFICATION TEST PREPARATION (2)

Lecture: 3 hours
This course covers the welding terminology, theories and welding code references needed to pass the AWS D1.1 and the Los Angeles City Department of Building & Safety Certified Field Welder-Structural Steel written examinations. Both the mid-term and final examinations will be administered under the condition of the actual Los Angeles City written exam.

153 AWS D1.3 CERTIFICATION TEST PREPARATION (2)

Lecture: 3 hours
This course covers the welding terminology, theories and welding code references needed to pass the AWS D1.3 and the Los Angeles City Department of Building & Safety Certified Field Welder-Sheet Steel written examinations. Both the mid-term and final examinations will be administered under the condition of the actual Los Angeles City written exam.

200 METAL SCULPTURE II (3) CSU RPT2

Lecture: 1.5 hour; Lab: 4.5 hours
This course expands the beginning welding skills and metal working techniques into an exploration of metal sculpture. Topics covered include hot and cold working of steel, shielded metal arc welding, oxy-fuel and plasma arc cutting, weld design and finishing techniques. Technical skills are emphasized through hands-on instruction and practice with the opportunity for creative expression and practical application.

201 WELDING - GAS AND ELECTRIC I (2)

Lab: 6 hours
This course covers applications in oxy-acetylene welding, brazing, and cutting processes, in all positions. Topics include practical methods of identifying, welding characteristics, safety and metal stress.

202 WELDING - GAS AND ELECTRIC II (2)

Lab: 6 hours
This course reviews applications in basic manipulation of electrical welding (arc) on low and mild steel materials in all positions. Topics covered include safety and fire prevention are stressed.

203 WELDING AND RELATED TECHNICAL INFORMATION (2)

Laboratory: 6 hours
Instruction is given in safety procedures, history of welding, identification of metals, and flame heat treatment. Principles of the use of welding equipment, processes of oxy-acetylene, electrical, gas methods and cutting of metals.

204 INTRODUCTION TO ARC WELDING (2)

Lecture: 0.5 hour; Lab: 1.5 hours
This course is an introductory class for the beginning student seeking to learn welding skills.

210 METAL SCULPTING LAB (2) CSU RPT2

Lab: 6 hours
This course expands on beginning welding skills and metal working techniques into an exploration of metal sculpture.

251 TUNGSTEN INERT GAS WELDING A (1)

Lab: 3 hours
In this course instruction is given in applications of aluminum, stainless and carbon steel welding using TIG and MIG methods.

252 METALLIC INERT GAS WELDING (2)

Lecture: 1 hour; Lab: 2 hours
This course studies topics in aluminum, stainless carbon steel welding using inert gas systems.

Assistant Professor, Counseling
Counselor, EOPS
Coordinator - EOPS Volunteer Program
B.A., CSU, Dominguez Hills
M.A., Loyola Marymount University

Ahmad, Jamil (2000)
Associate Professor, Business & Economics
B.A., Panjab University, Lahore
M.A., Dhaka University, Dhaka, Bangladesh
M.B.A., University of Texas Pan-American, Edinburg, Texas

Ahn, Inhae (2007)
Assistant Professor, Counseling
B.S., SUNY at Buffalo
M.S., CSU, Northridge
MBA, University of Nevada, Las Vegas
Licensed MFT

Alcala, Carlos (2010)
Instructor, Fashion Design
A.A., Los Angeles Trade-Technical College

Almada, Christina (2006)
Assistant Professor, Counseling
M.S.W., UCLA
B.A., CSU Los Angeles

Anderson-Houlihan, Carole (1994)
Department Chair, Fashion, Art Trades, Co-op
Instructor, Fashion Design
A.A., Los Angeles Trade-Technical College
B.V.E., CSU Los Angeles

Anketell, Christina (2006)
Department Chair, Learning Skills/ESL
Assistant Professor, Learning Skills
B.A., University of Sri Lanka
M.A., CSU Los Angeles
M.Ed., Point Loma Nazarene University

Armstrong, Maria (2006)
Assistant Professor, Learning Skills
B.A., M.S., CSU Long Beach

Ashby, Cynthia (2007)
Assistant Professor, Nursing
B.S.N., St. Mary's College
M.S.N., University of Phoenix

Avila, Luis (2009)
Assistant Professor, Math
B.S (physics), M.S. (Mathematics), CSU Los Angeles

Babb, Dr. Jing (2004)
Associate Professor, Child Development
B.A., Chinese Cultural University, Taiwan
M.Ed., University of Arizona, Arizona
Ph.D., Claremont Graduate University, California

Badalyan, Anna (2010)
Dean, Institutional Effectiveness
Institutional Research and Planning
MBA, American University of Armenia
MS, Computer Science, Yerevan State University

Bailey, Paulette (2000)
Department Chair, Business/CAOT/CIS
Instructor, CAOT-Business
B.S., Grambling State University
M.S., CSU, Dominguez Hills
MOUS Certified

Bakman, Dr. Anna A Dr (1999)
Professor, Mathematics
M.S., Moscow University of Railing Transport
Ph.D., Moscow University of Railing Transport

Barnett, Craig J. (1987)
Professor, Refrigeration & Air Conditioning
Mechanics
B.A., CSU, Northridge
M.S. University of Maryland
California State Contractors Licenses: C20 & C38

Barajas, Leticia (2005)
Dean, Academic Affairs
B.A., UC Irvine
M.P.A., CSU Dominguez Hills

Bessler, Maida C (1995)
Professor, Business Administration
B.S., Fairleigh Dickinson University
M.B.A., CSU, Long Beach
Microsoft Certified Trainer

Blanchard, LeRoy (1992)
Instructor, Culinary Arts
AOS, Culinary Institute of America (CIA)
CEC Certification – ACF

Brand-Njoku, Mary (1987)
Instructor, Fashion Design

Brent, Lourdes M. (1996)
Academic Senate President
Professor, Counseling
Counselor, EOPS
Coordinator/Volunteer Program
B.A., Immaculate Heart College
M.S., Mount St. Mary's College

Brown, Stephen (2010)
Instructor, Nursing
ADN, Santa Ana College
BSN, MSN, UC Fullerton

Professor, Health & Physical Education
(Kinesiology)
A.S., Los Angeles Trade-Technical College
B.S., M.A., CSU, Long Beach

Associate Professor, Health & Physical Education
(Kinesiology)
B.A., Duke University
M.A., University of Florida

Burke, Dennis C.
Professor, Electrical Construction & Maintenance
A.S., Los Angeles Trade-Technical College
Electrical Contractors License C-10

Burnett, Maurice L. (2006)
Department Chair, Counseling
Counselor, Counseling
Associate Professor, Counseling
AA., El Camino College
B.A., CSU Dominguez Hills
M.S.W., Howard University

Buscaglia, Renatta (2003)
Instructor, Spanish
A.A., Rio Honda College
B.A., M.A., CSU Los Angeles

Campbell, Deborah N. (2007)
Counselor, Counseling
Assistant Professor, Counseling
B.A., Whitter College
M.A., San Diego State University

Associate Professor, Electronics
B.S.E.E., Heald Engineering College
M.S.S.M., Ed.D USC

Cardoza, Dr. Raul (2001)
Dean, Student Services
B.A., M.S., CSU, Los Angeles
Ed.D., UCLA

Carrillo, Pauline E. (1989)
Director, Child Development Center
B.A., M.A., CSU Los Angeles

Castillo, Ramon (2005)
Vice President, Student Services
A.A., East Los Angeles College
B.A., M.A., CSU Los Angeles

Chancy, Che’ (2005)
Associate Professor, Welding, Construction Technology
B.S., M.A., CSU, Long Beach
A.S. Welding-, Los Angeles Trade-Technical College.

Chandler, Christine C. (2007)
Assistant Professor, Nursing
B.S.N., CSULA
M.S.N., CSULB

Chapelaine, Dr. Roland “Chip” (2006)
President
B.A. Providence College
M.S., Ed.D., Ball State University

Chavez, Eric (1984)
Department Chair, Electronics Technology
Instructor, Electronics
A.S., East Los Angeles College
B.S., M.A., CSU Los Angeles
Chavira, Jacqueline (2002)
Child Development Center Teacher
A.A. East Los Angeles College

Chen, Lina (1988)
Professor, Cosmetology
B.A., University of Taiwan
Certificate, Pomona Valley Vocational College

Chung, Dr. Rhea (2009)
Executive Director, LATTC Foundation
B.F.A., USC
M.S., Ed.D., USC

Cioffi, Gabriel (1996)
Associate Professor, Refrigeration & Air Conditioning
A.S., Los Angeles Valley College
B.S., CSU, Los Angeles
M.P.A., CSU, Northridge
Contractor’s License, C20 & C38

Cole, Linda Eva (1994)
Counselor, GAIN/CalWORKs Program
Associate Professor, Counseling
B.A., Douglass College, Rutgers University
M.A., P.D., New Jersey City University

Cores, Madelene B. (1995)
Instructor, Fashion Design
B.A., UCLA

Cyrus, Shawn (1998)
Associate Professor, Electronics
B.S., CSU Northridge
M.S., West Coast University

Dalrymple, Roxann (2006)
Associate Professor, English
B.A. U.C.L.A.
M.A. Howard University

Damaso, Stacy (2008)
Instructor, Culinary Arts
A.A., Diablo Valley College
B.S., Cal Poly Pomona
CEPC Certification ACF

Davis-Kendrick, Maggie (2007)
Instructor, Nursing
B.S.N., CSUDH
M.N., Regis University

Dawkins, Thomas (1988)
Counselor, Counseling
Associate Professor, Counseling
B.A., Ripon College, Wisconsin
M.S., CSU, Los Angeles

Delzeit, Linda D (1995)
Instructor, Health & Physical Education (Kinesiology)
B.A., M.A., CSU, Long Beach

Dentone, Dr. Timothy (2000)
Instructor, Biology
B.A., M.S., CSU Northridge
Ph.D., UCLA

Diaz, Dr. Martin (2007)
Instructor, Chemistry
B.A., M.S., CSULA
Ph.D., UCLA

Dolan, Theresa (2001)
Instructor, English
B.A., University of Massachusetts
M.A., Boston College

Dorado, Luis (2010)
Assistant Dean, Student Services
B.A., University of La Verne
M.P.A., Cal Poly Pomona

Dozier, Kelly (2007)
Refrigeration & Air Conditioning Mechanics

Drebskaya, Finna (1999)
Professor, Fashion Design
A.A., Los Angeles Trade-Technical College
B.A., Academy of Light Industry, Ukraine

Drummond, Marcy J. (2004)
Vice President, Economic & Workforce Development
B.A., B.S., M.S., Eastern Washington University

Dunn, Roger W. (1992)
Instructor, Carpentry
A.S., Los Angeles Trade-Technical College

El-Tawansy, Mohamed A. (1972)
Professor, Mathematics & Physics & Engineering
B.S.M.E., Cairo University, Egypt
M.S.M.E., CSU, Long Beach
Licensed Mechanical Engineer, State of California

Department Chair, Construction, Design & Manufacturing
Apprenticeship Coordinator, LATTC
B.S., Southern Illinois University
M.A., CSU Dominguez Hills

Encinas, Dan A. (2001)
Instructor, Automotive Technology
B.A., M.A., CSU Los Angeles
A.S., STS, SAE, MACS Licensed

Esparza, David (1996)
Director, University Transfer Center
Honors Counselor
Instructor, Counseling
B.A., UCLA
M.A., CSU, Dominguez Hills

Evans, George (1997)
Instructor, Visual Communications
B.F.A., California Institute of the Arts

Feigenbaum, Susan B. (1991)
Instructor, Culinary Arts
A.A., Paul Smith’s College
ACF, Inland Empire

Ferre, Brian (2005)
Instructor, Automotive Technology
A.A., Cerritos College
i-CAN Certified
ASE Master Certified

Gallagher, Dr. Mary P. (2008)
Vice President, Administrative Services
B.S., Cal Poly Pomona
M.B.A., Pepperdine University
Ph.D., Claremont Graduate University

Gary, Dr. Karl L. (2002)
Associate Professor, Business
B.A., Occidental College
M.B.A., J.D. Willamette University
Licensed Attorney, State of California

Gangel-Vasquez, Janice (2000)
Department Chair, English
Associate Professor, English
B.S., CSU Long Beach
M.A., CSU Dominguez Hills

Glass-Villalobos, Nurit (2005)
Instructor, Fashion Design
A.A. Los Angeles Trade-Technical College

Glavan, Dr. John (2006)
Department Chair, Language Arts/Humanities
Associate Professor, Speech
B.A., University of San Francisco
M.A., Pepperdine University
Ph.D., Oregon State University

Goluza, Bruno (2008)
Instructor, Electrical Construction & Maintenance
A.S., Los Angeles Trade-Technical College
Electrical Contractor’s License C-10

Glavan, Willie (2010)
Instructor, Plumbing

Gonzalez, Dr. Michael A. (1982)
Department Chair, English
Professor, English & Humanities
B.A., CSU, Los Angeles
M.A., University of California, Irvine
M.F.A., Ph.D., UCLA

Green, Lorna C. (1997)
Professor, Counseling
Counselor, CARE/EOPS Coordinator,
B.S., CSU Dominguez Hills
M.A., National University

Guerra, Jesus (2005)
Associate Professor, Automotive
A.S., Los Angeles Trade-Technical College

Guthrie, Ralph T. (1993)
Instructor, Sign Graphics
A.A., Los Angeles Trade-Technical College

Instructor, Computer Information Systems
A.A., El Camino College
B.A., CSU, Los Angeles
M.S., USC
Microsoft Certified Trainer

Halderman, Dan (2010)
Instructor, Carpentry

Hanley, Wallace (2008)
Assistant Professor, Carpentry

Harutunian, Dr. Vahak (2000)
Instructor, Chemical Technology
B.T. Brunel University, London
M.S., Loughborough University, England
Ph.D., USC

Herbert, Pamela Jo (1980)
Instructor, Fine Arts
B.F.A., M.F.A., USC
Hosseini, Ashraf (1999)
Counselor, Counseling
Puente Counselor
Instructor, Counseling
B.S., Coe College, Iowa
M.S., USC
M.F.T. Certification

Houben, Dr. Karl (2009)
Instructor, Chemistry
Ph.D., University of California, Riverside

Hubbard, Larry E. (1999)
Instructor, Carpentering & Cabinetmaking
A.A., Los Angeles Pierce College
B.A., CSU, Los Angeles

Hubbard, Roger (1989)
Instructor, Visual Communications
A.A., Los Angeles Trade-Technical College
B.F.A., Art Center College of Design, Los Angeles

Huld, Phil (2000)
Instructor, Anthropology
B.A., M.A., CSU, Los Angeles

Iaffaldano, Cinzia (2006)
Instructor, Fashion Design
B.S.A., School of Art Institute of Chicago

Jackson, Diana B. (1976)
Assistant Professor, History
B.A., M.A., CSU, Los Angeles
M.A., English, CSU, Los Angeles

Jackson, Ronald E. (1994)
Associate Professor, Electrical Construction & Maintenance
A.S., Los Angeles Trade-Technical College
Electrical Contractor’s License C-10

Jackson, Tiffany (2007)
Instructor, Fashion Design
A.A., Los Angeles Trade-Technical College

Jackson, Vincent (2009)
Dean, Academic Affairs
B.S., CSU, Dominguez Hills
M.P.A., CSU, Dominguez Hills

Instructor, Nursing
A.A., Los Angeles Valley College
B.S., M.S.N., CSU Dominguez Hills

Jenkins, Deborah A. (1999)
Associate Professor, Nursing
A.A., Pasadena City College
B.S.N., M.N., UCLA

Johnson-Taylor, Chini (1977)
Professor, Counseling
Counselor, Counseling
B.S., M.S., San Diego State University

Johnson, Paula (2010)
Instructor, Nursing
B.S.N., Mount St. Mary’s College
M.S.N., Mount St. Mary’s College

Jones, Larry (2002)
Associate Professor, Plumbing
A.A., Los Angeles Southwest College
A.S., Los Angeles Trade-Technical College
B.S., CSU Dominguez Hills
Plumbing Contractor’s License, California

Kanemaki, James (2007)
Instructor, Culinary Arts
A.A., El Camino
A.A., LA Trade Tech
B.A., CSU Dominguez Hills

Kasmar, Steven (1992)
Department Chair, Culinary Arts
A.A., Orange Coast College
CEC Certification ACF

Kim, Hyein (1999)
Professor, Fashion Design
M.A., Seoul National University
M.S., Kansas State University

Kinyon, Kindra (1992)
Professor, ESL
B.A., M.A., USC

Koritzke, Leslee (1996)
Assistant Professor, Psychology
B.A., M.A., CSU Northridge

Kunarar, Sanya (2008)
Assistant Professor, Mathematics
B.A., M.S., CSULA
M.A., UCLA

Assistant Professor, Health & Physical Education (Kinesiology)
Athletic Director
B.S., M.S., CSU, Los Angeles

Lee, Aileen (2005)
Instructor, Fashion Design
A.A. Los Angeles Trade-Technical College

Legohn, Lisa M. (1994)
Associate Professor, Welding Gas & Electric

Lester, John (1991)
Assistant Professor, Electrical
A.S., Los Angeles Trade-Technical College
Contractor’s License C-10

Ley, Lidia (2002)
Instructor, Cosmetology
A.A., Centos College
Licensed Cosmetologist, State of California

Instructor, Mathematics
B.A., University of California, Irvine
M.S., Colorado State University

Associate Professor, Disability Specialties
Disabilities Specialist, DS&P&S
B.A., M.A., CSU, Northridge
M.A., Point Loma Nazarene College

Lisanti, James (1999)
Instructor, Culinary Arts
Culinary Arts Diploma, Western Culinary Institute
B.S.E., Indiana State University, Terre Haute

Liu, Dr. Hsiao-Ling (1992)
Professor, Mathematics
Ph.D., University of Alabama

Department Chair, Library
Librarian, Library Science
B.A., M.L.S., USC

Associate Professor, Cosmetology
A.A., L.A. Trade-Technical College
A.A., Glendale Community College

Madrid, George (2000)
Instructor, Counseling
A.A., East Los Angeles College
B.A., USC
M.A., Mount St. Mary’s

Madyun, Renee (1995)
Assistant Professor, Chemical Technology
A.A., Los Angeles Trade-Technical College
B.A., CSU, Northridge

Maina, Dr. Rose Gathoni (2000)
Instructor, Child Development
B.Ed., Kenya University, Nairobi
M.A., Mills College, California
Ed.D., USC

Department Chair, Cosmetology
Professor, Cosmetology
B.A., Union Institution, Ohio

Majors, Derek (2010)
Associate Dean, EOP&S/SCARE/DSPS
B.A., CSU, San Diego
M.A., University of La Verne

Mancia, Roberto (2002)
Instructor, English
B.A., M.A., CSU Long Beach

McClain, Dr. Freddie (1993)
Professor, Sociology
B.S., M.A., MSW, Ph.D., University of Michigan

McDowell, John R. (1978)
Professor, Labor Studies/Labor Center
B.A., M.A., CSU, Sacramento

McFall, Thomas J. (1990)
Professor, Automotive/ Collision Technology
A.A., Centos College
B.V.E., CSU, Long Beach
ASE – Certified Auto & Collision

Meftegh, Tayebeh (1993)
Assistant Professor, Mathematics
B.S., M.S., UCLA

Middleton Rose M (1995)
Professor, Registered Nursing
A.A., A.S., Los Angeles Harbor College
B.A., B.S.N., M.S.N., CSU, Long Beach

Montour, Clifford Ronald (1995)
Instructor, Business/Accounting
B.S., Business Administration, CSU, Dominguez Hills
B.S., Computer Science, CSU, Dominguez Hills
M.A., Business Administration, Loyola-Marymount University

Morago, Fred (1985)
Instructor, Automotive Collision Repair
A.A., Centos College
Moreno, Lisa (2001)
Assistant Professor, English
B.A., M.A., CSU Los Angeles

Moreno, Dr. Miguel A. (1981)
Professor, Physics & Astronomy
B.S., University of California, Berkeley
M.S., Ph.D., UCLA
NASA former Senior Scientist - Hubble Space Telescope
Founder & Coordinator, USC-LATTC Partnership Program
30 years of professional experience

Dean, Academic Affairs
B.A., University of Santa Clara
M.A., Antioch University, Los Angeles

Moya-Thornton, Delia (2003)
Associate Professor, Fashion Merchandising
B.S. University of Arizona

Muñoz, Ana (2008)
Assistant Professor, Counseling
B.A, University of Mexico
M.S., CSU, Northridge

Murphy, Diane (2006)
Associate Professor, Fashion Merchandising
B.S. University of Arizona

Murphy, Margaret M. (1991)
Department Chair, Mathematics
B.A., Dominican College, Houston
B.S., Accounting, CSU Long Beach
MAT, University of Montana, Missoula
CPA, California

Needham, Matthew R., (2001)
Instructor, Refrigeration & Air Conditioning
A.S., Los Angeles Trade Technical College
City of LA Steam Engineer’s License

Instructor, Electrical Construction & Maintenance
A.S., Los Angeles Trade-Technical College
Electrical Contractor’s License C-10

Nitsch, Lisa
Assistant Professor, Library Science
Librarian

Oliva, Marcela (1991)
Professor, Architecture
B.A. USC
M.A. Columbia University, N.Y., N.Y.

Padilla, Fred J. (1976)
Professor, Physics, Astronomy & Engineering
B.S., M.S., University of California, Berkeley

Pagano, Marian A. (1988)
Instructor, Child Development Center
A.A., East Los Angeles College
B.A., CSU, Los Angeles

Pantastico-Caldas, Dr. Marissa C. (1996)
Associate Professor, Biology & Microbiology
B.S., University of the Philippines, Los Banos
Ph.D., University of Arizona

Parker, Carolee (1994)
Associate Professor, Humanities
B.A., B.F.A., University of California, Irvine
M.A., UCLA

Patron, Anett (1992)
Instructor, Child Development Center
B.A., Mount Saint Mary’s College
M.A., CSULA

Pogoler, Lawrence D. (1990)
Professor, Electrical Construction & Maintenance
A.S., Los Angeles Trade-Technical College
B.V.E., CSU, Los Angeles
Electrical Contractor’s License C-10

Quíñones, Hernán C. (2002)
Instructor, Spanish
B.A, MA, Universidad Nacional Mayor de San Marcos, Perú

Ramírez, Adela (1998)
Child Development Center Teacher
A.A., East Los Angeles College
B.A., CSU, Los Angeles

Randall, Dr. Ayeshia K. (2001)
Professor, Learning Skills
B.A., UC Berkeley
M.A., Harvard University
Ed.D., University of Southern California

Ratcliff, Joseph (2000)
Department Chair, Health & Physical Education (Kinesiology)
Instructor, Physical Education (Kinesiology)
B.A., Glassboro State College/Rowan University
M.A., Rowan University

Rauterkus, Peter (1973)
Professor, Machining Technology
A.A., Los Angeles Trade-Technical College
B.A., CSU, Los Angeles
M.A., CSU, Long Beach

Reiley, Joyce (1995)
Associate Professor, Nursing
A.A., Los Angeles Southwest College
B.S.N., CSU, Dominguez Hills
M.S.N., University of Phoenix

Robinson, David S. (1999)
Associate Professor, Electrical Construction & Maintenance
A.A., Los Angeles Trade-Technical College
B.V.E., California State University, Los Angeles
Electrical Contractor’s License C-10
California State Certified General Journeyman Electrician

Professor, Cosmetology
B.A., Riverside Community College
B.A., Southern Illinois University
M.A., CSU, Los Angeles
Licensed Cosmetologist, State of California

Robinson, Thurman E. (1975)
Professor, History, Ethnic Studies
B.S., CSU, Hayward
M.A., UCLA

Rodriguez-Estrada, Alicia (2000)
Department Chair, Behavioral & Social Science/Child Development Department
B.A., M.A., University of California, Davis

Rogers, Merle (2001)
Associate Professor, Electrical Construction & Maintenance
A.A., Rio Hondo Community College

Roosta, Soraya (1998)
Instructor, Electronics
B.S., University of Colorado
M.S., Gannon University, Erie, PA

Rosario, Glicerio M. (1981)
Professor, Counseling
Counselor, EQPS
B.S., St. Theresa’s College, Manila, Philippines
M.S., Mt. St. Mary’s College, Los Angeles

Ruiz-Silva, Dr. Beatriz (2000)
Instructor, Chemistry
B.S., University Michoacana, Mexico
Ph.D., University of British Columbia, Canada

Instructional Librarian, Library
B.A., UCLA
M.A., New York University
M.A., UCLA
M.L.I.S., San Jose State University

Sapos, Carol (1996)
Associate Professor, Fashion Design
B.S.M. Pepperdine University
M.S., Walden University

Serrato, Rudy (1981)
Department Chair, Instructor, Automotive Technology
A.A. Los Angeles Trade-Technical College
B.S. Industrial Studies, CSU, Los Angeles
ASE Master Certified

Shackelford, Sondra (2000)
Associate Professor, Cosmetology
A.A., Pasadena City College
B.S., University of South Illinois
M.A., Cambridge College
Licensed Cosmetologist, State of California

Shakir, Rashidah (2000)
Associate Professor, English
B.A., Spelman College
M.A., Michigan State University

Shibuya, Steven T. (1999)
Associate Professor, Manufacturing Technology
A.A., Ventura College
B.S., CSU, Long Beach

Simpson-Rodgers, Nii (2008)
Instructor, Mathematics
B.S., M.S., CSULB

Counselor, EQPS
B.A., U.S.C.
M.A., Loyola Marymount University

Smith, Dorothy (1977)
Dean of Matriculation and Student Success
B.A., M.A., North Carolina A&T State University
Soles, Barbara (2006)  
Assistant Professor, Nursing  
A.A., LA Southwest College  
BSN, MSN, University of Phoenix

Spear, George (1976)  
Assistant Professor, Automotive Technology  
A.S., Los Angeles Trade-Technical College

Spence Roslyn (2008)  
Instructor Culinary Arts  
Grand Diploma: Cordon Bleu Culinary School, Paris  
B.A., California State University, Long Beach

Sullivan, Dr. Sally, (1997)  
Associate Professor, Health & Physical Education (Kinesiology)  
A.A., Santa Monica College  
B.A., M.A., USC

Szymanski, Gary J (1999)  
Instructor, Art  
B.A., UC Santa Cruz  
M.F.A., UC Irvine

Taylor, Melvin (1994)  
Associate Professor, Real Estate  
Professor, Graphics Communications  
B.S.M., Pepperdine University  
M.A., CSU, Los Angeles

Thompson, Deborah (1989)  
Professor, Baking  
A.A., Los Angeles Trade-Technical College  
B.A., CSU, Dominguez Hills  
Lifetime Teaching Credential UCLA

Associate Professor, Fashion Design  
B.A., Regents College of New York

Tishler, Sheila D. (1992)  
Associate Professor, Counseling  
Instructor, EOPS Director  
B.A., University of California, Los Angeles  
M.A., Azusa Pacific University

Department Chair, Noncredit, Continuing Education  
Instructor, Noncredit Basic Skills  
B.A., UC Santa Barbara  
M.P.L., D.P.D.S., University of Southern California

Uchida, Hiroshi (1985)  
Professor, Electrical, Construction & Maintenance  
B.A., Claremont McKenna College

Uribe, John (1998)  
Instructor, Automotive Technology  
A.S., Los Angeles Trade-Technical College

Vachon, Jerry (2008)  
Instructor Culinary Arts  
AS Culinary Institute of America  
BS Ohio Dominican

Vega, Cecilia (2004)  
Assistant Professor, Child Development  
B.A., M.A., CSUN

Vessella, Tom (2006)  
Associate Professor, Carpenter  
B.A., CalPoly San Luis Obispo  
M.A., CSU Los Angeles

Villora, Rosalie (2007)  
Assistant Professor, Nursing  
Vice Chair, Allied Health  
B.S.N., M.V., UCLA

Wagenbach, Andrew Mike (1994)  
Instructor, Health & Physical Education (Kinesiology)  
Coach, Physical Education  
B.A., M.A., CSU, Long Beach

Assistant Professor, Nursing  
B.S.N., CSUDH  
M.S., CSUDH

Instructor, Fashion Design  
A.A., Los Angeles Trade-Technical College  
B.A., San Diego State University

Weingourt, Dr. Rita (2004)  
Department Chair, Allied Health  
Associate Professor, Nursing  
Director, RN Program  
B.S., CSULA  
M.V., UCLA  
Ph.D, Greenwich University

Wells, Richard L. (1979)  
Assistant Professor, Health & Physical Education (Kinesiology)  
B.A., Whittier College  
M.A., Azusa Pacific College

Wemischner, Robert B. (1992)  
Instructor, Culinary Arts  
B.A., University of Pennsylvania

Instructor, Music  
B.A., UC Santa Cruz  
M.M., Austin, UT

Wong, Ricky K. (1992)  
Department Chair, Sciences  
Professor, Biology & Microbiology  
B.S., University of Hawaii at Manoa  
M.S., CSU, Los Angeles

Assistant Professor, Automotive Technology  
A.A., East Los Angeles College

Wood, Deirdre (2002)  
Instructor, Speech  
Articulation Officer  
B.A., M.A., CSU Northridge

Yasuda, Kathleen (2003)  
Consulting Instructor - Labor Studies  
B.S., UC Irvine  
M.A., Harvard University
Adjunct Faculty

Water Systems Technology

Abdul-Mumin, Jah'Shams (2006)  
Community Planning & Economic Development

Abkian, Varouj (1991)  
Water Systems Technology

Abraham, Angeles (2005)  
Counseling

Acosta-Buruel, Manuel (2009)  
Chemistry

Adams, Esther (1991)  
Nursing

Adams, Ludmilla (2006)  
Fashion Design

Adelstein, David (1988)  
Labor Studies

Ajie, Dr. Henry (2005)  
Chemistry

Alfred, Tangelia (2000)  
Counseling

Allen, Gene E. (1983)  
Refrigeration & Air Conditioning

Allen, Joyce F. (1995)  
Learning Skills

Amir-Teymoor, Abbas (2001)  
Water Systems Technology

Anderson, Dr. Fred  
Health Education

Anderson, Virginia M. (1990)  
American Sign Language

Armstrong, Anne (1999)  
Humanities

Aston, Todd (1999)  
Weatherization

Avalos, Lindamarie (2001)

Student Parking Guidelines

You are responsible for knowing LATTC parking rules and regulations. This information is intended to provide students with basic guidelines on parking at the college. The complete text of the college's parking rules and regulations is printed in the College Catalog and may also be obtained from the Sheriff's Department, D-150, the Administrative Services Office, or the College Website: (www.lattc.ca.us.htm). Parking information shown above is subject to change without notice.

- Student parking regulations are enforced from the first day of classes each semester through final examinations. A student parking permit is valid for the current academic term only and must be displayed at all times a vehicle is parked on college property. Saturday and Sunday parking permit use is enforced in the same manner as weekdays.
- Parking permits are made of removable Mylar and should be affixed to the inside rear window, (lower right side, facing outward.) Vehicles displaying a permit which is expired, altered, reported lost or stolen, or not completely visible are subject to a citation.
- A valid college parking permit and a DMV placard must be displayed on any vehicle parked in a designated handicapped stall. Students with a verified disability should go to the Disabled Students Program and Services Office, E-110, to arrange for an accommodation.
- Regulations governing handicapped parking, red curbs, no-parking zones, fire lanes, special permit areas, and areas that have parking time limitations are enforced 24 hours a day, including weekends and holidays. Failure to display a parking permit or parking in an area not authorized for student parking, including metered spaces, will result in the issuance of a citation. Illegally parked vehicles may be towed away at owner's expense.
- All traffic laws must be obeyed. Vehicles must be parked in stalls within the designated lines. The college speed limit is 7 miles per hour.
- The purchase of a parking permit does not guarantee a parking space; it is only a license to park one vehicle with a Student Parking Permit for all time periods in any of the designated areas specified below:
  - Preferred Student Parking ($27.00 for Fall & Spring Semesters and includes $7.00 ASO membership) – as available:
    - Olive Street Parking Facility- Entrance from Olive St., between Washington Blvd. and 21st St.
    - Roof Lot (F 8ldg) - Entrance from Flower St. (Southbound ONLY), between 22 St. and 23rd St.
    - 22nd Street Lots 8 - Entrance from 2200 St., between Grand and Olive
  - General Student Parking ($20.00 for Fall & Spring Semesters):
    - 18th and Grand Lot – Entrance: Northbound from Olive St. or westbound from 17th St.
    - Glory Church – Entrance: Southbound from Grand Ave.
  - General Student Parking ($10.00 for Summer & Winter Sessions): For Summer & Winter Sessions, $10.00 General Student Parking Permits are accepted in Preferred Student Parking areas above.
  - OVERFLOW PARKING: LATTC makes every effort to provide adequate parking for all students, staff and visitors. However, since parking becomes extremely impacted during the first three weeks of the Fall and Spring semesters, we have made arrangements with our neighbor and community partner, The LA Mart, at 1933 S. Broadway, to provide overflow parking for LATTC in their East lot. The lot is accessible from Broadway St., or Main St., just south of Washington Bl., and will be available to students and staff with a valid parking permit for the first three weeks of the Fall and Spring semesters ONLY.
  - LATTC assumes no responsibility or liability for your car or its contents while parked in the lots.
  - Escort service is provided upon availability for students with physical or other limitations. Note: This is not a shuttle service. Call the College Sheriff’s Department and an officer will be dispatched to your location.
  - Inquiries regarding the college’s parking permit program should be directed to the offices listed below during normal business hours. College Sheriff's Department personnel are, however, on duty 24 hours a day, seven days a week to assist with permit use and enforcement issues.
  - Parking Rules, Regulations, Permit Use and Enforcement: College Sheriff’s Department, D-150, (213) 763-3600. Individuals who believe a citation was issued to them in error must appeal it immediately by completing an Administrative Review form (available at the Sheriff’s Department, D-150) or the LATTC Sheriff’s Department website under Parking Citations and Appeals). Appeals must be mailed to: Los Angeles Trade Technical College, c/o Parking Citation Service Center, P.O. Box 11923, Santa Ana, CA 92711. Failure to immediately pay or appeal a citation may result in substantial penalties and a Department of Motor Vehicle (DMV) hold on your vehicle registration.

Parking for all time periods in any of the designated areas specified above:
