Los Angeles Trade-Technical College is a public tax-supported educational institution which offers learning opportunities for men and women and is administered by the Los Angeles Community College District.

Accreditation
Los Angeles Trade-Technical College is accredited by the Accrediting Commission for Community and Junior Colleges of the Western Association of Schools and Colleges, 10 Commercial Boulevard, Suite 204, Novato, CA 94949 (405) 506-0234, an institutional accrediting body recognized by the Commission on Higher Education Accreditation and the U.S. Department of Education.
Welcome to Los Angeles Trade-Technical College.

I am so excited that you have selected Los Angeles Trade-Technical College (LATTC) to further your education. This college has so much to offer you. We provide the type of education and training that places you on a career pathway to high-demand industries or a transfer pathway to a four-year institution. If you combine that with Trade Tech’s reputation for providing the very best in career-technical education as well as academic curriculum, you have a great chance of securing a career that will be transformational to your lives and the lives of your family.

Please take the time to review all that we have to offer with regard to programs, training, and student services. This entire college is geared toward student success - your success - so we want to make sure that your Trade Tech experience is everything you want it to be. Take advantage of all support services available to you, including counseling, tutoring, basic skills and the Associated Student Organization (ASO).

This is an exciting time to be entering LATTC because we are in the midst of modernizing and expanding our campus, we have a new WorkSource Center on campus and we are part of the LA College Promise, which provides one year of free tuition at LA Trade Tech if you graduated from an LAUSD high school this year.

We have so much to offer you. Thanks again for choosing the best community college around… and welcome to LATTC!

Laurence B. Frank
President
Los Angeles Trade-Technical College
Responsibility to be Informed

It is the student’s responsibility to read the information presented in this catalog and to know and observe all policies and procedures related to his/her program. Regulations will not be waived nor exceptions granted because a student pleads ignorance of policies, procedures, or deadlines.

2016-2017 Academic Calendar

Fall Semester 2016

- Labor Day: September 5, 2016
- Fall semester begins: August 29, 2016
- Last day to apply for graduation for students completing in Fall 2016: October 7, 2016
- Veterans Day (College closed): November 11, 2016
- Thanksgiving Holidays (College closed): November 24-25, 2016
- Final examination period: December 15-18, 2016
- Fall semester ends: December 18, 2016

Winter Intersession 2017

- Winter intersession begins: January 3, 2017
- Martin Luther King’s Day (College closed): January 16, 2017
- Winter intersession ends: February 5, 2017

Spring Semester 2017

- Spring semester begins: February 6, 2017
- President’s Day (College closed): February 17 – 20, 2017
- Cesar Chavez Day (College closed): March 31, 2017
- Spring recess: April 1 – 7, 2017
- Memorial Day (College closed): May 29, 2017
- Final examination period: May 30 – June 5, 2017
- Spring semester ends: June 5, 2017

Summer Session 2017

- Summer intersession begins: June 12, 2017
- Independence Day (College closed): July 4, 2017
- Summer intersession ends: August 27, 2017

</table>
Our history began shortly after the close of World War I, when members of the Los Angeles Board of Education, the Chamber of Commerce, along with business and labor leaders held a series of conferences to talk about the need in Los Angeles for a centralized vocational training program. Out of those meetings came the initial concept of what would become Trade Tech, modeled on a class in power sewing offered to downtown garment workers. By the end of 1924, training programs in “beauty culture”, printing, plumbing, and the building trades were offered at various locations around the city and briefly consolidated in a soon-to-be outgrown building located at Eighth and Grand Avenues.

In the early Spring of 1925, the Los Angeles Board of Education created the Frank Wiggins Trade School, naming it after a prominent Los Angeles Chamber of Commerce member who had been a driving force in promoting the development of vocation training. The school relocated to a new building at 1646 South Olive Street in 1926, and through the ensuing years gained a reputation for the success of its graduates in industrial careers as well as the dedication of its faculty and staff.

The advent of World War II created an exponential demand for the college's training programs in support of the war effort. The college's Aircraft and Welding Trades departments operated directly under the supervision of the federal War Production Training Program, while the majority of other programs were quickly reformatted to provide short-term training of six to ten weeks in duration, often at war production plants located throughout the city.

The end of the war and the return to a civilian economy, together with the infusion of federal funds for training veterans, led to an expanded demand for education and training at the college. In July of 1948, in response to veteran's retraining needs as well as Los Angeles' post-war population boom, the college was granted the authority to expand their curriculum and offer an Associate in Arts degree in vocational disciplines as well as academic and Liberal Arts areas.

LATTC moved to its current location in 1957 taking over the location where Polytechnic High school once stood. In 1966, an existing educational institution with a strong business program, Metropolitan College, was merged with Trade Tech, resulting in an even broader range of educational offerings. Finally, in 1969, LATTC joined the newly formed Los Angeles Community College District (LACCD), making LATTC one of the nine colleges that comprise the District.

Trade Tech occupies a unique position among institutions of higher education. Throughout nine decades, the college has remained true to its founding premise of vocational education, while expanding to provide transfer programs, adapt to rapidly changing technologies and remain responsive to the needs of the surrounding community. Students come from all over the Los Angeles basin to participate in our unique mix of programs, some of which have been in existence since the school’s inception. As of Fall 2002, the campus has undergone massive renovation and building programs under the auspices of Proposition A, AA, and J bond funds, and we look forward to serving our community for decades to come.
MISSION AND VISION STATEMENTS

OUR MISSION
We provide our students and community with high-quality academic, technical, and professional educational opportunities that:

• Meet their career development and academic goals;
• Foster a climate of life-long learning;
• Prepare our students to participate effectively in our society; and
• Generate economic development with our educational, governmental, community and business partners.

OUR VISION
LATTC will be a global leader known for effectively incorporating leading-edge theories, proven educational practices, hands-on experiences, and technology into our career-technical and professional programs, as well as transfer pathways. LATTC graduates will be in high demand. Many will become community, business and innovation leaders.

To achieve our vision:

• We will be known for our experimentation with new ideas and innovations to improve student success.
• We know that a single positive experience – a course, a program, a service, or a person who cares – can be transformational for a student.
• We are re-engineering our institutional practices, so we can take our college to a new level – a national and international leader in meeting students’ needs, particularly those facing socio-economic challenges.

 ACCREDITATION
Los Angeles Trade-Technical College, a California public, tax-supported community college, is officially accredited by the Accrediting Commission for Community and Junior Colleges of the Western Association of Schools and Colleges and is fully approved by the Board of Governors of the California State University and independent colleges and universities to give full credit for appropriate courses completed. Specific programs are also accredited by the American Culinary Federation Education Foundation Accrediting Commission (ACFEFAC); Interstate Renewable Energy Council (IREC); and National Automotive Technicians Education Foundation (NATEF).

ACCURACY STATEMENT
The Los Angeles Community College District and Los Angeles Trade-Technical College have made every effort to make this catalog accurate and may, without notice, change general information, courses, or programs offered. The reasons for change may include student enrollment, level of funding, or other issues decided by the district or college. The district and college also reserve the right to add, change, or cancel any rules, regulations, policies and procedures as provided by law.

CODE OF ETHICAL CONDUCT
Los Angeles Trade-Technical College is committed to compliance with the law and regulations governing the college, as well as the policies and procedures established by the college. In order to encourage ethical conduct and strengthen and promote ethical practices among college employees, members of the college community, and those who conduct business with the college, LATTC has adopted this Code of Ethical Conduct:

LATTC employees shall:
- Uphold the highest standards of intellectual honesty and academic, professional, and personal integrity in the conduct of instruction, research, college services, and all other functions of the college.
- Act in a way that promotes healthy working relationships based on mutual trust and support among one’s fellow employees.
- Abstain from knowingly making slanderous and libelous statements against colleagues while upholding the principles of freedom of speech.
- Act as good stewards of the resources and information entrusted to our care.
- Perform assigned duties and professional responsibilities in such a manner so as to further the college mission.
- Treat fellow employees, students, and the public with dignity and respect.
- Comply with laws, rules, regulations, and professional standards that prohibit discrimination against, harassment of, or threats to others.
- Respect the intellectual property rights of others.
- Respect differences of opinion and approaches to issues and problems.
- Avoid improper political activities as defined in law.
- Protect human health and safety and the environment in all LATTC operations and activities.
- Refrain from using our employment to improperly advance the interests of a friend or relative and comply with nepotism policies as defined in Board Rule 10108.
- Comply with conflict of interest codes as defined in Board Rule 14000.

COLLEGE ADVISORY COMMITTEES
The demands of industry determine the various phases of business, technical and trade training carried on by the college. Placement and successful progress of students are the measures of effectiveness of the pre-employment training. Increased productivity, job satisfaction, and advancement of the employed trainee attest to the effectiveness of the program. For these reasons all training is developed and carried on with the advice and assistance of the college advisory committees.

Membership in each of the groups is composed of community-wide representatives from labor and management, and from federal, state and local agencies who are concerned with the business, trade and technical programs offered. These advisory committees meet on the invitation of the college administration at least once a year and on additional occasions when considered necessary. They give counsel and advice in regard to evaluating training programs, approve plans to meet current training needs, review past accomplishments, and forecast trends affecting training and employment.

Members of the various advisory committees are an important part of the educational program of the college. The people who serve on the committees are selected because of their leadership in the economic life of Los Angeles. The advisors bring to the college expert advice and sound thinking on business, trade and technical problems. Thus the work of the classroom reflects the rapid changes in community and industry.

ABOUT THE LOS ANGELES COMMUNITY COLLEGE DISTRICT (LACCD)
EDUCATIONAL PHILOSOPHY OF THE LACCD
The Los Angeles Community Colleges affirm the principle that individuals should have opportunities to develop to their full potential. To that end, our main responsibility is to students and to the provision of education, which benefits students and enables them to contribute to society.

Our colleges, therefore, should be accessible to all individuals who have the capacity and motivation to benefit from higher education. Curricula and services of our colleges should provide means for fulfilling the promise of open access.

We recognize the necessity to adapt to the changing educational needs of the Los Angeles Community Colleges’ communities and to the growing diversity among students. The quality of the educational experience is to be judged by its value to students and communities, not merely by quantitative appeal. We further recognize that academic freedom is essential to excellence in education.

FUNCTIONS OF THE LACCD
Consistent with the educational philosophy and mission of the Los Angeles Community Colleges, Los Angeles Trade-Technical College offers the following types of educational programs and services:
- Transfer. A college transfer program which enables the student who completes two years of study to continue upper division (third year) work at accredited four-year colleges and universities through careful and continuous articulation with accredited collegiate institutions and...
high schools.

• Career-Technical. Career-technical education offers students, a business, technical, and professional curricula to develop skills which can lead to employment, job advancement, certification, or the associate degree.

• General Education. A program of general education comprised of associate degree programs and other planned experiences which develop knowledge, skills, and aptitudes necessary for the student to be effective as a person, a family member, a worker, and a citizen, thereby enhancing the quality of life for the individual and for the society-at-large.

• Transitional Education. A program of remedial and basic skills education for students needing preparation for community college level courses and programs; and English as a Second Language instruction for other students with limited English proficiency.

• Counseling and Guidance. A counseling and guidance program incorporating academic, career, and personal counseling and assistance in matters of admissions, financial aid, job placement and student activities; to assist the student in the establishment of educational goals and in the selection and pursuit of a life work compatible with his or her interests, aptitudes, and abilities.

• Continuing Education. A program of continuing education comprised of graded and un-graded classes to provide opportunities for personal and occupational competence that supplement formal full-time college attendance.

• Joint Programs. Joint programs with business, industry, labor, education, government and other institutions which are of mutual benefit to sponsoring institutions, enhance the educational opportunities of program participants, and advance the mission and functions of the District.

MISSION STATEMENT OF THE LACCD

“Changing Lives in a Changing Los Angeles”

In an era of civic renewal, economic change, and cultural revitalization that is unprecedented in the history of Los Angeles, we—the faculty, staff, and administrators of the nine Los Angeles community colleges—dedicate ourselves to the goal of expanding access to educational opportunity across the many, diverse communities that contribute to the greater Los Angeles area.

We serve all of Los Angeles by providing an unparalleled array of educational offerings, including programs that prepare students for successful careers, for transfer to four-year colleges and universities, for the improvement of essential life and workplace skills, and for civic engagement and life-long learning.

To achieve this mission, we strive to create supportive instructional environments that challenge students to meet rigorous academic standards, to become active, self-directed learners, to develop critical and creative habits of mind, and to develop an abiding appreciation for varied cultures and experiences.

District Guiding Principles...

ACCESS & OPPORTUNITY—We are committed to expanding educational opportunity and access to everyone who has the desire to learn, and we welcome all students, including those from communities that have been traditionally underserved.

EXCELLENCE & INNOVATION—In all of our services and institutional activities, we strive to create a culture of excellence and innovation, and we challenge our students to meet the highest educational standards.

STUDENT LEARNING & SUCCESS—All of our institutional efforts and resources are dedicated to one central purpose—the support of our students as they work toward the achievement of their academic and professional goals.

FREE INQUIRY—We value the vigorous, critical and free exchange of ideas and opinions, and we work actively to create communities of mutual respect and shared concern that support and sustain open debate and constructive, democratic discourse.

THE POWER OF DIVERSITY—We embrace diversity as a central part of our civic and institutional identity and as a powerful element in the education and development of every individual.

COMMUNITY CONNECTION—Our colleges must be rooted in the communities they serve, and we are determined to build and maintain strong, durable, and responsive collaborations with our educational partners across Los Angeles, and with business, labor, and other organizations that contribute to the fabric of our larger community.

THE PROMISE OF TECHNOLOGY—Technology plays a critical role in all of our institutional operations and educational programs, and we are committed to keeping both our district systems and classrooms on the forefront of technological innovation and efficiency.

PUBLIC ACCOUNTABILITY—We are accountable to the public for all aspects of our mission, and we owe the students we serve, the people of Los Angeles, and the State of California regular and timely assessments of all of our efforts in support of student learning and student success.
Admissions and Academic Policies

SECTION II: ADMISSIONS AND ACADEMIC POLICIES

ADMISSIONS

RESIDENCY REQUIREMENTS

CALIFORNIA RESIDENCE REQUIREMENT
A California resident is defined as one who has established both physical presence and intent to make California their permanent home, for more than a year and a day immediately preceding the opening day of instruction. Physical presence is defined as continuous physical presence within the State of California, excluding temporary absences. Intent to make California the permanent home is determined based upon acceptable evidence showing California is the student’s permanent home and evidence showing that students are not precluded from establishing permanent residency in the United States.

1. If the applicant is under the age of 18, his or her parents must have had legal residence in California for a minimum of 12 consecutive months preceding the day before the first day of the semester or session.

2. If the applicant is 18 but not yet 19 years of age, the applicant and the applicant’s parents or legal guardian must have combined residence in California for a minimum of 12 consecutive months preceding the day before the first day of the semester or session.

3. If the applicant is 19 years of age or older, the applicant must have had legal residence in California for a minimum of 12 consecutive months preceding the day before the first day of the semester or session.

NON-RESIDENT STATUS
A non-resident student is one who has not resided in the State of California for more than one year and one day immediately preceding the start of the semester or who has shown conduct inconsistent with a claim for California residence or who is precluded from establishing domicile in the United States within the last 12 months. Non-residents still may attend the college subject to non-resident tuition fees as established by the District’s Board of Trustees.

RESIDENCE RECLASSIFICATION
Students who have been classified non-residents may petition to be reclassified as California residents if their status has changed. The Residence Reclassification form is available in the Admissions and Records Office and must be submitted with the appropriate documentation showing both physical presence and intent to make California their permanent home, for more than one year and one day before the start of the upcoming semester. Reclassification requests must be submitted prior to the start of the semester in which reclassification is requested to be effective.

RESIDENCE CLASSIFICATION APPEAL
A student may appeal the residence classification determined by the college. The appeal must be made within 30 calendar days of receipt of notification of the residence classification from the Enrollment Center. The written appeal along with supporting documents must be submitted to the college Admissions Dean. Any further appeals will be forwarded to the District Residency Appeal Officer.

AB 540 NON-RESIDENT TUITION EXEMPTION
AB 540 is a bill authored by Marco Firebaugh (D-Los Angeles), which was signed into law by the Governor on October 12, 2001. In some cases, this new legislation waives non-resident tuition for students, regardless of immigration status, who have attended and graduated from California high schools.

Students are eligible for exemptions for semesters or terms beginning on or after January 1, 2002 as long as they meet the following conditions:

1. Attended a California high school for three or more years.

2. Graduated from a California high school or earned an equivalent of a high school diploma (for example a GED or a passing score on the high school proficiency exam).

3. Signed an affidavit stating that the student meets these conditions and stating that the student has filed, or will file, an application with the United States Citizenship and Immigration Service (USCIS) to legalize his/her immigration status as soon as possible.

4. Do not currently have “nonimmigrant alien” immigration status (for example F-series student visas and B-series visitor visas).

Additional proof of residency (for example, high school transcripts or diploma) is not required unless the college has conflicting information. Otherwise, the student’s signed application for admission and the affidavit requesting the exemption will be all that is required for the exemption from non-resident tuition. Also, the college is not required to explore the student’s eligibility for legalization of residency status nor is the college required to monitor future changes in eligibility. AB 540 does not grant residency in California for Financial Aid or any other purpose; it only exempts eligible students from non-resident tuition fees.

APPLICATION FOR ADMISSION
Prior to the Start of the Semester/Session: Students must apply online at www.lattc.edu.

At the Start of the Semester/Session: Students may apply in-person through the late add process. Applications are available from the Bridges to Success Center. In person application requires photo identification and immigration/visa documents.

The Los Angeles Community College District maintains a student record system that uses student identification numbers assigned by the college.

Transcripts: Official transcripts mailed directly from the last high school attended and from each college attended should be submitted at the time of application. All transcripts become the property of the college and cannot be returned to the applicant.

Transcripts are required if students wish to claim credit for prerequisites taken at other colleges. High school transcripts are required if a student wishes to use high school foreign language courses for IGETC language certification.
REGISTRATION POLICIES

UNITs OF WORK/study load
Maximum and minimum unit requirements may apply, as follows:

Unit Maximum
- The maximum study load is 19 units during a regular semester, 9 units in two summer sessions, and 7 units during winter session. The normal class load for students in the Fall or Spring semester is from 12 to 18 units a semester for full-time students. Students who desire to take 19 1/2 or more units must obtain approval from the Registrar through a petition.
- Those students who will be employed while attending college should consider reducing their classes accordingly. It is suggested that those students who are employed full-time should enroll in no more than one or two classes or 9 units maximum.

Full-Time Definition
- A program of study 12 units or more (4 units or more in Summer and Winter intersession) is considered a full-time study program.

Minimum study loads for specific programs:
- Veterans and veterans’ dependents: 12 units
- Social Security benefits: 12 units
- Foreign Students (F-1 visa): 12 units
- Athletes: 12 academic units

The Veterans Administration uses the following definition for eligibility:
- full-time benefits: 12 or more units
- 3/4-time benefits: 9 — 11 units
- 1/2-time benefits: 6 — 8 units
- less than 1/2 time: 3 — 5 units (Reservist and National Guard)

ONLINE REGISTRATION
Prior to the semester/session start date students must utilize the Student Information System (SIS) at https://eweb3.laccd.edu/WebStudent/signon.asp.

IN-PERSON LATE REGISTRATION
Late registration for open classes begins the first day of class. Students may register up until the add deadline with the permission of the instructor. See the class schedule for registration deadlines. Students should be aware that missing the first class meeting might severely affect their chances to succeed in the course. Students entering classes late are responsible for making up missed work.

SECTION TRANSFER
Students who have a change of work schedule or other extenuating circumstances may request a section transfer from one class to another class in the same Subject. Consent must be granted by the new instructor for the new class, and may involve instructor-to-instructor transfer of grade records. The section transfer form requires incoming instructor and student signatures and must be submitted to the Admissions and Records Office by the section transfer deadline (see class schedule).

LATE ADDS
It is the student’s responsibility to know the add deadline for any courses they want to add once the semester has started. The add deadline is posted in the class schedule each semester. Please note short-term classes have earlier deadlines than full-term classes. A student is not properly registered for a class until he/she has submitted an Add permit for processing. Failure to submit an Add permit by the Add deadline may result in no enrollment and hence no credit for the class. A Late Add petition may be submitted to Admissions and Records with documentation of extenuating circumstances for consideration. Denied Late Add petitions will result in no course credit for the class.

CANCELLATION OF CLASSES
The college reserves the right to discontinue any class with insufficient enrollment prior to the end of the second week of the class.

PROGRAM PLANNING-UNIT LIMIT
In cooperation with a counselor, students should carefully plan their academic programs. Students may enroll for a maximum of 19 units for the spring or fall semesters, and 9 units for summer or winter sessions. Students may petition for additional units for Spring and Fall semesters only. Petition to enroll in additional units are available online or at the Admissions and Records Office. Careful planning will facilitate progress through a curriculum with maximum learning and minimum difficulty. In general, students may receive no more than 30 semester or 45 quarter units of credit for remedial coursework. Exceptions to this limitation exist for students enrolled in ESL courses and students who have learning disabilities. “Remedial coursework” is defined as “pre-collegiate basic skills courses” which are described as “those courses in reading, writing, computation, and English as a Second Language which are designated by the community college district as non-degree credit courses.” Degree and non-degree applicable units are noted on student records. A student who intends to transfer to another college or university should consult the catalog of that institution. The Transfer Requirements section of this catalog gives general education requirements for the California State University, and breadth requirements for the University of California, as accurately as could be determined at the time of publication of this catalog.

REGISTRATION PRIORITY
Students in good academic standing shall be granted registration priority on the basis of cumulative units completed within the LACCD in the order listed below, from highest to lowest:

1. New and fully matriculated students as follows:
   - Members of the armed forces or veterans
   - CalWORKs recipients in good standing with fewer than 100 degree applicable units
   - Disabled Student Programs and Services (DSPS) students in good standing with fewer than 100 degree-applicable units
   - Extended Opportunity Programs and Services (EOPS) students in good standing with fewer than 100 degree-applicable units, and
   - Foster youth or former foster youth, regardless of academic standing and units taken.
2. Continuing students in good standing with fewer than 100 degree applicable units, middle college students in good standing with fewer than 100 degree-applicable units, new, fully matriculated students, returning exempt students and new students who are exempt from matriculation.

3. Students who have lost their enrollment priority, as set forth below.

4. Special K-12 admits pursuant to Education Code section 76001.

To be eligible for registration priority as listed above, students must have completed orientation, assessment, and developed student education plans.

LOSS OF REGISTRATION PRIORITY
Students, with the exception of foster youth or former foster youth, will lose registration priority at the first available registration after:

- They are placed on academic or progress probation, or any combination thereof, for two consecutive terms.
- Have earned one hundred (100) or more degree-applicable units in the District; however, non-degree applicable basic skills units do not count towards the 100 units.

APPEALING LOSS OF REGISTRATION PRIORITY
The college has established a Registration Priority Appeals Committee to review requests from students appealing the loss of enrollment priority. Petition to Appeal Loss of Enrollment Priority can be obtained at the Admissions and Records Office and submitted by the deadline dates along with supporting documentation. A student may appeal on one or more of the following grounds:

- The student has extenuating circumstances. Excluding circumstances are verified cases of accidents, illnesses or other circumstances beyond the student’s control.
- The student applied for reasonable accommodation for a disability, but did not receive it in a timely manner.
- The student has demonstrated significant academic improvement. Significant academic improvement is defined as achieving no less than a 2.0 grade point average in the prior term.

The College’s Registration Priority Appeals Committee shall notify the student within ten (10) business days of its decision. The decision of the college Registration Priority Appeals Committee shall be final.

LIMITATIONS ON ENROLLMENT
All courses shall be open to enrollment, however, enrollment in specific courses or programs may be limited as follows:

1. Students meeting prerequisites and co-requisites established pursuant to Title 5, and Board Rule 8600.

2. Health and safety considerations, facility limitations, faculty workload, the availability of qualified instructors, funding limitations, the constraints of regional planning or legal requirements imposed by statutes, regulations, or contracts. Fair and equitable procedures will be used for determining who may enroll in affected courses or programs. Such procedures shall be consistent with or more of the following approaches:

   - Limiting enrollment to a “first-come, first-served” basis or
   - Limiting enrollment using a registration procedure authorized by Title 5, section 58108; or
   - In the case of intercollegiate competition, honors courses, or public performance courses, allocating available seats to those students judged most qualified; or

   - Limiting enrollment in one or more sections of course to a cohort of students enrolled in one or more other courses, provided however, that a reasonable percentage of all sections of the course do not have such restrictions.
   - Students on probation or subject to dismissal, consistent with the provisions of Title 5, and Board Rule 8200 et seq., may be limited to enrollment in a total number of units or to selected courses, or required to follow a prescribed educational plan.

CHALLENGES TO LIMITATION ON ENROLLMENT
A student may challenge an enrollment limitation on any of the following grounds:

1. The enrollment limitation is either unlawfully discriminatory or is being applied in an unlawfully discriminatory manner;
2. The District is not following its policy on enrollment limitations; or
3. The basis upon which the District has established an enrollment limitation does not in fact exist.

The student shall bear the burden of showing that grounds exist for the challenge. Challenges shall be addressed within 5 working days and, if the challenge is upheld, the enrollment limitation shall be waived.

The college shall, upon completion of the challenge, advise the student that or she may file a formal complaint of unlawful discrimination pursuant to Title 5, California Code of Regulations, section 59300 et seq. Completion of this challenge procedure shall be deemed to satisfy the requirement of Title 5, California Code of Regulations, section 59328(b) that the District and the student attempted to informally resolve the complaint.

INTERNATIONAL STUDENT ADMISSION
All F-1 visa students seeking admission to Los Angeles Trade Technical College must apply through the International Student Office. All applicants for F-1 status must provide the following documents:

1. Completed International Student application
2. Evidence of English Competency in any of the following:
   - TOEFL score of 450 (CBT score 133) (IBT score 45) or higher.
   - IELTS 5 OR ITP 3.5
   - (For Japanese applicant only) An Official STEP Eiken 2A grade level or higher.
3. Most recent three years of high school and/or college transcripts
4. Two recent passport-sized photos
5. Affidavit of support
6. Bank letter
7. Processing fee of $50
8. Students applying from within the U.S.A. must provide a cur-rent passport, current visa and I-94.
9. All current and previous status documents (I-20, DS-2019, etc.)
10. Transfer Status Verification Form
11. All previous US Colleges, universities, and high school official transcripts if applicable.

All documents submitted must be either originals or certified copies, and all documents must be translated into English. Upon receipt of the above mentioned, a decision is made regarding acceptance. If the application
is approved, an immigration form I-20 will be issued to the candidate. Immigration regulations require that all F-1 (student) visa holders must be enrolled in a minimum of 12 units and maintain 2.0 grade-point average each semester. Failure to comply with the above will jeopardize your F-1 student visa status.

STUDENT SUCCESS AND SUPPORT PROGRAM -MATRICULATION PROCESS

Senate Bill 1456 revised and renamed the Matriculation Act of 1986 as the Seymour-Campbell Student Success Act of 2012. Signed by Governor Brown on September 27, 2012, the program began on January 1, 2013 and will be implemented through stages over a five-year period.

The Student Success and Support Program (formerly Matriculation) supports the transition of new students into the college by providing services that promote academic achievement and successful completion of degrees, transfer preparation, career technical education certificates, or career advancement.

Effective Fall 2014, based on student responses to the College application for admission, students will be identified as matriculating or non-matriculating. Students identified as matriculating are referred to core matriculation services: assessment placement, orientation, and counseling. Students must complete the assessment placement, orientation, and counseling (abbreviated student educational plan) prior to their priority registration date and time. The abbreviated student educational plan is provided during the in-person orientations. After registration and sometime during the semester, a comprehensive student educational plan must be completed within a reasonable time period by making an appointment to meet with a counselor. Non-matriculating students are exempt from participating in the core matriculation services, but are advised to access these services if they plan to pursue a degree or certificate.

STUDENT RIGHT AND RESPONSIBILITIES: (TITLE 5 SECTION 55530)

Identify an educational and career goal.

1. Diligently engage in course activities and complete assigned coursework.
2. Complete courses and maintain progress toward an education goal and completing a course of study.
3. Matriculating Student:
   • Must identify a course of study.
   • Participate in the assessment placement process.
   • Complete an orientation activity provided by the college.
   • Participate in counseling to develop at minimum an abbreviated student education plan.
   • Failure to complete a, b, c, and d (above) may result in a hold on a student’s registration or loss of registration priority until the services have been completed.

A Comprehensive educational plan must be completed by the 3rd semester or after completion of 15 semester units of degree applicable coursework (effective Fall 2015).

ADMISSIONS

Complete the LATTC admissions application online at www.lattc.edu. Submit official high school transcripts and any previous official college transcripts. Submit proof of residency.

ASSESSMENT PLACEMENT PROCESS

The Assessment Placement Process at LATTC consists of computerized English and Math assessment tests. Assessment Check-in forms are available upon submitting the LATTC admission application and online. Admission application must be submitted and processed prior to participating in the Assessment Placement Process. All new students are required to participate in the Assessment Placement Process. For more information, please call or visit Assessment Center.

Please be prepared and study for this English and Math assessment as students retesting policies are strictly enforced and are Subject to change. Assessment placement results from other California Community Colleges are accepted within the last two years.

Any student with a verified disability may arrange for alternative administration of the Assessment Placement Process (English, and Mathematics) by contacting the Disabled Student Program and Services (MA-100) at (213) 765-3773.

ORIENTATION AND COUNSELING

After participation in the assessment placement process, students must participate in the orientation. In-person orientations are led by faculty counselors and an abbreviated student educational plan will be provided. The orientation schedule is provided to all students participating in the assessment placement process and additional information is available on the LATTC website at www.LATTC.edu.

All students should meet with a counselor during the semester to develop a comprehensive student educational plan. All students who have not declared an educational goal and students who are enrolled in pre-collegiate basic skills courses are highly encouraged to meet with a counselor to develop a student educational plan. Students who are on academic or progress probation are referred to participate in a probation workshop.

EXEMPTIONS (TITLE 5 SECTION 55532)

Exemption from core matriculation services (assessment, orientation, and counseling) if the student:

- Has completed an associate degree or higher;
- Has enrolled at the college for a reason other than career development or advancement, transfer, attainment or a degree or certificate, or completion of a basic skills or English as a Second-Language course sequence;
- Has completed these services at another community college within a time period as identified by the district;
- Has enrolled at the college solely to take a course that is legally mandated for employment as defined in section 55000;
- Has enrolled at the college as a special admit student pursuant to Education Code section 76001.
ATTENDANCE
Only students who have been admitted to the College and are in approved active status may attend classes. Students are expected to be in class on time and to remain for the entire class period. Medical appointments, work, job interviews, child care responsibilities, etc. should be arranged so as not to occur during class time. Please do not make requests for exceptions.

LATTCC College Attendance Policy - An instructor may exclude a student who is absent for more hours than the class meets per week or 20% of the total class hours, for short term classes. In addition, an instructor may equate three or more late arrivals or early departures from class as an absence for purposes of class attendance. Student attendance expectations including this policy must be clearly indicated on the course syllabus. Instructors must apply their attendance policy in a consistent manner.

Students are responsible for dropping a class that they stop attending. If the class is not dropped, the student may receive an “F” in that class and be responsible for enrollment fee. Any drops or exclusions that occur between the 4th week and the 12th week will result in a “W” on the student’s record. Drops are not permitted beyond the 12th week. A grade ("A", "B", "C", "D", "F", "INC", "P", or "NP") will be assigned to students who are enrolled past the 12th week even if they stop attending class. For further details, refer to “W” section of “Grading Symbols and Definitions.”

Students who are registered in a class and miss the first meeting may lose their right to a place in the class, but the instructor may consider special circumstances. Instructors will generally only exclude students through the census date for non-attendance. It is the student’s responsibility to drop classes in time to avoid fees and/or grades of “W”.

Campus Procedure
Students who, because of mitigating circumstances, are unable to attend the first class meeting should leave a voice mail message or email for the faculty member. This, however, does not guarantee students a seat in the class if they do not attend the first class meeting.

Withdrawal
Students intending to withdraw should avail themselves of the opportunity to first discuss the contemplated withdrawal with a counselor. Whether withdrawing from one class or all classes in which the student is enrolled, it is essential that standard withdrawal procedures be observed.

Final Examinations
Final examinations are to be given in all subjects according to the schedule printed in the Schedule of Classes. No student will be excused from taking a final examination. All faculty shall retain the final exams of every student for a minimum of one year after the end of the semester for which the final exam was given in order to permit students to examine their graded final exams.

STUDENT FEES

ENROLLMENT FEE FOR RESIDENTS
California residents are required to pay $46 per unit. For example, if you take 10 units, the cost is $460.

Note: Fees Subject to change by the California legislature.

FEE FOR OUT-OF-STATE NON-RESIDENTS
United States Citizens and Permanent Resident Card holders who have lived in California for less than a year are required to pay a non-resident tuition fee of $190 per unit plus an enrollment fee of $46 for a total of $236 per unit.

Note: Fees Subject to change by the California legislature.

FEE FOR RESIDENTS OF A FOREIGN COUNTRY
Students with Visas which require residency in a country outside the United States are required to pay a non-resident fee of $212 per unit plus an enrollment of $46 per unit, for a total of $258 per unit. In addition, students with visas are required to pay a capital outlay fee of $17.

Note: Fees Subject to change by the California legislature.

HEALTH FEE
The Los Angeles Community College District charges a $11.00 per semester (and a $8.00 per Summer or Winter Session) mandatory Health Fee payable at one Los Angeles Community College District campus only to cover the costs of the Student Health Center. Students may be exempted from paying the Health Fee if they are eligible for religious reasons. Contact the Vice President of Student Services for religious exemption procedures.

ACADEMIC POLICIES

GRADING SYMBOLS AND DEFINITIONS
Only the symbols in the grading scale given in this section shall be used to grade all courses offered in fulfillment of the requirements for an associate or baccalaureate degree, a certificate, diploma, or license.

Grades shall be averaged on the basis of the point equivalencies to determine a student’s grade-point-average, using the following evaluative symbols:

<table>
<thead>
<tr>
<th>SYMBOL</th>
<th>DEFINITION</th>
<th>GRADE</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent</td>
<td>4</td>
</tr>
<tr>
<td>B</td>
<td>Good</td>
<td>3</td>
</tr>
<tr>
<td>C</td>
<td>Satisfactory</td>
<td>2</td>
</tr>
<tr>
<td>D</td>
<td>Less than satisfactory</td>
<td>1</td>
</tr>
<tr>
<td>F</td>
<td>Failing</td>
<td>0</td>
</tr>
<tr>
<td>P</td>
<td>Pass (formerly Credit) (at least equal to a &quot;C&quot; grade or better – units awarded are not counted in GPA)</td>
<td></td>
</tr>
<tr>
<td>NP</td>
<td>No Pass (formerly No-Credit) equal to a &quot;D&quot; or &quot;F&quot; grade – units are not counted in GPA)</td>
<td></td>
</tr>
</tbody>
</table>

(P and NP grades may be given only in courses authorized by the District Pass/No Pass Options)

The following non-evaluative symbols may be entered on a student’s record:
Incomplete academic work for unforeseeable emergency and justifiable reasons at the end of the term may result in an “I” symbol being entered in the student’s record. The condition for removal of the “I” shall be stated by the instructor in a written record.

This record shall contain the conditions for removal of the “I” and a default grade to be assigned if missing work is not completed within one year from the end of the course. This record shall be given by the instructor, with a copy on file in the College Admissions Office until the “I” is made up or the one-year time limit has passed.

A final grade shall be assigned when the work stipulated has been completed and evaluated, or when the one-year time limit for completing the work has passed.

The “I” symbol shall not be used in calculating units attempted nor for grade points. THE “I” MAY BE MADE UP NO LATER THAN ONE YEAR FOLLOWING THE END OF THE TERM IN WHICH IT WAS ASSIGNED. The student may petition for a time extension due to unusual circumstances.

Note: Courses in which the student has received an Incomplete (“I”) may not be repeated unless the “I” is removed and has been replaced by a grade of “D” or “F”. This does not apply to courses which are repeatable for additional credit.

The “IP” symbol shall be used only in those courses which extend beyond the normal end of an academic term. “IP” indicates that work is “in progress,” but that assignment of a substantive grade must await its completion. The “IP” symbol shall remain on the student’s permanent record in order to satisfy enrollment documentation. The appropriate evaluative grade and unit credit shall be assigned and appear on the student’s record for the term in which the required work of the course is completed. The “IP” shall not be used in calculating grade-point-averages. If a student enrolled in an “open-entry, open-exit” course is assigned “IP” at the end of an attendance period and does not complete the course during the subsequent attendance period, the appropriate faculty will assign an evaluative symbol (grade) as specified above to be recorded on the student’s permanent record for the course.

The “RD” symbol may be assigned by the registrar only. It is to be used when there is a delay in reporting the grade of a student due to circumstances beyond the control of the student. It is a temporary notation to be replaced by a permanent symbol as soon as possible. “RD” is not used in calculating grade point averages.

Students may withdraw from a class or classes through 75% of the time the class is scheduled to meet. To withdraw, use the online Student Information System or the LATTC College website.

No notation ("W" or other) shall be made on the record of a student who withdraws before the no penalty drop date. The date is listed in the school’s term calendar, under last day to drop without a "W".

Withdrawal between the no penalty drop date (last day to drop without a "W") and 75% of the time the class is scheduled to meet, will result in a grade of "W". A student who remains in class beyond 75% of the time the class is scheduled shall be given a grade other than a “W”, except in cases of extenuating circumstances.

After 75% of the time the class is scheduled, the student may withdraw from class upon petition demonstrating extenuating circumstances and after consultation with the appropriate faculty. Students can download the petition online from the Admissions website under “forms”. Extenuating circumstances are verified cases of accidents, illness, or other circumstances beyond the control of the student. Withdrawal after 75% of the time the class is scheduled, which has been authorized in extenuating circumstances shall be recorded as “W”. The “W” shall not be used in calculating units attempted nor for the student’s grade-point average. “W’s” will be used as factors in progress probation and dismissal.

“Military Withdrawal” occurs when a student who is a member of an active or reserve United States military service receives orders compelling a withdrawal from courses. Upon petition from the student and verification of such orders, a “MW” may be assigned at any time after the no penalty drop date (last day to drop without a “W”). No notation ("W" or other) shall be made on the records of a student who withdraws before the no penalty drop date. Enrollment fees will be refunded with military withdrawals. Military withdrawals shall not be counted in progress probation and dismissal calculations.

**Pass/No Pass.**

The College President may designate courses in the College Catalog wherein all students are evaluated on a “Pass/No Pass” basis or wherein each student may elect, no later than the end of the first 30% of the term, whether the basis of evaluation is to be “pass/no pass” or a letter grade. These courses will be noted in the College Schedule as being eligible for the Pass/No Pass option.

1. **USAGE FOR SINGLE PERFORMANCE STANDARD** - The pass/no pass grading system shall be used in any course in which there is a single satisfactory standard of performance for which unit credit is assigned. A grade of Pass (P) shall be assigned for meeting that standard, and a grade of No-Pass (NP) shall be assigned for failure to do so.

2. **ACCEPTANCE OF CREDITS** - All units earned on a “Pass/No Pass” basis in accredited California institutions of higher education or equivalent out-of-state institutions shall be counted in satisfaction of community college curriculum requirements.

3. **RECORDING OF GRADE** - A student who is approved to be evaluated on the “Pass/No Pass” basis shall receive both course credit and unit credit upon satisfactory completion of the course. Satisfactory completion for credit is equivalent to the grade of “C” or better. A student who does not perform satisfactorily will be assigned a “No-Pass” (NP) grade.

4. **GRADE POINT CALCULATION** - Units earned on a “Pass/No Pass” basis shall not be used to calculate grade-point averages. However, units attempted for which “No Pass” (NP) is recorded shall be considered in probationary and dismissal procedures.
5. STANDARDS OF EVALUATION - The student who is enrolled in a course on a "Pass/No Pass" basis will be held responsible for all assignments and examinations required in the course and must meet the standards of evaluation which are identical for all students.

6. CONVERSION TO LETTER GRADE - A student who has received credit for a course taken on a "Pass/No Pass" basis may not convert this credit to a letter grade.

7. COURSE REPETITION - A student who has received a grade of "No Pass" (NP) may repeat the course by meeting the requirements set forth by the District Course Repetition to Improve Substandard Grades Policy.

8. CAMPUS PROCEDURE:

   • Certain courses are evaluated on a Pass/No Pass basis only. Letter grades may not be assigned for these courses.
   • In addition to courses mentioned above, a student has the option of selecting one course per semester to be graded on a Pass/No Pass basis. This option is available only for courses listed in the Schedule of Classes under "Courses Offered on a Pass/No Pass Basis."
   • Selection of courses to be taken on a Pass/No Pass basis must be made during the time indicated in the schedule. Late requests will not be accepted.
   • Once a course has been selected to be graded on a Pass/No Pass basis, a student cannot receive a letter grade for the course. The decision to take a course on this basis is irrevocable.
   • The general practice at most four-year colleges is not to accept "Pass/No Pass" grades for courses required for the major or preparation for the major. Consult with the University Transfer Center utc@lattc.edu and the intended university for policies.

Grades and Grade Changes

The instructor of the course shall determine the grade to be awarded to each student in accordance with the Grading Symbols and Definitions Policy. The determination of the student’s grade by the instructor is final in the absence of mistake, fraud, bad faith, or incompetency. The removal or change of an incorrect grade from a student’s record shall be done only upon authorization by the instructor of the course.

In the case of fraud, bad faith, or incompetency, the final determination concerning removal or change of grade will be made by the College President.

Students should file a petition for grade change in the Admissions and Records Office to have an instructor reevaluate a course grade, provided the grade in question was originally issued within the last year.

TRANSCRIPT

Upon written request of the student, a copy of the student’s academic record shall be forwarded to the student or his designee designatees by U.S. mail, electronically or another responsible forwarding agency.

A student or former student shall be entitled to two free copies of the transcript of his record or two free verifications of student records. Additional copies shall be made available to the student, or to an addressee designated by the student, at a cost of $3. Students may request special processing to expedite their request for an additional fee of $7 per transcript or verification. This option is subject to the College’s ability to provide this service. Requests for transcripts or verifications may be obtained online. Transcripts from another institution are not available for copying.

The student’s transcript and/or verification of enrollment may be withheld if 1) any library books or other library materials are charged to the student and are unreturned, 2) there are any unpaid fees or charges due to the College, or 3) any other unreturned college property. The transcript may be withheld until these obligations of the student to the College are discharged.

Academic Renewal (Board Rule 6705)

Students may petition for an academic renewal action in order to alleviate substandard academic performance under the following conditions:

• Students must have achieved a grade point average of 2.5 in their last 15 semester units, or 2.0 in their last 30 semester units completed at any accredited college or university.
• At least one calendar year must have passed since the course work to be removed was completed.

Granted, academic renewal shall result in:

• Eliminating up to 30 semester units of coursework taken within the Los Angeles Community College District from consideration in the student’s cumulative grade point average, and
• Annotating the student academic record to note which courses have been removed through academic renewal. Academic renewal actions are irreversible.

Repetitions and Withdrawals

Effective Summer 2012, course withdrawal ("W") and/or a substandard grade ("D," "F," or "NP") count as an attempt at a course. Only three attempts at any one course will be allowed, with some exceptions. Listed below are the new rules that all students need to know about.

• Students who drop or are excluded after the last day to drop without a grade of "W" will have a "W" appear on their transcript. The "W" will count as an attempt for that course.
• A course in a student’s transcript which currently shows a recorded "W" counts as an attempt for that course.
Course Repetition: Special Circumstances

Repetition of courses for which a satisfactory grade ("A", "B", "C", "CR", "P") has been recorded shall be permitted only upon advance petition of the student and with the written permission from the college president, or designee, based on a finding that extenuating circumstances exist which justify such repetition or that there has been a significant lapse of time since the student previously took the course. Significant lapse of time is defined as no less than 36 months since the most recent grade was awarded.

When course repetition under this section occurs, the student's permanent academic record shall be annotated in such a manner that all work remains legible, ensuring a true and complete academic history.

Grades awarded for courses repeated under the provisions of subsection "a" and "b" of this section shall not be counted in calculating a student's grade point average.

When such repetition is necessary for a student to meet a legally mandated training requirement as a condition of continued paid or volunteer employment, such courses may be repeated for credit any number of times, and the grade received each time shall be included for purposes of calculating the student's grade point average. The college shall establish policies and procedures requiring students to certify or document that course repetition is necessary to complete legally mandated training pursuant to this subsection. The college's process for certification or documentation of legal training requirements shall be developed in accordance with the provisions of Chapter XVIII of the Board Rules -- ACADEMIC SENATE AND BOARD OF TRUSTEES SHARED GOVERNANCE POLICY.

A student may repeat any course if the college has properly established a recency prerequisite for a course, if there has been "significant lapse of time." In no instance shall this be less than three years.

A student with a disability may repeat a class any number of times, if such repetition is required as a disability-related accommodation for that particular student.

(Board Rule 6704.30. See Title 5, C.C.R., Sections 55763 and 58161)

Board Rule 6701.10

Acceptance of Pass Credits: All courses and units used to satisfy LACCD curriculum requirements, including graduation requirements (Chapter VI, LACCD Board Rules), educational program requirements (Board Rule 6708) and transfer core curriculum requirements (Board Rule 6600), shall be from accredited institutions, unless otherwise specified in this Board Rule.

For purposes of this Board Rule, “accredited institution” shall mean a postsecondary institution accredited by an accreditation agency recognized by either the U.S. Department of Education or the Council on Postsecondary Accreditation. It shall not mean an institution “approved” by the California Department of Education or by the California Council for Private Postsecondary and Vocational Education.

Courses which have a grade of “C- (C minus grade)” do not satisfy any LACCD curriculum requirement that requires a grade of “C” or higher.

Transfer Credit Policy

Transfer credit for lower division courses taken at regionally accredited institutions of higher education in the United States is accepted toward Associate Degrees or Certificates. Students must provide official transcripts. Please have your school(s) mail them directly to Admissions & Records.

Students should make an appointment with a counselor for transcript evaluation.

Disclaimer: Every effort has been made to ensure the articulation information for the California State Universities and the University of
California institutions are accurate, including the CSU GE and IGETC areas. However, this information is unofficial and should be checked against the official information found on the ASSIST website at www.assist.org.

FOREIGN TRANSCRIPT CREDIT POLICY
Students who have completed college level courses at schools outside the United States may petition for an unlimited number of lower division units of credit toward an Associate Degree or Certificate under the following conditions:

1. Students must submit a detailed evaluation from an approved evaluation service. Students are responsible for the cost of this service.
2. The foreign university or college must have been approved by that country’s Ministry of Education at the time the student attended.
3. No courses taken outside the United States may be used to satisfy the Associate Degree’s Reading and Written Expression or Oral Communication requirement.
4. No course may be used to satisfy the Associate Degree’s American Institutions requirement.
5. In cases where equivalent course credit is not granted, elective credit may be awarded.

Students should make an appointment with a counselor for a transcript evaluation.

Credit for Advanced Placement (AP)
The College offers credit for scores of 3 or better on a variety of College Board Advanced Placement Exams. Students should file an Academic Petition in the Admission Office, JH-Lobby and have an official copy of their test results sent to the college.

College Level Examination Program (CLEP) -
The college grants credit for scores of 50 points (or 50%) or better on a variety of CLEP examinations. Students should contact counseling (JH-416) or Admissions (Juniper Hall, room ST-416) for additional information.

(Credit Rules, Chapter VI Article VII)

CREDIT FOR MILITARY SERVICE TRAINING - Students who are currently serving in or have served in the military service should, after successful completion of at least one course with the Los Angeles Community Colleges, request an evaluation of credit earned through military service training schools and/or military occupational specialties.

PREREQUISITE POLICY
Many courses listed in the class schedule will indicate suggested prerequisite, co-requisite, concurrent enrollment or recommended preparation/advisory listed after the name of the course. These recommendations were made after careful consideration by the faculty of that department. The Los Angeles Community College District has adopted a policy based upon a model developed by the State Chancellor’s Task Force in conjunction with the State Academic Senate and Chief Instructional Officers and based upon Title V Article 2.5 Section 55200 and Article 4 Section 55530 of the Matriculation Regulations. In other words, your success is our primary goal.

PREREQUISITE is a condition that a student has to meet prior to enrolling in the class. Completion of the prerequisite demonstrates that you are ready and able to succeed in the course you want to take. A prerequisite is usually either another course, or a specific test score on a standardized test.

CO-REQUISITE - is a course that must be taken at the same time as the course you want to take.

ADVISORY OR RECOMMENDED PREPARATION - means that you are advised, but not required, to have taken the course(s) or met the test scores before enrolling in the class.

You can satisfy a prerequisite several ways:

1. Take the prerequisite course at LATTC or another college in the District and achieve a grade of “C” or better, so that it shows on your transcript;
2. Provide proof that you’ve successfully completed the requirement(s) at another college. You can bring official transcripts or assessment scores from another school to the Assessment Center and they will be reviewed. Please provide the Assessment Center with a copy of your proof. If your course is approved, you’ll be given a clearance to register. Please note: Prerequisite Clearance may take up to 10 business days.
3. Take a test-known as a Challenge Exam-to demonstrate that you have the knowledge and skills necessary to successfully prepare you for the course you want to take. Please submit challenge exam one month prior to the start of the term you plan to take the course.
4. If the course you want to take has an assessment test scores as prerequisite, you’ll need to visit the Assessment Center and complete the required test. Your score will then be given to you, and the prerequisites(s) will be cleared once you receive a copy of your placement score(s).

If you have any questions or need more information, please contact the Assessment Center at (213) 763-7539 (MA 01).

Prerequisite Challenge Process
Prerequisites, co-requisites/concurrent enrollment requirements must be followed. If you do not agree with the requirement made by the faculty, you have the right to challenge. Contact the Assessment Center for the challenge process procedures and form. Once a challenge form is submitted, the committee will review your request and documentation. You will be notified within five (5) working days of the final decision.

Challenge Process Information:

1. Complete the Challenge Application; provide an explanation and supporting documentation for your reason to challenge. You will need to present a valid photo ID to the Assessment proctor at the time of challenging.
2. Complete the Subject Exam of the prerequisite course you are challenging. This exam is to be completed in the Assessment Center in MA-001.
3. This is a one-time test. You will not be given any credit or grade for successfully passing the Challenge Exam. You will need to receive at least 70% to pass. If you are challenging several levels within the same subject you will need to pass the first test before you can challenge the next level.
4. Once you have completed the Challenge Exam it will be reviewed for approval by the Challenge Committee.
5. The Assessment Center along with the committee has five business days (working) to notify you of your results. The committee consists
of the following: Student Services Dean, General Counselor, and a Faculty of the subject you are challenging. Once your challenge results are in, you will be notified by phone or in-person. You will also receive a copy of the challenge application for your records.

6. Deadline to challenge: If you plan to enroll for the course in the most current term you will need to complete the challenge exam one month before the semester begins. Otherwise, you will need to wait for the next semester to enroll in the course.

Your rights entitle you to file a "Challenge Form" to challenge any prerequisite if you believe one or more of the following:

1. I have the knowledge, ability or skill to succeed in the course despite not meeting the prerequisite or co-requisite.
2. I will be subject to undue delay in attaining the goal of my educational plan because of the enrollment limitation, or because the prerequisite or co-requisite course has not been made reasonably available.
3. The prerequisite or co-requisite has not been established in accordance with applicable college policies and procedures.
4. The prerequisite or co-requisite is in violation of Title 5, Section 55200-55202 of the California Code of regulations.
5. The prerequisite or co-requisite, or enrollment limitation is either unlawfully discriminatory or is being applied in an unlawfully discriminatory manner.
6. The basis upon which the college established the enrollment limitation does not exist. Note: You have the right to participate in all activities related to matriculation components whether eligible for exemption or not. The matriculation program is our plan to ensure your success. For more information contact the Assessment Center, MA-001, 213-763-6339.

ACADEMIC PROBATION AND DISMISSAL

Academic Standards for Probation

The following standards for academic and progress probation shall be applied as required by regulations adopted by the Board of Governors of the California Community Colleges. Probation shall be determined based on student course work dating from Fall 1981; course work completed prior to Fall of 1981 is excluded from dismissal calculations.

REMOVAL FROM PROBATION

A student shall be removed from probation when the cumulative percentage of units in this category drops below fifty percent (50%).

UNITS ATTEMPTED

"Units Attempted," for purposes of determining probation status only, means all units of credit in the current community college of attendance for which the student is enrolled.

EFFECTS OF PROBATION

Board of Governors (BOG) fee waiver - loss of eligibility

A student eligible to receive a BOG fee waiver shall lose eligibility if they are placed on academic or progress probation for two consecutive semesters. Loss of eligibility shall become effective at the first registration opportunity after such determination is made. Foster youth, or former foster youth under the age of 24, are exempt from the loss of fee waiver due to academic or progress probation. Appeal Probation and Loss of Fee Waiver A student who is placed on academic or progress probation may submit a written appeal in compliance with regulations issued by the Chancellor. Appeal the loss of BOG fee waiver. A student who has lost the BOG fee waiver due to academic standing may submit a written appeal of that standing in accordance with existing regulations issued by the Chancellor.

ACADEMIC STANDARDS FOR DISMISSAL

A student shall be subject to dismissal and subsequently be dismissed under the conditions set forth within this section. Dismissal shall be determined based on student course work dating from Fall 1981; course work completed prior to Fall of 1981 is excluded from dismissal calculations.

ACADEMIC PROBATION

- A student on academic probation for a grade point deficiency shall be removed from probation when the student’s cumulative grade-point-average is 2.0 or higher.

PROGRESS PROBATION

- A student on progress probation because of an excess of units for which entries of No Pass (NP), formerly No Credit, Incomplete (I), and/or Withdrawal (W) are recorded shall be removed from probation when the cumulative percentage of units in this category drops below fifty percent (50%).

ACADEMIC PROBATION - A student on academic probation for a grade point deficiency shall be removed from probation when the student’s cumulative grade-point-average is 2.0 or higher.

PROGRESS PROBATION - A student on progress probation because of an excess of units for which entries of No Pass (NP), formerly No Credit, Incomplete (I), and/or Withdrawal (W) are recorded shall be removed from probation when the cumulative percentage of units in this category drops below fifty percent (50%).

PROGRESS PROBATION

A student on progress probation shall be subject to dismissal if the student has earned a cumulative grade point average of less than 2.0 in all units attempted in each of 3 consecutive semesters. A student who is on academic probation and earns a semester grade-point-average of 2.0 or better shall not be dismissed as long as this minimum semester grade-point-average is maintained.

TRANSFER STUDENT

The student has met the conditions of academic or progress probation at another college within the Los Angeles Community College District.
ACADEMIC FREEDOM

The Board of Trustees reaffirms its commitment to academic freedom, but recognizes that academic freedom does not allow prohibited discrimination. The discussion of ideas, taboos, behavior or language which is an intrinsic part of the course content shall in no event constitute Prohibited Discrimination, though such ideas may cause some students discomfort. It is recognized that academic freedom insures the faculty’s right to teach and the student’s right to learn.

CAMPUS SECURITY ACT

As required by the federal Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (“Clery Act”), the college’s Annual Security Report contains policy statements and crime statistics for the campus. The Annual Security Report includes statistics for the previous three years concerning certain reported crimes that occurred on campus, in off-campus buildings or property owned or controlled by the college, and on public property within or immediately adjacent to the college. The report also includes institutional policies concerning campus safety and security, such as policies on drug and alcohol use, crime prevention, the reporting of crimes, sexual assault, and emergency response and evacuation procedures. You may obtain the college’s Annual Security Report online at http://college.lattc.edu/sheriff/crime-reporting-procedures/annual-security-report/ You may also request a paper copy by contacting the Office of the Vice President of Administrative Services, Juniper Hall (JH), ST 305.

ACADEMIC AND ADMINISTRATIVE PETITIONS

Students should file an Academic Petition form when they are requesting assistance with: course repetition, course substitution, enrollment in more than 19 units, catalog rights and other related concerns. The petition forms may be obtained from the Counseling Office. Petitions must be signed by a counselor before submittal to the Admissions and Records Office. Specific petition forms are available for requesting permission for: grade changes, Credit By Examination, and lining out non-passing grades that have been successfully repeated.

APPEAL OF DISMISSAL

A student who is subject to dismissal may appeal to the Dean of Admissions and Records. Dismissal may be postponed and the student continued on probation if the student shows significant improvement in academic achievement but has not been able to achieve to a level that would meet the requirements for removal from probation.

DISMISSAL

A student who is subject to dismissal, and who has not been continued on probation through the appeal process, shall be notified by the College President, or designee, of dismissal which will become effective the semester following notification. Dismissal from any one college in the District shall disqualify a student from admission to any other college in the District.

READMISSION AFTER DISMISSAL

A student who has been dismissed may request reinstatement after two semesters have elapsed. The student shall submit a written petition requesting readmission to the College in compliance with College procedures. Readmission may be granted, denied, or postponed subject to fulfillment of conditions prescribed by the College.

STUDENT INFORMATION AND COLLEGE POLICIES

ACADEMIC AND ADMINISTRATIVE PETITIONS

Students should file an Academic Petition form when they are requesting assistance with: course repetition, course substitution, enrollment in more than 19 units, catalog rights and other related concerns. The petition forms may be obtained from the Counseling Office. Petitions must be signed by a counselor before submittal to the Admissions and Records Office. Specific petition forms are available for requesting permission for: grade changes, Credit By Examination, and lining out non-passing grades that have been successfully repeated.

DRUG-FREE WORKPLACE POLICY

The Los Angeles Community College District is committed to drug-free and alcohol-free campuses. Students and employees are prohibited from unlawfully possessing, using or distributing illicit drugs and alcohol on District premises, in District vehicles, or as part of any activity of the District or colleges of the District.

LACCD BOARD RULE 9803.19: Alcohol and Drugs. Any possession of controlled substances which would constitute a violation of Health and Safety Code section 11350 or Business and Professions Code section 4230, any use of controlled substances which would constitute a violation of Health and Safety Code section 11350, or use of controlled substances the possession of which are prohibited by the same, or any possession or use of alcoholic beverages while on any property owned or used by the District or colleges of the District or while participating in any District or college-sponsored function or field trip. “Controlled substances,” as used in this section include, but are not limited to, the following drugs and narcotics:

- a. opiates, opium and opium derivatives
- b. mescaline
- c. hallucinogenic substances
- d. peyote
- e. marijuana
- f. stimulants and depressants
- g. cocaine

EQUAL EMPLOYMENT OPPORTUNITY

The policy of the Los Angeles Community College District is to implement affirmatively, equal opportunity to all qualified employees and applicants for employment without regard to race, color, national origin, ancestry, religion, creed, sex, age, handicap, marital status, medical condition (cancer related), sexual orientation, or veteran status. Positive action will be taken to ensure that this policy is followed in all personnel practices, including recruitment, hiring, placement, upgrading, transfer, demotion, treatment during employment, rate of pay or other forms of compensation, selection for training, layoff, or termination. A vigorous Equal Employment Opportunity Program will be maintained to ensure appropriate utilization of certain protected groups in specific areas and levels within the district workforce through the implementation of specific results-oriented procedures and
Admissions and Academic Policies

FREEDOM OF SPEECH AREA AND PROCEDURES

Following Board Rule 9902, Article IX, the College President shall designate an area or areas on the college campus as areas for free discussion and expression by all persons. A Free Speech Area may only be located where there is a normal flow of student traffic with unlimited accessibility. Necessary campus rules governing the operation of such areas shall govern only the time, place and manner in which said areas are to be used. All such rules shall be applied equally and fairly to all persons desiring to use the Free Speech Areas. No restrictions shall be placed on subject matter, topics or viewpoints expressed in Free Speech Areas.

In compliance with the Board Rule, the college president has designated the Cedar Hall-Mall Quad as the Free Speech Area. All individuals or organizations wanting to use the Free Speech Area must complete an application and obtain approval from the Office of Student Life, located in Redwood Hall, C-107, prior to use of this area. The guidelines and rules for use of this area, along with time, place, manner will be distributed to the interested party. This procedure does not apply to activities sponsored by the college.

GRADUATION RATES

More information about Student Right-to-Know Rates can be found at the California Community Colleges “Students Right-to-Know Rates Information Clearinghouse Website” located at http://srtk.cccco.edu/index.asp.

PENALTIES FOR COPYRIGHT INFRINGEMENT AND ILLEGAL FILE SHARING

Unauthorized distribution of copyrighted material, including unauthorized peer-to-peer may subject students to civil and criminal liability. Civil liability for copyright infringement may include payment of monetary damages to the copyright owner. Criminal penalties for copyright infringement may include fines up to $250,000 and imprisonment up to ten years. Students who violate the District’s computing facilities usage policy (LACCD Administrative Regulation B-28) may also be subject to college disciplinary action, including, but not limited to, suspension or expulsion.

LIMITED ENGLISH PROFICIENCY

Occupational education classes are open to all students. Although the lack of proficiency in English is not a barrier to enrollment in occupational education courses, it is recommended that students needing remedial English assistance utilize the services of the college that are provided for persons who are limited in English proficiency or have English as a second language as a bridge for entry into the vocational program.

NODISCRIMINATION POLICY

All programs and activities of the Los Angeles Community College District shall be operated in a manner which is free of discrimination on the basis of race, color, gender, national origin, ancestry, religion, creed, pregnancy, marital status, medical condition (cancer related), gender orientation, age, disability, or veteran status (Reference: Board Rule 1202). Inquiries regarding discrimination issues should be directed to the Office of the LATTC Ombusperson. Inquiries relating to disabilities and special accommodations per the Americans with Disabilities Act should be directed to the Office of Disabled Students Programs and Services (DSPS), (213) 763-3773, TDD (213) 763-5375.

POLÍTICA SIN DISCRIMINACIÓN

Los Angeles Community College District ofrece igualdad de oportunidades en todos los programas y actividades educativas, libre de discriminación en cuanto se refiere a raza, color, lugar de origen, ascendencia, religión, creencias, sexo, estado de gestación, estado civil, estado de salud (tratándose de cáncer), orientación sexual, edad, incapacidad física o estado como veterano. (Referencia: Board Rule 1202). Las indagaciones o quejas acerca de la discriminación deberán ser dirigidas a la Oficina del Ombusperson. Las indagaciones relacionadas con la incapacidad o arreglos especiales para incapacitados, según el Acta para Americanos Incapacitados, deberán ser dirigidas a los Programas y Servicios a Estudiantes Incapacitados, al teléfono (213) 763-3773 y para Medios de Telecomunicación para sordo-mudos o TDD al teléfono (213) 763-5375.

OPEN ENROLLMENT

Unless specifically exempted by law, every course for which state funding is claimed is fully open to any person who has been admitted to the College and who meets the appropriate academic prerequisites.

SEXUAL ASSAULT

In compliance with AB 1088, the Los Angeles Community College District is committed to providing a safe environment for its students, faculty, and staff. The Los Angeles Community College District Board of Trustees condemns any act of sexual assault committed on any of its facilities. In the event of sexual assault committed on the grounds or in facilities maintained and/or used by the District, any victim of a sexual assault who is one of the District’s students, faculty, staff, or visitors shall promptly receive appropriate treatment and full and accurate information. Individuals who commit sexual assault while on properties within the control of the District shall be subject to appropriate criminal prosecution and/or District disciplinary procedures. Confidentiality is fundamental to all aspects of cases dealing with sexual assault. The names of sexual assault victims shall not be revealed by persons responsible for implementing and enforcing the provisions of this Chapter, except with the consent of the victim. District Office of Equal Employment Opportunity/Diversity (213) 891-2315 or College Sheriff (213) 763-3800.

FAMILY EDUCATION RIGHTS AND PRIVACY ACTS

The Family Educational Rights and Privacy Act (FERPA) affords students the following rights with respect to their educational records:

- The right to inspect and review the student’s education records within 45 days of the day the college receives a request for access.

Students may submit to the College Admissions Office written requests that identify the specific record(s) they wish to inspect. Within 45 days, the College Admissions Office will make arrangements for access and will notify the student of the time and place where the records may be inspected.

Educational records are those records that are directly related to students and are maintained by the College. Students may not inspect education records pertaining to parents’ financial records and certain confidential letters or recommendations.
• The right to request an amendment of the student’s educational records which the student believes to be inaccurate, misleading or otherwise in violation of the student’s privacy rights.

With the exception of grade grievances, which are handled through Administrative Regulation E-55, students may ask the College President, or his/her designee to amend a record that they believe is inaccurate, misleading, or in violation of their privacy rights. A student seeking to amend an educational record should write to the College President and clearly identify the part of the record he/she wants changed, and specify why it is inaccurate, misleading, or in violation of his/her privacy rights.

If the College President, or his/her designee, decides not to amend the record as requested by the student, the College, in accordance with section 99.21 of the Code of Federal Regulations and section 76232 of the Education Code, will notify the student of the decision and of his/her right to a hearing.

The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA and California law authorize disclosures without consent.

If a student authorizes the release of his/her education record to a third party, he/she shall provide a dated written consent to the College Admissions Office authorizing said release with a specific list of the information to be released.

Federal and California law authorize certain disclosures of personally identifiable information without a student’s written consent. One such exception is the disclosure of personally identifiable information to school officials with legitimate educational interests. School officials with legitimate educational interests are employees or agents of the Los Angeles Community College District who need to review educational records in order to fulfill their professional responsibilities.

The right to restrict disclosure of personally identifiable information that the College has designated as directory information which may be released without the written consent of the student.

Directory information may be disclosed without a student’s consent unless the student has notified the college that he/she does not want all or portions of the directory information released. To do so, the student must submit the appropriate District form to the College Admissions Office requesting that some or all of the categories of directory information not be released without his/her consent. This form must be submitted in accordance with College policy.

Pursuant to Board Rule 5201.10, the Los Angeles Community College District has designated the following student information as directory information:

The student’s name, city of residence, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, and the most previous educational agency or institution attended by the student;

Student employee records may be released in order to comply with collective bargaining agreements;

• The names, addresses and telephone numbers of students or former students may be released to the College Foundation for each college for college-related activities at the discretion of the College President, unless the student or former student has informed the College that such information should not be released. The release of this information is conditioned upon the College Foundation’s agreement that such information will be released in accordance with District policy and that information will not be released to third parties;

• At the discretion of the College President, the names, addresses and telephone numbers of students from the College may be released to heads of private or public institutions of higher education, or their designees, for the purpose of providing information to students regarding transfer opportunities to those institutions, unless the student has indicated that such information should not be released. The release of this information will be conditioned upon the institution’s agreement that student privacy rights under federal and state law will be protected and that information will not be released to third parties.

• The right to file a complaint with the U.S. Department of Education concerning alleged failures by the College to comply with the requirements of FERPA.

The name and address of the office that administers FERPA are: Family Policy Compliance Office U.S. Department of Education 400 Maryland Avenue, SW, Washington, DC 20202-4605

For more information on student rights under the FERPA, please go to our Los Angeles Community College District www.laccd.edu/About/Documents/AdministrativeRegulations-E-105.pdf.

CONFLICT RESOLUTION - INFORMAL PROCESS

The College has an approved student conflict resolution process. If there is a conflict or issue between a student and an instructor, the student is to complete the required form at the following link - http://college.lattc.edu/studentrights/conflict-resolution/. The Department Chairperson over the area will respond to your request within two business days (Monday-Friday) regarding your situation.

If you have a non-classroom complaint please complete the online form at http://college.lattc.edu/studentservices/student-complaint/grievance-form/. If the issue is not resolved informally then students can submit a formal grievance.

IF YOUR COMPLAINT IS AGAINST: .................................. CONTACT:

FACULTY.......................... DEPARTMENT CHAIR OVER

THE AREA (SEE LISTING IN SECTION 1)

ALL OTHER COMPLAINTS................................. COLLEGE

OMBUDSMAN OMBUDSPERSON@LATTCE.DU (JUNIPER HALL - ST-532)

STUDENT GRIEVANCE PROCEDURES - FORMAL PROCESS

The purpose of the Student Grievance Procedures is to provide a prompt and equitable means for resolving student grievances, per Board Rules 91101-91102.

The grievance procedure may be initiated by one or more students who reasonably believe he/she/they have been subject to unjust action or denied rights involving their status or privileges as students. It is the responsibility of the student(s) to submit proof of alleged unfair or improper action. Grievances pertaining to grades are subject to the CA Education Code Section 76224(a).

The procedures enumerated in Administrative Regulation E-55 shall be available to any student or applicant for admission, who believes a College decision or action has adversely affected his or her status, rights, and/or privileges as a student. The procedures shall include, but not be limited to, alleged violations of Title IX of the Higher Education Amendments of 1972 (and applicable regulations), and grievances relating to course grades to the extent permitted by Education Code Section 76224(a). Section 76224(a) provides:

“When grades are given for any course of instruction taught in a community college district, the grade given to each student shall be the grade determined by the instructor of the course, in the absence of mistake, fraud, bad faith, or incompetency, shall be final.”

For additional information regarding the procedures for filing a student grievance, or for copies of the adopted Student Grade Grievance Procedures, contact the Campus Ombudsperson.
Discrimination and Harassment Grievances

All programs and activities of the Los Angeles Community College District shall be operated in a manner which is free of discrimination on the basis of ethnic group identification, race, color, national origin, ancestry, religion, creed, sex, pregnancy, marital status, medical condition (cancer-related), sexual orientation, age, physical or mental disability (including AIDS) as defined by Section 504 of the Rehabilitation Act of 1973, or veteran status (Reference: Board Rule 1202).

Most complaints, grievances or disciplinary matters should be resolved at the campus level. This is the quickest and most successful way of resolving issues involving a California Community College (CCC). You are encouraged to work through the campus Conflict Resolution process before escalating issues to the formal complaint process.

The specific rules and procedures for grievances relating to discrimination and harassment and for pursuing available remedies are incorporated in the LACCD Board Rules, Chapter XV, B.R. 1501-1522. Copies of the policy may be found on the LATTCC Compliance Office website or obtained from the Director of Diversity Programs, Gene Little at (213) 891-2317 or http://www.laccd.edu/Departments/DistrictResources/OfficeOfDiversity/Pages/default.aspx.

STATE COMPLAINT PROCESS

Final regulations published October 29, 2010, and effective July 1, 2011, included in the State Authorization section of the package a new requirement that eligible institutions have and disclose a state administered complaint process (HEA Title IV, CFR, Sections 600.9 and 668.4(3)(b)). The intention behind the new requirement is that students and others have a method and process outside of the institution that takes, investigates and responds to complaints regarding the institution. For more information regarding the State Complaint Process, please go to http://californiacommunitycolleges.cccco.edu/complaintsForm.aspx.

STUDENT RECORDS AND DIRECTORY INFORMATION

The Los Angeles Community College District, in compliance with Federal and State law, has established policies and procedures governing student records and the control of personally identifiable information. The Los Angeles Community College District recognizes that student records are a confidential matter between the individual student and the College. At the same time the District has a responsibility to fulfill public information needs (i.e., information about students participating in athletics, announcement of scholarships and awards, etc.). To meet this responsibility the District may release Directory Information unless the student states in writing that he or she does not want it released. The responsibility for carrying out these provisions is charged to the Dean of Admissions and Records, designated by the chief administrative officer on each campus. The Registrar may be contacted via the Office of Admissions. Copies of Federal and State laws and District policies and procedures are maintained by the Dean and are available for inspection and inquiry.

All student records maintained by the various offices and departments of the College, other than those specifically exempted by law, are open to inspection by the student concerned. The accuracy and appropriateness of the records may be challenged in writing to the Dean. A student has the right to receive a copy of his or her record, at a cost not to exceed the cost of reproduction. (Requests for transcripts should be made directly to the Office of Admissions & Records).

No student records, including Directory Information, will be released without the written consent of the student concerned except as authorized by law. A log of persons and organizations requesting or receiving student record information is maintained by the Registrar. The log is open to inspection only to the student and the community college official or his or her designee responsible for the maintenance of student records.

Directory Information includes the student’s name, city of residence, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, and the most recent previous educational agency or institution attended by the student. This information will not be released to anyone if the student marks “NO” on question “permission to Release Student Information” on the College Application or if the student marks “NO” on the College’s Release of Directory Information form. This form is available in the Admissions and Records Office.

In addition, under federal law, the military is entitled to receive the following student information for recruitment purposes: student directory information as defined above, student address, telephone number, date and place of birth, and major field of study. This information will not be released to the military if the student marks “NO” on question “permission to Release Student Information” on the College Application or if the student marks “NO” on the College’s Release of Directory Information form.

All inquiries regarding student records, Directory Information, and policies for records access, release, and challenge should be directed to the Dean via the Office of Admissions. Students have the right to file a complaint with the United States Department of Education concerning alleged violations of Federal and State laws governing student records.

STUDENT RIGHT-TO-KNOW

Student Right-To-Know refers to the Student Right-To-Know and Campus Security Act of 1990 (P.L. 101-542), which requires colleges and universities participating in Federal financial aid programs to disclose information about completion and transfer rates. The intent is to provide prospective students a statistic of comparable effectiveness that they can use to determine their college of choice. Los Angeles Trade-Technical College in compliance with the Federal Student Right-To-Know and Campus Security Act of 1990 provides access to the following sites:

- Consumer Information: http://college.lattc.edu/about-lattc/consumer-information/
- Student-related data: http://college.lattc.edu/research/accountability/student-right-to-know-act/
- LATTCC and other California community colleges’ completion and transfer rates: http://srtk.cccco.edu/index.asp

STANDARDS OF CONDUCT

BOARD RULE 9803

A student enrolling in one of the Los Angeles Community Colleges may rightfully expect that the faculty and administrators of the colleges will maintain an environment in which there is freedom to learn. This requires that there be appropriate conditions and opportunities in the classroom and on the campus. As members of the college community, students should be encouraged to develop the capacity for critical judgment and to engage in the sustained and independent search for truth. All persons shall respect and obey civil and criminal law, and shall be subject to legal penalties for violation of laws of the city, county, state and nation.

All visitors making use of the facilities or grounds of any college of the District will be asked to sign a statement that they have received the Standards of Conduct and the rules relating to campus visitors adopted by the Board of
Trustees. A signature will not be a prerequisite to activities on campus. A record will be kept of all persons who use the facilities or grounds of the college.

Conduct in all of the Los Angeles Community Colleges must conform to District and college rules and regulations. Violations of such rules and regulations may result in disciplinary action depending on the individual’s status as student, faculty, staff or visitor. Violations of conduct on campus rules and regulations include but are not limited to the following:

**Board Rule 9803.10**
Willful Disobedience Willful disobedience to directions of College officials acting in the performance of their duties.

**Board Rule 9803.11**
Violation of College Rules and Regulations Violation of College rules and regulations, including those concerning student organizations, the use of College facilities, or the time, place, and manner of public expression or distribution of materials.

**Board Rule 9803.12**
Dishonesty Dishonesty, such as cheating, or knowingly furnishing false information to the colleges.

**Board Rule 9803.13**
Unauthorized Entry Unauthorized entry to or use of the college facilities.

**Board Rule 9803.14**
College Documents Forgery, alteration, or misuse of college documents, records, or identification.

**Board Rule 9803.15**
Disruption of Classes Obstruction or disruption of classes, administration, disciplinary procedures, or authorized college activities.

**Board Rule 9803.16**
Theft of or Damage to Property Theft of or damage to property belonging to the college, a member of the college community, or a campus visitor.

**Board Rule 9803.17**
Interference With Peace of College The malicious or willful disturbance of the peace or quiet of any of the Los Angeles Community Colleges by loud or unusual noise, or any threat, challenge to fight, fight, or violation of any rules of conduct as set forth in this Article. Any person whose conduct violates this section shall be considered to have interfered with the peaceful conduct of the activities of the college where such acts are committed.

**Board Rule 9803.18**
Assault or Battery Assault or battery, abuse or any threat of force or violence directed toward any member of the college community or campus visitor engaged in authorized activities.

**Board Rule 9803.19**
Alcohol and Drugs Any possession of controlled substance which would constitute a violation of Health and Safety Code section 11350 or Business and Professions Code section 4230, any use of controlled substances the possession of which are prohibited by the same, or any possession or use of alcoholic beverages while on any property owned or used by the District or colleges of the District. “Controlled substances,” as used in this section, include but are not limited to the following drugs and narcotics:

- opiates, opium and opium derivatives
- mescaline
- hallucinogenic substances
- peyote
- marijuana
- stimulants and depressants
- cocaine

**Board Rule 9803.20**
Lethal Weapons Possession, while on a college campus or at a college-sponsored function, of any object that might be used as a lethal weapon is forbidden for all persons except sworn peace officers, police officers, Sheriff, and other governmental employees charged with policing responsibilities.

**Board Rule 9803.21**
Discriminatory Behavior Behavior while on a college campus or at a college-sponsored function, inconsistent with the District’s non-discrimination policy, which requires that all programs and activities of the Los Angeles Community College District be operated in a manner which is free of discrimination on the basis of race, color, national origin, ancestry, religion, creed, sex, pregnancy, marital status, sexual orientation, age, handicap or veteran status.

**Board Rule 9803.22**
Unlawful Assembly Any assemblage of two or more persons to 1) do an unlawful act, or 2) do a lawful act in a violent, boisterous or tumultuous manner.

**Board Rule 9803.23**
Conspiring to Perform Illegal Acts Any agreement between two or more persons to perform illegal acts.

**Board Rule 9803.24**
Threatening Behavior A direct or implied expression of intent to inflict physical or mental/emotional harm and/or actions, such as stalking, which a reasonable person would perceive as a threat to personal safety or property. Threats may include verbal statement, written statements, telephone threats or physical threats.

**Board Rule 9803.25**
Disorderly Conduct Conduct which may be considered disorderly includes; lewd or indecent attire or behavior that disrupts classes or college activities; breath of the peace of the college; aiding, or inciting another person to breach the peace of the college premises or functions.

**Board Rule 9803.26**
Theft or Abuse of Computer Resources Theft or abuse of computer resources including but not limited to:

- Unauthorized entry into a file to use, read, or change the contents, or for any other purpose.
- Unauthorized transfer of a file.
Admissions and Academic Policies

- Unauthorized use of another individual's identification and password.
- Use of computing facilities to interfere with the work of a student faculty member or college official, or to alter college or district records.
- Use of unlicensed software.
- Copying of software.
- Use of computing facilities to access, send or engage in messages which are obscene, threatening, defamatory, present a clear and present danger, violate a lawful regulation and/or substantially disrupt the orderly operation of a college campus.
- Use of computing facilities to interfere with the regular operation of the college or district computing system.

Board Rule 9803.27
Performance of an Illegal Act Conduct while present on a college campus or at a location operated and/or controlled by the District or at a District-sponsored event, which is prohibited by local, State, or federal law.

Board Rule 9803.28
Academic Dishonesty Violations of Academic Integrity include, but are not limited to, the following actions: cheating on an exam, plagiarism, working together on an assignment, paper or project when the instructor has specifically stated students should not do so, submitting the same term paper to more than one instructor, or allowing another individual to assume one’s identity for the purpose of enhancing one’s grade.

Board Rule 9804
Interference with classes Every person who, by physical force, willfully obstructs, or attempts to obstruct, any student or teacher seeking to attend or instruct classes at any of the campuses or facilities owned, controlled or administered by the Board of Trustees of the Los Angeles Community College District, is punishable by a fine not exceeding five hundred dollars ($500) or imprisonment in a county jail not exceeding one year, or both such fine and imprisonment. As used in this section, “physical force” includes, but is not limited to, use of one’s person, individually or in concert with other, to impede access to or movement within or otherwise to obstruct the students or teachers of the classes to which the premises are devoted.

Board Rule 9805
Interference with performance of duties of employees Every person who attempts to cause, or causes, any officer or employee of any of the Los Angeles Community Colleges or any public officer or employee to do or refrain from doing, any act in the performance of his/her duties, by means of a threat to inflict any injury upon any person or property, is guilty of a public offense.

Board Rule 9805.10
Assault or abuse of Instructor Every parent, guardian, or other person who assault or abuses any instructor employed by the District in the presence or hearing of a community college student or in the presence of other community college personnel or students and at a place which is on District premises or public sidewalks, streets, or other public ways adjacent to school premises, or at some other place where the instructor is required to be in connection with assigned college activities is guilty of a misdemeanor.

Board Rule 9806
Unsafe Conduct Conduct which poses a threat or harm to the individual and/or to others. This includes, but is not limited to, the following types of conduct:

a. Unsafe conduct in connection with a Health Services Program (e.g., Nursing, Dental Hygiene, etc.);

b. Failure to follow safety directions of District and/or College staff;

c. Willful disregard of safety rules as adopted by the District and/or College;

Board Rule 9805
Negligent behavior which creates an unsafe environment.

Smoking Policy
Smoking is not permitted in any classroom or other enclosed facility. Smoking is permitted in designated areas only.

STUDENT DISCIPLINE PROCEDURES
Community college districts are required by law to adopt standards of student conduct along with applicable penalties for violation (Education Code Section 66300). The Los Angeles Community College District has complied with this requirement by adopting Board Rule 91101, Standards of Student Conduct (See above).

The District has adopted Board Rule 91101, Student Discipline Procedures, to provide uniform procedures to assure due process when a student is charged with a violation of the Standards of Student Conduct. All proceedings held in accordance with these procedures shall relate specifically to an alleged violation of the established Standards of Student Conduct. These provisions do not apply to grievance procedures, or residence determination and other academic and legal requirements for admission and retention.

Disciplinary measures may be taken by the College independently of any charges filed through civil or criminal authorities, or both.

Copies of the Student Discipline Procedures are available in the Vice President of Student Services Office, Juniper Hall, JH-532 or online at http://www.laccd.edu/Board/Documents/BoardRules/Ch.IX-ArticleXI.pdf.
ACADEMIC CONNECTIONS

Phone:  (213) 763-3754
Location:  Mariposa Hall MA-109

Academic Connections provides students with academic instruction and support services in an environment that facilitates successful retention and persistence during their academic career. The Center focuses on the individual needs of all LATTC students by providing courses, workshops, tutoring, and instructional resources to help ensure success in their academic, career, and personal goals. A Los Angeles Trade-Technical College student ID is required for all services.

COLLEGE READINESS, CAREER EXPLORATION, CAREER READINESS, NONCREDIT (INCLUDING ESL), AND G.E.D. EXAM PREPARATION

Academic Connections offers credit Learning Skills and noncredit Basic Skills courses to all students who want to reinforce their skills as independent critical thinkers, analytical readers, proficient writers, and effective mathematic problem solvers with the use of practical study strategies while mastering course materials. The Learning Skills computer lab is available to LATTC students taking Learning Skills/Basic Skills courses in basic reading, writing, math, spelling, vocabulary, computer literacy, and GED preparation.

TUTORING CENTER

Free tutoring services are available to all LATTC students. Tutoring is conducted in one-on-one and small group formats. The Center also provides interactive sessions on a variety of math, reading, writing, and computer literacy topics. Canvas and Portfolium assistance is also provided.

ASSOCIATED STUDENT ORGANIZATION (ASO)

Phone:  (213) 763-7200
Email:  aso@lattc.edu
Location:  Redwood Hall C-105
Website:  aso.lattc.edu

MEMBERSHIP

ASO programs are supported by a membership fee payable at the Business Office for day and evening students. These fees help support the services ASO provides. Any student, upon enrolling, is eligible to become a paid member of the Associated Student Organization. Members are entitled to all rights and privileges, including educational, social and community services programs and all associated activities.

ORGANIZATION

The governing body of the Associated Students, the Student Council, is composed of elected Executive Board members consisting of the President, Vice President, Parliamentarian, Treasurer, Historian and the Recording Secretary. The Student Council also includes appointed Senators and Commissioners who serve as representative liaisons for departments on campus.

The purpose of student government is best expressed in the preamble to the constitution: “We, the Associated Student Organization (ASO) serve to benefit the student body of Los Angeles Trade-Technical College through our support of academic achievement, public activism, and social service; we strive to build a campus that is focused on the needs and welfare of students. We shall stand alongside our fellow students and campus community in order to stimulate the academic, physical, social and moral lives of students in the college. We provide students the opportunity for leadership and civic participation on campus, and the region, and at the state and national levels to support and advocate for resources that increase academic achievement, student success, and campus community engagement. All students are encouraged to become involved in the governance of their affairs by becoming department representatives or by running for an elected office. Governance flow is from individual students to department representatives to the student council and in reverse. Elections are held every spring for the Executive Board positions. Officers are elected for a one-year term.”
LATTC is a member of the California Community College Student Affairs Association (CCCSAA) and the Student Senate for California Community Colleges (SSCCC). The two organizations meet separately each semester to discuss topics in Student Government and activities of importance to the member schools. The groups were organized to help promote better relations among the community colleges of the state and to help solve problems relative to each. LATTC regularly sends delegates to these statewide and regional meetings.

QUALIFICATIONS FOR ASO OFFICERS
(ADMINISTRATIVE REGULATION S-9)

Los Angeles Community College District Administrative Regulation S-9 pertains to elected Associated Student Organization (ASO) officers only. Senators and Commissioners are appointed by the ASO Student Council and are governed by ASO By-Laws.

Regulation S-9 is as follows: “A student cannot be a candidate for ASO office if he or she has served more than four semesters in a student government elected and/or appointed office, or in any office or position where he or she voted on the expenditure of ASO funds in any college. An officer may serve a fifth semester if he or she is eligible at the time of assuming office (e.g., has served three semesters and is a candidate for an office with a one-year term). Ten weeks or more of student service in office or service anytime after the tenth week will be counted as a full semester. All students running for office must be paid members in good standing in the Associated Students Organization at the college where the election is held.

A student officer or a candidate for office must be actively and continuously enrolled, attending and successfully completing classes in a minimum of 5 units with a cumulative and current GPA of 2.0 at the college during the semester in which the student government office is applied for or held. All units must be taken at the college where the office is sought or held.

STUDENT TRUSTEE ELECTION PROCEDURE

The Los Angeles Community College District conducts an election annually whereby each student in the District has an opportunity to be involved in the process of selecting a student representative to the Los Angeles Community College district Board of Trustees. Student Trustee eligibility requirements can be found on the LACCD website.

ASO CLUBS AND ORGANIZATIONS

Inter-Club Council (ICC)
The Inter-Club Council is composed of representation of all officially chartered clubs. ICC serves as the coordinating and planning body for club activities.

Students are encouraged to organize new special interest clubs on campus. Before a group is recognized officially, a constitution must be submitted and approved by the ASO Advisor and Executive Board. Sample constitutions can be obtained in the ASO Office. Every club is required to have at least one full time Faculty Advisor.

BOOKSTORE RETURN / REFUND POLICY

A. Textbooks
Textbooks must be returned within the first 15 school days of the Fall and Spring semester, and within the first 5 days of Summer, and Winter Sessions, and short-term courses. Textbooks purchased after the 10th school day must be returned within 24 hours.

All textbooks being returned must be accompanied by an ORIGINAL DATED CASH REGISTER SALES RECEIPT issued by the Bookstore. NO EXCEPTIONS!

Refunds and/or exchanges will not be allowed on textbooks purchased during the last 4 (four) weeks of the semester. No refunds will be allowed after the 1st week of the Summer and Winter Sessions.

Textbooks must be returned in the same condition as when purchased, with final determination of condition made by the Bookstore Staff. New textbooks must be in new condition (no writing or marks of any kind). Textbooks failing to meet the policy will be considered Used and be governed by the Used textbook policy. Catalogs, Class Schedules, Paperbacks, Scantrons, regular supplies, Study Guides, Dictionaries, Clothing, Workbooks, Computer external drives, and specially assembled kits are not refundable.

B. Supplies and Tools
Materials required by a specific class may be returned during the first 48 hours of the Fall and Spring semesters and within the first 48 hours of the Summer and Winter Sessions. Items must be accompanied by a dated cash register receipt and must be in NEW condition. NO REFUNDS will be given for any clothing, athletic supporters, sweat socks, safety goggles, food, and other “personal items” governed by California Health Laws.

C. Policy For Personal Checks
A current LATTC Registration Receipt or ASO card must be presented when making purchases by personal check a valid California Driver’s License or California Identification Card. Checks must be imprinted with the student’s name and current address, and drawn on a local bank. Checks will be accepted only for the amount of purchase.

D. Book Buy-Back Period
Book Buy-Back periods occur during the final exam week of each Fall and Spring semester. Summer and/or Winter Buy-back dates are posted with signs and on the receipt.

E. Metropolitan Transit Authority bus passes and tokens are also available for sale at the Business Office.
Bridges to Success Center

Telephone: (213) 763-5560
Fax: (213) 763-5979
E-mail: bridges@lattc.edu
Location: Mariposa Hall MA-105
Website: http://college.lattc.edu/bridges/

The Bridges to Success Center at Los Angeles Trade-Technical College is a product of a college-wide effort to increase college access and engagement. Enrollment, counseling, orientation, and other support services are provided in the Center. It is open five days a week, Monday through Thursday 8 am to 7 pm and Friday 8 am to 12 pm (select Saturdays, too).

The Center's goals include increasing the number of youth in the LATTC service area community who complete high school and engage in college and increasing community access and engagement through relevant credit and noncredit course offerings targeting youth, immigrants and underemployed adults.

BRIDGES TO SUCCESS CENTER
PROGRAMS AND SERVICES

K-12 Concurrent Enrollment
Provides students the opportunity to concurrently enroll in college courses while still in high school, getting early college experience and take advantage of advanced scholastic and educational enrichment opportunities for eligible students. The purpose of this program is to provide advanced scholastic and educational enrichment opportunities for eligible high school students. Students who desire to participate in concurrent enrollment must provide a signed recommendation form from their principal or counselor and have parental permission as well. K-12 students can take degree-applicable, noncredit, vocational and/or transferable courses. Students are required to complete a Special K-12 Admission Application for each semester prior to enrollment at LATTC. Special admissions criteria apply for K-8 students.

Additional information can also be found on our website at: http://college.lattc.edu/bridges/bridge-to-college-program-k-12-concurrent-enrollment/.

Assistance for AB 540 Students
Assist and inform eligible nonresident students of existing law establishing that California High School graduates are authorized to attend community college and be exempt from nonresident tuition.

Continuing Education
Provides noncredit courses, free of charge, in subject areas such as ESL (English as a Second Language), Citizenship, and Basic Computer Skills Courses.
BUSINESS OFFICE
Phone: (213) 763-7225
Location: Juniper Hall ST-Lobby

Student accounts are managed through the College Business Office. Student fees including enrollment fees, nonresident tuition, health fees, parking, Associated Student Organization, child care, transcripts and Community Service fees are payable at the Business Office. Upon payment of fees, the Business Office then issues student’s official confirmation of course enrollment/fee receipt. In addition, the Business Office accepts, disburses and accounts for some student financial aid, loan and scholarship checks, and issues all student refunds.

COLLEGE CAFE & GARDEN ROOM RESTAURANT
Phone: (213) 763-7331
Location: Sage Hall SA-Cafeteria

The LATTC College Cafe offers a wide variety of exceptional menu choices for your dining pleasure. Students enrolled in the Culinary Arts and Professional Baking programs prepare fresh food daily that is served in the on-campus bakery, cafeteria, and Garden Room Restaurant. Selections include hot entrees, hot off the griddle breakfasts, grab and go sandwiches and salads, as well as a variety of fresh baked goods. Join us in the Garden Room Restaurant on Wednesdays for our international buffet, an all you can eat themed menu based on food from all over the world! The College Cafe can also provide on-site catering for your special events.

CAREER/Employment CENTER
Phone: (213) 763-7104/7124
Location: Juniper Hall ST-415

The Career/Employment Center’s mission is to provide students with effective career planning tools, state-of-the-art technology, resources and services equipping them with the ability to identify and make informed career choices, and to achieve their life long career goals through successful employment and/or higher education in career technical/vocational or other educational programs. The Center’s goal is to promote and provide effective career planning and development for all students. Experienced staff will assist with career options and provide the testing and interpretation of career assessments, career guidance, and develop the student’s awareness of the educational opportunities available. Available services include: The Myers/Briggs Personality Assessment, the COPS-COPES-CAPS career inventory, the EUREKA Career Exploration System, Career/Life Skills workshops, labor market information, career resources and computer aided job development are available to assist with career and job opportunities. The Center also assists students in finding full-time, part-time or temporary jobs. It also provides information on internships, working abroad and summer employment, as well as employment information for alumni. The Center maintains a file of current job bulletins from city, state, county and federal government agencies, as well as school districts and private industry. The Center, in collaboration with GAIN/CalWORKS, various on-campus departments, and a robust Job Expo Advisory Board including local, county and state government and non-profit agencies hosts its annual Job/Career and Resource Expo every spring.

CHILD DEVELOPMENT CENTER
Phone: (213) 763-3690
Location: Corner of Olive and 21st Street

The Campus Child Development Center is designed to provide a supportive educational environment for children while parents attend classes, job training, or work. The center believes that a warm and nurturing atmosphere is the best for both children and adults to learn and grow. Therefore, our focus is to provide developmentally appropriate activities for children and to provide opportunities for parents to enhance their parental skills. The center is staffed by dedicated teachers trained in the field of early childhood education. Student assistants and LATTC Child Development Program lab students work with the staff to provide an environment that is developmentally appropriate for young children. Activities are planned to meet the child’s emotional, social, physical and intellectual needs. Programs are as follows:

- Ages: Infants through Preschool Children, 16 months to 5 years of age (before entrance to kindergarten)

Meals served: Breakfast, Lunch and Snack

To receive an application contact the Center. Each application is to be completed and returned to the Child Development Center with current income verification in order to establish enrollment priority for your child’s admission. Child care is free for income eligible parents.

COUNSELING SERVICES
Phone: (213) 763-7354
Location: Juniper Hall ST-416 and Pathway Offices in various locations on campus

The mission of the Counseling Department is to provide the opportunity for our students and the community to receive professional counseling services to assist them in the exploration, planning and successful completion of coursework leading toward obtaining their academic, career and personal goals. The Counseling Department supports student success and promotes achievement through persistence, retention and the use of technology in order to foster life-long learning and effective participation in our democratic society. Advisement in Spanish is available upon request. Students may consult with a Counselor to discuss any of the following:
Campus Life and Services – Student Support Services

Los Angeles Trade-Technical College

Educational activities at LATTC: the nature of the student's educational limitations, to assure access to which may be approved as reasonable accommodations, depending on the process with each student. Following are some of the supportive services by reviewing the disability verification documentation and an interactive in Mariposa Hall room MA 100. (213) 763-3773. Our email address is dspslattc@lattc.edu. We are located for qualified students include registration assistance, campus orientation, accommodated placement tests, parking, learning disability eligibility assistance, matriculation and support with disability management issues.

To appeal the ineligibility decision to the College ADA Coordinator, a. The student must submit an appeal to the College ADA Coordinator within ten (10) working days of receiving the notice of ineligibility. b. The College ADA Coordinator will consult with the DSPS Coordinator and the Learning Disabilities Specialist/Counselor to determine accommodation eligibility. c. The College ADA Coordinator will send a written response and rationale to the student within ten (10) calendar days of receipt of the appeal. 2. If the College ADA Coordinator upholds the ineligibility decision, the student may appeal to the DSPS Review Committee within ten (10) working days of receipt of the College ADA's Coordinator's response and rationale. The District Disabled Student Accommodation Review Committee will consist of District DSPS Coordinators present at the scheduled monthly District DSPS Coordinator's meeting, the Vice President of Student Services Officer assigned as DSPS liaison or his/her designee, the Vice President of Student Services Officer of the college from where the appeal originated or his/her designee, and the District ADA Coordinator.

1. If, upon reviewing the disability documentation submitted by the student, the DSPS professional staff determines that the student is ineligible under the provisions of Section 504 and 508 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act. The primary objective of the Disabled Student Programs and Services (DSPS) is to provide accommodations for students with a disability in campus programs and activities to the greatest extent feasible. The ability of each student with a disability to function independently in the collegiate environment is the ultimate goal.

Individuals with a disability may receive support services and instruction from the DSPS program at LATTC. Students with mobility, visual, hearing, speech, psychological and other health impairments as well as learning and developmental disabilities are served. The student with a disability seeking admission to LATTC must meet these levels of independence: 1) The ability to negotiate the campus facilities independently or with the assistance of an attendant; 2) The ability to take care of personal needs (feeding, toileting) unassisted or to provide one's own attendant, and 3) The possession of a stable level of health to benefit from a full semester's work.

All students are provided with an initial interview, counseling, and referral. Non-classroom related assistance for qualified students include registration assistance, campus orientation, accommodated placement tests, parking, learning disability eligibility assistance, matriculation and support with disability management issues.

For further information or an initial appointment, contact the DSPS Office at (213) 763-3773. Our email address is dspslattc@lattc.edu. We are located in Mariposa Hall room MA 100.

DSPS determines reasonable accommodations on a case-by-case basis, by reviewing the disability verification documentation and an interactive process with each student. Following are some of the supportive services which may be approved as reasonable accommodations, depending on the nature of the student's educational limitations, to assure access to educational activities at LATTC:

- Interpreter services for the deaf
- Note-taking services

Additional services available through DSPS may include:

- Counseling
- Enrollment assistance
- Instructor liaison
- Assistive technology training

DISPUTES

A. Appeal of Eligibility Determination

1. If, upon reviewing the disability documentation submitted by the student, the DSPS professional staff determines that the student is ineligible under the provisions of Section 504, Subsection E of this regulation, the student may request a meeting with the DSPS Coordinator to appeal the ineligibility decision. The student may appeal the ineligibility decision to the College ADA Coordinator.

a. The student must submit an appeal to the College ADA Coordinator within ten (10) working days of receiving the notice of ineligibility.

b. The College ADA Coordinator will consult with the DSPS Coordinator and the Learning Disabilities Specialist/Counselor to determine accommodation eligibility.

c. The College ADA Coordinator will send a written response and rationale to the student within ten (10) calendar days of receipt of the appeal.

2. If the College ADA Coordinator upholds the ineligibility decision, the student may appeal to the DSPS Review Committee within ten (10) working days of the College ADA's Coordinator's response and rationale. The District Disabled Student Accommodation Review Committee will consist of District DSPS Coordinators present at the scheduled monthly District DSPS Coordinator's meeting, the Vice President of Student Services Officer assigned as DSPS liaison or his/her designee, the Vice President of Student Services Officer of the college from where the appeal originated or his/her designee, and the District ADA Coordinator.

a. Within ten (10) working days of the appeal, the District DSPS Review Committee will consider the appeal at the next scheduled District DSPS Coordinator's meeting, or special meeting convened for the purpose of hearing the appeal, and make a recommendation to the President of the college where the student is in attendance.

b. The recommendation will be determined by majority vote of the District DSPS Review Committee.

c. The District DSPS Review Committee will provide the college President with written notification, including the rationale for its decision, within ten (10) working days of its decision. The College President will provide the student of his or her final decision within ten (10) working days of receipt of the DSPS Review Committee's recommendation.
3. If the student is not satisfied with the College President’s decision, the student has the right to file an Unlawful Discrimination Complaint with the District’s Office of Diversity Programs. The student may utilize this option at any time during the process.

B. Appeal of Accommodations

If a student who has been determined to be eligible for services (under Section I, Subsection E) believes that the college is not providing sup-port services and/or academic accommodations, and the matter can- not be resolved informally, the student may file a complaint, which will be evaluated by the Academic Accommodations Review Committee.

1. Informal Resolution

When a dispute arises over DSPS recommended support services and/or academic accommodations, all parties are required to seek informal resolution, before proceeding formally. In an effort to resolve the matter informally, the DSPS Coordinator will assist the student by scheduling a good faith interactive meeting with the person(s) involved in the dispute, as well as the person’s immediate supervisor, the corresponding Dean of Academic Affairs, and a DSPS professional.

2. Formal Resolution

If the matter cannot be resolved informally, the student may file a written request for a formal hearing of the college Academic Accommodations Review Committee.

   a. The college Academic Accommodations Review Committee will consist of the Vice President of Academic Affairs or his/her representative, the Vice President of Administration or his/her representative, the Vice President Student Services or his/her representative, the Department Chair or designated representative for the student’s program of study, the College ADA Coordinator, and the DSPS Coordinator or designee, who will function in the hearing as a consultant and will vote only in the event of a tie.

   b. The College ADA Coordinator, or other designated college official with knowledge of support services and accommodations, may make an interim decision, if necessary, regarding provision of support services or accommodations pending the final resolution of the dispute.

   c. The Academic Accommodations Review Committee will meet within ten (10) working days of the request and review the request in accordance with the following procedures:

I. During the formal hearing process, the committee chair shall coordinate the conduct of the hearing.

II. The student and/or a representative shall present the written request to the DSPS Coordinator and attend the meeting of the Academic Accommodations Review Committee. The representative may not be an attorney.

III. The person denying the DSPS recommended support services or accommodations and/or his/her departmental representative shall present written reasons why the DSPS-recommended support services or accommodations were not provided and shall attend the meeting of the Academic Accommodations Review Committee.

IV. The committee will make a determination regarding the “reasonableness” of the support service(s) or accommodation(s), and recommend an equitable solution, if necessary.

V. The committee will deliberate outside of the presence of the student and the person denying the support services or accommodations and their representatives.

VI. The hearing shall be closed and confidential.

   d. The committee will, within five (5) working days after the hearing, inform the student in writing of the committee’s decision.

   I. Copies of the committee’s decision will be placed in the student’s file and sent to the College President, Vice President of Academic Affairs and Vice President of Student Services, as well as to the individual, if appropriate, who denied the support service(s) or accommodation(s), by the Academic Accommodations Review Committee Chair.

   II. Academic Accommodations Review Committee Formal Hearing Request forms are available in the DSPS Office, Student Services Office, and/or College Ombudsperson.

3. Appeal

   a. If the student is dissatisfied with the Academic Accommodations Review Committee decision, the student may appeal to the College President.

   b. The student may also file a formal discrimination complaint with the District’s Office of Diversity Programs, who will then follow the established steps outlined in Chapter XV of the Board Rules.
Campus Life and Services – Student Support Services

Extended Opportunity Programs and Services (EOPS)/Cooperative Agencies Resources for Education (CARE)/Cooperating Agencies Foster Youth Educational Support (CAFYES)

Phone: (213) 763-7097/7098
Email: EOPSTrade@lattc.edu
Location: Juniper Hall ST-205
Website: http://college.lattc.edu/counseling/eops/

Extended Opportunity Programs and Services (EOPS) is a state funded comprehensive support program which recruits and assists qualified low-income students who have educational disadvantages. EOPS provides academic counseling, career exploration, tutoring, priority registration, book services and workshops aimed at helping students succeed in college. Participants must be full-time students. EOPS participants who are single parents with children under the age of 14 may receive additional services if they qualify for CARE (Cooperative Agencies Resources for Education). EOPS participants who are former foster youth under the age of 26 may receive additional services if they qualify for CAFYES (Cooperating Agencies Foster Youth Educational Support).

Benefits include (but not limited to):
- Book Grants (amount varies)
- CAFYES (not all will qualify)
- CARE (not all will qualify)
- Counseling (academic, career, personal)
- Counseling 2: Volunteer Program
- Counseling 20: EOPS Summer Bridge
- Counseling 4: Career Planning
- Field Trips to Universities
- Honor’s Banquet
- Priority Registration
- Specialized Workshops
- Student Support Program (for students with low GPAs)

Extended Opportunity Programs and Services (EOPS) is a college success, counseling support program for low income and educationally disadvantaged students. EOPS students receive assistance and support with their college education. Special attention is given to identify, plan, develop and achieve the academic, career and personal goals of our students.

The EOPS Counseling Faculty assist students with various issues relating to their academic, career and personal development. EOPS Counselors understand that students may be unfamiliar with the college environment and culture; therefore, they are readily available to guide students during their academic journey at LATTC. They assist students with the registration procedures, and guide students with class selections, generate a student educational plan (SEP) and acquaint students to the resources available on campus. They also work with students on a personal level as they know that students may encounter many life obstacles and challenges that can interfere with their pursuit toward achieving their academic goals. EOPS Counselors believe that students should be given the appropriate tools and skills to enhance their college experience. They consistently sharpen their counseling skills, techniques, interventions, logic and intuition to help students in making decisions that lead to a successful college and life experiences.

The CARE (Cooperative Agencies Resources for Education) Program is targeted at providing educational opportunities and enhancing personal growth to students receiving CalWORKS. CARE students must be single head of household, a CalWORK recipient and meet EOPS eligibility. It is our commitment to extend support services to CARE students in order to help them achieve their educational goals at LATTC. The concept of “over & above” in assisting CARE students is embraced and exercised among our dedicated staff.

Services:
- Access to Community Resources
- Childcare Assistance
- Counseling
- Educational and Developmental Workshops
- Educational Supplies
- Meal Tickets
- Resource Referrals
- Transportation Assistance

The CAFYES (Cooperating Agencies Foster Youth Educational Support) is a supplemental component of EOPS. The mission of CAFYES is to provide additional services and support to eligible current or former foster youth. CAFYES students must be a current or former foster youth in California whose dependency was established or continued by the court on or after
youth’s 16th birthday, be no older than 25 years of age and meet EOPS eligibility (CAFYES students may have 8 units to meet EOPS full time eligibility). It is our commitment to provide “over and above” support services to CAFYES students in order to help achieve their educational goals.

Services:
• Cash Grants
• Counseling
• Meal Tickets
• Specialized Workshops
• Transportation Assistance
• Book Grant

WHAT IS FINANCIAL AID?
The purpose of the financial aid program is to provide financial assistance to students who, without such aid, would be unable to attend college. Although it is expected that students and parents will make a maximum effort to meet the cost of education, financial aid is available to fill the gap between family resources and the annual educational expenses. Financial aid is meant to supplement the family’s existing income/financial resources and should not be depended upon as the sole means of income to support other non-educational expenses.

Financial aid is available from various sources such as Federal, State, institutional, community organizations and individual donors.

Financial aid can be awarded in the form of grants, loans, work-study, scholarships, or a combination of these.

WHO IS ELIGIBLE FOR FINANCIAL AID?
To be considered for financial aid, students must meet the following minimum requirements:

• Be a U.S. citizen or an eligible non-citizen. An eligible non-citizen is a U.S. permanent resident who has documentation from the Department of Homeland Security verifying that his/her stay in the U.S. is for other than a temporary purpose.
• Demonstrate financial need.
• Be making Satisfactory Academic Progress in a course of study leading to a Certificate, AA or AS Degree, or Transfer to a Baccalaureate Degree Program.
• Not be in default on any student loan such as Federal Perkins Loans, Federal Stafford Loans (subsidized and unsubsidized), Federal Direct Loans (subsidized or unsubsidized), Supplemental Loans to Assist Students (SLS), or FPLUS Loans (Parent Loans for undergraduate students) at any college attended.
• Not owe a refund on a Federal Pell Grant, Federal Supplemental Educational Opportunity Grant (FSEOG) or Academic Competitiveness Grant (ACG) or SMART Grant.
• Be registered with Selective Service, if required to do so.
• Be enrolled as a regular student in an eligible program.
• Have a valid Social Security Number (SSN).
• Not be convicted of possessing or selling illegal drugs while enrolled and receiving federal financial aid from any college or university.
• Received a high school diploma or its equivalent, or passed a high school proficiency examination.

WHEN TO APPLY
The best time to submit the Free Application for Federal Student Aid (FAFSA) is between October 1st and March 2nd prior to the start of the academic year (Fall semester).
**Campus Life and Services – Student Support Services**

**FOLLOW THE TIMELINE BELOW**

<table>
<thead>
<tr>
<th>October 1 - March 2</th>
<th>FAFSA priority application</th>
</tr>
</thead>
<tbody>
<tr>
<td>March 2</td>
<td>Deadline to apply for Cal Grant</td>
</tr>
<tr>
<td>May 1</td>
<td>Priority deadline to submit required documents to the Financial Aid Office</td>
</tr>
<tr>
<td>September 2</td>
<td>Second deadline for community college students to apply for Cal Grant</td>
</tr>
</tbody>
</table>

To be considered for Title IV Financial Aid, LATTC Financial Aid Office must have on file a valid Institutional Student Information Report (ISIR) by the last day of enrollment for a term/semester or by June 30 of the award year, whichever is earlier. Check the financial aid website at college.lattc.edu/financialaid for deadlines.

**HOW TO APPLY**

To apply for Federal and State financial aid programs, complete and submit the Free Application for Federal Student Aid (FAFSA) at www.fafsa.gov. The FAFSA is an all-inclusive application form that allows students to apply for all programs.

**VERIFICATION POLICY**

Federal verification requirements apply to the following programs:

- Federal Pell Grant
- Iraq and Afghanistan Service Grant
- Federal Supplemental Educational Opportunity Grant (FSEOG)
- Federal Work-Study (FWS)
- Federal Direct Loan
- Cal Grant B and C
- California Chafee Grant
- Child Development Teacher Grant
- California National Guard Education Assistance Award Program (CNG EAAP)
- Full-Time Student Success Grant (FTSSG)

If your application has been selected for verification, you will be required to provide additional documentation with a specific deadline. Failure to meet this deadline will result in the denial of financial aid. For verification deadline dates, visit the Financial Aid Office website.

For the Federal Direct Loan Program, verification must be completed 20 working days prior to the last day of enrollment period to allow for loan processing time.

Students whose applications are selected for verification may be paid on any corrected valid SAR/ISIR that is received within 120 days after the student’s last day of enrollment.

If an applicant does not complete verification by the established deadline, all federal financial aid is forfeited for the award year. The Financial Aid Office maintains the right to request additional information which may be required to process your application. Those may include but are not limited to:

- IRS Tax Transcript
- Verification of Untaxed Income
- Verification Worksheet
- Selective Service Certification
- Social Security Verification
- Permanent resident documents, if an eligible non-citizen

**ENGLISH AS A SECOND LANGUAGE (ESL)**

Students taking only ESL classes must submit a Student Educational Plan to the Financial Aid Office within the first semester.

**AUDITED CLASSES**

Students cannot receive financial aid, including the BOGFW, for enrollment in audited classes. No exceptions to this policy can be made.

**ENROLLMENT AT OTHER LACCD COLLEGES**

Consortium Agreements are in effect for all colleges within the Los Angeles Community College District. If you are attending more than one college within the District in the same academic period, payment will be based on all units taken. You must maintain at least a one (1) approved unit level of enrollment at the Home/Primary campus (the college processing your financial aid) for the entire award period. For financial aid programs that are limited in funding, students must be enrolled in a minimum of six (6) approved unit minimum enrollment required at the Home campus.

Please note that if you are in an extension appeal due to Satisfactory Academic Progress, you must be enrolled in approved units, meaning classes listed in your Student Educational Plan (SEP) you submitted with your appeal to the Financial Aid Office. If you are enrolled in classes not listed in your SEP, the units will not be included in the calculation of approved units. For further information, please contact the Financial Aid Office.

**ITV CLASSES**

Students taking ITV courses must be enrolled in at least one (1) approved unit at the Home campus (the college that is processing their financial aid) in order to receive financial aid. Provided eligibility exists, For financial aid programs that are limited in funding, students must be enrolled in a minimum of six (6) approved units at the Home campus; units from other colleges may not be combined for all other programs. Students enrolled in ITV courses receive their transcripts for those courses from Los Angeles Mission College. Students enrolled only in ITV courses and wish to be considered for financial aid must apply at Los Angeles Mission College as the Home campus for financial aid purposes.

ITV classes are included in disbursements for all other classes.

**TAX BENEFIT**

Plan ahead – you may be able to take advantage of federal tax benefits for education. Most tax benefits have income limits; to learn more about each program, see IRS Publication 970, Tax Benefits for Education, available at www.irs.gov or by calling 1-800-829-3676. Also, be sure to consult a professional tax advisor.

American Opportunity Credit and Lifetime Learning Tax Credits allow you or your parents to subtract a portion of your college costs from the taxes you owe each year when you file your tax return.
Tuition and fees tax deduction and student loan interest deduction allows you to subtract a portion of your tuition and fees from your taxable income and to deduct up to $2,500 of the interest you pay on your student loan each year (or on any student loans you take out for your spouse’s or child’s education).

In addition, funds from your IRA, 529 college savings plan or Coverdell Education Savings Account may be withdrawn without a tax penalty to pay for qualified education expenses. There’s also a tax break if you use certain U.S. savings bonds to pay for college. You should consult a tax professional for further details or consult the following website: http://www.irs.gov/pub/irs-pdf/p970.pdf

TYPES OF FINANCIAL AID AVAILABLE

Federal Financial Aid Grants

Federal PELL Grant Program
The Federal PELL Grant Program is a federally funded program that provides assistance to undergraduate students who have not yet earned a baccalaureate or first professional degree and who demonstrate financial need. Awards are based on the student’s Expected Family Contribution (EFC) and enrollment status. The EFC is calculated based on the information such as income and assets on the FAFSA.

NEW: Due to the Higher Education Opportunity Act (HEOA), students have a maximum lifetime PELL Grant eligibility of 600% (12 full-time semesters). Students may view their percentage of PELL Grant eligibility by logging into www.nslds.ed.gov The “Lifetime Eligibility Used” percentage will be displayed in the “Grants” section of the webpage.

Federal Supplemental Educational Opportunity Grant (FSEOG) The FSEOG is a federal grant program designed to supplement other sources of financial aid for students with exceptional need. FSEOG awards are based on financial need and fund availability. There is a six (6) approved unit minimum enrollment requirement at the college where students are receiving financial aid. Since this is a limited funded program, priority will be awarded to students who are enrolled at least six (6) approved units at LATTC. FSEOG awards range upward from $100 to $400 per year, depending on need and packaging policy.

Iraq and Afghanistan Service Grant
A student whose parent or guardian was a member of the U.S. Armed Forces and died as a result of service performed in Iraq or Afghanistan after September 11, 2001 may be eligible to receive the Iraq and Afghanistan Service Grant. Student eligibility requirements are:

- Must be ineligible for a Federal PELL Grant due only to having less financial need than is required to receive PELL funds, and
- Be under 24 years old, or
- Enrolled in college at least part-time at the time of the parent’s or guardian’s death.

The grant award is equal to the amount of a maximum PELL Grant for the award year – not to exceed the cost of attendance for that award year.

State Financial Aid Grants
To qualify for any of the state-funded grants, a student must be a California resident and be attending (or planning to attend) an eligible college in California.

Board of Governors Fee Waiver Program (BOGFW)
The BOGFW is offered by the California Community Colleges. Applicants do not have to be enrolled in a specific number of units or courses to receive the BOGFW. Please note that payment of health fees is no longer part of the fee waiver. All BOGFW (fee waiver) recipients are required to pay the student health fee.

You are eligible to apply for a BOGFW if you are:

- A California resident, and
- You are enrolled in at least one unit.

Cal Grants
Students must meet the following eligibility requirements for the Cal Grant Programs:

- Be a U.S. citizen or permanent resident
- Have a valid Social Security Number (SSN)
- Be a California resident
- Be attending at least half-time at a qualifying California college
- Have financial need at the college of attendance
- Be making satisfactory academic progress as determined by the college
- Have not already earned a bachelor’s or professional degree, or the equivalent.
- Meet the income and asset ceiling as established by CSAC
- Meet Selective Service requirements

Deadline date: First deadline is March 2nd prior to the start of the academic year. A second deadline for community college applicants is September 2nd, but we highly recommend that applicants meet the March 2 deadline when more funding is available.

Students must submit a GPA Verification and FAFSA by the applicable deadlines to the California Student Aid Commission. GPA verification for students enrolled within the Los Angeles Community College District will be electronically sent to the Commission by the deadline date for those who meet specific criteria. Contact your Financial Aid Office to see if you meet the criteria to have your GPA electronically sent and for other possible options.

TYPES OF GRANTS AVAILABLE

Entitlement Grants
- Cal Grant A – provides grant funds to help pay for tuition/fees at qualifying institutions offering baccalaureate degree programs. If you receive a Cal Grant A but choose to attend a CA Community College first, your award will be held in reserve for up to three years until you transfer to a four-year college.
- Cal Grant B – provides subsistence payments for new recipients in the amount of $1,648 for a full-time, full year award. Payments are reduced accordingly for three-quarter and half-time enrollment for each payment period. Cal Grant B recipients who transfer to a tuition/fee charging school after completing one or two years at a community college may have their grant increased to include tuition and fees as well as subsistence.
- Cal Grant Transfer Entitlement Award is for eligible CA Community College students who are transferring to a four-year college and are under age 28 as of December 31 of the award year.
Competitive Grants

- Cal Grant A and B awards are used for the same purpose as the A and B entitlement awards, except that they are not guaranteed and the number of awards is limited.
- Cal Grant C recipients are selected based on financial need and vocational aptitude. Students must be enrolled in a vocational program at a California Community College, independent college, or vocational college, in a course of study lasting from four months to two years. Cal Grant C awards may not be used to pursue a four-year degree program, graduate study, or general education.

California Dream Act

Students who have been determined to be AB540 by the Admissions Office and are recent high school graduates may apply for the Entitlement Cal Grant Program by completing the California Dream Application at https://dream.csac.ca.gov. The deadline to apply for the Entitlement Cal Grant for 2016-2017 is March 2, 2016.

AB540 students are not eligible for the Competitive Cal Grant.

For additional information and resources, contact the California Student Aid Commission at (888) 224-7268 or visit their website at www.csac.ca.gov/dream_act.asp.

Chafee Grant

The California Chafee Grant is a federal grant administered by the California Student Aid Commission and provides assistance to current or former foster youth to use for college courses or vocational school training. Eligible students may receive up to $5,000 per academic year. To learn more about this program and to apply online, go to www.chafee.csac.ca.gov/default.aspx.

Law Enforcement Personnel Dependents Grant Program (LEPD) This grant program provides need-based educational grants to the dependents and spouses of California peace officers (Highway Patrol, Marshals, Sheriffs, Police Officers), Department of Corrections and California Youth Authority employees, and permanent/full-time fire-fighters employed by public entities who have been killed in the performance of duty or disabled as a result of an accident or injury caused by external violence or physical force incurred in the performance of duty. Grant awards match the amount of a Cal Grant award and range from $100 to $11,259 for up to four years.

For more information and application materials, write directly to: California Student Aid Commission, Specialized Programs, P.O. Box 419029, Rancho Cordova, CA 95741-9029 or call (888) 224-7268, Option #3.

Child Development Grant Program

This program is a need-based grant designed to encourage students to enter the field of child care and development in a licensed children’s center. Students who plan to enroll at least half-time in course work leading to a Child Development Permit as a teacher, master teacher, site supervisor, or program director, are eligible to apply through the college they plan to attend. For more information, go to www.csac.ca.gov or call (888) 224-7268, Option #3.

California National Guard Education Assistance Award Program (CNG EAAP)

This state-funded program designed to provide an educational incentive to improve skills, competencies, and abilities for up to 1,000 services members who remain active in the National Guard, the State Military Reserve, or the Naval Militia. This program authorizes the California Student Aid Commission to make payments to eligible program participants. Participants can receive up to the amount of the Cal Grant A award for attending the University of California or California State University, up to the Cal Grant B award for attending a community college, up to the University Cal Grant A amount for attending a non-public institution, or up to the Cal Grant A award plus $500 for books and supplies for graduate students. To learn more about the program, visit the California Student Aid Commission website at www.csac.ca.gov.

Full-Time Student Success Grant (FTSSG)

This program provides additional funding for students who were disbursed a full-time Cal Grant B. The annual award depends on availability of funds.

FEDERAL STUDENT LOANS (AID THAT YOU HAVE TO PAY BACK)

CAUTION ABOUT STUDENT LOANS: It takes time for a loan application to be processed by the college, lender and/or the government. It may be several weeks after an application has been accepted in the Financial Aid Office before the student receives the loan funds. Student loan funds are delivered to the student after enrollment and satisfactory academic progress requirements have been verified. All loans require a minimum of six (6) approved units. Check with the Financial Aid Office or visit the website at college.lattc.edu/financialaid for deadlines to request for a student loan.

NSLDS Disclosure. Please note that any loan borrowed by the student or parent will be submitted to the National Student Loan Database System (NSLDS), and will be accessible by guaranty agencies, lenders, and schools determined to be authorized users of the data system.

LATTC PARTICIPATES IN THE FOLLOWING LOAN PROGRAMS:

Federal Direct Loan

The Federal Direct Loan Program is a low-interest loan program for students and parents to help pay for the cost of higher education. Loans are made by the federal government. The following are types of Direct Loans:

- **Subsidized Loans** - students must demonstrate financial need; no interest is charged while in school or attending college at least half-time.
- **Unsubsidized Loans** - this loan is not based on financial need; interest is charged during all periods.
- **PLUS Loan** - Unsubsidized loans for parents of dependent students and for graduate/professional students. Interest is charged during all periods.

To learn more about the federal student loan program, visit the US Department of Education at www.studentloans.gov.

PART-TIME EMPLOYMENT

Federal Work-Study (FWS)

The FWS program enables students to earn part of their financial aid award through part-time employment either on or off campus. To be eligible, a student must meet the eligibility requirements for federal financial aid and must maintain a good academic standing while employed under the program.
Students must be enrolled in a minimum of six (6) approved units to be considered for this program. Since this is a limited funded program, priority will be awarded to students who are enrolled at least six (6) approved units at LATTC.

SCHOLARSHIPS
Throughout the year, the college receives announcements on scholarship opportunities. The focus of each scholarship is different; some require good grades, some require financial need, and some are awarded to students who are majoring in certain area of study. The Financial Aid Office has a listing of current scholarship offerings. Interested students are urged to go to the Financial Aid Office for information and assistance.

SUMMER FINANCIAL AID
Please contact the Financial Aid Office for more information and deadlines.

HOW FINANCIAL AID IS PACKAGED
Once the student’s financial aid eligibility is established, a “package” of aid is provided which may be a combination of grants, work-study, and loan funds.

LATTC prefers to meet a student’s need with a combination of grant(s) and self-help aid whenever possible.

Students will be notified via email, if email was provided on the FAFSA, when Aid Offer Letters are available for review in the Student Information System. In addition, students will be referred to read the Award Guide on the Financial Aid website which explains the responsibilities of the student and provides information on each award.

DISBURSEMENT
Students who submit their required financial aid documents by the May 1st priority deadline may expect to receive their first financial aid disbursement during the first week of the Fall semester, provided that all established deadlines have been met.

The award amount reflected on the Award Notification is for full-time enrollment. Disbursements will be adjusted if enrollment is less than full-time at the time of disbursement. Supplemental disbursements occur throughout the academic year. Disbursements will be adjusted if enrollment increases or decreases. After the second disbursement run date of the each semester, no further award adjustments can be made. Any outstanding institutional debt will be deducted from the financial aid disbursement. Student must be an active student (enrolled in at least one approved unit) at LATTC to be eligible for financial aid disbursement. Payment for late-starting classes will not be issued until the class begins. Students are encouraged to log-on the Student Information System (SIS) at www.laccd.edu/student_information to view their refund information. Please note that the disbursement schedules are based on full-time enrollment. The actual refund amount will depend on the enrollment status at the time of the disbursement run. Please note that if you are in an Extension Appeal due to satisfactory academic progress, you must be enrolled in approved units, meaning classes listed in your Student Educational Plan (SEP). If the class you are enrolled in is not listed on your SEP, the units will not be included in the calculation of approved units.

Full-time is considered 12 or more units per semester; three fourths time is considered 9-11.5 units per semester; half-time is considered 6-8.5 units per semester; less than half-time is 1-5.5 units per semester.

Federal PELL Grant is scheduled for payment twice a semester. FSEOG and Cal Grants are scheduled once per semester and require an enrollment of six (6) or more approved units. Federal-Work Study (FWS) is paid through payroll every two weeks. Federal Student Loans are disbursed in two equal payments, once per semester, for students attending two semesters in the academic year. Federal Student Loans require an enrollment of six (6) approved units. For students request- ing a loan for one semester only, the loan will be disbursed in two equal payments within the one semester.

CHANGE OF ENROLLMENT
If your enrollment status changes during the semester please inform the Financial Aid Office. Your financial aid award may be modified to reflect the correct number of units in which you were enrolled at the time of the second disbursement run. The adjustment of enrollment may cause an overpayment of financial aid funds. Repayment of financial aid funds is necessary if the adjustment of enrollment causes an overpayment. You must resolve your overpayment prior to receiving any additional financial aid. Having an overpayment of federal funds will prevent you from receiving federal financial aid from any institution.

FEDERAL REFUND REQUIREMENTS – RETURN TO TITLE IV
The student’s eligibility for financial aid is based upon enrollment. The Higher Education Amendment of 1998 governs the Return of Title IV funds policy for a student who completely withdraws from a period of enrollment (i.e. semester). These rules assume that a student “earns” aid based on his/her semester enrollment. “Unearned” aid, other than Federal-Work-Study, must be earned. Unearned aid is the amount of federal financial aid received that exceeds the amount the student has earned. Unearned aid may be subject to repayment.

STUDENTS WHO RECEIVE FINANCIAL AID AND TOTALLY WITHDRAW FROM ALL CLASSES MAY HAVE TO REPAY SOME OF THE FEDERAL FUNDS RECEIVED PRIOR TO WITHDRAWAL
All students receiving federal aid and then withdraw from the institution in the first 60% of the term, are subject to Return Regulations. The Financial Aid Office will calculate the amount of federal funds earned by the student up to the point of withdrawal and students will be billed and must repay any federal grant funds received but not earned.

If you owe a repayment, students will be notified in writing by the Financial Aid Office. The student will have 45 calendar days from the date of notification to repay; otherwise, a hold will be placed on the academic and financial aid records which will prevent the student from receiving college services and will jeopardize future financial aid.

It is advised that you contact the Financial Aid Office before withdrawing from all of your classes so you understand the results of your actions. For the refund policy on enrollment fees and non-resident tuition, please see the College Schedule of Classes or the College Catalog.

DETERMINING FINANCIAL NEED
Most financial aid awards are based on demonstrated financial need which...
is the difference between the Cost of Attendance (COA) and the Expected Family Contribution (EFC).

**COA minus EFC = Financial Need**

**COST OF ATTENDANCE**

In order to treat all students equally, standardized budgets (Cost of Attendance) are established and applied to all applicants. This means all students with similar circumstances will receive the same allowance for tuition and fees, books and supplies, room and board, personal expenses and transportation.

The cost of attendance is based on the Student Expenses and Resources Survey (SEARS) data and updated for three years of inflation using the estimated California Consumer Price Index.

The following table shows the estimated 2016-2017 9-month Cost of Attendance budget for a CA resident student living at home with parents and a CA resident student living away from parents:

<table>
<thead>
<tr>
<th></th>
<th>LIVING WITH PARENTS 9 MONTHS</th>
<th>LIVING AWAY FROM HOME 9 MONTHS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fees</td>
<td>$1,220</td>
<td>$1,220</td>
</tr>
<tr>
<td>Books &amp; Supplies</td>
<td>$1,791</td>
<td>$1,791</td>
</tr>
<tr>
<td>Room &amp; Board</td>
<td>$4,968</td>
<td>$12,492</td>
</tr>
<tr>
<td>Transportation</td>
<td>$1,107</td>
<td>$1,242</td>
</tr>
<tr>
<td>Personal Expenses</td>
<td>$3,177</td>
<td>$2,916</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>$12,263</strong></td>
<td><strong>$19,661</strong></td>
</tr>
</tbody>
</table>

*Non-resident tuition will be added to the Cost of Attendance for students who are non-residents.

*Child care cost of $1,000 per academic year will be added to the Cost of Attendance to students who qualify.

The financial aid office may also add the following to a student’s cost of attendance, if applicable:

- Non-resident tuition cost plus $46 enrollment fee
- Child Care cost - $1,000 annually
- Direct Loan Origination/Insurance Fee - determined annually

**Expected Family Contribution**

Students and/or their parent(s) are expected to contribute something to the cost of higher education. Parental and/or student contribution (EFC) are determined from the information reported on the FAFSA and take into account the resources available such as income, assets, liabilities, size of family, number in college, taxes paid, etc.

**Child Care Expenses**

This is an adjustment to the Cost of Attendance provided to students with unusual and reasonable expenses for dependent/child care up to a maximum of $1,000. If you are paying for Child Care expenses during the academic year, you must notify the Financial Aid Office in writing to request for an adjustment to your Cost of Attendance.

**Technical/Vocational Expenses**

Institutions may make adjustments for students in trade vocational programs that require supplies and equipment above and beyond the normal budgeted allowance for books and supplies. Some of these programs include: Registered Nursing, Physical Therapy, Animal Health Technology, Auto Mechanics, Photography and others where documentation is submitted to support the additional cost.

**Disabled Expenses**

As documented and in excess of amounts provided by other agencies.

**STUDENT RIGHTS AND RESPONSIBILITIES**

All Los Angeles Community College District students who apply for and receive financial aid have a right to the following:

**Rights**

1. Information on all financial assistance available, which includes all Federal, State, and institutional financial aid programs.
2. Application deadlines for all financial aid programs including deadlines for the submission of requested supporting documentation.
3. Specific information regarding enrollment fees, tuition and refunds due from students who withdraw from school prior to the end of the semester.
4. An explanation of how financial need is determined. This process includes establishing budgets for the costs of tuition and fees, books and supplies, room and board, transportation, personal and miscellaneous expenses, child care, etc., plus the student’s income and assets, parental contribution, other financial aid (such as scholarships) and so on. Financial need is determined by the Central Processor from the information provided on the FAFSA.
5. Knowledge of what resources are considered in the calculation of student need.
6. Knowledge of how a financial aid package is determined.
7. An explanation of various programs awarded in the student’s financial aid package. If a student feels he/she has been treated unfairly, a reconsideration of the award may be requested.
8. An explanation regarding requests for repayment of funds. This situation occurs when students withdraw prior to the end of the semester. Students must receive a clear explanation of the program funds that do not need to be repaid as well as the portion of the grant aid that the student is required to repay. If the student received a loan, the student is informed about what the interest rate is, the total amount to be repaid, when the repayment is to begin, and the conditions of deferment and cancellation during loan counseling sessions.
9. Knowledge of how the Los Angeles Community College District determines whether students are making “satisfactory academic progress” and what happens if they are not.
10. Knowledge of what facilities are available for disabled students.

**Responsibilities**

Students must take responsibility for:

1. Reviewing and considering all information regarding the Los Angeles Community College District’s academic programs prior to enrollment.
2. Having a valid Social Security Number (SSN) on file in the Admissions & Records Office for the purposes of receiving financial aid, reporting a Cal Grant Grade Point Average, loan deferments, etc.

3. Enrolling in an eligible program, which is defined as a Certificate, an Associate Degree (AA/AS), or a two-year academic Transfer Program that is acceptable for full credit toward a Baccalaureate Degree. Students must declare an eligible educational goal and major, and update changes with the Admissions & Records Office.

4. Students who do not have a valid educational goal will be notified at the time of review of financial aid application and if students do not provide a valid educational goal with Admissions & Records will not be processed their financial aid.

5. Maintaining Satisfactory Academic Progress (SAP) to receive financial aid and meeting with an academic counselor to develop or review an Educational Plan (The SAP Policy is also in the college catalog).

6. Promptly returning all additional documentation, verification, corrections, and/or new information requested by either the Financial Aid Office or the agency or agencies to which an application was submitted.

7. Completing all required financial aid forms ACCURATELY AND COMPLETELY. If this is not done, aid could be delayed. Errors must be corrected before any financial aid can be received. Intentional misreporting of information and intentionally committing fraud on application forms for financial aid is a violation of the law and is considered a criminal offense subject to penalties under the U.S. Criminal Code, and the denial of the student’s application. Additionally, regulations require that all cases of suspected fraud emanating from misrepresentation, be reported to the Office of Inspector General.

8. Reading and understanding all financial aid forms and information. We advise students to retain copies of all documents submitted.

9. Choosing a home school to process financial aid. Students MAY NOT receive financial aid from more than one institution at the same time or periods of overlapping terms.

10. Notifying the appropriate entity (college, lender, California Student Aid Commission, U.S. Department of Education, etc.) of changes in your name, address, school enrollment status, or transfer to another college.

11. Repaying financial aid funds if it is determined that the student was ineligible to receive funds for any reason (i.e. Return to Title IV, overpayments, over-awards).

12. Performing the work that is agreed upon in accepting a work-study award.

13. Knowing and complying with the deadlines for application or reapplication for financial aid.

14. Knowing and complying with the Los Angeles Community College District Title IV Refund Policy.

**SATISFACTORY ACADEMIC PROGRESS POLICY**

**General Information**

In accordance with the Higher Education Act of 1965, as amended, the Los Angeles Community College District (hereinafter referred to as LACCD) established the following Standards of Academic Progress. These standards apply to all students who apply for and receive financial aid from the programs listed below.

- Federal Pell Grant
- Iraq and Afghanistan Service Grant
- Federal Supplemental Educational Opportunity Grant (FSEOG)
- Federal Work-Study (FWS)
- Federal Perkins Loan
- Federal Direct Loan
- Cal Grant B and C
- California Chafee Grant
- Child Development Teacher Grant
- Full-Time Student Success Grant (FTSSG)

Satisfactory Academic Progress standards are reasonable if they are the same as or stricter than the institution’s standards for a student enrolled in the same educational program who is not receiving assistance under Title IV Federal Financial Aid Programs.

Current and previous coursework earned at any college within the LACCD will be reviewed for compliance with the standards put forth in this policy.

**CONSORTIUM CLASSES**

- All classes throughout the LACCD will be included when reviewing satisfactory academic progress.
- For students aided under a Consortium Agreement with colleges outside the LACCD, consortium classes will be included during satisfactory academic progress review. The District Student Information System will collect, maintain, and utilize the number of outside units entered into the system for calculating student eligibility.
- Transfer coursework from institutions outside of the LACCD will be used and evaluated for SAP standing. College Admissions & Records Offices (A&R) will record incoming units as indicated on transcripts.
- Repeated Coursework
- Repeated coursework within the LACCD will be counted towards attempted units.
- For repeated coursework for which the student has petitioned the College to utilize the most recent grade received, only the most recent grade will be used for cumulative GPA calculation for SAP status determination.
ACADEMIC RENEWAL
All classes and all units that have been exempted from academic consideration (i.e., consideration for academic standing, college GPA calculation) due to Academic Renewal are still considered and counted towards all SAP standards for financial aid eligibility, unless otherwise affected by the Repeated Coursework rule above.

GENERAL REQUIREMENTS
Students receiving financial aid must be enrolled in an eligible program. An eligible program is defined as:

- An educational program that leads to an associate degree, or
- An educational program which is at least a two-year academic transfer program that is acceptable for full credit toward a bachelor’s degree, or
- An educational program which is at least a one-academic-year training program that leads to a certificate, degree, or other recognized educational credential and that prepares a student for gainful employment in a recognized occupation.

To meet satisfactory academic progress standards student must:

a. Maintenance of a 2.0 or higher cumulative grade point average (GPA).
b. Completion of a minimum of 67% cumulative units attempted.
c. Entries recorded in the student’s academic record as Incomplete (I), No Credit (NCR), and/or Withdrawal (W) are considered non-grades and must be 33% or less than the cumulative units attempted.
d. Fewer than ninety (90) attempted units for students who indicated AA/AS Degree and/or transfer as their educational goal.

- ESL and Basic Skills/Remedial classes are excluded from the ninety (90) unit limit when determining units attempted. Students may receive federal aid for up to 30 units of remedial coursework.
- Students who have already earned an Associate or higher degree outside of the LACCD will need to follow the appeal procedure.
- In Progress (IP) grades count as attempted units in the maximum time frame only. It does not affect cumulative grade point average in the qualitative measure nor is it included as completed units in the quantitative measure.

APPLICATION OF STANDARDS
- Satisfactory Academic Progress for financial aid students will be determined at the end of each payment period/semester (summer, fall/winter, or spring semester).
- Students who are initially in good standing but now have a cumulative GPA of less than 2.0 and/or their cumulative non-grades are greater than 33% will receive Warning Letters but remain eligible for the following term of enrollment in the LACCD.
- Students who are disqualified from financial aid will be notified by email or mail and receive information regarding the petition process.
- Students disqualified at any college in the LACCD are disqualified at all colleges within the LACCD.

DISQUALIFICATION
Students will be disqualified if they have one or more of the following deficiencies:

- Cumulative GPA is less than 2.0 following a semester for which the student received a Warning Letter.
- Cumulative non-grades are greater than 33% following a semester for which the student received a Warning Letter.
- Total units attempted (excluding ESL and Basic Skills/Remedial classes) are equal to or greater than ninety (90).
- An Associate or higher degree has been earned outside the LACCD. Degree information received and posted to the District Student Information System during a semester will be evaluated for the following semester for potential disqualification.

WARNING LETTER
Students will receive a Warning Letter (by mail or email) if they were initially in good standing (based on SAP standards) but at the end of their most current semester they show one of the following academic deficiencies:

- Cumulative GPA is less than 2.0.
- Cumulative non-grades are greater than 33%.

MAXIMUM TIME LENGTH
Students who are attending for the purpose of obtaining an Associate of Arts Degree (AA), an Associate of Science Degree (AS), a Certificate, or completion of requirements for Transfer to a four-year college are allowed 90 attempted units in which to complete their objective.

Exceptions will be made only when the requirements of a student’s objective cause the student to exceed the maximum time limit.

SHORT-LENGTH CERTIFICATE PROGRAMS
Some certificate objectives in the LACCD colleges may be completed in less time than that required for the Associate of Arts, Associate of Science and Transfer objectives.

The following table shows the normal completion time and maximum time for certificate programs of varying length.

<table>
<thead>
<tr>
<th>UNITS REQUIRED FOR THE CERTIFICATE PROGRAM</th>
<th>NORMAL LENGTH</th>
<th>MAXIMUM LENGTH</th>
</tr>
</thead>
<tbody>
<tr>
<td>10 to 24</td>
<td>2 semesters</td>
<td>3 semesters</td>
</tr>
<tr>
<td>25 to 36</td>
<td>3 semesters</td>
<td>5 semesters</td>
</tr>
<tr>
<td>37 to 48</td>
<td>4 semesters</td>
<td>6 semesters</td>
</tr>
</tbody>
</table>

To be eligible for financial aid, a program must be at least six (6) months in length with a minimum of sixteen (16) units. Students enrolled in a certificate program may continue to qualify for financial aid up to ninety (90) attempted units, six (6) full-time semesters, or the equivalent, if they are planning to obtain an A.A. or A.S. Degree, or to Transfer to a four-year school in addition to obtaining the certificate.
PETITION PROCESS TO APPEAL FOR FINANCIAL AID DISQUALIFICATION

If the student is disqualified due to not meeting progress, the student may submit a petition for reinstatement or extension of financial aid.

To submit a Petition for reinstatement or extension of financial aid, you must downloaded the form at:

http://college.lattc.edu/financialaid/about-financial-aid/forms/

and submit to the Financial Aid Office before the established deadline.

There are two (2) levels in the petition process at the college for each type of petition (reinstatement or extension).

1. The first-level petition must be reviewed by a committee. The result of the petition will generally be provided to the student in writing to the student’s LACCD email within 30 calendar days. During peak periods, which are July through September and January through February, the review process may take up to six (6) weeks due to the number of petitions received. If the first-level petition is denied, the student may submit a second-level petition. The second-level petition form is available in the Financial Aid Office.

2. The second-level petition is reviewed by the Financial Aid Administrator or designee. Students will be notified in writing to the student’s LACCD email of the result of the petition within 14 calendar days.

3. An Administrative District Review may be initiated by the student who reasonably believes that the college, state, and/or federal guidelines were applied incorrectly, and therefore, adversely affected the student’s financial aid status, rights and privileges.

A request for Administrative Review can only be submitted until after denial from the first-level and second-level petitions.

An Administrative Review is conducted by a district-appointed administrator. Administrative Reviews must be submitted before the end of the specified semester for which the student is requesting reinstatement or extension of financial aid eligibility.

SUMMER AND WINTER FINANCIAL AID

Summer and Winter terms are included in the evaluation of Satisfactory Academic Progress Standards. Summer is considered a separate semester for evaluation purposes. Winter term, as it is combined with fall semester for payment purposes, will be included with fall semester for SAP evaluation purposes.

FRAUD

A student who attempts to obtain financial aid by fraudulent means will be suspended from financial aid for unsatisfactory conduct.

The college will report such instances to local law enforcement agencies, to the California Student Aid Commission, to the Federal Government and the Office of Inspector General.

Restitution of any financial aid received in such manner will be required.

OTHER INFORMATION YOU SHOULD KNOW

State Tax Offset

Students should be aware that state income tax refunds might be offset by the institution for repayment of financial aid funds if it is determined the students were ineligible to receive funds, have defaulted on a student loan, or owe other debts to the school.

Special Circumstances

In certain cases, a family’s financial situation can change because of:

- Death in the family
- Separation or divorce
- Loss of employment
- Loss of non-taxable income or benefits

In such cases, the student should contact the Financial Aid Office.

Foster & Kinship Care Education Program

Phone: (213) 763-3665
Location: Redwood Hall C-100

The Los Angeles Trade-Technical College Foster and Kinship Care Education program provides quality education and support services to foster parents, adoptive parents, related care providers, non-relative extended-family care providers, legal guardians and foster and kinship care youth.

Available workshops and services include: Foster & Kinship Care Education (FKCE); Working with Special Needs Children (D-Rate Certification & Renewal); Working with Medically Fragile Children (F-Rate Certification & Renewal); Whole Family Foster Home ~WFFH~ & Shared Responsibility Plan ~SRP~ also known as SB500 (W-Rate Certification & Renewal); Partnering for Permanence and Safety, Model Approaches to Partnerships in Parenting (PS–MAPP/Foster Parent Certification); and Emancipated Foster Youth Support (Guardian Scholars Program).

GAIN/CalWORKs Program

Phone: (213) 763-7109
Location: Juniper Hall ST-403

GAIN/CalWORKs is a job training program that provides extensive services for participants receiving Temporary Aid for Needy Families (TANF). Educational services include instructional programs in Adult Basic Education, GED Preparation, Tutoring, and English as a Second Language, Certificate and AA/AS Degree Programs in Career Technical Educational training. General Educational/Programs and Personal Development.

Our highly trained staff provides academic, career and personal counseling and case management. Job development services include career/life skills workshops, work study, work experience, and post-employment services. Childcare is provided through our campus Child Development Center.

The collaborative services with the County Department of Public Services/GAIN (DPSS) include: contracts, childcare, transportation, textbooks, supplies, progress reports, training and employment, and outside agency verifications. Collaborative partnerships with the campus Career/Employment Center, Employment Development Division (EDD) and County DPSS/GAIN involve: Job Expos, Job Assistance, and Career/Job Development Workshops. We work closely with One Stops, Work Source Centers, and Workforce Investment Boards and other community based agencies including our CalWORKs Advisory Board.

The ultimate program goal is to provide quality training and services to all eligible students in their transition from welfare to work.

International Student Center

Phone: (213) 763-5345
Email: intstud@lattc.edu
Location: Juniper Hall ST-316
Website: http://college.lattc.edu/counseling/international-student-center/

The international student center at LATTC provides support services and referrals to all F-1 Visa students attending the college. Services include processing applications, issuing I-20s, providing information and resources regarding F-1 visa policies, advising regarding educational and career goals, informing students regarding ASO activities and scholarship opportunities, and referring students to other resources (i.e., tutoring, learning skills, book-loan program) available at the college.

The various services and programs performed by the International Student Center staff include the following key areas:

- Comprehensive International Student Orientation
- Admissions processing and file evaluations for timely enrollment.
- Strategic marketing, recruitment, travel & outreach to maintain/grow International enrollment.
- Comprehensive immigration advising, counseling, and processing based on Federal Regulations.
- Thorough academic counseling, advising, and transfer/career assistance for continuing population.

The International Student Center provides international students with the information and support services they need to meet their educational goals at LATTC while adhering to the policies and procedures of the United States Citizenship and Immigration Services (USCIS). The International Student Center enters adds to student services in areas pertaining to the college experience for diverse populations, academic and career planning, and university transfer options. In short, the International Student Center compliments the overall campus community in meeting educational needs in an era of technology, career and technical, and rapid globalization.
The Library offers a diverse collection of curriculum-centered, academic and vocational education materials. Research resources include library subscription databases, books, a selection of Faculty Reserve course textbooks, print periodicals, and internet access. The book collection, research databases and online periodicals are accessible 24/7 via the online public access catalog and the Library research databases remote access available at website: http://library.lattc.edu. The Library offers free, time-limited internet access to currently enrolled LATTC students and individual study areas and small group rooms are available. Students need a valid, current student identification card to qualify for Library borrowing privileges. Loan periods are four weeks for circulating books and two hours or one week for selected Library Reserve materials.

Faculty Librarians offer individualized research assistance at the Reference Desk and educate students in developing research skills to enable them to succeed in their course work and research interests. Library Faculty also offers Library resources instruction in Library workshops, Faculty-scheduled Library orientations, and one-unit Library Science 101 Library Research Methods classes.

### The OSL Student Lounge
The OSL Student Lounge is open to all LATTC students. The lounge doubles as a study lounge during midterms and finals. On special occasions the lounge is used as a community gathering location.

### The Office of Student Life (OSL)
The Office of Student Life (OSL) provides opportunities for students to become engaged in educational, social and community service activities in and outside the classroom. Services such as the club activities, discounts to social events, publicity through the student bulletin and bulletin boards are offered. Other activities handled by this office include: ASO Student Council Board meetings, Inter Club Council Board meetings, and Dean’s Honors Awards Ceremony, ASO Chartered Club meetings, Commencement, ethnic and multicultural programming, club fairs, blood drives, scholarships, and SkillsUSA.

The OSL Student Lounge is open to all LATTC students. The lounge doubles as a study lounge during midterms and finals. On special occasions the lounge is used as a community gathering location.

### Online Education
Online courses at LA Trade-Tech College provide the opportunity for students to take classes in a setting other than the traditional face-to-face classroom. LATTC offers courses to meet your individual needs and preferences. All course materials and class activities can be accessed online 24/7 to meet your needs while you are at home, your office or on a trip. With the use of innovative course delivery software, our professors deliver quality instruction at a distance.

### How to register for online classes:
If you are an existing LATTC student, just enroll in the online class as you would any other class, or if you are a new LATTC student, enroll in the college first. Please go to http://www.lacolleges.net/admissions/ to enroll online. Once you are enrolled in the college, you can proceed to register for your online class. You should print the confirmation of online enrollment page at the end of the process. The online application takes two days to process.

### Are there any special meetings, either on campus or online? Do I have to log in at a specific time?
Each teacher has the right to request either on-campus or online meetings if they feel it is best to do so. Some of the reasons they may choose to require these meetings is to ensure the student is who s/he claims to be and is the person actually doing the work. This is a new federal mandate. Or, teachers may require an on-campus meeting to provide materials or an orientation to help students get off to a great start.

Most online classes are done asynchronously. This means a student logs in at regular intervals of his/her choosing during the week. Some classes do schedule conferences or webinars where students gather online at the same time. Some instructors have online office hours at set times for students to log on and get help. Students should log into their class every couple of days and more often for short term classes.

### What is considered attendance in online classes?
Online classes consider the weekly submission of assigned work as attendance. Logging into the system and not keeping up with assigned activities is not considered attendance in online or hybrid classes.
Classes have already started - How do I get into an online class?
Send the instructor an email request to add the class. Full directions found: https://ilearn.laccd.edu/courses/1967/pages/getting-set-up-with-canvas.

How do I contact my instructor?
You can use the college directory to send an email. If you don’t find your instructor listed, you can call 213-763-3988 or 213-763-3733 or send email to online@student.lattc.edu with your questions.

INSTRUCTIONAL TELEVISION (ITV)
Each semester, the District-wide Instructional Television program presents, via television, transferable undergraduate college credit courses. Instructional Television courses are convenient, flexible and especially suitable for college students needing to supplement their on campus program or to add classes for those times when campus attendance is not possible.

Students enroll by mail, telephone or the Internet. They may view telecourse lessons at home or at a Learning Center at one of the Colleges. Students will complete reading and study assignments, attend seminars held approximately once a month on weekends at a Los Angeles Community College near their home, and complete a midterm and final exam. Interested students are invited to attend the Instructional Television program on the campus of Los Angeles Mission College, 13356 Eldridge Avenue, Sylmar, CA 91342. Call 800-917-9277 or (818) 833-3594 for information.

General Student Parking ($20.00 for Fall & Spring Semesters):
• 24th St. Parking Structure, 6th Fl. (top level) -Entrance: 24111 St., between Grand Ave. and Olive St.

Preferred Student Parking ($10.00 for Winter & Summer Sessions):
• Valid in all Preferred and General Student Parking Lots.

PLEASE NOTE: After 3:00 p.m. a student with any parking permit (general or preferred) is allowed to park in any designated student parking area (whether preferred or general).

Parking
You are responsible for knowing LATTC parking rules and regulations. This information is intended to provide students with basic guidelines on parking at the college. Student Parking Guidelines may be obtained from the LATTC Sheriff’s Station, Cypress Hall D-150, the Business Office, Juniper Hall ST-Lobby, and the Administrative Services Office, Juniper Hall ST-305.

• Student parking regulations are enforced starting the first day of classes each semester through final examinations. A student parking decal is valid for the current academic term only and must be displayed at all times a vehicle is parked on college property. Saturday and Sunday parking rules and regulations are enforced in the same manner as weekdays.

• Parking decals are made of removable mylar and should be affixed to the inside rear window, (lower right side, facing outward). Vehicles with tinted rear windows may display the decal in the lower right or lower left front window. Any vehicle displaying a decal which is expired, altered, reported lost or stolen, or not completely visible is subject to a citation.

• A valid college parking decal and a DMV placard must be displayed on any vehicle parked in a designated disabled stall.

• Regulations governing disabled parking, red curbs, no-parking zones, fire lanes, special permit areas, and areas that have parking lime limitations are enforced 24 hours a day, including weekends.

LATTC assumes no responsibility or liability for your car or its contents while parked in the lots. Also walking/wheelchair escort service only, is provided upon availability for students with physical or other limitations. Note: This is not a shuttle service. Call the College Sheriff’s Station at (213) 763-3600 and an officer will be dispatched to your location.

Inquiries regarding the college’s parking program, parking rules and regulations, parking decal use and enforcement should be directed to the following offices during normal business hours: Business Office, (213) 763-7225, and the Administrative Services Office, (213) 763-7040. However, LATTC Sheriff’s Station personnel are on duty 24 hours a day, 7 days a week to assist with parking decal use and enforcement issues. Please call (213) 763-3600.

Decal Sales, Refunds, and Exchanges: Please contact the Business Office, Juniper Hall ST-Lobby, (213) 763-7225.

Parking Citation Appeals: Individuals who believe a citation was issued to them in error must appeal it immediately by completing an Administrative Review form (available in the Sheriff’s Station, Cypress Hall D-150 or the LATTC Sheriff’s website under Parking Information). Appeals must be mailed to: Los Angeles Trade Technical College, c/o Parking Citation Service Center, P.O. Box 11923, Santa Ana, CA
Note: This information is subject to change without notice.

ENFORCEMENT OF TRAFFIC AND PARKING REGULATIONS
All persons driving a motor vehicle on campus are required to comply with the traffic laws of the State of California and the rules and regulations pursuant to Section 21113A of the California Vehicle Code. Violations of the regulations set forth above will result in a citation being issued. The College reserves the right to remove vehicles from parking lots as follows: abandoned vehicles; vehicles parked in such a manner as to constitute a serious hazard; vehicles which impede the operation of emergency equipment; vehicles which park illegally on a recurring basis. The registered owner is responsible for any removal costs which may occur.

Liability
Los Angeles Trade-Technical College, the Board of Trustees, and the Los Angeles Community College District shall not be responsible for damage to any motor vehicle, theft of its contents, or injury to persons operating a vehicle parked on or off the campus unless liable under Government Codes including, but not limited to Government Code 810 to 9666.6 inclusive (Reference: LACCD Board Rules 7401 and 7402) Direct inquiries to College Sheriff, CY-150, (213) 763-3600.

Citations and Bail
Citations will be issued to all vehicles on college property in violation of parking rules and regulations and must be paid within 21 days of the date issued. Parking Citation Appeals: Individuals who believe a parking citation was issued to them in error must appeal it immediately by completing an Administrative Review form (available at the College Sheriff Office, CY-150, or the LATTC Sheriff Department website under Parking Citations and Appeals). Appeals must be mailed to: Los Angeles Trade-Technical College, c/o Parking Citation Service Center, P.O. Box 11923, Santa Ana, CA 92711. Failure to immediately pay or appeal a citation may result in substantial penalties and a Department of Motor Vehicle (DMV) hold on your vehicle registration.

Transportation
The college is located near the intersection of the Harbor and Santa Monica freeways, and is directly across the street from the Metro Blue Line’s Grand Avenue/LATTC and Metro Expo Line’s 23rd Street/LATTC stations. In addition to the light rail system, there are more than 40 bus lines stopping at or within two blocks of the College. For more information, please consult the College website at www.LATTC.edu.

Puente Project
Phone: (213) 763-7066
Location: Juniper Hall ST-413
Email: puente@lattc.edu

The Puente Project is an academic preparation program whose mission is to increase the number of educationally disadvantaged students who:

- Enroll in four-year colleges and universities
- Earn college degrees
- Return to the community as mentors and leaders for future generations

The Puente Project will prepare students to successfully transfer to four-year colleges and universities and return as role models in the community.

Puente uses a combination of teaching, counseling and mentoring to achieve its educational objectives. These three components combine to provide a focused and engaging learning community that allows students to achieve greater gain than would be possible using any single component alone-the whole is greater than the sum of its parts. To be eligible for the program prospective Puente students must:

- Attend a Puente orientation in the spring or summer prior to entering the program in the Fall semester
- Be interested in transferring to a four-year university
- Be eligible to register for English 28 or English 100 in the Fall semester
- Be willing to make a one year commitment to the program
- Be willing to take Puente English and Personal Development classes during Fall and Spring semesters
- Be available to participate in extracurricular activities
- Return to the community as mentors and leaders for future generations
- Earn college degrees
- Enroll in four-year colleges and universities
- Act as mentors and leaders for future generations

Sheriff’s Department
Phone: (213) 763-3600
Location: Cypress Hall D-150

The college contracts with the Los Angeles County Sheriff’s Department for all of its law enforcement services. These officers undergo specialized training through the Los Angeles County Sheriff’s Academy designed to meet the needs and problems of a contemporary college.

The college prides itself on its safety record maintained on campus. However, effective law enforcement and protection require citizen cooperation and assistance. To that end, please follow a few basic safety tips: if you must remain in campus buildings after closing time, make an effort to do so in the company of at least one other co-worker, or student. The campus is well
lighted but it is wise, again, to employ the “buddy system” when walking to your car or traveling to other locations. Refrain from using shortcuts, staying on the well-traveled thoroughfares. And please, if you see something, say something.

Personal property, purses, briefcases, etc., should never be left unattended. Take such items with you if you are leaving the office, classroom, or library study area. Keep your auto locked, never leave the keys in the ignition, and avoid leaving property where it is visible on the seats. Give your car the quick “once over with a critical eye” before entering, for possible break-in or persons in the rear seat or floor area.

The rapid and successful detection of crime and apprehension of criminals depends heavily on speedy reporting and dissemination of facts to the College Sheriff’s Department. For information, inquire at the Cypress Hall “D” building, Room 150 or call (213) 763-3600.

The lost and found is located in the College Sheriff’s Department, Cypress Hall D-150. A valid California Driver’s License, California Identification Card or LATTC Student Identification Card is required for claimed property.

### Student Health Center

**Phone:**  (213) 763-3764/3765  
**Location:**  Mariposa Hall MA-107A  

The LATTC Student Health Center in partnership with St. Johns Well Child and Family Center provides many services for currently enrolled students. The Student Health Fee provides the majority of services free of charge.

This includes:
- Non-emergency care, including health screenings, general physical exams and limited treatment of illnesses
- Health and nutrition Information; health education literature
- Free immunizations
- Laboratory tests
- TB skin tests
- Mental health and substance abuse counseling
- Women’s health services
- Health workshops

### Student Intercollegiate Athletics

**Phone:**  (213) 763-3726  
**Location:**  Willow Hall J-202  

LATTC is a member of the South Coast Conference of which there are 10 colleges. The other colleges are: East Los Angeles College, Los Angeles City College, El Camino College, Cerritos College, Long Beach City College, Mt. SAC College, Pasadena City College, Los Angeles Southwest College, and Compton College. In the Fall, sports offered are Men’s and Women’s Water Polo, Men’s and Women’s Basketball and Women’s Volleyball. In the Spring, sports offered are Men’s and Women’s Swimming.

To be eligible for intercollegiate athletic program participation, students must be enrolled and attending 12 or more units. They must also have a physical examination and be cleared by our medical staff.

### College Colors and Mascot

The college colors are purple and gold. The college mascot is the Beaver, and LATTC students are known as Beavers.
THE OPEN COMPUTER LAB

Location: Mariposa Hall MA-104 M-F
          Mariposa Hall MA-109 Saturday only
Phone: (213) 763-3950

The Open Computer Lab ("Open Lab") is available to all LATTC students and faculty free of charge. Students must be enrolled at LATTC or any college in the Los Angeles Community College District and have a current student ID card. Students may use the Open Lab for general computer use, the Internet, and online class access. For Lab hours or more information, please call (213) 763-3950.

UNIVERSITY TRANSFER CENTER

Phone: (213) 763-7154
Location: JH-203
Email: UTC@lattc.edu
Website: http://college.lattc.edu/utc

The University Transfer Center (UTC) offers a variety of activities, services and strategies to explore, discover and create your personal transfer pathway. The UTC is committed to helping you actualize your transfer goal as a partner in your planning no matter where you want to transfer. Representatives from the University of California, California State University as well as private institutions such as USC, visit the Center to provide up-to-date information to students via workshops or individual appointments. Visit our website: http://college.lattc.edu/utc to find out more about our activities transfer information and resources.

TRANSFER INFORMATION

Websites with Transfer Information:

As a student, the Internet is one of your most important resources for transfer information. We have workstations available to use in our center if you don't have internet access at home. So, please stop by and let us help.

You can use the LATTC Transfer website as a portal to transfer information for the UC's, CSU's, privates and out-of-state colleges and universities:

LATTC Transfer Website:
college.lattc.edu/utc

University of California Transfer Information:
uctransfer.universityofcalifornia.edu

California State University Transfer Information:
CSU Mentor: www.csumentor.edu

California Private and Independent Transfer Information:
AICCU: www.aiccu.edu

Which courses transfer?
CALIFORNIA PUBLIC INSTITUTIONS: UC AND CSU

Assist: As a prospective transfer student, it is important to make sure that the community college courses you take are acceptable to the university for transfer credit. Assist is California's official statewide repository of transfer information for the California State University and University of California systems. Website: www.assist.org.

LATTC AND UNIVERSITY OF CALIFORNIA TRANSFER PARTNERSHIPS

LATTC has Transfer Admission Guarantees with many UC campuses. Complete details can be found at uctransfer.universityofcalifornia.edu

LATTC PRIVATE INSTITUTION TRANSFER PARTNERSHIPS

LATTC has transfer agreements with some private universities. Please contact the University Transfer Center for more details.

DEVELOP AN EDUCATIONAL PLAN

The most important action you can take to ensure success is to meet early with a LATTC Counselor and develop an educational plan. This plan will include courses you need to meet transfer requirements. Using and updating an educational plan throughout your attendance at LATTC will ensure the most direct path to transfer and earning a baccalaureate degree.

DISCLAIMER

Every effort has been made to ensure the articulation information for the California State Universities and the University of California institutions are accurate, including the CSU GE and IGETC areas. However, this information is unofficial and should be checked against the official information found on the ASSIST website at www.assist.org.
The Umoja Project is an academic preparation program funded by Student Equity funds whose mission is to increase the success rates for African Americans and other students in meeting their educational goals at LATTC with a focus on English and Math.

Students benefit from the Umoja program in the following ways:

- Students belong to a community of students, faculty and staff that support them in meeting their educational goals.
- Students are exposed to courses and teaching strategies designed to support and empower students of color.
- Workshops and activities are related to the skills necessary to be a successful student.
- Opportunity to attend Umoja-sponsored conferences and regional workshops with students from other colleges.
- Access to Umoja Community scholarships.
- Opportunity to learn about unique transfer options including on-the-spot admission to several Historically Black College and Universities (HBCUs) at the annual Fall conference. See http://extranet.cccco.edu/HBCUTransfer.aspx for the list of participating Colleges and Universities.
- Attend HBCU tours at a discount rate.
- Opportunity to develop leadership skills in a supportive environment.
- Participate in individualized and/or group tutoring available in Math and English.
- Assistance with textbooks, supplies and public transportation assistance (U-PASS or LATTC parking permit).

Veterans Student Center

Phone: (213) 763-5305 or (213) 763-5572
Location: Mariposa Hall MA-101
Email: veterans@lattc.edu

Los Angeles Trade-Technical College courses are approved for the training of eligible Veterans, Reservist, National Guard, and eligible dependents, under Federal and State Assistance programs. In order to start training under any of these programs, eligible students should visit the Veterans Student Center.

All Veterans Administration rules and regulations apply to all eligible students attending a Los Angeles Community College and receiving benefits under Chapter 30, 31, 33, 35 & 1606 and National Guard of the United States. All benefits have to be approved through the Department of Defense (DOD).

Credit for Prior Military Service Training

Veterans and other eligible persons who are receiving benefits must provide the College with documentation of all previous educational and training experience, including Military Service Training Schools and/or Military Occupational Specialties. This experience will be evaluated and appropriate credit granted.
ATTENDANCE AND WITHDRAWAL
Students are required to attend all meetings of every class in which they are registered. The last day of a student’s attendance in class must be reported to the Veterans Administration (VA) to avoid overpayments. It is the responsibility of the student to immediately inform the Office of Veterans Affairs of any reduction in unit load. It is the responsibility of the instructor to notify the Admissions Office of the last day of attendance of students. The Veterans Administration will then be notified in a timely manner of the students who withdraw from class.

PROGRAM PLANNING FOR VETERANS
To be eligible for VA Education Benefits the student must select a major and choose courses from those listed under the major in the catalog. All students will need an Educational Plan and seek counseling from Counseling Services. The Veterans Administration will not pay benefits for courses that do not fit in a student’s selected major. If a student has prior training and education from another institution, it is the student’s responsibility to have the transcripts forwarded to the Admissions Office.

ACADEMIC REQUIREMENTS
All students are subject to the academic standards for probation and dismissal as listed in this catalog. If a Veteran or other eligible person fails to obtain a cumulative grade point average of 2.0 or better after 3 consecutive semesters, the student’s educational benefits will be discontinued.

60 UNIT RULE AND UNIT WORKLOAD
Once the student has received units sufficient to equal or exceed the normal program printed in the catalog, the Office of Veteran’s Affairs must certify the additional units needed for the student to complete the Associate degree in any major. The student is eligible for further training at the college only by taking courses which are required for upper division status at a transfer institution, or by changing the objective. These courses must be approved by the Veterans Administration. The 60 Unit Rule requires that an eligible student see a counselor before any more courses can be certified by the Office of Veteran’s Affairs for payment of benefits.

The Veterans Administration uses the following definition for eligibility:

- Full-time benefits: 12 or more units
- 3/4-time benefits: 9 through 11 units
- 1/2-time benefits: 6 through 8 units
- Less than 1/2 time: 3 through 5 units (Reservist and National Guard)

WORKSOURCE CENTER
Phone: (213) 763-5951
Location: Redwood Hall, C-106

The WorkSource Center is part of a District-wide initiative that is designed to support the learning experience of all LACCD college students. The collocated center is part of a national workforce development program that seeks to assist individuals seeking to:

- Develop new job skills
- Receive an array of support services in order to increase the potential for successful completion
- Increase the ability to compete in today’s job market

The WorkSource Center is funded by the City of Los Angeles Workforce Development Board and strives to prepare eligible students to attend short-term training as well as enter college courses that can help ensure their successful return into the workforce. The center is funded by the Workforce Innovation and Opportunity Act of 2014 (WIOA) and offers a range of services that includes short-term skills training, case management, career exploration, on-the-job training, support services, and job-placement assistance. As a federally-funded program, the WorkSource Center can assist individuals seeking gainful employment by accessing an array of training activities as well as added-value resources such as, but not limited, the following:

- Unemployment insurance benefits through the Employment Development Department
- Access to support services such as transportation, uniforms, childcare, etc.
- Labor market information that can be used to identify good-paying jobs and careers
L.A. TRADE TECH COLLEGE FOUNDATION

FOUNDATION.LATTC.EDU

The Los Angeles Trade Technical College Foundation supports the school through scholarships, grants, and programs. The Foundation keeps in touch with alumni and community partners to promote employment opportunities and raise funds for LATTC.

Watch for announcements about our student and alumni benefits!

**GRADUATION REQUIREMENTS**

**Authorization Board Rule (Board Rule 6200)**

The Board of Governors of the California Community Colleges has authorized the Los Angeles Community College District Board of Trustees to confer the degrees of Associate in Arts and Associate in Science and Certificates of Achievement.

**Catalog Rights (Board Rule 6202)**

For these purposes, a catalog year is defined as beginning Fall semester and continuing through the subsequent summer. A student remaining in the College District may elect to satisfy the degree, certificate or graduation requirements in effect at the college from which the student will either earn his/her degree, certificate or graduate:

1. At the time the student began such attendance at the college, or
2. At the time of graduation.

For the purposes of implementing this policy, the college may develop a policy to:

1. Authorize or require substitutions for discontinued courses; or
2. Require a student changing his/her major to complete the major requirements in effect at the time of the change;
3. Allow students to select an intervening catalog in years between the student's beginning continuous attendance and time of graduation.

*a. LATTC adopted policy: Recommendation to augment student catalogue rights, so they may apply for degrees and certificates in any time frame during their academic career. (Academic Senate - 05/05/2015)*

The college’s policy shall be developed in consultation with the college Academic Senate in accordance with the provisions of Chapter XVIII of the Board Rules - ACADEMIC SENATE AND THE BOARD OF TRUSTEES SHARED GOVERNANCE POLICY, and published in all college catalogs under appropriate headings.

This policy does not apply to college programs which are governed or regulated by outside government agencies or which require licensure or certification through one of these agencies.

**Continuous Attendance (LACCD Board Rule 6203)**

“Continuous attendance” means no more than one semester absence within a school year, excluding Summer Sessions and Winter Intersession.

Students granted a “military withdrawal” under the provisions of Board Rule 6701.10, will be considered to be in “continuous attendance” for their required period of military service.

**Competency Requirement (Board Rule 6201.12)**

Students entering prior to Fall 2009 must demonstrate competence in reading, in written expression, and in mathematics. This requirement may be met by achieving a grade of “C” or better in appropriate courses, recommended by the District Academic Senate, and approved by the Chancellor or by achieving a passing score on an examination or examinations recommended by the District Academic Senate and approved by the Chancellor.

Effective for all students entering on or after the Fall 2009 semester, competence in written expression shall be demonstrated by obtaining a satisfactory grade in English 101, or another English course at the same level and with the same rigor as recommended by the District Academic Senate and approved by the Chancellor. Competence in mathematics shall be demonstrated by obtaining a satisfactory grade in Mathematics 125 (Intermediate Algebra), or another mathematics course at the same level and rigor, or higher, and with elementary algebra or higher as a prerequisite, as recommended by the District Academic Senate and approved by the Chancellor.

The competency requirements in written expression or mathematics may also be met by completing an assessment, conducted pursuant to Title 5, CCR, section 55500 and achieving a score determined to be comparable to satisfactory completion of English 101 or Mathematics 125 respectively. That is, students may either place into English or mathematics courses above level of English 101 or Mathematics 125, or they may achieve a satisfactory score on a competency exam or another approved exam as recommended by the District Academic Senate and approved by the Chancellor.

The competency requirements may also be met by obtaining a satisfactory grade in courses with English and mathematics content (but taught in subjects other than English and mathematics), which require entrance skills at a level equivalent to those necessary for English 101 and Mathematics 125, respectively, and are taught at the same level and with the same rigor. The District Academic Senate shall recommend such courses to the Chancellor for approval.

**Course Requirements**

Effective for all students admitted for the Fall 2009 term or any term thereafter, each course counted toward the major requirements must be completed with a grade of “C” or better or a “P” if the course is taken on a “Pass-No Pass” basis.

**Double-Counting of Coursework (Board Rule 6201.17)**

A course may only be counted once for General Education purposes. However, a course may be used to simultaneously satisfy both a General Education requirement and a major/area of emphasis requirement. There is no limit on the number of courses that may be used simultaneously in this manner.

Students may also simultaneously apply the same course toward satisfaction of the LACCD General Education Plan, the CSU GE Breadth Certification requirements and the Intersegmental General Education Transfer Curriculum (IGETC) requirements.
Residency Requirements

a. Students must complete no fewer than 12 units at the college conferring the degree.

b. When the same major is offered at multiple colleges in the LACCD, the degree shall be conferred by the college where the student has taken the majority (greater than 50.0%) of units in the major.

c. Exceptions may be made under special circumstances.

Scholarship Requirement (Board Rule 6201.11)

A “C” (2.0) grade average or better in all college work attempted in the curriculum upon which the degree is based.

Unit Requirement (Board Rule 6201.10)

A minimum of 60 semester units of course credit in a selected curriculum with at least 18 semester units of study in a major or area of emphasis and at least 18 semester units of study in general education.

CERTIFICATES OF ACHIEVEMENT

A Certificate of Achievement is issued in State-approved programs designed for students who are looking for instruction with a high degree of specialization. Certificate programs vary in length, but most have 12 or more semester units, and may be pursued on a full-time or part-time basis. A Certificate program is specific, and no course substitution will be permitted unless approved by the department.

The Certificate of Achievement shall be granted by Los Angeles Trade-Technical College to any student who successfully completes a sequence of courses established by the department and approved by the college in certain designated programs. That sequence of courses shall include but not be limited to the essential occupational courses required in the major. All courses applied to a certificate program must be completed with a grade of “C” or better.

Important Information Regarding Gainful Employment Disclosure Requirements

To qualify for federal financial aid, the law requires that an educational program at a community college must lead to a degree (associate, bachelor’s, graduate, or professional) or prepare students for “gainful employment in a recognized occupation.” Further, federal regulations require community colleges that participate in the Federal student financial assistance programs to report certain information about students who are enrolled in Gainful Employment Programs. At Los Angeles Trade-Technical College, Gainful Employment programs are programs that prepare students for obtaining a Certificate of Achievement.

In accordance with the Gainful Employment disclosure regulations, a website has been developed to provide students with important information on each Certificate of Achievement program (e.g., Gainful Employment program) at the college including, but not limited to: program costs, employment projections and profiles related to the occupation(s) the program trains students for, and program completers. The Certificate of Achievement website is available at: http://college.lattc.edu/catalog/gainfulemployment. The information provided for each Certificate of Achievement program on this website fulfills the Gainful Employment federal reporting requirements described above.

NONCREDIT PROGRAMS

Noncredit programs are an organized sequence of two or more courses leading to a defined objective, certificate, a diploma, or license. Noncredit programs at Los Angeles Trade-Technical College generally fall into these two program areas: career development and college preparation, or career technical programs with “high employment potential” that provide 288 hours or more of instruction. Courses comprising noncredit programs are not applicable to a credit certificate or degree program.

APPRENTICESHIP PROGRAMS

Apprenticeship programs prepare students for any profession, trade, or craft that are learned through a combination of on-the-job formal education. Los Angeles Trade-Technical College’s apprenticeship programs are intended for students who are indentured to learn a trade under agreement with the State of California Division of Apprenticeship Standards. As such these programs are restricted to indentured apprentices only.

Additional and Concurrent Associate Degree (Board Rule 6204)

Additional Associate Degrees:

Students who have previously earned an associate degree from a United States regionally accredited institution will be granted an additional associate degree when the following requirements have been met:

1. Pursuant to catalog rights, described in Board Rule 6202, completion of all current degree requirements – i.e., scholarship, residency, competency, general education and major requirements.

2. For local associate degrees, completion of a minimum of six (6) units in the major at the college awarding the degree. For the Associate Degrees for Transfer (ADTs), there is no major unit minimum requirement that must be completed at the college awarding the degree.

3. Major course requirements completed in previous degrees awarded can be used again for additional degrees.

4. All courses that count towards the associate degree major or area of emphasis must be satisfactorily completed with a grade of “C” or higher or “P” (pass).

5. There is no limit to the number of additional associate degrees that can be awarded provided that all the above requirements have been met.

6. Completion of any additional requirements, including new units, as determined by the college through collegial consultation with the college Academic Senate in accordance with the provisions of Chapter XVII of the Board Rules – Academic Senate and the Board of Trustees Shared Governance Policy.
Concurrent degrees:
Concurrent degrees are degrees awarded in the same semester. Students may petition and be awarded concurrent associate degrees in different majors if the following criteria are met:

1. Pursuant to catalog rights, described in Board Rule 6202, completion of all current degree requirements: scholarship, residency, competency, general education and major requirements.
2. There is no maximum number of concurrent degrees that a student may be awarded.
3. If a course is a major requirement for each concurrent degree, it may be applied toward satisfaction of each major degree requirement.
4. Completion of the General Education requirements for one associate degree will fulfill the general education requirements for concurrent degrees, if the same general education pattern applies to the additional degree. If each degree requires the completion of different general education patterns, the general education pattern of each degree must be fulfilled. Courses may be applied toward the general education requirements for each concurrent degree.
5. All courses that count towards the associate degree major or area of emphasis must be satisfactorily completed with a grade of "C" or higher or "P" (pass).
6. The LACCD does not offer double majors.

Note: Students who have taken college courses elsewhere (outside the LACCD system) must have an official transcript sent from each of those colleges to LATTC’s office of Admissions and Records when they enroll at the college.

Graduation Application for Degree/Certificate
a. You must file an online petition for the degree/certificate available at http://college.lattc.edu/graduation/applying-graduation/
b. Please check with the Admissions Office for graduation deadlines.
c. Although not required, you are strongly encouraged to see a counselor prior to submitting the online graduation petition form.

ASSOCIATE IN ARTS (AA) AND ASSOCIATE IN SCIENCE (AS) DEGREES
(Degrees have the following common requirements -Title 5 section 55063)

Associate in Science (AS) and Associate in Arts (AA) degree programs are composed of two parts: major program requirements and electives, and general education program requirements.
ASSOCIATES DEGREE GRADUATION PLAN
2016-2017

SUPPLEMENTAL INFORMATION FOR HIGH UNIT PROGRAMS OF STUDY/MAJORS

Attention LATTC Students: The standard Associate Degree General Education Plan in the Los Angeles Community College District (LACCD) requires 21 General Education Units spread across five (5) areas.

However, per LACCD Board 6201.14, effective July 1, 2016, Los Angeles Trade Technical College (LATTC) adopted a policy in which students completing Programs of Study with 42 or more Major Units may waive the number of General Education Unit requirement from 21 to 18 units.

The following conditions must be met for this 3-unit reduction:

1. Take at least one course in each of the following areas:
   A. Natural Sciences (3 semester/4 quarter units)
   B. Social and Behavioral Sciences and American Institutions (3 semester/4 quarter units minimum)
   C. Humanities (3 semester/4 quarter units minimum)
   D. Language and Rationality
      - D1. English Composition (3 semester/4 quarter units minimum)
      - D2. Communication and Analytical Thinking (3 semester units/4 quarter units minimum)

2. Total of units required from Areas A-D is 18 units

Note: major coursework is not eligible for double-counting in the General Education areas. Please consult with a counselor for more details.

# Graduation Requirements and Educational Programs

**Los Angeles Trade Technical College**  
**Associates Degree**

## 2016-17  
**GENERAL EDUCATION REQUIREMENTS**  
**LACCD BR 6200**

**General Education Requirements:** Minimum of 21 semester / 28 quarter units.

Major Requirements: Minimum of 18 semester units in a single or related field. Effective for all students entering Fall 2009 or later, each course counted towards the major or area of emphasis requirements must be completed with a "C" (2.0 or equivalent) or better or a "P" if the course is taken on a pass-no-pass basis. Please see a counselor and check the college catalog or the LATTC homepage “Program Fact Sheets” for specific major requirements.

**NOTE:** Students completing High Unit Programs of Study (42 units or more) may reduce the General Education requirements to 18 units. Please refer to Page 2 and consult a counselor for more details.

Los Angeles Trade-Technical College  
2016 - 2018 GENERAL CATALOG

DRE/MM v2 04/2017
ASSOCIATE DEGREE GRADUATION REQUIREMENTS

1. **Unit Requirement**: A minimum of 60 degree-applicable, semester units of course credit in a selected curriculum. (6201.10)

2. **Scholarship Requirement**: A “C” (2.0) grade average or better in all work attempted in the curriculum upon which the degree is based. (6201.10)

3. **Competency Requirements**: Beginning Fall 2009, students must demonstrate competency in Reading & Writing and Math by completion of the following with a grade of “C” or higher. Reading and Writing Competency (Administrative Regulation E-79):
   a. **English 101**
   b. **Math Competency: Math 125 or higher**

4. **Residency Requirement**: Completion of at least 12 units of work in residence and attendance at the college during the semester in which the requirements are completed. Exceptions may be made for injustice or undue hardship. (6201.13)

†† **HIGH UNIT PROGRAMS OF STUDY INFORMATION**

Per LACCD Board 6201.14, Los Angeles Trade Technical College has adopted a policy in which students completing Programs of Study with 42 or more Major Units may waive the number of General Education Unit requirement from 21 to 18 Units. The following conditions must be met for this 3-unit reduction:

1. **Take at least one course in each of the following areas:**
   A. **Natural Sciences** (3 semester/4 quarter units)
   B. **Social and Behavioral Sciences and American Institutions** (3 semester/4 quarter units minimum)
   C. **Humanities** (3 semester/4 quarter units minimum)
   D. **Language and Rationality**
      o D1. **English Composition** (3 semester/4 quarter units minimum)
      o D2. **Communication and Analytical Thinking** (3 semester units/4 quarter units minimum)

2. **Total of units required from Areas A-D is 18 units**

For a list of Eligible Programs of Study/Majors, visit [http://college.lattc.edu/catalog/programs/](http://college.lattc.edu/catalog/programs/)
ASSOCIATE TRANSFER DEGREES (AA-T OR AS-T)

The Student Transfer Achievement Reform Act, Senate Bill 1440 codified in California Education Code sections 66746-66749, guarantees priority consideration for admission to a California State University (CSU) campus for any community college student who completes an “associate degree for transfer”, a newly established variation of the associate degrees traditionally offered at a California community college. The Associate in Arts for Transfer (AA-T) or the Associate in Science for Transfer (AS-T) is intended for students who plan to complete a bachelor’s degree in a similar major at a CSU campus. Students completing these degrees (AA-T or AS-T) are guaranteed admission to the CSU system, but not to a particular campus or major. In order to earn one of these degrees, students must complete a minimum of 60 required semester units of CSU-transferable coursework with a minimum GPA of 2.0. Students transferring to a CSU campus that does accept the AA-T or AS-T will be required to complete no more than 60 units after transfer to earn a bachelor’s degree (unless the major is a designated a “high-unit” major). This degree may not be the best option for students intending to transfer to a particular CSU campus or to a university or college that is not part of the CSU system. Students should consult with a counselor when planning to complete the degree for more information on university admission and transfer requirements.

The following is required for all AA-T or AS-T degrees:

1. Minimum of 60 CSU-transferable semester units.
2. Minimum grade point average (GPA) of at least 2.0 in all CSU-transferable coursework. While a minimum of 2.0 is required for admission, some majors may require a higher GPA. Please consult with a counselor for more information.
3. Completion of a minimum of 18 semester units in an “AA-T” or “AS-T” major as detailed in the section of the catalog. All courses in the major must be completed with a grade of C or better or a “P” if the course is taken on a “pass-no pass” basis (Title 5 § 55063).
4. Certified completion of the California State University General Education-Breadth pattern (CSU GE Breadth); or the Intersegmental General Education Transfer Curriculum (IGETC) pattern.
5. Students must complete no fewer than 12 units at the college conferring the degree.

ADDITIONAL INFORMATION

- LATTC offers the following approved AA-T or AS-T:
  1. Administration of Justice
  2. Early Childhood Education
  3. English
  4. Kinesiology
  5. Mathematics
- To find out which CSU campuses accept each LATTC Associate Degree for Transfer (ADT), please go to [http://www.calstate.edu/transfer/adt-search/search.shtml](http://www.calstate.edu/transfer/adt-search/search.shtml).
- Submit the completed AA-T/AS-T Verification form to the Admissions & Records office during the semester in which you will complete the ADT.
- Please meet with a counselor to discuss your educational and transfer goals.
### AREA A
**ENGLISH LANGUAGE COMMUNICATION & CRITICAL THINKING**
3 courses - Select ONE from each group: A1, A2 AND A3

| A1 | Oral Communication 3 units |
| A2 | Written Communication 3 units |
| A3 | Critical Thinking 3 units |

### AREA B
**SCIENTIFIC INQUIRY & QUANTITATIVE REASONING**
3 courses:
1. Select ONE course from group B1 Physical Science AND ONE course from group B2 Life Science
2. LAB requirement: At least ONE course from B1 OR B2 must include a corresponding lab. Eligible courses are identified with *

B1 Physical Science
- Astronomy 1, 5*
- Chemistry 51*, 70*, 101*, 102*, 211*, 212*, 221*
- Environmental Science 1

B2 Life Science
- Anatomy 1*
- Anthropology 101
- Biology 3*, 5*, 6*, 7*, 21*
- Microbiology 1*, 20*

LABORATORY Requirement met with:

#### B3

### AREA C
**ARTS & HUMANITIES**
Select 3 courses: at least ONE from each group C1 & C2

<table>
<thead>
<tr>

### AREA D
**SOCIAL SCIENCES**
Select 3 courses: at least ONE from TWO different disciplines.

- Administration of Justice 1, 3
- Anthropology 102
- Child Development 1*
- Economics 1, 2
- Geography 2
- Labor Studies 1, 4
- Political Science 1*, 2, 7
- Psychology 1*, 14, 32, 89
- Sociology 1*, 2, 28

### AREA E
**LIFELONG LEARNING & SELF-DEVELOPMENT**
3IN courses considered activity are limited to one unit for this area

- Child Development 1*
- Counseling 20
- Health 2, 6, 8, 11, 21, 43
- Kinesiology (activity) 300-3 thru 334-4*, 366-1 thru 500*
- Kinesiology Athletics 516, 563*
- Kinesiology Major 101
- Kinesiology Minor 201
- Psychology 41
- Sociology 28

CSU GE Policy & Information

- This CSU GE Plan totals approximately 39 units. A minimum of 60 CSU transferrable semester units is required for admission. You will need to complete additional coursework for your major and maybe some elective courses. Please consult ASSIST.ORG for specific major prep coursework and see a counselor to develop an Educational Plan.
- CSU GE Plan courses must be completed with a passing grade. At LATTC that is a grade of A, B, C, D, or P. However, areas A1, A2, A3 and B4, must be completed with a "C" (2.0) or better.
- Courses may be used only once to satisfy one GE area, even if they are listed in the course agreement under more than one subject area. Courses may be used to satisfy both CSU GE and major requirements.
- This advising form may not be the best general education preparation pathway for ALL majors (such as Engineering, Computer Science and Liberal Studies-Teacher Prep). Please consult with a counselor to determine the best plan to meet your educational goals.

WARNING: Many students attend multiple California Community College campuses. If that’s you, be sure to follow the CSU GE at each college of attendance. CSU policy states that CSU coursework completed in a specific subject area will be used in the same area designated by the California Community College at which the course was completed. This is also the policy if you complete courses at more than one of the LACCD colleges.

Governed by CSU Executive Order 1100 www.calstate.edu/app/general_education.shtml
Note: USE www.assist.org to check admission and selection for impacted majors and programs.

CSU Admission Requirements

- Golden Four: All courses must be completed with a grade of "C" or better.
  - A2. English 101
  - A3. Critical Thinking (one course) English 102 or English 103 or Philosophy 8 (for CSULA take English 103, this also meets a graduation requirement)
  - B4. Mathematics (one course) (Check your major requirements to make sure your math also satisfies this requirement)
- 60 transferrable units are required for admission to CSU as an upper division student.

The Admission and unit requirements must be completed prior to admission

- Fall semester: completed by spring for following fall (September)
- Winter quarter: completed by summer for following winter quarter (January)
- Spring semester: completed by summer for following spring semester (January)
- Spring quarter: completed for following spring quarter (March)

Certification is not automatic:

- You must meet with a counselor to review CSU GE completion.
- Official transcripts must be on file in Admissions & Records for GE credit from other institutions attended outside of LACCD.
- Counselor must sign this verification before submission to the Admissions & Records office.
- CSU GE must be fully certified to earn an AA-T or AS-T degree for CSU.
## GRADUATION REQUIREMENTS AND EDUCATIONAL PROGRAMS

### Los Angeles Trade-Technical College

**2016 – 2017 IGETC CSU/UC GENERAL EDUCATION CHECK SHEET — 37 Units Required**

**Disclaimer:** Every effort has been taken to ensure that the information below is accurate and timely. However, this information is unofficial and should be checked against the official information found on the ASSIST website: www.assist.org.

**Courses listed in more than one area shall not be certified in more than one area except for Languages other than English, which can be certified in AREAS 3B and 6.**

### AREA 1: ENGLISH COMMUNICATION

### AREA 6: LANGUAGES OTHER THAN ENGLISH (UC Requirement Only)

| 2 years of the same language Foreign Language from high school with “C”s” or better (Need official HS transcripts). Validation by completing level 2^ or higher in AREA 3B AP Exam Language with score of 3 or higher (Need official AP scores) |

### CSU/AI: CSU GRADUATION REQUIREMENTS IN AMERICAN INSTITUTIONS (CSU Only)

| Select ONE course from A AND B. |

| A. | Political Science 1^ |
| B. | History 11^, 12^, 41^, 42^, 43^, 44^, 52^, Labor Studies 1^ |

### Evaluation of Progress

- Full Certification UC
- Partial Cert. UC
- Full UC/CSU Cert.

Los Angeles Trade-Technical College

MFM 06-2017
This IGETC Plan totals approximately 34-37 CSU / UC transferrable semester units. A minimum of 60 transferrable semester units is required for transfer. You will need to complete additional coursework in your major and maybe some elective courses. Transferring to highly selective UC campuses prioritizes major prep for admission selection. Please visit the ASSIST website www.assist.org and consult with a counselor to develop an Educational Plan so that you can reach your goals.

IGETC Standards

- Courses must be a minimum of 3 semester / 4 quarter units to meet the requirements for IGETC (except area 5C).
- A minimum of a "C" grade is required in each college course for IGETC
- A "C" is defined as a minimum of 2.0 grade points on a 4.0 scale

Governed by IGETC Standards: www.ccctransfer.org

IGETC Policy & Information

- To be certified, all courses must be completed with a grade of "C" or better. A grade of "P" (pass) may be used if the grading policy of the community college states that "P" is equivalent to a grade of "C" or better. The UC will allow no more than 14 semester units taken with "P" towards eligibility for IGETC.
- Courses may be used only once to satisfy one IGETC subject area, even if they are listed in the course agreement under more than one subject area. Courses may be used to satisfy both IGETC and major requirements.
- Which type of student should NOT follow IGETC:
  Certain students, however, will not be well served by following IGETC. Students who intend to transfer into majors that require extensive lower-division preparation, such as engineering or the physical and natural sciences, should concentrate on completing the many prerequisites for the major that the college screens for to determine eligibility for admission.
  - UC AREA 6: Language other than English - IGETC Standards: Additional mechanisms to demonstrate competency: (1) Satisfactory completion, with "C" grade or better, of two years of formal schooling at the sixth grade level or higher in an institution where the language of instruction is not English; (2) AP exam with a score of 3 or higher; or IB exam with a 5 or higher. (3) SAT language scores (see counselor to review IGETC standards); (4). Validating proficiency by completing a higher level language course.
  - When combining quarter and semester unit values within an IGETC area, units shall be converted to either all quarter units or all semester units to best serve the student.

WARNING: Many students attend multiple California Community College campuses. If that’s you, be sure to follow the IGETC pattern at each college of attendance. IGETC policy states that coursework completed in a specific subject area will be used in the same area designated by the California Community College at which the course was completed. This is also the policy if you complete courses at more than one of the Los Angeles Community College District (LACCD) colleges.

Certification is not automatic:

- You must meet with a counselor to review IGETC completion.
- Official transcripts must be on file in Admissions & Records for GE credit from other institutions attended outside of LACCD.
- Counselor must sign this verification before submission to the Admissions & Records office.
- To be certified IGETC must be completed in FULL. All course grades must be posted and transcripts on file for certification.
- Students using IGETC for CSU AA-T or AS-T degrees must be fully certified for UC/CSU. Area 1C is a CSU admissions requirement.
- Students who do not complete IGETC before transferring will be required to satisfy the specific lower-division general education/breadth requirements of the UC’s college or school they attend. However, California community colleges may grant partial certification of IGETC to students who are missing no more than two requirements, other than Areas 1 and 2. Students submitting partial IGETC certification should complete the missing requirements at either UC or a California community college as designated by their department. Students who have been granted partial IGETC certification should not return to the community college for a full certification.
Learning Outcome Information

Outcomes are used to describe the anticipated or achieved results of programs, courses or the accomplishment of institutional objectives. Los Angeles Trade Technical College identified and assesses the following four different types of student-related outcomes:

**Institutional Learning Outcomes (ILOS)**
The ILOs represent the broad categories of competence that enable students to be successful in further education, in careers, as citizens, and in their personal lives. Upon completion of a degree, students will be able to:
- Use critical thinking skills to gather, identify, analyze, synthesize information, and evaluate problems and solutions.
- Use visual, numerical, verbal, written, and practical skills to create useful and original products.
- Demonstrate technical skills that meet industry and/or employment standards.
- Demonstrate effective communication and comprehension skills.
- Demonstrate ability to interface in a culturally diverse socio-economic environment.

**General Education Learning Outcomes (GELOS)**
LATTC’s general education programs are distinctively unique, characteristically interdisciplinary, and a constant and integral component of an associate’s degree. General Education Learning Outcomes (GELOs) statements for each area are listed below:

**Ethical and Effective Citizenship (ACCJC Standard II.A.11)**
A recognition of what it means to be an ethical human being and effective citizen. Qualities include an appreciation of ethical principles; civility and interpersonal skills; respect for cultural diversity; historical and aesthetic sensitivity; and the willingness to assume civic, political, and social responsibilities locally, nationally, and globally.

**Humanities**
Students will define what it means to be an ethical human being and effective citizen: qualities include an appreciation of ethical principles; civility and interpersonal skills; respect for cultural diversity; historical and aesthetic sensitivity; and the willingness to assume civic, political, and social responsibilities locally, nationally, and globally.

**Language and Rationality**
Students will apply formal reasoning in solving problems or analyzing arguments demonstrating competency appropriate to the academic discipline.

**Behavioral and Social Sciences**
Students will identify and demonstrate understanding of key issues utilizing theories, methods, and core concepts of the social and behavioral sciences within their contemporary, historical, and geographical contexts.

**Natural Sciences**
Demonstrate a knowledge of natural phenomena and recognize the processes that explain them.
Assess the relationships between science and other human activities through the examination of the physical universe, its life forms, and its natural phenomena.

**Health and Kinesiology**
Demonstrate awareness of attributes for healthy physical and psychological life styles.
Practice proper techniques and skills as related to the designated physical activities.

**Program Learning Outcomes (PLOS)**
PLOs describe the measurable characteristics including knowledge, skills, abilities, and determining behaviors that students will be able to demonstrate by the time they complete a program. PLOs by program can be found in the Credit Degree and Certificate Programs section of this catalog and in the program factsheets posted on the website at (http://college.lattc.edu/catalog/programs/).

**Student Learning Outcomes (SLOS)**
SLOs identify what the student will know and be able to do by the end of a course– the essential and enduring knowledge, abilities (skills) and attitudes (values, dispositions) that constitute the integrated learning needed by a graduate of a course. SLOs by course can be found in the Course Description section of this catalog.

**LATTC Certificate and Degree Program by Definition**
A description and requirements for each program offered at the college is provided in the following section. The College’s website also contains the following additional program-related information:
- Gainful Employment information: tuition and fees, books and supplies, program length and completers (http://college.lattc.edu/catalog/gainful-employment/)
- Employment projections and occupational profiles (https://lattc.emsicareercoach.com/)

ACCOUNTING

Program Overview

The Accounting program offers occupational training to students who plan to work in general and corporate accounting. Instruction is provided in financial and managerial accounting theory and in various practical aspects of the accounting field. General accountants record transactions involving receivables, payables, payroll, and property into a general ledger and examine the financial records for compliance with accounting standards and applicable laws. Corporate accountants record financial transactions, analyze and evaluate financial records, apply tax law and finance techniques, and may design and implement accounting/bookkeeping systems and procedures.

By fulfilling the program requirements, students are proficient in the application of basic financial and managerial accounting principles and techniques. Students will be adept at analyzing and recording economic transactions using Generally Accepted Accounting Principles (GAAP) and relevant computer applications. Students will understand the application of accounting principles and techniques to service, merchandising, and manufacturing businesses.

Typical positions are bookkeeper, accounting clerk, junior accountant and tax preparer. Courses required for the Accounting Clerk Certificate are designed to prepare students for entry level positions in specialized occupational areas after 2 to 3 semesters of study.

Program Learning Outcomes (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Employ managerial and cost accounting principles.
- Apply business laws to the business environment.
- Utilize specialized ledgers and software to record and process expenditures.
- Prepare and process payroll records and reports in compliance with state and federal requirements.
- Analyze and prepare financial statements in accordance with accounting principles.
- Use the Internal Revenue Code as it relates to individual, partnership, and corporation income taxes.
- Demonstrate effective business communication skills.

ACCOUNTING

Associate in Arts Degree

Major Units: 47

Requirements for the Associate in Arts degree in Accounting may be met by completing 47 units of Required Courses with a “C” or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

A Certificate of Achievement in Accounting Clerk may be earned by completing 30 units of Required Courses with a “C” or better in each course.

The Accounting certificate program offers occupational training to the student who plans to work in general and corporate accounting. General accountants record transactions involving receivables, payables, payroll, and property into a general ledger and examine the financial records for compliance with accounting standards and applicable laws. Many of the courses offer practical accounting training to the owner/operators of a small business.

Courses required for the Accounting Clerk Certificate are designed to prepare students for entry level positions in specialized occupational areas. Students will understand the application of the accounting principles and techniques to service, merchandising, and manufacturing businesses. Typical positions are bookkeeper, accounting clerk, junior accountant and tax preparer.

**PROGRAM LEARNING OUTCOMES (PLOs)**

Upon completion of the Certificate program, students are able to:

- Apply math knowledge, attention to detail, and familiarity with basic accounting procedures to provide clerical and accounting support for an accounting department.
- Demonstrate effective business communication skills.
- Utilize specialized ledgers and software, such as Quickbooks, to record and process expenditures, receipts, payroll, and other financial transactions for a business or organization.

The Associate in Science in Administration of Justice for Transfer (AS-T) degree will be awarded upon completion of the following:

- Completion of 60 transferable semester units to the California State University.
- Obtaining of a minimum grade point average of 2.0 in all transferable coursework.
- Full completion of one the following General education patterns:
  - The Intersegmental General Education Transfer Curriculum (IGETC), with “C”s or better in all coursework AND completion of Area 1C Oral
Graduation Requirements and Educational Programs

Communication (CSU admission requirement)

- California State University General Education – Breadth Requirements (CSU GE). Areas A1, A2, A3, & B4 must be completed with a grade of "C" or better (CSU admission requirement)
- A minimum of 18 semester units required for the major
- All courses in the major must be completed with a grade of "C" or better or a "P" if the course is taken on a "Pass-No Pass" basis (Title 5 § 55063).

**ADVANCED MANUFACTURING: WELDING AND FABRICATION**

**Department:** Advanced Transportation & Manufacturing

**Department Chair:** Mr. Jess Guerra, Room F-212E

(213) 763-3919, GuerraJ@lattc.edu

**Award Title**

Advanced Manufacturing: Welding & Fabrication

(C) 30 - - 30

(Formerly Welding Gas & Electric: Construction Technologies)

**PROGRAM OVERVIEW**

The welding industry continues to be a critical component of manufacturing worldwide. Employment opportunities continue to thrive, and the demand for trained welding technicians in the field continues to increase. The Manufacturing Industrial Technology program trains students to work as professionals in this field using the Gas Metal Arc Welding (MIG), Gas Tungsten Arc Welding (TIG), and/or Flux-Cored Arc Welding (FCAW) processes.

By fulfilling the program requirements, students will have gained the skills necessary for certification thru the American Welding Society (AWS) Certified Welder Program and the Los Angeles Department of Building and Safety Certified Welder Examination using GMAW, GTAW, and FCAW. In addition to those conventional skills, the program will expose students to advanced automated welding techniques such as CNC plasma cutting, robotic welding, and friction stir welding.
PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

• Demonstrate safe work habits that reflect concern and care for self, others, and the environment.
• Produce industry quality weldments on carbon steel plate in various joint and groove configurations using the plasma arc cutting, GMAW, FCAW, GTAW, and SAW processes.
• Produce industry-quality welds using GTAW on stainless steel and aluminum sheet.
• Demonstrate the qualifying knowledge and skills in the GMAW, FCAW, GTAW, and SAW processes necessary for acquiring the local and national industry certifications (such as American Welding Society, American Society of Mechanical Engineers, and the American Petroleum Institute) recognized by employers in advanced manufacturing industries.
• Interpret blueprints and verbal orders, including weld symbols, in order to fabricate using tools of the welding trade.

Requirements for the American Sign Language Certificate of Achievement may be met by completing 18 units of required courses with a “C” or better grade.

PROGRAM OVERVIEW

The LATTC American Sign Language Certificate program is designed to meet the needs of students who seek further education in the field of deaf services; as well as prepare students for entry-level positions in interpreting, advocacy, instructional aides and other employment opportunities.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

• Students will demonstrate through core instruction formal American Sign Language Presentations incorporating expressing advanced expressive and receptive language skills in preparation for future interpreter educational programs.
• Demonstrate practical application of American Sign Language within the Deaf Culture Society understanding receptive skills at a normal rate of speed, able to express particular experiences with reasonable ease, and able to adhere to proper grammar and cultural rules.

ARCHITECTURE TECHNOLOGY

Department: Construction, Maintenance & Utilities  
Department Chair: Mr. William (Bill) Elarton, Room SQ-122  
(213) 763-3701, cdm@lattc.edu

PROGRAM OVERVIEW

In keeping with the LATTC and Construction, Design, and manufacturing mission, we offer transfer courses and provide assistance with job placement in various venues, including architectural, urban planning and engineering offices; construction management firms; the construction manufacturing industry; and government agencies. We meet Leadership in Energy and Environmental Design (LEED) standards and use sustainable design strategies and current computer tools (including Global Positioning System—GPS, CFM, Computer-aided design—CAD, Geographic Information System—GIS, Building Information Modeling—BIM, 3-D modeling and others) to record, organize, design and maintain the life cycle of the built environment.

Our courses are integrated and comprehensive, covering four clusters of study: 1) design/space-planning/programming; 2) construction documents/BIM; 3) building systems/materials/historical context; and 4) sustainable tools, such as BIM, GPS, CAD, GIS, 3-D modeling, and simulation. Every class includes training in organizational skills, time management, teamwork, communication and digital file management, and the equipment used in the classroom is the same found in professional offices.

In the architecture design program, students learn additional skills, such as prototyping, visualization, conceptualization, 3-D composition, lighting, proportion, sketching and modeling.

This critical foundational knowledge can be applied to the fields of industrial design, toy design, furniture design, interior design, landscape architecture, set design and virtual reality spaces.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Demonstrate the use of drawing and model building, as a thinking tool to transform ideas and humans’ needs into design solutions by using mathematical and geometrical composition learned from nature and the universe.
- Demonstrate skill and proficiency in CADD (computer-aided drafting and design), BIM (building Information Model), GIS (geospatial information system) by showing technical mastery in the use of industry standard tools, through community based projects and template creations.
- Demonstrate and design solutions for building systems, sustainable materials, contextualized history, building life cycle design approach, product design, neighborhood revitalization, sustainable campus design, and resilient cities.

ARCHITECTURAL TECHNOLOGY

Associate in Arts Degree  
Major Units: 47

Requirements for the Associate in Arts degree in Architectural Technology may be met by completing 46 units of Required Courses and 1 unit of Major Electives with a “C” or better along with general General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

By fulfilling the program requirements, students will have the skills needed to enter the field as an Architectural Technician who is both a problem solver and an integral part of the design process. Students will master the skills necessary to work in the construction, drafting, estimating, building inspection, civil, electrical, mechanical and structural engineering, construction computer rendering, and computer-aided drawing arenas. General education classes provide a well rounded education, imparting the knowledge and skills needed to successfully participate in all aspects of society.

At least 60 degree applicable units are required to earn an Associate degree.

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

For additional related degrees and certificates, refer to programs under Automotive Technology, Diesel and Related Technologies, and Motorcycle Repair Mechanics.

PROGRAM OVERVIEW

Los Angeles is a leading collision capital center in the automotive design world. Insurance companies are increasingly demanding Auto Collision Technicians trained in damage cost estimations. The demand for fully trained Automotive Repair Technicians is very high where skilled technicians are readily employable and command excellent incomes. These technicians use highly sophisticated devices, such as laser for straightening frames, computer for mixing paint, and dust control contamination vacuum tools for smoothing paint.

The LATTC Automotive Collision Repair program is designed for students who want to enter this growing field. Classes are a combination of classroom instruction coupled with hands-on training. Students learn welding procedures, diagnostic and repair procedures, body part alignment processes, metal finishing/shrinking/filling techniques, auto body electrical wiring systems, body section replacement and structural sectioning practices, body damage estimating techniques, auto body construction methods, paint color application skills, and body shop practices.

By fulfilling the program requirements, students are proficient in a variety of automotive collision techniques and will have the knowledge and skills necessary to maintain, repair, and diagnose body and fender repairs. They will be proficient at all aspects of preparation and painting, including computerized mixing and matching, damage estimation, creating computerized reports and digital imaging. Students who complete this degree will be able to perform jobs as estimators, service managers equipped to repair problems occurring in automotive collision systems.
PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Identify and repair a variety of vehicle bodies with different frame types, components, and structure chemistries while adhering to industry standard procedures.
- Demonstrate efficiency in the use of various paints, primers, sealers and tools required to complete collision repairs on a vehicle.
- Write collision repair estimates using industry recognized computer software in accordance with industry standards.

AUTOMOTIVE COLLISION REPAIR

Associate in Science Degree
Major Units: 46

Requirements for the Associate in Science degree in Automotive Collision Repair may be met by completing 36 units of Required Courses and 10 units of Major Electives with a “C” or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

At least 60 degree applicable units are required to earn an Associate degree.

For additional related degrees and certificates, refer to programs under Automotive Collision Repair, Diesel and Related Technologies, and Motorcycle Repair Mechanics.

PROGRAM OVERVIEW

Los Angeles’ long-time infatuation with the motorcar has made it a leading center in automotive design. Employment opportunities continue to thrive, and the demand for trained automotive technicians in the filed continues to increase. The Automotive and Related Technology program trains students to work as professionals in this field, offering instruction in maintenance, diagnosis and overhaul procedures of electrical and fuel injection systems.

By fulfilling the program requirements, students will have gained the skills necessary to maintain, repair, and diagnose electrical, fuel injection systems, and overhaul procedures, as well as basic shop practices needed to meet industry standards.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Diagnose and repair various types of vehicles using specialty shop tools and diagnostic equipment in accordance with NATEF standards.
- Demonstrate shop safety practices when performing vehicle repairs in accordance with NATEF standards.
- Write vehicle repair estimates in accordance with NATEF standards.

AUTOMOTIVE AND RELATED TECHNOLOGY

Associate in Science Degree
Major Units: 36

Requirements for the Associate in Science degree in Automotive and Related Technology may be met by completing 36 units of Required Courses with a ‘C’ or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

Students who complete this degree will be able to perform jobs as a diagnostics, to troubleshoot and repair problems occurring in automotive anti-lock braking systems (ABS), electrical/electronic systems, engine performance, drivability, suspension and steering, automatic and manual transmissions, transaxles, engine repair, heating and air conditioning.

Students should take the 6 basic courses during Semester I and Semester II:

BAKING
Department: Culinary Arts/Professional Baking
Department Chair: Mr. Steve Kasmar, Room SA-118
(213) 763-7332, KasmarSL@lattc.edu

Award Title  Award Type  GE Units  Required Course Units  Major Elective Units  Major Units
Baking Professional  A.A.  21*  48  -  48
Baking Professional  C  48  -  48

At least 60 degree applicable units are required to earn an Associate degree.

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

For additional related degrees and certificates, refer to programs under Culinary Arts and Restaurant Management.

PROGRAM OVERVIEW

The Professional Baking program is accredited by the American Culinary Federation Educational Foundation (ACFEF). This two year program prepares students for successful careers within the hospitality community. Baking program students, under the direct supervision of their chef instructor, will discuss, prepare, and analyze various baked goods including quick breads, yeast breads, laminated dough, specialty and wedding cakes, cookies, batters, and restaurant-style plated desserts. Baking formulas, cost controls, ingredient identification and usage is practiced throughout the program. Students prepare baked goods on a daily basis for a retail bakery located on the LATTC campus, the college cafeteria and faculty dining room as well as catering for special events and holiday functions.

The Professional Baking program will prepare students for employment in areas of baking and pastry arts. Students will demonstrate the ability to prepare and formulate baking/pastry recipes, assess food costs and sales prices, and organize daily tasks for successful completion of baked goods. The National Restaurant Association Serve Safe Exam is administered during the first semester.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

• Recognize industry standards for entry, supervisory, and management level employment.
• Demonstrate professional baking techniques according to industry standards and competencies.
• Evaluate proper practices in various industry segments.

 REQUIRED COURSES

SEMMESTER I  UNITS
CLN ART 111  Culinary Arts - Orientation I  4
CLN ART 112  Sanitation and Safety  2
CLN ART 170  Culinary Nutrition  2
PROFBAK 112  Baking Processes and Theory of Ingredients  4

SEMMESTER II  UNITS
PROFBAK 121  Beginning Yeast Breads & Quickbreads  6
PROFBAK 122  Artesian Breads, Specialty Breads  6

SEMMESTER III  UNITS
PROFBAK 131  Plated Restaurant Style Desserts  6
PROFBAK 132  Multi Component Desserts and Pastries  6

SEMMESTER IV  UNITS
CLN ART 235  Menu Planning & Purchasing  4
CLN ART 240  Restaurant Supervision & Training  2
PROFBAK 141  Advanced Baking: Centerpieces and Decorating Techniques  6

NOTE: Most Baking/Culinary Arts courses have prerequisites and/or co-requisites. Refer to the Course Descriptions section of the catalog for additional details.

BAKING PROFESSIONAL

Certificate of Achievement
Major Units: 48

A Certificate of Achievement in Professional Baking may be earned by completing 48 units of Required Courses listed under Associates degree in Baking Professional with a grade of “C” or better in each course.
BARBERING

Department: Cosmetology
Department Chair: Ms. Lina Chen, Room MH-241E
(213) 763-7138, RobinsEJ@lattc.edu

Award Title | Award Type | Grad. Plan | Required Course Units | Major Elective Units | Total Major Units
---|---|---|---|---|---
Barbering | C | 48 | - | 48

For additional related certificates, refer to programs under Skin Therapy, Cosmetology.

PROGRAM OVERVIEW

Barbering is the study and practice of professional care of the hair, skin and nails. The LATTCC Barbering program offers training in hair styling and cutting; chemical treatments, waving, shaving techniques, hair cutting with clippers, razor, shears; skin care, manicures. The Barbering occupation is governed by stringent state laws which stipulate that all who enter the field must complete 1500 hours of instruction. The LATTCC Barbering program is carefully designed to prepare students to pass the California State Board of Barbering and Cosmetology examination. This program integrates a mock state board exam to help familiarize the students with the examination procedures. By fulfilling the program requirements, students will have the knowledge and skills needed to successfully compete in the Barbering industry as barber stylists, barber salon managers, educators, make-up artists (both conventional and theatrical), product sales, manicurists and business owners.

Important Notes: All hours and operations on time cards are kept for five years per state requirements.

Please note regarding transfer hours: Transfer students with more than 300 hours from another Barbering program who have not received college level units from an accredited institution may not transfer into Los Angeles Trade Technical College. However, students who cannot transfer hours can start the LATTCC Barbering program at the freshman level.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:
- Perform, practice, and demonstrate all areas of barbering skills observing the safety and sanitation rules set forth by the California Board of Barbering and Cosmetology.
- Be prepare to take the written and practical California Board of Barbering and Cosmetology Licensure Examination.
- Demonstrate knowledge and skills of barbering industry requirements regarding good work ethic, resumes and employment guidelines, client building, and client retention as it related business.

BARBERING - Certificate of Achievement

Major Units: 48

A Certificate of Achievement in Barbering may be earned by completing 48 units of Required Courses listed with a grade of “C” or better in each course.

Biotechnology | A.S. | 21 | 33 | - | 33
Biotechnology | C | 33 | - | - | 33

At least 60 degree applicable units are required to earn an Associate degree.

PROGRAM OVERVIEW

The LATTC Biotechnology Certificate/AS Degree Program is designed to meet the needs of students who wish to acquire the necessary skills in a biotechnology career with an emphasis in biomanufacturing. This program also suits the needs of transfer students who wish to complete their first two years of education in a community college.

Biotechnology is a changing industry that applies science and technologies to living organisms through the process of discovering, developing, manufacturing, and regulating quality of new products. Biotechnology applies to agriculture, human health and medicine, energy and environment. Biotechnology workers are employed in many industries, including, pharmaceutical and medical manufacturing; instrument, equipment and supplies manufacturing; scientific and technical consulting services; scientific and research development services; education; laboratories and government.

Our Biotechnology AS Degree Program focuses on biomanufacturing which directly serves pharmaceutical and medical manufacturing, but also other sectors such as food and agricultural sciences, green technology, and various science-related industries.

The Biotechnology program prepares students to find employment as entry-level lab technicians in fields that may include:
- Biomanufacturing
- Biotechnology
- Environmental Sciences
- Food Science Technicians
- Pharmaceuticals

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:
- Understand the science and process of biomanufacturing.
- Demonstrate an understanding of facilities and current good manufacturing practices.
- Demonstrate problem solving, analytical and critical thinking skills.

Certificate of Achievement
Major Units: 33

A Certificate of Achievement in Biotechnology may be earned by completing 33 units of Required Courses listed under Associates degree in Biotechnology with a grade of “C" or better in each course.

Requirements for the Associate in Science degree in Biotechnology may be met by completing 33 units of Required Courses with a “C" or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.
CARPENTRY/BUILDING AND CONSTRUCTION TECHNOLOGIES

Department: Construction, Maintenance & Utilities
Department Chair: Mr. William (Bill) Elarton, Room SQ-122
(213) 763-3701, cdm@lattc.edu

Award Title | Award Type | GE Units | Required Course Units | Major Elective Units | Major Units
--- | --- | --- | --- | --- | ---
Carpentry *(day only)* | A.S. | 21* | 45 | 3 | 48
Carpentry *(day only)* | C | 45 | 3 | 48
Carpentry Construction Technologies *(day only)* | A.A. | 21* | 39 | 9 | 48
Carpentry Construction Technologies *(evening only)* | C | 39 | 9 | 48

At least 60 degree applicable units are required to earn an Associate degree.

*These Associate Degrees are eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

PROGRAM OVERVIEW

To meet the training needs of persons interested in becoming a Carpenter, LATTC offers a Carpentry Associate in Science degree and a Carpentry Construction Technologies Associates in Arts degree as well as Certificates of Achievement.

The Associate in Science degree is designed for individuals seeking entry level positions in the field. Students enrolling in this program should be able to commit to full-time student status, which is approximately 24 hours per week. This time commitment is necessary to allow for hands-on training with the laboratory applications used during the course of instruction.

The Associate in Arts degree is an evening-only course of study designed for individuals currently in the field who want to improve their skills or learn new ones. Due to limitations on available evening hours, the utilization of hands-on laboratory application is assumed to be provided at the students' place of employment.

By fulfilling the program requirements, students will have the necessary knowledge and skills for a career as a Carpenter in the Construction or Maintenance arena. The construction, installation, and repair of structures and fixtures made from wood and other materials, working from blueprints, layout, measuring, marking, and arranging materials in accordance with local building codes, cutting and shaping wood, plastic, fiberglass, or drywall using hand and power tools, joining materials with nails, screws, staples, or adhesives are just some of the skills that will be mastered during this program.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Use hand and power tools to perform work within the building construction industry.
- Perform calculations and measurements required for work in the building construction industry.
- Acquire skills necessary for employment in the building and construction industry.

CARPENTRY

Associate in Science Degree
Major Units: 48

Requirements for the Associate in Science degree in Carpentry may be met by completing 45 units of Required Courses and 3 units of Major Electives with a ‘C’ or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Use hand and power tools to perform work within the building construction industry.
- Perform calculations and measurements required for work in the building construction industry.
- Acquire skills necessary for employment in the building and construction industry.

At least 60 degree applicable units are required to earn an Associate degree.  
*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

### PROGRAM OVERVIEW

The Chemical Technician (CT) or science technician occupations are becoming the fastest growing occupational category in the United States. The chemical technician generally performs laboratory analysis or testing in a wide variety of biological and physical science settings such as; environmental, drinking water, wastewater treatment, pharmaceutical, cosmetics and petroleum refineries; grading studies of materials, and quality control of industrial chemicals. Training is provided in applied chemistry, physics and mathematics as well as instrumentation, biotechnology, industrial processes, computerized analysis and quality control. The CT program is also designed to help students prepare for a smooth transition into other science related BA/BS degree programs at LATTC.

At the conclusion of this program, students will have the skills necessary for:  
- Working in the chemical process industry, including treatment plants  
- Monitoring safety/health and environmental regulations  
- Sampling and handling chemical materials  
- Measuring physical properties  
- Performing chemical analysis  
- Performing instrumental analysis  
- Planning, designing and conducting experiments, and  
- Synthesizing compounds

### PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:  
- Demonstrate skills required to perform laboratory testing and chemical processes by performing quantitative and qualitative instrumental and wet chemical analysis.  
- Demonstrate Good Laboratory Practice (GLP), Current Good Manufacturing Practices (cGMP) including environmental, health and safety.  
- Evaluate and apply knowledge of regulatory policies for laboratory quality control and validation.

At least 60 degree applicable units are required to earn an Associate degree.

PROGRAM OVERVIEW

The Associate of Science Degree in Chemistry provides students interested in the physical, health, and biological sciences with a strong academic background in chemistry and the coursework required to transfer to four year institutions or professional schools. This degree certifies a students’ ability to analyze and solve problems in the field of chemistry and other fields where expertise in chemistry is required.

Chemistry related fields include the pharmaceutical sciences, food sciences, biotechnology, biomaterials, nanotechnology, environmental sciences, engineering and many others. Our students pursue careers in chemistry, pharmacy, medicine, dentistry, physician assistant, laboratory technician and other health or physical science related careers. The degree presents curriculum in two major concentrations; one in Chemistry and the other in Biochemistry. Thus students can select the concentration appropriate to their majors.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

• Students will apply chemistry concepts to solve problems where chemistry knowledge is required.
• Characterize chemical compounds, perform precise, quantitative measurements using proper techniques and modern instrumentation.
• Demonstrate problem-solving, analytical, and critical thinking skills.

CHEMISTRY

Associate in Science Degree (Chemistry Concentration)
Major Units: 38

Requirements for the Associate in Science degree in Chemistry may be met by completing 38 units of Required Courses with a grade of “C” or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

Please note: All courses are taught each semester except for Physics 2 and 3.

NOTE: Required Courses are sequential and contain pre-requisites. All courses are taught each semester with the exception of Physics 6 and Physics 7.

TRANSFER: Students interested in transferring to a four-year college or university should visit the University Transfer Center or meet with a counselor to select appropriate transferable courses.
**CHILD DEVELOPMENT**

**Department Chair:** Cynthia Morley-Mower, Room JH-512  
(213) 763-7074, MorleyCN@lattc.edu

### PROGRAM OVERVIEW

The LATTC Child Development Program is designed to meet the needs of those students who wish to prepare themselves for employment or who are currently employed in the Early Childhood Education (ECE) or Elementary Education field. This curriculum prepares student to teach in programs for children including: private facilities, parent cooperatives, Head Start programs, Children’s centers and infant/toddler or school age programs. In addition, this program also prepares students to transfer to four year universities in either Child Development or Teacher Education majors.

Completion of each program leads to a certificate, transfer option and/or an Associate in Arts degree. With additional general education units and required experience, students will be eligible for the Child Development Permit as defined under Title 5. Meeting this requirement will enable the student to teach in Federal and State preschool programs.

The Child Development courses provide training in infant and toddler care; working with school age children; supervising and administering childcare programs, as well as working with special needs children. Students who complete this degree program will be proficient in the methodology of working with young children through the extensive overview of theories and application of child development, the development of curriculum and lesson planning techniques, ways to observe and record child behavior, and classroom management techniques.

### PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the AA Degree Plan A/B program, students are able to:

- Successfully manage an Early Childhood Education (ECE) classroom; and provide children with responsive care, developmentally appropriate and anti-bias curriculum, and a healthy and safe environment.
- Operate a high-quality ECE program that complies with licensing and Title V regulations.
- Demonstrate professionalism while working with children, parents, staff, and community.

### PLANNING AHEAD:

**MANTOUX TEST (TB TEST):** Some Child Development courses may require you to obtain a Mantoux test for Tuberculosis. The college Health Center provides this service. Please call ahead for days and times the Health Center provides this service.

**VACCINATION LAW:** As of September 1, 2016 under SB 792, day care centers, family day care homes and preschools as part of their licensure requirements, will have to maintain vaccination records for their employees and volunteers for influenza, pertussis, and measles. Obtaining verification of vaccination records is required for all school and center observations, volunteering and practicum experience in child development courses.

**CRIMINAL CLEARANCE:** In order to fulfill State licensing requirements for employment in private and public programs you must receive a Criminal Clearance to work with young children. Consult with faculty for additional information.

**CPR CLASS:** Your employer may require you to take a 15-hour Cardiopulmonary Resuscitation class. This class covers training on basic first aid for infants and children, CPR techniques as well as information on basic health and sanitation procedures.

### CHILD DEVELOPMENT: PLAN A

**Associate in Arts Degree**  
Major Units: 31

The LATTC Child Development Program is designed to meet the needs of those students who wish to prepare themselves for employment or who are currently employed in the Early Childhood Education (ECE) or Elementary Education field. This curriculum prepares student to teach in programs for children including: private facilities, parent cooperative, Head Start programs, Children’s centers and infant/toddler or school age programs. In addition, this program also prepares students to transfer to four year universities in either Child Development or Teacher Education majors.

Completion of each program leads to a certificate, transfer option and/or an Associate in Arts degree. With additional general education units and required experience, students will be eligible for the Child Development Permit as defined under Title 5. Meeting this requirement will enable the student to teach in both Federal and State preschool programs. The Child Development courses provide training in infant and toddler care; working with school age children; supervising and administering childcare programs, as well as working with special needs children.
children. NOTE: Most Child Development courses have prerequisites and/or co-requisites except for Child Development 001, 010 and 011. Refer to the Course Descriptions section of the catalog for additional details.

Wish to work while completing their education. Early Childhood Education introduces the theories of child development and principles of education focusing on children ages 0.5 years. The AS-T in Early Childhood Education for Transfer degree is intended for students who plan to complete a baccalaureate degree in a similar program or major at a California State University campus. Students who complete this degree will gain priority admission to the CSU system, but not to a particular campus or major.

The Associate in Science in Early Childhood Education for Transfer (AS-T) degree will be awarded upon completion of the following:

- Completion of 60 transferable semester units to the California State University
- Obtaining of a minimum grade point average of 2.0 in all transferable coursework.
- Full completion of one the following General education patterns
  - The Intersegmental General Education Transfer Curriculum (IGETC), with “C’s or better in all coursework AND completion of Area 1C Oral communication (CSU admission requirement)
  - California State University General Education – Breadth Requirements (CSU GE). Areas A1, A2, A3, & B4 must be completed with a grade of “C” or better (CSU admission requirement)
- A minimum of 24 semester units required for the major
- All courses in the major must be completed with a grade of “C” or better or a “P” if the course is taken on a “Pass-No Pass” basis (Title 5 § 55063).

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

- Successfully manage an Early Childhood Education (ECE) classroom; and provide children with responsive care, developmentally appropriate and anti-bias curriculum, and a healthy and safe environment.
- Operate a high-quality ECE program that complies with licensing and title V regulations.
- Demonstrate professionalism while working with children, parents, staff, and community.

EARLY CHILDHOOD EDUCATION: TRANSFER DEGREE

Associate in Science Transfer Degree

TRANSFER—Students interested in transferring to a four-year college or university should visit the University Transfer Center or meet with a counselor to select appropriate transferable courses.

PROGRAM OVERVIEW

The LATTC Infant/Toddler Teacher certificate program provides the student with a career preparation for working with young children age 0 to 2. In addition to basic course requirements, this certificate enables students to acquire a specialty in the area of infants/toddlers. With additional general education units and the required experience, students are eligible for the Child Development Teacher Permit as defined under Title 5. Meeting this requirement will enable the students to work with young children ages 2 – 5 in both Federal and state programs.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

• Student will be able to demonstrate knowledge in working with infants/toddlers.

INFANT / TODDLER TEACHER

Certificate of Achievement

Major Units: 27

A Certificate of Achievement in Infant/Toddler Teacher may be earned by completing 27 units of Required Courses with a “C” or better in each course.

REQUIRED COURSES

SEMESTER I

UNITS

CH DEV 001 Child Growth and Development 3
CH DEV 010 Health, Safety & Nutrition 3
CH DEV 011 Child, Family and Community 3

CH DEV 031 Infant and Toddler Studies II 3
CH DEV 034 Observing and Recording Children’s Behavior 3
CH DEV 044 Early Intervention for Children with Special Needs 3

NOTE: Most Child Development courses have prerequisites and/or co-requisites except for Child Development 001, 010 and 011. Refer to the Course Descriptions section of the catalog for additional details.
GRADUATION REQUIREMENTS
AND EDUCATIONAL PROGRAMS

PRESCHOOL TEACHER

Program Overview
The Child Development Program offers various educational options. Completion of each program leads to a certificate, transfer option and/or an Associate in Arts degree. With additional general education units and required experience, the student will be eligible for the Child Development Permit as defined under Title 5. Meeting this requirement will enable the student to teach in both Federal and State preschool programs.

The Child Development courses provide training in infant and toddler care; working with school age children; supervising and administering childcare programs, as well as working with special needs children. Students who complete this degree program will be proficient in the methodology of working with young children through the extensive overview of theories and application of child development, the development of curriculum and lesson planning techniques, ways to observe and record child behavior, and classroom management techniques. This curriculum prepares students to teach in programs for children including: private facilities, parent cooperative, Head Start programs, Children’s Centers and infant/toddler or school age programs. In addition, this program also prepares students to transfer to four year universities in either Child Development or Teacher Education majors.

PRESCHOOL ASSOCIATE TEACHER

Certificate of Achievement
Major Units: 15

A Certificate of Achievement in Preschool Associate Teacher may be earned by completing 15 units of Required Courses listed above, with a “C” or better in each course.

PROGRAM LEARNING OUTCOMES (PLOs)
Upon completion of the Certificate program, students are able to:

• Successfully manage an Early Childhood Education (ECE) classroom and provide children with responsive care, developmentally appropriate and anti-bias curriculum, and healthy and safe environment.
• Operate a high-quality ECE program that complies with licensing and Title V regulations.
• Demonstrate professionalism while working with children, parents, staff, and community.

The Community Planning curriculum and courses are regularly reviewed to ensure that they are relevant, industry appropriate and cutting edge. Industry experts (academic and practitioners) develop, design and teach our courses. Our industry partnerships provide critical resources for our students, providing them with invaluable employment, volunteer, internship and networking opportunities. Our courses are structured to be laboratories (classroom and field work) that combine lecture, project driven learning and hands on application of knowledge to contemporary issues affecting communities. Community planning courses are taught during the evening/weekends on campus and in the community to provide students with the greatest range of educational opportunities.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

- Students will analyze and assess low-income community needs, assets and issues from a community planning and economic development industry lens.
- Students will develop various types of industry approved project proposals to address community planning and economic development issues with solutions that include data analysis, identified targets, goals, objectives, timelines, expected outcomes and community stakeholder engagement.
- Students will develop the Community Planning and Economic Development Industry knowledge sets, entry level professional skill sets, understanding of the fields multiple approaches to development and mastery of the multiple sector networks.

Successful students will be able to apply a community organizing set of skills and tools that address multiple community and economic development issues. Students who complete the program become viable and competitive for employment opportunities. They will have developed their knowledge and skill base, practiced their learning through field work, internships or paid experience and have created networks and/or participated in collaborations that have maximized their knowledge with capacity to understand urgent issues and trends.

PROGRAM OVERVIEW

The Computer Applications and Office Technologies (CAOT) degree and certificate programs are designed to provide students with administrative and clerical competency skills required for employment in a variety of areas, such as business and industry, government agencies, schools, and hospitals. The degree and certificate programs are designed to meet the varying needs of a wide spectrum of students, including those seeking:

- Associate in Arts degree(s)
- Certificate(s) that are specific to a discipline or area
- Entry into the job market
- Advanced training and/or retraining.
- Lifelong learning

By fulfilling the program requirements, students are prepared for entry level positions, promotion, and career advancement in a variety of office occupations. Students will be proficient in the use of software application programs such as Microsoft Word, Excel, PowerPoint, Access, and Internet research.

COMPUTER APPLICATIONS & OFFICE TECHNOLOGIES: ADMINISTRATIVE ASSISTANT

### Associate in Arts Degree
Major Units: 43

The Computer Applications and Office Technologies (CAOT) degree and certificate programs are designed to provide students with administrative and clerical competency skills required for employment in a variety of areas, such as business and industry, government agencies, schools, and hospitals. The degree and certificate options are designed to meet the varying needs of a wide spectrum of students, including those seeking:

- Associate in Arts degree(s)
- Certificate(s) that are specific to a discipline or area
- Entry into the job market
- Advanced training and/or retraining
- Lifelong learning

By fulfilling the program requirements, students are prepared for entry level positions, promotion, and career advancement in a variety of office occupations. Students will be proficient in the use of software application programs such as Microsoft Word, Excel, PowerPoint, Access, and Internet research.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Successfully use the computer to process, organize and present data and information in basic business format with no errors.
- Communicate effectively via spoken word, print and media, and work collaboratively with others in an office setting.
- Provide high level administrative support and performs administrative duties for private, public, and other governmental organizations.
- Manage and coordinate senior executives daily schedules to include travel arrangements, scheduling of board conference calls, meeting both internal and external job related duties.
- Schedule president’s meetings, travel arrangements, appointments and calendar. Maintain presidents electronic filing system.
- Responsible for event scheduling and calendar oversight.

MAJOR ELECTIVES

Nine (9) units must be completed from the CAOT Major Electives located before the Program Overview section of this discipline.

COMPUTER APPLICATIONS & OFFICE TECHNOLOGIES: INFORMATION PROCESSING SPECIALIST

Associate in Arts Degree

Major Units: 44

The Computer Applications and Office Technologies (CAOT) degree and certificate programs are designed to provide students with administrative and clerical skills required for employment in a variety of areas, such as business and industry, government agencies, schools, and hospitals.

The Information Processing Specialist provides support to assigned administrative personnel; coordinate office activities; monitor assigned activities, and provide meaningful informational recommendations to administrators and directors.

By fulfilling the program requirements, students are prepared for entry level positions. Some duties include:

- Communicating with clients
- Compiling data from various sources
- Coordinating relevant information for special programs
- Maintaining the organizations website
- Monitoring assigned departmental activities
- Ordering software and equipment for the organization
- Responding to a wide range of correspondence

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- The ability to successfully use the computer to process, organize and present data and information in basic to advance business format with no errors.
- The ability to give an independent interpretation of data and material presented to effectively problem-solve with limited resources.
- The ability to communicate effectively via spoken word, print, and media

Graduation Requirements and Educational Programs

**COMPUTER APPLICATIONS & OFFICE TECHNOLOGIES: OFFICE ASSISTANT-CLERICAL**

### Associate in Arts Degree

Major Units: 42

The Computer Applications and Office Technologies (CAOT) degree and certificate programs are designed to provide students with administrative and clerical competency skills required for employment in a variety of areas, such as business and industry, government agencies, schools, and hospitals. The degree and certificate options are designed to meet the varying needs of a wide spectrum of students, including those seeking:

- Associate in Arts degree(s)
- Certificate(s) that are specific to a discipline or area
- Entry into the job market
- Advanced training and/or retraining
- Lifelong learning

By fulfilling the program requirements, students are prepared for entry level positions, promotion, and career advancement in a variety of office occupations. Students will be proficient in the use of software application programs such as Microsoft Word, Excel, PowerPoint, Access, and Internet research.

#### PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Successfully gain a comprehensive knowledge and understanding of the automated office environment and will be prepared to work in a modern office setting.
- Communicate effectively via spoken word, print and media, and work collaboratively with others in an office setting.

A Certificate of Achievement in Medical Office Assistant may be earned by completing 32 units of Required Courses listed below.

PROGRAM OVERVIEW

The Medical Office Assistant Certificate of Achievement prepares students for entry level employment in a medical/dental front office, such as a doctor/dentist’s office, hospital, clinic, and/or medical insurance company.

Upon completion of the certificate program, students are prepared to assume entry level medical/dental office duties and responsibilities. The program may also prepare students for career advancement and retraining in the use of current computer application programs. The program also provides the basic skills that promote success in the workplace. Typical positions include medical clerk, medical transcriptionist, medical office assistant, and assistant medical office manager.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

- Successfully use medical office software to organize and present information in medical business format.
- Communicate effectively via spoken word, organized records and work collaboratively with others in an medical office setting.

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

PROGRAM OVERVIEW

The Computer Information Systems program is designed to prepare students for careers in the exciting Information Technology fields such as programming, software engineering, database administration, computer networking, multimedia programming, and web programming technologies. Microcomputer usage continues to grow at an ever increasing pace as does the demand for workers with solid technical skills and knowledge of programming, networking, and website development and management. The primary goal of the program is to prepare students for entry-level employment as well as providing marketable career advancement knowledge and skills. Students with interest in transferring to an Information Systems program at four-year institutions should consult with the Counseling department for needed course work.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Create and debug code for specifications and write comprehensive program documentation.
- Demonstrate comprehensive understanding of language tools by synthesizing and integrating multiple languages constructs in a single project.
- Demonstrate basic understanding of computer hardware and software.
GRADUATION REQUIREMENTS

COMPUTER INFORMATION SYSTEMS

Associate in Science Degree
Major Units: 45

Requirements for the Associate in Science degree in Computer Information Systems may be met by completing 21 units of Required Courses and 24 units of Major Electives with a “C” or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

Students planning to continue studies at a four-year institution should consult with a counselor concerning a transfer curriculum.

At least 60 degree applicable units are required to earn an Associate degree.

PROGRAM OVERVIEW

The Correctional Science program will prepare you to enter the rapidly growing field of corrections. The correctional field has an enormous range of career options, and with the proper training, a future filled with job opportunity and flexibility will be opened. Substantial and growing employment opportunities exist in corrections, public and private detention facilities, law enforcement, private security, immigration and customs, secret service, Federal Bureau of Investigation (FBI), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), Homeland Security are just some of the areas open to you. Students will also have the opportunity to gain experience in the field participating in ride a longs and internships with local agencies.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Demonstrate an understanding of the workings of the correctional system by applying definitions, concepts, and principles to courts and correctional settings.
- Apply critical thinking to research, evaluate, and analyze and synthesize the appropriate procedures for the collection of evidence and data in criminal case preparation pertaining to correctional institutions.
- Develop, organize and write an objective report that meets the legal and detailed requirements of correctional institutions.

CORRECTIONAL SCIENCE

Associate in Science

At least 60 degree applicable units are required to earn an Associate degree.

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

For additional related certificates, refer to programs under Skin Therapy, Barbering.

PROGRAM OVERVIEW

Cosmetology is the study and practice of professional care of the hair, skin and nails. The LATTC Cosmetology program offers training in hair styling and cutting; chemical treatments, including hair coloring and lightening, permanent waving, hair straightening, hair cutting with clippers, razor, shears; skin care, and nail care. The Cosmetology occupation is governed by stringent state laws which stipulate that all who enter the field must complete 1600 hours of instruction. The LATTC Cosmetology program is carefully designed to prepare students to pass the California State Board of Barbering and Cosmetology examination. This program integrates a mock state board exam to help familiarize the students with the examination procedures. By fulfilling the program requirements, students will have the knowledge and skills needed to successfully compete in the Beauty industry as stylists, salon managers, educators, make-up artists (both conventional and theatrical), product sales, manicurists, and business owners.

Important Notes:

- All hours and operations on time cards are kept for five years per state requirements.
- Please note regarding transfer hours: Transfer students with more than 300 hours from another Cosmetology program who have not received college level units from an accredited institution may not transfer into Los Angeles Trade Technical College. However, students who cannot transfer hours can start the LATTC Cosmetology program at the freshman level.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Perform, practice, and demonstrate all areas of cosmetology skills observing the safety and sanitation rules set forth by the California Board of Barbering and Cosmetology.
- Be prepare to take the written and practical California Board of Cosmetology Licensure Examination.
- Demonstrate knowledge and skills of cosmetology industry requirements regarding good work ethic, resumes and employment guidelines, client building, and client retention as it related business.

At least 60 degree applicable units are required to earn an Associate degree.

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 16 units; please consult with a counselor for more details.

For additional related degrees and certificates, refer to programs under Baking Professional and Restaurant Management.

PROGRAM OVERVIEW

The Culinary Arts department at LATTC has the proud history of being one of the oldest cooking schools in the nation. The program offers an extensive "hands on" and theory based culinary arts education that prepares students to enter the highly competitive hospitality industry. The department hosts professional industry-seasoned chefs as faculty, bringing their experiences from around the world. In addition to rigorous classroom instruction, students are trained in a working foodservice facility while attending classes. The Culinary Arts Associate in Arts degree and Certificate of Achievement are recognized and accredited by the American Culinary Federation Educational Foundation (ACFEF). On graduating from the LATTC Culinary Arts program, students are qualified to work as cooks, line cooks, caterers, private chefs, chef assistants, and sous chefs.

The Culinary Arts program has successfully prepared students for the hospitality industry for many years. By fulfilling the program requirements, students will possess a working foundation of skills necessary to work in a professional industry kitchen. Within the program, students will illustrate a working foundation of a professional industry kitchen. Students are proficient in cooking techniques and terminology including meat fabrication and cookery, hot and cold sauce preparation, vegetable identification and production, task organizing and time management. Successful students will graduate with a working knowledge of culinary nutrition and fundamental management skills, as well as National Restaurant Association Serve Safe Certification.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Recognize industry standards for entry, supervisory, and management level employment.
- Demonstrate professional culinary techniques according to industry standards.
- Evaluate proper practices in various industry segments.

At least 60 degree applicable units are required to earn an Associate degree.

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

For additional related degrees and certificates, refer to programs under Automotive Collision Repair, Automotive Technology, and Motorcycle Repair Mechanics.

PROGRAM OVERVIEW

If you live in the United States, almost every single thing you eat, wear or use has been transported by diesel powered vehicles and alternative/green power plants.

If you live in the United States, almost every single thing you eat, wear or use was delivered by a diesel-powered vehicle.

New EPA/CARB regulations have impacted the fuel technology and energy source/design used. Trucks, trains, buses and many other medium and heavy duty vehicles have evolved to match today’s more stringent clean air emission standards. Graduates of the Diesel Technology program are well paid and have a diverse choice of areas in which to specialize. In recent years, the demand from local employers has exceeded our supply of qualified graduates as the program continues to grow.

After successful completion of the program requirements, students will become proficient in all aspects of diesel engine fundamentals, electrical components, fuel systems, overhaul procedures, air brake system and the construction and operation of diesel engines.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

• Identify and explain the operation of diesel vehicle systems (such as engine, transmissions, brakes, electrical and suspension) along with their related subsystems according to the standards of a professional shop environment.

• Utilize the various manufacturer diagnostic software, tools and shop equipment to accurately diagnose and repair diesel powered vehicles.

• Demonstrate proficiency in adhering to industry safety standards when performing repairs on diesel vehicle systems.
### DIESEL AND RELATED TECHNOLOGY

#### Associate in Science Degree
**Major Units:** 45

Requirements for the Associate in Science degree in Diesel and Related Technology may be met by completing 45 units of Required Courses with a "C" or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

#### REQUIRED COURSES

**SEMIESTER I**

- **DIESLTK 112** Diesel Engine and Electrical Fundamentals 11
  - **DIESLTK 112A** Diesel Engine Fundamentals (5.5)
  - **DIESLTK 112B** Diesel Engine Fundamentals (5.5)

**SEMIESTER II**

- **DIESLTK 122** Diesel Fuel Injection Systems & Basic Hydraulics and Air Conditioning 11
  - **DIESLTK 122A** Diesel Fuel Injection Systems (5.5)
  - **DIESLTK 122B** Basic Hydraulics and Air Conditioning Systems (5.5)

WELDGE/201A Welding-Gas and Electric IA 1 (may be taken in either 1st or 2nd semester)
- **DIESLTK 185** Directed Study – Diesel and Related Technology (1)

Admission to third semester courses is limited to those who have received a grade of "C" or better in all first year Diesel courses.

**SEMIESTER III**

- **DIESLTK 132** Heavy Duty Drive Train & Air Brake Systems 11
  - **DIESLTK 132A** Heavy Duty Drive Train (5.5)
  - **DIESLTK 132B** Air Brake Systems (5.5)

**SEMIESTER IV**

- **DIESLTK 142** Diesel Engine Overhaul & Electronic Engine Controls 11
  - **DIESLTK 142A** Diesel Engine Overhaul (5.5)
  - **DIESLTK 142B** Electronic Engine Controls (5.5)

**NOTE:** Students are required to provide basic hand tools, Transportation Technology uniform and personal safety equipment.

---

### DIGITAL MEDIA

#### Associate Degree
**Major Units:** 28

Requirements for the Associate in Science degree in Digital Media may be met by completing 18 units of Required Courses and 10 units of Elective courses with a "C" or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

#### REQUIRED COURSES

- **DIGLMD 100:** Introduction to Digital Video 3
- **DIGLMD 101:** Fundamentals of Digital Media 3
- **DIGLMD 103:** Fundamentals of Digital Audio 3
- **DIGLMD 104:** Digital Media Entrepreneurship 3
- **DIGLMD 105:** Visual Design for Digital Media 3
- **DIGLMD 152:** Digital Art 3

---

### DIESEL AND RELATED TECHNOLOGY

#### Certificate of Achievement
**Major Units:** 45

A Certificate of Achievement in Diesel and Related Technology may be earned by completing 45 units of Required Courses listed under for the Associate degree in Diesel and Related Technology with a "C" or better in each course.

By fulfilling the program requirements, students are able to enter the job market as diesel technicians.

Program Overview

The Digital Media: Digital Video and Audio program in the Design and Media Arts Pathway uses industry recognized software and cutting edge digital tools to promote best practices in the innovative design of digital video and audio across a variety of delivery platforms. Students who complete this program will be prepared to enter careers in film, television, music and other media related industries.

Program Learning Outcomes (PLOs)

Upon completion of the Digital Media program, students will be able to:
- Demonstrate proficiency in the creation of professional quality video and audio productions using a variety of digital tools and technologies.

Digital Media: Digital Video and Audio

Associate Degree

Major Units: 30

Requirements for the Associate in Science degree in Digital Media: Digital Video and Audio may be met by completing 30 units of Required Courses with a “C” or better along with General Education units. DIGITAL MEDIA: DIGITAL VIDEO AND AUDIO

Certificate of Achievement
Major Units: 30

A Certificate of Achievement in Digital Media: Digital Video and Audio may be earned by completing 30 units of Required Courses listed under the Associate degree in Digital Media: Digital Video and Audio with a “C” or better in each course.

DIGITAL MEDIA: MOBILE APPLICATION AND WEB DESIGN

Program Overview

The Digital Media: Mobile Application and Web Design program in the Design and Media Arts Pathway uses industry recognized tools and technologies to promote best practices in the design, development, testing and delivery of a variety of applications. Students who complete this program will be prepared to enter careers as mobile and interactive application developers, web designers and other technology related careers in this rapidly evolving industry.

Program Learning Outcomes (PLOs)

Upon completion of the Digital Media program, students will be able to:

• Students will be able to demonstrate proficiency in the use of a variety of technology driven applications for the production of creative work.

DIGITAL MEDIA MOBILE APPLICATION AND WEB DESIGN

Associate Degree
Major Units: 45

Requirements for the Associate in Science degree in Digital Media Mobile Application and Web Design may be met by completing 45 units of Required Courses with a “C” or better along with General Education units. **PROGRAM OVERVIEW**

To meet the training needs of persons interested in becoming an Electrician LATTIC offers an Electrical Construction and Maintenance Associate of Science degree, and Electrical Construction and Maintenance Construction Technologies Associate of Arts degree, as well as Certificates of Achievement.

The Associate in Science degree is designed for individuals seeking entry level positions in the field. Students enrolling in this program should be able to commit to full time student status, which is approximately 24 hours per week in the classrooms and laboratories, plus at least 12 hours of homework every week. This time commitment is necessary to allow for hands on training in the laboratory applications used during the course of instruction.

The Associate in Arts degree is an evenings only course of study designed for individuals, currently working in the electrical field, who want to improve or expand their skills. Due to the limitations of the student’s available evening hours, much of the hands on laboratory component is assumed to be provided at the student’s place of employment. Depending on availability, the Associate in Arts degree may require more time to complete. See the Department Chair for details prior to enrolling.

By fulfilling the program requirements, students will have the necessary knowledge and skills for a career in Residential, Commercial, and Industrial Construction and Maintenance of Electrical Systems. Electrical theory, electrical controls, conduit installation, blueprints, low voltage systems, maintenance practices, equipment installation, etc. are just some of the skills that will be mastered during this program.

---

**ELECTRICAL CONSTRUCTION AND MAINTENANCE: ELECTRICIAN**

Associate in Science Degree  
Major Units: 48

Requirements for the Associate in Science degree in Electrical Construction and Maintenance: Electrician may be met by completing 42 units of Required Courses and 6 unit of Major Electives with a “C” or better along with general General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

---

**PROGRAM LEARNING OUTCOMES (PLOs)**

Upon completion of the Degree/Certificate program, students are able to:

- Perform trade calculations related to electrical construction and maintenance work, such as: convert from a tape measure to fraction and make a calculation and convert back to tape measure; voltage drop and wire ampacity deration; add DC power, voltages, currents, resistances, inductances and capacitances in series, parallel, and in combination; Use triangles to find AC voltage, currents, resistances, inductances and capacitances in series, parallel, and in combination.

- Locate, interpret and apply technical information such as the National Electrical Code.

- Utilize hand and power tools for the use for which they are intended in a safe and workmanlike manner and be able to work safely, and recognize hazards of the construction industry.

Electronics Communications* | A.S. | 21* | 44 | - | 44 |
Electronics Communications | C | 44 | 44 | |

At least 60 degree applicable units are required to earn an Associate degree.

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

PROGRAM OVERVIEW

This program covers, circuit analysis of several complete FM systems. By completing the certificate and/or degree, students will be able to pass the Federal Communications Commission (FCC) Examination. In addition, by fulfilling the program requirements, students are proficient in the operation of AM/FM Transmitters and can trouble shoot AM/FM Receivers as well as install C Band, K/U Band, and digital satellite systems (DSS). Students will also have an understating of cordless phones, microwave receivers/transmitters, and cell phone systems.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Demonstrate knowledge of reading electronic symbols and schematic diagrams.
- Perform mathematical calculations and measurements related to electronics circuit analysis.
- Demonstrate basic understanding of semiconductors devices, digital circuits, and electronics communications theory.

ELECTRONICS COMMUNICATIONS

Associate in Science Degree
Major Units: 44

Requirements for the Associate in Science degree in Electronics Communications may be met by completing 44 units of Required Courses and 6 units of Major Electives with a "C" or better along with general General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

REQUIRED COURSES

**SEMMESTER I**

ETNTLGY 150 Soldering Surface Mount Technology 3
ETNTLGY 151 DC Theory and Circuit Fundamentals 3
ETNTLGY 152 DC Theory and Circuit Fundamentals Lab 2
ETNTLGY 153 Applied DC Calculations 1
ETNTLGY 254 Computer Applications for Electronics Technology 3

**SEMMESTER II**

ETNTLGY 154 AC Theory and Circuit Fundamentals 3
ETNTLGY 155 AC Theory and Circuit Fundamentals Lab 2
ETNTLGY 156 Applied AC Calculations 1
ETNTLGY 255 Computer-Based Electronics I 1
PHYSICS 011 Introductory Physics 4

**SEMMESTER III**

ETNTLGY 157 Semiconductors Devices and Applications 3
ETNTLGY 158 Semiconductors Devices and Electronics Laboratory 3
ETNTLGY 159 Digital Circuits and Applications 3
ETNTLGY 160 Digital Circuits and Applications Lab 2

**SEMMESTER IV**

ETNTLGY 161 F.C.C. Radio Operator License 3
ETNTLGY 162 Introduction to Electronics Communications 3
ETNTLGY 163 Introduction to Electronics Communications Lab 3
ECONMT 142 Basic Programmable Logic Controls (PLC) 1

MAJOR ELECTIVES

**UNITS**

ETNTLGY 252 Networking Cabling Specialist 3
ETNTLGY 253 Fiber Optics 3
MICROTK 077 Cisco Networking Academy-Semester I 3
MICROTK 160 I.T. Essentials Application Software Fundamentals 2
MICROTK 162 I.T. Essentials Networking Personal Computers 4
MICROTK 164 I.T. Essentials Microcomputer Theory and Servicing 5

ELECTRONICS COMMUNICATIONS

Certificate of Achievement
Major Units: 44

A Certificate of Achievement in Electronics Communications may be earned by completing 44 units of Required Courses listed under for the Associate degree in Electronics Communication with a "C" or better in each course.

--- | --- | --- | --- | --- | ---
English (Transfer) | AA-T | CSU/IGETC | 15 | 3 | 18

PROGRAM OVERVIEW

The Associates in Arts Degree in English for Transfer (AA-T) is for students who intend to complete a bachelor’s degree in English at a California State University. Core course work explores primarily British and American writers through an array of literary traditions, providing opportunities for students to express their understanding and appreciation of the literary world through analysis, research and composition.

This degree provides lower division preparation for students planning to transfer into English programs. Students will take courses in English as well as related fields required for English majors. Students who complete this degree will be guaranteed admission with junior status to the California State University, though not a particular campus or major, and will be given priority admission to our local CSU campus.

The Associate in Arts in English for Transfer (AA-T) degree will be awarded upon completion of the following:

- Completion of 60 transferable semester units to the California State University
- Obtainment of a minimum grade point average of 2.0 in all transferable coursework.
- Full completion of one the following General education patterns
  - The Intersegmental General Education Transfer Curriculum (IGETC), with “C”s or better in all coursework AND completion of Area 1C Oral communication (CSU admission requirement)
  - California State University General Education – Breadth Requirements (CSU GE). Areas A1, A2, A3, & B4 must be completed with a grade of “C” or better (CSU admission requirement)
  - A minimum of 18 semester units required for the major
  - All courses in the major must be completed with a grade of “C” or better or a “P” if the course is taken on a “Pass-No Pass” basis (Title 5 § 55063).

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

- Write coherent college-level in-class essays with clear syntax and varied sentence structure, and exhibiting knowledge of Standard American English rules of punctuation and grammar.
- Conduct and present research, conforming to Modern Language Association (MLA) Standards.
- Analyze and evaluate a diverse body of literature in a variety of presentation formats.

ENGLISH FOR TRANSFER (AA-T)

Associate in Arts for Transfer Degree
Major Units: 18

Requirements for the Associate in Arts Transfer degree in English may be met by completing 15 units of Required Courses and 3 units of elective courses with a “C” or better along with general education courses meeting IGETC and CSU Requirements.

Graduation Requirements and Educational Programs

PROGRAM OVERVIEW

The Los Angeles Trade Technical College Fashion Design and Fashion Technology programs prepare students for careers in all areas of apparel manufacturing from assistant designers to production management.

The Fashion Design and Fashion Technology programs provide specialized training in current methods of garment construction, illustration, draping, pattern making, and grading. Instruction includes the most widely used apparel software programs. In addition to foundational principles, students are encouraged to experiment with creative design problems throughout the two year program. The Fashion Design program is staffed by professional instructors who have spent many years in the fashion industry as designers, pattern makers, production managers and manufacturers in all categories of apparel. The Fashion Design classrooms are equipped like design rooms complete with industrial sewing machines, pressing equipment, grading machines, dress forms and industrial cutting tables. In addition, the college has state of the art computer lab classrooms equipped like design rooms complete with industrial sewing machines, pressing equipment, grading machines, dress forms and industrial cutting tables. In addition, the college has state of the art computer lab classrooms equipped like design rooms complete with industrial sewing machines, pressing equipment, grading machines, dress forms and industrial cutting tables. In addition, the college has state of the art computer lab classrooms equipped like design rooms complete with industrial sewing machines, pressing equipment, grading machines, dress forms and industrial cutting tables. In addition, the college has state of the art computer lab classrooms equipped like design rooms complete with industrial sewing machines, pressing equipment, grading machines, dress forms and industrial cutting tables. In addition, the college has state of the art computer lab classrooms equipped like design rooms complete with industrial sewing machines, pressing equipment, grading machines, dress forms and industrial cutting tables. In addition, the college has state of the art computer lab classrooms equipped like design rooms complete with industrial sewing machines, pressing equipment, grading machines, dress forms and industrial cutting tables. In addition, the college has state of the art computer lab classrooms equipped like design rooms complete with industrial sewing machines, pressing equipment, grading machines, dress forms and industrial cutting tables. At least 60 degree applicable units are required to earn an Associate degree.

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Use industry-standard, manual and computerized tools, technologies and techniques, to design and construct apparel that meets industry standards.
- Use industry recognized documents and technical specifications for production applications and product development that meet the professional standards of the apparel industry.

FASHION DESIGN

Associate in Arts Degree

Major Units: 48

Requirements for the Associate in Arts degree in Fashion Design may be met by completing the following required courses and units:

- FASHDSN 111 Clothing Construction: 5 units
- FASHDSN 112 Basic Fashion Art and Design: 5 units
- FASHDSN 119A History of Costume: 1.5 units
- FASHDSN 120 Basic Pattern Making & Design: 5 units
- FASHDSN 122 Grading and Marker Making: 5 units
- FASHDSN 125A Textiles: 1.5 units
- FASHDSN 264 Apparel Computer Analysis: 1 unit
- FASHDSN 132 Advanced Patterns and Design: 5 units
- FASHDSN 111 Clothing Construction: 5 units
- FASHDSN 112 Basic Fashion Art and Design: 5 units
- FASHDSN 119A History of Costume: 1.5 units
- FASHDSN 120 Basic Pattern Making & Design: 5 units
- FASHDSN 122 Grading and Marker Making: 5 units
- FASHDSN 125A Textiles: 1.5 units
- FASHDSN 264 Apparel Computer Analysis: 1 unit

Los Angeles is the leading center for apparel manufacturing in the United States. These firms require personnel trained in the design and technical aspects of clothing production. Many local apparel manufacturing firms employ LATTC graduates as designers, assistant designers, grader/marker makers, pattern makers, technical designers, specification writers, and production managers. The program equips graduates with the skills necessary to work in the local industry as well as the global market.

Los Angeles Trade-Technical College

2016 - 2018 GENERAL CATALOG
FASHION TECHNOLOGY

Certificate of Achievement
Major Units: 28

A Certificate of Achievement in Fashion Technology may be earned by completing 28 units of Required Courses with a "C" or better in each course.

A full range of condensed lab courses in clothing construction, sketching, grading, draping and pattern making are offered during the evening and on Saturdays. These courses may be taken in any order, and lead to a Certificate in Fashion Technology.

By fulfilling the program requirements, students are proficient in construction and assembly methods, illustration, both technical and fashion, pattern making, grading, and draping techniques. These courses will prepare students for apparel computer courses where they will apply skills using the latest computer technology.

Evening students may receive a Certificate of Achievement after taking 28 units that include:

REQUIRED COURSES

FASHION MERCHANDISING

Department: Design and Media Arts
Department Chair: Ms. Carole Anderson, ROOM CY-222
(213) 763-3642, AndersCL@lattc.edu

Award Title | Award Type | GE Units | Required Course Units | Major Elective Units | Major Units
---|---|---|---|---|---
Fashion Merchandising* | A.S. | 21* | 45 | - | 45
Fashion Merchandising | C | 45 | - | 45

At least 60 degree applicable units are required to earn an Associate degree.

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 16 units; please consult with a counselor for more details.

For additional related degrees and certificates, refer to programs under Fashion and Tailoring.

PROGRAM OVERVIEW

Fashion Merchandising is the-planning, organization, and development of fashion products to be sold at a profit. The program at LATTC is unique in that it offers instruction covering both manufacturing processes and retail expertise. Computer technology plays an important role in the program offering instruction on AIMS software.

Retail is a major industry in Southern California and fashion constitutes one of its largest segments. Retail positions range from major department stores to specialty outlets, and from personal stylists to employment in wholesale manufacturing. Los Angeles has taken the lead as the largest apparel manufacturing center in the United States, and the Fashion Merchandising curriculum is designed to provide specialized training in fashion trends, and consumer demand, as well as wholesale concepts.

Upon completion of the program, students will understand the cultural aspects of fashion in history, entrepreneurial opportunities in the fashion industry, and how to communicate the latest fashion trends and styling. Students will also be proficient in international business processes preparing them for the global apparel market.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Demonstrate the merchandising and promotion of apparel products according to industry standards.
- Assessment: Students will create merchandised presentations using various methods such as grid displays, presentation boards and digital graphics, that demonstrate merchandising and promotional techniques used in the industry.
- Develop and communicate a retail or wholesale business opportunity using industry standard analytical, visual, and technical tools.
- Assessment: Students will use word processing, spreadsheets, databases, and presentation graphics to articulate a thorough and cohesive product sales strategy.

PROGRAM OVERVIEW

The courses listed in this certificate compile a comprehensive list of job related skills needed to acquire hybrid and electric plug-in vehicle maintenance and repair technical skills. They cover basic, intermediate and advanced level training of these vehicles including the different configurations used in the automotive, transit and trucking industries. These skills will prepare an individual for entry-level employment or career advancement in the maintenance and repair of hybrid vehicles in all sectors of the transportation industry.
PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

- Identify alternative fuel and hybrid vehicles and explain their operation and related safety repair procedures.
- Safely remove and replace various hybrid and plug-in electric vehicle components using specialty tools and equipment according to manufacturer and industry safety guidelines.
- Perform complex hybrid and plug-in electric vehicle troubleshooting using manufacturer diagnostic software, schematics, and specialty tools designed for hybrid and electric vehicle repair.

HYBRID & ELECTRIC PLUG-IN VEHICLE TECHNOLOGY

Certificate of Achievement
Major Units: 12

A Certificate of Achievement in Hybrid and Plug-in Electric Vehicle Technology may be earned by completing 12 units of Required Courses with a “C” or better in each course.

PROGRAM OVERVIEW

The Associate in Arts in Kinesiology for Transfer (AA-T) program is designed to prepare students for CSU transfer to complete a bachelor’s degree in Kinesiology, Exercise Science, Physical Education, pre-Physical Therapy, Athletic Training and other related allied health professions. Interested students may also pursue careers as personal trainers.

Students completing the AA-T in Kinesiology are guaranteed admission to the California State University system, although not necessarily to a particular campus or major of choice. Students should consult with a counselor for more information on university admission and transfer requirements as this AA-T in Kinesiology degree may not be the best option for students intending to transfer to a particular CSU campus or to a college or university that is not part of the CSU system.

The Associate in Arts in Kinesiology for Transfer (AA-T) degree will be awarded upon completion of the following:

- Completion of 60 transferable semester units to the California State University
- Obtained of a minimum grade point average of 2.0 in all transferable coursework.
Graduation Requirements and Educational Programs

GRADUATION REQUIREMENTS AND EDUCATIONAL PROGRAMS

Los Angeles Trade-Technical College 2016 - 2018 GENERAL CATALOG

Full completion of one of the following General education patterns:
- The Intersegmental General Education Transfer Curriculum (IGETC), with “C” or better in all coursework AND completion of Area 1C Oral Communication (CSU admission requirement)
- California State University General Education – Breadth Requirements (CSU GE). Areas A1, A2, A3, & B4 must be completed with a grade of “C” or better (CSU admission requirement)
- A minimum of 20 semester units required for the major
- All courses in the major must be completed with a grade of “C” or better or a “P” if the course is taken on a “Pass-No Pass” basis (Title 5 § 55063).

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:
- Students will obtain the skills, knowledge, and class preparation to graduate with an AA-T and enter a CSU school and pursue further education and a career in Kinesiology.
- Students will have the opportunity to obtain skills certificates in fields of Kinesiology that will provide them with job skills to work.

KINESIOLOGY FOR TRANSFER (AA-T)

Associate in Arts for Transfer Degree

Major Units: 20-23

Requirements for the Associate in Arts degree in Kinesiology for Transfer (AA-T) may be met by completing 20-23 units of coursework with a “C” or better along with general education courses meeting IGETC and CSU Requirements.

The Labor Center

The Labor Center, located in MA-005, offers Labor Studies classes leading to an Associate in Arts Degree or Certificate of Achievement in Labor Studies. Classes and programs are held both on campus and off-site at union halls and community organizations. Students can register online, on site in class or at the Labor Center Office.

The Labor Center maintains strong relationships with leaders of organized labor and the community, including a broad-based Advisory Board. These leaders help promote participation in the Labor Studies program, and assure evaluation and feedback from the labor movement to help shape future programs. The Labor Center staff also advise Labor Studies students and prospective students, and the Center maintains a collection of labor DVDs available for free loan.

PROGRAM OVERVIEW

Labor Studies is designed to train students, union leaders, human relations professionals, and workers in the practical, applied skills and up-to-date knowledge of labor relations and for positions in union leadership. Employees in labor and human relations can develop career skills and prepare for positions or advancement in labor unions, labor relations, human relations and government. The instructors are all experts who are active in the field.
The Labor Studies Program offers the following alternative patterns of learning:

- courses may be completed as desired to develop specific skills to meet the needs of the individual student;
- courses may be completed to meet the requirements of the Associate Degree;
- courses may be completed to meet the 24 units required to earn the Certificate of Achievement in Labor Studies.

By fulfilling the program requirements, students will have a greater understanding of the contributions of labor and the skills necessary for union leadership. This is particularly relevant in Los Angeles, with some 250 local unions with a combined membership of more than half a million union members. Students who complete the requirements for the Associate Degree in Labor Studies will have a working knowledge of labor organizations, their structure, philosophy and day to day operations.

LABOR STUDIES

Associate in Arts Degree

Major Units: 36

Requirements for the Associate in Arts degree in Labor Studies may be met by completing 36 units in Labor Studies, of which a minimum of 18 units of Required Courses and 18 unit of Major Electives with a “C” or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

- Students will have a working knowledge of the collective bargaining process and demonstrate the skills needed to bargain and enforce a contract.
- Students will demonstrate knowledge of labor relations laws and other laws protecting workers' rights.
- Use effective communication, mobilizing and leadership skills to organize, build and strengthen unions.

LABOR STUDIES

Certificate of Achievement

Major Units: 24

A Certificate of Achievement in Labor Studies may be earned by completing 24 units in Labor Studies, of which a minimum of 15 units must be in Required Courses with a “C” or better in each course.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

- Students will have a working knowledge of the collective bargaining process and demonstrate the skills needed to bargain and enforce a contract.
- Students will demonstrate knowledge of labor relations laws.

†Course currently unavailable
Students who complete the requirements for the Certificate of Achievement in Labor Studies will have developed practical skills in representation, negotiations, advocacy, and problem solving at the workplace.

Students who earn a Certificate will be qualified for entry level positions in labor, industry, and government.

A maximum of 3 units of COOP ED may be applied to meet the 24 units Certificate requirement in Labor Studies.

**NOTE:** A maximum of 3 units of COOP ED may be applied to meet the 24 units Certificate requirement in Labor Studies. Additional Labor Studies courses may be used to fulfill Major Units. For additional information, contact the Labor Center.

</tbody>
</table>

At least 60 degree applicable units are required to earn an Associate degree.

*This Associate Degree may be eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

**PROGRAM OVERVIEW**

Students planning to transfer to a four-year college or university may choose the Associate in Arts degree with a major in Liberal Arts and Sciences by choosing one of the options listed below.

The Liberal Arts degree is designed for students who desire a broad base of knowledge in the liberal arts and sciences. The Liberal Arts degree is one option for students who plan to transfer to a four-year university, including the California State University (CSU) or the University of California (UC).

**NOTE:** Students need to complete additional units to meet the required 60 units for the Associate of Arts degree.

Students should be aware that not all courses on this list are offered every semester.
PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

- Utilize their broad and well balanced educational experience in the area of arts, and sciences to transfer to a 4-year college or university.
- Think and communicate clearly and effectively both orally and in writing.
- Use mathematics.
- Understand the modes of inquiry of the major disciplines.
- Be aware of other cultures and times.
- Achieve insights gained through experience in thinking about ethical problems.
- Develop the capacity for self-understanding.
- Possess sufficient depth in some field of knowledge to contribute to lifetime interest.

INTERDISCIPLINARY STUDIES: ARTS AND SCIENCES

Associate in Arts Degree

Major Units: 49

Requirements for the Associate in Arts degree in Interdisciplinary Studies may be met by completing 33 units of Required Courses and 16 unit of Major Electives with a “C” or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

Students planning for transfer are cautioned that this curriculum may not provide for the completion of lower division requirements for transfer. Students should consult with a counselor for specific information regarding an intended major if transfer to a four-year university is a goal.

LIBERAL ARTS AND SCIENCES: NATURAL SCIENCES

Associate in Arts Degree
Major Units: 18

Requirements for the Associate in Arts degree in Liberal Arts and Sciences: Natural Sciences may be met by completing 18 units with a grade of ‘C’ or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

This area of emphasis examines the physical universe, its life forms, and its natural phenomena. Emphasis is place on students using the methodologies of science as an investigative tool. The Natural Sciences area of emphasis allows the students to take courses that MAY satisfy lower-division requirements with the fields of science including Biology, Chemistry, Allied Health fields, Nursing preparation, Health Science and related fields, Kinesiology, Pre-Med, Dental Hygiene and more.

Students planning for transfer are cautioned that this curriculum may not provide for the completion of lower division requirements for transfer. Students should consult with a counselor for specific information regarding an intended major if transferring to a four-year university is a goal.

Degree Requirements in Natural Sciences:

• Complete 18 units of coursework from courses listed below.
• At least one science course have a lab.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

• Utilize their broad and well balanced educational experience in the area of arts, and sciences to transfer to a 4-year college or university.
• Think and communicate clearly and effectively both orally and in writing.
• Use mathematics.
• Understand the modes of inquiry of the major disciplines.

At least 60 degree applicable units are required to earn an Associate degree.

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

**PROGRAM OVERVIEW**

LATT offers an Associate in Science degree in Machine Shop CNC as well as a Certificate of Achievement.

The Associate in Science degree and Certificate of Achievement, is designed for individuals seeking entry level positions in the field. Students enrolling in this program should be able to commit to full-time student status, which is approximately 21 hours per week. This time commitment is necessary to allow for hands-on training in the lab applications used during the course of instruction.

By fulfilling the program requirements, students will have the necessary knowledge and skills for a career in the Machining Industry. Students will properly use related terminology, safely set-up and operate numerous conventional and computer numerically controlled (CNC) machine tools, use computers to program various CNC machines directly or with Computer Assisted Machinery (CAM), and interpret most related parts and assembly drawings. The general education component classes will give the student a well rounded education and provide knowledge and skills to assist in successful participation in all aspects of society.

**PROGRAM LEARNING OUTCOMES (PLOs)**

Upon completion of the Degree/Certificate program, students are able to:

- Demonstrate the correct use of machine tools, such as lathes, milling machines, and machining centers, to produce machined products that meet precise specifications.
- Demonstrate knowledge of the working properties of metals in the production of precision metal parts.
- Program computer numerically controlled (CNC) machines to perform all of the necessary cuts to create a part.
MACHINE SHOP: CNC

Associate in Science Degree
Major Units: 48 units

Requirements for the Associate in Science degree in Machine Shop CNC may be met by completing 48 units with a grade of "C" or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

MACHINE SHOP: CNC

Certificate of Achievement
Major Units: 48

A Certificate of Achievement in Machine Shop CNC may be earned by completing 48 units of Required Courses listed under for the Associate degree in Machine Shop with a "C" or better in each course.

MANAGEMENT/SUPERVISION

Associate in Arts Degree
Major Units: 47 units

PROGRAM OVERVIEW

The Management/Supervision program is designed to prepare students for managerial responsibilities in business by studying both fundamentals of business operations and human relations. This program will add basic management/supervisory skills to their current occupation or technical skills they may already possess. Course work will cover the basic business management skills with emphasis on human relations, leadership, written and oral communications that relates to managerial/supervisory positions. Graduates of this program should be able to improve one’s promotability and will be eligible for jobs as assistant managers, management trainees, supervisors, team leaders, first line managers and a wide range of other entry level positions. Non managers/supervisors will also increase their knowledge of basic business functions and enhance their current job performance.

By fulfilling the program requirements, students will increase their abilities to negotiate successfully, build and manage teams, manage projects, resolve conflicts, communicate and motivate teams to achieving departmental and organizational success. Students will also understand and will be able to apply management/supervision concepts in real world situations whether they are in business for themselves or working within government, private or non profit industries.
PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

- Apply project management skills through the use of appropriate technology to implement, track and manage data reporting. 2. Implement organizational policies and procedures for recruiting, interviewing, orienting, training and assessing performance. 3. Apply leadership theories and skills to create a supportive and ethical work environment.
- Facilitate the management of change, conflict, and diversity in an organization.
- Demonstrate effective facilitation skills to systematically solve problems while building a team environment.
- Ensure compliance with federal, state and local laws that pertain to businesses and organizations.
- Apply continuous improvement strategies to processes and systems to maximize productivity and quality.
- Employ effective speaking, listening coaching, assertiveness, and time and stress management skills.
- Utilize critical thinking to bridge conceptual ideas into practice.

MARKETING AND PUBLIC RELATIONS
Certificate of Achievement
Major Units: 33

The program is designed to insure all students master all aspects of marketing and public relations, which include advertising, branding, and corporate communications. Students will study and evaluate the effectiveness and appropriateness of marketing and public relations messages while engaging in problem analysis, strategic planning, message development, and tactical solutions. Using both traditional and digital media students will be able to implement compelling marketing campaigns that reach customers and consumers in new and innovative ways, grow market share, and increase bottom line results.

By fulfilling the program requirements, students will have a background in the principles and practices involved in the promotion and distribution of products and services from producers through middleman to the ultimate consumer. This program leads to entry level positions in public relations and marketing careers in business, industry, agency, government, and nonprofit sectors of society. Typical jobs includes, marketing director, public relations representative, corporate consultant, political campaign advisor, small business owner, marketing and non profit communications consultants.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

• Develop a marketing plan for a business using fundamental marketing theories and principles.
• Design, implement and evaluate a marketing/public relations campaign.
• Apply marketing research principles to a company’s product or service.
• Write for internal and external publications with an understanding of the needs of the target audiences.
• Apply basic graphic design principles to newsletters, brochures, reports, and related PR projects.
• Serve as an effective spokesperson for an organization or business.
• Apply ethical principles to decision making and crisis management.
• Explain the role of the public relations practitioner within the context of mass communication.
communications. Students will study and evaluate the effectiveness and appropriateness of marketing and public relations messages while engaging in problem analysis, strategic planning, message development, and tactical solutions. Using both traditional and digital media students will be able to implement compelling marketing campaigns that reach customers and consumers in new and innovative ways, grow market share, and increase bottom line results.

By fulfilling the program requirements, students will have a background in the principles and practices involved in the promotion and distribution of products and services from producers through middleman to the ultimate consumer. This program leads to entry level positions in public relations and marketing careers in business, industry, agency, government, and nonprofit sectors of society. Typical jobs includes, marketing director, public relations representative, corporate consultant, political campaign advisor, small business owner, marketing and non profit communications consultants.

A Certificate of Achievement in Marketing and Public Relations may be earned by completing 33 units of Required Courses with a “C” or better in each course.

**PROGRAM LEARNING OUTCOMES (PLOS)**

Upon completion of the Degree program, students are able to:

- Apply the techniques of both Differential Calculus and Integral Calculus to problems involving functions of both one and several variables.
- Approach and solve problems in pure and applied Mathematics.
- Use the Calculus to solve applied problems in Mathematics, Engineering, Physics, and Statistics.
- Solve higher order constant-coefficient linear differential equations and systems of differential equations and use these methods to solve applied problems.

**PROGRAM OVERVIEW**

The Associate in Science in Mathematics for Transfer prepares a student for transfer into the CSU system for further study in pure or applied mathematics. Earning a 4-year degree in mathematics prepares students for careers in which mathematical skills are in great demand, such as science, technology, engineering, computer science, business, industry, medicine, education or government. The goal of this degree is to provide a clear pathway for transfer students applying to the California State University (CSU). Completion of the Associate in Science in Mathematics for Transfer (AST) ensures transfer students will complete the lower division general education requirements as well as the articulated lower division major requirements for the bachelor’s degree in Mathematics prior to transferring.

The Associate in Science in Mathematics for Transfer (AS-T) degree will be awarded upon completion of the following:

- Completion of 60 transferable semester units to the California State University
- Obtention of a minimum grade point average of 2.0 in all transferable coursework.
- Full completion of one the following General education patterns
- The Intersegmental General Education Transfer Curriculum (IGETC), with “C”s or better in all coursework AND completion of Area 1C Oral communication (CSU admission requirement)
- California State University General Education – Breadth Requirements (CSU GE), Areas A1, A2, A3, & B4 must be completed with a grade of “C” or better (CSU admission requirement)
- A minimum of 23 semester units required for the major
- All courses in the major must be completed with a grade of “C” or better or a “P” if the course is taken on a “Pass-No Pass” basis (Title 5 § 55063).

PROGRAM OVERVIEW

Students can acquire the basic skills and knowledge to earn the Microcomputer Technician Associate in Science Degree / Certificate of Achievement, in the Electronics Department. This program will not only prepare students for an award, but will also prepare them for the A+ Certification exam, and help them prepare for the Cisco Certified Networking Associate (CCNA).

By fulfilling the program requirements, students are able to format a computer, install the operating system, and install all the necessary drivers. Students will be able to successfully configure and create a network system consisting of a number of computers all for employment in a field related to microcomputer technician.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:
- Install, configure, and add auxiliary equipment for a microcomputer.
- Load software and suggest programs to answer the needs of individuals and companies.
- Format a computer, install the operating system, and install all the necessary drivers.
- Configure and create a network system consisting of a number of computers.

MICROCOMPUTER TECHNICIAN

Associate in Science Degree
Major Units: 42

Requirements for the Associate in Science degree in Microcomputer Technician may be met by completing 42 units of Required Courses with a “C” or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

The Microcomputer Technician program is designed to prepare a technician to install, configure, and add auxiliary equipment for a microcomputer. The technician is also able to load software and suggest programs to answer the needs of individuals and companies. Microcomputer Technicians must be above average in knowledge of mechanical systems. They must also have interest and ability in mathematics to successfully apply the training presented in this program.

The computer industry is expanding due to the continuing drop in the price of computers and the introduction of new models with greater power. The fastest growing segment of this field is the microcomputer segment. The power and speed of these units continue to increase and, at the same time, the price continues to decrease. This has placed the computer within financial reach of many small businesses and individuals. With more systems being manufactured and installed, more technicians are needed.

PROGRAM OVERVIEW

The Certificate of Achievement in Motorcycle Repair is designed for both new students as well as industry professionals who want to upgrade their skills and show validation of technology training.

Courses leading to the Certificate are offered during evenings and on weekends. Upon completion of the program, students will have the skills necessary to maintain, repair, and diagnose electrical and fuel induction systems, and will be proficient in tune-up overhaul procedures and basic shop practices.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

- Diagnose and repair various models of motorcycles according to industry standards.
- Demonstrate shop safety practices when performing vehicle repairs in accordance with industry standards.

</table>

At least 60 degree applicable units are required to earn an Associate degree.  
*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 16 units; please consult with a counselor for more details.

**PREREQUISITE COURSES**

A GPA of 2.5 or better must be earned in all college level courses and a 2.5 grade point average in the science prerequisites.

**Please note:** You must be accepted into the Nursing Program before you can enroll in these classes. Once accepted enrollment will be done by the department. You cannot enroll online.

**PROGRAM OVERVIEW**

The Registered Nursing (RN) Program at LATTC combines nursing and general education courses with selected laboratory experiences during which students provide nursing care to clients in hospitals and other health care facilities. Nursing courses include medical surgical nursing, geriatric nursing, maternal child health nursing, pediatric nursing, psychiatric nursing, pharmacology, and nursing management and leadership and preceptorship. The program is designed to be completed within four semesters after admission.

Applicants must meet health as well as other requirements mandated by the program and affiliating hospitals/clinic prior to entry. Candidates are admitted to the program in the Fall and Spring semesters. Candidates must enter the program with a minimum overall 2.5 grade point average in all college level courses and a 2.5 grade point average in the science prerequisites. A candidate may file an application only after all prerequisites have been completed. At that time, the student will be eligible to take the nursing entrance examination called TEAS (Test of Essential Academic Skills). If the student achieves a passing score on the TEAS, he or she will be placed on the waiting list. If a student does not achieve a passing score on the TEAS, he or she will be provided with remediation opportunities and permitted to retake the exam. Students may retake the entrance exam once. Program flyers with prerequisites and admission information may be obtained from the Counseling Office or the Department of Allied Health. The Registered Nursing Program is approved by the California Board of Registered Nursing (BRN).

**PROGRAM LEARNING OUTCOMES (PLOs)**

Upon completion of the Degree program, students are able to:
- Utilize nursing process and Maslow’s Hierarchy of Needs to provide nursing care to clients along the health-illness curriculum across the life span.
- Demonstrate ability to apply theoretical knowledge and clinical skills to practice as an entry level registered nurse.

**NURSING, REGISTERED**  
**Associate in Science Degree**

## Graduation Requirements and Educational Programs

### Associate in Science Degree

**Major Units:** 32

**Department:** Health and Exercise Sciences  
**Department Chair:** Joseph Ratcliff  
(213) 763-3730, RatcliJE@lattc.edu

### Program Overview

Nursing is a field that is in high demand and is one that is personally rewarding and constantly stimulating. The Career Ladder Program at Los Angeles Trade-Technical College is approved by the Board of Registered Nursing. It combines nursing theory with selected laboratory experiences and general education courses. Program courses are sequenced from simple to complex. Nursing courses include medical surgical nursing, reproductive and women's health, nursing of children and families, psychiatric nursing, geriatric and community nursing, leadership and preceptorship. The graduate of the Career Ladder program is eligible to apply for the State Board of Registered Nursing Licensing Examination (NCLEX) once all nursing program and Associate in Science Degree requirements are satisfactorily met.

Applicants with a valid VN license may enter into second semester after completing the LVN to RN Bridge course (RN 135) and passing the pharmacology exam and dosage calculation examination. Students have the option of challenging Medical Surgical Nursing I, RN 126, Reproductive and Women's Health Nursing, RN 131, and RN 132, Nursing Care of Children and Families. This may be done after completing 12 units at LATTC and after being accepted into the Career Ladder program.

### Program Learning Outcomes (PLOs)

Upon completion of the Degree program, students are able to:

- Utilize nursing process and Maslow's Hierarchy of Needs to provide nursing care to clients along the health-illness curriculum across the life span.
- Demonstrate ability to apply theoretical knowledge and clinical skills to practice as an entry level registered nurse.

Please note: Students enter in 2nd semester and take all courses in the generic RN Program. Career Ladder students may challenge RN 131 and RN 132.

The 30 unit option is offered to applicants with a valid VN license. Those applicants take 2 courses in second semester and all courses in third and fourth semester. They are then eligible to take the NCLEX-RN licensing exam. This option does not lead to a degree. In addition, students who wish to return to LATTC and obtain an AS degree may not apply these courses to their major.

GRADUATION REQUIREMENTS AND EDUCATIONAL PROGRAMS

SEMESTER IV

| REGNRSG 128 | Medical-Surgical Nursing III | 3 |
| REGNRSG 132 | Care of Children and Family   | 3.5 |
| REGNRSG 133 | Nursing Leadership and Management | 3 |

LVN TO RN 30-UNIT OPTION

Major Units: 28-30

The 30 unit option is offered to applicants with a valid VN license. Those applicants take 2 courses in second semester and all courses in third and fourth semester. They are then eligible to take the NCLEX-RN licensing exam. This option does not lead to a degree. In addition, students who wish to return to LATTC and obtain an AS degree may not apply these courses to their major.

NOTE: This educational option may not be recognized in states outside of California. Check with an individual state BRN for more information.

PREREQUISITES

A grade of “C” or better must be obtained in all courses. High school graduate or GED, U.S. university degree or A.S./A.A. degree is required.

REQUIRED COURSES

SEMESTER II

| REGNRSG 129 | Gerontology and Community Based Nursing | 2 |
| REGNRSG 130 | Psychiatric Mental Health Nursing       | 3 |
| REGNRSG 136 | Nursing Simulation Lab Intermediate     | 1 |

</tr>
</tbody>
</table>

For additional related degrees and certificates, refer to programs under Refrigeration and Air Conditioning Mechanics.

PROGRAM OVERVIEW

Most craft workers specialize in one kind of work, such as plumbing or carpentry. General maintenance and repair workers, however, have skills in many different crafts. They repair and maintain machines, mechanical equipment, and buildings. They also work on plumbing, electrical, and air conditioning and heating systems. They build partitions, make plaster or drywall repairs, and fix or paint roofs, windows, doors, floors, woodwork, and other parts of building structures. In addition, they maintain and repair specialized equipment and machinery found in cafeterias, laundries, hospitals, stores, offices, and factories.

A general maintenance worker’s typical duties include troubleshooting and fixing faulty electrical switches, repairing air-conditioning motors, and unclogging drains. In addition, newer buildings sometimes have computer-controlled systems that allow maintenance workers to make adjustments in building settings and monitor problems from a central location; for example, they can remotely control light sensors that turn off lights automatically after a set amount of time or identify a broken ventilation fan that needs to be replaced.

General maintenance and repair workers inspect and diagnose problems and determine the best way to correct them, frequently checking blueprints, repair manuals, and parts catalogs. They obtain supplies and repair parts from distributors or storerooms. Using common hand and power tools such as screwdrivers, saws, drills, wrenches, and hammers, as well as specialized equipment and electronic testing devices, these workers replace or fix worn or broken parts, where necessary, or make adjustments to correct malfunctioning equipment and machines.

General maintenance and repair workers also perform routine preventive maintenance tasks to ensure that machines continue to run smoothly, building systems operate efficiently, and the physical condition of buildings does not deteriorate. Following a checklist, they may inspect drives, motors, and belts, check fluid levels, replace filters, and perform other maintenance actions. Maintenance and repair workers keep records of their work.

The “Certified Steam Boiler License” is a specialized certification required for many
maintenance workers. LATTC offers a Certificate of Achievement-Steam Plant to address this need. The core of the program is designed to prepare students to take the Boiler/Steam Plant certification exam, while the remainder is structured to create students who possess an array of skills which would be transferable to a variety of job settings, creating a highly capable general maintenance worker.

By fulfilling the program requirements, students will have the necessary skills for entry and mid level jobs in the general maintenance industry. This program prepares the student for basic electrical, heating and refrigeration, plumbing, and carpentry work, and to pass the "Certified Boiler/Steam Plant" License exam.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

- Use and interpret technical manuals to properly identify all major components of a high and low pressure boiler system and state and describe their function.
- Apply the proper procedures for calculation and measurement necessary in the operations and maintenance field.
- Safely use appropriate materials, test equipment and tools in order to connect and troubleshoot a high and low pressure boiler system in addition use charging, evacuation, and recovery equipment properly and safely on a heating, ventilation, air conditioning and refrigeration (HVACR) system.

At least 60 degree applicable units are required to earn an Associate degree.

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.
PROGRAM OVERVIEW

The Paralegal Studies program at LATTC will prepare students for employment as paralegals or legal assistants in both the private and public sectors. Students who complete the program will be able to work with lawyers in law offices, corporations, governmental agencies or other entities. Upon completion of the program students will be able to prepare cases for court, calendar, draft various legal documents, fill out Judicial Council Forms, interview clients, brief cases and conduct traditional and computer assisted legal research using Lexis Nexis and/or West Law. The program will also provide hands on experience through internships within private law firms, government agencies, courts and legal aid clinics.

The graduate possessing the Certificate of Achievement or the AA Degree will be able to work closely with attorneys and be responsible for researching, analyzing, and managing tasks associated with legal cases. The Paralegal Studies program at LATTC is driven by its business relationships and partnerships with practicing lawyers, paralegals from the public and private sectors, legal clinics, paralegal consortium’s and other community colleges’ paralegal faculty members. The mission of the program is to provide an environment of excellence in knowledge and the latest practices of the legal field.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

• Prepare cases for courts, collect data and investigate case facts, and build arguments based on data.
• Review previous judiciary decisions and make information available and accessible to attorneys.
• Identify the law pertaining to individual cases and all required information.
• Prepare legal documents, draft motions, and obtain affidavits, including legal reports for attorneys.

PARALEGAL STUDIES

| Associate in Arts Degree | Major Units: 42 |

Requirements for the Associate in Arts degree in Paralegal Studies may be met by completing 39 units of Required Courses and 3 unit of Major Electives with a “C” or better along with General Education units. At least 60 degree applicable units are required to earn an Associate degree.

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

For additional related degrees and certificates, refer to Water Systems Technology.

PROGRAM OVERVIEW

Most people are familiar with plumbers, those individuals who come to their home to unplug a drain or install an appliance. Plumbers install, maintain, and repair many different types of pipe systems. Some systems move water to a municipal water treatment plant and then to residential, commercial, and public buildings. Other systems dispose of waste, provide gas to stoves and furnaces, or provide heating and cooling needs. Pipe systems in power plants carry the steam that powers huge turbines, while pipes also are used in manufacturing plants to move material through the production process. Specialized piping systems are critical in both pharmaceutical and computer-chip manufacturing. The existence of such various pipe systems generate the need for trained plumbers.

Plumbers must be able to follow building plans or blueprints and instructions, lay out the job, and work efficiently with the materials and tools of their trade. Computers and specialized software are used to create blueprints and plan layouts. To meet the training needs of persons interested in becoming a service and repair plumber or a commercial construction plumber, LATTCC offers a Plumbing Associate in Science degree and a Plumbing Construction Technologies Associate in Arts degree, as well as Certificates of Achievement.

The Associate in Science degree is designed for individuals seeking entry level positions in the field. Students enrolling in this program should be able to commit to full-time student status, which is approximately 24 hours per week. This time commitment is necessary to allow for hands-on training with the laboratory applications used during the course of instruction.

The Associate in Arts degree is an evenings-only course of study designed for individuals currently in the field who want to improve or expand their skills. Due to limitations on available evening hours, the utilization of hands-on laboratory application is assumed to be provided at the student’s place of employment. Depending on availability, the Associate in Arts degree may require slightly longer time to complete due to limited hours available. Check with the Department Chair for more details prior to enrolling.

Plumbers work in commercial and residential settings where water and septic systems need to be installed and maintained. They also work outdoors, sometime in remote areas, as they build pipelines that connect sources of oil, gas, and chemicals with the users of these materials. Because plumbers frequently must lift heavy pipes, stand for long periods, and sometimes work in uncomfortable or cramped positions, they need physical strength as well as stamina.

By fulfilling the program requirements, students will have the necessary knowledge and skills for a career in residential, commercial, and industrial service and repair or construction plumbing. Reading of blueprints, layout, estimating, installation of piping systems and fixtures, repair of supply and waste water systems are just some of the skills that will be mastered during this program.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Use hand and power tools such as the right angle drill, Hole Hawg and Super Hawg, plumb bob and tape measure, to perform plumbing operations.
- Employability.
- Perform trade calculations related to plumbing practices.
- Create and use construction documentation.

PLUMBING

Associate in Science Degree
Major Units: 48

Requirements for the Associate in Arts degree in Plumbing may be met by completing 48 units of Required Courses with a “C” or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

PLUMBING

Certificate of Achievement
Major Units: 48

A Certificate of Achievement in Plumbing may be earned by completing 48 units of Required Courses listed under for the Associate degree in Plumbing with a “C” or better in each course.

By fulfilling the program requirements, students will have the necessary knowledge and skills for a career in residential, commercial, and industrial service and repair or construction plumbing.

PLUMBING: CONSTRUCTION TECHNOLOGIES

Associate in Arts Degree
Major Units: 45

Requirements for the Associate in Arts degree in Plumbing: Construction Technology may be met by completing 37 units of Required Courses and 8 units of Major Electives with a “C” or better along along with General Education units.

By fulfilling the program requirements, students will have the necessary knowledge and skills for a career in Residential, Commercial, and Industrial Service and Repair or Construction Plumbing.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:
- Use hand and power tools to perform plumbing operations.
- Demonstrate sustainable plumbing practices.
- Perform trade calculations related to plumbing practices.
- Create and use construction documentation.

At least 60 degree applicable units are required to earn an Associate degree.  
*This Associate Degree may be eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

**PROGRAM OVERVIEW**

The Chemical Process Industries (CPI) are a major part of U.S. business and represent a diverse industries ranging from pharmaceuticals to large-scale processing of gasoline and waste water treatment and food and beverage. Working in the CPI represents a particular challenge with regard to handling materials, which range from small quantities of specialized products to large quantities of potentially hazardous materials.

Process Technicians (PTs) team with engineers and other technicians with specialties such as instrumentation, electronics, or maintenance to adjust and optimize conditions for the production of large quantities of products. The quality of the production is dependent on the skill and knowledge of the Process Technician in carrying out the operations of the plant. PTs must be concerned with issues such as personal and co-worker safety, impact of materials on the environment, and process skills that deal with all aspects of controlling processes and maintaining equipment.

CPI is the fourth largest manufacturing industry in the United States. It encompasses plants manufacturing an almost endless range of products, such as chemicals, (both organic and inorganic), food and beverages, cleaning preparations, plastics, agricultural chemicals, paints, pharmaceuticals, cosmetics, power generation, pulp and paper, petroleum refining and wastewater treatment, to name just a few.

The LATTC Process Technology program is a member of the California Chemical and Process Technology Alliance (CCPTA) and the Pacific Technology Career Alliance, an education/industry consortia of major chemical industries both public and privates. The CCPTA was founded for the purpose of ensuring that Process Technology instructors and students are on the receiving end of current industry analytical methods, techniques, equipment and standards.

The Alliance is also committed to providing a well skilled employee pool for chemical industry employment opportunities. At the conclusion of this program, students will have the skills necessary for:
- Working in the refinery, biomanufacturing, petrochemical and other process industry, including treatment plants
- Monitoring safety/health and environmental regulations
- Sampling and handling chemical materials
- Measuring physical properties
- Operating and maintaining process instruments and equipment
- Understanding process operations using P&IDs and associated documents
- Troubleshooting process operations.

PROCESS TECHNOLOGY

Certificate of Achievement

Major Units: 45

A Certificate of Achievement in Process Plant Technology may be earned by completing 45 units of Required Courses listed under for the Associates degree in Process Technology with a “C” or better in each course.

RAIL VEHICLE MAINTENANCE

Department: Advanced Transportation & Manufacturing
Department Chair: Mr. Jess Guerra, Room F-212E
(213) 763-3919, GuerraJ@lattc.edu

Award Title | Award Type | GE Units | Required Course Units | Major Elective Units | Major Units
--- | --- | --- | --- | --- | ---
Rail Vehicle Maintenance | AS | 21 | 40 | 40
Rail Vehicle Maintenance | C | 40 | 40

At least 60 degree applicable units are required to earn an Associate degree.

This program is currently pending approval for federal financial aid; please see a counselor for assistance.

PROGRAM OVERVIEW

For many of us, it is obvious how the US transportation system affects our daily lives as we move from one place to another and rely on the system to transport items we purchase and use on a daily basis—particularly through rail transportation. In the Los Angeles region, rail transportation supports the largest container port complex in the U.S., 9th largest in the world, and the 3rd largest transit agency in the U.S. where nearly 1/5th of transit trips in the region are by commuter, light, or heavy rail. A career in rail transportation, as a rail mechanic, provides an opportunity to work within large rail companies and transportation agencies providing competitive wages, health and retirement benefits, and opportunities for career advancement. Employment at these companies/agencies often requires starting within entry positions and advancing through promotional opportunities. Because nearly half of the workforce will be eligible to retire within the next 10 years, employment outlook and career advance opportunities are promising. Program completers will also have the requisite competencies to be employed as Installation, Maintenance, and Repair Worker Helpers and Machinery Maintenance Workers that also provide many employment opportunities.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Identify and explain the operation of rail vehicle systems (such as engine, propulsion, brakes, electrical and suspension) along with their related subsystems.
- Demonstrate proficiency in utilizing specialized tools and shop equipment in the repair of rail vehicles while adhering to all applicable industry safety standards.
- Utilize the various manufacturer diagnostic software to accurately diagnose and repair rail vehicles.

RAIL VEHICLE MAINTENANCE

Associate in Science Degree

Major Units: 40

Requirements for the Associate of Science degree in Rail Vehicle Maintenance may be met by completing 40 units of Required Courses with a “C” or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

<table>

NOTE: Students are required to provide basic hand tools, Transportation Technology uniform and personal safety equipment.

RAIL VEHICLE MAINTENANCE

Certificate of Achievement

Major Units: 40

A Certificate of Achievement in Rail Vehicle Maintenance may be earned by completing 40 units of Required Courses with a “C” or better in each course.
REAL ESTATE

Department Chair: Cynthia Morley-Mower, Room JH-512
(213) 763-7074, MorleyCN@lattc.edu

Award Title | Award Type | GE Units | Required Course Units | Major Elective Units | Major Units
--- | --- | --- | --- | --- | ---
Real Estate* | A.A. | 21* | 45 | - | 45
Real Estate | C | 30 | - | 30

At least 60 degree applicable units are required to earn an Associate degree.

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

PROGRAM OVERVIEW

The Real Estate Program offers several option, which prepare students for increasing levels of responsibility and career choices within the field of real estate.

Associate of Arts in Real Estate

The Associate of Arts in Real Estate degree is designed for transfer to an upper division public college or university in the State of California. The designed curriculum prepares students for the real estate salesperson’s license, the real estate broker’s license and the practice of real estate.

By fulfilling the program requirements, students are prepared for a variety of entry level and advanced career opportunities in the real estate profession. Typical positions include: real estate agent, broker, real estate assistant, processor, appraiser, property manager, escrow officer, title officer, real estate office manager, consumer protection representative, land developer, urban planner, construction, business sales agent, community advocate, property inspector, investor, and owner of income producing properties.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

• Demonstrate knowledge of real estate principles and practices in fulfillment of Department of Real Estate Licensure requirements.

At least 60 degree applicable units are required to earn an Associate degree.

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

For additional related certificates, refer to programs under Operation & Maintenance Engineering: Steam Plant.

PROGRAM OVERVIEW

Cooling and heating devices help regulate the temperature, humidity, and air quality in residential homes, commercial locations, and industrial facilities. Critical items like food and medicine require refrigeration to keep them from spoiling. Technicians repair, maintain, and install heating, air-conditioning, and refrigeration systems. Our program trains these technicians. Los Angeles Trade-Technical College offers an Associate of Science degree in Refrigeration and Air Conditioning Mechanics, as well as Certificate of Achievement.

By fulfilling the program requirements, students will have the necessary knowledge and skills for a career in residential, commercial, and Industrial service and repair of air conditioning, heating and refrigeration systems. Environmental Protection Agency (EPA) refrigerant certification will be received. Electrical controls, piping installation, compressor installation and repair are just some of the skills that would be mastered during this program.
# Program Learning Outcomes (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Use and interpret technical manuals to properly identify all major components (compressor, condenser, evaporator, metering device) of a refrigeration system and state and describe their function.
- Apply the proper procedures for calculation and measurement (superheat and subcooling) necessary in the air conditioning and refrigeration field.
- Safely use appropriate materials, test equipment and tools (refrigerant leak detector, VOM, CO detector, Infrared thermometer) in order to connect or troubleshoot a refrigeration and air conditioning system.
- Use charging, evacuation, and recovery equipment properly and safely. Use Vacuum pump, Refrigeration Service Analyzers, and recovery/recycling equipment.

# Refrigeration & Air Conditioning Mechanics

**REFRIGERATION & AIR CONDITIONING MECHANICS**

Certificate of Achievement

Major Units: 48

A Certificate of Achievement in Refrigeration and Air Conditioning Mechanics may be earned by completing 48 Major Units with a "C" or better.

Courses from the day or evening programs should not be mixed in an attempt to meet the degree requirements.

---

**RENEWABLE ENERGY GENERATION, TRANSMISSION, AND DISTRIBUTION: POWERLINE MECHANIC**

Department: Construction, Maintenance & Utilities

Department Chair: Mr. William (Bill) Elarton, Room SQ-122 (213) 763-3701, cdm@lattc.edu

---

**PROGRAM LEARNING OUTCOMES (PLOs)**

Upon completion of the Degree program, students are able to:

- Basic theory of Solar, Geothermal, Wind, Methane, and Water.
- Use hand and power tools, testing equipment, and other P.P.E. related to perform basic utility powerline work.
- Perform calculations and measurements commiserate to entry level powerline work.
- Pole Climbing Competencies (Climbing with Confidence).

---

**RENEWABLE ENERGY GENERATION, TRANSMISSION, AND DISTRIBUTION: POWERLINE MECHANIC**

Associate in Science Degree

Major Units: 40-43

Requirements for the Associate in Science degree in Renewable Energy Generation, Transmission, and Distribution: Powerline Mechanic may be met by completing 34-36 units of Required Courses and 6-7 unit of Major Electives with a "C" or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

**Certificate of Achievement**  
Major Units: 18-20

A Certificate of Achievement in **Powerline Mechanic** may be earned by completing 18-20 units of Required Courses with a “C” or better in each course.

#### PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the **Certificate** program, students are able to:
- Use hand and power tools to perform basic utility powerline work.
- Perform calculations and measurements commiserate to entry level powerline work.
- Pole Climbing Competencies.

### UTILITY INDUSTRY FUNDAMENTALS

**Certificate of Achievement**  
Major Units: 19-21

A Certificate of Achievement in **Utility Industry Fundamentals** may be earned by completing 19-21 units of Required Courses with a “C” or better in each course.

#### PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the **Certificate** program, students are able to:
- Use hand and power tools to perform basic utility power-line work such as; hammers, saws, chain-saw, wrenches, and other related equipment.
- Perform calculations and measurements commiserate to entry level power-line work.

RENEWABLE ENERGY CERTIFICATE AND DEGREE PATHWAYS

Certificate of Achievement Pathways

Weatherization and Energy Efficiency Certificate of Achievement (12 units)

- BLDGCTQ 007 Weatherization – Practical Energy Efficiency Techniques 3
- BLDGCTQ 008 Weatherization – Energy Efficiency Practices 1
- BLDGCTQ 009 Energy Auditor – Residential 3
- BLDGCTQ 012 Energy Auditor – Residential Practices 1
- BLDGCTQ 921 Cooperative Education – Building Construction Techniques 2
- ECONMT 105 Fundamentals of Solar Electricity 3

PLUS

Energy Systems Technology Fundamentals Certificate of Achievement (16-18 units)

- ECONMT 110 Renewable Energy Systems 3
- CRPNTRY 148 Computer Aided Estimating I 3
- REF A/C 100 Air Conditioning Project Management 3

PLUS

Solar PV Installation and Maintenance Certificate of Achievement (26-28 units)

- ECONMT 110 Renewable Energy Systems 3
- CRPNTRY 118 Construction I 3
- ECONMT 171 Electrical Codes and Ordinances I 3
- REF A/C 110 Solar Water & Pool Heating System Principles 2
- REF A/C 106 Thermal Energy Storage / Heat Recovery 4

PLUS

Solar Thermal Installation and Maintenance Certificate of Achievement (30-32 units)

- ECONMT 110 Renewable Energy Systems 3
- CRPNTRY 119 Construction II 3
- ECONMT 171 Electrical Codes and Ordinances I 3
- REF A/C 110 Solar Water & Pool Heating System Principles 2
- REF A/C 106 Thermal Energy Storage / Heat Recovery 4

Educational Programs

RENEWABLE ENERGY CERTIFICATE AND DEGREE PATHWAYS

Required Courses for All Renewable Energy Degrees (12 units)

- ECONMT 110 Renewable Energy Systems 3
- CRPNTRY 118 Construction I 3
- ECONMT 115 Fundamentals of Solar Electricity 3

Elective Courses for All Renewable Energy Degrees (4 units)

Choose one or more courses from the list below to reach 4 units

- ECONMT 137 Solar Water & Pool Heating System Principles
- ECONMT 138 Solar Water & Pool Heating System Practices
- REF A/C 106 Thermal Energy Storage / Heat Recovery

General Education (21 units)

Refer to the General Education Requirements for specific courses to complete an Associate’s of Science degree.

Associate in Science Degree Pathways

General Education (21 units)

- Renewable Energy: Solar PV Installation and Maintenance A.S. (60-62 units)
RENEWABLE ENERGY WITH ENERGY EFFICIENCY EMPHASIS

Department: Construction, Maintenance & Utilities
Department Chair: Mr. William (Bill) Elarton, Room SQ-122
(213) 763-3701, cdm@lattc.edu

Award Title | Award Type | GE Units | Required Courses | Major Elective Units | Major Units
---|---|---|---|---|---
Renewable Energy Technician W/ Energy Efficiency Emphasis* | A.S. | 21* | 36-38 | 4 | 40-42
Weatherization and Energy Efficiency | C | 12 | - | 12
Energy Systems Technology Fundamentals | C | 16 | - | 16

At least 60 degree applicable units are required to earn an Associate degree.

*This Associate Degree may be eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

PROGRAM OVERVIEW

LATTC offers a series of courses for individuals interested in working in the new, emerging renewable energy and energy efficiency industry. This degree program includes courses that enable individuals to: (1) have the requisite knowledge and skills to obtain employment in the energy/utility sector and (2) obtain skills and expertise to pursue other renewable energy and/or energy efficiency occupations.

By fulfilling the program requirements, students will have the necessary knowledge and skills for a career in residential and commercial renewable energy-related occupations.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

- Basic theory of Solar, Geothermal, Wind, and Methane.
- Use hand and power tools, testing equipment, and other P.P.E. related to perform new and retrofit weatherization and related energy efficiency operations.
- Demonstrate sustainable industry principles and practices.
- Perform calculations and measurements related to weatherization and other energy efficiency operations.
- Work independently and interdependently to safely accomplish shared professional outcomes.

RENEWABLE ENERGY TECHNICIAN W/ ENERGY EFFICIENCY EMPHASIS

| Associate in Science Degree | Major Units: 40-42 |

Requirements for the Associate in Science degree in Renewable Energy Technician W/ Energy Efficiency Emphasis may be met by completing 36-38 units of Required Courses and 4 unit of Major Electives with a “C” or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

- REF A/C 105 Solar Water & Pool Heating System Principles | 3 |
- REF A/C 165 Thermal Energy Storage/Heat Recovery | 4 |

WEATHERIZATION AND ENERGY EFFICIENCY

Certificate of Achievement

Major Units: 12

A Certificate of Achievement in Weatherization and Energy Efficiency may be earned by completing 12 units of Required Courses listed, with a “C” or better in each course.

LATTC offers a series of courses for individuals interested in employment as
weatherization and energy efficiency specialists. The courses are developed both for new building professionals and for professional builders/contractors already in the workforce in need of these skills. Homeowners may also find the introduction class helpful. Individuals will be prepared to be weatherization, energy efficiency, and retrofit technicians, home improvement retrofit trainees, residential air sealing technicians, insulation installers, energy conservation representatives or residential energy field auditors.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

- Use hand and power tools to perform new and retrofit weatherization and related energy efficiency operations.
- Demonstrate sustainable industry principles and practices.
- Perform calculations and measurements related to weatherization and other energy efficiency operations.

ENERGY SYSTEMS TECHNOLOGY FUNDAMENTALS

Certificate of Achievement
Major Units: 16

A Certificate of Achievement in Energy Systems Technology Fundamentals may be earned by completing 16 units of Required Courses listed, with a "C" or better in each course.

The goal of the Energy Systems Technology Fundamentals Certificate of Achievement Program is to provide short-term industry-recognized training for entry-level professionals in the utility/energy sector; a significant industry sector in the Los Angeles region.

Skills gained from this program prepare a student for employment at the entry level in jobs such as: Los Angeles Department of Water and Power “Electrical Utility Helper” classification, Southern California Edison’s “Utility Helper” position, City of Los Angeles "Electrical Craft Helper”.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

- Use hand and power tools to perform basic utility power-line work such as; hammers, saws, chain-saw, wrenches, and other related equipment.
- Perform calculations and measurements commiserate to entry level power-line work.

RENEWABLE ENERGY TECHNICIAN WITH EMPHASIS IN SOLAR PV INSTALLATION AND MAINTENANCE

Department: Construction, Maintenance & Utilities
Department Chair: Mr. William (Bill) Elarton, Room SQ-122
(213) 763-3701, cdm@lattc.edu

For additional related certificates, refer to programs under Energy Systems Technology Fundamentals.

PROGRAM OVERVIEW

LATTC offers a series of courses for individuals interested in working in the new, emerging field of solar energy. The courses enable individuals to be prepared to become certified by North American Board of Certified Energy Practitioners (NABCEP). The solar courses have also obtained NABCEP approval. In addition, one of the courses--Fundamentals of Solar Electricity (ECONMT 105 —54 hours)—prepares individuals to be able to take the NABCEP Photovoltaic (PV) Entry Level Certificate of Knowledge test. This
Certificate program also prepares individuals and is required to successfully complete other renewable energy or energy efficiency Certificate of Achievement and degree programs at the college. As such, it serves as one of the "stackable" certificates in the renewable energy/energy efficiency certificate and degree pathway.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

- Use hand and power tools to perform solar (PV) installation and maintenance work.
- Demonstrate sustainable industry principles and practices.
- Perform calculations and measurements required for solar (PV) installation and maintenance work.
- Work independently and interdependently to safely accomplish shared professional outcomes.

RESTAURANT MANAGEMENT

Department: Culinary Arts/Professional Baking
Department Chair: Mr. Steve Kasmar, Room SA-118
(213) 763-7332, KasmarSL@lattc.edu

Award Title | Award Type | GE Units | Required Course Units | Major Elective Units | Major Units
--- | --- | --- | --- | --- | ---
Restaurant Management* | A.A. | 21* | 42 | - | 42

At least 60 degree applicable units are required to earn an Associate degree.

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

For additional related degrees and certificates, refer to programs under Baking Professional and Culinary Arts.

PROGRAM OVERVIEW

The Greater Los Angeles area needs qualified individuals who can lead the numerous hotel, restaurant, and catering kitchens in our region. The Restaurant Management program at LATTC offers a foundation in management theory, cooking fundamentals, sanitation, safety and restaurant supervision. Students practice and demonstrate culinary and management skills in a working foodservice facility located on the college campus.

The Restaurant Management program provides a foundation in kitchen fundamentals including preparation of hot and cold sauces, vegetable and meat cookery, identifying accounting procedures and reports, operating kitchen equipment, and knowledge of management theory and supervision techniques.

By fulfilling the program requirements, students are prepared to find positions as restaurant managers, assistant managers, kitchen managers, dining room managers, or kitchen supervisors.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:
- Practice and demonstrate culinary and management skills in a working foodservice facility on a college campus.
- Demonstrate foundational kitchen fundamentals, including operating kitchen equipment.
- Employ management and supervision techniques.
- Utilize accounting procedures and reports.
GRADUATION REQUIREMENTS
AND EDUCATIONAL PROGRAMS

RETAIL MANAGEMENT

Retail Management* (Transfer) | A.A. | 21* | 41 | 6 | 47 |
Retail Management | C | | 24 | 24 |

At least 60 degree applicable units are required to earn an Associate degree.

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

PROGRAM OVERVIEW

The Retail Management AA is a comprehensive college program designed to prepare current and future retail employees for a fast-paced and competitive retail environment. This program, designed in collaboration with retail industry leaders, will provide the student with the competencies required to succeed at the management level within the dynamic retail industry.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

• Demonstrate the technical and leadership competencies required to succeed at the management level within the dynamic retail industry.

RETAIL MANAGEMENT

Associates in Arts Degree

SENIOR CARE TECHNICIAN

Department: Health and Exercise Sciences
Department Chair: Joseph Ratcliff
(213) 763-3730, RatcliffJ@lattc.edu

Award Title | Award Type | Required Course Units | Major Elective Units | GE Units | Total Units
---|---|---|---|---|---
Senior Care Technician | C | 16.5 | - | - | 16.5

PROGRAM OVERVIEW

The Senior Care Technician certificate is intended to prepare students for a new role in agencies that provide care to elderly at various levels of independence. The role combines basic nursing skills, psychosocial skills, resource management and administrative skills needed to provide holistic care to seniors who require services that allow them to live as independently as possible in a structured environment.

The Senior Care Technician will be able to provide direct and indirect services to seniors and be a valuable resource for the senior, the facility and the community in which the seniors are located. The Senior Care Technician will have a skill set to deal with dementia and other difficult behaviors and help develop and transfer these skills to the direct care staff. In conclusion, the Senior Care Technician will have assessment and care skills that are over and above those of Certified Nurse Aids but below those of Licensed Vocational Nurses. They will fill a niche in senior services.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

- Demonstrate competency in basic direct care, basic medical terminology, pathophysiology and pharmacology.
- Demonstrate an understanding of cultural diversity, ethics, teamwork, professional behavior.
- Demonstrate fine-tuned customer service and assessment skills.

PROGRAM REQUIREMENTS

The Senior Care Technician Certificate of Achievement can be met by completing all 16.5 required course units with a “C” or better grade.

SIGN GRAPHICS

Department: Design and Media Arts
Department Chair: Ms. Carole Anderson, Room CY-222
(213) 763-3642, AndersonC@lattc.edu

Award Title | Award Type | Grad. Plan | Required Course Units | Major Elective Units | Total Major Units
---|---|---|---|---|---
Sign Graphics | AA | 21* | 40 | 4 | 44 |
Sign Graphics | C | | 40 | 4 | 44 |

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

PROGRAM OVERVIEW

Sign makers design and produce signs to advertise and identify businesses, industries, public services, entertainment, as well as other areas. Students learn how to design and execute a wide variety of signs including temporary signs such as posters and paper banners plus permanent signs on wood, metal, canvas, vehicles, walls and glass. Students learn the fundamentals of lettering, design, composition, and color, while practicing hand and eye coordination. Students also learn to both draw and brush a diverse set of alphabets and a variety of interior and exterior signs. In addition, students study how to design and execute signs on sign specific software including patterns, vinyl lettering, and vinyl application plus how to use plotters, scanners, and clip art images.

Many sign makers are self-employed, work freelance or are employed in a commercial sign shop. Employment opportunities are competitive and only those with good hand skills and knowledge have the best chance for employment. Specialty skill instruction like dimensional letters, sandblasted signs, gold leaf and high-end layout and design are offered to advanced students. Advanced students participate in a business module for pricing and eventual self-employment.
By fulfilling the program requirements, students are proficient in basic hand lettering, sign design and layout, the production of temporary signs, exterior permanent signs, window signs and specialty signs, computer operation including printing, cutting and applying vinyl lettering and general production skills needed to complete a successful sign. Students will also understand basic pricing and sales techniques, record keeping or small business operation, and obtaining licenses.

Elective courses in silk screening and mural painting are also offered in this program. Silk screening is a printing method for multiple or large number jobs. The student will learn how to make a screen, cut a variety of stencils, prepare the screen and print an image. Proper ink usage and clean-up will be taught. Students will print on a variety of substrates including multicolor prints on T-shirts.

In the mural painting course, techniques for producing large format murals are taught using a variety of methods including the grid method. Students will learn layout and design, pattern making and transferring artwork to the wall. Surface preparation, paints, tools and brushes will also be covered.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Design, layout and produce a sign to industry standards using hand lettering techniques and the latest digital printing options.

For additional related degrees and certificates, refer to programs under Cosmetology, Barbering.

PROGRAM OVERVIEW

The Trade Tech Skin Therapy Program offers training and technical instruction of; manual, electrical and chemical facials, temporary hair removal, makeup, chemistry, health, safety, electricity, spa ecology, anatomy and physiology. The LATTC Skin Therapy program prepares student to pass the State Board examination and integrates a mock State Board written and practical exam to further familiarize students with the process.

The Skin Therapy program prepares students for entry level positions that include but are not limited to; skin therapists, spa managers, educators, makeup artist, holistic skin care professionals, business owners, product & equipment sales representatives or managers.
PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

- Perform, practice, and demonstrate all areas of skin care while observing the safety and sanitation rules set forth by the California Board of Barbering and Cosmetology.
- Take the written and practical California Board of Barbering and Cosmetology Licensure for Esthetician Examination.
- Demonstrate skills and knowledge of skin care necessary to build and maintain ongoing clientele, good work ethic, resumes building, employment guidelines, tracking and maintaining business transactions for the esthetician spa environment and industry.

of creating, launching and managing a small business. Through academic coursework and experiential learning students will leave prepared to pursue the entrepreneurial lifestyle and be ready to maximize their entrepreneurial potential. Students who complete the program will be proficient in the process and procedures needed to transform an initial entrepreneurial idea into a viable business operation.

Through business simulations, mentorships and internships within local small businesses in the surrounding community this program will also provide students with practical knowledge, hands-on experience and the skills to be a successful entrepreneur.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

- Conducting feasibility studies toward analyzing and evaluating business ideas.
- Developing a quality product or providing a reliable service.
- Preparing a Business Plan that integrates innovative Marketing and Advertising Plans.
- Preparing business financial statements.
- Conducting sales and advertising by way of traditional methods and e-commerce.
- Formatting flyers, business cards and websites for the marketing of a small business.

PROGRAM OVERVIEW

The Small Business Entrepreneurship AA Degree Program at Los Angeles Trade-Technical College will prepare students to understand the process
SMALL BUSINESS ENTREPRENEURSHIP
Certificate of Achievement
Major Units: 32

PROGRAM OVERVIEW

The Small Business Entrepreneurship Certificate of Achievement is designed to provide prospective small business owners/entrepreneurs with the principles involved in planning and operating a small business. Students will acquire the tools skills, and knowledge necessary for successful startup and the fundamentals for sustainable success. Particular interest is placed on evaluating potential business opportunities, the development of dynamic business plans, small business problem recognition and solutions, record-keeping, effective marketing strategies, human relations and personnel management and efficient/effective operating principles.

Students will also gain technical and business expertise through classroom and hands on field experiences with a strong emphasis on entrepreneurship and lifelong learning. By fulfilling the program requirements, students will be proficient in startup strategies and practices needed to transform an initial entrepreneurial idea into a viable business operation, which will enable them to prosper in the ever changing small business environment.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

• Students will be able to identify business problems and solutions.
• Students will be able to construct small business financial statements.
• Students will be able to demonstrate competence in financial accounting processes and systems.
• Students will be able to effectively communicate both orally and writing.

REQUIRED COURSES

A Certificate of Achievement in Small Business Entrepreneurship may be earned by completing 32 units of Required Courses listed, with a “C” or better in each course.

SOLID WASTE MANAGEMENT TECHNOLOGY
Certificate of Achievement
Major Units: 24

A Certificate of Achievement in Solid Waste Management Technology may be earned by completing 12 units of Required Courses and 12 units of Major Electives listed with a “C” or better in each course.

Students completing the Certificate program will be proficient in performing the duties involved in landfill management including collection, transportation, storage and disposal.

PROGRAM OVERVIEW

The program is designed for any interested individuals seeking to learn the most updated information in recycling and solid waste management. The program addresses environmental, technological, political, legal, planning and economic aspects of recycling and solid waste management policies.

By fulfilling the program requirements, students are prepared and advance in the Solid Waste Management industry to work as a Solid Waste Operator, Solid Waste Technician, Solid Waste Supervisor, Hazardous Waste Operator, or Environmental Specialist.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

• List & discuss the sources of solid waste and its treatment technology.
• Describe the solid waste stream and the treatment processes and process control strategies.
• Correctly utilize basic mathematical operations as applied to entry level solid waste calculations and measurements.

STREET MAINTENANCE TECHNOLOGY

Department: Construction, Maintenance & Utilities
Department Chair: Mr. William (Bill) Elarton, ROOM SQ-122
(213) 763-3701, ElartonWD@lattc.edu

PROGRAM OVERVIEW

The Street Maintenance Technology program is designed primarily for those involved in public works maintenance operations. Asphalts and concrete pavement, construction, plan reading, calculation of materials, state and municipal codes, report writing, and heavy equipment operation and maintenance are some of the skills required in this field. To meet the training needs of persons interested in becoming a street maintenance worker, LATTC offers a Street Maintenance Associate degree and a Certificate of Achievement.

The street maintenance field has evolved into a broader category of workers. Workers in this area are primarily employed by governmental agencies that perform maintenance operations on public highways and streets. Professionals in this field are involved at the ground level through upper level management.

By fulfilling the program requirements, students will have the necessary knowledge and skills for a career as a Street Services Worker. Knowledge and skills will be mastered in the area of installation and maintenance of various types of street construction and material including asphalt and concrete. Students will also gain the supervisory skills needed to be promoted into management.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Use hand and power tools such as jackhammers, bucket trucks, sweeper vehicles, basic hand operated tools and related PPE to perform street services work.
- Perform calculations and measurements such as; area, volume, estimation, etc. required for street services work.
- Employability evaluation, such as; soft skills and the ability to work independently and interdependently to safely accomplish shared professional outcomes.

STREET MAINTENANCE TECHNOLOGY

Associate in Arts Degree

Major Units: 36

At least 60 degree applicable units are required to earn an Associate degree.  
*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

For additional related degrees and certificates, refer to programs under Sign Graphics.

**PROGRAM OVERVIEW**

The Visual Communications program at LATTC is the starting point for exciting careers in animation, art direction, digital imaging, graphic design, illustration, multi-media, web design and other related fields. The fast paced two-year program begins with fundamentals: color, design, drawing, prepress and typography. Advanced levels create finished portfolios on a Macintosh computer, utilizing industry standard digital software. Student portfolios demonstrate creativity and discipline, displaying dynamic art sensibilities and creating visual solutions for problems of marketing and publishing. The Visual Communications program focuses on four core areas:

- **GRAPHIC DESIGN**: Beginning levels will study the areas of layout and design, typography, and advertising concepts. Advanced levels will develop logos and corporate identity programs, design brochures with extended text, and create original magazine advertising, which is directed to specific audience demographics. Problem solving, brainstorming and computer training will receive equal emphasis. Graduating student portfolios incorporate a wide variety of projects showcasing the student’s ability to conceptualize, design and use typography as a communication tool.

  - **DRAWING**: Beginning levels will study freehand observational drawing, perspective and the principles of light and shade. Black and white mediums will be explored in pencil, markers and ink. Advanced levels create comprehensive layouts in color marker and pencil as preliminary development. Finished designs and illustrations for advertising and online usage are then created traditionally or digitally and serve as portfolio samples.

  - **DIGITAL PREPRESS**: Thorough study of the preparation of art, graphics, photography, and typography for reproduction in print. Beginning levels concentrate on understanding the mechanics of color separations and print specifications. This knowledge is then applied as students create digital files that utilize specific print requirements. Advanced levels prepare complex graphic computer files for output at commercial printers.

  - **COMPUTER GRAPHICS**: The creation of art and design on the computer requires mechanical know-how and considerable familiarization with the workings of several graphic software applications. The Visual Communications program offers instruction in Adobe Creative Suites: Acrobat, Dreamweaver, Flash, Fireworks, Illustrator, InDesign and Photoshop and HTML. Graduating student portfolios demonstrate familiarity with each of these software applications and an ability to manipulate each for specific uses and creative affects.

Today’s commercial marketplace for artists has never been more available. Flash motion graphics and web design have initiated new and creative directions. Traditional artists and conventional designers continue as before but have incorporated digital software within their accomplished collection of talents. This blending of tradition and technology is the primary emphasis within the Visual Communications program.

By fulfilling the program requirements, students can pursue many different creative careers. While it is advisable for students to continue higher education, many graduates have entered the workplace upon completion of the Visual Communications program alone, realizing creative and financial success. Graduating students acquire visual sensitivities with respect to type, images and graphics; they are trained in the visual software used by industry, and understand marketing as it applies to commercial art. Additionally, graduates market their work appropriately to specific audiences for freelance opportunities.

**PROGRAM LEARNING OUTCOMES (PLOs)**

Upon completion of the Degree/Certificate program, students are able to:

- Apply creative and marketing concepts to original design layouts that reflect Graphic Design industry standards
- Demonstrate technical proficiency, aesthetic sensitivity, and refinement with traditional artist tools.
VISUAL COMMUNICATIONS

Associate in Arts Degree
Major Units: 48

Requirements for the Associate in Arts degree in Visual Communication may be met by completing with a “C” or better 46 units of Required Courses and 2 units of Major Electives with a “C” or better along with General Education units. Information on the General Education unit requirements may be found in the catalog under Graduation/Transfer Requirements.

• **SUPPLY WATER OPTION** offers courses focused on the operation and design of water systems, wells, pumps and meters; water treatment for potable water, and technical phases of automatic controls, including power and code considerations.

**PROGRAM LEARNING OUTCOMES (PLOs)**

Upon completion of the Degree program, students are able to:
• Discuss Regulations governing supply water treatment and organizations involved.
• Describe the supply water treatment processes and process control strategies.
• Correctly utilize advanced mathematical operations when presented with applied supply water calculations and measurements.

**WATER SYSTEMS TECHNOLOGY--WASTEWATER TECHNOLOGY**

- Associate in Science Degree
  Major Units: 30

Requirements for the Associate in Science degree in Wastewater Systems Technology may be met by completing 21 units of Required Courses and 9 units of Elective Courses with a “C” or better, along with general education courses meeting graduation requirements.

In the State of California, there are five operator grade levels of profession in operating and maintaining publicly owned wastewater treatment facilities. Each grade level requires passing an examination administered by the State of California, after meeting qualifying experience and educational requirements. An Associates degree and 6 years of performance of an Operator Duty while holding a certificate, qualifies a person to be promoted to grade five level.

SUPPLY WATER SYSTEMS TECHNOLOGY

Certificate of Achievement
Major Units: 30

A Certificate of Achievement in Supply Water Technology may be earned by completing 21 units of Required Courses and 9 units of Major Electives listed under for the Associates degree in Water System Technology with a “C” or better in each course.

PROGRAM LEARNING OUTCOMES (PLOs)
Upon completion of the Certificate program, students are able to:
• List & discuss the sources of supply water and its treatment technology.
• Describe the supply water treatment processes and process control strategies.
• Correctly utilize basic mathematical operations as applied to entry level supply water calculations and measurements.

At least 50 degree applicable units are required to earn an Associate degree.

*This Associate Degree is eligible for a reduction of General Education requirements from 21 to 18 units; please consult with a counselor for more details.

† Course currently unavailable

PROGRAM OVERVIEW

The Associate in Science degree and Certificate of Achievement in Welding Gas and Electric is a full-time program designed for individuals seeking entry level positions in the field. Students enrolling in this program should be able to commit to full-time student status, which is approximately 21 hours per week. This time commitment is necessary to allow for hands-on training with the lab applications used during the course of instruction.

LATTC’s welding program is a Certified Welding Test Center. Individuals seeking certification as a welder can take the required certification exams on site.

By fulfilling the program requirements, students will have the necessary skills for all positions that are related to welding on plate. This program prepares the student for fabrication work, construction work, job shops and other entry-to-mid level related jobs.

PROGRAM LEARNING OUTCOMES (PLOs)
Upon completion of the Degree program, students are able to:
• Use hand and power tools to perform welding construction and maintenance work.
• Demonstrate sustainable welding construction and maintenance practices.
• Perform trade calculations related to welding construction and maintenance work.
• Work independently and interdependently to safely accomplish shared professional outcomes.

### Certificate of Achievement

Major Units: 48

A Certificate of Achievement in Welding, Gas and Electric may be earned by completing 48 units of Required Courses listed under for the Associates degree in Welding, Gas and Electric with a “C” or better in each course.

### PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

- Preform basic welds in all positions using the GMAW, FCAW, GTAW and SAW processes.
- Acquire local and national welding certifications or develop competencies in a specific welding skill.
- Exhibit continuous positive attitude toward safe work habits.
- Secure gainful employment.
Los Angeles Trade Technical College plays no part in the apprenticeship selection process. For further information about apprenticeship programs operating in California and the possibility of becoming an registered apprentice in any trade, contact the California State Division of Apprenticeship Standards at 8th floor, Room 8000, 320 West Fourth Street, Los Angeles, California 90012. Their phone number is (213) 576-7750.

For more information, contact the LATTC apprentice information center located in room SQ-122. Phone: (213) 763-7151.

**ELECTRICAL LINEMAN APPRENTICESHIP**

**Certificate of Achievement**

Prerequisites: Students enrolling in these classes must have been accepted into a California Registered Apprenticeship Program. Student apprentices will be monitored and evaluated during this program by the joint apprenticeship committee for their trade and will gain the skills necessary to perform as a journeyman in their trade. A Certificate of Achievement may be awarded when a student completes 18 units in this program.

**PROGRAM LEARNING OUTCOMES (PLOs)**

Upon completion of the Certificate program, students are able to:

- Use hand and power tools to perform basic utility power-line work such as; hammers, saws, chain-saw, wrenches, and other related equipment.
- Perform calculations and measurements commiserate to entry level power-line work.
- Pole Climbing Competencies (Climbing with Confidence), demonstration of things such as; string and transfer overhead wire, set and remove utility poles, hang transformers, hang and remove cross-arms, install and remove cut-outs, etc.

See "Course Descriptions" Section for detail course information for the following:

- 701A Electrical Lineman Apprenticeship I A  3
- 701B Electrical Lineman Apprenticeship I B  3
- 702A Electrical Lineman Apprenticeship II A  3
- 702B Electrical Lineman Apprenticeship II B  3
- 703A Electrical Lineman Apprenticeship IIIA  3
- 703B Electrical Lineman Apprenticeship III B  3
- 702A Cable Splicer Apprenticeship I A  3
- 702B Cable Splicer Apprenticeship I B  3
- 709 Electrical Craft Helper Apprenticeship  4
OPERATION MAINTENANCE ENGINEER APPRENTICES
Certificate of Achievement

Prerequisites: Students enrolling in these classes must have been accepted into a California Indentured Apprenticeship Program. A Certificate of Achievement may be awarded for completion of a combination of 36 units in this program and the A/C Refrigeration Mechanic program.

Student apprentices will be monitored and evaluated during this program by the joint apprenticeship committee for their trade and will gain the skills necessary to perform as a journeyman in their trade.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

• Use hand and power tools to perform stationary engineer operations.
• Perform calculations and measurements related to stationary engineer work.
• Work independently & interdependently to safely accomplish shared professional outcomes.

See “Course Descriptions” Section for detail course information for the following -

Pre-professional Educational Pathways

Cooperative Work Experience Education

Contact: Christie Dam
213.763.7075, DamMC@lattc.edu

Program Overview

Cooperative Work Experience Education (CWEE) combines on-the-job experience with regular classroom instruction. It is designed to expand students’ skills and knowledge, and to improve self-understanding by integrating classroom study with supervised work experience.

CWEE is based on the principle that well educated individuals develop most effectively through the incorporation of related education and work experience. By monitoring structured work experiences in business, industry, government and human services settings, LATTC provides enrichment to college studies which enhance the student’s total development.

In the Cooperative Work Experience Education program, an individual student’s educational objectives are carefully planned and coordinated between the College, the student, and the employer to ensure a positive and realistic employment experience.

Cooperative Work Experience Education has the following objectives:

- To provide opportunity for the student to secure employment on a part-time or full-time basis.
- To gain realistic work experience that is meaningfully related to the student’s college study program.
- To provide the student the opportunity to acquire knowledge, skills, and attitudes essential for successful employment.

A student enrolled in Cooperative Work Experience Education:

- Has the opportunity to learn or improve employment skills under actual working conditions.
- Gains perspective on career goals through application of classroom theory to “real life experience.”
- Builds self-identity and confidence as a worker through individual attention given by instructor/coordinators and employers.
- Has opportunities to test personal abilities in work environments.
- Has a more realistic approach to the Job market.
- May refer to work experience education in future job applications.
- Benefits financially while learning, and can begin a career earlier.

Students employed in a job not related to their major should enroll in:

COOP ED General Course: 395
Section: 9001
Units: 1-3
Room: CY-236

Students employed in a job related to their major should enroll in:

COOP ED MAJOR Course: 941
Section: See schedule
Units: 1-4
Room: CY-236

Student Qualifications

General Work Experience

Hours by arrangement: 1-3 units
Prerequisite: Approval of Work Experience Coordinator

This is a program where supervised employment is intended to assist students in acquiring desirable work habits, attitudes, and career awareness. The work experience need not be related to the students’ educational goals. The course may be repeated for a maximum of 16 total units, subject to a maximum of 3 units per one enrollment period in general work experience education.

Occupational Work Experience

Hours by arrangement: 1-4 units
Prerequisite: Employment in a field related to the students’ program of study as verified and approved by the Cooperative Work Experience Coordinator.

This is a program of supervised training conducted in the form of on-the-job training in an employment area related to students’ occupationally oriented program of study that will enhance the students’ educational goals on campus. The course may be repeated for a maximum of 16 total units, subject to a maximum of 4 units during one enrollment period in occupational work experience education.
CALIFORNIA STATE UNIVERSITY: APPROVED COOPERATIVE EDUCATION SUBJECT AREAS

Los Angeles Community College District policy provides that a maximum of eight (8) semester units in cooperative education courses completed in the subject areas listed below may be applied toward the California State University 56 unit admission requirement.

Cooperative Education COURSE DESCRIPTIONS

The following courses provide Cooperative Work Experience Education credit:

195  Work Experience General I       (1) RPT3 (CSU)
295  Work Experience General I       (2) RPT2 (CSU)
395  Work Experience General I       (3) RPT1 (CSU)
911  Work Experience in Major I  (1) RPT3 (CSU)
921  Work Experience in Major I  (2) RPT3 (CSU)
931  Work Experience in Major I  (3) RPT3 (CSU)
941  Work Experience in Major I  (4) RPT3 (CSU)

Additional courses within the disciplines listed below provide Cooperative Work Experience Education credit:
- Automotive Collision Repair
- Automotive and Related Technology
- Business
- Building Construction Techniques
- Carpentry
- Child Development
- Culinary Arts
- Diesel and Related Technology
- Electrical Construction and Maintenance
- Electronics Technology
- Fashion Design
- Fashion Merchandising
- Management
- Plumbing
- Professional Baking
- Refrigeration and Air Conditioning Mechanics
- Solid Waste Management Technology
- Supervision
- Supply Water Technology
- Welding/Gas and Electric

Prerequisite: Employment in a field related to the students’ program of study as verified by the signature of the cooperative education advisor. Supervised training is conducted in the form of on-the-line job training in an employment area that will enhance the students’ educational goals on campus.
PART 6.

NONCREDIT CONTINUING EDUCATION

NONCREDIT - CONTINUING EDUCATION

Department: Academic Connections
Department Chair: Christina Anketell, Room MA-109e
213-763-3738, AnketeCP@lattc.edu

PROGRAM OVERVIEW

Los Angeles Trade Technical College offers a variety of tuition-free noncredit courses on campus and at community-based organizations throughout Los Angeles. As a key aspect of lifelong learning, noncredit instruction at LATTC serves as a gateway to college and career preparation; provides programs for immigrants to actively engage in the economy and civic life; and provides access to basic skills and English as a Second Language. Students can register for classes through the Bridges to Success Center located in Mariposa Hall, MA-105, online, or off-site at the first class meeting. For additional information and registration assistance, contact the Bridges to Success Center at (213) 763-5560 or via email at bridge@lattc.edu.

COLLEGE READINESS

Certificate

This certificate prepares students for success in college. Students will obtain the basic skills needed to successfully transition to college classes and start working towards their certificate, degree, or transfer goals.

PROGRAM LEARNING OUTCOMES (PLOs)

• Utilize the basic speaking and listening skills necessary for success in obtaining employment and/or advancement in the workplace.
• Demonstrate the basic reading and writing skills necessary for success in obtaining employment and/or advancement in the workplace.

PROGRAM LEARNING OUTCOMES (PLOs)

• Apply listening, speaking, reading and writing skills to successfully attain their academic goals.
• Apply listening, speaking, reading and writing skills to successfully attain their vocational goals.

WORKPLACE READINESS

Certificate

This program will provide students with the skills to successfully search for, obtain and maintain employment.

PROGRAM LEARNING OUTCOMES (PLOs)

• Demonstrate the necessary computer literacy skills to successfully search for, obtain, and maintain employment.
• Utilize pre-employment / consumer training skills to successfully search for, obtain, and maintain employment.
• Demonstrate job search skills to successfully search for, obtain, and maintain employment.
• Employ effective image, etiquette, and interpersonal communication skills to successfully obtain and maintain employment.

ACCOUNTING

ACCTG 001 INTRODUCTORY ACCOUNTING I (5) UC/CSU
Lecture: 5 hours
Advisory: Business 38 and English 21.

Introduces the fundamental principles and concepts of accounting as a basis for financial communication in business. This includes the procedures for maintaining records in business transactions and the preparation of financial statements for the sole proprietorship in a service and merchandising firm. Procedures and techniques for internal control, deferrals and accruals, inventory, plant assets, accounts receivable, accounts payable, and payroll are included.

Student Learning Outcome(s):
1. Analyze and record financial transactions and post to ledgers. 2. Analyze and prepare year-end adjustments using worksheets and completing the accountable cycle. 3. Analyze and prepare basic financial statements. Evaluate economic situations of the business by using simple financial ratios.

ACCTG 002 INTRODUCTORY ACCOUNTING II (5) UC/CSU
Lecture: 5 hours
Prerequisite: Accounting 1.

Student Learning Outcome(s):
1. Students will Journalize and post transactions involving sale of stock, changes in retained earnings, declaration of cash and stock dividends, sales and early redemption of bonds. 2. Students will prepare statements of cash flows using the indirect method.

ACCTG 003 INTERMEDIATE ACCOUNTING I (3) CSU
Lecture: 3 hours
Advisory: Accounting 2 and Business 38.

This course provides complete analytical application and an advanced review of topics discussed in Accounting I and II. Topics include assets (current, fixed, and intangible), investments, financial statements, income taxes, liabilities, stockholders equity, revenue recognition, asset acquisition and leases. This course places a high emphasis on financial reporting standards.

Student Learning Outcome(s):
Students will demonstrate skills and knowledge of income statement preparation and presentation.

ACCTG 011 COST ACCOUNTING (3) CSU
Lecture: 3 hours
Advisory: Accounting 1; Accounting 2; Business 38.

This course covers both managerial and cost accounting, with emphasis on cost and non-systems; types of cost; elements of cost; cost behavior; variances for labor, materials and overhead; indirect expenses; allocation of cost to by-products; standard cost and budgets.

Student Learning Outcome(s):
Student will be able to use cost-volume-profit (CVP) analysis to analyze decisions.

ACCTG 015 TAX ACCOUNTING I (3) CSU
Lecture: 3 hours

This course is a study of Federal Income Taxes as they apply to individuals and sole proprietorships and a analysis of appropriated tax laws. Consideration of applicable accounting procedures and preparation of reports and returns are emphasized.

Student Learning Outcome(s):
1. Students will learn how to complete an individual income tax return. 2. Students will learn how to calculate gross income with exclusions.

ACCTG 018 COMPUTERIZED PAYROLL ACCOUNTING (3)
Lecture: 2 hours / Lab: 2 hours
Advisory: Accounting 1.

This course will cover procedures and practices involved in a manual or automated payroll system. Students will become familiar with current Federal and California laws affecting payroll, computation of payroll taxes and preparation of required payroll tax returns/forms.

Student Learning Outcome(s):
Students will demonstrate competency in computing federal and state liabilities for employer’s payroll taxes.

ACCTG 021 BOOKKEEPING AND ACCOUNTING I (3) UC/CSU
Lecture: 3 hours
Advisory: Business 38.

This course includes fundamentals of double entry bookkeeping; preparation of the trial balance; worksheets and financial statement; use of controlling accounts; the control of cash and bank reconciliation statements.

Student Learning Outcome(s):
1. Analyze financial transactions and prepare the appropriate journal entries to document the transaction in the accounting records. 2. Analyze and prepare basic financial statements such as trial balances, journal entries income statements. 3. Evaluate the post-closing trial balance and prepare the necessary post-closing entries for the opening trial balance for subsequent periods.
ADM JUS 001 INTRODUCTION TO ADMINISTRATION OF JUSTICE (3) UC/CSU
Lecture: 3 hours

Philosophy, history, and theories of the criminal justice system, including the origins and evolution of criminal law and due process, the roles and functions of the local, state, and federal jurisdictions, and the interrelationships among criminal justice agencies: law enforcement, courts, and corrections; crime causation, analysis and the social impact of crime. The conceptual approach utilized in this course recognizes that criminal justice is itself a distinct academic discipline rather than an interdisciplinary course of study. Three hours lecture per week.

Student Learning Outcome(s):
SLO #1 Gather information on the various components of the criminal justice system. SLO #2 Critically analyze and then organize information on the criminal justice system. SLO #3 Properly apply the English language to write an explanatory paper about the criminal justice system.

ADM JUS 002 CONCEPTS OF CRIMINAL LAW (3) UC/CSU
Lecture: 3 hours

This course deals with the structure of law, definitions, and the most frequently used sections of the California Penal Code. Topics include origins of federal and state laws, interpretation and application of laws, identifying elements of property crimes and criminal liability.

Student Learning Outcome(s):
1. Explain the major historical steps leading to the development of U.S. criminal law patterns. 2. Explain the elements, conduct, results of conduct, and attendant circumstances of certain crimes. 3. Explain the sources of development in the case law of significant criminal law matters.

ADM JUS 003 LEGAL ASPECTS OF EVIDENCE (3) CSU
Lecture: 3 hours

Students will be able to locate, develop and lift fingerprints from crime scenes; a must for those students interested in law enforcement as a police officer or evidence specialist or private investigations.

This course provides instruction in the origins, development and philosophy of criminal evidence. This course looks at the many different types of evidence brought into the justice system. Also covered are the rules governing the admissibility of evidence in court.

Student Learning Outcome(s):
1. Explain the origins, development and philosophy of criminal evidence. 2. Explain the types of criminal evidence utilized by our courts. 3. Explain rules regarding the use of evidence in our court system.

ADM JUS 004 PRINCIPLES AND PROCEDURES OF THE JUSTICE SYSTEM (3) UC/CSU
Lecture: 3 hours

A detailed study of the role and responsibilities of the American court system and its purpose; an examination of the philosophy, history, structure, operation, concepts and services related to the judiciary; a study of case law methodology and case research and their impact on society; an examination of the legal process from pre-arrest through trial, sentencing options and correctional procedures.

Student Learning Outcome(s):
SLO 1: List historical and conceptual significance of the court system, administration and management. SLO 2: Discuss the criminal trial process and the specific roles and responsibility of each member. SLO 3: Evaluate the judicial process and its effect on society.

ADM JUS 005 CRIMINAL INVESTIGATION (3) CSU
Lecture: 3 hours

Fundamentals of the theories, concepts, and methodology of criminal investigation. This course will look at the investigative procedures from the crime scene to the courtroom, inclusive of legal constraints, ethics, and types of evidence; techniques and procedures for basic interview and interrogation procedures; identification of proper crime scene management, follow-up, case preparation and organization.

Student Learning Outcome(s):
1. Describe all the steps involved in a criminal investigation. 2. Identify, classify, collect and preserve physical evidence.

ADM JUS 008 JUVENILE PROCEDURES (3) CSU
Lecture: 3 hours

This course covers the juvenile justice system and related juvenile justice issues. Topics include an overview of the juvenile justice system, treatment and prevention programs, history, theories, methodology, and special areas and laws unique to juveniles.

Student Learning Outcome(s):
SLO 1: Discuss the histories and philosophies of the juvenile justice system. SLO 2: Identify and compare the legislative policies related to juvenile offenders and the procedures for implementation. SLO 3: Describe the impact of legislative change on the development of national standards for juvenile justice.
ADM JUS 014 REPORT WRITING FOR PEACE OFFICERS (3) CSU

Lecture: 3 hours

This course provides instruction in the practice of various types of technical writing commonly used in police agencies, the appropriateness of different styles in different contexts and the conceptualization of the material, and the utilization of machine tabulation in reports and methods of reporting criminal statistics.

Student Learning Outcome(s):

1. Write clear and concise law enforcement reports. 2. Improve basic grammar and apply the grammar rules to writing police reports.

ADM JUS 041 OFFICER SAFETY (3) CSU

Lecture: 3 hours

The study of techniques of protection against persons armed with dangerous and deadly weapons. Students examine the moral aspects, legal provisions, safety precautions and restrictions covering the use of firearms and other weapons.

Student Learning Outcome(s):

1. List safety hazards that pose threats to officers. 2. Describe the operation and application of safety equipment used to protect officers. 3. List the many factors that should be considered when approaching a dangerous situation.

ADM JUS 053 FORENSIC FINGERPRINT EVIDENCE (3)

Lecture: 3 hours

Students will be able to locate, develop and lift fingerprints from crime scenes; a must for those students interested in law enforcement as a police officer or evidence specialist or private investigations.

Student Learning Outcome(s):

1. Define technical terminology used in fingerprint processing work. 2. Explain and interpret fingerprint patterns and classifications. 3. Explain fingerprint searching & filing procedures. 4. Classify finger print cards.

ADM JUS 062 FINGERPRINT CLASSIFICATION (3) CSU

Lecture: 3 hours

This is a practical course which covers the technical terminology of fingerprinting, pattern interpretation, and classification of fingerprints, the taking of fingerprints, searching and filing procedures and laboratory work in the classroom.

Student Learning Outcome(s):

1. Define technical terminology used in fingerprint processing work. 2. Explain fingerprint searching & filing procedures. 4. Classify finger print cards.

ADM JUS 067 COMMUNITY RELATIONS I (3) UC/CSU

Lecture: 3 hours

Examination of the complex relationship between the community and the justice system with emphasis on the challenges of dealing with the role of race, ethnicity, gender relations, sexual orientation, social class, language, and culture in shaping these relations.

Student Learning Outcome(s):

1. Analyze and evaluate how myths about race, ethnicity and crime have influenced our Criminal Justice System. 2. Compare and contrast the crime rates within and without minority communities. 3. Analyze, evaluate and describe the factors that have influenced race-based differences in the crime rate. Propose steps to be implemented for the reduction or eradication of race based criminal justice disparities.

ADM JUS 073 LAW AND MINORITY GROUPS (3) CSU

Lecture: 3 hours

This course examines the growing crises of race, ethnicity, gender and discrimination within the American Justice System. Myths and realities about crime and minorities are analyzed. Racism, and inequities within the legal structures including court trials, corrections and the death penalty are discussed. Changes in criminal justice administration advocated by minority groups are reviewed.

Student Learning Outcome(s):

1. Analyze and evaluate how myths about race, ethnicity and crime have influenced our Criminal Justice System. 2. Compare and contrast the crime rates within and without minority communities. 3. Analyze, evaluate and describe the factors that have influenced race-based differences in the crime rate. Propose steps to be implemented for the reduction or eradication of race based criminal justice disparities.

ADM JUS 075 INTRODUCTION TO CORRECTIONS (3) CSU

Lecture: 3 hours

This course surveys the total correctional cycle and the relationships of its components, including historical, theoretical and philosophical explanations of criminal behavior; statistics and research findings; employment opportunities; and employment requirements. This course will also examine the basic nature of correctional work; aims and objectives of correctional administration; probation and parole; skills; knowledge and attitudes required for employment in this field.

Student Learning Outcome(s):

1. Identify the components of the U.S. Corrections system and its history of development. 2. Understand the procedures used in jails and prisons and their effect on inmates. 3. Compare and contrast the various alternatives to incarceration and for which populations each are best suited.

ADM JUS 501 AN A TO Z GUIDE TO CRIMINAL JUSTICE CAREERS (3) CSU

Lecture: 3 hours

This course reviews the hot jobs in the criminal justice arena and outlines a method for the student to decide on their career path. Hiring process and interview skills will be explored. Fitness for duty and other physical and physiological characteristics will be discussed. An A to Z guide to Local, State, and Federal Criminal Justice Careers will be presented.

Student Learning Outcome(s):

1. List career opportunities. 2. Develop a self career map/plan.
ADM JUS 502  INTRODUCTION TO FORENSIC PSYCHOLOGY
(3) CSU
Lecture: 3 hours
This is a basic course dealing with the nature of Psychology within the criminal justice system. The aims and objectives of Forensic Psychology as applied to corrections, probation practices, institutions, services, and inmate supervision will be discussed.

Student Learning Outcome(s):
1. Define various psychological traits and conditions and discuss the impact they have on corrections and probation service agencies.

ADM JUS 750  ETHICS AND THE CRIMINAL JUSTICE SYSTEM
(3) CSU
Lecture: 3 hours
This course identifies and explores ethics, values definitions and applications in the criminal justice system: police, courts, probation, parole, corrections and private security organizations. Remedial strategies relating to unethical behavior by individuals and groups will also be addressed.

Student Learning Outcome(s):
1. Discuss strategies addressing unethical behavior by staff. 2. Explain the ethical right and wrong when applied to various aspects of the criminal justice system.

A S L 001  AMERICAN SIGN LANGUAGE I (4) UC/CSU
Lecture: 4 hours
This is an introductory course designed to develop basic conversational skills using the manual alphabet and American Sign Language. It is planned to assist in communicating with deaf individuals and have a better understanding of deaf culture. This course develops basic vocabulary and grammar of American Sign Language. Its emphasis is placed on comprehension skills and vital aspects of the Deaf culture and community.

Student Learning Outcome(s):
1. Distinguish between Deaf and Hearing Culture. 2. Student demonstrates beginning level ability in using the manual alphabet and American Sign Language. It is planned to assist him/her in communicating with deaf individuals and have a better understanding of deaf culture.

A S L 002  AMERICAN SIGN LANGUAGE II (4) UC/CSU
Lecture: 4 hours  
Prerequisite: A S L 001.
This is an intermediate course in American Sign Language with special emphasis on vocabulary, grammar, and beginning conversational fluency. Further development of conversational techniques focusing on receptive and expressive skills. Expanded study of Deaf cultural issues. (Overview of topics include: language functions, such as, giving reasons, making requests, asking where, giving specific directions, correcting and confirming information, complaining, making suggestions, asking for permission, expressing concern, declining/explaining, asking for/giving definitions, describing objects, describing weekend activities, telling about disrupted plans; grammatical structures, such as, topic-comment, weak hand referencing, locatives, temporal aspect, modulations, verb inflections, role shifting, conditional sentences, contrastive structure, classifier types, non-manual markers, number functions; and discourse structures, such as, presenting informative speeches using ASL).

Student Learning Outcome(s):
1. Receptive skills: Able to understand the meaning of a signed message produced at a normal rate of speed. 2. Expressive skills: Able to express particular interests and varied experiences with reasonable ease. 3. Grammar/Culture: Able to show a satisfactory knowledge of proper grammar/culture rules.

A S L 003  AMERICAN SIGN LANGUAGE III (4) UC/CSU
Lecture: 4 hours  
Prerequisite: A S L 002.
Intermediate course with continued development of American Sign Language vocabulary, grammar, and beginning conversational fluency with special emphasis on idiomatic constructions. Further development of conversational techniques focusing on receptive and expressive skills. Expanded study of Deaf cultural issues. (Overview of topics include: language functions, such as, giving reasons, making requests, asking where, giving specific directions, correcting and confirming information, complaining, making suggestions, asking for permission, expressing concern, declining/explaining, asking for/giving definitions, describing objects, describing weekend activities, telling about disrupted plans; grammatical structures, such as, topic-comment, weak hand referencing, locatives, temporal aspect, modulations, verb inflections, role shifting, conditional sentences, contrastive structure, classifier types, non-manual markers, number functions; and discourse structures, such as, presenting informative speeches using ASL).

Student Learning Outcome(s):
1. Receptive skills: Able to understand the meaning of a signed message produced at a normal rate of speed. 2. Expressive skills: Able to express particular interests and varied experiences with reasonable ease. 3. Grammar/Culture: Able to show a satisfactory knowledge of proper grammar/culture rules.

A S L 004  AMERICAN SIGN LANGUAGE IV (4) UC/CSU
Lecture: 4 hours  
Prerequisite: A S L 003.
In this course students focus on advanced vocabulary and grammar and further develop and refine communicative skills and fluency through spontaneously generated conversations that accentuate various aspects of Deaf culture and community.

Student Learning Outcome(s):
1. Receptive skills: can understand most conversations within the range of his/her experience with a high degree of fluency. 2. Expressive skills: Able to use ASL with a high degree of fluency and accuracy for most topics and levels of communication. 3. Grammar/Culture: Able to show a satisfactory knowledge of proper grammar/culture rules.

A S L 030  FINGER SPELLING I (1) CSU
Lab: 2 hours
This is an introductory course in American Sign Language with special emphasis on vocabulary, grammar, and on the improvement of expressive and receptive skills. This course includes exposure to deaf culture and the history of sign languages.

Student Learning Outcome(s):
1. The student will demonstrate comprehension of ASL vocabulary and grammar. 2. The student will demonstrate ASL conversational fluency on an intermediate level. 3. The student will demonstrate use of descriptive classifiers, personal and possessive pronouns.

A S L 004  AMERICAN SIGN LANGUAGE IV (4) UC/CSU
Lecture: 4 hours  
Prerequisite: A S L 003.
Intermediate course with continued development of American Sign Language vocabulary, grammar, and beginning conversational fluency with special emphasis on idiomatic constructions. Further development of conversational techniques focusing on receptive and expressive skills. Expanded study of Deaf cultural issues. (Overview of topics include: language functions, such as, giving reasons, making requests, asking where, giving specific directions, correcting and confirming information, complaining, making suggestions, asking for permission, expressing concern, declining/explaining, asking for/giving definitions, describing objects, describing weekend activities, telling about disrupted plans; grammatical structures, such as, topic-comment, weak hand referencing, locatives, temporal aspect, modulations, verb inflections, role shifting, conditional sentences, contrastive structure, classifier types, non-manual markers, number functions; and discourse structures, such as, presenting informative speeches using ASL).

Student Learning Outcome(s):
1. Receptive skills: Able to understand the meaning of a signed message produced at a normal rate of speed. 2. Expressive skills: Able to express particular interests and varied experiences with reasonable ease. 3. Grammar/Culture: Able to show a satisfactory knowledge of proper grammar/culture rules.

A S L 004  AMERICAN SIGN LANGUAGE IV (4) UC/CSU
Lecture: 4 hours  
Prerequisite: A S L 003.
In this course students focus on advanced vocabulary and grammar and further develop and refine communicative skills and fluency through spontaneously generated conversations that accentuate various aspects of Deaf culture and community.

Student Learning Outcome(s):
1. Receptive skills: can understand most conversations within the range of his/her experience with a high degree of fluency. 2. Expressive skills: Able to use ASL with a high degree of fluency and accuracy for most topics and levels of communication. 3. Grammar/Culture: Able to show a satisfactory knowledge of proper grammar/culture rules.

A S L 030  FINGER SPELLING I (1) CSU
Lab: 2 hours
This is an introductory course in American Sign Language with special emphasis on vocabulary, grammar, and on the improvement of expressive and receptive skills. This course includes exposure to deaf culture and the history of sign languages.

Student Learning Outcome(s):
1. The student will demonstrate comprehension of ASL vocabulary and grammar. 2. The student will demonstrate ASL conversational fluency on an intermediate level. 3. The student will demonstrate use of descriptive classifiers, personal and possessive pronouns.
ANTHROPOLOGY

ANTHRO 101  HUMAN BIOLOGICAL EVOLUTION (3) UC/CSU
Lecture: 3 hours
Advisory: English 28.

This course is an introduction to the field of biological anthropology. Topics covered include genetic inheritance, the mechanisms of evolution, the biology and behavior of living primates, the history of human evolution as seen in the fossil record, and modern human biological variation.

Student Learning Outcome(s):
1. Students will understand human beings as the result of a natural evolutionary process.

ANTHRO 102  HUMAN WAYS OF LIFE: CULTURAL ANTHROPOLOGY (3) UC/CSU
Lecture: 3 hours
Advisory: English 28.

This course provides a comparative survey of human culture, including the study of human society, language, religion, political and economic organization, with examples drawn from contemporary preliterate, peasant, and urban societies.

Student Learning Outcome(s):
1. Students will develop comprehension and appreciation of human cultural variation and diversity.

ARCHITECTURAL INTERIORS

INT 200  RESIDENTIAL PLANNING (3) CSU
Lecture: 1 hour / Lab: 4 hours

Using sustainable Design strategies, standards and geospatial tools (CAD/BIM/GIS), the student will learn how to participate in the interior design profession as a designer for the entire life cycle of a building and focusing on interior residential planning. Basic concepts will be covered in class to understand the fundamentals variables that determine interior spaces: light, air, circulation, texture, pattern, geometry, experience, styles, natural resources, energy efficiency/form, materials, thermal/moisture protection and others. A study is made using an actual small house project including layout, livability, functionality, size, orientation, cost, furnishing, equipment, and ornamentation and future inhabitants. The actual small house project is put in context through a brief history of American shelters and their construction types and styles. At this point the student is ready for developing, retrofitting, adding and remodeling the actual small house project including basic interior construction details and finishes. Residential construction problems are explored with an emphasis placed in functional design.

Student Learning Outcome(s):
1. Student designs and builds a tensile/interlocking structure, as he or she locates and compares the theoretical, practical, and contextual issues that influence sustainable interior design with the consideration of accountability, durability and responsibility in fulfilling personal, community, and workplace roles. 2. Student understands and presents a CAD/BIM tool commands that applies to interior design, as he/she communicates information and ideas effectively to multiple audiences using a sender-receiver model. 3.- Student designs a product or a building for interior design by using mathematics and geometry found in nature through a collaboration with industry experts and team work.
**ARC 131 HISTORY OF ARCHITECTURE II (2) UC/CSU**

*Lecture: 2 hours*

This course covers the study of architecture history from the Renaissance to our current times, the development of place and function as it is influenced by the geographical, climatic, religious, social, economic and historical forces. This course analyzes the difference between world architecture history and western architecture history, including the characteristics of Latin America, Islamic and Asia. The history of architecture is seeing through a perspective of how the built environment has responded to nature forces and resources; air, water, air and land. In addition each period identifies technological innovation that characterized the historical roots in numerous civilizations.

**Student Learning Outcome(s):**

1. From the Renaissance to our time, the student draws a manual sketch of a building or city, as he/she identifies and locates materials, technology, socioeconomic forces, math/geometry, sustainable strategies and design principles that shaped it. 2. Student creates a written summary for each period of time from ancient to present that it and describes the design in class, as he/she compares the relationship between architecture and the external environment. 3. Student develops a final architecture and environmental design project from a particular period of time and applies a skill tool like CAD/BIM, to a physical/digital/3D printing model or infographic.

**ARC 151 MATERIALS OF CONSTRUCTION (3) UC/CSU**

*Lecture: 1 hour / Lab: 4 hours*

This course covers materials and methods of construction in the field of architecture, engineering and construction; wood, concrete, steel and masonry. This course analyzes each material characteristics, methods of construction, testing requirements, allowable uses, energy transfer capacity, structural behavior and their use in multiple construction assemblies. Materials and methods of constructions are covered in this class in alignment with sustainable standards, government agencies regulations, local incentives, carbon footprint and geospatial simulations.

**Student Learning Outcome(s):**

1. Using sustainable strategies and mathematical skills, the student understands each construction material; wood, metal, masonry, concrete, plastic and glass, as well as their relationship between architecture, engineering and construction. 2. Student understands and uses tools like CAD/BIM to draw details for each construction materials; wood, metal, masonry, concrete, plastic and glass, as it relates to standards and building codes. 3. Student locates technical information, as he/she interprets information to draw conclusions, based on the best analysis, to make informed decisions for a formula or a table for each construction material; wood, metal, masonry, concrete, plastic and glass.

**ARC 152 EQUIPMENT OF BUILDINGS (3) CSU**

*Lecture: 1 hour / Lab: 4 hours*

Using geospatial tools and sustainable strategies this course applies the basic principles of design, selection and operation of equipment in buildings. Building equipment integrates architectural design with water distribution, water recycling and harnessing, air circulation, natural air flow, air heating and cooling, natural light, and acoustics. Passive and solar strategies are integrated into equipment as well as new technologies.

**Student Learning Outcome(s):**

1. Using sustainable strategies and mathematical skills, the student understands each building system; water/plumbing, electrical/energy, air conditioning/HVAC, acoustics and fire, as well as their relationship between architecture, engineering and construction. 2. Student understands and uses tools like CAD/BIM for each building system; water/plumbing, electrical/energy, air conditioning/HVAC, acoustics and fire as it relates to industry standards and building codes. 3. Student locates technical information and interprets information to draw conclusions, based on the best analysis, to make informed decisions for a formula or a table for each of the building systems; water/plumbing, electrical/energy, air conditioning/HVAC, acoustics and fire.

**ARC 160 COMPUTERS FOR DESIGNERS (3) CSU**

*Lecture: 1 hour / Lab: 4 hours*

The student will learn how to become a designer and a technologist in three dimensional digital environments for architecture, urban and environmental design. The student will use the power of the tools to be inspired and to collaborate. This course is geared towards the built environment, ecological, entertainment and industrial designers. Students will learn how the space of a place affects the way we think, act and create. Emphasis is placed on how designers can optimize and understand the role of digital mediums in today’s competitive edge and sustainable demands. Basic computer operations like operating systems, interfaces, print, view, export, file management, image manipulation are covered within the design exercises.

**Student Learning Outcome(s):**

1. Student designs an object transformation on a 3D modeling tool as he/she uses system thinking to analyze how various components interact with each other to produce outcomes in a complex work environment. 2. Student designs a product or building using computer aided design and 3D printing technology, as he/she demonstrate health and safety procedures, regulations, and personal health practices and determine the meaning of symbols, key terms, and domain-specific words and phrases as related to the Engineering and Architecture sector workplace environment. 3. Following mathematical models student designs an interactive map using spatial information system from local, district, state, and federal regulatory agencies, entities, laws, and regulations.

**ARC 172 ARCHITECTURAL DRAWING I (3) CSU**

*Lecture: 1 hour / Lab: 4 hours*

This is an architecture drawing class that will focus on construction documents for wood construction. The course will cover how these architectural drawings are documents that instruct all the stake holders how to use, build and maintain a high performance building. The course will explain how construction documents made out of wood are connected to the life cycle of a building. It covers an integrated building approach, as it identifies the deliverables for; programming (identify the need), design drawings (identify the solutions), construction documents (drawings used to build the building), operation/maintain (as built drawings) and assessment (analysis for upgrade and improvement). This course will also cover CAD, BIM, GIS tools, LEED Credits, Sustainable Standards and their relationship to a set of construction documents for wood construction. Fundamentals of architectural drafting, symbols, dimensioning, and methods of representation are also mastered during this course. The student will prepare a set of construction documents for a simple wood building structure.

**Student Learning Outcome(s):**

1. Using sustainable standards and contemporary tools like CAD/BIM 3D printing tools, the student understands and produces a set of construction documents (drawings and specification) for a wood/concrete building. 2. Student coordinates, plans and locates technical information for a project using site and building restrictions imposed by various entities for a masonry/concrete building and the production of maintenance and operations manuals that address project long term sustainability and resilient requirements. 3. Student understands and explores mathematical methods and details used to analyze simple structures, properties of materials, cost estimating, load transfer and strain-stress relationships for a masonry/concrete building.
ARC 173  ARCHITECTURAL DRAWING II (3) CSU
Lecture: 1 hour / Lab: 4 hours

This is an architecture drawing class that will focus on construction documents for concrete and masonry construction. The course will cover how these architectural drawings are documents that instruct all the stake holders how to use, build and maintain a high performance building. The course will explain how construction documents made out of concrete and masonry are connected to the life cycle of a building. It covers an integrated building approach as it identifies the deliverables for: programming (identify the need), design drawings (identify the solutions), construction documents (drawings used to build the building), operation/maintain (as built drawings) and assessment (analysis for upgrade and improvement). In addition this course will cover CAD, BIM, and GIS tools, LEED Credits, Sustainable Standards and their relationship to a set of construction documents for concrete and masonry construction. The student will develop a simple set of construction documents for concrete and masonry.

Student Learning Outcome(s):
1. Using sustainable standards and contemporary tools like CAD/BIM 3D printing tools, the student understands and produces a set of construction documents (drawings and specification) for a masonry/concrete building.
2. Student coordinates, plans and locates technical information for a project using site and building restrictions imposed by various entities for a masonry/concrete building and the production of maintenance and operations manuals that address project long term sustainability and resilient requirements. 3. Student understands and explores mathematical methods and details used to analyze simple structures, properties of materials, cost estimating, load transfer and strain-stress relationships for a masonry/ concrete building.

ARC 185  DIRECTED STUDY - ARCHITECTURE (1) CSU
Lecture: 1 hour

This course allows students to pursue a directed study in the Architecture Technology field on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
1. The outcome will vary depending on the contract with the instructor. 2. The student will formulate a research paper based on a topic in Architecture Technology.

ARC 201  ARCHITECTURAL DESIGN I (3) UC/CSU
Lecture: 1 hour / Lab: 4 hours

This course will use sustainable strategies and geospatial tools to explore architecture design solutions. In this course students will work in a design laboratory studio exploring space and form. The solutions focus on analysis, proportion, solar passive, water conservation, biomimicry, planning layout, aesthetic, interpretation, and the nature of materials. Methods of presentations are studied, as well as design methodologies.

Student Learning Outcome(s):
1. Student designs and builds a tensegrity/triangulated structure, as he or she locates and compares the theoretical, practical, and contextual issues that influence sustainable architecture design with the consideration of accountability, durability and responsibility in fulfilling personal, community, and workplace roles. 2. Student understands and presents a CAD/BIM tool commands that applies to architecture design, as he/she communicates information and ideas effectively to multiple audiences using a sender/receiver model.

ARC 202  ARCHITECTURAL DESIGN II (3) UC/CSU
Lecture: 1 hour / Lab: 4 hours

This course looks at space and form as a canvas for an architect, moving beyond abstraction language paradoxes, and formal gymnastics. Design and form integrates embodied energy of all resources, cognitive experiences, new materials, stronger social concerns and the need to react to location and space. It will see the creation of place and space, as a first act of human intention and use nature templates to solve holistic solutions. This course analyzes how the geometry of space influences how we communicate, behave, think, create, and produce; as well as its influences in cognition and mental model. This course will focus on building a better future through participatory design and the use of digital age tools including fabrication and geospatial technology.

Student Learning Outcome(s):
1. Student designs and builds a tensegrity/triangulated structure, as he or she locates and compares the theoretical, practical, and contextual issues that influence sustainable urban design with the consideration of accountability, durability and responsibility in fulfilling personal, community, and workplace roles. 2. Student understands and presents a CAD/BIM tool commands that applies to urban design, as he/she communicates information and ideas effectively to multiple audiences using a sender/receiver model.

ARC 261  COMPUTER-AIDED DESIGN FOR ARCHITECTURE I (3) UC/CSU
Lecture: 1 hour / Lab: 4 hours

This is a digital modeling course for space and form design. This course covers space modeling, energy simulation, solar paths, light analysis, texture, rendering and materials, as well as its relationship to BIM, CAD and geospatial tools.

Student Learning Outcome(s):
Students will submit the following according to standards: Renderings, Lighting Studies, Solar simulation, Walk through of any built environment (if applicable), Texture studies, ePortfolio.

ARC 271  ARCHITECTURAL DRAWING III (3) CSU
Lecture: 1 hour / Lab: 4 hours

This is an architecture drawing class that will focus on construction documents for steel construction. The course will cover how these architectural drawings are documents that instruct all the stake holders how to use, build and maintain a high performance building. The course will explain how construction documents made out of concrete and masonry are connected to the life cycle of a building. It covers an integrated building approach as it identifies the deliverables for: programming (identify the need), design drawings (identify the solutions), construction documents (drawings used to build the building), operation/maintain (as built drawings) and assessment (analysis for upgrade and improvement). The student will prepare a complete set of construction documents for a simple steel building structure. Appropriate reference material that focus on concrete and masonry will be covered in class like fastening, flashing, crack control and others.
Student Learning Outcome(s):
1. Using sustainable standards and contemporary tools like CAD/BIM 3D printing tools, the student understands and produces a set of construction documents (drawings and specification) for a steel/concrete building.
2. Student coordinates, plans and locates technical information for a project using site and building restrictions imposed by various entities for a masonry/concrete building and the production of maintenance and operations manuals that address project long term sustainability and resilient requirements.
3. Student understands and explores mathematical methods and details used to analyze simple structures, properties of materials, cost estimating, load transfer and strain-stress relationships for a masonry/concrete building.

ARC 285  DIRECTED STUDY - ARCHITECTURE (2) CSU

Lecture: 2 hours

This course allows students to pursue a directed study in the Architecture Technology field on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
1. The outcome will vary depending on the contract with the instructor.
2. The student will formulate a research paper based on a topic in Architecture Technology.

ARC 341  GIS METROPOLITAN ACCESS PLANNING SYSTEMS I (3) CSU

Lecture: 1 hour / Lab: 4 hours

This course will cover the interconnection of BIM, CAD, GIS, spatial systems and online mapping in one construct. GIS technology and related geospatial technologies will explore intelligent building drawings as they connect to multiple environments; ecological, buildings and socio economic forces. GIS are spatial drawings with multiple types of information associated with them; business, land use, roads, rivers, parcel maps, census, others. This course introduces fundamental concepts and functionality of spatial thinking and visual computation. The course uses the GIS analytical process to quantify and qualify multiple layers of spatial information applied to sustainable projects.

Student Learning Outcome(s):
1. Student understands how to create maps around their neighborhood and locates sector terminology and protocols to communicate effectively in oral, written, and multimedia formats.
2. Student learns the basic skill to obtain GIS tool Industry Certification, as he/she recognizes the role and function of professional organizations, industry associations, and organized labor in a productive society.
3. Student designs spatial information for architecture, urban planning and economic development using mathematical principles of pattern recognition.

ARC 285  DIRECTED STUDY - ARCHITECTURE (3) CSU

Lecture: 3 hours

This course allows students to pursue a directed study in the Architecture Technology field on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
1. The outcome will vary depending on the contract with the instructor.
2. The student will formulate a research paper based on a topic in Architecture Technology.

ART 101  SURVEY OF ART HISTORY I (3) UC/CSU

Lecture: 3 hours

This course encompasses the historic study of architecture, painting and sculpture, with incidental references to the related minor arts. A survey is made of the chronological development of Western and non-European art from the Prehistoric to the Renaissance, with special emphasis upon the cultural factors that contributed to its evolution.

Student Learning Outcome(s):
Students will identify, compare, and analyze Western and Non-Western art and architecture from the Prehistoric to the Renaissance and demonstrate knowledge of art terminology and artistic styles through objective and essay exams, oral presentations and museum projects.

ART 102  SURVEY OF ART HISTORY II (3) UC/CSU

Lecture: 3 hours

A survey of the major visual arts of the Western world from the Early Renaissance to the present, linking art and architecture with social, economic, political and religious aspects of western and global cultures.

Student Learning Outcome(s):
Students will identify, compare, and analyze art and architectural styles, theories, and individual artistic expression from the Early Renaissance to present in the Western World while demonstrating knowledge of art terminology and artistic styles through objective and essay exams, oral presentations and museum projects.

ART 103  ART APPRECIATION I (3) UC/CSU

Lecture: 3 hours

This course is designed specifically for those students who desire to expand their visual awareness through training in visual perceptual skills. The course includes exploration of the basic elements of art; visual skills are enhanced by practice in drawing techniques based on perception. Students will acquire a broad understanding of the nature of art through study of selected works from art history.

Student Learning Outcome(s):
Students will identify and compare the various media and techniques of arts as well as analyze the nature of art, the use of the elements and principles and identify selected works from art history.

ART 201  DRAWING I (3) UC/CSU

Lecture: 2 hours / Lab: 2 hours

Instruction is given in basic pencil drawing, charcoal, pastel, and other sketching media. Painting in wash, ink, and watercolor, from still life and outdoor assignments is included. This is a course for beginners and non art majors, as well as, a brush up course for artists.

Student Learning Outcome(s):
Students will create drawings in a variety of materials using line, shape, form and light logic.
**ASTRONOMY**

**ASTRON 001 ELEMENTARY ASTRONOMY (3) UC/CSU**

Lecture: 3 hours

This course is a general introduction and overview of Astronomy and covers many topics including constellations, seasons, history of Astronomy, the electromagnetic spectrum, telescopes, the Earth and other planets of our solar system, the Sun, binary stars, the Milky Way Galaxy, properties of galaxies and the Big Bang Theory. Students are kept abreast of current developments in the field.

**Student Learning Outcome(s):**

1. To describe the origins of the Universe, the Big Bang Theory, and the present general structure of the Universe. 2. To recognize components and facts of the solar system, including planets, satellites, asteroids, comets, and theories of the origin of the solar system. 3. To examine the methods astronomers use to explore the natural phenomena of the universe including the scientific method, the nature of matter, energy, radiation and the historical development of astronomical ideas. 4. To describe the nature of stars, including star formation and evolution, stellar energy sources and how this is related to our sun. 5. To describe the nature of the Milky Way and other galaxies and their distribution in the universe and currently accepted theories of Cosmology. 6. To describe the current theory of the origin of life on Earth.

**ASTRON 005 FUNDAMENTALS OF ASTRONOMY LABORATORY (1) UC/CSU**

Lab: 3 hours

This course provides the laboratory work to accompany or follow Astronomy 1. This course uses astronomical instruments and laboratory equipment. Includes work with celestial sphere, sky charts, optical bench, telescopes, spectrosopes, and photometer. The course requires field trips for evening observations.

**Student Learning Outcome(s):**

1. Be able to set up and use an astronomical telescope to observe and identify features of selected astronomical bodies. 2. Be able to examine and analyze data from astronomical charts and images. 3. Be able to use and examine a planisphere and charts to identify constellations, stars and planets in the night sky, as demonstrated during evening viewing sessions. 4. Be able to identify constellations, stars, planets, and other objects in the night sky by direct observation.

**AUTOMOTIVE COLLISION REPAIR**

**AUTOCOR 112 AUTO BODY CONSTRUCTION, REPAIR AND WELDING FUNDAMENTALS (9)**

Lecture: 3 hours / Lab: 18 hours

This course covers basic auto body construction types, nomenclature, body adjustments, and repairs. Instruction includes welding on high strength steels, alloys, and plastic composites. Replacement of structural and non-structural auto body components is also covered.

**Student Learning Outcome(s):**

1. The student will be able to show proper tool usage and demonstrate welding techniques according to I-CAR standards. 2. The student will be able to analyze various types of structural and non-structural damage.

**AUTOCOR 122 INTERMEDIATE COLLISION REPAIR-PARTS REPLACEMENT, METAL REPAIR, FRAME STRAIGHTENING & REFINISHING (9)**

Lecture: 3 hours / Lab: 18 hours

This course offers instruction in auto body repair procedures and alignment. Various repairs of metals, plastics and composites along with frame straightening techniques and refinishing procedures will be covered.

**Student Learning Outcome(s):**

1. Student will be able to perform panel replacement. Student will be able to perform frame measuring and assess frame for damage. 2. Student will be able to prepare and refinish a panel.

**AUTOCOR 132 UNITIZED BODY PANEL, SECTION, & FRAME; REPAIR & ALIGNMENT (9)**

Lecture: 3 hours / Lab: 18 hours

Instruction is given in bolt-on procedures and welding procedures of panel replacements and the use of pulling equipment for proper sheet metal alignment. Students will understand the techniques of outer body panel repairs, replacements, and adjustments. Students will repair, remove and replace steel / aluminum / SMC / plastic body panels, doors, deck lids, bumpers, and hoods. Students will adjust and align panels to manufacturer’s specifications. Instruction is given in body section replacement and structural sectioning, including removing and replacing mechanical parts, using manufacturer’s body repair manual and I-CAR recommendations. Measuring for cutting and proper alignment of sections is stressed. Students will understand the proper techniques of body/structural sectioning and anti-corrosion protection. Students learn proper frame alignment and the methods of straightening damaged frames and unitized body construction. Students learn to utilize computerized laser beam frame measuring equipment. Body shop practices are also covered.

**Student Learning Outcome(s):**

1. Students will utilize proper safety equipment when working in the lab. 2. Students will properly remove and replace body panels to OEM specifications. 3. Students will properly set up the Squeeze-type resistance spot welding machine. 4. Students will properly create spot welds to factory specifications. 5. Students will properly repair steel body panels. 6. Students will properly repair aluminum body panels. 7. Students will replace bolt-on aluminum body panels, riveted-bonded aluminum body panels, and...
Graduation Requirements and Educational Programs

AUTOCOR 148  PAINT PREPARATION AND APPLICATION (3)
Lecture: 1 hour / Lab: 6 hours

Students receive instruction in the types and properties of paint, solvent and spot painting. Causes and effect relationships of paint and surface blemishes, paint application problems, repairs and final detailing as required to I-CAR and industry standards are introduced.

Student Learning Outcome(s):
1. Students will utilize proper safety equipment when spray painting. 2. Students will ascertain and utilize the various types of safety equipment when spray painting. 3. Students will mix and formulate compliant coatings to Industry standards. 4. Students will practice spraying spot and panel repairs. 5. Students will detail vehicles for delivery to customers.

AUTOCOR 149  ESTIMATING BODY DAMAGE (3)
Lecture: 1 hour / Lab: 6 hours

Students are taught body repair and computerized estimating collision repair procedures.

Student Learning Outcome(s):
1. Students will acquire supervisor skills relating to city, state, and national rules and regulations in regards to hazardous materials and employee safety. 2. Students will acquire certification for writing estimates using Mitchell UltraMate Estimating Software. 3. Students will properly identify vehicles. 4. Students will demonstrate proper analysis of structural and non structural vehicle damage. 5. Students will be able to recognize and illustrate accident reconstruction. 6. Students will be able to create damage reports using Mitchell UltraMate and CCC Pathways. 7. Students will be able to negotiate proper repair procedures with the customer, insurance adjuster, and the technician. 8. Students will be able to oversee proper repairs of vehicles to safe OEM standards.

AUTOCOR 150  ADVANCED AUTOMOTIVE COLLISION REPAIR, ESTIMATING, REFINISHING, COLOR MATCHING (9)
Lecture: 3 hours / Lab: 18 hours

Students are taught collision analysis for body, frame and refinishing of damaged vehicles. Students create damage reports for customers and insurance companies. Students are given access to Mitchell University online instruction and certification website. Instruction is given in proper repair procedures, nomenclature, and terminology so students can clearly justify damage reports to customers, insurance adjusters, and technicians. This course provides training on the basics of UltraMate Premier Suite-E Claim Manager, a tool that allows users to place all claim related data (estimates,images, etc.) into a single electronic claim folder. It will offer a review of auto collision repair techniques and includes lectures, demonstrations and guest speakers. Advanced instruction is offered in inspection, paint repair and repaint to I-CAR and industry standards. The DuPont Certification for Compliant Coatings Rule 1151 is taught in this course. It will include paint application problems and solutions. Spot and panel paint options including color matching are taught. Certification testing for the DuPont Certificate is given and certificates are awarded to qualifying students.

Student Learning Outcome(s):
Students will be able to create damage reports using Mitchell UltraMate Software.

AUTOCOR 185  DIRECTED STUDY - AUTOMOTIVE COLLISION REPAIR (1)
Lecture: 1 hour

This course allows students to pursue a directed study in Automotive Collision Repair on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in Automotive Collision Repair.

AUTOCOR 226  AUTOMOTIVE COLLISION REPAIR I (3)
Lecture: 1 hour / Lab: 6 hours

This course introduces students to MIG welding, aluminum welding, and resistance welding. Students will learn to repair and replace body panels on unibody and full-frame vehicles. Repairing and replacing structural panels made of High Strength Steel (HSS), Advanced High Strength Steel (AHSS), and Ultra High Strength Steel (UHSS) are incorporated into this course. Students will learn aluminum welding techniques and panel bonding for both aluminum and steels. Students will understand the proper techniques of body/structural sectioning and anti-corrosion protection. Students will repair vehicles to industry standards.

Student Learning Outcome(s):
1. Students will utilize proper safety equipment when working in the lab. 2. Students will properly remove and replace body panels to OEM specifications. 3. Students will properly set up the Squeeze-type resistance spot welding machine. 4. Students will properly create spot welds to factory specifications. 5. Students will properly repair steel body panels. 6. Students will properly repair aluminum body panels. 7. Students will be able to repair and replace complete and partial full-frame sections made of HSS, AHSS, and UHSS. 8. Students will be able to take corrosion precautions and apply corrosion preventing materials where needed. 9. Students will be able to evaluate the effects of impact forces through full-frame and unibody construction by measuring with specific gauge type measurements to OEM specification measurements found in Body Dimension Charts. 10. Students will be able to utilize various types of unibody and full-frame straightening equipment to include in-floor straightening equipment, portable body and frame pullers, rack straightening systems and bench straightening.
AUTOCOR 227 AUTO BODY AND FENDER II (3)
Lecture: 1 hour / Lab: 6 hours

This course offers advanced training in refinishing, color mixing and matching of OEM (Original Equipment manufacturer) color codes. Proper paint gun operation and use of air pressure and spray patterns are emphasized, as well as VOC (Volatile Organic Compounds) log calculation systems. Students will learn to repair/repaint as required to I-CAR and industry standards. This course will emphasize on the STAR Training Program whose goal is to train technicians to reduce material consumption costs and pollution through increased spray efficiency.

Student Learning Outcome(s):
1. Students will utilize proper safety equipment when spraying compliant coatings.
2. Students will learn how to use the sandpaper grading system.
3. Students will understand proper techniques of preparing panels.
4. Students will learn the proper operating and maintenance procedures for HVLP spray equipment.
5. Students will learn proper mixing techniques.
6. Students will properly apply DuPont compliant sealers, waterborne basecoats and clears.
7. Students will learn the proper operating and maintenance procedures for Laser Touch spray system.

AUTOCOR 248 AUTO CUSTOM PAINTING (3)
Lecture: 1 hour / Lab: 6 hours

Students receive instruction in the types and properties of paint, solvent and spot painting. Cause and effect relationships of paint and surface blemishes, paint application problems, repairs and final detailing as required to I-CAR and industry standards are introduced.

Student Learning Outcome(s):
1. Students will utilize proper safety equipment when spraying compliant coatings.
2. Students will ascertain and utilize the various types of safety equipment when spray painting.
3. Students will practice spraying spot and panel repairs.

AUTOCOR 285 DIRECTED STUDY - AUTOMOTIVE COLLISION REPAIR (2)
Lecture: 2 hours

This course allows students to pursue a directed study in Automotive Collision Repair on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in Automotive Collision Repair.

AUTOCOR 385 DIRECTED STUDY - AUTOMOTIVE COLLISION REPAIR (3)
Lecture: 3 hours

This course allows students to pursue a directed study in Automotive Collision Repair on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in Automotive Collision Repair.

AUTOCOR 941 COOPERATIVE EDUCATION - AUTOMOTIVE COLLISION REPAIR (4)
Lecture: 4 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):
1. The student will develop at least three learning objectives to be accomplished on the job. 2. The objectives will be related to the educational/occupational goals of the student.

AUTOCOR 100 HEATING AND AIR CONDITIONING SYSTEMS THEORY, INSPECTION & RPR (3)
Lecture: 1 hour / Lab: 6 hours

Instruction is offered in the area of (HVAC) heating, ventilation & air conditioning systems, with emphasis on function & testing of heater controls, heater cores, air conditioning compressors, clutch & controls.

Student Learning Outcome(s):
1. The students will be able to inspect and diagnose air conditioning components for damage, ware and performance using proper procedures and equipment.
2. The student will be able to install an air conditioning manifold gage set and analyze pressure readings to determine system performance.
3. The students will be able to operate various automotive scanners to communicate with air conditioning controllers (ECM, PCM, BCM etc.) retrieving repair codes to diagnose various components and sensors.
4. The students will be able to rebuild, repair, or replace as necessary various air conditioning components using proper equipment and procedures.

AUTOMOTIVE AND RELATED TECHNOLOGY
AUTORTK 113  DRIVE TRAIN COMPONENTS PRINCIPLES AND PRACTICES (3) CSU
Lecture: 1 hour / Lab: 6 hours

Instruction is offered in the, principles of operation, function and testing of manual/automatic transmissions and transaxles. Emphasis is placed on, power train systems, torque converter & planetary gear operation, gears & gear reduction. Laboratory instruction is offered in servicing of manual/automatic transmissions including, electronic shift controls, hydraulic fundamentals, fluids and sealing, clutches, and differentials.

Student Learning Outcome(s):
1. The student will trace, explain and demonstrate how various types of planetary gear sets work. 2. The student will disassemble/reassemble various automatic/manual transmissions sub-assemblies and explain their operation. 3. The student will disassemble various automatic/manual transmissions, reassemble, make all required adjustments and test for proper operation.

AUTORTK 114  STEERING,SUSPENSION,BRAKES,PRINCIPLES AND PRACTICES (3) CSU
Lecture: 1 hour / Lab: 6 hours

This course provides instruction in the theory, design, principles, diagnostics, and proper system service of automotive brake, suspension, and steering systems.

Student Learning Outcome(s):
Identify, diagnose, troubleshoot and repair all components of various automotive braking systems Identify, diagnose, troubleshoot and repair all components of various automotive steering and suspension systems Perform wheel alignment.

AUTORTK 121  BASIC ENGINE THEORY INSPECTION AND REPAIR (3) CSU
Lecture: 1 hour / Lab: 6 hours

This course offers instruction in the types of operating principles and performance characteristics of automotive engines. Applied mathematics and related physics are emphasized throughout the course.

Students will disassemble and assemble a complete engine and apply related theory to factory procedures.

Student Learning Outcome(s):
Define and explain the engine related components theory / operation and systematic method of troubleshooting system failures within the engine performance environment. Identify and describe component location / function and operation within their perspective systems. Identify the difference between component failure and lack of maintenance problems associated with engine related service, troubleshoot, test and repair. Charge a Battery and perform a load test to determine the condition of the Battery-. Perform basic engine condition diagnosis and define basic principles of troubleshooting engine problems. Perform crankcase vacuum, running vacuum, snap acceleration, exhaust restriction tests, power balance test, dry / wet compression test, and cylinder leakage test. Perform oil pressure test. Perform oil pressure test. Perform fuel system pressure and volume test on a fuel delivery system, determine the state of system and compare test results to manufacturers specifications and make the correct recommendations. Identify fuel injection system components describe basic theory and operation, and methods of testing and repair of components. Perform a fuel injection system tests, diagnose and service components and interpret the results. Identify basic fuel injection components and explain basic theory and operation of input and output devices. Identify common automotive tools and equipment used in fuel injection troubleshooting and repair.

Demonstrate safe and proper use of equipment. Know and follow state, federal, EPA and OSHA guidelines and regulations. Complete a written quiz, which is similar in format to tests given by the Automotive Service Excellence (ASE) with a score of 70% or higher. Identify parts and components. Demonstrate proper tool usage and repair techniques. Practice safe methods of using hand and power tools. Remove and replace parts. Identify and use the different types and sizes of fasteners used on electrical and electronic components. Read trade and equipment manuals. Practice quality assurance standards. Use common sense. The student will be able to perform an engine vacuum test, compression test, cylinder power balance test, cylinder leak down test, oil leak & pressure test and exhaust restriction test.

AUTORTK 122  ELECTRICAL/ELECTRONIC SYSTEMS THEORY, INSPECTION & REPAIR (3) CSU
Lecture: 1 hour / Lab: 6 hours

Instruction on theory, inspection & repair of automotive electronic/electrical systems and components. Emphasis is placed on changing, battery/starting & ignition systems component inspection, diagnosis & repair. This course also offers instruction on electrical wiring diagram analysis.

Student Learning Outcome(s):
1. Troubleshoot, diagnose and repair of electrical and electronic systems using the appropriate test equipment such as scanners, DVOMs (Digital Volt Ohm Meters), ETMs (Electrical Troubleshooting Manuals) and wiring schematic circuit diagrams. 2. Diagnose automotive electrical problems, to include electrical principles, use of basic electrical test equipment, and how to interpret wiring diagrams, and to gather and analyze information. 3. Diagnose and repair automotive batteries, starting, and changing, lighting systems, advanced automotive electrical systems, to include body electrical accessories, and basic computer control.

AUTORTK 123  FUEL & EMISSIONS SYSTEMS THEORY, INSPECTION & REPAIR (3) CSU
Lecture: 1 hour / Lab: 6 hours

Instruction is offered on engine performance, diagnosis and repair. Emphasis is placed on ignition, fuel, and emission systems. Instruction is offered on related technologies of automotive fuel delivery systems, induction and scavenging systems. The proper use of test equipment and automotive engine evaluation procedures are stressed in this course.

Student Learning Outcome(s):
The students will complete appropriate NATEF task sheets provided in student work book accompanying text as related to fuel and ignition systems and tune-up.

AUTORTK 130  AUTOMOTIVE THEORY AND REPAIR I (3) CSU
Lecture: 1 hour / Lab: 6 hours

Instruction is offered on the areas of advanced engine construction & use of engine diagnostic equipment, standard transmissions & clutches, with emphasis on diagnosis and repair procedures. Shop practice is offered on most areas of automotive repairs: engine, transmissions, drivability, brakes, suspension, steering, and automotive accessories.

Student Learning Outcome(s):
1. The student will be able to perform an engine vacuum test, compression test, cylinder power balance test, cylinder leak down test, oil leak & pressure test and exhaust paper test. 2. The student will be able to use engine condition and performance data to determine necessary engine repair procedures. 3. The student will be able to use industry standard tools and equipment to perform necessary engine repair procedures.
AUTORTK 131 AUTOMOTIVE THEORY AND REPAIR II (3)
Lecture: 1 hour / Lab: 6 hours

Instruction is offered on the areas of advanced emission systems diagnosis, with emphasis on diagnosis & repair procedures to prepare vehicles for the State of California smog test. Shop practice is offered on most areas of automotive repairs: engine, transmissions, drivability, brakes, suspension, steering, and automotive accessories.

Student Learning Outcome(s):
1. The students will be able to inspect and diagnose emission components for damage, wear and performance using proper procedures and equipment.
2. The students will be able to operate DSO’S/DMM’S to analyze electrical emission control circuits for correct electrical signals and performance using proper procedures.
3. The students will be able to operate various automotive scanners to communicate with emission system controllers (ECM and PCM) retrieving repair codes to diagnose various components and sensors.
4. The students will be able to repair, or replace as necessary various emission control components using proper equipment and procedures.

AUTORTK 135 COMPUTER CONTROL AND FUEL INJECTION (3) CSU
Lecture: 1 hour / Lab: 6 hours

Instruction is offered in Automotive Computer Control and Fuel Injection Systems. Emphasis is placed on computer control electronic and fuel systems construction, function, inspection, component theory and operation, troubleshooting principles and engine condition diagnosis, testing.

Student Learning Outcome(s):
1. Students will utilize an automotive scan tool to retrieve Diagnostic Trouble Codes (DTC), and engine parameters/monitors.
2. Students will trouble-shoot, service, and repair automotive fuel systems.

AUTORTK 140 AUTOMOTIVE THEORY AND REPAIR IV (3) CSU
Lecture: 1 hour / Lab: 6 hours

Classroom lecture is offered in the areas of brake systems, front suspension systems, batteries, starting and charging systems, with emphasis on diagnosis and repair procedures. Shop practice is offered in most areas of automotive repairs: engine, transmissions, tune up, brakes, suspension, steering, and automotive accessories, and various other repairs using available vehicles.

Student Learning Outcome(s):
1. The students will be able to inspect and diagnose braking, suspension/steering and battery/starter components for damage, wear and performance using proper procedures and equipment.
2. The students will be able to operate DSO’S/DMM’S to analyze electrical braking, suspension/steering and battery/starter circuits for correct electrical signals and performance using proper procedures.
3. The students will be able to operate various automotive scanners to communicate with brake, suspension/steering, and battery/starter controllers retrieving repair codes to diagnose various components and sensors.
4. The students will be able to repair, rebuild or replace as necessary various brake, suspension/steering, and battery/starter components using proper equipment and procedures.

AUTORTK 141 AUTOMOTIVE THEORY AND REPAIR V (3) CSU
Lecture: 1 hour / Lab: 6 hours

Instruction is offered on the use of electrical diagnostic equipment, interpretation of wiring diagrams, engine computer controls and charging systems.

Student Learning Outcome(s):
1. The students will be able to inspect and diagnose charging, ignition and computer control components for damage, wear and performance using proper procedures and equipment.
2. The students will be able to operate DSO’S/DMM’S to analyze electrical charging, ignition and computer control circuits for correct electrical signals and performance using proper procedures.
3. The students will be able to operate various automotive scanners to communicate with charging, ignition, and engine controllers (ECM, PCM, BCM etc.) retrieving repair codes to diagnose various components and sensors.
4. The students will be able to repair, or replace as necessary various charging, ignition, and computer control components using proper equipment and procedures.

AUTORTK 142 AUTOMOTIVE THEORY AND REPAIR VI (3) CSU
Lecture: 1 hour / Lab: 6 hours

Instruction is offered on fuel injection, automatic transmissions & heating, ventilation & air conditioning systems, with emphasis on diagnosis and repair procedures. Shop practice is offered on most areas of automotive repairs: engine, transmissions, drivability, brakes, suspension, steering, automotive accessories, and various other repairs.

Student Learning Outcome(s):
1. The students will be able to inspect and diagnose fuel injection, automatic transmissions and air conditioning system components for damage, wear and performance using proper procedures and equipment.
2. The students will be able to operate DSO’S/DMM’S to analyze electrical fuel injection, automatic transmission and air conditioning circuits for correct electrical signals and performance using proper procedures.
3. The students will be able to operate various automotive scanners to communicate with fuel injection, automatic transmission and air conditioning controllers retrieving repair codes to diagnose various components and sensors.
4. The students will be able to repair, rebuild or replace as necessary various fuel injection, automatic transmission and air conditioning components using proper equipment and procedures.

AUTORTK 144 CALIFORNIA STATE BUREAU OF AUTOMOTIVE REPAIR CLEAN AIR CAR (3)
Lecture: 1 hour / Lab: 6 hours

The course is designed to upgrade knowledge of the students who are currently employed in the automotive field. This course also prepares students for employment and licensing in the California State Smog Check Program and prepares them for the California State Smog License Examination. Materials and content comply with Bureau of Automotive Repair requirements.

Student Learning Outcome(s):
Level One Engine and Emission Control Training Components: Level Two Smog Check Training Inspection Procedures.
AUTORTK 185  DIRECTED STUDY - AUTOMOTIVE AND RELATED TECHNOLOGY (1)

Lecture: 1 hour

This course allows students to pursue a directed study in Automotive and Related Technology on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):

The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in Automotive and Related Technology.

AUTORTK 285  DIRECTED STUDY - AUTOMOTIVE AND RELATED TECHNOLOGY (2)

Lecture: 2 hours

This course allows students to pursue a directed study in Automotive and Related Technology on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):

The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in Automotive and Related Technology.

AUTORTK 385  DIRECTED STUDY - AUTOMOTIVE AND RELATED TECHNOLOGY (3)

Lecture: 3 hours

This course allows students to pursue a directed study in Automotive and Related Technology on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):

The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in Automotive and Related Technology.

AUTORTK 941  COOPERATIVE EDUCATION - AUTOMOTIVE AND RELATED TECHNOLOGY (4) CSU RPT 3

Lecture: 4 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/ internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):

1. The student will develop at least three learning objectives to be accomplished on the job. 2. The objectives will be related to the educational/occupational goals of the student.

BAKING, PROFESSIONAL

PROFBKG 112  BAKING PROCESSES AND THEORY OF INGREDIENTS (4)

Lecture: 2 hours / Lab: 6 hours

Corequisite: Culinary Arts 112.

Course Covers the production of quick breads, introduction to puff pastry, laminated dough, and cookies with an emphasis placed on mixing methods. The role of leavening agents, starches, chemical reactions of ingredients and the effect on heat and cold on products. Recipe and menu development, including ingredient selection will be discussed.

Student Learning Outcome(s):

1. The student will identify beginning baking terminology and bakers math. Student will practice various baking methods of preparation. Student will evaluate and critique finished product.

PROFBKG 121  BEGINNING YEAST BREADS AND QUICKBREADS (6)

Lecture: 3.75 hours / Lab: 6.75 hours

Prerequisite: Professional Baking 112 and Culinary Arts 112.

Class introduces student to volume lean & rich yeast bread and quick bread production with an emphasis on flour usage, chemical and natural leavening agents, as well as fat and sugar ingredient identification. Speed, accuracy, and increased productivity are stressed along with preparation of a variety of bread products up to industry standards.

Student Learning Outcome(s):

PROFBKG 131  PLATED RESTAURANT STYLE DESSERTS (6)
Lecture: 3.75 hours / Lab: 6.75 hours
Prerequisite: Professional Baking 112; Professional Baking 121; Professional Baking 122; Culinary Arts 112;

The course covers a wide range of baking techniques and topics with concentration on the composition of restaurant style plated desserts made up of a number of components.

Student Learning Outcome(s):
Differentiate various baking preparation of doughs, cakes, fillings, sauces and garnishes. Demonstrate said preparations within a professional bakery setting. Assess finished products according to industry standard.

PROFBKG 132  MULTI-COMPONENT DESSERTS AND PASTRIES (6)
Lecture: 3.75 hours / Lab: 6.75 hours
Prerequisite: Professional Baking 112; Professional Baking 121; Professional Baking 122; Professional Baking 131 and Culinary Arts 112;

Students will discuss and demonstrate contemporary style multi-component plated restaurant style desserts. Topics include traditional composed desserts, modern menu fusion, international/ethnic and classical dessert combinations.

Student Learning Outcome(s):

PROFBKG 141  ADVANCED BAKING CENTERPIECE AND DECORATING TECHNIQUES (6)
Lecture: 3.75 hours / Lab: 6.75 hours
Prerequisite: Professional Baking 112; Professional Baking 121; Professional Baking 122; Professional Baking 131; Professional Baking 132; Culinary Arts 111; Culinary Arts 112;

This class applies procedures and techniques for preparing advanced decorative bakery items for display in a professional food service facility. Students will prepare and demonstrate various advanced techniques including: Molded and tempered chocolate show pieces, marzipan, nougatine, pastillage, pulled and molded sugar, wedding and other occasional cakes, rolled and poured fondant, and gum paste will be prepared and evaluated.

Student Learning Outcome(s):
Student will recognize and demonstrate preparation of advanced bakery techniques and procedures. Student will demonstrate knowledge of completed products per class and industry standard.

PROFBKG 941  COOPERATIVE EDUCATION - BAKING, PROFESSIONAL (4)
Lecture: 4 hours

Cooperative Education is a work-experience program involving the employer, the student-employee and the college to ensure that the student receives on the job training and the unit credit for work experience or volunteer work.

internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

---

BARBERING

BAR 113  FRESHMAN BARBERING I (6)
Lecture: 3 hours / Lab: 9 hours
Prerequisite: Barbering 113.

The beginning course includes sanitation, client protection, scalp treatments, shampooing, hair cutting, finger waves, curl constructions, and manicuring.

Student Learning Outcome(s):
1. Students will be able to perform basic hair designs. 2. Students will be able to perform hair sculpting procedures and practice industry safety and sanitation standards.

BAR 114  FRESHMAN BARBERING II (6)
Lecture: 3 hours / Lab: 9 hours

Beginning course with plain facials, permanent waving techniques, hair cutting with a razor and clippers and thermal texture hair styling.

Student Learning Outcome(s):
1. Students will be to perform a plain facial using massage manipulations. 2. Student will be able to demonstrate a plain straight back permanent wave. 3. Student will be able to perform a variety of hair sculpting using the shears and clipper. 4. Student will be able to demonstrate shaving techniques using the razor.

BAR 123  BARBERING JR. SALON I (6)
Lecture: 3 hours / Lab: 9 hours
Prerequisite: Barbering 114.

The students will be exposed to intermediate instructions in chemical straightening, thermal straightening and curling, permanent waving, skin and hair care, with instructions of hair cutting.

Student Learning Outcome(s):
1. Students will be able to demonstrate application of chemical relaxers. 2. Students will be able to identify chemical compounds for chemical services. 3. Students will be able to demonstrate a resting facial. 4. Students will be able to perform hair sculpting procedures using shears, razor and clippers.
GRADUATION REQUIREMENTS AND EDUCATIONAL PROGRAMS

BAR 124  BARBERNG JR SALN II (6)
Lecture: 3 hours / Lab: 9 hours
Prerequisite: Barbering 123.

The students are instructed in advanced permanent waving, soft permanent wave, men hairpieces, thermal straightening and cutting, hair cutting, clipper cutting and electricity.

Student Learning Outcome(s):
1. Students will be able to perform advanced cold waving, soft permanent waving. 2. Students will be able to perform chemical straightening. 3. Students will demonstrate competence in hair cutting. 4. Students will be able to demonstrate proper use of electricity.

BAR 133  BARBERING JR. SALON III (6)
Lecture: 3 hours / Lab: 9 hours
Prerequisite: Barbering 133.

The course will cover basic, intermediate, and advance hair coloring, bleaching, lighteners, facial hair color, and color correction techniques. Course will cover shaving techniques and soft perm waving. The subjects mentioned will be discussed.

Student Learning Outcome(s):
1. The students will be able to apply law of color in identifying and demonstrating the applications of basic and intermediate hair coloring, bleaching and toning. 2. Students will be able to apply shaving and hair sculpting techniques. Student will be able to apply permanent/soft waving techniques.

BAR 134  BARBERING JR. SALON IV (6)
Lecture: 3 hours / Lab: 9 hours
Prerequisite: Barbering 133.

The course will cover basic, intermediate, and advanced hair coloring, bleaching, lighteners, facial hair color, and color correction techniques.

Student Learning Outcome(s):
1. Students will be able to describe the benefits of facial massage. 2. Students will be able to identify the 14 shaving areas of the face. 3. Students will be able to discuss, identify, and name the sections of the head as applied to hair cutting.

BAR 143  BARBERNG SR. SALON I (6)
Lecture: 3 hours / Lab: 9 hours
Prerequisite: Barbering 124; Barbering 134.

The students will review all areas of cosmetology. Theory is focused on what is required by State Board and practical assignments related to services provided. There will be emphasis on communication, customer service, time management, booking of appointments and proper sales attitude.

Student Learning Outcome(s):
1. Student will be able to perform a chemical straightener. 2. Student will be able to demonstrate a resting facial. 3. Student will be able to list and describe the properties of the hair and scalp.

BAR 144  BARBERNG SR. SALON II (6)
Lecture: 3 hours / Lab: 9 hours
Prerequisite: Barbering 143.

The students will be introduced to clinic floor practicum and advanced client services. Mock State Board procedures for licensure will be employed. Business practices include: client services, effective communication, job search skills, networking, strategies for building a clientele, selling techniques, starting and operation a business.

Student Learning Outcome(s):
1. Student will model industry standard business practices including customer rapport, service planning, professional communication, client retention, referrals, marketing and cooperation with co-workers. 2. Student will review individual competency requirements, both skill and theory, and passing a mock examination, student will demonstrate readiness to pass the state certification exam.

BIOLOGY

BIOLOGY 003  INTRODUCTION TO BIOLOGY (4) UC/CSU
Lecture: 3 hours / Lab: 3 hours

This is an introductory course dealing with the fundamental properties of living things. The structure and physiology of plants and animals, with emphasis on humans, are covered. Relationships between biological communities, genetics, and evolution are stressed.

Student Learning Outcome(s):
1. Be able to explain the cell theory, and discuss the structure and function of cell organelles and basic cell division processes. 2. Explain mechanisms of evolutionary changes. 3. Discuss the consequences of the evolutionary processes on biological diversity and adaptation patterns. 4. Describe patterns and processes of heredity (with emphasis on humans) using both classical and molecular genetics. 5. Relate the structure of organs and organ systems of multicellular organisms to their specific functions. 6. Discuss factors that affect the structure of biological communities and ecosystems. 7. Use basic biological (ecological) principles to analyze major environmental issues.

BIOLOGY 005  INTRODUCTION TO HUMAN BIOLOGY (4) UC/CSU
Lecture: 3 hours / Lab: 3 hours

The course includes basic biological principles as they apply to humans. The course will provide a foundation for advanced courses in Human Anatomy, Physiology, and Microbiology. Topics include chemical principles, the cell, heredity, human anatomy and physiology, microbiology, pathology, ecology, and bioethics.

Student Learning Outcome(s):
1. Student will apply the scientific method to understand biological principles. 2. Student will describe basic principles in human biology such as biochemistry and the cell. 3. Student will describe different types of bacteria, their staining methods, and how they cause disease. 4. Student will describe the anatomy and physiology of human organ systems.

BIOLOGY 006  GENERAL BIOLOGY I (5) UC/CSU
Lecture: 3 hours / Lab: 6 hours
Prerequisite: Chemistry 101
This is the first of a sequence of two General Biology courses designed for life science and pre-med majors. It deals with basic cellular processes within and between cells, metabolism, genetics and recombinant DNA technology.

Student Learning Outcome(s):

1. Discuss the cell theory.
2. Discuss how cell structure is related to its function.
3. Discuss metabolism, cell communication and cell division processes.
4. Describe patterns of inheritance and discuss processes of heredity using concepts in Mendelian and molecular genetics.
5. Solve genetic problems involving Mendelian traits.
6. Discuss basic principles and applications of DNA technology.

**BIOLOGY 007** GENERAL BIOLOGY II (5) UC/CSU

*Lecture: 3 hours / Lab: 6 hours*

Prerequisite: Prerequisite: Biology 6;

This is the second of a sequence of two General Biology courses designed for life science and pre-med majors. It deals with basic concepts in evolution, systematics, anatomy, physiology and ecology of organisms.

Student Learning Outcome(s):

1. Explain mechanisms of evolutionary change.
2. Discuss consequences of evolution on biological diversity and adaptation patterns.
3. Reconstruct phylogeny and explain principles of phylogenetic reconstruction using morphological and molecular data.
4. Identify and classify major taxa using phylogenetic systematics and explain the basis of classification.
5. Describe the most important events in the history of life on earth.
6. Relate the structure of organs of multicellular eukaryotes (with emphasis on plants and animals) to their functions.
7. Discuss how abiotic and biotic factors affect individuals, populations, communities and ecosystems.
8. Use ecological principles to analyze human impact on environment.

**BIOLOGY 185** DIRECTED STUDY - BIOLOGY (1) CSU RPT 2

*Lecture: 1 hour*

This course allows students to pursue directed study in Biology on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):

1. Student will acquire the critical thinking and problem solving skills necessary for the study of a relevant topic in biology.
2. Student will apply methods used by scientists while studying a selected topic in biology.

**BIOTECHNOLOGY**

**BIOTECH 010** INTRODUCTION TO BIOMANUFACTURING I (4) CSU

*Lecture: 3 hours / Lab: 3 hours*

This course offers an introduction to the concepts and laboratory skills used in biomanufacturing. The process of biomanufacturing is explored. Students will investigate practices, facilities and techniques used by companies in producing biomanufactured products such as drugs.

Student Learning Outcome(s):

1. Students will demonstrate an understanding of the purpose, fundamentals and regulations of biomanufacturing.
2. Students will understand the science underlying biomanufacturing.
3. Students will apply techniques and procedures applicable to biomanufacturing.

**BIOTECH 012** INTRODUCTION TO BIOMANUFACTURING II (4) CSU

*Lecture: 3 hours / Lab: 3 hours*

Prerequisite: BIOTECHNOLOGY 010

This course expands on concepts from Introduction to Biomanufacturing I. It focuses on cell cultures, proteins and separation techniques as it applies to manufacturing products. The course also emphasizes environmental control in the industry. Laboratory focuses on applying techniques in molecular biology and chemistry to produce and assess a final product.

Student Learning Outcome(s):

1. Students will explain relevant biology and chemistry concepts as it applies to biomanufacturing.
2. Students will apply techniques and procedures used in biomanufacturing to produce and assess a final product.
3. Students will demonstrate an understanding of the lab environment and current good manufacturing practices.

**BUILDING CONSTRUCTION TECHNIQUES**

**BLDGCTQ 002** PRE-EMPLOYMENT -APPLIED TRADES CALCULATIONS AND MEASUREMENTS (3)

*Lecture: 3 hours*

This is an entry level course in applied calculations and measurements with special emphasis on application problems encountered in the utility, manufacturing, and construction industries.

Student Learning Outcome(s):

1. Student will add, subtract, multiply, and divide whole numbers, with and without a calculator.
2. Student will use a standard ruler, a metric ruler, and a measuring tape.
3. Student will recognize some of the basic shapes used in the construction industry and apply basic geometry to measure them.

**BLDGCTQ 007** WEATHERIZATION - PRACTICAL ENERGY EFFICIENCY TECHNIQUES (3)

*Lecture: 3 hours*

This course provides expertise advice on various techniques that can be used to weatherize homes and other structures. The course is suitable for application by a professional home or energy inspector. Homeowners would...
BLDGCTQ 008 WEATHERIZATION-ENERGY EFFICIENCY PRACTICES (1)
Lab: 3 hours
This course provides laboratory exercises to build skills necessary for the effective application of energy techniques that can be used to weatherize homes and other structures. Course is suitable for application by a professional weatherization contractor training entry level workers or a homeowner looking to improve their own home. Efficiency practices related to: Energy basics, sealing, insulating, window replacement/installation, environmental air, water, appliance energy efficiency, and lighting are just some of the areas that will be covered.

Student Learning Outcome(s):
Students pass Basic Weatherization test.

BLDGCTQ 009 ENERGY AUDITOR - RESIDENTIAL (3)
Lecture: 3 hours
A course focusing on residential energy requirements, loss and efficiency. How energy is used and lost will be discussed, along with the testing techniques and approaches to measure the amount of energy lost. Students will learn the components of an energy audit report and complete necessary forms.

Student Learning Outcome(s):
Students complete an energy audit form from testing data and take national certification test.

BLDGCTQ 010 ENERGY AND UTILITY INDUSTRY CAREERS (3)
RPT 3
Lecture: 3 hours
This course reviews the hot jobs in the energy and utility industry, and outlines a method for the student to decide on their career path. Hiring process and interview skills will be explored. Fitness for duty and other physical and physiological characteristics will be discussed. An A to Z guide to private, State, Federal, and international career opportunities will be presented.

Student Learning Outcome(s):
1. List career opportunities. 2. Develop a self-career map/plan.

BLDGCTQ 011 CADD FOR SUSTAINABLE LANDSCAPE DESIGN (4)
Lecture: 3 hours / Lab: 3 hours
This course covers the use of computer Aided Design/Drafting (CADD) applications specific to landscape professionals, including the introduction to CADD skills, block functions, Internet applications, three-dimensional design, presentation drawings, building systems, working drawings, and working drawing coordination.

Student Learning Outcome(s):
Students will complete a set of Three Dimensional Models with Libraries, Meta tags and Information using CAD MEP as the drawing tool for a sustainable landscape design project.

BLDGCTQ 012 ENERGY AUDITOR - RESIDENTIAL PRACTICES (1)
Lab: 3 hours
A course focusing on the practical application of residential energy requirements, loss and efficiency. Testing techniques and measurement the amount of energy lost. Students will perform actual energy audits of simulated structures and complete necessary forms.

Student Learning Outcome(s):
Perform building measurements for an energy audit to include, Combustion analysis, draft test, blower door test and duct test.

BLDGCTQ 014 CARPENTRY AND CONSTRUCTION FOR RENEWABLE ENERGY INSTALLERS (4)
Lecture: 3 hours / Lab: 3 hours
This course covers the roof structure principles necessary for installation of solar panels. Construction techniques and principles of roof framing and construction will be emphasized. Roof covering and flashing will also be a focus of the course. The installation and mounting of different panel mounting systems will also be demonstrated and covered in class.

Student Learning Outcome(s):
Students construct and prepare a roof for Solar Panel installation.

BLDGCTQ 101 CONTRACT’S LICENSE LAW (3) CSU
Lecture: 3 hours
Contractor’s License Law is designed to prepare personnel in the construction industry on the California Law requirements for attaining a California State Contractor’s License. Topics covered are License Law, Mechanic’s Lien Law, Employment Regulations, Worker’s Compensation, Safety in Employment and Business Management.

Student Learning Outcome(s):
SLO #1: Complete a mock contractor’s license examination. SLO #2: Identify and interpret various Contractor’s Licensure regulations SLO #3: Identify and interpret mechanics lean laws and regulations.

BLDGCTQ 102 O.S.H.A. BASED SAFETY STANDARDS: CONSTRUCTION & INDUSTRY (2) RPT 3
Lecture: 2 hours
( Same as Electrical Construction Maintenance 100).
This course provides instruction on industry safety and health rules as it applies to workers and employers within the construction industry. Topics such as fall protection, lock out tag out procedures, PPE, excavations, etc. are covered. Participants that meet the required hourly attendance and successfully pass the final exam will be eligible to receive their OSHA (30 hr) safety-training certificate.

**Student Learning Outcome(s):**
1. Recognize appropriate training requirements and training methods.
2. Define OSHA specific construction terms such as; competent person, construction work, confined space, working space, general duty clause. 3. Select situational appropriate PPE.

**BLDGCTQ 215 SMALL WIND ENERGY SYSTEMS PRINCIPLES AND PRACTICES (3)**

**Lecture:** 1.5 hours / **Lab:** 4.5 hours

This course is designed for individuals that have the basic electrical and mechanical skills of an energy technician or electrician and are looking to expand into the small wind energy field. This class will help one to develop the fundamental knowledge and skill sets typically required for small wind system practitioners and to help ensure safety, quality and consumer acceptance of small wind installations.

**Student Learning Outcome(s):**
1. Discuss the history and development of wind energy. 2. List the regions of the globe where wind is a renewable option. 3. Install the components needed for various wind renewable energy sources.

**BLDGCTQ 931 COOPERATIVE EDUCATION - BUILDING CONSTRUCTION TECHNIQUES (3) RPT 3**

**Lecture:** 3 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to ensure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

**Student Learning Outcome(s):**
1. The student will develop at least three learning objectives to be accomplished on the job. 2. The objectives will be related to the educational/occupational goals of the student.

**BUSINESS**

**BUS 001 INTRODUCTION TO BUSINESS (3) UC/CSU**

**Lecture:** 3 hours

Special emphasis is placed on the meaning and purpose of business in our society, the historical development of business, the general economic setting for business today, and the following business areas: forms of business organization, manufacturing, marketing, human relations, financing, accounting, budgeting, reports, government-based relations and the social responsibilities of people in business.

**Student Learning Outcome(s):**
Students will be able to explain and analyze different legal forms of business. Students will be able to identify various core concepts and tools of marketing, management, finance and accounting to develop and operate a business.
1. Identify laws, rules, and regulations that bound the exchange of goods and services between producers and consumers in the marketplace. 2. Assess consumer’s or producer’s rights pursuant to a claim for compensation for harm incurred as a result of another’s civil or criminal violation in the marketplace.

**BUS 006  BUSINESS LAW II (3) CSU**

**Lecture:** 3 hours

This course presents the relationship of law to business. Topics include natural persons, partnerships, corporations, limited liability companies, government regulation and real property. In the application of legal principles to business transactions is provided.

**Student Learning Outcome(s):**

1. Students will identify and apply general laws, rules and regulations to fact patterns that pertain to the UCC and the sale of goods between merchants. 2. Students will identify the legal issues and the duties and obligations of parties in disputes pertaining to property, wills and trusts, negotiable instruments and creditor rights including the different types of bankruptcy proceedings.

**BUS 014  ORAL COMMUNICATIONS FOR CUSTOMER SERVICE (3)**

**Lecture:** 3 hours

Instruction will focus on the key issues of positive and productive customer service communications, identifying customer needs and problems and finding viable solutions.

**Student Learning Outcome(s):**

1. Students will be able to relate customer service behaviors to profits and customer retention. 2. Students will be able to demonstrate positive customer service language and behaviors, and active listening techniques.

**BUS 022  THE BUSINESS OF ELECTRONIC COMMERCE (3) CSU**

**Lecture:** 3 hours

This comprehensive course emphasizes emerging online technologies and future trends with respect to e-commerce. In addition to the early development of e-commerce, strategies for e-commerce success, e-marketing, online payment methods, spamming, phishing, identity theft, and other e-commerce components will be explored.

**Student Learning Outcome(s):**

1. Students will be able to explore, research, analyze and critique electronic commerce business models.

**BUS 032  BUSINESS COMMUNICATIONS (3) CSU**

**Lecture:** 2 hours / **Lab:** 2 hours

The course emphasizes the concepts of successful written and oral communication skills in business in order to write effective business communications including letters, electronic communications, and short reports. This course also helps students develop the ability to create and present oral presentations.

**Student Learning Outcome(s):**

1. Students will become effective communicators to today’s changing workplace. 2. Students will learn the writing process as it applies to e-mail messages and memorandums.

**BUS 033  TECHNICAL REPORT WRITING (3) CSU**

**Lecture:** 3 hours

**Advisory:** English 67.

This course provides student with technical communication skills that help in finding and using information to share with others in the workplace. It also provides techniques that communicators use to analyze an audience and purpose, to create and find the best information on a subject, to arrange the information skillfully to meet the audience’s needs and preferences, and to deliver the information effectively using the most appropriate software application.

**Student Learning Outcome(s):**

1. Students will plan and draft documents using templates and style in Microsoft application. 2. Students will learn how to write collaboratively in an office environment.

**BUS 038  BUSINESS COMPUTATIONS (3) CSU**

**Lecture:** 3 hours

This course provides the principles of mathematics, financial accounting and general business problems that include the following: Bank services including checking account and credit card account activity, payroll calculations, cash and trade discounts merchandise mark-up and inventory valuation, simple and compound interest, annuities, stock and bond transactions, business consumer loans, taxes and insurance, depreciation, financial statements, ratios, and business statistics.

**Student Learning Outcome(s):**

1. Students will demonstrate speed and accuracy in analyzing the fundamental processes of mathematics commonly used in making business calculations. 2. Students will demonstrate an understanding of mathematical skills required in other business subjects such as accounting, management, marketing, and computer operations. 4. Students will demonstrate an understanding of budgeting with respect to planning and the balanced scorecard. 5. Students will produce projected pro-forma financial statements and make forecasts based upon the data.

**BUS 040  BUSINESS PROJECT MANAGEMENT (3) CSU**

**Lecture:** 2 hours / **Lab:** 2 hours

This course is an introduction to project management and a comprehensive study of the tools and principles of project management, emphasizing the development of useful project management skills. Topics include project life cycles, setting objectives, identifying activities and resources, work breakdown structures, work flow, network analysis, contingency planning, scheduling, budgeting, work in progress and reporting. Special emphasis will be placed on MS Project.

**Student Learning Outcome(s):**

1. Students will be able to develop project proposals in regards to identifying project scope, developing project schedules while utilizing effective resources, determining cost in respect to project risk and effectively closing the proposed project while building strong relationships with customers and partners.

**BUS 035  DIRECTED STUDY - BUSINESS (3)**

**Lecture:** 3 hours

This course allows students to pursue directed study in Business Administration on a contract basis under the direction of a supervising instructor.
BUS 941 COOPERATIVE EDUCATION - BUSINESS (4) CSU RPT 3
Lecture: 4 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to ensure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):

1. The student will develop at least three learning objectives to be accomplished on the job. 2. The objectives will be related to the educational/occupational goals of the student.

CRPNTRY 111 CONSTRUCTION I (7) CSU
Lecture: 3 hours

This course covers use and operation of hand tools, machine tools, and portable electric tools commonly used in the construction trades. Fundamentals of residential foundation and wall construction, use of rough and finish hardware, glues and adhesives, federal, state, and local building codes and ordinances are studied.

Student Learning Outcome(s):

1. Students will use common power and hand tools to perform basic framing operations. 2. The student will calculate rafter lengths and cut the rafters to size using a Skill saw. 3. The student will fasten framing members together using hand nailing techniques. 4. The student will measure and cut framing members to length using the worm drive circular saw, power miter box and radial arm saws.

CRPNTRY 111A CONSTRUCTION IA (3) CSU
Lecture: 3 hours

This course covers use and operation of hand tools, machine tools, and portable electric tools commonly used in the construction trades. Fundamentals of residential foundation and wall construction, use of rough and finish hardware, glues and adhesives, federal, state, and local building codes and ordinances are studied.

Student Learning Outcome(s):

1. Students will use common power and hand tools to perform basic framing operations. 2. The student will calculate rafter lengths and cut the rafters to size using a Skill saw. 3. The student will fasten framing members together using hand nailing techniques. 4. The student will measure and cut framing members to length using the worm drive circular saw, power miter box and radial arm saws.

CRPNTRY 111C CONSTRUCTION IC (2)
Lab: 6 hours

This course covers use and operation of hand tools, machine tools, and portable electric tools commonly used in the construction trades. Fundamentals of wall construction, roof construction, and applications of federal, state, and local building codes and ordinances are studied.

Student Learning Outcome(s):

1. Students will use common power and hand tools to perform basic framing operations. 2. The student will calculate rafter lengths and cut the rafters to size using a Skill saw. 3. The student will fasten framing members together using hand nailing techniques. 4. The student will measure and cut framing members to length using the worm drive circular saw, power miter box and radial arm saws.

CRPNTRY 114 HAND AND POWER TOOL APPLICATION (4) CSU
Lecture: 1 hour / Lab: 9 hours

Corequisite: Carpentry 115 & 117

This course focuses on the safe use of hand and power tools used in the carpentry and construction industry. Operation and safety instruction will be given on both portable and stationary power tools including skill saws, table saws, jointers, planers, band saws, etc. Students will use hand and power tools to complete woodworking and carpentry projects.

Student Learning Outcome(s):

Students demonstrate knowledge of safe use of hand and power tools.

CRPNTRY 115 BASIC BLUEPRINT READING AND CORE CONSTRUCTION SKILLS (3) CSU
Lecture: 1 hour / Lab: 6 hours

This course covers use and operation of hand tools, machine tools, and portable electric tools commonly used in the construction trades. Fundamentals of residential foundation and wall construction, use of rough and finish hardware, glues and adhesives, federal, state, and local building codes and ordinances are studied.

Student Learning Outcome(s):

1. Students identify parts of a wood framed structure and describe their purpose.

Graduation Requirements and Educational Programs
GRADUATION REQUIREMENTS AND EDUCATIONAL PROGRAMS

CRPNTRY 117 CONSTRUCTION MATERIALS (2)
Lecture: 1 hour / Lab: 3 hours
Prerequisite: Carpentry 114;
Corequisite: Carpentry 123

This course focuses on building materials such as concrete, steel and a variety of woods used for exterior and interior carpentry finish; insulation, flashing, roof covering, interior and exterior wall covering, wood trim and other finish materials in residential construction; rough and finish hardware such as nails, screws, bolts, timber fasteners, gang nailing, power fastening, powder actuated fasteners, joist hangers, clips, etc.; methods of installation

Student Learning Outcome(s):
1. Students will identify information from blueprints such as dimensions, symbols and location. 2. Students complete 8 NCCER certification tests on basic safety, introduction to construction math, introduction to hand tools, introduction to power tools, introduction to construction drawings. Basic communication skills, basic employability skills, introduction to materials handling.

CRPNTRY 123 BASIC HOUSE CONSTRUCTION (6) CSU
Lecture: 2 hours / Lab: 12 hours
Prerequisite: Carpentry 114; Corequisite: Carpentry 124

This course covers the basic framing operations involved in residential construction. Students will complete the framing process using large scale models. Basic construction tool operations, and processes will be emphasized and tested.

Student Learning Outcome(s):
1. Students will use common power and hand tools to perform basic framing operations. 2. The student will calculate rafter lengths and cut the rafters to size using a Skill saw. 3. The student will fasten framing members together using hand nailing techniques. 4. The student will measure and cut framing members to length using the worm drive circular saw, power miter box and radial arm saws.

CRPNTRY 124 BLUEPRINT READING AND ESTIMATING I (3)
Lecture: 1 hour / Lab: 6 hours
Prerequisite: Carpentry 115; Corequisite: Carpentry 123

Students will learn blueprint reading through the process of estimation. Material take-offs, detail methods, labor calculations, profit, overhead and bid procedures will be examined.

Student Learning Outcome(s):
Complete framing material take-off. Calculate concrete requirements for a slab foundation

CRPNTRY 126 CONSTRUCTION II (6)

Students will be familiarized with the basic terms for construction drawings, components, and symbols. Emphasis is placed on the different types of drawings and how to interpret and use the dimensions.

Student Learning Outcome(s):
1. Students identify information from blueprints such as dimensions, symbols and location. 2. Students complete 8 NCCER certification tests on basic safety, introduction to construction math, introduction to hand tools, introduction to power tools, introduction to construction drawings. Basic communication skills, basic employability skills, introduction to materials handling.

CRPNTRY 130 CALCULATIONS AND MEASUREMENT FOR WOODWORKING STUDENTS II (3)
Lecture: 3 hours
Prerequisite: Carpentry 114; Corequisite: Carpentry 124

This course focuses on building materials such as concrete, steel and a variety of woods used for exterior and interior carpentry finish; insulation, flashing, roof covering, interior and exterior wall covering, wood trim and other finish materials in residential construction; rough and finish hardware such as nails, screws, bolts, timber fasteners, gang nailing, power fastening, powder actuated fasteners, joist hangers, clips, etc.; methods of installation

Student Learning Outcome(s):
Students identify basic construction materials including framing, finishing, millwork and wood materials

CRPNTRY 132 APPLIED BLUEPRINT READING (3) CSU
Lecture: 1 hour / Lab: 6 hours
Prerequisite: Carpentry 124; Corequisites: Carpentry 132, 133, & 135

This course focuses on construction documents used in the construction of residential and light commercial projects. Emphasis is placed on the interpretation of drawings, standards, specifications, and symbols used in construction. Gathering information for material requirements and estimates will be major component of the course.

Student Learning Outcome(s):
Identify architectural items, quantities, and specifications from construction drawings.

CRPNTRY 133 ADVANCED RESIDENTIAL ESTIMATING (3) CSU
Lecture: 3 hours
Prerequisites: Carpentry 123 & 124; Corequisites: Carpentry 132, 134, & 135.

Students complete a comprehensive residential estimation project including materials, labor, overheads costs and expenses. Students perform materials takeoff using detailed and unit methods. Students estimate concrete and rebar requirements, lumber needs for floor, wall and roof construction as well as interior and exterior finishing materials. Labor costs are also calculated for common construction jobs. At the end of the course students will complete a comprehensive estimate for a residential construction project.

Student Learning Outcome(s):
Prepare a takeoff estimate of materials using a set of architectural plans.

CRPNTRY 134 ADVANCED RESIDENTIAL CONSTRUCTION (4)
CSU
Lecture: 2.5 hours / Lab: 4.5 hours

The course focuses on principles of estimating, quantity take-off, materials and labor costs, bidding procedures for new construction, renovation for both residential and commercial construction.

Student Learning Outcome(s):
Students calculate construction materials, labor and business costs for a residential structure from a set of plans.

Los Angeles Trade-Technical College 2016 - 2018 GENERAL CATALOG
CRPNTRY 148 COMPUTER ASSISTED ESTIMATING I (3)
Lecture: 1.5 hours / Lab: 4.5 hours

Students receive instruction in using specialized software to generate 2D and 3D plans for residential construction. Emphasis will be placed on using the developed plans to generate estimation information including material and cut lists.

Student Learning Outcome(s):
- Students create a complete set of building documents including material lists.

CRPNTRY 149 COMPUTER ASSISTED ESTIMATING II (3) CSU
Lecture: 1.5 hours / Lab: 4.5 hours

This course includes instruction in advanced computer assisted estimating techniques. Students will learn to make design projects with emphasis on material applications, structural design, framing lumber, concrete reinforcement, producing a cost break down and bidding procedures.

Student Learning Outcome(s):
- Students will prepare complete cost estimates using software, including cost of materials and labor from outside sources.

CRPNTRY 150 INTRODUCTION TO CNC WOODWORKING
MACHINING AND PROGRAMMING (3)
Lecture: 1.5 hours / Lab: 4.5 hours

This course presents an introduction to the use of a CNC router. Topics include safety, feed speeds, spindle speeds, tooling, setups and programming to include related attachments and accessories for the machine.

Student Learning Outcome(s):
- Create a name plate with the CNC Router using MaterCam.

CRPNTRY 155 DIRECTED STUDY - CARPENTRY (1)
Lecture: 1 hour

This course allows students to pursue directed study in Carpentry on a contract basis under the direction of a supervising instructor. Students must be enrolled in at least one carpentry course to take this class.

Student Learning Outcome(s):
- 1. The outcome will vary depending on the contract with the instructor.
- 2. The student will formulate a project based on a topic in Carpentry and related topics.

CRPNTRY 240 BUILDING CONSTRUCTION SPECIALTIES (4)
Lecture: 2.5 hours / Lab: 4.5 hours

This course is a continuation of Basic Construction. Students will complete framing operations involving floor, wall, ceiling and roof construction. In addition, this course goes into greater depth in the areas of rough in for the preparation of electrical, plumbing, heating and ventilation.

Student Learning Outcome(s):
- Students will detail wall plates off architectural plans that includes layout for all holdowns, posts, windows, doors, channels, shear panels, studs and anchor bolts.

CRPNTRY 241 BLUEPRINT READING AND ESTIMATING (3)
Lecture: 3 hours

This course includes instruction in advanced computer assisted estimating techniques. Students will learn to make design projects with emphasis on material applications, structural design, framing lumber, concrete reinforcement, producing a cost break down and bidding procedures.

Student Learning Outcome(s):
- Students will prepare complete cost estimates using software, including cost of materials and labor from outside sources.
Students will learn blueprint reading through the process of estimation. Material take-offs, detail methods, labor calculations, profit, overhead and bid procedures will be examined.

Student Learning Outcome(s):
Prepare a takeoff estimate of materials using a set of architectural plans.

CRPNTRY 243 BUILDING ESTIMATING I (3) CSU
Lecture: 3 hours

This course introduces the process of construction estimation. Students will learn the estimation process of individual systems as well as the whole structure. Students complete building data sheets and materials price sheet. They will gain experience through a complete materials estimate of a structure.

Student Learning Outcome(s):
Prepare a takeoff estimate of materials using a set of architectural plans.

CRPNTRY 247 BUILDING ESTIMATING II (3)
Lecture: 3 hours

Students complete a comprehensive residential estimation project including materials, labor, overhead costs and expenses. Students perform materials take off using detailed and unit methods. Students estimate concrete and rebar requirements, lumber needs for floor, wall and roof construction as well as interior and exterior finishing materials. Labor costs are also calculated for common construction jobs. At the end of the course students will complete a comprehensive estimate for a residential construction project.

Student Learning Outcome(s):
Prepare a takeoff estimate of materials using a set of architectural plans.

CRPNTRY 251 BUILDING CODES I: INTERNATIONAL RESIDENTIAL CODE (IRC) (3) CSU
Lecture: 3 hours

This class will examine the most current version of the International Residential Code. Topics will include administration and planning, and the structure, logic and layout of the code. It will then take up relevant code sections for all phases of residential construction. Namely, foundation, floor, wall, roofing, electrical, plumbing and mechanical, lighting distribution and fixtures, appliance installation and swimming pools. Study materials will be aligned with the most current ICC publications.

Student Learning Outcome(s):
Student will provide the code section and installation locations for smoke detectors.

CRPNTRY 252 BUILDING CODES II: INTERNATIONAL RESIDENTIAL CODE (IRC) (3) CSU
Lecture: 3 hours

This course provides the most updated international building codes. Topics to be covered are Administration, Use and Occupancy Classifications, types of Construction, General Heights and Areas, Fire and Smoke Protection features and Systems, Means of Egress, Accessibility, Detailed Occupancy Requirements, Exterior Wall Coverings, Roofs, and Foundations, Special Inspections, Concrete, Masonry and Wood, Interior Finishes, Interior Environment, Gypsum Board, Elevators, and Glazing.

Student Learning Outcome(s):
Student will provide code sections for Means of Egress code provisions.

CRPNTRY 285 DIRECTED STUDY - CARPENTRY (2)
Lecture: 2 hours

This course allows students to pursue directed study in Carpentry on a contract basis under the direction of a supervising instructor. Students must be enrolled in at least one Carpentry course to take this class.

Student Learning Outcome(s):
1. The outcome will vary depending on the contract with the instructor.
2. The student will formulate a project based on a topic in Carpentry and related topics.

CRPNTRY 385 DIRECTED STUDY - CARPENTRY (3)
Lecture: 3 hours

This course allows students to pursue directed study in Carpentry on a contract basis under the direction of a supervising instructor. Students must be enrolled in at least one Carpentry course to take this class.

Student Learning Outcome(s):
1. The outcome will vary depending on the contract with the instructor.
2. The student will formulate a project based on a topic in Carpentry and related topics.

CRPNTRY 941 COOPERATIVE EDUCATION - CARPENTRY (4)
CSU RPT 3
Lecture: 4 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):
1. The student will develop at least three learning objectives to be accomplished on the job. 2. The objectives will be related to the educational/occupational goals of the student.

CHEMICAL TECHNOLOGY
CHEM T 111  
**APPLIED CHEMISTRY I (5) CSU**

*Lecture: 3 hours / Lab: 6 hours*

This course is dedicated to students majoring specifically in chemical, process plant, bio-manufacturing and biotechnology career options. Students will study the principles and concepts of chemistry and laboratory techniques including an introduction to physical methods of analysis involving the use of separation, equipment and instrumental methods used in the chemical, process plant and biotechnology industries.

**Student Learning Outcome(s):**

1. Students will identify chemical, process plant, bio-manufacturing industry skills/concepts and safety requirements 2. Students will perform dimensional analysis, density and temperature calculations 3. Students will identify physical and chemical properties and changes.

CHEM T 113  
**APPLIED CHEMISTRY MATHEMATICS I (2)**

*Lecture: 2 hours*

This course will offer basic applications from mathematical operations to problem-solving strategies in the chemical industry required of chemical technicains working in the chemical industry.

**Student Learning Outcome(s):**

1. Student will apply basic mathematical skills to solve chemical laboratory technology problems. 2. Students will evaluate and determine the correct calculation(s) for a given mathematical problem 3. Student will calculate mathematical problems providing the correct significant figures as a result.

CHEM T 121  
**APPLIED CHEMISTRY II (5) CSU**

*Lecture: 3 hours / Lab: 6 hours*

This course covers the principles as applied to aqueous solutions, energy and chemical reactions, modern atomic theory, chemical bonding, gases, chemical equilibrium, acids and bases, nuclear chemistry, and introduction to organic chemistry. Laboratory studies include qualitative and quantitative analysis of common anions and cations and introduction to instrumental analysis. The skills learned will be those required for employment in the waste water treatment, chemical, process operations, biotechnology and bio-manufacturing career options.

**Student Learning Outcome(s):**

1. Students will demonstrate knowledge of chemical behavior in quantum theory. 2. Student will demonstrate knowledge of principle energy levels. 3. Student will demonstrate knowledge wavelengths and frequency concepts.

CHEM T 123  
**APPLIED CHEMISTRY MATHEMATICS II (2)**

*Lecture: 2 hours*

This course covers further applications of mathematical techniques in chemical technology including techniques used in chemistry, physics and technical mathematics. The emphasis includes further topics in units, concentration, graphs, equilibrium, thermodynamics, and oxidation-reduction and industry related methods.

**Student Learning Outcome(s):**

1. Student will discuss and explain the concept of average mass and explore how counting can be done by weighing. 2. Student will discuss and calculate solution preparation problems molarity and standard deviation. 3. Student will explain and calculate pH and pOH.

CHEM T 131  
**INDUSTRIAL PROCESSES (3)**

*Lecture: 1 hour / Lab: 6 hours*

Instruction is given in the fundamental theories of chemical and physical processes used in various manufacturing industries. Also, instruction is given in operation of equipment including the introduction of concepts of quality control validation as it relates to manufacturing in regulated industries.

**Student Learning Outcome(s):**

1. Apply GLP and GMP techniques Perform the synthesis of lab samples. 2. Analyze unknown lab samples. 3. Perform and evaluate all lab procedures in a final team project. 4. Apply computer applications necessary for data acquisitions.

CHEM T 132  
**QUANTITATIVE AND INSTRUMENTAL ANALYSIS I CSU**

*Lecture: 2 hours / Lab: 6 hours*

This course is dedicated to the study of principles and concepts of Quantitative and Instrumental methods of analysis including techniques such as, Gas Chromatography, Infrared Chromatography, Atomic Absorption and others are offered.

**Student Learning Outcome(s):**

1. Apply Good Lab Practices (GLP) and Good Manufacturing Practices (GMP) and techniques. 2. Perform the synthesis of lab samples. 3. Analyze unknown lab samples.

CHEM T 133  
**ORGANIC CHEMISTRY I (4) CSU**

*Lecture: 3 hours / Lab: 6 hours*

This course includes systematic study of hydrocarbons including nomenclature, physical and chemical properties, occurrences, synthesis, and reactions of alkanes, alkenes, and alkynes. Laboratory studies include distillations, liquid-liquid extractions, and chromatographic techniques and IR spectroscopy.

**Student Learning Outcome(s):**

The student will be able to recognise and name aliphatic hydrocarbons applying the IUPAC nomenclature rules.

CHEM T 140  
**MICROBIOLOGY LABORATORY TECHNIQUES FOR TECHNICIANS (1)**

*Lab: 3 hours*

This course studies techniques and procedures used regularly in microbiology laboratories. It includes laboratory safety and aseptic techniques, media preparation, handling and maintaining cultures and the use and care of lab equipment, especially microscopes. The course is designed specifically for chemical, process and biomanufacturing technicians.

**Student Learning Outcome(s):**

1. Demonstrate knowledge of lab safety techniques and standards and use them appropriately in the laboratory. 2. Isolate and transfer pure cultures of bacteria under aseptic conditions. 3. Demonstrate knowledge of bacteria and fungi commonly found in microbiology laboratories. 4. Prepare and observe under brightfield microscope stained bacterial smear. 5. Determine bacterial population density using standard plate count and turbidimetric techniques. 6. Prepare different types of liquid and solid culture media. 7. Prepare and properly store stock bacterial cultures. 8. Evaluate effects of physical and chemical agents on microbial growth. 9. Identify the scientific name of an unknown pure cultures of microbe using standard microbiological techniques.
**CHEM T 141**  
**BASIC EMPLOYMENT INFORMATION (1)**  
*Lecture: 1 hour*

Instruction covers safety precautions, professional ethics, health habits, responsibilities to the customer and management, personal appearance, employment trends and professional organizations. The course also includes writing resources and cover letters, and job search techniques.

**Student Learning Outcome(s):**

1. Student will compose a resume using current employment formats. 2. Student will construct a cover letter and thank you note. 3. Student will demonstrate the ability successfully interview for an employment opportunity. 4. Student will create and present power point presentations covering employment criteria.

**CHEM T 142**  
**QUANTITATIVE AND INSTRUMENTAL ANALYSIS II (5)**  
*Lecture: 3 hours / Lab: 6 hours*

This course is a continuation of Quantitative and Instrumental Analysis I. It is an advanced course covering the theory and application of modern instrumentation and techniques for the analysis of chemical systems such as fuels, waste water, food and beverages, pharmaceuticals, metal etc. It also includes interpretable spectroscopy and computer-assigned experimentations.

**Student Learning Outcome(s):**

1. Apply GLP and techniques. 2. Perform the synthesis of lab samples. 3. Analyze unknown lab samples. 4. Evaluate basic flowcharts in instrumentation. 5. Evaluate and quantify the sample composition and concentration.

**CHEM T 143**  
**ORGANIC CHEMISTRY II (4) CSU**  
*Lecture: 2 hours / Lab: 6 hours*

This course addresses IUPAC nomenclature, physical and chemical properties, occurrences, reaction, and industrial applications of aldehydes and ketones, alcohols, ethers including cyclic and crown ethers, aromatic compounds, esters, amino acids, peptides, proteins, carbohydrates synthetic and natural polymers, polarimetry, IR, UV/ VIS, NMR spectroscopy, and mass spectrometry.

**Student Learning Outcome(s):**

The student will be able to elucidate the structure of complex organic molecules by analyzing and interpreting the nmr spectrum of such compounds.

**CHEM T 161**  
**SPECIAL PROJECTS I (1)**  
*Lab: 3 hours*

This course addresses the principles and instrumentation of gas chromatography (GC) with particular reference to Shimadzu GC-8A gas chromatograph.

**Student Learning Outcome(s):**

The student will be able to perform distillation analysis of ethyl acetate and n-butyl acetate mixture using the GC-8A gas chromatograph.

**CHEM T 168**  
**CHEMICAL QUALITY CONTROL I (2)**  
*Lab: 6 hours*

This course provides Introduction to quantitative and qualitative analysis of common anions and cations in aqueous solution.

**Student Learning Outcome(s):**

The student will be able to assign oxidation states to individual atoms in molecules and ions and balance redox equations under acidic and basic conditions.

---

**CHEMISTRY**

**CHEM 051 FUNDAMENTALS OF CHEMISTRY I (5) UC/CSU**  
*Lecture: 4 hours / Lab: 3 hours*

**Prerequisite:** Mathematics 114 or Mathematics 115.

This course with laboratory emphasizes the principles of inorganic chemistry and introduces elementary organic chemistry. It is planned primarily for health science majors, as a preparatory course for higher-level chemistry courses, and for non-science majors requiring a one-semester course with laboratory. High school students may obtain both: high school and college credit for this course. UC/CSU systems limit Chem 51/ Chem 65 credit to one course.

**Student Learning Outcome(s):**

1. Students will apply basic chemistry concepts to solve problems using the scientific method: a) Categorize matter according to its physical state and according to its chemical composition b) Describe the atom in terms of subatomic particles and their properties c) Name inorganic compounds d) Classify, balance and perform calculations with chemical reactions e) Explain properties of matter in terms of electron configurations f) Calculate concentration of solutions g) Solve acid-base, redox, and radioactivity problems h) Recognize simple organic compounds 2. Students will perform quantitative experiments and relate experimental data to concepts learned in class.

**CHEM 070 INTRODUCTORY ORGANIC AND BIOCHEMISTRY (4) UC/CSU**  
*Lecture: 3 hours / Lab: 3 hours*

**Prerequisite:** Chemistry 51 or Chemistry 65 or Chemistry 101.

This course studies the structure, physical properties and nomenclature of organic compounds and biomolecules. Simple chemical reactions are introduced. Students use physical and chemical properties of compounds to characterize them in the laboratory. It is strongly recommended to take this course before taking chemistry 211. This course provides credit towards the Associate of Sciences degree in Chemistry.

**Student Learning Outcome(s):**

1. Students are able to name small organic compounds; alkanes, alkenes, aromatics, alkenes, aldehydes, ketones, carboxylic acids, esters, amides and amines. 2. Students will describe the structure and chemistry of small organic compounds. 3. Students will classify constitutional and optical stereoisomers. 4. Students will describe and identify the physical and chemical properties of carbohydrates, lipids, proteins and nucleic acids. 5. Students will use the physical and chemical properties of compounds to characterize them in the laboratory.
CHEM 101 GENERAL CHEMISTRY I (5) UC/CSU
Lecture: 3 hours / Lab: 6 hours

Prerequisite: Mathematics 125

In lectures students learn nomenclature, atomic structure, quantum theory, bonding theories and molecular geometry, chemical equations, stoichiometry, thermochromy, solid, liquid and gaseous states and related forces, gas laws, solutions and colloidal properties, periodic relationships, and acid base theories. Laboratory exercises are quantitative in nature and are related to the lecture topics. This is the first semester of a one-year course in chemistry intended for majors in the natural sciences (chemistry, biochemistry, biology, physics, pre-medicine), mathematics, and engineering.

Student Learning Outcome(s):

1. Students will apply fundamental principles of chemistry to identify problems, propose solutions and demonstrate concepts. a) Students will use the scientific method to solve problems using the proper units, precision and significant figures. b) Interpret the law of conservation of mass c) Calculate molar mass of compounds and molality of solutions d) Analyze atomic theory, subatomic particles and isotopes e) Translate a word equation into a chemical equation, balance it and use it for stoichiometric calculations. f) Analyze precipitation, acid base, oxidation-reduction reactions g) Illustrate kinetic theory of ideal gases h) Analyze the units of energy and express a thermochemical equation i) Illustrate the concept of enthalpy and enthalpy change j) Use quantum numbers to define electrons. k) Illustrate the building up principle with the periodic table relating periodic properties to electron configuration. l) Describe ionic and covalent bonds m) Use Lewis formulas to illustrate the concepts of resonance, the octet rule and formal charge n) Express concentration and relate their properties to intermolecular forces. p) Express concentration and relate their properties to intermolecular forces. q) Describe phase diagrams and properties of the solid, liquid and gaseous states of matter and relate their properties to intermolecular forces. r) Express concentration and analyze colligative properties of solutions. 2. Students will perform experiments and draw conclusions form experimental data.

CHEM 102 GENERAL CHEMISTRY II (5) UC/CSU
Lecture: 3 hours / Lab: 6 hours

Prerequisite: Chemistry 101;

In lectures students receive the theory and application of chemical kinetics, general and aqueous equilibria, thermodynamics, electrochemistry, nuclear chemistry, descriptive chemistry, structure and bonding in transition metal complexes and carbon compounds. In the laboratory students put into practice what is learned in lecture to experiments in reaction kinetics, chemical qualitative analysis, chemical and spectroscopic quantitative analysis, titration techniques, and electrochemistry.

Student Learning Outcome(s):

1. Students will describe kinetic, equilibrium and redox concepts for inorganic reactions and apply radioactive principles a) Relate rates of reactions to mechanisms a) Evaluate rates of reactions and their dependence on concentration and temperature b) Illustrate and evaluate dynamic equilibrium and effect of catalysts the effect of catalysis c) Interpret the Arrhenius, Brønsted-Lowry and Lewis concepts of acids and bases, analyze relative strengths of acids and base and relationship of molecular structure to acid strength d) Define and determine the pH of solutions d) Describe and analyze acid base equilibria e) Assess the properties of salt solution and buffer solutions and perform acid base titrations f) Define the solubility product Ksp and apply it to calculate solubility of compounds g) State the first, second and third laws of thermodynamics and perform calculations for phase transitions and chemical changes h) Relate free energy to equilibrium constants and temperature i) Balance redox reactions and illustrate their applications. j) Define redox reactions, formulate nuclear equations and evaluate nuclear stability k) Identify, describe and interpret the properties of main-group elements, transition elements and coordination compounds. 2. Students will perform experiments to illustrate these concepts following safety practices in the laboratory.

CHEM 185 DIRECTED STUDY - CHEMISTRY (1) CSU
Lecture: 1 hour

This course allows students to pursue directed study in Chemistry on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):

The student will formulate a research project based on a specific chemistry topic, interpret the current chemical research literature on that topic and write a report about it.

CHEM 211 ORGANIC CHEMISTRY FOR SCIENCE MAJORS I (5) UC/CSU
Lecture: 3 hours / Lab: 6 hours

Prerequisite: Chemistry 102.

This is the first part of a two-course sequence presenting the structure, equilibrium, nomenclature including conformational analysis, potential energy plots, hybridization, stereochemistry, preparation and mechanisms of reactions of aliphatic hydrocarbons and related functionalities. A mechanistic approach to reactions and a focus on multi-step synthesis is emphasized throughout the course. The laboratory presents the techniques of preparation, isolation, and analysis of organic compounds employing standard and modern instrumental methods.

Student Learning Outcome(s):

1. Students will describe structure dynamics and equilibrium of organic compounds i.e Hydrocarbons, haloalkanes, alcohols, thiols, ethers, sulfides and epoxides a) Describe bonding and structure of functional groups in organic compounds. b) Name them according to the IUPAC system. c) Relate their physical properties to structure. d) Inspect conformations of alkanes and cycloalkanes. e) Describe chirality, optical activity and inspect properties of stereoisomers. f) Evaluate acidity of organic compounds and illustrate the thermochemistry of acid-base reactions. g) Describe preparation and reactions of organic compounds including mechanisms, reaction intermediates and potential energy diagrams. h) Employ multi-step organic synthesis and retrosynthesis to produce the functional groups learned in class 2. Students will employ modern synthetic and chromatographic techniques to characterize organic synthesis.

CHEM 212 ORGANIC CHEMISTRY FOR SCIENCE MAJORS II (5) UC/CSU
Lecture: 3 hours / Lab: 6 hours

Prerequisite: Chemistry 211;

Continuing studies of organic molecules started in chemistry 211 with emphasis on carbonyl containing compounds, macromolecules and naturally occurring nitrogen and oxygen-containing compounds. Non-covalent interactions and catalyst. A mechanistic approach to reactions and a focus on multi-step synthesis is emphasized throughout the course. This course is part of the transfer sequence for careers in the physical, biological, and health sciences and a requirement for the Associate of Sciences degree in Chemistry.

Student Learning Outcome(s):

1. Students will describe structure dynamics and equilibrium of organic compounds; organolithium, organomagnesium compounds, diorganocopper reagent, carbenes, carbenoids, aldehydes, ketones, carboxylic acids, derivatives of carbonylic acids, dinenes, amines and benzene as well as other aromatic compounds. a) Describe bonding and structure of the functional groups in organic compounds. b) Name according to the IUPAC system. c) Relate physical properties to structure and inspect chirality. d) Apply...
spectroscopic techniques to characterize organic compounds. e) Describe preparation and reactions of organic compounds including mechanisms, reaction intermediates and potential energy diagrams. f) Examine stability of organic compounds. g) Employ multi-step organic synthesis and retrosynthesis to produce the functional groups learned in class 2. Students will employ modern synthetic, chromatographic and spectroscopic techniques to prepare and characterize them. 3. Students will perform multi-step synthesis and draw conclusions from experimental data.

**CHEM 221 BIOCHEMISTRY FOR SCIENCE MAJORS (5) UC/CSU**

Lecture: 3 hours / Lab: 6 hours

Prerequisite: Chemistry 211;

This course introduces structure, thermodynamics and metabolism of biologically important molecules. Students use modern techniques for purification, structure and function characterization including chromatography, gel electrophoresis, spectroscopy and molecular modeling. This course is part of the transfer sequence for careers in the physical biological and health sciences and a requirement for the Associate of Sciences degree in Chemistry: Concentration biochemistry.

Student Learning Outcome(s):

1. Describe how atoms and molecules in living cells function and interact chemically. a) Describe the relationship of thermodynamics to living systems. b) Analyze acid base titration curves and describe buffer systems. c) Interpret characteristics of amino acids in terms of structure. d) Assess how the structure of proteins determine their function. e) Describe methods of protein isolation and characterization. f) Illustrate the differences between kinetic and thermodynamic aspects of reactions. g) Employ enzyme kinetic data to determine competitive or noncompetitive inhibition. h) Discuss how allosteric enzymes are regulated. i) Differentiate between the concerted and sequential models for allosteric enzymes. j) Relate events at the active site to reaction mechanisms. k) Identify and distinguish between primary structure, secondary structure, tertiary structure, and the quaternary structure of proteins. l) Describe lipids and related molecules to illustrate models of membrane structure and their function. m) Describe levels of structure in nucleic acids and the flow of genetic information in the cell. n) Describe the techniques used in nucleic acid research. o) Discuss ways to study DNA-protein interactions and use bioinformatics to study genomics and proteomics. p) Assess the thermodynamics of metabolism. q) Describe the overall pathway of glycolysis and the production of energy. r) Explain the formation and break down of glycogen and the production of glucose from pyruvate. s) Explain the regulation of the pentose phosphate pathway. t) Assess the role of the citric acid cycle and electron transport in the production of energy. u) Students will use techniques for the purification, characterization, structure determination and function of biomolecules.

**CHEM 285 DIRECTED STUDY - CHEMISTRY (2) CSU**

Lecture: 2 hours

This course allows students to pursue directed study in Chemistry on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):

The student will formulate a research project based on a specific chemistry topic, interpret the current chemical research literature on that topic and write a report about it.

**CHEM 385 DIRECTED STUDY - CHEMISTRY (3) CSU**

Lecture: 3 hours

This course allows students to pursue directed study in Chemistry on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):

The student will formulate a research project based on a specific chemistry topic, interpret the current chemical research literature on that topic and write a report about it.

**CHILD DEVELOPMENT**

**CH DEV 001 CHILD GROWTH AND DEVELOPMENT (3) UC/CSU**

Lecture: 3 hours

Advisory: English 28.

This course examines the major physical, psychosocial, and cognitive language developmental milestones for children, both typical and atypical, from conception through adolescence. There will be an emphasis on interactions between maturational processes and environmental factors. While studying developmental theory and investigative research methodologies, students will observe children, evaluate individual differences and analyze characteristics of development at various stages.

Student Learning Outcome(s):

1. Describe development of children from conception through adolescence in the physical, social, emotional, and cognitive domains. 2. Identify cultural, economic, political, historical contexts that impact children’s development. 3. Apply knowledge of development and major theoretical frameworks to child observations.

**CH DEV 002 EARLY CHILDHOOD: PRINCIPLES AND PRACTICES (3) CSU**

Lecture: 3 hours

TB clearance required. Prerequisite: Child Development 1.

An examination of the underlying theoretical principles of developmentally appropriate practices applied to programs, environments, emphasizing the key role of relationships, constructive adult-child interactions, and teaching strategies in supporting physical, social, creative and intellectual development for all children. This course includes a review of the historical roots of early childhood programs and the evolution of the professional practices promoting advocacy, ethics and professional identity.

Student Learning Outcome(s):

Upon completion of this course students will be able to: 1. Compare and contrast historical and current early childhood education perspectives, theories, and program types and philosophies. 2. Describe the role of the early childhood educator, including ethical conduct, and professional pathways. 3. Identify quality in early childhood programs related to environment, curriculum, and teaching strategies.

**CH DEV 007 INTRODUCTION TO CURRICULUM IN EARLY CHILDHOOD EDUCATION (3) CSU**

Lecture: 3 hours

Prerequisites: Child Development 1; Child Development 2.

This course presents an overview of knowledge and skills related to providing appropriate curriculum and environments for young children from birth to age 6. Students will examine a teacher’s role in supporting development and engagement for all young children. This course provides strategies for developmentally-appropriate practice based on observation and assessments across the curriculum, including 1) academic content areas, 2) play, art, and creativity, and 3) development of social-emotional, communication, and cognitive skills.
CH DEV 008  CURRICULUM IN EARLY CHILDHOOD EDUCATION (3) CSU
Lecture: 3 hours
Prerequisite: Child Development 1; Child Development 2 and Child Development 7.

Students design and evaluate developmentally appropriate curriculum for young children from birth to age 8. Based on the value of play, students demonstrate the teacher’s role in applying theory to practice in supporting children’s concept development. Preparing and assessing the implementation of curriculum will include but not be limited to: language and literacy, social studies, art and creativity, music and rhythm, perceptual motor development, mathematics, natural and physical sciences.

Student Learning Outcome(s):
Demonstrate and design the active implementation of an integrated curriculum.

CH DEV 010  HEALTH, SAFETY AND NUTRITION (3) CSU
Lecture: 3 hours
Advisory: English 21.

Students are required to participate in and pass the American Red Cross Infant/Child CPR and First Aid Course.

This course introduces the laws, regulations, standards, policies and procedures and early childhood curriculum related to child health, safety, and nutrition. The key components that ensure physical health, mental health and safety for both children and staff will be identified along with the importance of collaboration with families and health professionals. This course also focuses on integrating the concepts into everyday planning and program development for all children. Students are required to participate in and pass the American Red Cross Infant/Child CPR and First Aid course.

Student Learning Outcome(s):
Upon Completion of the Course students will be able to: 1. Differentiate between various curriculum models, approaches, environments, and standards for early learning including indicators of quality. 2. Identify the teacher’s role in early childhood programs, including planning, implementing and evaluating activities and environments. 3. Select and apply developmentally appropriate teaching strategies and theories to curriculum and environment design.

CH DEV 022  PRACTICUM IN CHILD DEVELOPMENT I (4) CSU
Lecture: 2 hours / Lab: 6 hours
Prerequisite: Child Development 1; Child Development 2 and Child Development 7 and Child Development 8; Child Development 11.

Students are required to complete 108 hours at an approved field site. Must be available between 8:00 a.m. and noon.

In this course the student will practice and demonstrate developmentally appropriate early childhood program planning and teaching competencies under the supervision of ECE/CD faculty and other qualified early education professionals. Students will utilize practical classroom experiences to make connections between theory and practice, develop professional behaviors, and build a comprehensive understanding of children and families. Child centered, play-oriented approaches to teaching, learning, and assessment; and knowledge of curriculum content areas will be emphasized as student teachers design, implement and evaluate experiences that promote positive development and learning for all young children.

Student Learning Outcome(s):
Upon completion of this course students will be able to: 1. Differentiate socialization of the child focusing on the interrelationship of family, school, and community. 2. Identify the educational, political and socioeconomic impacts on children and families. 3. Describe strategies that empower families and encourage family involvement in children’s development.

CH DEV 023  PRACTICUM IN CHILD DEVELOPMENT II (4) CSU
Lecture: 2 hours / Lab: 6 hours
Prerequisite: Child Development 22. Students are required to complete 108 hours at an approved field site. Must be available between 8:00 a.m. and noon.

This course provides an advanced practicum experience. Students apply assessment strategies to plan, implement, and evaluate developmentally appropriate activities. Techniques that promote partnerships between teachers and families are developed. Educational philosophy statement, a resume and a professional portfolio are created. State law requires a TB test (Mantoux Test) or chest x-ray. In addition to the seminar class, students are required to complete a minimum of 90 hours at an APPROVED field site.

Student Learning Outcome(s):
1. Design, implement and evaluate curriculum activities based on observation and assessment of young children. 2. Apply a wide array of effective approaches, strategies and tools in developing relationships with children and colleagues. 3. Evaluate how teachers involve families in their children’s development and learning. Critically assess one’s own teaching experiences to guide and inform practice.
Graduation Requirements and Educational Programs

CH DEV 030  INFANT AND TODDLER STUDIES I (3) CSU
Lecture: 3 hours
Prerequisite: Child Development 1.

This course provides an in-depth study of cognitive/language, social/emotional and perceptual/motor developmental domains and milestones of infants from birth to 36 months. As well as, an overview of major theories including attachment, brain development, the value of play, early intervention and relationship-based care in the context of family systems: culture, home language, and traditions. Students will be introduced to the laws and regulations of safe healthy environments and the rights of all infants and toddlers including children at-risk for disabilities. Class instruction includes objective observations of infants and toddlers in diverse settings.

Student Learning Outcome(s):
- Recognize major developmental milestones in infants and toddlers and explain the stages and characteristics of infants/toddlers' physical, cognitive and social and emotional development.

CH DEV 031  INFANT AND TODDLER STUDIES II (3) CSU
Lecture: 3 hours
Prerequisite: Child Development 1 and Child Development 30.

This course implements the principles of inclusive, respectful care-giving for infants and toddlers within a variety of program designs, routines and schedules. Topics cover typical and atypical development, principles of early intervention, design, implementation and assessment of developmentally appropriate curriculum and environment; health, safety and licensing issues. Coursework includes documentation of learning through observation, guidance towards self-regulation, family communications and community resources. Current research within the context of home language, culture and traditions will be addressed.

Student Learning Outcome(s):
- Students will evaluate principles of respectful care focusing on routines and schedules.

CH DEV 034  OBSERVING AND RECORDING CHILDREN'S BEHAVIOR (3) CSU
Lecture: 3 hours
Prerequisite: Child Development 1.

This course focuses on the appropriate use of a variety of assessment and observation strategies to document child development, growth, behaviors, play and learning, and to join with families and professionals in promoting children’s success. Recording strategies, rating systems, portfolios, and multiple assessment tools are explored. Child observations will be conducted and analyzed.

Student Learning Outcome(s):
- Upon completion of this course students will be able to: 1. Evaluate the characteristics, strengths, limitations, and applications of contemporary observation and assessment tools. 2. Complete systematic observations and assessment using a variety of methods of data collection to inform environment design, interactions and curriculum. 3. Discuss the role of partnership with families and other professionals in utilizing interpretations of observational assessment data.

CH DEV 038  ADMINISTRATION & SUPERVISION OF EARLY CHILDHOOD PROGRAMS I (3) CSU
Lecture: 3 hours
Prerequisites: Child Development 1; Child Development 2; Child Development 10; Child Development 11.

This course examines administrative principles and practices for Early Childhood Programs. Topics covered include: licensing regulations, leadership skills, budget preparation and analysis, personnel management, parent involvement programs and community resources. Professionalism and quality standard are emphasized. Partially fulfills licensing requirement for the director.

Student Learning Outcome(s):
- Students will incorporate licensing guidelines to design an early childhood space that meets the needs of children, staff members and parents within a reasonable budget.

CH DEV 039  ADMINISTRATION & SUPERVISION OF EARLY CHILDHOOD PROGRAMS II (3) CSU
Lecture: 3 hours
Prerequisite: Child Development 38.

This course provides training for administrators of Early Childhood Programs on a variety of topics pertaining to administration of early childhood programs. Topics include: state and federal regulations, computer applications for administration, grant and proposal development, advocacy, leadership skills and team management techniques, developing a comprehensive parent partnership, working with Desired Results, and legal issues. This course partially fulfills the licensing requirement for the director.

Student Learning Outcome(s):
- 1. Student will analyze his/her own administrative style and utilize management strategies that match individual’s leadership style, evaluate his/her own ability and develop a timeline for a personal and professional development plan. 2. Formulate strategies to create a positive climate and motivate the staff.

CH DEV 042  TEACHING IN A DIVERSE SOCIETY (3) CSU
Lecture: 3 hours

This course will examine the development of social identities in diverse societies including theoretical and practical implications affecting young children, families, programs, teaching, education and schooling. Various classroom strategies will be explored emphasizing culturally relevant and linguistically appropriate anti-bias approaches supporting all children in becoming competent members of a diverse society. Course also involves self-reflection of one’s own understanding of educational principles in integrating anti-gaols in order to better inform teaching practices and/or program development.

Student Learning Outcome(s):
- Upon completion of this course students will be able to: 1. Examine the impact of various societal influences on the development of children’s social identity. 2. Evaluate the ways that developmentally appropriate, inclusive and anti-bias approaches support learning and development. 3. Evaluate the influence of teachers’ experiences on teaching approaches and interactions with children and families.
CH DEV 044 EARLY INTERVENTION FOR CHILDREN WITH SPECIAL NEEDS (3) CSU
Lecture: 3 hours
Prerequisite: Child Development 1 & 30

This course is designed for students interested in specializing in or working with young children with special needs and their families. Instructional strategies and curriculum are designed to meet the needs of differently able children from birth through preschool.

Student Learning Outcome(s):
Students will recognize the needs of a family with a young exceptional child and propose an intervention approach that is appropriate for their needs.

CH DEV 045 PROGRAMS FOR CHILDREN WITH SPECIAL NEEDS (3) CSU
Lecture: 3 hours
Prerequisite: Child Development 1, 2, & 44.

This course is an overview of programs providing special education services for children with special needs focusing on preschool through school age. It will include a study of various programs, legislation, characteristics of exceptionalities and educational implications. Observation in schools will be required.

Student Learning Outcome(s):
Students will assess characteristics of a quality special education class/program and services necessary for children with special needs.

CH DEV 046 SCHOOL AGE PROGRAMS I (3) CSU
Lecture: 3 hours
Prerequisite: Child Development 1.

The students will be introduced to the care of school age children. This course is designed for those currently working, or planning to work in before and after school child care. Students will develop age-appropriate curriculum, learn how to support the family and make use of community resources.

Student Learning Outcome(s):
1. Students will compare diverse models of school age care to assess how programs meet the needs of school age children. 2. They will apply their understanding of developmental needs by preparing curriculum activities to support children’s growth and development.

CH DEV 047 SCHOOL AGE PROGRAMS II (3) CSU
Lecture: 3 hours
Prerequisite: Child Development 46.

Introduction to before and after school age programs. Topics covered are guidance of child behavior, the child in context of the family, community and administration of programs. Hiring and supervision of staff, working with parents and marketing and advertising the school age program will be also covered.

CH DEV 057 CHILDREN ETHNIC IDENTITY DEVELOPMENT AND AWARENESS (3) CSU
Lecture: 3 hours
Prerequisite: Child Development 1.

This course explores children’s ethnic identity developmental process and their awareness of identity issues. Students will examine ethnic identity developmental stages, the impact of culture, ethnic traditions, values and beliefs on children, and the challenges of identity formation process that children encounter within multiple social and cultural contexts. Culturally sensitive assessment methods and intervention programs to support families from diverse backgrounds will also be discussed.

Student Learning Outcome(s):
1. Compare and contrast various theoretical frameworks that relate to the study of identity formation. 2. Apply various culturally sensitive strategies to teaching experiences.

CH DEV 065 ADULT SUPERVISION/EARLY CHILDHOOD MENTORING (2) CSU
Lecture: 2 hours
Corequisite: Child Development 23 or Child Development 39.

The class focuses on the principles and practices of supervision and evaluation of staff in Early Childhood Programs. Emphasis is placed on the role of experienced teachers who mentor or supervise new teachers and student teachers. This meets supervision requirement for the Child Development Permit.

Student Learning Outcome(s):
Students will be able to demonstrate ability to evaluate a preschool classroom based on developmentally appropriate guidelines and to facilitate positive interaction between adults in the classroom environment.

CH DEV 941 COOPERATIVE EDUCATION - CHILD DEVELOPMENT (4) CSU RPT 3
Lecture: 4 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):
1. The student will develop at least three learning objectives to be accomplished on the job. 2. The objectives will be related to the educational/occupational goals of the student.
COMMUNICATION STUDIES

COMM 101 PUBLIC SPEAKING (3) UC/CSU
Lecture: 3 hours

This introductory speech course emphasizes techniques of public speaking including writing and delivery of speeches to inform and persuade. Students refine critical thinking, research, organizational, and time management skills. They learn to adapt a message to any audience and occasion.

Student Learning Outcome(s):
1. Student will draft and deliver in front of a live audience and well-organized speech;
2. Student will deliver both informative and persuasive speeches;
3. Students will identify and evaluate evidence in support of claims used in both informative and persuasive speeches.

COMMUNITY PLANNING/ECONOMIC DEVELOPMENT

COMPLAN 001 INTRODUCTION TO COMMUNITY ECONOMIC DEVELOPMENT (3) CSU
Lecture: 3 hours

This course is an introduction to the theory, history, and practice of community development. The course covers: neighborhood development and community building strategies; land use and real estate development; and business and labor force development strategies used to revitalize urban neighborhoods. Students will produce a neighborhood plan using e-planning tools including: asset maps, a housing plan and a workforce development plan. The course is also offered as three modules that run concurrently with the full course.

Student Learning Outcome(s):
Students will create a neighborhood revitalization plan that will include a needs assessment, a community-engagement process and economic development strategy to increase jobs, income and assets.

COMPLAN 002 INTRODUCTION TO COMMUNITY ORGANIZING (3) CSU
Lecture: 3 hours

This course focuses on community organizing efforts by people working together to improve their neighborhoods and cities. The course prepares students to become professional organizers, community developers, and effective citizen leaders. The course explores the history, theory, and different approaches to grassroots community organizing. Students will analyze the current context for organizing, the impact of social change theories, organizing strategies, tools and new methodologies used in community organizing.

Student Learning Outcome(s):
Students will develop a community organizing plan to address critical conditions in a low income community.

COMPLAN 003 AFFORDABLE HOUSING DEVELOPMENT (3) CSU
Lecture: 3 hours

Develop real estate development skills needed to build multi-family affordable housing projects. Through project-based learning, you will recognize the stages of the development process; analyze the feasibility of a project, including neighborhood, site and financial analyses; and identify sources and uses of financing and project management, marketing and operations.

Student Learning Outcome(s):
Students will formulate an affordable housing plan targeting problems faced by low-income residents of the city.

COMPLAN 005 SECTOR DEVELOPMENT AND EMPLOYMENT STRATEGIES (3) CSU
Lecture: 3 hours

This course will focus on how a strong understanding of industry sectors can be linked to viable job creation and employment strategies. Particular attention will be devoted to sector initiatives and training programs in the greater Los Angeles region.

Student Learning Outcome(s):
Students will examine and evaluate a workforce development plan in the community economic development sector.

COMPLAN 006 MANAGING NON-PROFIT AND PUBLIC ORGANIZATIONS (3) CSU
Lecture: 3 hours

This course deals with the organizational opportunities and challenges faced by directors and managers of non-profit and public service organizations. Students will gain an understanding of the roles and accountabilities of non-profit directors and managers and learn to work effectively within such organizations by recognizing and applying knowledge about different governance structures and the functional domains common to most public benefit organizations including strategic and operational planning, fund development and community engagement.

Student Learning Outcome(s):
Students will create a non profit program plan to include: analysis of community resources, fundamental actions, multiple strategies in forming nonprofit programs.

COMPLAN 007 CONTEMPORARY ISSUES AND STRATEGIES IN POPULAR EDUCATION AND ORGANIZING (3) CSU
Lecture: 3 hours

This course will explore current issues of land use, housing, workers’ rights, environmental justice and the fight for jobs in Los Angeles by utilizing field research and direct interaction with local non-profit organizations working to make change in these sectors.

Student Learning Outcome(s):
Students will examine contemporary social justice issues and campaigns in order to formulate arguments to support the need for reform.
COMPLAN 009 COMMERCIAL REAL ESTATE DEVELOPMENT (3) CSU
Lecture: 3 hours
This course will teach students how to develop commercial real estate projects with a specific focus on retail and inner city development. The introductory course builds skills and competencies in land development, developing financing, marketing and leasing of small and mid-size commercial projects. Through case studies, simulations and project-based learning, students recognize development strategies and tools used by public, private and non-profit organizations.

Student Learning Outcome(s):
Students will assess the commercial real estate needs of a low-income community and develop a commercial development strategy designed to stimulate the local economy and physically revitalize a designed targeted community.

COMPLAN 010 COMPREHENSIVE COMMUNITY VIOLENCE PREVENTION (3) CSU
Lecture: 3 hours
The course provides students an overview of the larger issues of violence prevention and its impact on community development. The course prepares students for work in the field of community violence prevention.

Student Learning Outcome(s):
Students will create a community violence prevention plan to address the root causes of community violence through a community development lens.

COMPLAN 011 PROFESSIONAL DEVELOPMENT SKILLS/ISSUES IN COMMUNITY DEV (3) CSU
Lecture: 3 hours
Students will learn to identify and understand a variety of personal, professional development strategies, writing and communication skills and industry networks/language used by professionals in community development corporations, community-organizing networks and community-based non-profit organizations.

Student Learning Outcome(s):
Students will develop a professional development plan that supports their employment in the Community and Economic Development field.

COMPLAN 012 FUNDRAISING BASICS FOR NONPROFIT ORGANIZATIONS (1) CSU
Lecture: 1 hour
This course provides students with a basic understanding of fundraising and grant development concepts, strategies and tools applicable to non-profit organizations.

Student Learning Outcome(s):
Students will formulate a fund development plan that is tailored to the needs of an organization.

COMPLAN 015 INTRODUCTION TO THE COMMUNITY DEVELOPMENT INDUSTRY & CAREERS (1) CSU
Lecture: 1 hour
Learn about the field of community development by exploring historical and current trends. Explore the range and scope of organizations working in the field, leadership, issues, community served and approaches to community based solutions.

Student Learning Outcome(s):
Students will describe a career pathway in the community development through a career development plan.

COMPLAN 017 LEADERSHIP DEVELOPMENT AND SKILL BUILDING (3)
Lecture: 3 hours
In this course students will learn to define leadership models in which all members of society play pivotal roles in change. Students will demonstrate multicultural appreciation and have the confidence to see themselves as community change agents.

Student Learning Outcome(s):
Students will be able to develop a personal leadership development plan for their future.

COMPLAN 022 SOCIAL MEDIA, POWER AND CULTURE FOR COMMUNITY ORGANIZING AND CIVIC ENGAGEMENT (2) CSU
Lecture: 2 hours
This course will cover effective media strategies for community organizing campaigns, effective messaging that reflects the values of the community and an introduction to using media tools such as social media, self-generated radio and press events.

Student Learning Outcome(s):
Students will compose a communications strategy plan that utilizes digital and social media in a political or community organizing campaign.

COMPLAN 030 MARKET RESEARCH TOOLS FOR THE ECONOMIC DEVELOPMENT PROCESS (3) CSU
Lecture: 3 hours
This course is specifically designed for professionals in community economic development organizations that provide technical assistance to small businesses. This hands-on course will provide professionals with the tools needed to assess client needs and develop and implement effective market research and marketing plans for small businesses. This is a hybrid course, utilizing a combination of in-class and on-line/web-based instruction. The content of this course is geared towards individuals with 2-3 years of professional experience and whose organizations provide assistance to small businesses.

Student Learning Outcome(s):
Students will be able to develop a community engagement marketing plan for small businesses to reach the community.
COMPLAN 032 COMMUNITY BUILDING PRINCIPLES AND STRATEGIES (1) CSU
Lecture: 1 hour
This course provides students with a basic understanding of community building principles, strategies and tools for community and economic development.

Student Learning Outcome(s):
Students will be able to formulate a plan based on their understanding of Community Building principles, steps in the Community Building process, interpret community needs and assets, analyze social issues via multiple methods, apply social analysis to decision making methods to create a community building plan.

COMPLAN 033 COMMUNITY ENGAGEMENT PRINCIPLES AND STRATEGIES (1)
Lecture: 1 hour
This course provides students with a basic understanding of community engagement principles, strategies and tools for community and economic development.

Student Learning Outcome(s):
Students will be able to formulate a community engagement plan.

COMPLAN 035 HEALTH LEADERSHIP AND COMMUNITY DEVELOPMENT (3) CSU
Lecture: 3 hours
This course provides students with a basic understanding of the health disparities and conditions affecting low-income, inner-city communities and the leadership skills required to improve them.

Student Learning Outcome(s):
Students will be able to formulate a plan to improve public health systems that affect health determinants of low-income inner city neighborhoods.

COMPLAN 036 INTRODUCTION TO COMMUNITY BASED RESEARCH AND ORGANIZING METHODS (3) CSU
Lecture: 3 hours
This course provides students with a basic understanding of community-based research principles, tools and strategies. The course is taught in a training/workshop format where students will work in small groups to apply classroom lessons to investigate local community issues, such as transportation, environment and economic health. Topics covered include participatory action research theory and methodology, history of Los Angeles, mobility issues in urban settings, sources and impacts of pollution and income and wealth inequality.

Student Learning Outcome(s):
To conduct a participatory action research survey targeting a specific community.

COMPLAN 038 DEVELOPING SOCIAL NETWORKS FOR COMMUNITY BUILDING (1) CSU
Lecture: 1 hour
The course examines the value of developing social networks in the process of community building. The course examines strategies for collaboration, collective problem solving, identification of neighborhood assets and developing support mechanisms across sectors of development.

Student Learning Outcome(s):
Students will formulate a digital relationship building plan.

COMPLAN 040 NON-PROFIT PROGRAM DESIGN AND DEVELOPMENT (2) CSU
Lecture: 2 hours
This course guides students to design and develop non-profit programs that are highly integrated into a non-profit service organization’s mission, vision and values. Topics include identifying conditions, research and problem analysis, program goal development, outcome creation, implementation strategies and evaluation of impact.

Student Learning Outcome(s):
Students will be able to create a non-profit logic model to serve community serving programs targeting problems facing low-income residents.

COMPLAN 042 SUSTAINING SOCIAL JUSTICE CAMPAIGN VICTORIES AND ORGANIZATION (1)
Lecture: 1 hour
This course will introduce students to current models for sustaining a social justice organization including evaluating the non-profit, social entrepreneurship and self-help models to support community revitalization and empowerment.

Student Learning Outcome(s):
1. Identify and compare three different types of social movement organizational models. 2. Compare and contrast the opportunities, challenges and successes of these models. 3. Identify funding and sustainability opportunities for various organizations fitting the various models.

COMPLAN 065 COMMUNITY-BASED HEALTH POLICY ADVOCACY (3) CSU
Lecture: 3 hours
This course will provide a foundational basis for skills to engage the community in grassroots health promotion and policy advocacy.

Student Learning Outcome(s):
Students will formulate a Policy Analysis Memo that addresses a social determinant of health.
COMPLAN 100  HISTORY OF COMMUNITY DEVELOPMENT IN LOS ANGELES (2) CSU
Lecture: 2 hours

History of Community Development in Los Angeles explores the historic development of Los Angeles from the early settlements to the rise of industrialization, neighborhood development, demographic transitions and the intersection between race, class, politics and power.

Student Learning Outcome(s):
Students will compose an equity solution and plan that currently affects a Los Angeles neighborhood.

COMPLAN 101  HISTORY OF SOCIAL JUSTICE MOVEMENT THEORY, IDEOLOGY AND PRACTICE IN AMERICA (2) CSU
Lecture: 2 hours

The course provides students with a historical foundation of social movements based in the United States. Students will analyze the guiding principles and work of key organizations that have fought for justice along intersectional issues of race, class and gender and will apply theories to projects that seek to solve current day problems.

Student Learning Outcome(s):
Students will compose an equity solution that addresses a current social justice issue that incorporates equity building concepts.

COMPLAN 102  CULTIVATING CONSCIOUSNESS: REFLECTION OF THE SELF IN COMMUNITY AS AN ORGANIZER (1)
Lecture: 1 hour

Community organizers will explore issues of race, class and privilege and its impact on the self and communities. Students will learn skills and knowledge related to group dynamics, sustainability, self analysis and macro and micro issues related to the role of community organizers.

Student Learning Outcome(s):
Students will identify an indicator of racism and create a policy recommendation for addressing inequities in communities of color.

COMPLAN 106  ELECTIONS, COMMUNITY, POWER AND SYSTEMS REFORM IN COMMUNITY DEVELOPMENT (1)
Lecture: 1 hour

Students will learn about local and national efforts for elections and systems reform for social change including evaluating successful electoral campaigns

Student Learning Outcome(s):
1. Compare strengths and challenges in utilizing electoral and system reform campaigns especially in the state of California. 2. Analyze history of electoral campaigns and their impact on positive social change. 3. Identify key components of developing a successful movement-building electoral campaign.

COMPLAN 105  INTERNATIONAL MODELS OF COMMUNITY ORGANIZING (1)
Lecture: 1 hour

Students will learn about international models of community organizing and the connection between local and international issues.

Student Learning Outcome(s):
1. Understand the impact of globalization and neoliberalism on local and national systems and economies. 2. Illustrate the contribution of organizing efforts and the United Nations in rebuilding communities all over the world. 3. Distinguish between strategies, tools and systems in international organizing efforts.

COMPLAN 200  STRATEGIC PLANNING & MANAGEMENT TRAINING FOR ECONOMIC DEVELOPMENT (3)
Lecture: 3 hours

This course is focused on the fundamentals of strategic and business planning for organizational staff and will provide tools and opportunities to practice for the organizations.

Student Learning Outcome(s):
Students will formulate an organizational strategic plan to address critical conditions in a low income community.

COMPLAN 201  FINANCIAL MANAGEMENT ASSISTANCE FOR SMALL BUSINESS ASSISTANCE PROFESSIONAL (3)
Lecture: 3 hours

This course is focused on the fundamentals of financial management for nonprofit staff and will provide tools and opportunities to practice for the organizations.

Student Learning Outcome(s):
Students will formulate a financial management plan that will sustain a nonprofit organization.

COMPLAN 202  EFFECTIVE HUMAN RESOURCES MANAGEMENT FOR SMALL BUSINESS ASSISTANCE (3)
Lecture: 3 hours

This course examines the evolving human resources function within today’s nonprofit organizations.

Student Learning Outcome(s):
Students will formulate a human resources management plan.
COMPLAN 203 MARKETING AND COMMUNICATIONS PLANNING FOR COMMUNITY ORGANIZATIONS (3) CSU
Lecture: 3 hours

Fundamentals of communications and marketing planning for nonprofit organizational staff. Course will provide tools and opportunities to practice.

Student Learning Outcome(s):

Students will formulate a one year PR plan for a nonprofit organization.

COMPUTER APPLICATIONS OFFICE TECHNOLOGIES

CAOT 001 COMPUTER KEYBOARDING AND DOCUMENT APPLICATIONS I (3) CSU
Lecture: 2 hours / Lab: 3 hours

Fundamentals of keyboarding and letter writing.

Student Learning Outcome(s):

1. Students will be able to touch type the keyboard with speed and accuracy at 25-40 words per minute. 2. Students will create simple reports and block style letters.

CAOT 002 COMPUTER KEYBOARDING AND DOCUMENT APPLICATIONS II (3) CSU
Lecture: 2 hours / Lab: 3 hours

Increase computer keyboarding skills and improve business and legal document development in MS Word.

Student Learning Outcome(s):

1. Students will create a formal report using advanced word-processing commands and features. 2. Students are expected to type a minimum of 50 words-per-minute (wpm).

CAOT 007 MACHINE TRANSCRIPTION (3)
Lecture: 2 hours / Lab: 2 hours

Advisory: CAOT 1 & 31

This course is designed to provide instruction in the use of modern language of dictating and transcribing professional documents using current transcribing software. Emphasis is placed on using effective dictation and transcription techniques when composing original documents, employing acceptable formats, and transcribing business correspondence and reports in final form. Students will review English fundamentals, strengthen keyboarding and proofreading skills.

Student Learning Outcome(s):

1. Students will transcribe “Block Letter” and Modified Block letters with mixed punctuations, demonstrating correct transcription techniques. 2. Students will transcribe financial, bank, and insurance forms through transcribing and dictation. 3. Students will transcribe a two-page business letter and address an envelope from a taped dictation.

CAOT 020 MEDICAL OFFICE PROCEDURES (5) CSU
Lecture: 4 hours / Lab: 2 hours

Student will become proficient in keying medical correspondence, case histories, insurance forms, and reports. Telephone techniques, medical record keeping, filing and Internet activities are taught. Students will learn to perform the duties of the administrative medical assistant under realistic conditions requiring them to organize work and set priorities.

Student Learning Outcome(s):

When provided with a medical office scenario, the student will assess the situation and describe what actions in writing they would take to serve the client(s) and evaluate the effectiveness of the services provided.

CAOT 030 OFFICE PROCEDURES (3) CSU
Lecture: 2 hours / Lab: 2 hours

Advisory: CAOT 1

This course provides skills needed to meet the challenges of the constantly changing workforce. It emphasizes the importance of developing an effective professional image, appropriate self-management, and the importance of working successfully in teams. It stresses development of essential administrative professional skills including written and verbal communications, global communications, paper and electronic records management, personal finance and investment strategies, event planning, travel arrangements, workplace mail and copying, and job search and advancement. Emphasis is also placed on the development of soft skills such as etiquette, self-management, teamwork, ethics, leadership, and customer service.

Student Learning Outcome(s):

1. Students will apply knowledge in office procedures and techniques for entry level positions in business offices. 2. Students will write an indirect letter, assuming the role of an administrative assistant in a mock business.

CAOT 031 BUSINESS ENGLISH (3) CSU
Lecture: 3 hours

This course provides language fundamentals needed to communicate effectively in today’s workplace. These fundamentals include grammar, usage, punctuation, capitalization, number style, proofreading, and spelling. It develops business vocabulary as well as English skills necessary for business industry. Because business people must express their ideas clearly and correctly, language fundamentals are critical.

Student Learning Outcome(s):

1. Students will construct a well-formatted business letter utilizing standard English grammar and punctuation. 2. Student will create a procedures manual as a class project.
CAOT 033 RECORDS MANAGEMENT AND FILING (2)
Lecture: 1 hour / Lab: 2 hours

This course will provide an overview of the field of records management; alphabetic, subject, numeric, and geographic storage and retrieval systems; records management technology; and records control. Class includes records management theory using Microsoft Access.

Student Learning Outcome(s):
Complete a Records Management Simulation showing competence in alphabetic, subject consecutive numeric, terminal-digit numeric, and geographic filing systems.

CAOT 034 BUSINESS TERMINOLOGY (2) CSU
Lecture: 2 hours

The course is designed to develop spelling ability and vocabulary enrichment with application for business use. It develops an understanding of common business and technology terms, as well as emphasizing vocabulary development and expansion.

Student Learning Outcome(s):
Students will compose and edit text that correctly incorporate common business and technology terms as well as new general vocabulary.

CAOT 035 CONCEPTS IN INFORMATION SYSTEMS (3) UC/CSU
Lecture: 3 hours

This course provides an introduction to the basic concepts of microcomputers and information systems with the notion of understanding computer components. Understanding computer components includes application software, system software, input/output devices, communications, files and databases.

Student Learning Outcome(s):
1. Students will understand how to communicate by using web resources. 2. Students will understand how to operate system and application software.

CAOT 044 MEDICAL TERMINOLOGY (3) CSU
Lecture: 3 hours

Students develop an understanding of medical terminology through a study of word roots, prefixes, and suffixes and body systems. Students’ emphasis is also given to spelling, pronunciation, and definitions.

Student Learning Outcome(s):
The student will be able to, using the proper terminology, identify and summarize the body systems overview structures, related combining forms, and functions most important to that system.

CAOT 046 MEDICAL TRANSCRIPTION (3)
Lecture: 2 hours / Lab: 2 hours
Advisory: CAOT 2, 31, & 44

Students will transcribe medical office and hospital dictation using transcribing software. Students will develop appropriate formats for transcribing medical reports; and specialized rules of grammar and punctuation peculiar to dictated medical reports. Students will be well versed in correct transcription procedures and in transcribing medical materials. Production is the beginning of recorded material stressing terminology from medical reports, diagnoses, and case histories. Correct spelling of medical terms are critical in learning this course.

Student Learning Outcome(s):
1. Students will recognize medical Latin root terms and phrases. 2. Students will transcribe medical reports.

CAOT 082 MICROCOMPUTER SOFTWARE SURVEY IN THE OFFICE (3) CSU
Lecture: 2 hours / Lab: 3 hours

This course is an introduction to office information systems and computer literacy by incorporating group discussions, research, and hands-on-experience in a variety of Windows applications. The software used in this course includes word processing, spreadsheets, databases, communications, graphics and operating systems, scheduling, and the Internet.

Student Learning Outcome(s):
1. Students will be able to create a resume with associated cover letter, envelope, and a web page with frames and themes. 2. Students will be able to design and modify the structure of, create and add records to an Access database, and then to use it to generate reports. 3. Students will be able to integrate Word, PowerPoint, Excel and Access into a real business model.

CAOT 084 MICROCOMPUTER OFFICE APPLICATIONS: WORD PROCESSING (3) CSU
Lecture: 2 hours / Lab: 3 hours
Advisory: CAOT 1.

This course provides instructions on Microsoft Word applications using basic and advanced commands to create, format, edit, save, and print documents including letters, tables, reports, and merge documents. The application also utilizes publishing features that includes creating newsletters, brochures, fliers, and resumes on the web and through cloud computing.

Student Learning Outcome(s):
1. Students will demonstrate knowledge of word-processing terminology and the comprehensive capabilities of Microsoft Word. 2. Students will integrate word and excel by linking a excel worksheet to a word document using charts and edit link objects.

CAOT 085 MICROCOMPUTER OFFICE APPLICATIONS: SPREADSHEET (3) CSU
Lecture: 1 hour / Lab: 4 hours

This course prepares students to apply practical business analysis concepts and techniques using the Microsoft Excel spreadsheet. Students learn to create professional and powerful worksheets with emphasis of What-if-analysis and business functions; complex problem-solving; auditing, scenario manager; data validation; importing external data; Web queries; creating templates; consolidating workbooks and/or worksheets; goal seeking; and integration features. The business applications include those used by office employees, accountants, management, and marketing personnel.

Student Learning Outcome(s):
1. Students will calculate formulas on large worksheets. 2. Students will create, sort, and query worksheet databases using computed, compound, and advanced criteria.
CAOT 086 MICROCOMPUTER OFFICE APPLICATIONS: DATABASE
(3) CSU
Lecture: 2 hours / Lab: 3 hours
Advisory: CAOT 082.
This course provides instructions on office database applications using a relational database program, such as, Microsoft Access. Covers records design, file creation and maintenance, and data manipulation and presentation. Emphasizes office applications such as records for personnel, inventory, and sales. Integrates a word processing program to produce automated mailings.

Student Learning Outcome(s):
1. Students will create working databases using Access 2013 professional use. 2. Students will produce queries by setting criteria in professional databases. 3. Student acquire the ability to maintain databases for professional use.

CAOT 088 MICROCOMPUTER OFFICE APPLICATIONS: DESKTOP PUBLISHING (3) CSU
Lecture: 2 hours / Lab: 3 hours
This course provides hands-on training using a personal computer, a printer and desktop publishing software. Includes producing camera ready, near typeset quality publications, newsletters, tri-fold brochures, business information sets, merging publication data, creating an interactive websites and linking and embedding objects.

Student Learning Outcome(s):
Students will produce a variety of professional looking business publications, such as, newsletters, flyers, brochures, business cards, letterhead, event programs, and a wide range of other business documents.

CAOT 093 LEGAL DOCUMENT PRODUCTION (2) CSU
Lecture: 2 hours
Advisory: CAOT 84.
This course prepares students to produce legal documents within the law firm setting, including briefs, memos, pleadings and all other legal documents. Recommended for paralegal students and required for legal administrative assistants.

Student Learning Outcome(s):
Students will have the ability to work with a variety of legal templates to key documents, such as, comprehensive legal documents for the courts, wills and trusts and to key many different contracts.

CAOT 098 MICROCOMPUTER OFFICE APPLICATIONS: DISCOVERING COMPUTERS: DIGITAL LITERACY (3)
Lecture: 2 hours / Lab: 3 hours
This course is designed to prepare students to operate a computer in the Windows environment. This course covers elements of Windows including: Windows operation, disk and file management, modification and customization of the Windows environment, and application of Windows accessories. This class requires both on campus and online work.

Student Learning Outcome(s):
Students will be able to demonstrate their digital literacy in reference to smart technology, network systems, security, ethics and computer privacy.

CAOT 101 HANDS-ON INTERNET (1)
Lecture: 0.5 hours / Lab: 1.5 hours
This course provides hands-on introduction to the World Wide Web and its components with emphasis on using traditional Internet services, downloading programs, sharing files, using e-mail, extending browser capabilities and increasing Web security.

Student Learning Outcome(s):
Students will complete a project to show their understanding of how the Internet is used in a technological environment.

COMPUTER INFORMATION SYSTEMS
CO INFO 011 NETWORK SECURITY FUNDAMENTALS (3) CSU
Lecture: 2 hours / Lab: 2 hours
This course provides instruction and hands-on training in the following computer information systems concepts: Basic security principles, methods of establishing security baselines, and the most recent attack and defense techniques and technologies. It will also help prepare for CompTIA’s examination and professional security certification. Course covers an overview of current network security tools, specific skills and related topics, and insight into future trends and issues in network security.

Student Learning Outcome(s):
1. Student Learning Outcomes (SLO) Students will be able to explain basic security measures for networks, servers and workstations. 2. Students will also be able to describe information security in more details and able to understand techniques to protect workstations, servers and networks from malware and various attacks. 3. Students are expected to set appropriate securities for network information systems. 4. Students are expected to secure data and understand data privacy and data integrity. 5. Students are expected to identify challenges for information security management. 6. Students are expected to comprehend various cryptographic standards in the information security industry.

<td>Mathematics 105 and English 21;</td>
<td>This course provides an overview of Information Technology concepts that explore the aspects of computer hardware and software, operating systems and networking, programming, and the Internet. Class lectures cover prevailing industry terminologies and the latest breakthroughs in the field of Information Technology that span the convergent branches of hardware, software, and the Internet – as evident in today’s social media wherein online human interaction is mediated by advanced hardware/software technologies, and the so-called ‘Internet of Things’ where all digital devices known to humankind are connected – and how they affect modern society. This course is designed for students with minimal or no previous computer background and those who need to refresh their knowledge with the latest terms and trends in Information Technology.</td>

</tbody>
</table>
CO INFO 733 MICROCOMPUTER DATABASE PROGRAMMING (3) CSU
Lecture: 2 hours / Lab: 2 hours
Advisory: CO INFO 701

A complete presentation of database management using Access, including database design, queries, macros, toolbars, VBA and SQL. Also includes advanced work in Excel, use of the Internet in these products.

Student Learning Outcome(s):
Create and customize advanced database objects to improve the accuracy for analyzing data, and simplify using data and data analysis for the end-user.

CO INFO 734 OPERATING SYSTEMS (3) UC/CSU
Lecture: 2 hours / Lab: 2 hours

This course provides students a solid foundation in the basics of the open-source Linux operating system that currently powers a majority of network servers the world over due to its robust features from security to efficiency, reliability, and its modest cost-of-ownership. Unix/Linux powers a greater segment of the Internet than Microsoft. Topics included are An Overview of the Linux Architecture, The Kernel and Shell, File System, Users and Groups Management, Permission and Ownership Management, Services and Processes Management. Students gain system-level experience through problem-solving hands-on lab exercises at the command line and in the graphical user interface.

Student Learning Outcome(s):
1. Identify and describe the essential components of the Linux system from its architecture to its constituent administrative level functions and interfaces.
2. Apply and demonstrate fundamental concepts in graphical user and command line interface operation, and associated concepts in system and network security administration in a systematic manner. Install and deploy a Linux system.
3. Apply and demonstrate concepts in system and network security administration.

CO INFO 739 PROGRAMMING IN C++ (3) UC/CSU
Lecture: 2 hours / Lab: 2 hours
Advisory: Computer Information Systems 701;

This class provides an introduction to the use of the C++ programming system. It emphasizes the syntax and grammar of its coding language. The method of instruction is the use of the system to implement computer application projects using the traditional programming structures of sequence, selection, and loops, use of functions, arrays and strings and how different data types work.

Student Learning Outcome(s):
Use the syntax and grammar of the C++ programming language to create programs that are representative of commonly used business and engineering procedures.

CO INFO 741 PROGRAMMING IN C# (3) UC/CSU
Lecture: 2 hours / Lab: 2 hours
Advisory: Computer Information Systems 701

This class provides an overview of computer programming in C# (C Sharp). It emphasizes the structure and methods of object oriented programming. This consists of form design, the properties lists, and the syntax and grammar of the code language. The class also stresses problem solving meth-
ods, development of algorithms, the programming structures of sequence, selection, and loops, use of functions, arrays and strings and how different data types work.

Student Learning Outcome(s):
Student will design and create applications, and solve programming problems using object-oriented C# programming language’s concepts and tools.

CO INFO 742 WEB DEVELOPMENT USING PHP-MYSQL (3) CSU
Lecture: 3 hours
Advisory: Computer Information Systems 701;

This class provides an intermediate-level course in E-commerce using the PHP scripting language and the MySQL database platform to develop robust and secure dynamic websites with special emphasis on object-oriented programming and the application of real-world website features such as Secure Socket Layer (SSL), shopping carts, and payment systems.

Student Learning Outcome(s):
Student will learn the fundamentals of website development and E-commerce using PHP-MySQL.

CO INFO 743 OBJECT-ORIENTED PROGRAMMING IN C++ (3) UC/CSU
Lecture: 2 hours / Lab: 2 hours
Advisory: CO INFO 739

This course develops an understanding of Object-Oriented programming. It includes Object-oriented analysis and design. Major topics include classes, constructor, destructor, accessor and mutator functions, overloaded functions and operators, inheritance, and polymorphism.

Student Learning Outcome(s):
Student will design and create applications, and solve programming problems using object-oriented C++ programming language’s concepts and tools.

CO INFO 750 DREAMWEAVER CONCEPTS AND TECHNIQUES (3) CSU
Lecture: 2 hours / Lab: 2 hours
Advisory: CO INFO 757

The course covers concepts and techniques of the Dreamweaver system. It consists of projects that provide experience in the methods used to produce and secure dynamic websites with special emphasis on object-oriented programming and the application of real-world website features such as Secure Socket Layer (SSL), shopping carts, and payment systems.

Student Learning Outcome(s):
Utilize Web development concepts, and use Dreamweaver to create and enhance websites and webpages.

CO INFO 757 XHTML PROGRAMMING AND APPLICATIONS
Lecture: 2 hours / Lab: 2 hours
Advisory: CO INFO 757

This class provides an intermediate-level course in E-commerce using the PHP scripting language and the MySQL database platform to develop robust and secure dynamic websites with special emphasis on object-oriented programming and the application of real-world website features such as Secure Socket Layer (SSL), shopping carts, and payment systems.

Student Learning Outcome(s):
Utilize Web development concepts, and use Dreamweaver to create and enhance websites and webpages.
1. Students will demonstrate technical skills that meet industry and/or employment standards. 2. Students will use critical thinking skills to gather, identify, analyze, synthesize information, and evaluate problems and solutions.

**CO INFO 787 NETWORK ESSENTIALS (3) CSU**

Lecture: 2 hours / Lab: 2 hours

Prerequisite: Computer Information Systems 701;

The purpose of this course is to provide a baseline level of knowledge for success in industry and preparation for networking certifications. Students are exposed to new industry topics and get hands on experience networking the lab and configuring the network. Local area and Wide area networks are covered.

**Student Learning Outcome(s):**

1. Students Learning Outcomes (SLO) Students will be able to explain LAN and WAN networking concept and terminology. 2. Students will be able to explain internetwork for networks, servers and workstations. 3. Students will also be able to describe OSI model in details and able to understand interoperability of level of OSI model. 4. Students will be able to explain internetwork for networks, servers and workstations.

**CO INFO 790 PROGRAMMING IN JAVA (3) UC/CSU**

Lecture: 2 hours / Lab: 2 hours

Advisory: Computer Information Systems 709 or Computer Information Systems 739;

This course covers the fundamental operations of the Java programming system. It consists of projects that provide experience in the methods used to create Java applications and applet that will run in Internet web pages. Also to create GUI user interface screens.

**Student Learning Outcome(s):**

Create Java Application programs using various problem solving techniques with proper use of variables, conditions, repetition, and methods.
in acquiring desirable work habits, attitudes, and career awareness. The work experience need not be related to the students' educational goals. The course may be repeated for a maximum of 16 total units, subject to a maximum of 3 units per one enrollment period in general work experience education.

Student Learning Outcome(s):

The student will develop at least 3 learning objectives to be accomplished on the job.

COOP ED 295 WORK EXPERIENCE - GENERAL I (2) CSU RPT 3
Lecture: 2 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work internship. Students must be employed or volunteering/interning in order to participate in program. During the fall and spring semesters, students shall be enrolled in at least one additional course in a U.S. regionally accredited institution.

Student Learning Outcome(s):

Develop learning objectives related to educational/occupational goals to be accomplished on the job.

COOP ED 395 WORK EXPERIENCE - GENERAL I (3) CSU RPT 3
Lecture: 3 hours

General Cooperative Education is a work experience program involving the employer, the student-employee, and the college to insure that the student receives on the job training and unit credit for work experience. Work experience requires that the student be employed in a paid or unpaid position and need not be related to the students educational goals.

Student Learning Outcome(s):

Develop learning objectives related to educational/occupational goals to be accomplished on the job.

COSMETOLOGY

CSMTLGY 035 SKIN THERAPY I (6)
Lecture: 3 hours / Lab: 9 hours

Students will be introduced to disinfection and sanitation procedures, basic facial manipulations, proper cleansing, toning and moisturizing applications, masks and pack techniques and operational procedures for using facial machines.

Student Learning Outcome(s):

The student will be able to demonstrate sanitation and disinfection, client draping, skin analysis, cleansing, massage and plain facial techniques.

CSMTLGY 036 SKIN THERAPY II (6)
Lecture: 3 hours / Lab: 9 hours

Prerequisite: Cosmetology 35.

Students will be introduced to waxing services, makeup applications, desinructuration, iontophoresis, light therapy and high frequency treatments. Skin analysis equipment, facial and body machines, airbrushing machines and hair removal techniques will be employed.

Student Learning Outcome(s):

The student will be able to demonstrate sanitation procedures while performing basic facial manipulations, proper cleanings, toning and moisturizing applications, masks and pack techniques and operational procedures for utilizing the facial machine.

CSMTLGY 037 SKIN THERAPY III (6)
Lecture: 3 hours / Lab: 9 hours

Prerequisite: Cosmetology 36;

Students will be introduced to waxing services, makeup applications, desinructuration, iontophoresis, light therapy and high frequency treatments. Skin analysis equipment, facial and body machines, airbrushing machines and hair removal techniques will be employed.

Student Learning Outcome(s):

1. Students will perform hand and foot treatments utilizing reflexology. 2. Students will demonstrate body scrubs, wraps, massage and aromatherapy treatments.

CSMTLGY 038 SKIN THERAPY IV (6)
Lecture: 3 hours / Lab: 9 hours

Prerequisite: Cosmetology 37;

Students will be introduced to clinic floor practicum, advanced facial and makeup applications, arching and waxing services and body treatments. Mock state board procedures for licensure will be employed.

Student Learning Outcome(s):

Students will be able to perform all skin therapy services such as facials, advanced makeup application, arching, waxing and body treatments.

CSMTLGY 111 FRESHMAN COSMETOLOGY (6)
Lecture: 3 hours / Lab: 9 hours

The course covers basic manipulative skills and proper application of shampooing, scalp treatments, finger waving, curl construction, hair design, haircutting, and manicuring. Basic lecture and theory include topics on bacteriology, trichology, decontamination.

Student Learning Outcome(s):

1. Student will perform basic hair design concepts. 2. Students will demonstrate a plain manicure. 3. Students will perform hair cutting procedures and identify and practice industry safety and sanitation standards.
CSMTLGY 112  JUNIOR SALON I (6)
Lecture: 3 hours / Lab: 9 hours
Prerequisite: Cosmetology 111;

The course covers basic applications of skin care and facial massage manipulations, permanent waving, haircutting techniques, and all phases of thermal texture hair-designing. Theories related to all areas mentioned above are also discussed.

Student Learning Outcome(s):
1. Students demonstrate the proper procedures for cleansing, toning and moisturizing the skin, massage manipulations, eyebrow arching and basic makeup application. 2. Students will demonstrate procedures for sectioning and wrapping a permanent wave.

CSMTLGY 121  JUNIOR SALON II (6)
Lecture: 3 hours / Lab: 9 hours
Prerequisite: Cosmetology 112;

The students are exposed to intermediate instruction in permanent waving, chemical straightening, thermal straightening and curling, skin and hair care, with instruction on the use of facials, hair cutting and nail care. Theories that are related to all areas mentioned above will be discussed.

Student Learning Outcome(s):
1. Student will demonstrate the proper procedures for waxing facial areas, applying masks, packs, scrubs and dermal lights for different skin types. 2. Students will perform thermal texture procedures utilizing the pressing comb, oven, Marcel and electrical irons.

CSMTLGY 122  JUNIOR SALON III (6)
Lecture: 3 hours / Lab: 9 hours
Prerequisite: Cosmetology 121;

The students are instructed in advanced permanent waving, soft permanent wave, chemical straightening, thermal straightening and curling, hair cutting, and electricity. Theories related to the above mentioned subjects will be discussed.

Student Learning Outcome(s):
1. Students will perform permanent waving, soft permanent waving and chemical straightening techniques as well as advanced cold waving. 2. Students will demonstrate facial techniques using chemical compounds and electrical modalities.

CSMTLGY 131  TINTING I (6)
Lecture: 3 hours / Lab: 9 hours
Prerequisite: Cosmetology 112;

The course covers basic, intermediate and advanced hair coloring, bleaching, toning, highlighting, frosting and color correction techniques. A variety of artificial nail procedures will be demonstrated. Theories to the above mentioned subjects will be discussed.

Student Learning Outcome(s):
The students will apply the law of color in identifying and demonstrating the applications of basic and intermediate haircoloring, bleaching, and toning techniques.

CSMTLGY 132  TINTING II (6)
Lecture: 3 hours / Lab: 9 hours
Prerequisite: Cosmetology 131;

The course covers all aspects of hair coloring, bleaching, toning, ‘special effect’ highlighting, foiling, cap frosting and color correction. Additional subjects are: haircutting, thermal and wet hair styling, and the study and applications of artificial nail products. Theories related to the above mentioned subjects will be discussed.

Student Learning Outcome(s):
1. Students will analyze, discuss, and demonstrate the procedures for a variety of hair coloring/bleaching applications. 2. Students will demonstrate a variety of artificial nail applications.

CSMTLGY 141  SENIOR SALON I (6)
Lecture: 3 hours / Lab: 9 hours
Prerequisite: Cosmetology 122 & 132.

The course reviews all areas of cosmetology, rules, regulations and State Board requirements for licensing. Students will perform client services, conduct consultations, record services, track client appointments and tickets. Theories that are related to all areas mentioned above will be discussed.

Student Learning Outcome(s):
Students will complete all final preparations and procedures for customer service and licensure of the Cosmetology State Board Examination in haircutting, hair designing, chemical services, haircoloring and skin care.

CSMTLGY 142  SENIOR SALON II (6)
Lecture: 3 hours / Lab: 9 hours
Prerequisite: Cosmetology 141;

The student will be introduced to clinic floor practicum and advanced client services. Mock State Board procedures for licensure will be employed. Business practices include: client services, effective communication, job search skills, networking, strategies for building a clientele, selling techniques, starting and operating a business.

Student Learning Outcome(s):
1. Student will model industry standard business practices including customer rapport, service planning, professional communication, client retention, referrals, marketing and cooperation with co-workers. 2. Student will review individual competency requirements, both skill and theory, and by passing a mock examination, student will demonstrate readiness to pass the state certification exam.

CSMTLGY 210  INTRODUCTION TO HAIR COLORING (3)
Lecture: 1.5 hours / Lab: 4.5 hours
Prerequisite: Cosmetology 112;

Students are offered an introduction to basic hair coloring categories, applications and bleaching techniques. In addition, the course will concentrate on hair cutting, hair styling, and permanent waving procedures.

Student Learning Outcome(s):
Students will be able to apply temporary and semi-permanent hair coloring and perform highlighting techniques using foils.
GRADUATION REQUIREMENTS
AND EDUCATIONAL PROGRAMS

COUNSEL 001 INTRODUCTION TO COLLEGE (1) CSU
Lecture: 1 hour

This course is designed to provide students with skills needed to succeed in college. Emphasis is placed on college policies and procedures, campus services and resources, study skills, time management and developing a student educational plan (SEP) to meet those goals. Additional topics include: Certificate, associate degree requirements, and transfer admission requirements.

Student Learning Outcome(s):

Content mastery: Utilize knowledge of basic college policies & terms, types of degrees and programs, systems of higher education, useful print and electronic media resources and campus resources in various assignments.

COUNSEL 002 INTERPERSONAL RELATIONSHIPS (1) CSU
Lecture: 1 hour

This course enhances interpersonal skills for building effective communication for personal and professional growth. It utilizes group dynamics by enhancing self-esteem through self-awareness, acceptance, ability to listen and workplace habits. An honest appraisal of individual strengths and weaknesses is made in an effort to help remove barriers to social and academic growth to assist in action plans for personal and educational goals.

Student Learning Outcome(s):

1. Students will identify personality preference and communication patterns based on the Myers Briggs Test Inventory (MBT); 2. Students will identify social barriers (e.g., cultural, economical) to effective interpersonal relationship as well as strategies to overcome those barriers. 3. Students learn to achieve and maintain a balance in their work, school, and personal time. 4. Students will create an action plan for goals including creating or adjusting an Student Education Plan (SEP).

COUNSEL 003 INTERPERSONAL RELATIONSHIPS (1) CSU
Lecture: 2 hours

This course enhances interpersonal skills for building effective communication for personal and professional growth. It utilizes group dynamics by enhancing self-esteem through self-awareness, acceptance, ability to listen and workplace habits. An honest appraisal of individual strengths and weaknesses is made in an effort to help remove barriers to social and academic growth to assist in action plans for personal and educational goals.

Student Learning Outcome(s):

1. Students will identify their personality preference and communication patterns based on the Myers Briggs Test Inventory (MBT); 2. Students will identify social barriers (e.g., cultural, economical) to effective interpersonal relationship as well as strategies to overcome those barriers. 3. Students learn to achieve and maintain a balance in their work, school, and personal time. 4. Students will create an action plan for goals including creating or adjusting an Student Education Plan (SEP).

COUNSEL 004 CAREER PLANNING (1) CSU
Lecture: 1 hour

This is a career planning course designed to assist the student in selecting an appropriate career goal by introducing critical strategies, and information which is essential in selecting a career. The main areas covered in this course are self assessment, problem solving, discovering your strengths and weaknesses, and understanding your personality style. Some tools which will be used to help identify the areas of concern are the Myers Briggs and the COPES. Students will also learn how to prepare a functional and chronological resume, as well as a standard cover letter.

Student Learning Outcome(s):

1. Student will explain specific characteristics of at least one career they are interested in. 2. Student will prepare a resume which is appropriate to their skills, education level, abilities, and work history. 3. Student will identify the appropriate courses required for his or her career goal.

COUNSEL 005 COLLEGE SURVIVAL (2) CSU
Lecture: 2 hours

This course provides the students with information enabling him/her to succeed or survive in college program. Emphasis will be placed on development of making informed decisions, study skills, productive time management, financial planning, an understanding of college terminology and utilization of college support services.

Student Learning Outcome(s):

1. Students will be able to identify information sources and services on campus that they need to meet their academic goals. 2. Students will define personal attributes needed for college success through learning style, time management and goal setting. Identify requirements for associate degree, certificate, and transfer option. 3. Students will be able to create a comprehensive Student Education Plan (SEP) to meet their educational goal.

COUNSEL 020 POST-SECONDARY EDUCATION: THE SCOPE
OF CAREER PLANNING (3) UC/CSU

Lecture: 3 hours

This course introduces students to the role of higher education in society and to their role as students. Students explore personal attributes needed for college success, critical thinking and effective study strategies, relating to others in a diverse world, the career planning and decision making process, and transfer and educational planning. This course will also provide students with an overview of campus resources and policies.

Student Learning Outcome(s):

1. Choose effective study strategies and apply these strategies to educational and workplace settings.
2. Examine health issues such as stress, nutrition, and exercise that affect lifelong well-being.
3. Create effective strategies for managing time and achieving lifelong goals.
4. Define a career and describe the process and skills that are necessary for successful planning.
5. Learn effective decision making and goal setting techniques in order to develop an educational goal.

COUNSEL 020E POST-SECONDARY EDUCATION: COLLEGE
SUCCESS (1) CSU

Lecture: 1 hour

College Success is a course designed to increase the opportunity for success in college by assisting the student in obtaining skills necessary to reach his/her educational objectives. Topics in this course include information about college catalog, success, self-esteem, values and beliefs, study skills, communication skills, and healthy lifestyles.

Student Learning Outcome(s):

1. Choose effective study strategies and apply these strategies to educational and workplace settings.
2. Examine health issues such as stress, nutrition, and exercise that affect lifelong well-being.
3. Create effective strategies for managing time and achieving lifelong goals.
4. Learn effective decision making and goal setting techniques in order to develop an educational goal.

COUNSEL 022 THE TRANSFER PROCESS (1) UC/CSU

Lecture: 1 hour

This course is an introduction to the transfer process. It is designed to enable students to become active participants in planning their long-term educational and career goals and will provide students with an understanding of the process and the requirements for transferring to a four-year college or university. The course will consist of lecture, use of internet resources, guest speakers and student assignments.

Student Learning Outcome(s):

1. Student will define and compare transfer systems and requirements to four-year colleges/universities.
2. Students will differentiate between UC, CSU, and private general education checklist.
3. Student will explore the Internet, visit campuses, and create a transfer plan that will meet the requirements for transfer to the desired major and school/s.

CULINARY ARTS

CLN ART 110 CULINARY ARTS ORIENTATION I (4) CSU

Lecture: 2 hours / Lab: 6 hours

Prerequisite: Culinary Arts 112; Corequisite: Culinary Arts 112.

With a combination of lecture and lab practice, the students are introduced to the world of commercial food production. Students are introduced to culinary theories and develop skills in knife handling, ingredient identification, small and large equipment use, weights and measures, recipe development and cooking fundamentals.

Student Learning Outcome(s):

1. Students will define basic culinary terminology, identify cooking processes and techniques, and evaluate completed products.
2. Define Cooking processes and techniques.
3. Prepare food items according to demonstration standards.
4. Evaluate food items and revise finished products as needed.

CLN ART 112 SANITATION AND SAFETY (2) CSU RPT 3

Lecture: 2 hours

This class discusses sanitization and safety as it applies to the restaurant industry. HACCP protocol, preventing food borne outbreaks, introduction to microbiology and establishing “flow of food systems” will be covered, federal, state and local legislation and employee training. National Restaurant Association Serve Safe Test will be given at conclusion of this class.

Student Learning Outcome(s):

Score a 75 % or higher on a National Restaurant Association food-handlers test (State Law).

CLN ART 120 FRONT OF HOUSE/DINING SERVICES (4)

Lecture: 2 hours / Lab: 6 hours

Front of house topics pertinent to restaurant & hospitality management, dining room management, service, staffing, use of POS system, money management, stewarding. Serve Safe “Alcohol” test will be administered at the conclusion of the course.

Student Learning Outcome(s):

1. Practice proper front of the house operations as it pertains to the food service industry.
2. Describe customer relations and service as performed in a culturally diverse arena.
3. Appraise effective service as it relates to the Hospitality industry.
4. Recognize, identify and assess guidelines of the safe, sale and service of Alcohol.

CLN ART 121 GARDE MANGER I - BAKING (6) CSU

Lecture: 3.75 hours / Lab: 6.75 hours

Prerequisite: Cul Art 111 & 112.

Introduction to Garde Manger and Baking. Introduction to basic garde manger, salads, cold sauces and salad dressings dressing, baking principles including yeast and sweet doughs, laminated doughs, mixing methods, and decorating.

Student Learning Outcome(s):

1. Students will identify cold kitchen and bakery operations and procedures.
2. Students Will demonstrate recipes and preparation.
3. Students will evaluate completed assignments and adjust as needed.
CLN ART 122  GARDE MANGER II - CHARCUTIERE (6) CSU  
Lecture: 3.75 hours / Lab: 6.75 hours  
Prerequisite: Culinary Arts 111 and Culinary Arts 112;  

Students will become proficient in the historical features of the grade manger stations including planning and preparation of cold soups, hors d'oeuvres, appetizers, canape, mousse, timbale, cold sauces, relishes, force-meat, galantine, terrine, pate en croute components. Preparation and usages of specialty meats, sweetbreads, and sausage will be defined; gelée, aspic, chaud froid, glazing, marinating, curing will be practiced; and buffet presentation, the display of carved fruit and vegetable garnishes and centerpieces will be studied. Projects will include international cuisine, salt dough sculpting and ice carving.  

Student Learning Outcome(s):  
1. Students will identify class stock, soups, sauces, vegetable and starch centerpieces will be studied. Projects will include international cuisine, salt dough sculpting and ice carving.  

CLN ART 131  CULINARY ARTS - BREAKFAST I (6) CSU  
Lecture: 3.75 hours / Lab: 6.75 hours  
Prerequisite: Culinary Arts 111; Culinary Arts 112;  

Students are introduced to a la minute breakfast cookery, hot sandwiches, culinary management and supervision. Upon completion the students will be able to identify and safely use the tools and equipment used in breakfast cookery as well as egg cookery, breakfast meats, cereals, beverages, hot sandwiches, ala minute preparation, brunch items, pancakes, and waffles. Other areas covered include portion control, inventory pars, weights and measures, labor and cost control.  

Student Learning Outcome(s):  
1. Describe a la minute cookery, management applications, and cycle menu procedures. 2. Practice and employ a la minute and cycle menu protocol in a fast paced food service facility. 3. Compare and contrast a la minute cooking station with batch type food preparation or pre-prepared items.  

CLN ART 132  CULINARY ARTS - ENTREMETIER SAUCIER (6) CSU  
Lecture: 3.75 hours / Lab: 6.75 hours  
Prerequisite: Culinary Arts 111; Culinary Arts 112;  

Students will examine and prepare the theory and production techniques involved in the preparation of stocks, soups, sauces, starches, and vegetables in a classical and contemporary cooking approach. Students will develop a practical understanding of the role and application of sauce pairing with the center of the plate, vegetables, starches, and dessert items.  

Student Learning Outcome(s):  
1. Students will identify class stock, soups, sauces, vegetable and starch cookery. 2. Prepare and assess completed product.  

CLN ART 141  BUTCHERY/CENTER OF THE PLATE AND QUANTITY FOOD COOKERY (6) CSU  
Lecture: 3.75 hours / Lab: 6.75 hours  
Prerequisite: Culinary Arts 111; Culinary Arts 131; Culinary Arts 132; Culinary Arts 121, Culinary Arts 122 and Culinary Arts 112;  

This course covers quantity and quality food production of meats, fish, and poultry. Students will practice center of the plate food preparation, meat identification and fabrication with an emphasis on portion control, sauce pairing and accompaniment compatibility. Students will discuss, compare and prepare various international foods.  

Student Learning Outcome(s):  
Students will define and practice advanced culinary skills and techniques.  

CLN ART 170  CULINARY NUTRITION (2) CSU  
Lecture: 2 hours  

This course provides a quick overview of applied culinary nutrition. Recipe and menu development including ingredient selection and cooking techniques will be discussed. Special diet (low fat, low sodium, diabetic, and caloric intake) will be discussed. Appropriate for food service professionals who would like to work as personal chefs, with sports teams, at spas and resorts, major hospital chains, entertainment or transportation industries or in health care.  

Student Learning Outcome(s):  
1. Students will define nutrition principles as they apply to foodservice industry. 2. Students will utilize nutrition principles to evaluate and modify recipes. 3. Students will be able to respond knowledgeably to customers questions and needs in the foodservice industry.  

CLN ART 235  MENU PLANNING AND PURCHASING (4) CSU  
Lecture: 3 hours / Lab: 3 hours  
Prerequisites: Culinary Arts 111; Culinary Arts 112.  

Advanced course in menu planning and purchasing using the menu as a tool for ordering, selection and procurement of food and beverage items. Menu, labor, and facility computer generated cost analysis and percentages will be addressed.  

Student Learning Outcome(s):  
1. Define Menu development for a professional food service facility. 2. Recognize ordering and costing procedures based on menu offered. 3. Compose a flow of food and sale price (door to table) based on the menu, menu item, and food cost. 4. Evaluate system and make changes based on outcome.  

CLN ART 240  RESTAURANT SUPERVISION AND TRAINING (2) CSU  
Lecture: 2 hours  
Prerequisite: Culinary Arts 111; Culinary Arts 112;  

Students are introduced to human resource management and supervision techniques. Students will identify the recruiting process, communication skills, leadership styles, legal issues in the workforce, employee motivation and discipline.  

Student Learning Outcome(s):  
1. Identify the supervisors role as a leader in a restaurant management situation. 2. Discuss the various supervisor obligation in a food service establishment. 3. Evaluate supervisors ability to make changes for their employees and themselves.  

Los Angeles Trade-Technical College

2016 - 2018 GENERAL CATALOG
**CLN ART 941 COOPERATIVE EDUCATION - CULINARY ARTS**  
(4) CSU  
Lecture: 4 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

**Student Learning Outcome(s):**
1. The student will develop at least three learning objectives to be accomplished on the job. 2. The objectives will be related to the educational/occupational goals of the student.

---

**DIESEL AND RELATED TECHNOLOGY**

**DIESLTK 112 DIESEL ENGINE AND ELECTRICAL FUNDAMENTALS (11)**  
Lecture: 6 hours / Lab: 15 hours

This course is designed to cover the theory and operation of diesel engine components, shop safety, tools, fastening devices, use of measuring instruments, and electrical systems. The student should develop, hands-on skills, manual dexterity skills, critical thinking skills and basic employment skills.

**Student Learning Outcome(s):**
1. Student should be able to explain the basic principles of operation of any diesel engine and sub-assemblies. 2. Student should be able to explain and test the basic principles of operation of the electrical system, charging system, starting system, and the use of a VOM.

**DIESLTK 112A DIESEL ENGINE FUNDAMENTALS (5.5)**  
Lecture: 3 hours / Lab: 7.5 hours

This course is designed to cover the theory and operation of diesel engine components and supporting systems, shop safety, tools, fastening devices, and use of measuring instruments.

**Student Learning Outcome(s):**
Student should be able to explain the basic principles of operation of any diesel engine and sub-assemblies.

**DIESLTK 112B ELECTRICAL FUNDAMENTALS (5.5) CSU**  
Lecture: 3 hours / Lab: 7.5 hours

This course is designed to cover the theory and operation of electrical fundamentals. The student should develop, hands-on skills, manual dexterity skills, critical thinking skills on electrical parts and systems.

**Student Learning Outcome(s):**

---

**DIESLTK 112 DIESEL FUEL INJECTION SYSTEMS & BASIC HYDRAULICS AND AIR CONDITIONING (11) CSU**  
Lecture: 6 hours / Lab: 15 hours

This course covers the principles of fuel injection systems. Emphasis is placed on the proper construction, operation, dis-assembly, diagnosis, re-assembly, testing and calibrating of different type of pumps and fuel injectors. Various models will be examined, including electronic systems.

**Student Learning Outcome(s):**
Students will demonstrate how different types of injectors work. Students will diagnose and repair an air conditioning system.

**DIESLTK 112A DIESEL FUEL INJECTION SYSTEMS (5.5) CSU**  
Lecture: 3 hours / Lab: 7.5 hours

This course covers the principles of fuel injection systems. Emphasis is placed on the proper construction, operation, dis-assembly, diagnosis, re-assembly, testing and calibrating of different type of pumps and fuel injectors.

**Student Learning Outcome(s):**
Students will demonstrate how different types of injectors work.

**DIESLTK 112B BASIC HYDRAULICS AND AIR CONDITIONING SYSTEMS (5.5) CSU**  
Lecture: 3 hours / Lab: 7.5 hours

This course will cover electronic fuel systems, including electronically controlled fuel pumps and injectors. Practical application by hands on exercises consisting of dis-assembly and assembly, calibration testing and troubleshooting.

**Student Learning Outcome(s):**
Students will diagnose and repair an air conditioning system.

**DIESLTK 112 DIESEL FUEL INJECTION SYSTEMS (5.5) CSU**  
Lecture: 3 hours / Lab: 7.5 hours

This course will cover electronic fuel systems, including electronically controlled fuel pumps and injectors. Practical application by hands on exercises consisting of dis-assembly and assembly, calibration testing and troubleshooting.

**Student Learning Outcome(s):**
Students will diagnose and repair an air conditioning system.

**DIESLTK 112B BASIC HYDRAULICS AND AIR CONDITIONING SYSTEMS (5.5) CSU**  
Lecture: 3 hours / Lab: 7.5 hours

This course will cover electronic fuel systems, including electronically controlled fuel pumps and injectors. Practical application by hands on exercises consisting of dis-assembly and assembly, calibration testing and troubleshooting.

**Student Learning Outcome(s):**
Students will diagnose and repair an air conditioning system.

**DIESL TK 122 HEAVY DUTY DRIVE TRAIN & AIR BRAKE SYSTEMS (11) CSU**  
Lecture: 6 hours / Lab: 15 hours

Prerequisites: DIESLTK 112 and 122.

This course will cover the operating principles and repair of heavy duty clutches, transmissions, drive shafts, and differentials. In addition, students will also learn the operation and repair of air systems, foundation brakes, and anti-lock brake systems.

**Student Learning Outcome(s):**
Student will be able to perform various tasks of transmission and clutch maintenance. Student will use various OEM software to diagnose anti-lock brake systems.
DIESLTK 132A HEAVY DUTY DRIVE TRAIN (5.5) CSU
Lecture: 3 hours / Lab: 7.5 hours
This course will cover the operating principles and repair of heavy duty clutches, transmissions, drive shafts, and differentials.
Student Learning Outcome(s):
Student will be able to perform various tasks of transmission and clutch maintenance.

DIESLTK 132B AIR BRAKE SYSTEMS (5.5) CSU
Lecture: 3 hours / Lab: 7.5 hours
This course will cover the operation and repair of air systems, foundation brakes, and anti-lock brake systems.
Student Learning Outcome(s):
Student will use various OEM software to diagnose anti-lock brake systems.

DIESLTK 142 DIESEL ENGINE OVERHAUL & ELECTRONIC ENGINE CONTROLS (11) CSU
Lecture: 6 hours / Lab: 15 hours
Prerequisite: Diesel and Related Technology 112; and Diesel and Related Technology 122;
This course covers diesel engine overhaul principles including disassembly, inspection, and reassembly as part of overhauling a diesel engine. The operation of electronic engine controls will also be covered with an emphasis on using OEM diagnostic software in the troubleshooting of a diesel engine.
Student Learning Outcome(s):
1. Student will be able to perform various tasks of an engine overhaul.
2. Student will use various OEM software to diagnose electronic engine controls

DIESLTK 142A DIESEL ENGINE OVERHAUL (5.5) CSU
Lecture: 3 hours / Lab: 7.5 hours
This course covers diesel engine overhaul principles including disassembly, inspection, and reassembly as part of overhauling a diesel engine.
Student Learning Outcome(s):
Student will be able to perform various tasks of an engine overhaul.

DIESLTK 142B ELECTRONIC ENGINE CONTROLS (5.5) CSU
Lecture: 3 hours / Lab: 7.5 hours
The operation of electronic engine controls will be covered with an emphasis on using OEM diagnostic software in the troubleshooting of a diesel engine.
Student Learning Outcome(s):
Student will be able to utilize various OEM software to diagnose electronic engine controls.

DIESLTK 185 DIRECTED STUDY - DIESEL AND RELATED TECHNOLOGY (1)
Lecture: 1 hour
This course allows students to pursue a directed study in Diesel and Related Technology on a contract basis under the direction of a supervising instructor.
Student Learning Outcome(s):
1. The outcome will vary depending on the contract with the instructor. 2. The student will formulate a research paper based on a topic in diesel and related technology.

DIESLTK 265 COMPRESSED NATURAL GAS (CNG), LIQUEFIED NATURAL GAS (LNG) FUEL & ELECTRONIC CONTROLS (4)
Lecture: 3 hours / Lab: 3 hours
This course provides an introduction to Compressed Natural Gas (CNG) and Liquefied Natural Gas (LNG) fuel safety and handling, CNG/LNG fuel system layout, ignition systems, and the electronic controls that support the use of this alternative fuel.
Student Learning Outcome(s):
1. Student will identify CNG/LNG components and explain their function.
2. Student will diagnose CNG/LNG electronic controls using manufacturer diagnostic software.

DIESLTK 285 DIRECTED STUDY - DIESEL AND RELATED TECHNOLOGY (2)
Lecture: 2 hours
This course allows students to pursue a directed study in Diesel and Related Technology on a contract basis under the direction of a supervising instructor.
Student Learning Outcome(s):
1. The outcome will vary depending on the contract with the instructor. 2. The student will formulate a research paper based on a topic in diesel and related technology.

DIESLTK 301 INTRODUCTION TO ALTERNATIVE FUELS & HYBRID VEHICLE TECHNOLOGY (1)
Lecture: 1 hour
This course provides an introduction to various alternative fuel technologies being used in the automotive and heavy-duty diesel fields. Covers description and basic operation of Bio-diesel, Compressed Natural Gas (CNG), Liquefied Natural Gas (LNG), Fuel Cell and hybrid vehicle technologies.
Student Learning Outcome(s):
1. Student will be able to explain the differences between regular diesel and bio-diesel fuels. 2. Student will understand the differences between Compressed Natural Gas (CNG) and Liquefied Natural Gas (LNG).
**DIESLTK 302  HYBRID AND PLUG-IN ELECTRIC VEHICLE (6)**

**CSU**

Lecture: 3.5 hours / Lab: 5 hours

This course covers hybrid vehicle system fundamentals including hybrid vehicle safety, special tools, different hybrid system configurations, high voltage battery construction and maintenance, de-power procedures and basic service.

Student Learning Outcome(s):

The student will repair hybrid and electric vehicles using specialty tools and equipment in accordance with industry standards.

**DIESLTK 303  ADVANCED HYBRID AND PLUG-IN ELECTRIC VEHICLES (5)**

**CSU**

Lecture: 2 hours / Lab: 6 hours

This course covers advanced hybrid vehicle system diagnostics and replacement of hybrid and plug-in electric components such as high voltage battery, electric motor, capacitors, etc. Troubleshooting of gasoline/diesel engine will also be covered.

Student Learning Outcome(s):

The student will perform complex hybrid and plug-in electric vehicle troubleshooting using manufacturer diagnostic software, schematics, and specialty tools designed for hybrid and electric vehicle repair.

**DIESLTK 385  DIRECTED STUDY - DIESEL AND RELATED TECHNOLOGY (3)**

Lecture: 1 hour / Lab: 6 hours

This course allows students to pursue a directed study in Diesel and Related Technology on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):

1. The outcome will vary depending on the contract with the instructor.
2. The student will formulate a research paper based on a topic in diesel and related technology.
3. The student will assemble a fully functioning laboratory mockup based on the research determined by the contract between the instructor and student.

**DIESLTK 401  RAIL SYSTEMS OVERVIEW, SAFETY, TOOLS, AND MECHANICAL PRINCIPLES (10)**

Lecture: 5 hours / Lab: 16 hours

This course provides an introduction to the rail industry and the various modes of rail vehicles and their use. Rail safety, tools and mechanical principles are also covered.

Student Learning Outcome(s):

Student will perform lockout/tagout procedure according to OSHA standards. Student will assemble a gear system following a diagram to accomplish desired directional movement and torque multiplication.

**DIESLTK 402  RAIL ELECTRICAL AND ELECTRONIC PRINCIPLES (10)**

Lecture: 5 hours / Lab: 16 hours

This course covers electrical fundamentals, technical writing, Programable Logic Controls (PLC), and electronic principles in rail systems technology including electrical and ladder logic schematics, wires and splicing, and related diagnostic tools.

Student Learning Outcome(s):

Student will wire an electric motor following a schematic provided. Student will perform diagnostic tests on a failed electronic component to identify the problem.

**DIESLTK 403  RAIL VEHICLE PNEUMATIC & HYDRAULIC CONTROLS AND HVAC & CAR BODY MAINTENANCE (10)**

Lecture: 5 hours / Lab: 16 hours

This course provides an overview of the steps for inspecting, maintaining troubleshooting, and rebuilding rail vehicle systems and system components, including propulsion, current collection, trucks and axles, dynamic braking, couplers, HVAC, car body, and communication systems.

Student Learning Outcome(s):

Student will be able to perform a brake system inspection. Student will program electronic HVAC system to manufacturers specifications.

**DIESLTK 404  RAIL DIESEL ENGINE FUNDAMENTALS AND RAIL ACCESSORY/SUPPORT SYSTEMS (10)**

Lecture: 5 hours / Lab: 16 hours

This course is designed to cover the theory and operation of diesel engine components and supporting systems, fastening devices, and use of measuring instruments. It also covers rail Accessory/Support Systems including Automatic Train Control (ATC)/Automatic Train Protection (ATP).

Student Learning Outcome(s):

Student will be able to explain the basic principles of operation of diesel engines and sub-assemblies. Student will perform ATC/ATP system function check.

**DIESLTK 941  COOPERATIVE EDUCATION - DIESEL AND RELATED TECHNOLOGY (4)**

**CSU RPT 3**

Lecture: 4 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):

1. The student will develop at least three learning objectives to be accomplished on the job.
2. The objectives will be related to the educational/occupational goals of the student.
**DIGITAL MEDIA**

**DIGLMD 100**  
**INTRODUCTION TO DIGITAL VIDEO (3) UC/CSU**  
*Lecture: 2 hours / Lab: 2 hours*

Students are introduced to the process and tools of non-linear video editing. Basic skills will be developed in editing techniques, media file formats, basic audio editing, compression types, industry terminology, development of basic still and motion graphics, and understanding key concepts of shooting for digital systems. Students will produce short video sequences that are appropriately compressed for delivery via web/internet and various digital media.

**Student Learning Outcome(s):**

1. Students will understand and be able to identify a variety of digital media tools and technologies. 2. Students will be able to create and share digital media content through multiple platforms.

**DIGLMD 101**  
**FUNDAMENTALS OF DIGITAL MEDIA (3) UC/CSU**  
*Lecture: 2 hours / Lab: 2 hours*

Students will survey a range of mass media fields operating today with a particular attention to the development of media in modern history. From the history of print media through radio and television up to the internet age, students will engage in analysis of the ever-changing adaptations of mass media as it relates to globalization, politics, entertainment and consumerism.

**Student Learning Outcome(s):**

1. Students will understand and be able to identify a variety of digital media tools and technologies. 2. Students will be able to create and share digital media content through multiple platforms.

**DIGLMD 103**  
**FUNDAMENTAL OF DIGITAL AUDIO (3) UC/CSU**  
*Lecture: 2 hours / Lab: 2 hours*

Students are introduced to the principles and process of digital audio recording and reproduction. Topics include such aspects as sound design, acoustics, Dolby surround sound, microphones, mixers, outboard gear, signal flow, and recording and editing audio. Further exploration will involve analog over digital formats and destructive over non-destructive editing.

**Student Learning Outcome(s):**

1. Students will understand and be able to identify a variety of digital media tools and technologies. 2. Students will be able to create and share digital media content through multiple platforms.

**DIGLMD 104**  
**DIGITAL MEDIA ENTREPRENEURSHIP (3) CSU**  
*Lecture: 2 hours / Lab: 2 hours*

Students will develop an understanding of digital media entrepreneurship and how emerging technologies are changing the economics of the new media landscape. Students will pitch start-up projects and develop unique digital media business proposals to demonstrate their understanding of digital media entrepreneurship principles.

**Student Learning Outcome(s):**

1. Students will understand and be able to identify a variety of digital media tools and technologies. 2. Students will be able to create and share digital media content through multiple platforms.

**DIGLMD 105**  
**VISUAL DESIGN FOR DIGITAL MEDIA (3) UC/CSU**  
*Lecture: 2 hours / Lab: 2 hours*

Students will analyze the core principles of visual design, particularly as they relate to narrative and interactive digital media. Students will then apply those principles to the production of digital media projects.

**Student Learning Outcome(s):**

1. Students will understand and be able to identify a variety of digital media tools and technologies. 2. Students will be able to create and share digital media content through multiple platforms.

**DIGLMD 106**  
**ESSENTIALS FOR LIVE AUDIO (3) CSU**  
*Lecture: 2 hours / Lab: 2 hours*

**Advisory:** DIGLMD 103

Students will learn about the equipment involved in live events, concepts of sound waves and acoustics, how to setup for various event sizes and configurations, and best practices in mixing for live audio.

**Student Learning Outcome(s):**

1. Students will understand and be able to identify a variety of digital media tools and technologies. 2. Students will be able to create and share digital media content through multiple platforms.

**DIGLMD 107**  
**DIGITAL AUDIO STUDIO RECORDING (3) CSU**  
*Lecture: 2 hours / Lab: 2 hours*

**Prerequisite:** DIGLMD 103

Students will learn recording techniques of a modern studio and understand the role of the engineer. The course covers modern digital audio workstations using a mixer board to record multiple audio tracks simultaneously, as well as mixing recorded audio for audio balancing.

**Student Learning Outcome(s):**

1. Students will understand and be able to identify a variety of digital media tools and technologies. 2. Students will be able to create and share digital media content through multiple platforms.

**DIGLMD 110**  
**VISUAL EFFECTS AND MOTION GRAPHICS (3) UC/CSU**  
*Lecture: 2 hours / Lab: 2 hours*

Students will learn the craft of video production through hands-on producing of short digital video projects. Over the duration of the course, the students will discover planning, pre-producing, shooting, and post-production of short projects. Projects will emphasize resourcefulness, collaboration and group discourse and introduce students to the technical and creative crafts of shooting and directing digital video.

**Student Learning Outcome(s):**

1. Students will understand and be able to identify a variety of digital media tools and technologies. 2. Students will be able to create and share digital media content through multiple platforms.
**DIGLMD 115  VIDEO EDITING (3) UC/CSU**

*Lecture: 2 hours / Lab: 2 hours*

Students will engage in film and video editing techniques on a non-linear editing platform. A series of video editing projects will explore technical non-linear editing system skills and editing tools in the service of storytelling craft. Topics covered include theme, structure, continuity, rhythm, flow, suspense, and dramatic irony.

**Student Learning Outcome(s):**

Students will be able to use industry standard, non-linear editing systems to effectively cut a video project that demonstrates their understanding of professional standards for editorial techniques and their understanding of the narrative editing process.

**DIGLMD 116  INTRODUCTION TO WEB PAGE DESIGN (3) UC/CSU**

*Lecture: 2 hours / Lab: 2 hours*

Students will learn the fundamental elements of websites, theories of web design, and how to develop a basic website.

**Student Learning Outcome(s):**

Students will be able to develop a website with multiple pages with a consistent layout using an external style sheet.

**DIGLMD 117  INTERMEDIATE WEB PAGE DESIGN (3) UC/CSU**

*Lecture: 2 hours / Lab: 2 hours*

Students will learn the advanced elements of developing an interactive website, dynamic concepts of web design, how to create an image gallery, and implementing a different style sheet for different devices and outputs in a flexible layout.

**Student Learning Outcome(s):**

Students will be able to develop a website including an image gallery with a floating layout that will be able to change per output/device and retain the compositional layout.

**DIGLMD 118  IMAGE MANIPULATION FOR MULTIMEDIA (3) UC/CSU**

*Lecture: 2 hours / Lab: 2 hours*

Students will explore concepts and processes to enhance and alter images to develop more compelling compositions for multiple modalities in various formats. Course covers advanced Adobe Photoshop techniques that include the use of alpha channels, layers effects, and animation, as well as format changes for the various media types and aspect ratios.

**Student Learning Outcome(s):**

1. Students will be able to generate quality photo manipulated compositions, utilizing multiple techniques and palettes in Adobe Photoshop. 2. Students will be able to optimize for various media types of differing dimensions while maintaining the intended compositional style and readability.

**DIGLMD 150  INTRODUCTION TO MOBILE APPLICATIONS (3) UC/CSU**

*Lecture: 2 hours / Lab: 2 hours*

**Prerequisite:** VISCOM 103

Students will develop an understanding of the core principles necessary to design and create mobile applications. Course covers pre-production, interface design, asset behavior and user experience.

**Student Learning Outcome(s):**

Students will design and create a fully functional mobile application including file and asset management.

**DIGLMD 151  INTRODUCTION TO INTERFACE DESIGN (3) UC/CSU**

*Lecture: 2 hours / Lab: 2 hours*

**Prerequisite:** DIGLMD 153; **Advisory:** VISCOM 103

Students will develop an understanding of the core principles necessary to design successful and dynamic Graphical User Interfaces. Course covers the essentials of visual design: color theory, layout and composition, as well as interface behavior and user experience.

**Student Learning Outcome(s):**

Students will concept and design a number of visual graphical interfaces.

**DIGLMD 152  DIGITAL ART (3) UC/CSU**

*Lecture: 2 hours / Lab: 2 hours*

**Advisories:** VISUAL COMMUNICATIONS 103

Students will develop an understanding of the core principles of digital art and design. Course covers the essentials of digital visual design using Photoshop and Illustrator: color theory, composition, software tools, photo manipulation and image creation.

**Student Learning Outcome(s):**

Students will use industry software to create visual assets for games and mobile applications.

**DIGLMD 153  2D DIGITAL ANIMATION (3) UC/CSU**

*Lecture: 2 hours / Lab: 2 hours*

**Advisories:** VISUAL COMMUNICATIONS 103

Students will develop an understanding of the core principles of digital 2D animation. Course covers the essentials of animation using Flash: drawing, key framing, betweening, and exporting animation.

**Student Learning Outcome(s):**

Students create an animated short using industry standard software.
DIGLMD 155  MOBILE APPLICATION PRODUCTION (3) UC/CSU

Lecture: 2 hours / Lab: 2 hours
Advisories: VISUAL COMMUNICATIONS 103

Students will develop and build a completed mobile application. Course covers pre-production, interface design, asset behavior, user experience, and publication of a finished mobile application.

Student Learning Outcome(s):
Students will develop and build a completed mobile application.

DIGLMD 199  DIGITAL MEDIA LAB (1) CSU

Lab: 2 hours

This is an open lab to offer students access to professional creative applications such as Adobe Illustrator, Flash, Dreamworks, AfterEffects, Photoshop, Premiere, and Soundbooth, and Apple Final Cut Pro, as well as video production equipment to complete coursework in the Digital Media program.

Student Learning Outcome(s):
1. The outcome will vary depending on the needs of the student.
2. The student will complete digital media related projects based on course projects.

DRAFT 010  CADD FOR SUSTAINABLE LANDSCAPE DESIGN (4) CSU

Lecture: 3 hours / Lab: 3 hours

Computer Aided Design/Drafting (CADD) applications and Building Information Modeling (BIM) specific to landscape professionals. Includes introduction to CADD skills, block functions, Internet applications, three-dimensional design, presentation drawings, building systems, working drawings, and working drawing coordination.

Student Learning Outcome(s):
1. Using sustainable standards and contemporary tools like CAD/BIM 3D printing tools, the student understands and produces a set of construction documents (drawings and specification) for a sustainable landscape/concrete building. 2. The student coordinates, plans and locates technical information for a project using site and building restrictions imposed by various entities for a masonry/concrete building and the production of maintenance and operations manuals that address project long term sustainability and resilient requirements. 3. The student understands and explores mathematical methods and details used to analyze simple structures, properties of materials, cost estimating, load transfer and strain-stress relationships for a masonry/concrete building.

DRAFT 062  CAD FOR ARCHITECTS (3) CSU

Lecture: 1 hour / Lab: 4 hours

This course will focus on the process of generating and managing building data during the life cycle of a building from ‘cradle to cradle’. CADD and BIM drawings can create automatically consistent and dynamic views of the building, detail design and increase the productivity, transparency and accountability. CADD and BIM symbols, templates and standards are used to generate simple models from site design to finish products. Virtual information models made with CADD and BIM transform every field, as it connects data to place and space.

Student Learning Outcome(s):
1. Student understands how to architecture drawings around their neighborhood and locates sector terminology and protocols to communicate effectively in oral, written, and multimedia formats.
2. The student learns the basic skill to obtain Architecture CAD/BIM tool Industry Certification as he/she recognizes the role and function of professional organizations, industry associations, and organized labor in a productive society.
3. The student designs CAD/BIM spatial information for architecture, urban planning and economic development using mathematical principles of pattern recognition.

DRAFT 063  CADD FOR BUILDING (3) CSU

Lecture: 1 hour / Lab: 4 hours

This course covers CAD (Computer Aided Drafting) and BIM (Building Information Model) for Mechanical, Electrical and Plumbing fundamentals, as it applies to the Architecture Field. Standards, codes, regulatory frameworks and templates are applied as per industry guidance. The student learns how to draw in digital environments and visualize multiple disciplines into a single digital model. The procedure eliminates many of the uncertainties found during the construction phase as well as clashing, scheduling conflicts, construction alignment and ‘cradle to cradle’ strategies.

Student Learning Outcome(s):
1. Student understands how to create mechanical/electrical/plumbing drawings and locates sector terminology and protocols to communicate effectively in oral, written, and multimedia formats.
2. The student learns the basic skill to obtain MEP CAD/BIM tool Industry Certification, as he/she recognizes the role and function of professional organizations, industry associations, and organized labor in a productive society.
3. The student designs MEP CAD/BIM spatial information using mathematical principles of pattern recognition.
ECONOMICS

ECON 001 PRINCIPLES OF ECONOMICS I (3) UC/CSU
Lecture: 3 hours

This course provides an introductory microeconomic analysis and their application to business situation. Emphasis is on supply and demand, elasticities, consumer choice optimization, profit, economic rent, financial environment of business, market structure, economic and social regulations, antitrust policy in a globalized economy.

Student Learning Outcome(s):
1. Student will evaluate individual, professional and government choices in terms of scarcity. 2. Student will apply the understanding of the interaction of demand and supply concept to determine the market price and market quantity of commodity that is produced and consumed. 3. Student will apply the rationing functions of prices and assess the effect of price floor related to under production and over production in the economy. 4. Student will apply the concept of economic change to career development and lifelong learning.

ECON 002 PRINCIPLES OF ECONOMICS II (3) UC/CSU
Lecture: 3 hours

This macroeconomics course concentrates on the behavior of the economy as a whole and includes such economy wide phenomena as changes in unemployment, general price level and national income. Emphasis is placed on public spending and public choice, economic fluctuations and business cycles. Other topics include fiscal and monetary policy, deficit spending and public debt, money creation, banking and central banking, policies and prospects for global economic growth, comparative advantage, international trade and contemporary economic developments.

Student Learning Outcome(s):
1. Student will evaluate individual, professional and governmental choices in terms of scarcity. 2. Student will evaluate the limitations of using GDP as a measurement of social welfare. 3. Student will assess the influence of Federal Reserve’s monetary policy actions on the market interest rates. 4. Student will assess why nations can gain from specializing in production and gain from international trade and incorporate the concept for career goals and lifelong learning.

EDUCATION

EDUC 001 INTRODUCTION TO TEACHING (3) CSU
Lecture: 3 hours

This course introduces students to the field of professional education and the concepts and issues that are related to K - 8 education. Topics of this course include a basic understanding of a teacher’s role and challenges in society, contemporary education issues within historical, social, philosophi-
cal, legal, and political contexts, impact of government policies on schools and children, and the various perspectives on curriculum and instruction. Students are required to complete a minimum of 45 hours of fieldwork in an approved elementary, self-contained classroom. A TB test, fingerprint (live scan), and background check may be required by individual elementary school.

Student Learning Outcome(s):
At the end of this course, students will be able to: 1. Describe various major historical developments in American education and the impact they have on the public education system and describe possible solutions. 2. Analyze the implication of various philosophies and theoretical frameworks on classroom teachers’ curriculum design, delivery, and assessment; classroom management; and instructional approaches. 3. Design and present a lesson plan based on your educational philosophy, utilizing the California Department of Education’s curriculum standards or other state and/or professional curriculum standards.

EDUC 006 METHODS AND MATERIALS OF TUTORING (1) RPT 3
Lab: 3 hours

This course trains students in individual and group tutoring and instructional techniques, group dynamics, interpersonal skills, record-keeping, organizational skills and study skills. It covers tutoring and instructional strategies that promote independent learning. This course is intended for students, paraprofessional educators, and also parents who are interested in learning, teaching, and applying effective instructional and tutoring techniques.

Student Learning Outcome(s):
1. Explain the foundational instructional knowledge and strategies needed for successful tutoring, regardless of subject matter content or academic discipline. 2. Plan, design and choose specific tutoring and instructional strategies for at least two learning styles to enhance academic success.

ELECTRONICS

ELECTRN 002 INTRODUCTION TO ELECTRONICS (3) CSU
Lecture: 3 hours

An overview of the field of applied electronics and its employment opportunities. Introduction to components, nomenclature and symbols. A familiarization of equipment, specifications and physical units. This is a broad introductory course for all students who need a survey of electronic applications and principles. Electronics as applied both historically and in today’s society is investigated. Typical topics included are a study of the natural forces that make electronics possible, present applications of electronics to the fields of medicine, transportation, science, communications, industry, and the start of the digital invasion into our homes and work.

Student Learning Outcome(s):
Students will learn the basic electronics quantities and their application in analyzing DC and AC circuits.
ELECTRICAL CONSTRUCTION AND MAINTENANCE

ECONMT 001 RESISTIVE CIRCUIT ELECTRICAL FUNDAMENTALS (3)
Lecture: 3 hours

The course covers the basic principles of D.C. electricity. Course content will center on the analysis of basic series and parallel circuits, using Ohm’s law, the power equations, and Kirchhoff’s laws. Proper application of appropriate mathematical concepts will be stressed.

Student Learning Outcome(s):
1. Student will analyze and solve mathematical equations to resolve unknown values associated with series electrical circuits.
2. Student will analyze and solve mathematical equations to resolve unknown values associated with parallel electrical circuits.
3. Student will analyze and solve mathematical equations to resolve unknown values associated with combination circuit electrical circuits.

ECONMT 006 SECURITY AND FIRE ALARM TECHNICIAN CERTIFICATION (3) CSU
Lecture: 1.5 hours / Lab: 4.5 hours

This course offers instruction in the installation of Fire and Security alarms. Upon successful completion of the course the student will be eligible to request and test for an installer certification by the National Alarm Association of America.

Student Learning Outcome(s):
1. Student will draw and construct coaxial patch cables. 2. Student will demonstrate knowledge of basic alarm systems.

ECONMT 007 HOME THEATER & COMMERCIAL AUDIO, VIDEO INSTALLATION THEORY AND PRACTICES (3)
Lecture: 1.5 hours / Lab: 4.5 hours

This course offers instruction in the installation of Home Theater Video and Audio systems as well as commercial and industrial applications for audio and video technology. Upon successful completion of the course the student will have the skills to enter this area of the electrical trade.

Student Learning Outcome(s):
1. Student will demonstrate knowledge of electrical safety work practices.
2. Student will perform the tasks required to construct a CAT5 patch Cable.
3. Student will perform the tasks required to construct a Coaxial patch Cable.

ECONMT 100 (O.S.H.A.) SAFETY STANDARDS: CONSTRUCTION & INDUSTRY (2)
Lecture: 2 hours

(Same as Building Construction Techniques 102).

This course provides instruction on industry safety and health rules as it applies to workers and employers within the construction industry. Topics such as fall protection, lock out tag out procedures, PPE, excavations, etc. are covered. Participants that meet the required hourly attendance and successfully pass the final exam will be eligible to receive their OSHA (30 hr) safety-training certificate.

Student Learning Outcome(s):
1. Recognize appropriate training requirements and training methods.
2. Define OSHA specific construction terms such as: competent person, construction work, confined space, working space, general duty clause. 3. Select situational appropriate PPE.

ECONMT 105 FUNDAMENTALS OF SOLAR ELECTRICITY (3) CSU
Lecture: 3 hours

This course is designed for students interested in a career in the solar industry. The fundamental principles and functions of photo voltaic industry will be introduced. This course covers planning, installation, maintenance and all the necessary components for a photo voltaic system. The transmission and distribution of electric power will be reviewed. Basic concepts of electricity, identification, functions and operations of components will be surveyed.

Student Learning Outcome(s):
1. Describe the history of PV technology and the industry and list available markets and possible applications for PV systems. Identify types of PV systems and their application. Describe the advantage and disadvantage of each. Identify safety practices and protective equipment used to mitigate hazards in the installation and maintenance of PV systems. 2. Define basic electrical/solar terms including: energy, power, series and parallel electrical circuits. Define basic solar terms including: irradiation, insolation, tilt angle, latitude, longitude, azimuth angle etc. Determine series/parallel PV array arrangement based on module and inverter specifications. 3. Describe the testing standards for solar modules and identify measurement conditions for solar cells and modules. Label key points and describe effects of environmental conditions on a typical IV curve. 4. Describe the use of a digital multi-meter, pyranometer, compass, and given a declination map, differentiate true south from magnetic south. Identify parts and demonstrate the ability to use the Sun pathfinder and do shading analysis.
ECONMT 110  RENEWABLE ENERGY SYSTEMS (3) CSU
Lecture: 3 hours

This course will cover energy basics, solar basics, both active and passive, solar-thermal and solar-electric, wind, hydro-power, wave and tidal power, bio-fuel and biomass resources, geothermal power, energy storage and hydrogen fuel cells. Both large and small scale, grid interactive and stand alone systems will be discussed. Energy collection, site evaluation, design analysis of various systems, material use, and methods of construction will also be covered, along with overviews of California and US energy policy and global energy use.

Student Learning Outcome(s):
1. Discuss the history of renewable energy development. 2. List the regions of the globe where specific renewable options are most or least viable. 3. List the components needed for various renewable energy sources.

ECONMT 115  FUNDAMENTALS OF D.C. ELECTRICITY (3) CSU
Lecture: 3 hours

This course offers study in the Fundamentals of D.C. Electricity. Subjects include: Electrical safety, the basic principles of atomic structure, electrical quantities, static electricity, magnetism, induction, resistors, series circuits, parallel circuits, and combination circuits. The proceeding resistive circuits will be analyzed using Ohm’s Law, The Power Equation and Kirchoff’s Voltage and Current Laws.

Student Learning Outcome(s):
1. Student will analyze and solve Series Circuit problems. 2. Student will analyze and solve Parallel Circuit problems. 3. Student will analyze and solve Combination Circuit problems.

ECONMT 116  HANDTOOLS AND WIRING PRACTICES (2) CSU
Lab: 6 hours

This course covers the proper use of Hand Tools, Wiring Methods, Conductor Identification, Selection, Splicing and Termination, Trade Practices and an Introduction to the National Electrical Code.

Student Learning Outcome(s):
1. Student will construct various Knots. 2. Student will locate and interpret information in the National Electrical Code. 3. Student will demonstrate knowledge of electrical safety work practices.

ECONMT 117  ELEMENTARY CIRCUIT PRACTICES (4) CSU
Lab: 12 hours

This course offers instruction in the drawing and analysis of wiring plans, wiring diagrams, and ladder diagrams. Including the wiring of both low and high voltage circuits utilizing: push button, single pole, standard three way, coast three way, standard four way, coast four way, and master switching systems.

Student Learning Outcome(s):
1. Student will interpret and identify the components of a 4 Way Switching System. 2. Student will interpret and identify the components of a 3 Way Switching System. 3. Student will demonstrate knowledge of electrical safety work practices.

ECONMT 119  ELECTRICAL CONSTRUCTION AND MAINTENANCE (3) CSU
Lecture: 3 hours

This is an entry level course in electrical calculations and measurements with special emphasis on the application problems encountered in the electrical construction industry.

Student Learning Outcome(s):
1. Student will interpret and solve Common Fraction problems. 2. Student will interpret and solve Decimal Fraction problems. 3. Student will interpret and solve Percent problems.

ECONMT 120  INDUSTRIAL CONTROL SYSTEMS (3) CSU
Lecture: 3 hours

Prerequisite: Electrical Construction and Maintenance 115; and Electrical Construction and Maintenance 119.

This course is a study of motors, circuits and devices used for controlling electric motors and the National Electrical Code covering motor installation.

Student Learning Outcome(s):
1. Interpret a ladder diagram of a control strategy to manually control a motor from two different locations and the ability to start or stop the motor from either location, utilizing two start/stop stations a single phase AC motor and a Contactor or magnetic motor starter. 2. Interpret a ladder diagram of a control strategy to run and stop a series universal motor from a remote location utilizing an automatic pilot device and a contactor.

ECONMT 128  INDUSTRIAL CONTROL SYSTEMS PRACTICES (3) CSU
Lab: 9 hours

Prerequisite: Electrical Construction and Maintenance 120; and Electrical Construction and Maintenance 136 or Electrical Construction and Maintenance 184.

This course fosters the development and application of control circuitry through the use of instructional wiring panels and lab project boards. The course includes manual and electromagnetic control of motors using switches, pushbuttons, relays and starters for sequencing, jogging, reversing and timed control of motors and circuits.

Student Learning Outcome(s):
1. Interpret two ladder diagrams, each with a different strategy to control a motor. One will operate a motor automatically from a remote location. The second will control a motor manually from two separate locations. Both strategies will employ contactors.
ECONMT 128A  INDUSTRIAL CONTROL SYSTEMS PRACTICES
A (1) CSU
Lab: 3 hours

This course fosters the development and application of control circuitry through the use of instructional wiring panels and lab project boards. The course includes manual and electromagnetic control of motors using switches, pushbuttons, relays and starters for sequencing, jogging, reversing and timed control of motors and circuits.

Student Learning Outcome(s):
Interpret two ladder diagrams, each with a different control strategy to control a motor. One will operate a motor automatically from a remote location. The second will control a motor manually from two separate locations. Both strategies will employ contactors.

ECONMT 128B  INDUSTRIAL CONTROL SYSTEMS PRACTICES
B (1) CSU
Lab: 3 hours

This course is the second module of the 128 A,B,C series and continues to foster the development and application of control circuitry through the use of instructional wiring panels and lab project boards. The course includes manual and electromagnetic control of motors using switches, pushbuttons, relays and starters for sequencing, jogging, reversing and timed control of motors and circuits.

Student Learning Outcome(s):
Interpret two ladder diagrams, each with a different control strategy to control a motor. The first will operate a motor automatically from two locations. The second will control a motor automatically from a remote location. Both strategies will employ contactors.

ECONMT 128C  INDUSTRIAL CONTROL SYSTEMS PRACTICES
C (1) CSU
Lab: 3 hours

This course is the final module of the 128 A,B,C series and finalizes the development and application of control circuitry through the use of instructional wiring panels and lab project boards. The course includes manual and electromagnetic control of motors using switches, pushbuttons, relays and starters for sequencing, jogging, reversing and timed control of motors and circuits.

Student Learning Outcome(s):
Interpret two ladder diagrams, each with a different control strategy to control a motor. One will operate a motor automatically from a remote location. The second will control a motor manually from two separate locations. Both strategies will use contactors.

ECONMT 129  FUNDAMENTALS OF ALTERNATING CURRENT
(3)
Lecture: 3 hours

Prerequisite: Electrical Construction and Maintenance 115; Electrical Construction and Maintenance 119;

This course offers a study in operating principles of electrical power systems, the theory of A.C. generators and motors, load calculations, efficiencies, power factor correction, and calculations related to these theories.

Student Learning Outcome(s):
Apply appropriate Ohms laws, mathematical rules and trigonometry to solving multiple electrical calculations including: given the circuit voltage and current flowing into a motor and a wattmeter reading, the student will apply appropriate formulas and calculate the total Apparent Power, True Power, Reactive Power, Impedance, Inductive Reactance, Inductance, Phase Angle and the Power Factor of the motor circuit.

ECONMT 130  PRINCIPLES OF INDUSTRIAL ELECTRIC POWER (3)
Lecture: 3 hours
ECONMT 120 & ECONMT 129.

This course offers a study in operating principles and maintenance procedures and code requirements for electrical power systems. Theory of D.C. and A.C. generators and motors, load calculations, efficiency and power factor correction are also covered.

Student Learning Outcome(s):
1. Analyze drawings of control and power circuits used in industry. 2. Analyze various motor acceleration methods. 3. The students will compare and contrast the efficiency of the different methods. 4. Calculate transformer voltage, current, and KVA ratings.

ECONMT 136  INDUSTRIAL POWER APPLICATIONS (3)
Lab: 9 hours
ECONMT 120 and ECONMT 128.

This course offers a practical study on shop experience in testing, servicing and repairing industrial plant electrical equipment, connection and operation of generators, as well as motors and their control systems.

Student Learning Outcome(s):
1. Connect electrical motor control equipment to single and three phase motors to National Electrical Code standards in a safe and workman-like manner using proper lock out and tag out procedures. 2. Demonstrate electrical control troubleshooting skills, and the ability to identify electrical open circuits, electrical short circuited connections and electrically grounded circuits. 3. Present finished drawings of all connections made during class.

ECONMT 137  INDUSTRIAL ELECTRONIC CONTROL SYSTEMS (3)
Lecture: 3 hours

In this course fundamental electronic and semiconductor theory as well as applications of electronic devices to industrial control systems are studied. Boolean algebra, logic circuits and numbering systems as they used in industrial controls are examined. Transducers, photoelectric limit switches and other industrial devices are studied.

Student Learning Outcome(s):
1. Students will analyze electronic control and power circuits. 2. The student will be able to identify different discrete electronic components and explain their operation in an industrial motor controller. 3. Students will reconfigure basic logic circuits to achieve alternate logical results.
ECONMT 138 APPLICATIONS OF ELECTRICAL AND ELECTRONICS DEVICES (2) CSU
Lab: 6 hours
This course studies identification and operational tests on various types of electrical and electronic equipment, including transformers, electronic motor speed control systems and other industrial control devices.

Student Learning Outcome(s):
1. Construct digital logic circuits, and analyze them using Boolean Algebra.
2. Use solid state relays to energize motors or motor starters.
3. Compare and contrast logic gates using truth tables.

ECONMT 140 CONSTRUCTION WIRING PRINCIPLES AND PRACTICES (3)
Lecture: 3 hours
Prerequisite: Electrical Construction and Maintenance 130; and Electrical Construction and Maintenance 136; Corequisite: Electrical Construction and Maintenance 167;
This class teaches the wiring of electrical systems, including: layout, construction methods, code requirements, installation standards, and best practices.

Student Learning Outcome(s):
1. Students will design wiring plans, which conform to various load and control requirements, which result in minimum material use. 2. Students will calculate the full load currents, and the appropriately sized wire and protective devices for an assigned transformer according to the current National Electrical Code.

ECONMT 142 BASIC PROGRAMMABLE LOGIC CONTROLS (PLC) (1)
Lab: 3 hours
Introduction to Basic Programmable Logic Controllers, Programming Devices, Ladder Diagrams and Designing PLC Programs for Industrial Processes.

Student Learning Outcome(s):
1. Identify the advantages of a programmable controller.
2. Identify four components of a programmable controller.
3. Identify input and output devices connected to a programmable controller.

ECONMT 150 INTRODUCTION TO THE ELECTRICAL CODES (3)
Lecture: 3 hours
Prerequisite: Electrical Construction and Maintenance 130; and Electrical Construction and Maintenance 136; Corequisite: Electrical Construction and Maintenance 140;
This is a study and interpretation of the National Electrical Code, local ordinances, and regulations covering wiring installations and principal circuit requirements.

Student Learning Outcome(s):
1. Students will calculate loads and currents for assigned industrial, commercial, and residential occupancies. 2. Students will calculate the appropriately sized wire, conduit, and protective devices for the assigned industrial, commercial, and residential occupancies according to the current National Electrical Code.

ECONMT 159 PROGRAMMABLE LOGIC CONTROLS (PLC) (4) CSU
Lecture: 2.5 hours / Lab: 4.5 hours
Prerequisite: Electrical Construction and Maintenance 120; and Electrical Construction and Maintenance 136 or Electrical Construction and Maintenance 184;
Programmable Logic Controller wiring, programming, and troubleshooting techniques are learned and practiced in a hands-on laboratory environment.

Student Learning Outcome(s):
1. Identify, illustrate, and apply PLC Input/Output components Plan, design, and construct PLC wiring diagrams Plan, design, and construct working PLC programs Troubleshoot faulty PLC hardware and software

ECONMT 164 SUSTAINABLE LIGHTING PRINCIPLES & PRACTICES (3) CSU
Lecture: 1.5 hours / Lab: 4.5 hours
Prerequisite: ECONMT 119
This course offers study in the design of residential and commercial lighting systems. Included, are both indoor and outdoor lighting applications, emphasizing sustainable lighting design and energy saving strategies.

Student Learning Outcome(s):
1. Students will analyze and interpret ballast wiring diagram and install replacement ballast.

ECONMT 167 ELECTRICAL CONSTRUCTION WIRING TECHNIQUES (3)
Lab: 9 hours
Prerequisite: Electrical Construction and Maintenance 130; and Electrical Construction and Maintenance 136; Corequisite: Electrical Construction and Maintenance 150;
Students are taught and practice electrical rough-in methods, while emphasizing safe working methods and compliance with Electrical Codes and trade standards.

Student Learning Outcome(s):
1. Students will install the appropriately sized wire, conduit, and protective devices for the assigned laboratory projects. Students will correctly splice and terminate electrical building wire as part of each lab project. Student will follow Lockout/Blockout procedures and other recognized electrical workplace safety procedures at all times in lab.

ECONMT 181  BASIC WIRING PRACTICES (3)
Lecture: 3 hours

This course contains the study of basic electrical diagrams; such as, wiring plans, wiring diagrams, and ladder diagrams. Topics of discussion include: Architectural symbols and drawings, reading and interpreting plans and specifications, as well as the drawing of basic circuits.

Student Learning Outcome(s):
1. Demonstrate familiarity with the theory and principles of AC single and three-phase motors, DC motors, generators and alternators. 2. Be able to install above machines by connecting power and control circuits, as well as demonstrate motor control troubleshooting skills, and the ability to identify electrical opens, shorts and ground faults. 3. Demonstrate the ability to solve motor control calculations, design and convert elementary diagrams of the advanced motor control systems from both written and oral instructions into workable wiring installations.

ECONMT 182  BASIC DIAGRAM AND CIRCUIT PRACTICES (1)
Lab: 3 hours

This course provides practical shop practice in the wiring of signal, communication and control circuits. Connection of device mechanisms such as, lights, buzzers and relays are specifically reviewed.

Student Learning Outcome(s):
1. Student will identify the components of a Standard 3 Way Switching System and its terminations. 2. Student will identify the components of a Standard 4 Way Switching System and its terminations. 3. Student will demonstrate an understanding on the use of handtools in a safe and workmanlike manner.

ECONMT 183  RESIDENTIAL ELECTRIC WIRING (3)
Lecture: 3 hours

This course covers the design and layout of residential electrical wiring in accordance with the National Electrical Code and recognized best trade practices.

Student Learning Outcome(s):
Students who complete this class with an aggregate score exceeding 70% will calculate feeder and service loads for residential occupancies. Students who complete this class with an aggregate score exceeding 70% will select wiring methods suitable for residential occupancies. Students who complete this class with an aggregate score exceeding 70% will design wire sizes and outlet locations suitable for residential occupancies.

ECONMT 184  MOTOR CONTROL PRINCIPLES AND PRACTICES (3)
Lecture: 1.5 hours / Lab: 4.5 hours

This course will examine the testing, adjusting, servicing and connecting motors, generators and associated controllers. Reduced voltage starters and other motor starting techniques will be studied.

Student Learning Outcome(s):
1. Demonstrate familiarity with the theory and principles of AC single and three-phase motors, DC motors, generators and alternators. 2. Be able to install above machines by connecting power and control circuits, as well as demonstrate motor control troubleshooting skills, and the ability to identify electrical opens, shorts and ground faults. 3. Demonstrate the ability to solve motor control calculations, design and convert elementary diagrams of the advanced motor control systems from both written and oral instructions into workable wiring installations.

ECONMT 185  DIRECTED STUDY - ELECTRICAL CONSTRUCTION AND MAINTENANCE (1)
Lecture: 1 hour

This course allows students to pursue a directed study in Electrical Construction & Maintenance on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
1. Identify single phase and three transformers as well as differentiate between the two types 2. Safely connect three single phase transformers into a variety of connections for a three phase bank operation. 3. Be able to do calculations involving single phase as well as three phase transformers.

ECONMT 185L  DIRECTED STUDY, ELECTRICAL CONSTRUCTION AND MAINTENANCE LAB (1)
Lab: 3 hours

This course allows students to pursue a directed study in Electrical Construction & Maintenance on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
1. Idnetify single phase and three transformers as well as differentiate between the two types 2. Safely connect three single phase transformers into a variety of connections for a three phase bank operation. 3. Be able to do calculations involving single phase as well as three phase transformers.

ECONMT 186  INDUSTRIAL ELECTRICAL PRINCIPLES AND PRACTICES (3)
Lecture: 1.5 hours / Lab: 4.5 hours

This course content includes the use of measuring instruments, connecting and testing transformer banks and connecting and testing industrial electronic control devices. This course discusses single phase and three phase transformers.

Student Learning Outcome(s):
1. Identify single phase and three transformers as well as differentiate between the two types 2. Safely connect three single phase transformers into a variety of connections for a three phase bank operation. 3. Be able to do calculations involving single phase as well as three phase transformers.

ECONMT 187  ADVANCED PROGRAMMABLE CONTROLLERS (4)
Lecture: 2.5 hours / Lab: 4.5 hours

Prerequisite: Electrical Construction and Maintenance 159;
Programmable Logic Controller lecture and laboratory class, including Sequencers, Shift Registers, Analog I/O, and Subroutines, taught using RSLogix software.

Student Learning Outcome(s):
Design, construct, and develop working PLC programs using advanced PLC instructions. Identify the four key elements that make up a closed loop process control system. Troubleshoot a programmable controller program.
### ECONMT 190 ELECTRICAL CODE CALCULATIONS (3)

*Lecture: 3 hours*

**Advisory:** ECONMT 171.

This class covers branch circuit, feeder, tap, service, motor, and transformer calculations from the National Electrical Code in detail.

**Student Learning Outcome(s):**

1. Student will perform NEC Article 220 residential, commercial and industrial calculations.
2. Student will perform NEC Article 240 tap rule calculations.
3. Student will perform NEC motor and transformer calculations.

---

### ECONMT 191 COMMERCIAL WIRING AND PRACTICES (2)

*Lecture: 1 hour / Lab: 3 hours*

Instruction is given in installation of wiring systems such as non-metallic sheathed cable, armored cable, flexible metal conduit, electrical metallic tubing, and PVC. Emphasis is given on National Electric Code standards.

**Student Learning Outcome(s):**

The student will be able to wire a commercial electrical circuit following a wiring diagram using approved methods.

---

### ECONMT 192 RESIDENTIAL WIRING AND PRACTICES (2)

*Lecture: 1 hour / Lab: 3 hours*

The course content includes the installation of residential wiring materials including non-metallic sheathed cable, armored cable and flexible metal conduit for outlets, appliances and lighting.

**Student Learning Outcome(s):**

The student will be able to wire a residential electrical circuit following a wiring diagram using approved methods. The student will be able to take accurate voltage measurements using the meter's low impedance scale and discern between actual voltages and so-called ghost or phantom voltages.

---

### ECONMT 193 CONDUIT BENDING AND CALCULATIONS (3)

*Lecture: 1.5 hours / Lab: 4.5 hours*

This class teaches bending cutting and threading of conduits: EMT (Electrical Metallic Tubing), rigid, and IMC (Intermediate Metal Conduit) and the calculations that are included in these operations. Conduit will be bent with hand benders.

**Student Learning Outcome(s):**

Students will bend stubs, saddles, offsets, and back-to-back bends to specified dimensions in EMT, IMC, and rigid conduit. Students will thread IMC and rigid conduit. Students will prepare, plan, and calculate conduit bends.

---

### ECONMT 193A CONDUIT BENDING LABORATORY (1)

*Lab: 3 hours*

**Corequisite:** Electrical Construction and Maintenance 168.

This class practices the cutting and bending of electrical conduits, and the necessary calculations included in these operations. EMT conduit will be bent with hand benders.

**Student Learning Outcome(s):**

Students will bend stubs, saddles, offsets, and back-to-back bends in EMT conduit.

---

### ECONMT 195 GROUNDING: FUNDAMENTALS, APPLICATIONS AND PRACTICES (3)

*Lecture: 3 hours*

This course will cover the fundamentals of electrical system grounding principles of reviewing definitions, theory, and equipment installations. Application to accepted industry practices, compliance to the National Electrical Code, review of lightning protection and electronic equipment grounding will be covered.

**Student Learning Outcome(s):**

1. Student will differentiate between grounding and bonding and define terms associated with grounding and bonding such as: ground, grounding, grounded, bonding, bonded, ground fault current. 2. Students will state grounding and bonding requirements and identify NEC code sections for safety and compliance. 3. Students will list applicable NEC sections pertaining to grounding and bonding.

---

### ECONMT 196 INFRASTRUCTURE WIRING PRACTICES (4)

*Lecture: 1 hour / Lab: 6 hours*

This course offers instruction in the installation, termination, testing and documentation of commercial infrastructure wiring including the following: Coaxial Cable, Category 3, 5, 5E, & 6 Unshielded Twisted Pair, and Fiber Optics.

**Student Learning Outcome(s):**

1. Student will demonstrate knowledge of electrical safety work practices. 2. Student will perform the tasks required to construct a CAT5 patch Cable. 3. Student will perform the tasks required to construct a Fiber Optic patch Cable.

---

### ECONMT 197 LOW VOLTAGE ELECTRICAL PRACTICES (3)

*Lecture: 1.5 hours / Lab: 4.5 hours*

This course offers instruction in the installation, termination, testing and documentation of low voltage systems, such as lighting, communication, telephone, data, control systems, and similar low voltage applications.

**Student Learning Outcome(s):**

1. Student will demonstrate knowledge of electrical safety work practices. 2. Student will perform the tasks required to construct a CAT5 patch Cable. 3. Student will perform the tasks required to construct a Coaxial patch Cable.
ECONMT 199  JOURNEYMAN ELECTRICAN EXAM PREPARATION (3)
Lecture: 1.5 hours / Lab: 4.5 hours

This course will prepare the student for the State of California Electricians’ Certification Examination. The distance education version of the class uses the Internet, World Wide Web and personal e-mail.

Student Learning Outcome(s):
1. Student will apply electrical calculations and measurements. 2. Student will identify trade specific electrical codes. 3. Student will pass a simulated Certification exam.

ECONMT 205  SOLAR ENERGY INSTALLATION & MAINTENANCE PRINCIPLES AND PRACTICES (2)
Lab: 6 hours

This course is designed for individuals who have the basic electrical and mechanical skills of an energy technician or electrician and are looking to expand into the renewable energy field. This is a hands on class to develop the fundamental principles and practices for installation and maintenance of solar, wind, and similar renewable energy systems. This course covers basic planning, installation, and maintenance of the necessary components for various renewable energy systems.

Student Learning Outcome(s):
1. Demonstrate the ability to use safety harnesses while working on roofs. Follow all safety rules and regulations while working on roofs, in attics and around all electrical equipment during the installation of a renewable energy system. 2. Analyze a site survey and develop a written report that accounts for shading, array orientation, mounting methods and equipment locations. Perform a system installation following manufacturer’s directions. 3. Adapt a system design to conform to the individual site assessment needs taking into account ambient temperature, verify component sizes and capacities. Demonstrate and install subsystem components to an industry acceptable standard.

ECONMT 212  SIGNIFICANT CHANGES NEC - NATIONAL ELECTRICAL CODE (3) CSU
Lecture: 3 hours

Prerequisite: Electrical Construction and Maintenance 172.

Continuing education for the journeyman electrician. This course covers the changes to the National Electrical Code made during each 3 year code revision cycle. Each change to the code will be highlighted and how the change will impact the industry practices will be covered.

Student Learning Outcome(s):
1. List electrical codes by topic and article. 2. Identify topic specific electrical code changes, such as; grounding, OCP, motors, transformers, hazardous locations, healthcare facilities. 3. Interpret and discuss the trade impact of various electrical code changes.

ECONMT 215  SMALL WIND ENERGY SYSTEMS PRINCIPLES AND PRACTICES (3)
Lecture: 1.5 hours / Lab: 4.5 hours

This course is designed for individuals that have the basic electrical and mechanical skills of an energy technician or electrician and are looking to expand into the small wind energy field. This class will help one to develop the fundamental knowledge and skill sets typically required for small wind system practitioners and to help ensure safety, quality and consumer acceptance of small wind installations.

Student Learning Outcome(s):
1. Discuss the history and development of wind energy. 2. List the regions of the globe where wind is a renewable option. 3. Install the components needed for various wind renewable energy sources.

ECONMT 285  DIRECTED STUDY - ELECTRICAL CONSTRUCTION AND MAINTENANCE (2)
Lecture: 2 hours

This course allows students to pursue a directed study in Electrical Construction & Maintenance on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in Electrical Construction & Maintenance.

ECONMT 285L  DIRECTED STUDY, ELECTRICAL CONSTRUCTION AND MAINTENANCE (LAB) (2)
Lab: 6 hours

This course allows students to pursue a directed study in Electrical Construction & Maintenance on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
The outcome will vary depending on the contract with the instructor. The student will design and construct a lab project based on a topic in Electrical Construction & Maintenance.

ECONMT 385  DIRECTED STUDY - ELECTRICAL CONSTRUCTION AND MAINTENANCE (3)
Lecture: 3 hours

This course allows students to pursue a directed study in Electrical Construction & Maintenance on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in Electrical Construction & Maintenance.
Graduation Requirements and Educational Programs

ECONMT 385L
DIRECTED STUDY - ELECTRICAL CONSTRUCTION AND MAINTENANCE (LAB) (3)
Lab: 9 hours

This course allows students to pursue a directed study in Electrical Construction & Maintenance on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):

The outcome will vary depending on the contract with the instructor. The student will design and construct a lab project based on a topic in Electrical Construction & Maintenance.

ECONMT 941
COOPERATIVE EDUCATION - ELECTRICAL CONSTRUCTION & MAINTENANCE (4) CSU RPT 3
Lecture: 4 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to make sure that the student receives on the job training and the unit credit for work experience or volunteer work/ internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):

The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

ELECLNM 701A
ELECTRICAL LINEMAN APPRENTICE RELATED TRAINING IIA (3)
Lecture: 2 hours / Lab: 2 hours

Module 1A: Instruction is given in the generation of electricity; hydro, steam, wind, the elements of electricity, static, magnetism, electric circuit, transmission lines and cables, sub-transmission lines and cables, distribution lines and cables. Students receive training in pole climbing; safe practices, installation of cross arms, insulator guys, hanging of transformer, stringing of lines, pulling cables, pole top rescue and vault rescue. Safety and first aid are emphasized.

Student Learning Outcome(s):

1. Discuss the history and development of the electric utility industry. 2. Identify specific industry tools and materials and discuss their usage. 3. Select and demonstrate proper electric utility PPE equipment.

ELECLNM 701B
ELECTRICAL LINEMAN APPRENTICE RELATED TRAINING IB (3)
Lecture: 2 hours / Lab: 2 hours

This course provides instruction in the generation of electricity; hydro, steam, wind, the elements of electricity, static, magnetism, electric circuit, transmission lines and cables, sub-transmission lines and cables, distribution lines and cables. Students receive training in pole climbing; safe practices, installation of cross arms, insulator guys, hanging of transformer, stringing of lines, pulling cables, pole top rescue and vault rescue. Safety and first aid are emphasized.

Student Learning Outcome(s):

1. Discuss the history and development of the electric utility industry. 2. Identify specific industry tools and materials and discuss their usage. 3. Select and demonstrate proper electric utility PPE equipment.

ELECLNM 702A
ELECTRICAL LINEMAN APPRENTICE RELATED TRAINING IIB (3)
Lecture: 2 hours / Lab: 2 hours

Instruction is given in electricity including; electrical math, series and parallel circuits, motors, induced emf, mutual and self induction, direct current, alternating current, transformers connections, transformer fusing, capacitors, voltage regulators, definitions, core losses, polarity, markings, oil insulation, cooling practices, loading and testing, and oil circuit breakers. Street light practices, circuits, utilitarian systems, lamps, sodium and mercury lights, glassware, refractors, control of streetlights, map reading, forms, test, regulators and safety in maintenance are all emphasized. In electricity including; electrical math, transformers, street light practices, map reading, and safety in maintenance.

Student Learning Outcome(s):

1. Applied calculations of measurement involved with electrical installations such as; transformer calculations, lighting loads in series, and parallel. 2. Demonstrate map reading. 3. Identify safety in general utility maintenance.

ELECLNM 702B
ELECTRICAL LINEMAN APPRENTICE RELATED TRAINING IIB (3)
Lecture: 2 hours / Lab: 2 hours

Instruction is given in electricity including; electrical math, series and parallel circuits, motors, induced emf, mutual and self induction, direct current, alternating current, transformers connections, transformer fusing, capacitors, voltage regulators, definitions, core losses, polarity, markings, oil insulation, cooling practices, loading and testing, and oil circuit breakers. Street light practices, circuits, utilitarian systems, lamps, sodium and mercury lights, glassware, refractors, control of streetlights, map reading, forms, test, regulators and safety in maintenance are all emphasized.

Student Learning Outcome(s):

1. Applied calculations of measurement involved with electrical installations such as; transformer calculations, lighting loads in series, and parallel. 2. Demonstrate map reading. 3. Identify safety in general utility maintenance.
ELECLNM 703A  ELECTRICAL LINEMAN APPRENTICE RELATED TRAINING IIIA (3)

Lecture: 2 hours / Lab: 2 hours

Instruction is given in the stringent use of state law G.0.095, safety orders, OSHA requirements, overhead construction standards, overhead jobs, joint pole agreement of California, and electrical service requirements. Course reviews conductor sizes, splices, stringing, dead-ending, guying, rigging, transformer fusing, circulation current, trouble shooting, street lighting and public relations, five-line maintenance using five-line tools, safely and first aid.

Student Learning Outcome(s):
1. Restate law G.0.095, safety orders, OSHA requirements. 2. Discuss the joint pole agreement of California. 3. State electrical service requirements.

ELECLNM 703B  ELECTRICAL LINEMAN APPRENTICE RELATED TRAINING IIIB (3)

Lecture: 2 hours / Lab: 2 hours

Instruction is given in the stringent use of state law G.0.095, safety orders, OSHA requirements, overhead construction standards, overhead jobs, joint pole agreement of California, and electrical service requirements. Course reviews conductor sizes, splices, stringing, dead-ending, guying, rigging, transformer fusing, circulation current, trouble shooting, street lighting and public relations, five-line maintenance using five-line tools, safely and first aid.

Student Learning Outcome(s):
1. Restate law G.0.095, safety orders, and OSHA requirements. 2. Discuss the joint pole agreement of California. 3. State electrical service requirements.

ELECLNM 704A  ELECTRICAL LINEMAN - APPRENTICE CABLE SPlicer MODULE A (3)

Lecture: 2 hours / Lab: 2 hours

This course provides instruction in the application of rigging principles and practices on underground installations. In addition, the installation of equipment, splicing theory, distribution circuits, oil circuit breakers, transformer characteristics, and connections will also be covered. State law requirements, safety and street lighting electrical systems will be introduced in this course.

Student Learning Outcome(s):
1. Discuss the history and development of the underground electric utility industry. 2. Identify specific underground industry tools and materials and discuss their usage. 3. Select and demonstrate proper underground electric utility PPE equipment.

ELECLNM 704B  ELECTRICAL LINEMAN - APPRENTICE CABLE SPlicer MODULE B (3)

Lecture: 2 hours / Lab: 2 hours

This course provides instruction in the application of rigging principles and practices on underground installations. In addition, the installation of equipment, splicing theory, distribution circuits, oil circuit breakers, transformer characteristics, and connections will also be covered. State law requirements, safety and street lighting electrical systems will be introduced in this course.

Student Learning Outcome(s):
1. Discuss the history and development of the underground electric utility industry. 2. Identify specific underground industry tools and materials and discuss their usage. 3. Select and demonstrate proper underground electric utility PPE equipment.
ETNTLGY 151  DC THEORY AND CIRCUIT FUNDAMENTALS (3)
Lecture: 3 hours

Instruction is given in basic electrical concepts, electron theory, Ohm's Law, Kirchoff's Laws, series circuits, Parallel circuits, combination circuits, principles of magnetism; and the care, use, and construction of basic meters for voltage, current, and resistance measurements. Problems illustrating accuracy necessary in measurements are given.

Student Learning Outcome(s):

Students will be able to analyze series, parallel, series-parallel, thevenin and Norton circuits.

ETNTLGY 152  DC THEORY AND CIRCUIT FUNDAMENTALS LAB (2) CSU
Lab: 6 hours
Corequisite: Electronics Technology 151;

Instruction is given in constructing basic electrical circuits. Series, parallel and series/parallel circuits are constructed and troubleshooting to understand the concept of troubleshooting techniques. Problems illustrating accuracy necessary in measurements are given.

Student Learning Outcome(s):

Students will use the equipment such as Digital Multimeter (DMM) and DC power supply to measure and troubleshoot various DC circuits.

ETNTLGY 153  APPLIED DC CALCULATIONS (1)
Lecture: 1 hour
Corequisite: Electronics Technology 151;

This course offers a review on basic arithmetic including addition, subtraction, multiplication, division, fractions, decimals, square roots, signed numbers, powers of ten, an introduction to algebra, and problems solving Ohm's Law and power calculations. Instruction is also provided in algebra, calculators, logarithms, graphs, phasers, and basic trigonometry as used in electronics.

Student Learning Outcome(s):

Students will be able to apply mathematical problem-solving models to DC circuits.

ETNTLGY 154  AC THEORY AND CIRCUIT FUNDAMENTALS (3) CSU
Lecture: 3 hours
Prerequisite: Electronics Technology 151;

This course offers the Theory of AC Electronics as it applies to basic and advanced circuits found in analog electronics. The course prepares the student for more advanced studies in Communications and Digital Electronics. Subjects covered include Capacitors, Magnetic Circuits, Inductors, Sinusoidal Alternating Waveforms, Basic Elements and Phasers, Series and Parallel AC Circuits, Series-Parallel AC Networks, Methods of Analysis, Network Theorems (AC), Power (AC), Resonance, Filtering and Bode Plots, Pulse waveforms, and an introduction to System Analysis. Basic algebra and trigonometry will be used as the tools for understanding the AC circuit as it applies to electronics systems.

Student Learning Outcome(s):

Students will experiment with alternating current, inductance and capacitance, time constants and filters in analyzing and troubleshooting AC circuits.

ETNTLGY 155  AC THEORY AND CIRCUIT FUNDAMENTALS LAB (2) CSU
Lab: 6 hours
Prerequisite: Electronics Technology 152;

An overview of the field in AC electronics that measures and analyzes the parameters and characteristics of AC circuits. The students studies their applications in electronic systems and becomes familiar with the various components used to make a viable circuit. In class, the students will also learn to construct and troubleshoot AC circuits.

Student Learning Outcome(s):

Students will develop and improve their abilities to follow instructions, make accurate measurements and calculations for different AC circuits.

ETNTLGY 156  APPLIED AC CALCULATIONS (1)
Lecture: 1 hour
Prerequisite: Electronics Technology 153;

At the completion of this course, students will be able to perform mathematical functions used in AC circuit analysis. The topics include solving various algebraic equations, fractional equations, simultaneous equations, trigonometric functions, vector algebra, and logarithms. These topics will be covered with emphasis on calculations involving series, parallel, and series-parallel AC circuits.

Student Learning Outcome(s):

Students will be able to apply mathematical problem-solving models to AC circuits.

ETNTLGY 157  SEMICONDUCTORS DEVICES AND APPLICATIONS (3) CSU
Lecture: 3 hours
Prerequisite: Electronics Technology 154;

This course imparts knowledge of semiconductors, electron devices including diodes, transistors, and their application in electronic circuits such as Amplifiers, Switches, Power Supplies, Oscillators, and Integrated Circuits.

Student Learning Outcome(s):

Students will analyze and troubleshoot semiconductor circuits.
ETNTLGY 161  F.C.C. RADIO OPERATOR LICENSE (3) CSU
Lecture: 3 hours
Prerequisite: Electronics Technology 155;

This course provides information required by the Electronics Technician to aid in passing the F.C.C. general radiotelephone license examination. The F.C.C. rules, regulations, and theory areas are explained and sample F.C.C. type tests are given. Marine and aeronautical rules and regulations are also studied and are necessary for passing the general radiotelephone examination.

Student Learning Outcome(s): The student will be able to pass Element 3 FCC Exam.

ETNTLGY 158  SEMICONDUCTORS DEVICES AND ELECTRONICS LABORATORY (3) CSU
Lab: 9 hours
Prerequisite: Electronics Technology 155;

This is a semiconductor devices laboratory course. It includes lab exercises using semiconductors devices including diodes, transistors, and their application in electronic circuits such as Amplifiers, Switches, Power Supplies, Oscillators, and Integrated Circuits.

Student Learning Outcome(s): Students will build electronic circuits. Will test and troubleshoot successfully. 12 semiconductor devices circuits will be constructed.

ETNTLGY 162  INTRODUCTION TO ELECTRONICS COMMUNICATIONS (3) CSU
Lecture: 3 hours
Corequisite: Electronics Technology 158;

This course covers circuit analysis of several complete AM/FM systems. The installations of C Band, K/U Band, and DDS satellite systems, the theory of cordless phones, microwave receivers/transmitters, cell phones, and TV video are covered.

Student Learning Outcome(s): Students will learn the principles of Electronics Communications, Amplitude Modulation, Frequency Modulation, Digital Television, Cellular Telephones, and Decibels.

ETNTLGY 159  DIGITAL CIRCUITS AND APPLICATIONS (3) CSU
Lecture: 3 hours
Prerequisite: Electronics Technology 154;

This is an introductory course in digital electronics and applications. The course covers the number systems, including the decimal, binary, octal, and hexadecimal number systems. The topics covered include the characteristics of TTL and CMOS logic families, combinational logic circuits, minimizing logic circuits, minimizing logic circuits using Boolean Operations and Karnaugh maps, encoders and decoders, sequential logic devices such as flip-flops, counters, shift registers, and memory devices.

Student Learning Outcome(s): Students will analyze and troubleshoot combinational and sequential digital circuits.

ETNTLGY 160  DIGITAL CIRCUITS AND APPLICATIONS LAB (2) CSU
Lab: 6 hours
Prerequisite: Electronics Technology 154;

This course is designed to provide students with the fundamentals of digital circuits and their applications. Lab activities include the characteristics of TTL and CMOS logic families, combinational logic, minimizing logic circuits using Boolean operations and Karnaugh maps, encoders and decoders, sequential logic devices such as flip-flops, counters, shift registers, and memory devices.

Student Learning Outcome(s): Students will construct, analyze, and troubleshoot combinational and sequential digital circuits.

ETNTLGY 155  FIBER OPTICS (3)
Lecture: 3 hours
Prerequisite: Electronics Technology 155;

This course is designed to provide students with the knowledge and skills necessary to become entry-level technicians in the network cabling industry with a concentration in fiber optics. Successful completion of this course leads to industry certification.

Student Learning Outcome(s): Students will be able to construct and test fiber optic cables.

ETNTLGY 163  INTRODUCTION TO ELECTRONICS COMMUNICATIONS LAB (3)
Lab: 9 hours
Corequisite: Electronics Technology 158;

This course allows students direct laboratory application of the radio principles and techniques acquired in the lecture sessions. Laboratory experiments will include the construction and analysis of circuits, AM modulation, AM detection, FM modulation, frequency multiplication, limiting, FM discrimination, and the construction, testing and alignment complete AM super-heterodyne radio receiver. Microprocessor, digital and solid state troubleshooting techniques are analyzed and performed, as are system level to component level troubleshooting and repair. Basic antenna measurements, troubleshooting and repairs are made.

Student Learning Outcome(s): The students will demonstrate the skills necessary to built an AM/FM Radio kit.

ETNTLGY 252  NETWORK CABLING SPECIALIST (3)
Lecture: 2 hours / Lab: 3 hours
Corequisite: Electronics Technology 158;

This course is designed to provide students with the basic skills used in network technology. The successful completion of the course leads to a certificate in network cabling. Students will become familiar with EIA/TIA 568 Standards (Electronics Industry Alliance/Telecommunications Association). Students will learn various cables used in network cabling industry such as CAT 5, CAT5E, and coaxial cables and correctly terminate them.

Student Learning Outcome(s): Students will be able to construct cables and make terminations used in network cabling.
ETNTLG 254 COMPUTER APPLICATIONS FOR ELECTRONICS TECHNOLOGY (3)
Lecture: 2 hours / Lab: 3 hours

This course introduces students to computer hardware, software related technology and their uses impact on society and education; hands-on experience with applications of software, such as Excel, Word, Power Point with an emphasis on electronics applications software such as Electronic Work Bench and VISIO.

Student Learning Outcome(s):
Students will be able to utilize computer software to effectively organize and communicate their work.

ETNTLG 255 COMPUTER-BASED ELECTRONICS I (1)
Lab: 3 hours

This course introduces the students to Electronics Workbench (MultiSim), Electronics Technology Computer-Aided Instruction (ETCAI), and MultiSim Computer-Based Training (CBT) Software Programs. This course is designed to enable students to construct and analyze circuits using Electronics Workbench. It also enables students to increase their knowledge of electronics, using CAI.

Student Learning Outcome(s):
Students will be able to utilize the Multisim software to construct and analyze different circuits.

ETNTLG 941 COOPERATIVE EDUCATION - ELECTRONICS TECHNOLOGY (4) CSU RPT 3
Lecture: 4 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

ENGINEER-OPERATOR/MAINTENANCE

OPMAINT 228 STEAM PLANT OPERATION I (6)
Lecture: 6 hours

Related engineering information concerning high pressure steam plants in office buildings and industrial establishments are studied in this course. Emphasis is given to steam power plant, use of steam tables, types of boilers, construction of boilers, boiler accessories, settings for combustion equipment and heating surfaces; operation of steam boilers and the combustion of fuels.

Student Learning Outcome(s):
SLO #1 Gather information on the various components of a boiler system. SLO #2 Critically analyze and then organize information on the application of boiler devices and or systems.

OPMAINT 229 STEAM PLANT OPERATION II (6)
Lecture: 6 hours

Instruction is given in steam engines, valve operating mechanisms and governors, and operating characteristics of steam engines. Course covers steam turbines, pumps, and auxiliary power plant equipment, steam plant efficiencies, boiler water treatment, troubleshooting, and power transmission. Completion of this second course prepares the trainee to take the Los Angeles City Fire Department examination for steam engineer's license.

Student Learning Outcome(s):
SLO #1 Gather information on the various components of a boiler system. SLO #2 Critically analyze and then organize information on the application of boiler devices and or systems.

ENGINEER-OPERATOR/MAINTENANCE - APPRENTICE

OPMA AP 100 O.S.H.A. BASED SAFETY STANDARDS: CONSTRUCTION & INDUSTRY (2)
Lecture: 2 hours

This course provides instruction on industry safety and health rules as it applies to workers and employers within the construction industry. Topics such as fall protection, lock out tag out procedures, PPE, excavations, etc. are covered. Participants that meet the required hourly attendance and successfully pass the final exam will be eligible to receive their OSHA (30 hr) safety-training certificate.

Student Learning Outcome(s):
1. Recognize appropriate training requirements and training methods.
2. Define OSHA specific construction terms such as: competent person, construction work, confined space, working space, general duty clause. 3. Select situational appropriate PPE.
OPMA AP 703  ENERGY MANAGEMENT (4)
Lecture: 4 hours

The computer’s use in the HVACR industry and the application of energy management technology in the improvement of efficiency. The goal is to prepare the maintenance engineer to use of modern technology, including computers in the continuing quest for improved energy management.

Student Learning Outcome(s):
SLO #1 Gather information on the various components of an energy management system. SLO #2 Critically analyze and then organize information on the application of a energy management system. SLO #3 Properly apply the English language to write an explanatory paper about rationals for using various energy management systems or practices, system. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO's: #1. Locating Information. #2. Reading for information. Relates To College Core SLOs: A: Critical Thinking D: Communications.

OPMA AP 704  ELECTRIC MOTOR CONTROL I FOR APPRENTICES (2)
Lecture: 1 hour / Lab: 3 hours

This course provides instruction in basic motor control fundamentals, including the basic function of controlling devices, review of basic motors, selection of motors and definitions. The class will discuss definitions for controller components and symbols, familiarization of N.E.M.A. standards and review of one-line, wiring and schematic diagrams. The class will also introduce the use of digital controllers for use in industry.

Student Learning Outcome(s):
SLO #1 Gather information on the various components of a motor control system. SLO #2 Critically analyze and then organize information on the application of motor control systems. SLO #3 Properly install various motor control systems. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO's: #1. Locating Information. #2. Reading for information. #4. Working safely with tools. Relates To College Core SLOs: A: Critical Thinking D: Communications.

OPMA AP 720  HVACR I (2)
Lecture: 1 hour / Lab: 3 hours

An introduction to the Principles and practices for the installation and maintenance of residential, commercial, and industrial heating, air conditioning, ventilation, and refrigeration systems. Equipment selection, maintenance, and safety will be covered.

Student Learning Outcome(s):
SLO #1 Gather information on the various components of a HVACR system. SLO #2 Critically analyze and then organize information on the application of HVACR equipment. SLO #3 Properly install various HVACR systems. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO's: #1. Locating Information. #2. Reading for information. #4. Working safely with tools. Relates To College Core SLOs: A: Critical Thinking D: Communications.

OPMA AP 724  FUNDAMENTALS OF ELECTRICITY (2)
Lecture: 1 hour / Lab: 3 hours

This course covers the basic principles and practices of A/C & D/C electricity. Analyzing series, parallel and complex circuits using Ohm’s law, the power equation, Kirchoff’s laws, and other applicable laws and equations.

Student Learning Outcome(s):
SLO #1 Gather information on the various components of a circuit analysis. SLO #2 Critically analyze and then organize information on the application of a circuit analysis. SLO #3 Construct various electrical circuits. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO's: #1. Locating Information. #2. Reading for information. #4 Working safely with tools. Relates To College Core SLOs: A: Critical Thinking D: Communications.

OPMA AP 727  INDUSTRIAL MECHANICS FOR APPRENTICES (2)
Lecture: 1 hour / Lab: 3 hours

Principles and practices for application of electro mechanics in environmental and manufacturing process control. The course will cover the use of devices and equipment in the control of industrial production and the maintenance of a healthy and comfortable environment in buildings.

Student Learning Outcome(s):
SLO #1 Gather information on the various components of a mechanical system installation. SLO #2 Critically analyze and then organize information on the application of a mechanical system installation. SLO #3 Construct or troubleshoot various mechanical systems. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO's: #1. Locating Information. #2. Reading for information. #4 Working safely with tools. Relates To College Core SLOs: A: Critical Thinking D: Communications.

OPMA AP 739  LOCKSMITHING AND SECURITY SYSTEMS FOR APPRENTICESHIP (4)
Lecture: 4 hours

This course is for the beginner. It is designed to teach a faculties maintenance worker how to perform in house locksmithing in a realistic and practical way. Topics will include: preventative maintenance, basic locksmithing tools, keys and locking devices, parts of a key, master key systems, installing basic lock sets, “Warded & Leer” tumbler, side bar wafer locks, electromagnetic locks, electric strikes and key coding machines.

Student Learning Outcome(s):
SLO #1 Gather information on the various components of a lock system. SLO #2 Critically analyze and then organize information on the application of locking systems. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO’s: #1. Locating Information. #2. Reading for information. Relates To College Core SLOs: A: Critical Thinking D: Communications.
The techniques used in maintaining wholesome and mutually beneficial relations with tenants and others is the primary purpose of this course. The need to understand the needs of all persons associated with a building is stressed. Instruction in the use of systems to maintain records and deliver timely and accurate reports is provided.

Student Learning Outcome(s):

SLO #1 Gather information on the various of good tenant relations. SLO #2 Critically analyze and then organize information on tenant relations. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO’s: #1. Locating Information. #2. Reading for information. Relates To College Core SLOs: A: Critical Thinking D: Communications.

OPMA AP 744 HVACR CONTROL SYSTEMS (2)

Lecture: 1 hour / Lab: 3 hours

This course provides an introduction to the principles and practices for the installation and maintenance of residential, commercial, and industrial heating, air conditioning, ventilation, and refrigeration control systems. System control equipment selection, maintenance, and safety will be covered.

Student Learning Outcome(s):

SLO #1 Gather information on the various components of a HVACR control system. SLO #2 Critically analyze and then organize information on the application of HVACR control systems. Relates to OPMA AP Program SLO: #3: Properly install various HVACR control systems. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO’s: #1. Locating Information. #2. Reading for information. #4. Working safely with tools. Relates To College Core SLOs: A: Critical Thinking D: Communications.

OPMA AP 745 PLUMBING CODE (4)

Lecture: 4 hours

Instruction in plumbing codes and ordinances that affect rough-in work in city and county areas; installation of wastes, vents, clean outs, traps, gas fittings, and gas vents: water pipe requirements.

Student Learning Outcome(s):

SLO #1 Gather information on the various aspect of the international plumbing code. SLO #2 Critically analyze and then organize information on the application of the international plumbing code. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO’s: #1. Locating Information. #2. Reading for information. Relates To College Core SLOs: A: Critical Thinking D: Communications.

OPMA AP 746 MAINTENANCE PLUMBING PRINCIPLES & PRACTICES (2)

Lecture: 1 hour / Lab: 3 hours

The course will provide instruction in plumbing principles and common practices. Theory and hands on application will be applied on various common maintenance plumbing installations and repairs operations.

Student Learning Outcome(s):

SLO #1 Gather information on the various components of a plumbing system installation. SLO #2 Critically analyze and then organize information on the application of plumbing devices and code for a basic plumbing system installation. SLO #3 Construct or troubleshoot various plumbing system applications. Relates to OPMA AP Program SLO: #1 Locate information #2 Reading for information #3 Work independently & interdependently to accomplish a shared professional outcome. #4 Work Safely with Tools. Relates to CDM Department PLO’s: #1. Locating Information. #2. Reading for information. #4 Working safely with tools. Relates To College Core SLOs: A: Critical Thinking D: Communications.
OPMA AP 750  INDOOR AIR QUALITY (4)
Lecture: 4 hours

This course emphasizes on operation of systems to provide quality air to indoor environments. AQMD requirements and pending regulations are reviewed. Organizing and implementing maintenance programs that include indoor air quality assessment and air balancing HVAC systems are covered.

Student Learning Outcome(s):
SLO 1. Discuss the health aspects of IAQ. SLO 2. Discuss airflow as it relates to IAQ. SLO 3. Discuss chemicals that can have a negative impact on IAQ.

OPMA AP 751  PRINT READING (4)
Lecture: 4 hours

This course covers instruction in basic blueprint reading including symbols and identification. Various drawing types, the information contained, and the primary uses for each type of drawing will be covered.

Student Learning Outcome(s):
SLO #1 Gather information from various types of blueprints. SLO #2 Critically analyze and then organize information gathered from various types of blueprints and related documentation. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO's: #1. Locating Information. #2. Reading for information. Relates To College Core SLOs: A: Critical Thinking D: Communications.

OPMA AP 753  BOILERS FOR APPRENTICES (4)
Lecture: 4 hours

Related engineering information concerning high pressure steam plants in office buildings and industrial establishments are studied in this course. Emphasis is given to steam power plant, use of steam tables, types of boilers, construction of boilers, boiler accessories, settings for combustion equipment and heating surfaces; operation of steam boilers and the combustion of fuels

Student Learning Outcome(s):
SLO #1 Gather information on the various components of a boiler system. SLO #2 Critically analyze and then organize information on the application of boiler devices and or systems. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO's: #1. Locating Information. #2. Reading for information. Relates To College Core SLOs: A: Critical Thinking D: Communications.

ENGINEERING, GENERAL

ENG GEN 101  INTRODUCTION TO SCIENCE, ENGINEERING AND TECHNOLOGY (2) UC/CSU
Lecture: 1 hour / Lab: 2 hours

Students learn about the engineering method and strategies for academic and career success in engineering. Students are introduced to mechanical, civil, electrical, and computer systems engineering through project work. The vast range disciplines and opportunities in engineering are presented. Students are allowed to work collaboratively on some course assignments and in-class design projects. Only basic mathematics skills are required.

Student Learning Outcome(s):
1. Student will identify and distinguish between different fields of engineering by researching information about them and further select one of them as a career. 2. Student will identify effective methods to study engineering and demonstrate it in a team setting. 3. Student will demonstrate the knowledge of preparing an educational plan. 4. Students will be able to discuss the importance of ethics in engineering and show awareness of professional codes of conduct. 5. Students will employ campus resources including: library, career center, learning center, counseling and financial aid to succeed in their educational road map in an engineering transfer program.

ENG GEN 122  PROGRAMMING AND PROBLEM-SOLVING IN MATLAB (3) UC/CSU
Lecture: 2 hours / Lab: 3 hours
Prerequisite: Math 265

This course utilizes the MATLAB environment to provide students with a working knowledge of computer-based problem-solving methods relevant to science and engineering. It introduces the fundamentals of procedural and object-oriented programming, numerical analysis, and data structures. Examples and assignments in the course are drawn from practical applications in engineering, physics, and mathematics.

Student Learning Outcome(s):
1. Student will create, test and debug sequential MATLAB programs, as well as programs that use object-oriented techniques, in order to achieve computational objectives. 2. Student will apply numeric techniques and computer simulations to analyze and solve engineering-related problems. 3. Student will use MATLAB effectively to analyze and visualize data.
ENG GEN 131  STATICS (3) UC/CSU  
Lecture: 2 hours / Lab: 3 hours  
Prerequisite: Math 265, PHYSICS 001

Course covers vector analysis in one, two and three dimensions. Solution of problems involving forces and moments applied to bodies in static equilibrium. Determine centroids, areas, volumes and moments of inertia. Course includes analysis of forces acting on trusses, frames, and machines. Analytic and graphic solutions are used.

Student Learning Outcome(s):
1. Student will setup a Free Body Diagram (FBD) and show all external forces, reactions, constraints and moments. 2. Student will learn how to apply the equilibrium conditions and solve statically determinant problems. 3. Student will be to calculate and show Load (Force), Shear and Moments diagrams.

ENG GEN 151  MATERIALS OF ENGINEERING (3) UC/CSU  
Lecture: 3 hours  
Prerequisite: Chemistry 101 & Physics 1

This course is an introduction to materials science and engineering and different types of materials used in engineering design, emphasizing the relationships between structure, properties, and processing. Topics include: Atomic structure and bonding, atomic and ionic arrangements and imperfections, crystalline structures, metals, polymers, ceramics, composites including diffusion or atom and ion movements in materials, and mechanical properties and fracture including strain hardening and annealing. An illustration of the materials' fundamental differences and their application in engineering is also covered.

Student Learning Outcome(s):
1. Student will be able to classify materials according to structure and be able to comment on how the properties of a particular class of materials are related to their atomic, micro and macro structure. 2. Student will understand how materials behave under load and to understand the technical nomenclature used for describing the empirical behavior of materials under load. 3. Student will use published materials data to choose the best material for an application and to make estimates of component size. 4. Student will understand the different forming and processing techniques that are commonly used in industry in terms of their effect on the structure of the material and the resulting influence on physical properties.

ENG GEN 220  ELECTRICAL CIRCUITS I (4) UC/CSU  
Lecture: 3 hours / Lab: 3 hours  
Prerequisite: Math 267, PHYSICS 003; Corequisite: Math 275

This course covers electric circuit analysis in time and frequency domains, transient, and steady state solutions. Topics include linear circuit analysis techniques, Kirchhoff's Laws, Network Theorems, mesh and nodal analysis, OP amps and amplifiers, Thévenin/Norton equivalents circuits, natural-forced-complete response of RLC circuits, AC circuits, phasors, three phase power, and frequency response and resonance. The laboratory includes experimental verification of the laws of AC and DC circuits, Kirchhoff's laws, and Thévenin's theorem using instruments such as multimeter, oscilloscopes, and signal generators.

Student Learning Outcome(s):
1. Student will analyze DC & AC circuits to find current, voltage, resistance, power, and/or energy. 2. Student will draw and label circuit diagrams and show thorough mathematical solutions. 3. Student will apply and solve problems with different circuit analysis techniques and demonstrate a process for selecting an appropriate technique for a given problem.

ENG GEN 231  DYNAMICS (3) UC/CSU  
Lecture: 2 hours / Lab: 3 hours  
Prerequisite: ENG GEN 131

This course covers fundamentals of kinematics and kinetics of particles and rigid bodies. Topics include kinematics of particle motion, Newton's second law, work-energy and momentum methods, kinematics of planar and three-dimensional motions of rigid bodies, work-energy and momentum principles for rigid body motion, and an introduction to mechanical vibrations.

Student Learning Outcome(s):
1. Student will sketch free-body and kinetic diagrams by isolating rigid bodies and vectorially solve 2-D and 3-D kinematics and dynamics problems. 2. Student will apply Newton's second law to drive and analyze the equations of motion of a particle, a system of particles and a rigid body in motion. 3. Student will employ the conservation laws or principles of motion in mechanics i.e., Law of Conservation of Energy, Law of Conservation of Momentum (linear and angular), Impact Theory and principals of Relative Motion to solve dynamics problems, as an alternative method to Newtons laws of motion.

ENG GEN 241  STRENGTH OF MATERIALS (3) UC/CSU  
Lecture: 2 hours / Lab: 3 hours  
Prerequisite: ENG GEN 131

Plane-stress-strain, axial, torsional, bending and shear stresses are studied, including combined loads, Mohr’s Circle, principal stresses and strains, and pressure vessels. Generalized Hooke’s Law, material properties, allowable stresses, factor of safety, statically indeterminate members, shear and moment diagrams; moment-area, and slope by double integration, singularity functions, superposition, moment-area, and Castigliano methods are also studied. Topics include thermal expansion, indeterminate forms and column buckling.

Student Learning Outcome(s):
1. Student will be able to understand the different types of stresses including normal, torsion, bending and shearing. 2. Student will be able to calculate and show Load (Force), Shear and Moments diagrams. 3. Student will be able to calculate internal stresses and strains of statically indeterminate structural problems given external loading. Methods employed consider derived bending, torsion, shear, shear center, and axial formulas, traditional equilibrium and compatibility equations, integration of differential equations, and energy. 4. Student will be able to calculate structural failure loads. Methods employed include interaction formulas for stress and strain, buckling, and deflection considerations. 5. Student will be able to solve and assess Engineering Strength of Materials literature to solving Strength of Materials problems.
ENGINEERING GRAPHICS & DESIGN

EGD TEK 101  ENGINEERING GRAPHICS (3) UC/CSU
Lecture: 2 hours / Lab: 2 hours
Advisory: Math 240

This introductory course covers the fundamentals of technical drawing and an introduction to computer-aided design (CAD) with a focus on mechanical applications. Topics include the development of visualization and technical sketching skills in conjunction with orthographic projections; dimensioning and tolerancing practices, including an introduction to geometric dimensioning and tolerancing (GD&T); and descriptive geometry with applications to engineering. Lab work includes hand sketching and the use of two- and three-dimensional CAD systems. Students use one or more CAD software packages to draft and model various objects. The use of CAD software is an integral part of the course.

Student Learning Outcome(s):
1. Students will create design drawings using established industry standards and the principles of orthographic projection. 2. Students will reverse engineer using CAD software.

ENGLISH AS A SECOND LANGUAGE

E.S.L. 004A  COLLEGE ESL IV: WRITING AND GRAMMAR (6)
Lecture: 6 hours
Prerequisite: ESL 3A

In ESL 4A, students continue to study grammar, sentence writing and paragraph writing. They also move forward to producing simple essays. ESL 4A is part of a sequence of ESL writing courses that prepare students for college level composition.

Student Learning Outcome(s):
Students will employ appropriate grammar to produce simple, organized, three-paragraph descriptive, narrative, and expository essays.

E.S.L. 004B  COLLEGE ESL IV: READING AND VOCABULARY (3)
Lecture: 3 hours
Prerequisite: 3B

Students in this intermediate ESL course learn reading comprehension, critical reading, and vocabulary skills to prepare for their academic work across the curriculum. This course is designed to build academic language fluency including academic vocabulary.

Student Learning Outcome(s):
1. The student will identify the main ideas and supporting details of multi-paragraph reading passages written at the intermediate level. 2. The student will deduce the meanings of unfamiliar words by using contextual clues in reading passages written at the intermediate level.

E.S.L. 005A  COLLEGE ESL V: WRITING AND GRAMMAR (6)
Lecture: 6 hours
Prerequisite: ESL 4A

In ESL 5A, students consolidate grammar and paragraph writing skills. They also practice writing organized, well-developed essays. ESL 5A is part of a sequence of courses that prepare students for college level composition.

Student Learning Outcome(s):
Students will write organized, well-developed five-paragraph essays in a variety of rhetorical modes.

E.S.L. 005B  COLLEGE ESL V: READING AND VOCABULARY (3)
Lecture: 3 hours
Prerequisite: ESL 4B

ESL 5B students review the skills learned in ESL 4B, plus take reading notes and organize them into an outline and practice strategic reading skills for test-taking. Students also acquire new vocabulary and practice figuring out new words using prefixes and suffixes.

Student Learning Outcome(s):
1. The student will differentiate between main ideas and details in an expository text written at the high intermediate level. 2. The student will accurately interpret information on a graph, table, chart, or map.

E.S.L. 006A  COLLEGE ESL VI: WRITING AND GRAMMAR (6)
Lecture: 6 hours
Prerequisite: ESL 5A

ESL 6A students practice prewriting, editing, and rewriting skills that will lead to organized, well developed essays. A short research paper is also included. ESL 6A is part of sequel of ESL writing courses that leads to college level composition.

Student Learning Outcome(s):
1. Students will use critical thinking skills to write college level compositions, including research based topics. 2. Students will learn self-editing and peer-editing skills.
ENGLISH 021 ENGLISH FUNDAMENTALS (3)
Lecture: 3 hours
Prerequisite: Placement Exam or Learning Skills 2C or Basic Skills 2CE

This course focuses on the fundamentals of academic reading, writing, and critical thinking. It reinforces basic skills such as the correct use of punctuation, spelling, and sentence structure. Students incorporate these skills, along with sentence combining techniques, to write single paragraph responses progressing to short essays (250-500 words) that have an introduction, body, and conclusion.

Student Learning Outcome(s):
1. Write a mechanically-sound timed-in class 5-paragraph essay. 2. Write a brief (500-600 word) research paper, demonstrating rudimentary MLA format.

ENGLISH 028 INTERMEDIATE READING AND COMPOSITION (3)
Lecture: 3 hours
Prerequisite: English 21, English 100 or Placement Exam

In this course, students plan, draft, revise, and edit compositions of increasing sophistication and complexity, progressing from multi-paragraph essays to research papers. Writing is based on readings that cover topics that challenge students’ thinking and provide an intellectual background for the assignments. Readings, discussion, and writing assignments may focus on fiction, non-fiction, memoirs, and/or poetry. This course prepares students for English 101.

Student Learning Outcome(s):
Write a well developed, coherent timed essay. Write a 4-6 page research paper, demonstrating MLA format and citations.

ENGLISH 046 READING AND STUDY IMPROVEMENT (3)
Lecture: 3 hours

Students review reading skills and strategies necessary for college success, including reading for main ideas, determining organizational patterns of details presented, and drawing logical conclusions in paragraphs and short essays. Readings and vocabulary study skills are 9th grade to college level. Students are introduced to more critical reading skills (determining author’s purpose, tone, point of view, and intended audience) and literacy concepts (interpreting figures of speech, characterization, plot, setting, and theme).

Student Learning Outcome(s):
1. Read and retain information from selected texts at a 70% minimum score. 2. Read and analyze college-level texts.

ENGLISH 100 ACCELERATED PREP: COLLEGE WRITING (3)
Lecture: 3 hours
Prerequisite: Learning Skills 2C; Corequisite: Basic Skills 002CE or any Academic Prep course

This class prepares students for academic reading, critical thinking, and writing expected in career/technical pathways, transfer and associate-degree classes. Students plan, draft, revise, and edit compositions of increasing sophistication and complexity, progressing from paragraphs to multi-paragraphs to research projects. Writing is based primarily on non-fiction college-level readings. With accelerated preparation for the English 101 Challenge Exam, this course prepares students for either English 28 or English 101 based on achievement of identified competencies.

Student Learning Outcome(s):
English 28 promotion: Write a well developed, coherent timed essay that demonstrates skills needed for English 28. And write a 750-word research paper, demonstrating ability to synthesize, analyze and evaluate ideas and sources, showing familiarity with MLA format and citations. English 101 promotion: Write a well developed, coherent timed essay that demonstrates skills needed for English 101. And write a 1000 to 1500-word research paper, demonstrating ability to synthesize, analyze and evaluate ideas and scholarly sources, showing competency using MLA format and citations.
ENGLISH 101  COLLEGE READING AND COMPOSITION I (3)  
UC/CSU  
Lecture: 3 hours  
Prerequisite: English 28 or ESL 8  

In English 101, students extend their knowledge of the principles and structure of academic writing beyond the level of English 28 through the practice of writing essays and the analysis of non-fiction and select short and full-length fiction. The course includes an introduction to persuasive discourse, research skills, critical reading and thinking, and argumentation. Various compositions and extensive research assignments are required. English 101 fulfills the writing requirement for the Associate of Arts and Sciences degree and fulfills the transfer requirement to a four-year college.  

Student Learning Outcome(s):  
1. Write a well-developed, coherent and unified timed essay that demonstrates interpretive, critical thinking, and analytical skills based on a written text. 2. Write a research paper (1250 to 1750 words of text) demonstrating critical thinking and analytical skills, and showing inclusion of credible sources and mastery of recognized documentation style.

ENGLISH 102  COLLEGE READING AND COMPOSITION II (3)  
UC/CSU  
Lecture: 3 hours  
Prerequisite: English 101;  

This course develops critical thinking, reading, and writing skills beyond the level achieved in English 101. It emphasizes logical reasoning, analysis, and strategies of argumentation using literature and theories of persuasive discourse. Evaluations are made of texts that reveal the multicultural/global aspects of society, which include traditional and contemporary forms in fiction, poetry, essays, and drama.  

Student Learning Outcome(s):  
Analyze a literary work that employs themes and theories, using MLA citation, emphasizing student interpretation not synthesis of sources. Write an in-class essay.

ENGLISH 103  COMPOSITION AND CRITICAL THINKING (3)  
UC/CSU  
Lecture: 3 hours  
Prerequisite: English 101  

This course is designed to help students clarify and refine their thinking and reasoning processes, allowing them to more effectively solve problems and analyze complex issues. Students will develop skills in critical thinking, reading, and writing, which will help them succeed in their other academic coursework, regardless of discipline. Writing assignments will emphasize critical analysis and argumentation, and readings will reflect diverse points of view and cultures.  

Student Learning Outcome(s):  
Students will be able to research, identify, and incorporate credible sources and compose argumentative essays and research papers using accepted documentation formats. Students will be able to interpret, analyze, and compose a well developed argumentative essay, using appropriate appeals.

ENGLISH 127  CREATIVE WRITING (3)  UC/CSU  
Lecture: 3 hours  
Prerequisite: English 101  

Introductory workshop offers writers accessible, hands-on exercises in crafting poetry, personal narratives, short stories, and screenplays. Content includes analysis of select prose, poetry and basic vocabulary related to structure, form, genre and style, with special focus on in-class peer critiques and revision as an integral component of the writing process. Workshop culminates in the delivery of a 40-50 page "Writer's Portfolio" containing original writings students have created and revised during the semester.  

Student Learning Outcome(s):  
1. Compose a variety original writings that reflect creative modes, multiple genres, and multiple techniques. 2. Analyze, interpret, and critique writings of published authors and fellow students.

ENGLISH 203  WORLD LITERATURE I (3)  UC/CSU  
Lecture: 3 hours  
Prerequisite: English 101;  

This course surveys world literature in translation, including representative selections from Asian, Greek, and Latin literature, and European masterpieces of the Middle Ages and Renaissance, and the Bible.  

Student Learning Outcome(s):  
1. Analyze a selection of world literature in its literary significance, cultural and historical context. 2. Discuss literary works as they relate to their political and social contexts.

ENGLISH 205  ENGLISH LITERATURE I (3)  UC/CSU  
Lecture: 3 hours  
Prerequisite: English 101; Advisory: English 102;  

This course is a chronological survey of the English language, literary forms, and ideas from the Anglo-Saxon period through the eighteenth century (Old English to the Neoclassical period), with special attention to Chaucer, Spenser, Shakespeare, Milton, Dryden, Pope, Swift, and Johnson as representatives of their respective periods. Extensive reading and discussion of works. Strong writing component and emphasis on textual analysis. Examination of the relationship between historical events and literary works.  

Student Learning Outcome(s):  
1. Student will demonstrate familiarity with important authors, works, genres, and themes of the period. 2. Student will analyze and interpret themes found in the literature and intellectual movements of the period. 3. Student will demonstrate understanding of an appropriate academic discourse and the conventions of critical literary analysis. 4. Student will relate the literary works to their historical, philosophical, social, political and/or aesthetic contexts.
**GRADUATION REQUIREMENTS AND EDUCATIONAL PROGRAMS**

**ENGLISH 206**  
**ENGLISH LITERATURE II (3) UC/CSU**  
**Lecture:** 3 hours  
**Prerequisite:** English 101;  

Course will consist of a chronological survey of major authors and texts of British literature from the Romantic period, the Victorian Age, the Twentieth Century, and after. There is extensive reading and discussion of works as well as a strong writing component and emphasis on textual analysis, including examination of the relationship between historical events and literary works.  

**Student Learning Outcome(s):**  
1. Demonstrate familiarity with important authors, works, genres, and themes of the period; and analyze themes found in the literature and intellectual movements of the period 2. Relate the literary works to their historical, philosophical, social, political, and aesthetic contexts.

**ENGLISH 207**  
**AMERICAN LITERATURE I (3) UC/CSU**  
**Lecture:** 3 hours  
**Prerequisite:** English 101;  

This course surveys American literature from 1608 to the Civil War, emphasizing major writers and works, as well as writers who suggest the diversity of subject and opinion in American literature.  

**Student Learning Outcome(s):**  
SLO 1 Demonstrate an understanding of the contexts historical, intellectual, social, and cultural on a broad range of American literature from the Colonial Period to the Civil War Period. SLO 2 Identify literary figures and works, including those of the traditional canon as well as culturally diverse and often over-looked voices.

**ENGLISH 208**  
**AMERICAN LITERATURE II (3) UC/CSU**  
**Lecture:** 3 hours  
**Prerequisite:** English 101;  

This survey of American literature from the Civil War period to the present emphasizes major writers and works in order to understand, appreciate, and investigate multicultural influences within national identify.  

**Student Learning Outcome(s):**  
1. Demonstrate an understanding of the contexts historical, intellectual, social, and culturally diverse voices on a broad range of American literature from Civil War Period to the present. 2. Identify major literary figures and their works in the period. 3. Assess the historical development and cultural impact of themes that recur in American literature.

**ENGLISH 212**  
**POETRY (3) UC/CSU**  
**Lecture:** 3 hours  
**Prerequisite:** English 101;  

English 212 features the reading, discussion, and analysis of selected American, British, and world poetry. Students will also write poetry. The course is designed to increase the students' understanding and enjoyment of poetry.  

**Student Learning Outcome(s):**  
Demonstrate knowledge of voice, imagery, and poetic conventions of form and sound, using original language. Effectively analyze poetry in light of historical context, critical theories, and/or formal elements.

**ENGLISH 215**  
**SHAKESPEARE I (3) UC/CSU**  
**Lecture:** 3 hours  
**Prerequisite:** English 101; **Advisory:** English 102;  

Course introduces students to Shakespeare’s prose and poetry through several major plays and sonnets with an additional examination of Elizabethan England and the relationship between historical events and literary works. Course features a strong reading and writing component with an emphasis on class discussion, research and textual analysis.  

**Student Learning Outcome(s):**  
1) understand dramatic technique and nuances of language in Shakespearean poetry and drama 2) recognize and analyze Shakespearean use of genre (Comedy, History, Tragedy, Romance), theme, character, setting, humor and allusion 3) Compare and interpret Shakespearean drama through theatrical presentation.

**ENGLISH 240**  
**LITERATURE AND THE MOTION PICTURE I (3) UC/CSU**  
**Lecture:** 3 hours  
**Prerequisite:** English 101;  

This course is designed to give the student opportunities to view, analyze, and evaluate films of artistic and cultural significance. The relationship between literature and film is discussed and evaluated.  

**Student Learning Outcome(s):**  
In creating an analysis of both media, students will locate research materials on various works, issues, ideas in texts and online. Students will demonstrate an understanding of MLA format and source documentation in their essays.

---

**ENVIRONMENTAL DESIGN**

**ENV 101**  
**FOUNDATIONS OF DESIGN I (3) UC/CSU**  
**Lecture:** 1 hour / **Lab:** 4 hours  

Students develop creative, conceptual and analytical skills by creating simple to complex two and three dimensional projects based on nature systems and structural integrity. Connections between movement, rhythm, cycle, kinematics and mathematical formulation are explored in class as a foundation for smart spaces. Students will learn to properly communicate architectural concepts through drawings, renderings, physical models, and computer 3-D modeling. Form and space design principles, theories, order and methodologies are explored and incorporated into student projects. Process and procedures are applied to personal innovative projects inspired by Gaudi, Buck Fuller, Frank Lloyd Wright and Peter Eiseman. The profession of architecture and its relationship to others for the life cycle and sustainable synergy in the AEC Industry (Architecture, Engineering and Construction) are defined. This course is critical for students interested in pursuing a higher degree in architectural or a related design field. Students will also create a portfolio of their work.  

**Student Learning Outcome(s):**  
1. Students will identify patterns found in nature. 2. Students will apply natures patterns in developing structural design model compositions. 3. Students will develop drawing using balance, rhythm, cycles, movement and mathematical formulation.
ENVIRONMENTAL SCIENCE

ENV SCI 001 THE HUMAN ENVIRONMENT: PHYSICAL PROCESSES (3) UC/CSU

Lecture: 3 hours

Introduction to the environmental mechanisms that constitute our life support systems and the social, political and economic factors that are the ultimate cause of these problems. This includes an examination of the difference between science and technology and the limits to technological solutions to our environmental problems. The basic science required to understand how our environmental systems work is presented followed by analysis of the essential components of our life support systems and how we impact them. Finally, the major environmental issues are analyzed along with potential solutions to these problems where they exist.

Student Learning Outcome(s):

Upon successful completion of the course, the student will be able to: 1. Describe the scientific method, the nature of scientific inquiry and apply the scientific process to assess real world problems and situations. 2. Discuss the status of environmental quality and pollution, and suggest possible remediation of problems. 3. Discuss the interrelationship between the environment and society including at least 3 influences from economics, aesthetics, culture, ethics, and/or law.

ESL 003A COLLEGE ESL III: WRITING AND GRAMMAR (6)

Lecture: 6 hours

Prerequisite: ESL 2.

In ESL 3A, students continue to learn good sentence writing, which includes basic punctuation and grammar. Students are also introduced to beginning level paragraph writing. ESL 3A is part of a sequence of ESL writing courses that prepare students for college level composition.

Student Learning Outcome(s):

Students will be able to identify, utilize and demonstrate basic speaking, listening, grammar, reading, and writing skills at a beginning-intermediate level.

ESL 003B COLLEGE ESL III: READING AND VOCABULARY (3)

Lecture: 3 hours

Prerequisite: ESL 2.

ESL 3B students learn basic English reading skills including previewing, skimming, scanning, main idea identification, and basic dictionary skills. Students learn new vocabulary and practice figuring out word meaning from context.

Student Learning Outcome(s):

Students will utilize previewing, skimming, and scanning to comprehend a text, and will be able to understand simple charts and graphs and summarize readings.

ESL 003C COLLEGE ESL III: LISTENING AND SPEAKING (3)

Lecture: 3 hours

Prerequisite: ESL 2.

In ESL 3C, students practice listening and speaking to communicate basic information regarding everyday school, work and social topics. They make class presentations based on oral interviews, learn common idioms, and practice pronunciation of pairs of similar-sounding words which commonly present difficulty.

Student Learning Outcome(s):

Students will be able to understand and follow oral and written directions by responding appropriately to spoken questions, statement, and prompts; discriminate between statements of fact and opinion, questions and commands; and produce short answers and simple sentences expressing fact and personal opinion.

ESL 006C COLLEGE ENGLISH AS A SECOND LANGUAGE VI: LISTENING AND SPEAKING (3)

Lecture: 3 hours

Prerequisite: ESL 5C or placement.

This course complements E.S.L. 6A and 6B and focuses on development of advanced speaking and listening skills necessary for college and vocational study. Students refine their abilities to participate in academic and vocational discussions and meetings.

Student Learning Outcome(s):

Students will utilize formal, academic language to present and support an argument.

ESL 008 COLLEGE ENGLISH AS A SECOND LANGUAGE VIII: ADVANCED ESL COMPOSITION (6) CSU

Lecture: 6 hours

Prerequisite: ESL 6A

ESL 8 is a course in written composition and critical reading skills for the English-as-a-Second Language student. The emphasis is on writing based primarily on critical reading and secondarily on life experiences. Advanced grammar skills are emphasized throughout each lesson.

Student Learning Outcome(s):

Students will write a series of essays leading up to a research paper.
FASHION DESIGN

FASHDSN 111  CLOTHING CONSTRUCTION (5) CSU  
Lecture: 2.5 hours / Lab: 7.5 hours

The students will be given instruction in single needle machine operation, sewing technique projects, garment assembly projects, occupational information and method of evaluation and relationship to the Fashion Industry. Basic information needed for entry level employment is provided.

Student Learning Outcome(s):

Student will compile a notebook consisting of industry construction techniques. Student will construct a trouser pant. Student will construct a button front skirt.

FASHDSN 112  BASIC FASHION ART AND DESIGN (5) CSU  
Lecture: 2.5 hours / Lab: 7.5 hours

Instruction includes drawing the women’s fashion figure, drawing children and men’s figures, flats, various styles and details. Introduction to color, design theory, fabric properties and rendering. Merchandising a garment line.

Student Learning Outcome(s):

Student will draw a group of technical flat sketches. Student will develop a portfolio of drawings.

FASHDSN 118  ADVANCED CLOTHING CONSTRUCTION (2) CSU  
Lecture: 1 hour / Lab: 3 hours

Prerequisite: Fashion Design 111; Fashion Design 112.

The objective of this course is to advance the sewing skills of students using specialized machinery. Students will construct garments using knit fabric, lycra/spandex, and Chiffon.

Student Learning Outcome(s):

Students will construct a one-piece swimsuit with bra cups helena lining and specialized elastics. Students will construct a lined skirt with french seams and invisible zipper.

FASHDSN 119A  HISTORY OF COSTUME I (1.5) CSU  
Lecture: 1.5 hours

This course offers an overview of the evolution of fashion from its beginnings in the ancient world through the Baroque and Rococo Eras. Cross cultural influences on fashion through wars, trade, travel, immigration, and communication will be discussed.

Student Learning Outcome(s):

Students will create a presentation board tracing the historical and or cultural influences of a present day garment.

FASHDSN 119B  HISTORY OF COSTUME II (1.5) CSU  
Lecture: 1.5 hours

This course will examine events of each period between 1800 and the present and their influence on fashion. Emphasis is placed upon fabrications and silhouettes which represent each period. The ongoing influence of vintage fashion, on contemporary design, will be analyzed.

Student Learning Outcome(s):

Students will write a research paper including multiple media resources, a bibliography and the option of including visual elements.

FASHDSN 120  BASIC PATTERN MAKING & DESIGN (5) CSU  
Lecture: 2.5 hours / Lab: 7.5 hours

Prerequisite: Fashion Design 111; Fashion Design 112.

Instruction is given on drafting the basic block, multiple darts and gathers, style lines, sleeves, collars, skirts, and bodice silhouettes.

Student Learning Outcome(s):

Student will execute a pattern and garment utilizing basic pattern manipulations. Student will design and create a sketch for an original dress style from pattern through sewn garment that will include specific elements.

FASHDSN 122  GRADING AND MARKER MAKING (5)

Lecture: 2.5 hours / Lab: 7.5 hours

Instruction is given in grading the basic block, multi-patterns, the complete pattern for men, women and children, in a variety of sizes, make a marker, manipulate the one and two darts block, draft the basic dart positions, demonstrate the slash and pivot methods, draft extensions, button placement and facing.

Student Learning Outcome(s):

Student will grade a princess style pattern including facings. Student will grade a stylized dress including stylized darts and facings. Student will use industry related software procedures to grade basic patterns.

FASHDSN 125A  TEXTILES (1.5) CSU  
Lecture: 1.5 hours

This course will introduce design students to fabrications and their appropriate styling. Fabrics discussed will include cottons, woolens, synthetics, and organics as well as support fabrications. Care and handling along with machinery for construction will be covered in this course.

Student Learning Outcome(s):

Student will recognize specific fabrics and identify their use and machinery needed to complete a finished garment.
FASHDSN 125B  TEXTILE SCIENCE (1.5) CSU  
Lecture: 1.5 hours  
This course is an introduction and overview of trade terminology, characteristics of fabrics. This course is an introduction and overview of trade terminology, characteristics of fabric. Topics discussed include: types of yarns and properties, twist yarn, yarn numbering systems and factors in yarn influencing quality. 
Student Learning Outcome(s):  
Student will identify fiber, fabrics and properties.

FASHDSN 126  MANUFACTURING AND DESIGN ROOM PROCESS (1) CSU  
Lecture: 1 hour    
Prerequisite: Fashion Design 225;  
Instruction is provided on manufacturing and design room process including industry overview and terminology. Cost sheets, specification sheets and inspiration boards will be emphasized in the course.  
Student Learning Outcome(s):  
Student will execute a specification sheet. Student will create a cost sheet. Student will design and present an inspiration board.

FASHDSN 130  DRAPING & DESIGN (5) CSU  
Lecture: 2.5 hours / Lab: 7.5 hours  
Prerequisite: Fashion Design 120.  
Instruction is given in fundamental draping procedures. The basic block and dart variations, yoke styles, torso styles, advanced skirts, cowls, stretch knits, and current style adaptation are practiced.  
Student Learning Outcome(s):  
Student will drape a cowl blouse and stylized skirt in woven fabric including a finished pattern. Student will drape and create an original style in knit fabric and complete a finished pattern.

FASHDSN 132  ADVANCED PATTERNS AND DESIGN (5) CSU  
Lecture: 2.5 hours / Lab: 7.5 hours  
Prerequisite: Fashion Design 120 and Fashion Design 122;  
Instruction is given in torso, jacket and pant blocks, sleeves-in-one with the bodice, neckline variations, and style adaptations according to current styling.  
Student Learning Outcome(s):  
Student will design and create a contour blouse style and complete a finished pattern. Student will draft and create a pant style and complete a finished pattern. Student will draft and create a lined jacket style and complete a finished pattern.

FASHDSN 137  BUSTIER CREATION (2) CSU  
Lab: 6 hours  
Research historical bustier (corset foundation) designs and construction methods and adapt them to create currently fashionable bustiers. Fundamentals of evening dress foundation.  
Student Learning Outcome(s):  
Students will be able to drape and fit an evening dress foundation block to fit a form and construct an evening dress foundation with pads and bones.

FASHDSN 138  TAILORING TECHNIQUES FOR READY TO WEAR (2) CSU  
Lab: 4 hours  
The objective of this course is to advance the tailoring skills of fashion design students. Instruction will be given on preparation and cutting of fabric, basic hand stitching, the use of steam pressing equipment, and basic elements of tailored apparel.  
Student Learning Outcome(s):  
Students will construct a lined jacket incorporating required elements.

FASHDSN 139  COORDINATED SPORTSWEAR (2) CSU  
Lecture: 1 hour / Lab: 3 hours  
Prerequisite: Fashion Design 132; Advisory: Fashion Design 118; Fashion Design 138;  
Instruction is given on the development of coordinated sportswear including story board presentation and critique. This class has been developed to focus on this most important component of the local apparel industry with concentration on jacket and pant construction and coordination of multiple fabrications within a group.  
Student Learning Outcome(s):  
Student will develop and present a story board for a coordinated sportswear group. Student will design produce elements of a coordinated sportswear group.

FASHDSN 140  ADVANCED DRAPING & DESIGN (2) CSU  
Lecture: 1 hour / Lab: 2 hours  
Prerequisite: Fashion Design 130;  
This course includes the draping of selected garment types & style innovations. Students use either muslin or fashion fabric according to design and fabrication. Original designs are created & executed in fabric.  
Student Learning Outcome(s):  
Student will drape and create a bias gown inspired by Vionette including a complete pattern. Student will drape and create an advanced style contemporary jacket using innovative style lines and will draft a complete pattern.
FASHDSN 141  ADVANCED DESIGN (5) CSU  
Lecture: 2.5 hours / Lab: 7.5 hours  
Prerequisite: Fashion Design 130 and Fashion Design 132;  
Instruction is given in knit blocks, specialized fabrics, dartless blocks, knock-offs, and specialized projects relating to current trends.  
Student Learning Outcome(s):  
Student will replicate an intricate pant style including a complete pattern and finished garment. Student will design and create a swim suit using industry required fabrications and draft of complete pattern. Student will design and construct a cocktail dress in appropriate assigned fabrications using drafting and draping techniques and complete pattern.

FASHDSN 142  MANUFACTURING PRODUCTION (5) CSU  
Lecture: 2.5 hours / Lab: 7.5 hours  
Prerequisite: Fashion Design 141;  
Instruction is given in design and creation of garments for showing to the apparel industry. Included is the creation of children’s and men’s designs along with evening and avant garde styles and the development of a perfect production patterns for a minimum of two ensembles. Field trips, senior evaluation, and job orientation are also included.  
Student Learning Outcome(s):  
Student will be required to complete two original designs for selected categories to be presented in the department fashion show. Student will be required to present a current resume and demonstrate the ability to interview for a professional position.

FASHDSN 147  FASHION SHOW PRODUCTION (2) CSU  
Lecture: 1.5 hours / Lab: 1.5 hours  
Instruction is given on developing a theme and overall concept for presenting a fashion show. Topics include history of fashion presentations, model selection, fitting, stage design and execution plus behind the scenes production of a department fashion show.  
Student Learning Outcome(s):  
Formulate a fashion show production plan including; a preliminary budget, venue description, and show categories.

FASHDSN 148  ACTIVWEAR DESIGN (2) CSU  
Lab: 6 hours  
Prerequisite: Fashion Design 132 or Fashion Design 225 and 226  
Instruction is given in the specialized area of activewear. Focusing on fabrication, design, inner-construction, and sewing techniques. The student will draft basic pattern blocks, design and construct activewear garments.  
Student Learning Outcome(s):  
Students draft and correct a basic dartless knit block to their personal measurements and body alignment using stretch reduction calculations.

FASHDSN 141  ADVANCED DESIGN (5) CSU  
Lecture: 1 hour / Lab: 2 hours  
Prerequisite: Fashion Design 112;  
Instruction is given on design and creation of garments for showing to the apparel industry. Included is the creation of children’s and men’s designs along with evening and avant garde styles and the development of a perfect production patterns for a minimum of two ensembles. Field trips, senior evaluation, and job orientation are also included.  
Student Learning Outcome(s):  
Student will develop a portfolio and prepare a resume.

FASHDSN 185  DIRECTED STUDY - FASHION DESIGN (1)  
Lecture: 1 hour  
This course allows students to pursue directed study in Fashion Design on a contract basis under the direction of a supervising instructor. Students must be enrolled in at least one fashion course to take this class.  
Student Learning Outcome(s):  
The outcome will vary depending on the contract with the instructor. The student will formulate a project based on a topic in Fashion Design and related topics.

FASHDSN 222  SAMPLE MAKING AND DESIGN I (2)  
Lab: 6 hours  
The fundamentals of garment construction using industrial patterns, marker making and industrial power machines. Students are assigned garment projects which demonstrate basic techniques, combining classic with modern manufacturing techniques, with special emphasis on pattern layouts for plaids and prints.  
Student Learning Outcome(s):  
Students will develop a portfolio of sewing techniques and list the sequence of assembly.

FASHDSN 223  SAMPLE MAKING AND DESIGN II (2)  
Lab: 6 hours  
The objective of this course is to advance the sewing skills of fashion design students. Students are assigned to create and construct a coordinated group using industrial patterns. Selected blouses, shirts, pants and jacket are made.  
Student Learning Outcome(s):  
Students execute a coordinated group including a shirt, pant, and jackets. This project will be completed in children’s wear.
FASHDSN 224  SAMPLE MAKING AND DESIGN III (2)
Lab: 6 hours

Instruction is provided on construction and fitting of selected commercial patterns adapted to industry standards. Students receive instruction in the theory of color, line and proportion. They create or select designs suitable to the individual and occasion. Selected soft dressmaker type coats, suits, vests, blouses, and dresses are made.

Student Learning Outcome(s):
Students will execute independent items including a lined vest and jacket, a lined pant or skirt, a shirt or blouse and 1 knit style.

FASHDSN 225  PATTERN MAKING AND DESIGN I (2)
Lab: 6 hours
Advisory: Fashion Design 222;

Entry level class offering instruction in development of a basic block, test fitting, and additional basic pattern making fundamentals.

Student Learning Outcome(s):
Student will draft and construct a basic block. Student will create and construct an original design based on required elements and quality of construction.

FASHDSN 226  PATTERN MAKING AND DESIGN II (2)
Lab: 6 hours
Prerequisite: Fashion Design 225;

Intermediate level class offering instruction on the torso bodice, dartless block and drafting a basic pant then using the blocks to create dresses, skirt styles and pant variations. Advanced skirts styling is also included.

Student Learning Outcome(s):
Students will draft and construct a torso block from the basic sloper. Students will draft a shift dress with mandarin collar, princess seams, required sleeve elements, and construct a full muslin. Students will draft and construct a princess dress including required elements.

FASHDSN 227  PATTERN MAKING AND DESIGN III (2)
Lab: 6 hours
Prerequisite: Fashion Design 226

Advanced level class offering instruction on jackets, advanced sleeve styles, contouring fundamentals, and basic bodysuits and leotards.

Student Learning Outcome(s):
Students will be able to draft or knock-off and construct a basic pant including required elements to personal measurements. Students will be able to draft a bolero with a close fitting raglan and a shawl collar and construct a muslin. Students will be able to draft a tailored jacket block, construct a shell with 2 piece sleeve, revere collar, and traditional jacket facing.

FASHDSN 228  PATTERN GRADING AND DESIGN I (2)
Lab: 6 hours

This course offers training in increasing and decreasing the pattern size for basic slopers in the several size ranges of women’s wearing apparel. Also includes practice in selected methods and in the use of “grading machines” currently used in industry.

Student Learning Outcome(s):
Student will grade a princess style pattern including facings.

FASHDSN 229  PATTERN GRADING AND DESIGN II (2)
Lab: 6 hours

Selected whole garments are graded. Research and study is done on the laws of proportionate growth, size ranges, and difficult pattern shapes. Principles of design are correlated to grading problems. Marker making and cost sheets development is included in this course.

Student Learning Outcome(s):
Student will grade a stylized dress including stylized darts and facings.

FASHDSN 236  FASHION SKETCHING AND DESIGN I (2)
Lab: 6 hours

Instruction includes fashion figure drawing, rendering fabrics and garments on figures, designing selected garments, study of color theory and techniques.

Student Learning Outcome(s):
Student will draw a group of technical flat illustrations.

FASHDSN 237  FASHION SKETCHING AND DESIGN II (2)
Lab: 6 hours
Prerequisite: Fashion Design 236

Instruction includes women’s day dresses, children’s fashion figures and garment designs, watercolor or gouache techniques, illustrations, contemporary graphic layouts and the portfolio development. Techniques of quick sketching will be covered.

Student Learning Outcome(s):
Students will execute fabric rendering with various mediums for design of womens, mens and childrens styles.
FASHDSN 238  FASHION SKETCHING AND DESIGN III (2)  
Lab: 6 hours  
Prerequisite: Fashion Design 236; Fashion Design 237  

Development of professional portfolio presentation including development of design focus and, advanced research techniques. The process will include the development of illustration techniques and design refinement. Professional readiness including: writing a resume, cover letter and calling card and developing refined job interview skills.  

Student Learning Outcome(s):  
Student will develop a portfolio of drawings including mens and womens wear.

FASHDSN 239  GOWN DRAPING AND DESIGN I (2)  
Lab: 6 hours  

Instruction is offered on draping, fitting basic blocks, and transferring the drape to a paper pattern. Students will drape basic type bodices, sleeves, skirts, collars, and construction details. Theory includes basic principles of design, line, proportion, and fabric use.  

Student Learning Outcome(s):  
Students will drape and create a detailed blouse and skirt style including a complete pattern. Students will drape and create a stylized dress including a complete pattern.

FASHDSN 240  GOWN DRAPING AND DESIGN II (2)  
Lab: 6 hours  

This course includes the draping of casual knit garments and dress and jacket style innovations. Students use either muslin or fashion fabric according to their capabilities. Fashion trends are studied and original designs are created.  

Student Learning Outcome(s):  
Students will drape and create a woven shift dress with stylized neckline. Students will drape and create innovative coordinated separates in knit fabric using specialized machinery.

FASHDSN 241  GOWN DRAPING AND DESIGN III (2)  
Lab: 6 hours  

This course correlates the designer’s knowledge of designing, sketching, patternmaking, draping, and construction. Students develop confidence as they study the problems of merchandising and manufacturing. Original designs for special occasion garments are executed in various fabrics.  

Student Learning Outcome(s):  
Students will drape an evening gown using selected elements in specific evening fabrications.

FASHDSN 244  PHOTOSHOP FOR FASHION DESIGN (2) CSU  
Lab: 6 hours  

This course offers computer fashion art instruction using Adobe Photoshop software. Emphasis is placed on preparation and input of fashion images for portfolios and design presentations as required by industry standards.  

Student Learning Outcome(s):  
Students will learn to use Adobe Photoshop selection tools to create and communicate vision; mood or trend boards that inspire color stories.

FASHDSN 250  BEGINNING COMPUTER APPAREL SYSTEMS (2)  
Lab: 6 hours  

This course will cover digitizing, grading, some pattern making, and marker making. Also covered are database files including grade rules, model files, and annotation. Students will plot pieces and markers. This course uses Gerber Accumark software.  

Student Learning Outcome(s):  
Students will create system files, digitize and verify pattern pieces using Gerber hardware and software.

FASHDSN 255  COMPUTERIZED PRODUCT DESIGN (2)  
Lab: 6 hours  

This course offers training and development of skills in apparel utilizing the latest versions of apparel pattern making software. Design students will concentrate on pattern development including, drafting, alterations, and manipulations.  

Student Learning Outcome(s):  
Students will draft a basic block to specific measurements using Gerber PDS Apparel System.

FASHDSN 256  CAD APPAREL PRE-PRODUCTION TECHNIQUES (2)  
Lab: 6 hours  

This course offers basic training in the apparel pre-production process, including grading and marker making as it applies to computerized apparel production. The class will cover the specialized Lectra computer software programs. Students will learn to the functions of the software while grading and making markers. Basic computerized pattern making will also be covered.  

Student Learning Outcome(s):  
Students will be able to digitize an existing pattern into the computer where it will be graded, marked and prepared for the production process. Student will be able to manipulate a basic block to create a stylized pattern.
FASHDSN 257  APPAREL PATTERNS DESIGN SYSTEMS (2)
Lab: 6 hours
This course provides an overview of current computer-aided design applications used in apparel pattern development. The class will cover manual pattern development and demonstrate how two-dimensional patterns translate to the computer. Students will learn to identify menus associated with pattern applications, used for Tukatech software, and will compose a full-scale pattern on the computer as it applies to industry.

Student Learning Outcome(s):
Students will design a computer pattern from Tukatech systems basic blocks.

FASHDSN 258  COMPUTER-AIDED PATTERNS SYSTEMS (2)
Lab: 6 hours
This course is designed to expand knowledge of pattern making using Lectra Systems software programs. A variety of pattern will be created using the draft method and the use of basic blocks.

Student Learning Outcome(s):
Students will be able to create a jacket pattern including lining, facing and two piece sleeve using the jacket foundation.

FASHDSN 264  APPAREL COMPUTER SYSTEMS ANALYSIS (1)
CSU
Lab: 3 hours
This lab course demonstrates how the apparel industry uses commercial and Vendor apparel technology in the global market. Topics covered are apparel software and commercial hardware used to design and manufacture products.

Student Learning Outcome(s):
Student will use commercial software to create documents used in the manufacturing process. Student will use industry related software to perform basic manufacturing processes.

FASHDSN 270  ILLUSTRATOR FOR FASHION DESIGN (2)
CSU
Lab: 6 hours
This computer sketching course focuses on the fundamental options to illustrate garments, and fabrics for clothing and accessory presentations based on current global fashion industry technology standards.

Student Learning Outcome(s):
Students will create Fashion Flat sketches according to Fashion industry standard. Students will learn to create acceptable file formats for different output mediums like web and print.

FASHDSN 285  DIRECTED STUDY - FASHION DESIGN (2)
Lecture: 2 hours
This course allows students to pursue directed study in Fashion Design on a contract basis under the direction of a supervising instructor. Students must be enrolled in at least one fashion course to take this class.

Student Learning Outcome(s):
The outcome will vary depending on the contract with the instructor. The student will formulate a project based on a topic in Fashion Design and related topics.

FASHDSN 385  DIRECTED STUDY - FASHION DESIGN (3)
Lecture: 3 hours
This course allows students to pursue directed study in Fashion Design on a contract basis under the direction of a supervising instructor. Students must be enrolled in at least one fashion course to take this class.

Student Learning Outcome(s):
The outcome will vary depending on the contract with the instructor. The student will formulate a project based on a topic in Fashion Design and related topics.

FASHDSN 941  COOPERATIVE EDUCATION - FASHION DESIGN
(4) CSU RPT 3
Lecture: 4 hours
Cooperative Education is a work experience program involving the employer, the student-employee and the college to ensure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

FASHMER 001  ENTREPRENEURIAL FASHION (3)
CSU
Lecture: 2.5 hours / Lab: 1.5 hours
Advisory: English 101; Mathematics 105.

This course delivers the information needed to develop an effective business plan and provides a background in entrepreneurship for apparel related businesses. Students will examine the development of a fashion retail business from concept evaluation to strategy articulation. Procedures and resources for researching and opening a business are covered, as well as assortment planning, pricing and financing.

Student Learning Outcome(s):
Students will be able to evaluate a potential business idea and write a business plan for a retail or wholesale business.
FASHMER 010 RETAIL MERCHANDISING (3) CSU
Lecture: 3 hours
Advisory: English 101; Mathematics 105.

This course introduces all phases of fashion retailing from the creative to the financial. It is designed to familiarize students with the crucial functions of merchandising and product management in a modern retail company. The course covers special aspects of retailing including: the evolution of the industry, merchandising roles and careers, market knowledge, consumer behavior, planning and control and retail pricing.

Student Learning Outcome(s):

Students will be able to identify a consumer market for a retail store through the research of demographic, psychographic, and behavioral traits of a target market.

FASHMER 020 APPAREL PRODUCT DEVELOPMENT (3) CSU
Lecture: 2.5 hours / Lab: 1.5 hours
Advisory: English 101; Mathematics 105.

This course covers the step-by-step development of apparel products in a retail or wholesale environment. Students will use research, merchandising knowledge and the application of merchandising concepts and theories in a simulated process. The course includes visual presentation of design concepts, raw materials sourcing, overviews of production technology, wholesale marketing and retail distribution. Special emphasis is placed on the California apparel industry.

Student Learning Outcome(s):

1. Students will complete wholesale cost sheets for apparel garments. 2. Students will create a line list for a seasonal delivery of garments.

FASHMER 021 CULTURAL PERSPECTIVES OF DRESS (3) CSU
Lecture: 3 hours
Advisory: English 101

This course covers the factors that influence human behavior in the selection of dress in societies and cultural groups, and the influence of these factors on the design and production of textiles and apparel. Students will study consumer’s purchasing decisions. Topics include the cultural context of dress, dress as nonverbal communication, dress through life stages, dress in the workplace, ethnic influences on dress, and technological changes of dress.

Student Learning Outcome(s):

1. Students will explain the symbolism of specific tattoo art as it relates to body dressing as a part of fashion culture in our society. 2. Students will demonstrate how to present oneself in a professional setting to the best advantage and relate how dress affects specific jobs in various occupations.

FASHMER 025 FASHION AND INDUSTRY INTERCHANGE (3) CSU
Lecture: 3 hours
Advisory: English 101.

This course covers current trends and relationships in the Fashion Industry between apparel, accessories, cosmetics, and home goods. Each category of goods is reviewed from the perspectives of historical development, organiza-
FASHMER 040  MODERN MERCHANDISING MATH (3) CSU
Lecture: 3 hours

Advisory: Mathematics 105.

Students will learn to use the computer for costing, pricing, inventory control as well as vendor analysis. All current concepts in wholesale and retail merchandise planning are presented. The emphasis is on practical knowledge and the use of computers in today's apparel business. The class will cover the principles and procedures involved in the business applications of the apparel industry using Apparel Information Management System (AIMS) software for wholesale and Microsoft Excel for making retail buying decisions.

Student Learning Outcome(s):

Students will create an inventory management and vendor analysis reports including calculations of retail price, wholesale cost, markup dollars, and markup percent for apparel items using manual and computer software applications.

FASHMER 041  FASHION MERCHANDISE BUYING (3) CSU
Lecture: 2.5 hours / Lab: 1.5 hours

Advisory: Fashion Merchandising 10; English 101; Mathematics 105.

This course provides specific instruction on fashion/merchandise buying tasks such as: identifying target customers, creating six month merchandise plans, departmental assortment plans, shopping the market and placing orders, in-season sales planning and forecasting, and calculating open-to-buy. This course covers the process of retail buying for a small business as well as for larger companies.

Student Learning Outcome(s):

Students will be able to identify a retail product opportunity and articulate a well developed strategy to accomplish their proposed sales and marketing plan. They will be able to demonstrate their strategy through a computer generated six month plan (excel), window and floor displays (Smart Draw, Photoshop, etc.), and written text presented in an organized binder/portfolio.

FASHMER 050  INTERNATIONAL FASHION BUSINESS (3) CSU
Lecture: 3 hours

Advisory: English 101.

This course provides an active study of the dynamics and challenges of the international apparel industry. Topics covered include: International business today; cultural diversity and dynamics; international legal issues; global opportunities in marketing; importing/exporting strategies; and international fashion business vocabulary terms.

Student Learning Outcome(s):

Students will analyze news articles related to class discussion topics and present key information.

FASHMER 941  COOPERATIVE EDUCATION - FASHION MERCHANDISING (4) CSU RPT 3
Lecture: 4 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to ensure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):

The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

FINANCE

FINANCE 008  PERSONAL FINANCE AND INVESTMENTS (3) CSU
Lecture: 3 hours

This course is designed to provide students with an understanding of a person's financial affairs, including family budgeting, consumer credit, home ownership, insurance, investment/savings, banking services, and major consumer purchases.

Student Learning Outcome(s):

Students will evaluate the use of financial budgeting concepts to make sound decisions in managing their personal finances.

FRENCH

FRENCH 001  ELEMENTARY FRENCH I (5) UC/CSU
Lecture: 5 hours

This course introduces the cultures and civilization of France and the French-speaking world. This introductory course stresses the fundamentals of French pronunciation and grammar; the building of a practical basic vocabulary; and the development of the ability to speak, understand, read, and write simple contemporary French.

Student Learning Outcome(s):

1. Demonstrate novice mastery of the fundamental structure of French the ability to communicate in the present and immediate future tenses in everyday situations. 2. Recognize and relate facts about culture of France and Francophone countries. 3. Perform novice level communication functions skills using the structures and vocabulary learned.
FRENCH 002   ELEMENTARY FRENCH II (5) UC/CSU
Lecture: 5 hours
Prerequisite: French 1.

This course completes the study of elementary grammar, increases vocabulary, includes the reading of simplified texts with continued emphasis on aural and written comprehension, oral expression, and the writing of simple French. Further study of French and Francophone cultures are expected to be covered.

Student Learning Outcome(s):
1. Student will recognize the overall basic structure and patterns of the French language and ability to communicate personal information, activities, describe feelings and preferences in everyday situations using various past tenses (passé composé, imperfect), present conditional, and future tense on an elementary language level. 2. Student will perform novice level communication function skills using the vocabulary structures learned.
3. Student will recognize and relate facts about culture of France and Francophone countries.

FRENCH 002   CULTURAL ELEMENTS OF GEOGRAPHY (3) UC/CSU
Lecture: 1 hour / Lab: 2 hours

This course completes the study of elementary grammar, increases vocabulary, includes the reading of simplified texts with continued emphasis on aural and written comprehension, oral expression, and the writing of simple French. Further study of French and Francophone cultures are expected to be covered.

Student Learning Outcome(s):
1. Student will recognize the overall basic structure and patterns of the French language and ability to communicate personal information, activities, describe feelings and preferences in everyday situations using various past tenses (passé composé, imperfect), present conditional, and future tense on an elementary language level. 2. Student will perform novice level communication function skills using the vocabulary structures learned.
3. Student will recognize and relate facts about culture of France and Francophone countries.

GEODEY

GEOG 001 PHYSICAL GEOGRAPHY (3) UC/CSU
Lecture: 3 hours

This course studies the physical environment of earth. Emphasis is placed on climate, soils, vegetation, landforms, maps, weather systems, oceans, and the atmosphere, and their pattern on Earth.

Student Learning Outcome(s):
Students will apply basic geography concepts to answer the following questions: a) Classify rock types according with their geologic origin. b) Describe the concept of plate tectonic boundaries and types. c) Describe the types of waves generated during an earthquake.

GEOG 002 CULTURAL ELEMENTS OF GEOGRAPHY (3) UC/CSU
Lecture: 3 hours

This course examines how human civilization and the physical planet affect one another. This includes cultural ecology, population growth and distribution, sustainable development, languages and religions, use of natural resources, transportation and commerce, energy production, food production, globalization, as well as the social, political, and economic causes of war and climate change.

Student Learning Outcome(s):

QUESTION 1: Students will assess and list how organic agriculture improves the U.S. economy, its environment and the physical health of its citizens.
QUESTION 2: Students will report which factors lead to a decline in death rates and a maintenance of high birth rates in Stage 2 of the Demographic Transition.

GEOL 001 PHYSICAL GEOLOGY LABORATORY (2) UC/CSU
Lecture: 1 hour / Lab: 2 hours

This course supplements Geology 1 with additional exercises in the identification of rocks and minerals, reading of maps, and study of rock structures. Studies of local geology are made based upon field trips and the collection of specimens.

Student Learning Outcome(s):
Upon completion of this course the student will be able to: 1. Analyze the role of plate tectonics in changing the sizes of the Earth’s continents and oceans; Graph seismic data to determine the magnitude of earthquakes and locate the epicenter of earthquakes. 2. Identify common minerals & rock types on the basis of their physical properties; interpret past environment through detailed observation of mineral composition, fossil types and rock structures. 3. Construct topographic cross sections and geologic cross sections to analyze the geologic and deformational history of an area. 4. Determine the relative and absolute ages of rocks based on their physical relationships; using fossils to determine their age relationships, and determine absolute ages from radiometric data. 5. Analyze landforms formed by and hazards related to surface and groundwater, oceans, glaciers and wind. Interpret global climate change patterns on the basis of variations in sea level and glacier sizes. Program SLOs: 1. Explain the interrelationships between different disciplines to understand how the geological processes function. 2. Apply the scientific method to the study of the geological materials and processes 3. Utilize information learned to make informed decisions about global and local environmental issues. Institutional SLOs: 1. Critical Thinking: Analyze problems by differentiating fact from opinions, using evidence, and using sound reasoning to specify multiple solutions and their consequences. 2. Quantitative Reasoning: Identify, analyze, and solve problems that are quantitative in nature. 3. Technical Competence: Utilize the appropriate technology effectively for informational, academic, person, and professional needs.
HEALTH

HEALTH 002 HEALTH AND FITNESS (3) UC/CSU

Lecture: 2 hours / Lab: 2 hours

This course promotes healthy physical and psychological lifestyles, with emphasis on disease prevention, including violence/abuse, nutrition, sexuality, reproduction, drugs, alcohol, tobacco, aging, stress management, and weight control. The physical fitness segment emphasizes individual improvement utilizing aerobic, flexibility, and strengthening activities.

Student Learning Outcome(s):

Students will use critical thinking skills to gather, identify, analyze, synthesize information, and evaluate problems and solutions to reaching improving their personal health and fitness.

HEALTH 006 NUTRITION FOR HEALTHFUL LIVING AND FITNESS ACTIVITIES (3) UC/CSU

Lecture: 2 hours / Lab: 2 hours

Basic nutrition theories, information for healthful food purchasing, and relationship of nutrition to disease. Benefits of exercise and techniques for body conditioning are learned. Class time includes participation in fitness activities including aerobic, developmental and flexibility exercises.

Student Learning Outcome(s):

Using the components of Health and Fitness and information on nutrition gained from the class, students will develop a program that includes a structured fitness and nutritional program that they can modify and enhance yearly to promote lifelong fitness.

HEALTH 008 WOMEN'S PERSONAL HEALTH (3) UC/CSU

Lecture: 3 hours

A study of factors affecting physical, social and emotional well-being of women in our society.

Student Learning Outcome(s):

1. Student will identify the major health issues affecting women and the lifestyle changes which can be made to improve their own health and the health of their family members.

HEALTH 011 PRINCIPLES OF HEALTHFUL LIVING (3) UC/CSU

Lecture: 3 hours

This course offers concepts to use today and tomorrow as guidelines for self-directed responsible living. Health topics cover the emotional and mental health, cardiovascular fitness, nutrition, chronic and communicable diseases, environmental issues, and the life cycle. Student is provided with self-assessments for examining their lifestyle habits and relationships, as well as, resources for getting help when they need it.

Student Learning Outcome(s):

Student will create and present a "lifeplan" that will include activities that will promote lifelong wellness using all the dimensions of health.

HEALTH 012 SAFETY EDUCATION AND FIRST AID (3) UC/CSU

Lecture: 3 hours

This course involves the theory and detailed demonstration of the first aid care of the injured. The student will learn to assess a victim’s condition and incorporate proper treatment. Standard first aid, CPR, and AED certification(s) will be granted upon successful completion of requirements.

Student Learning Outcome(s):

1. Student will be able to perform the culminating CPR skills final for the American Heart Association or the American Red Cross demonstrating high quality CPR techniques. 2. Student will be able to apply a pressure bandage to the forearm in correct sequence.

HEALTH 021 HUMAN SEXUALITY (3) UC/CSU

Lecture: 3 hours

This course provides a comprehensive introduction to the cultural, behavioral, biological and psychosocial aspects of human sexuality. Topics presented include acquired immune deficiency syndrome and other sexually transmitted diseases, as well as sexual variance and dysfunction, and sexuality throughout the human life cycle.

Student Learning Outcome(s):

Student will define the various sexually transmitted infections, their causes and the treatment for each.

HEALTH 043 MEN'S HEALTH AND FITNESS (3) UC/CSU

Lecture: 2 hours / Lab: 2 hours

This course explores men’s health issues and adds a fitness component so that men can learn to understand and control their life long health practices, attitudes and challenges that contemporary men experience in urban areas. It studies topics important to men such as domestic abuse and violence, stress, alcoholism, disease transmission and other physical, emotional and social topics related to men’s health, fitness and wellness.

Student Learning Outcome(s):

Student will identify key factors that specifically affect a Man’s health and ways to improve a man’s health.

HEALTH 046 COMMUNITY CPR FOR THE LAY RESCUER (1)

Lecture: 1 hour

This course covers the content of the American Heart Association Basic Life Support (CPR/AED) for the Healthcare Provider. It covers care of the adult, child, and infant.

Student Learning Outcome(s):

Student will be able to perform Adult CPR techniques according to the current guidelines set by the American Heart Association CPR for Health Care Providers. Student will be able to perform Infant CPR techniques according to the current guidelines set by the American Heart Association CPR for Health Care Providers.

Student will be able to correct demonstrate the use of the EPI-Pen.
HEALTH OCCUPATIONS

HLTHOCC 037  NURSE ASSISTANT (5)
Lecture: 3 hours / Lab: 6 hours

This course is approved by the State of California. It prepares students to perform basic nursing tasks and educates them about the roles and responsibilities of the Certified Nurse Assistant. Skills include principles of safety, infection control and basic patient care practices. Students who successfully complete the course are eligible to take the State Certification Examination.

Student Learning Outcome(s):

1. Student will demonstrate understanding of principles in basic patient care skills. Student will perform basic skills of care to patients with injuries or diseases.

HLTHOCC 038  HOME HEALTH AIDE (2)
Lecture: 1.2 hours / Lab: 1.2 hours

Prerequisite: Health Occupations 37.

This course is approved by the State of California. It prepares students to perform in-home care to patients and assist them with activities of daily living. Students will provide care to clients in the areas of comfort, hygiene, nutrition, elimination, sleep and rest. Emphasis is on the role of the home health aide, interpretation of client needs, personal-care services, nutrition and cleaning and care tasks in the home.

Student Learning Outcome(s):

1. Perform patient care skills and procedures listed under Title 22, Division V for HHA's. 2. Learn and apply legal issues, safety issues, and management care in a home/hospice setting.

HLTHOCC 049  FUNDAMENTALS OF ELDER CARE (5)
Lecture: 4 hours / Lab: 3 hours

Prerequisite: HLTHOCC 062, HLTHOCC 063, HLTHOCC 064 and HLTHOCC 065

This course will introduce students to the information about the aging process and related medical, psychological and cognitive changes that is needed to effectively care for the elderly person in a long-term care center or at home.

Student Learning Outcome(s):

1. Student will acquire understanding of fundamentals of physical and psychosocial care of the elderly. Student will provide basic physical and psychosocial care to the elderly resident of a care facility

HLTHOCC 062  SKILL SET FOR THE HEALTH CARE PROFESSIONAL (2)
Lecture: 1 hour / Lab: 3 hours

Advisory: English 021, Math 105

This course is an introduction of the concepts and skills that serve as a foundation for the health care professions. Topics include hygiene and safety, infection control, basic client monitoring and basic first aid, therapeutic communication and basic health documentation.
HISTORY

HISTORY 011 POLITICAL AND SOCIAL HISTORY OF THE UNITED STATES I (3) UC/CSU
Lecture: 3 hours
Advisory: English 28.

This course will examine the historical development of the United States of America from 1492 to the close of the Civil War. Emphasis is placed on the relationship of regions, the role of major ethnic and social groups, the continuity of the American experience, and its derivation from other cultures, politics, economics, social movements, and its geography.

Student Learning Outcome(s):
1. Student will demonstrate ability to interpret historical primary and secondary sources to compose an argument which uses them, as appropriate, for support. 2. Student will explain the historical significance of major political trends, attitudes, conflicts and effects, including both mainstream and reform efforts.

HISTORY 012 POLITICAL AND SOCIAL HISTORY OF THE UNITED STATES II (3) UC/CSU
Lecture: 3 hours
Advisory: English 28.

This course will examine the historical development of the United States of America from the close of the Civil War to the present. Emphasis is placed on the role of the major ethnic and social groups, the continuity of the American experience, and its derivation from other cultures, politics, economics, social movements, and its geography.

Student Learning Outcome(s):
1. Students will defend a position on a debatable historical issue. 2. Describe and analyze the actors, locations, timelines, actions, and reasons surrounding a historical event. 3. Students will examine and assess the key events from 1865 to the Present.

HISTORY 041 THE AFRICAN AMERICAN IN THE HISTORY OF THE U.S. I (3) UC/CSU
Lecture: 3 hours
Advisory: English 28.

This course will examine the historical development of the African American from precolonial Africa through the Civil War. This course will examine the political, social, economic and intellectual development of the United States, as well as the State and local government and constitution of the U.S.

Student Learning Outcome(s):
Students will critically analyze experiences of African Americans from the post Civil War to the present, New Millennium. 1. Students will be able to critically analyze experiences of African Americans from the post Civil War to the present. 2. Students will be able to research and analyze a topic that affected African Americans post Civil War to present. 2. Students will analyze an event from this period and be able to link the people, issues and factors that influence the event(s).

HISTORY 042 THE AFRICAN AMERICAN IN THE HISTORY OF THE U.S. II (3) UC/CSU
Lecture: 3 hours
Advisory: English 28.

This course will examine the historical development of the United States of America from the end of the Civil War to the present with special emphasis on the contributions of the Afro- American. Emphasis is placed on the relationship of regions, both internal and external, the role of major ethnic and social groups, the continuity of the American experience, and its deviation from other cultures, politics, economics, social movements, and its geography will be examined.

Student Learning Outcome(s):
Students will critically examine how the decade of the 1850's offered a preview of the coming of the Civil War. Students will assess the key events as primary causes of the Civil War. Students will describe the events they perceive as pivotal events that led African American participation in the Civil War. Students will include the following key people, events, issues: Anti-Slavery society, Fugitive Slave Laws, the Dred Scott Decision, Kansas Nebraska Act, John Brown Raid, Frederick Douglass, Abraham Lincoln, Mary Ellen Pleasant, Thomas Sims and Martin R. Delany.

HISTORY 043 THE MEXICAN-AMERICAN IN THE HISTORY OF THE UNITED STATES I (3) UC/CSU
Lecture: 3 hours
Advisory: English 028

Examines historical development of the United States from the period of exploration to the close of the Civil War with special emphasis on the history of Mexican-Americans. Emphasis on regions, both internal and external, major ethnic and social groups, the American experience and its derivation from other cultures, politics, economics, social movements, and geography.

Student Learning Outcome(s):
1. Discuss and defend a position on a debatable Mexican-American historical issue.
HISTORY 044  THE MEXICAN AMERICAN IN THE HISTORY OF THE UNITED STATES II (3) UC/CSU
Lecture: 3 hours
Advisory: English 28

Examines historical development of the United States from the close of the Civil War to the present with special emphasis on the history of Mexican-Americans. Emphasis on regions, both internal and external, major ethnic and social groups, the American experience and its derivation from other cultures, politics, economics, social movements, and geography. The U.S. Constitution, the State of California Constitution, and local government will be examined. Political philosophies, political institutions, amendments and interpretations, rights and obligations of citizens, and Federal/State/local governments will be examined.

Student Learning Outcome(s):
1. In a research essay through the evaluation of print or web primary and/or secondary sources, students will identify and critically analyze individuals who have contributed to changing women’s status in U.S. History. 2. In a research essay through the evaluation of print or web primary and/or secondary sources, students will identify and explain movements that have contributed to changing women’s status in U.S. History. 3. In a research essay through the evaluation of print or web primary and/or secondary sources, analyze the role that American law has played in defining women’s position in American society.

HISTORY 052  THE ROLE OF WOMEN IN THE HISTORY OF THE U.S. (3) UC/CSU
Lecture: 3 hours
Advisory: English 28

This course will explore the political, social, economic and intellectual history of women in the development of the United States from the early colonial era to the present, with special emphasis on their contributions, as well as issues. Also, it surveys, the U.S. Constitution and California state and local government in the context of the story of women in the history of the United States.

Student Learning Outcome(s):
1. In a research essay through the evaluation of print or web primary and/or secondary sources, students will identify and critically analyze individuals who have contributed to changing women’s status in U.S. History. 2. In a research essay through the evaluation of print or web primary and/or secondary sources, students will identify and explain movements that have contributed to changing women’s status in U.S. History. 3. In a research essay through the evaluation of print or web primary and/or secondary sources, analyze the role that American law has played in defining women’s position in American society.

HISTORY 086  INTRODUCTION TO WORLD CIVILIZATION I (3) UC/CSU
Lecture: 3 hours
Advisory: English 28

Introductory survey of World Civilization to 1500. This course will examine and compare the social, economic, and political formations of various societies and world cultures. Major topics will include religion, philosophy, technology, and migration and settlement patterns.

Student Learning Outcome(s):
1. In a research essay through the evaluation of print or web primary and/or secondary sources, students will identify and critically analyze the development of a major world civilization and its culture. 2. In a research essay through the evaluation of print or web primary and/or secondary sources, students will identify and compare two major world civilizations. 3. In a research essay through the evaluation of print or web primary and/or secondary sources, students will identify and critically analyze social patterns, economic trends, political formations, religious changes, and/or cultural changes of a major world civilization.

HISTORY 087  INTRODUCTION TO WORLD CIVILIZATION II (3) UC/CSU
Lecture: 3 hours

Introduction survey of World Civilization from 1500 to the Present. This course will examine and compare the social, economic, and political formations of various governments, societies, and world cultures. Major topics will include the development of the nation state, economic systems and technology, industrialization, colonization, and global conquest, revolutions, and migration and settlement patterns.

Student Learning Outcome(s):
1. In a research essay through the evaluation of print or web primary and/or secondary sources, students will identify a world civilization from 1500 to the present and critically analyze its importance and contributions to humankind. 2. In a research essay through the evaluation of print or web primary and/or secondary sources, students will discuss the development of a major world government from 1500 to the present and demonstrate how this government and its culture interact. 3. In a research essay through the evaluation of print or web primary and/or secondary sources, students will compare and analyze the social patterns, economic trends, political formations, or religious and cultural changes of two major world civilizations developed from 1500 to the present.

HUMANITIES

HUMAN 001  CULTURAL PATTERNS OF WESTERN CIVILIZATION (3) UC/CSU
Lecture: 3 hours

Prerequisite: English 28.

This course is an introduction to the general concepts of the humanities. Music, painting, sculpture and architecture are studied and compared in relation to their background, medium, organization and style. Included is a survey of the most productive periods of Western history, from classical Greek through the Medieval period. Stress is placed on awareness of difference in cultural heritage, values and perspective as revealed in the arts.

Student Learning Outcome(s):
Students will demonstrate familiarity with a broad spectrum of world civilizations with particular emphasis on how their artistic legacies reflect political and religious traditions. 1. Students will demonstrate familiarity with several early world civilizations. 2. Students will compare and contrast world religions. 3. Students will assess the ways in which visual art and literature reflect social, political and religious traits of the society that produced them.
HUMAN 002 STUDIES IN SELECTED CULTURES (3) UC/CSU
Lecture: 3 hours
Prerequisite: English 28.

Students study in-depth the social, political, economic and cultural features of a particular culture or set of related cultures. Customs, traditions, values, historical events and trends, religious traditions, pop cultural practices, achievements and trends in the arts and the sciences of the cultures studied are also examined. Western, Eastern, Mid-Eastern, African and other cultures and societies both past and present may be studied.

Student Learning Outcome(s):
1. Students will be able to analyze ways in which modern social and political history are reflected in the arts, including literature, visual arts and music.
2. Students will compare and contrast art, literature and music from different cultures or time periods.

HUMAN 060 PEOPLE AND THEIR WORLD: TECHNOLOGY AND THE HUMANITIES (3) UC/CSU
Lecture: 3 hours

This course relates technology to the humanities and provides opportunities to examine the interaction between society and technology. Questions about cultural and social values in light of the effects of technology from the Paleolithic period to the 21st century are developed and discussed. In their research, students explore the societal effects of the latest technological developments of our time.

Student Learning Outcome(s):
1) Students will identify the links that have historically existed between technology and the arts.
2) Explain technological innovations within the arts.

KINESIOLOGY

KIN 300-1 SWIMMING NON-SWIMMER I (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours

This course will enhance the skills of the students in floating, kicking and swimming the crawl and backstroke.

Student Learning Outcome(s):
Students will be able to successfully swim Freestyle without flotation support in deep water.

KIN 300-2 SWIMMING NON-SWIMMER II (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours
Prerequisite: KIN 300-1

This course continues to enhance the skills of the students in floating, kicking and swimming the crawl and backstroke, that were developed in Swimming-I. Additionally, the skills in the sidestroke and the elementary backstroke will be taught as well as the ability to safely enter the water with a jump and a long shallow dive.

Student Learning Outcome(s):
Students will be able to successfully swim Freestyle and Backstroke.
Students will demonstrate proficiency in at least 6 of the swimming skills and at least 2 of the lifelong skills.

KIN 300-3 SWIMMING NON-SWIMMER III (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours
Prerequisite: KIN 300-2 or Placement Exam

This course continues to enhance the skills of the students in Freestyle, backstroke, elementary backstroke and sidestroke that were developed in Swimming-II. Additionally, the basic skills of the Breaststroke, competitive starts and turns, and interval training will be taught.

Student Learning Outcome(s):
The student will demonstrate proficiency in at least 8 of the swimming skills and 3 of the lifelong skills.

KIN 301-1 SWIMMING SKILLS I (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours

This course is designed to further enhance the skills of competitive swimming in Freestyle and Backstroke including competitive flip turns, starts and finishes. The course will also introduce the basic principles of training.

Student Learning Outcome(s):
Student will complete 30 lengths (750 yards) in a combination of freestyle and backstroke within 20 minutes.

KIN 301-2 SWIMMING SKILLS II (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours
Prerequisite: KIN 300-1

This course is designed to further enhance the skills of competitive swimming in Freestyle and Backstroke learned in 301-1 as well as introduce the basic principles of the competitive Breaststroke. The course will also use slightly advanced principles of training and increased yardage.

Student Learning Outcome(s):
Student will complete 40 lengths (1000 yards) in a variety of strokes within 20 minutes. Successfully complete a 100 Ind. Medley Swim

KIN 301-3 SWIMMING SKILLS III (1) CSU
Lecture: 0.5 hours / Lab: 2.5 hours
Prerequisite: KIN 301-2

This course is designed to further enhance the skills of competitive swimming in Freestyle and Backstroke learned in 301-1 as well as the skills
learned in 301-2 for the competitive breaststroke and introduce the skills of
the competitive butterfly. The course will also use advanced principles of
training and increased yardage.

Student Learning Outcome(s):
Student will be able to successfully complete a 200 IM and demonstrate the
proper techniques and skills within the swim.

KIN 303-1 AQUAEROBICS I (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours

Instruction and practice in deep water exercise to increase knowledge and
levels of cardiovascular fitness, muscular strength and endurance, and flex-
ibility. No swimming skills required.

Student Learning Outcome(s):
Students will engage in and assess their performance in a variety of shallow
water exercises that promote overall health and fitness.

KIN 303-2 AQUAEROBICS II (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours
Advisory: KIN 303-1

Instruction and practice in deep water exercise to increase knowledge and
levels of cardiovascular fitness, muscular strength and endurance, and
flexibility. No swimming skills required. This course builds upon knowledge
acquired in kin 303-1.

Student Learning Outcome(s):
Students will engage in and assess their performance in a variety of deep
water exercises that promote overall health and fitness.

KIN 303-3 AQUAEROBICS III (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours
Advisory: KIN 303-1 and 303-2

This course applies the knowledge and experience gained from KIN 303-1
and KIN 303-2 to exercise at intensities designed to prevent and reverse
Type 2 Diabetes. Students will journal their workouts and caloric intake to
focus on reducing body fat and insulin resistance. Exercises will be done in
both shallow and deep water with specialized water resistance equipment
designed to exhaust stored muscle glycogen.

Student Learning Outcome(s):
Students will engage in and assess their performance in a variety of water
activities at a level capable of reducing insulin resistance.

KIN 303-4 AQUAEROBICS IV (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours
Prerequisite: KIN 303-3
Advisory: KIN 303-1 and 303-2

This course applies the knowledge and experience gained from KIN 303-1
and KIN 303-2 to develop personal water exercise programs to meet the
demands of career, improve posture, and alleviate pain caused by muscle
imbalances. Students will utilize water exercises and resistance equipment
in both shallow and deep water to strengthen weaker muscles. Water Yoga
techniques will be used to stretch muscles and build core strength.

Student Learning Outcome(s):
Students will engage in and assess their performance in a variety of water
activities that promote muscle balance.

KIN 307-1 SWIM AND RUN I (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours

This course develops cardiovascular conditioning and fitness through
running and swimming laps. It enables students to gain awareness of the
importance of proper running techniques/postural alignment, including
progressive resistance training and conditioning for the purpose of training
for a biathlon. Nutrition and concepts of fitness are also covered.

Student Learning Outcome(s):
The student will be able to run and swim with the proper techniques and
skills for an extended period of time.

KIN 307-2 SWIM AND RUN II (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours
Advisory: KIN 303-1 and 303-2

This course develops cardiovascular conditioning and fitness through
running and swimming laps. It enables students to gain awareness of the
importance of proper running techniques/postural alignment, including
progressive resistance training and conditioning for the purpose of training
for a triathlon. Nutrition and concepts of fitness are also covered.

Student Learning Outcome(s):
The student will be able to run and swim with the proper technique with an
emphasis on the principles of training including overload and specificity
of training.

KIN 307-3 SWIM AND RUN III (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours

This course develops cardiovascular conditioning and fitness through
running and swimming laps. It enables students to gain awareness of the
importance of proper running techniques/postural alignment, including
progressive resistance training, hill training, intervals and conditioning for
the purpose of training for a biathlon. Nutrition and concepts of fitness are
also covered.

Student Learning Outcome(s):
The student will be able to run and swim with the proper technique with an
emphasis on the principles of training including overload and specificity
of training, and be able to transition between the run and swim phases of a
biathlon.
KIN 329-1 BODY CONDITIONING I (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours

This class is designed to incorporate forms, concepts and techniques associated with body conditioning. Including Pilates, Core Strengthening, Cardiovascular Exercise and Muscular Strength and Endurance exercises.

Student Learning Outcome(s):
Students will learn basic fitness principles and techniques and will be able to show proficiency.

KIN 329-2 BODY CONDITIONING II (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours
Prerequisite: KIN 329-1

This class is designed to incorporate intermediate forms, concepts and techniques associated with body conditioning. Including Pilates, Core Strengthening, Cardiovascular Exercise and Muscular Strength and Endurance exercises.

Student Learning Outcome(s):
Students will be able to incorporate fitness principles and techniques and create a personalized fitness program.

KIN 329-3 BODY CONDITIONING III (1) UC/CSU
Lecture: 1 hour

Body Conditioning intermediate concepts and mastery of exercise techniques associated with the application of exercise concepts to design an individualize exercise program implementing concepts discussed in class. Concepts discussed include: Muscle anatomy, Muscle Fiber Recruitment, Cardiovascular Adaptations to Exercise, Muscle adaptation to Specific Loads, and Energy systems utilized in cardiovascular exercise training. Methods incorporated in class activities include: Pilates Core Strengthening, Cardiovascular Exercise, Muscular Strength and Endurance, Flexibility; and Body Composition.

Student Learning Outcome(s):
Students will learn basic fitness principles and techniques and will be able to show proficiency.

KIN 330-1 CARDIO KICKBOXING I (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours

This is the first level of a non-contact activity course designed to use basic kicking and punching techniques to improve overall fitness including: cardiorespiratory endurance, muscular strength and endurance, flexibility, and body composition.

Student Learning Outcome(s):
Student Learning Outcome: Student will be able to demonstrate a jab/reverse punch combination.

KIN 330-2 CARDIO KICKBOXING II (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours

This is the second level of a non-contact activity course designed to build on techniques from Cardio Kickboxing-1. New techniques and combinations will be added to improve overall fitness including; cardiorespiratory endurance, muscular strength and endurance, flexibility, and body composition.

Student Learning Outcome(s):
Including the jab/reverse combination from Cardio Kickboxing-1, student will be able to demonstrate the proper Kenpo self-defense technique against one of four attacks.

KIN 330-3 CARDIO KICKBOXING III (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours
Prerequisites: KIN 330-2

This is the third level of a non-contact martial arts activity course designed to build on techniques from Cardio Kickboxing-1 and Cardio Kickboxing-2. New techniques and combinations will be added to improve overall fitness including; cardiorespiratory endurance, muscular strength and endurance, flexibility, and body composition.

Student Learning Outcome(s):
Student Learning Outcome: Drawing from the Kenpo techniques in Cardio Kickboxing 2 and 3, student will be able to demonstrate the proper Kenpo self-defense technique against one of eight attacks.

KIN 332-1 STEP AEROBICS I (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours

This course is designed to improve cardiovascular fitness and strengthen select muscle groups by performing stepping skills in rhythm with music. Stepping is primarily a low impact aerobic exercise. Activity includes muscle conditioning and flexibility exercises.

Student Learning Outcome(s):
Students will demonstrate an understanding of cardiovascular fitness by performing a group fitness routine and achieving BASIC skills on the Rubric.

KIN 334-1 FITNESS WALKING I (1) UC/CSU
Lecture: 0.5 hours / Lab: 2.5 hours

Walking for Fitness level 1 focuses on achieving cardiovascular fitness, building upon level 1 workouts and enhancing a healthy lifestyle through walking. Includes such topics as fitness walking training principles overload and specificity, proper nutrition, differences of aerobic versus anaerobic workouts, Target Heart Rate, proper technique, shoe selection, posture, gait, flexibility, clothing, and safety limitations. This course will assess fitness levels and identify the physical health benefits from walking.

Student Learning Outcome(s):
Students will complete the Mile Walk Test to determine cardiorespiratory fitness.
KIN 334-2  FITNESS WALKING II (1) UC/CSU  
Lecture: 0.5 hours / Lab: 2.5 hours  
Prerequisite: KIN 334-1  
Walking for Fitness level 2 focuses on achieving cardiovascular fitness, building upon level 1 workouts and enhancing a healthy lifestyle through walking. Includes such topics as fitness walking training principles overload and specificity, proper nutrition, differences of aerobic versus anaerobic workouts, Target Heart Rate, proper technique, shoe selection, posture, gait, flexibility, clothing, and safety limitations. This course will assess fitness levels and identify the physical health benefits from walking.  
Student Learning Outcome(s):  
Students will demonstrate an optimal healthy flexibility range. Students will complete the Mile Walk Test to determine aerobic capacity.

KIN 334-3  FITNESS WALKING III (1) UC/CSU  
Lecture: 0.5 hours / Lab: 2.5 hours  
Prerequisite: KIN 334-2  
Walking for Fitness level 3 focuses on developing cardiovascular fitness at an advanced level. This course will introduce principles and strategies of interval training building upon level 1 and 2 workouts and developing a healthy lifestyle through walking. This course includes the five health related components of fitness (muscular strength, muscular endurance, flexibility, cardiovascular fitness and body composition). Includes such topics as fitness walking training principles including: frequency, intensity, overload and specificity, nutritional analysis, differences of aerobic versus anaerobic workouts, Target Heart Rate, proper technique, shoe selection, flexibility, clothing and safety limitations. Student’s will gain the ability to assess fitness level and the physical health benefits from walking.  
Student Learning Outcome(s):  
Students will demonstrate an optimal healthy flexibility range. Students will complete the Mile Walk Test to determine aerobic capacity.

KIN 334-4  FITNESS WALKING IV (1) UC/CSU  
Lecture: 0.5 hours / Lab: 2.5 hours  
Prerequisite: KIN 334-3  
Walking for Fitness level 4 is for the advanced Fitness Walker. Level 4 focuses on achieving developing fitness walking programs based upon exercise physiological principles. This course includes the five health related components of fitness (muscular strength, muscular endurance, flexibility, cardiovascular fitness and body composition). Building upon fitness Walking level 1, 2 and 3 workouts students will develop individual walking plans used throughout one’s lifetime. Includes topics as fitness walking training principles including: frequency, intensity, overload and specificity, nutritional analysis, differences of aerobic versus anaerobic workouts, Target Heart Rate, proper technique, shoe selection, flexibility, clothing and safety limitations. Student’s will gain the ability to assess fitness level and the physical health benefits from walking.  
Student Learning Outcome(s):  
Students will demonstrate an optimal healthy flexibility range. Students will complete the Mile Walk Test to determine aerobic capacity. Students will determine Target Heart Rate to monitor intensity of workouts Students will determine BMI for optimal healthy body weight.

KIN 350-1  WEIGHT TRAINING I (1) UC/CSU  
Lecture: 0.5 hours / Lab: 2.5 hours  
This course enhances training skills, including enhanced spotting techniques, enhanced lifting techniques and an introduction to more advanced exercises used in a weight training program. An increased emphasis will be placed in the knowledge, understanding, value and practical application of building muscle strength and endurance. The course will include an increased understanding of the human muscular system. The objective is to further enhance the student’s ability to prepare their own physical fitness program at any time in their life and to assist others based upon sound physiological and bio-mechanical principles.  
Student Learning Outcome(s):  
Demonstrate and increased knowledge in weight training, including safety techniques and level 2 exercises. Define the main muscles in the human muscular system.

KIN 350-2  WEIGHT TRAINING II (1) UC/CSU  
Lecture: 0.5 hours / Lab: 2.5 hours  
This course enhances training skills, including enhanced spotting techniques, enhanced lifting techniques and an introduction to more advanced exercises used in a weight training program. An increased emphasis will be placed in the knowledge, understanding, value and practical application of building muscle strength and endurance. The course will include an increased understanding of the human muscular system. The objective is to further enhance the student’s ability to prepare their own physical fitness program at any time in their life and to assist others based upon sound physiological and bio-mechanical principles.  
Student Learning Outcome(s):  
Demonstrate and increased knowledge in weight training, including safety techniques and level 2 exercises. Define the main muscles in the human muscular system.

KIN 350-3  WEIGHT TRAINING III (1) UC/CSU  
Lecture: 0.5 hours / Lab: 2.5 hours  
This course enhances training skills, including enhanced spotting techniques, enhanced lifting techniques and an introduction to more advanced exercises used in a weight training program. An increased emphasis will be placed in the knowledge, understanding, value and practical application of building muscle strength and endurance. The course will include an increased understanding of the human muscular system. The objective is to further enhance the student’s ability to prepare their own physical fitness program at any time in their life and to assist others based upon sound physiological and bio-mechanical principles.  
Student Learning Outcome(s):  
Demonstrate and increased knowledge in weight training, including safety techniques and level 2 exercises. Define the main muscles in the human muscular system.

KIN 351-1  YOGA I (1) CSU  
Lecture: 0.5 hours / Lab: 2.5 hours  
This introductory course teaches a 5,000 year old form of mostly isometric poses (asanas), breathing techniques, and meditation. Yoga promotes mental, physical, and spiritual fitness. In addition there are brief lectures covering basic information on hypertension, exercise precautions, body composition and how to live a healthy lifestyle.  
Student Learning Outcome(s):  
1. Identify and practice safe movement mechanics. 2. Demonstrate improved strength, cardiovascular endurance and flexibility.
KIN 366-1  BADMINTON SKILLS I (1) UC/CSU  
Lecture: 0.5 hours / Lab: 2.5 hours

Students learn the basic fundamental skills and knowledge necessary to play badminton such as the serve, forehand, backhand, clear, drop, and smash shots. Also covered are singles and doubles strategy, along with the history of badminton, basic terminology, rules, and scoring. Safety and selection of equipment are included.

Student Learning Outcome(s):

The students will develop the basic knowledge and skills in the game of badminton to use for recreation and lifelong fitness demonstrated by achieving the NOVICE level of the Skill Rubric.

KIN 366-2  BADMINTON SKILLS II (1) UC/CSU  
Lecture: 0.5 hours / Lab: 2.5 hours  
Prerequisite: KIN 366-1

In this course, students learn intermediate skills and knowledge necessary to play badminton such as cross court, down the line and reverse cross court clears; at the net, from the back court, and from the mid-court drops; and forehand and backhand service. The course also covers offensive and defensive techniques of the smash as well as training drills, agility, endurance, and court coverage for competitive play.

Student Learning Outcome(s):

The student will demonstrate advanced skills needed to play badminton recreationally and competitively, demonstrate the ability to teach basic skills in the game and use the game for lifelong fitness by completing skills at the Intermediate level on the attached Rubric.

KIN 387  BASKETBALL (1) UC/CSU  
Lecture: 0.5 hours / Lab: 2.5 hours

This course is designed to teach all levels of basketball skills. It not only emphasizes fundamental basketball skills such as dribbling, passing and shooting but it also includes the selection and care of equipment, rules, offense and defense strategy, etiquette, terminology and the components of fitness.

Student Learning Outcome(s):

Student will be able to identify the basic rules of the game of basketball. Students will be able to participate in a game situation basketball scrimmage using proper skills.

KIN 391-1  VOLLEYBALL I (1) UC/CSU  
Lecture: 0.5 hours / Lab: 2.5 hours

This course is designed to teach the basic volleyball skills of passing, setting, spiking, serving and blocking. The course will introduce individual and team offense and defense systems, as well as the rules, etiquette, terminology and strategies for volleyball.

Student Learning Outcome(s):

Student will demonstrate a minimum of NOVICE in each of the skill areas tested on the rubric.

KIN 500  BASKETBALL THEORY (3) UC/CSU  
Lecture: 2 hours / Lab: 2 hours

This course will help the advanced basketball student acquire a more in-depth understanding of the various offensive and defensive theories in the sport of basketball. Analysis of strategies and outcomes will be emphasized.

Student Learning Outcome(s):

At the conclusion of this course, students will be able to diagram offensive and defensive plays.

KINESIOLOGY ATHLETICS

KIN ATH 504  INTERCOLLEGIATE ATHLETICS-BASKETBALL  
(3) UC/CSU RPT 3  
Lab: 10 hours

Fundamental, intermediate and advanced principles/theories and skills of Basketball. Instruction, demonstration and practice of basic basketball skills, including passing, dribbling, shooting, rebounding, individual and team offense/defense and basketball intercollegiate competition.

Student Learning Outcome(s):

Students will demonstrate the skills and strategies necessary to succeed in a game, meet or match.

KIN ATH 513  INTERCOLLEGIATE ATHLETICS-SWIMMING AND DIVING (3) UC/CSU RPT 3  
Lab: 10 hours

Intercollegiate Athletic competitive swimming and diving team course. Instruction, demonstration and practice of fundamental and advanced swimming and diving techniques, including starts, turns, stroke technique, breathing, interval training and intercollegiate competition.

Student Learning Outcome(s):

Students will compete in Intercollegiate Athletics.

KIN ATH 516  INTERCOLLEGIATE ATHLETICS-VOLLEYBALL  
(3) UC/CSU RPT 3  
Lab: 10 hours

This course provides the skills, training and allows for participation in the intercollegiate volleyball team. Students who take this class must meet eligibility requirements as requested by the conference and/or CCCAA.

Student Learning Outcome(s):

Students will demonstrate the skills and strategies necessary to succeed in a game, meet or match.
KIN ATH 517    INTERCOLLEGIATE ATHLETICS-WATER POLO  
(3) UC/CSU RPT 3  
Lab: 10 hours  
Intercollegiate Athletic competitive Water Polo team course. Fundamental and advanced principles/theories of water polo techniques. Instruction, demonstration and practice of swimming, eggbeater, offense, defense, counter attack, man up and man down situations.  
Student Learning Outcome(s):  
Students will demonstrate the skills and strategies necessary to succeed in a game, meet or match.

KIN ATH 552    INTERCOLLEGIATE SPORTS-CONDITIONING & SKILLS TRAINING (1) UC/CSU RPT 3  
Lab: 3 hours  
This course is designed for the student athlete. The following areas are emphasized: the analysis and training of athletic skills, the analysis of offensive and defensive systems, physical conditioning, strength training and aerobic conditioning.  
Student Learning Outcome(s):  
Students will demonstrate the skills and strategies necessary to succeed in a game, meet or match.

KIN ATH 560    INTERCOLLEGIATE SWIMMING/DIVING-FITNESS & SKILLS TRAINING (1) UC/CSU RPT 3  
Lab: 3 hours  
The course provides strength and fitness training for current or perspective intercollegiate athletes in the sport of swimming. The class provides the groundwork for an upcoming season through various swimming skills, drills, and aerobic and anaerobic conditioning.  
Student Learning Outcome(s):  
Students will Complete Eligibility Standards. Student will demonstrate improved swim conditioning levels. Students will demonstrate increased speed and decreased time in competitive events.

KIN ATH 561    INTERCOLLEGIATE WATER POLO-FITNESS & SKILLS TRAINING (1) UC/CSU RPT 3  
Lab: 3 hours  
The course is designed to provide strength and fitness training for current or perspective intercollegiate athletes in the sport. The class provides conditioning for an upcoming season, the rules and regulations of the sport as well as provides information on the requirements of being a competitive player.  
Student Learning Outcome(s):  
1.) Students will demonstrate exceptional ball handling skills in passing and receiving. 2.) Students will demonstrate exceptional defensive play in game situations. 3.) Students will meet eligibility standards. 4.) Students will demonstrate exceptional shooting abilities.

KIN ATH 563    INTERCOLLEGIATE VOLLEYBALL-FITNESS & SKILLS TRAINING (1) UC/CSU RPT 3  
Lab: 3 hours  
This course is designed for the student athlete. It is intended to provide focused strength and conditioning and flexibility exercises, emphasize safety and injury prevention and present new rules and game plays for volleyball.  
Student Learning Outcome(s):  
Students will demonstrate physical improvements in volleyball skills and game play.

KINESIOLOGY MAJOR

KIN MAJ 100    INTRODUCTION TO KINESIOLOGY (3) CSU  
Lecture: 3 hours  
Introduction to the discipline of Kinesiology/Physical Education; examination of the study of physical activity from the perspectives of experience, research, and professional practice. Topics include career opportunities, history, philosophy, current trends and curriculum development.  
Student Learning Outcome(s):  
The student who successfully completes this course will be able to do the following: 1. Evaluate different career paths in Kinesiology and describe the basic requirements needed to pursue a career in this field. 2. Explain the importance of physical activity in daily life and its relationship to health. 3. Identify the career options available to students graduating from departments of kinesiology, and the qualifications associated with 3 different careers.

KIN MAJ 101    FIRST AID AND CPR (3) UC/CSU  
Lecture: 3 hours  
This course covers and expands standard emergency first aid to include situations where help is delayed, during natural disasters and major catastrophes. This course also covers the recommendations by the American Heart Association, National Safety Council and the American National Red Cross for community members to respond to non-breathing and sudden cardiac emergencies. Includes techniques for all ages along with emergency action plans, safety, and prevention of disease transmission.  
Student Learning Outcome(s):  
Students will be able to identify emergency situations and provide the appropriate emergency care to victims. Students will be able to demonstrate the first aid care that is needed in common medical emergencies. Demonstrate cardiopulmonary resuscitation and the use of the AED.
KIN MAJ 106  SPORTS ETHICS (3) CSU
Lecture: 3 hours
This course addresses a wide range of moral and ethical issues in sports. Topics include values, principles, racial and gender equity, coaching, commercialization, enhancing stimulants and ergogenic aids, eligibility, violence, sportsmanship and Code of Ethics in sports. Examines current and historical events, rules, laws and governing organizations.

Student Learning Outcome(s):
Identify of performance substances used in sports and the impact they have had to the game.

KIN MAJ 108  ANCIENT OLYMPIC GAMES (3) CSU
Lecture: 3 hours
This course addresses a wide range of topics that are specific to the field of the Ancient Olympic Games. Topics include Prehistory of the Games, Athletics and Education, The Olympic Games in Ancient Greece, The Events, Sport in the Hellenistic and Roman Periods. The course will examine the historical and continuing effect of the Ancient Games on the present day Olympic movement.

Student Learning Outcome(s):
Define the role of Ancient Athletes in Greek society.

KIN MAJ 134  ADVANCED LIFESAVING (2) CSU
Lecture: 1 hour / Lab: 2 hours
Advisories: KIN 201-1 303-3 and or KIN 307-1.
This class provides training in and the opportunity to get certified in the latest Red Cross Lifeguarding program. The Red Cross Lifeguarding certificate includes training in cardiopulmonary resuscitation (CPR), first aid, automated external defibrillator (AED), oxygen administration, and Lifeguard Management materials.

Student Learning Outcome(s):
Students are prepared to respond to emergencies in and around the swimming pool.

LABR ST 002  COLLECTIVE BARGAINING (3) CSU
Lecture: 3 hours
This course examines the dynamics of collective bargaining including: preparation of demands and negotiation strategies, offers and counter-offers, major bargaining trends, contract campaigns, and ‘mock’ bargaining.

Student Learning Outcome(s):
Students will demonstrate the skills and knowledge to bargain a union contract.

LABR ST 003  LABOR RELATIONS LAW (3) CSU
Lecture: 3 hours
This course provides a comprehensive overview of labor relations laws, primarily for the private sector, covering employee, employer and union rights and obligations, unfair labor practices, union representation elections and other Labor Board procedures.

Student Learning Outcome(s):
The student will be able to recognize the main provisions of the National Labor Relations Act.

LABR ST 004  LABOR IN AMERICA (3) UC/CSU
Lecture: 3 hours
Examines how labor organizations and labor laws impact workers, families and American society focusing on worksite-related issues such as job security, income, workers’ rights, immigration and role of unions.

Student Learning Outcome(s):
Students will identify the role unions play in the United States and how unions benefit all workers.

LABR ST 005  GRIEVANCE AND ARBITRATION PROCEDURES (3) CSU
Lecture: 3 hours
Students learn to identify, investigate, write and present grievances and arbitrations with emphasis on participant’s own contract, grievance procedure and experiences.

Student Learning Outcome(s):
Students will identify, investigate, write and present grievances and arbitrations.

LABR ST 006  LABOR AND COMMUNITY SERVICES (3) CSU
Lecture: 3 hours
This course is designed to train Union Counselors to aid members in need. Topics include: financial assistance, debt counseling, unemployment/disability, health and mental health services, child care and other important community support.

Student Learning Outcome(s):
Students will be able to identify public and private agencies that provide assistance to members in need. Students will be able to develop a program to assist their members in need.
LABR ST 007 LABOR AND POLITICAL ACTION (3) CSU
Lecture: 3 hours
Covers current political issues facing working people, labor movement, methods and techniques for lobbying, political action, member mobilization, monitoring legislation and campaign laws.
Student Learning Outcome(s):
The student will be able to use effective electioneering techniques, including methods to mobilize members to political action.

LABR ST 009 ORGANIZING STRATEGIES AND TECHNIQUES (3) CSU
Lecture: 3 hours
Students will learn basic skills and techniques needed to organize new workers, build and strengthen their unions and learn about relevant laws and winning strategies.
Student Learning Outcome(s):
The student will be able to effectively use organizing strategies and techniques. The student will be able to formulate effective non-NLRA strategies.

LABR ST 011 LABOR IN THE PUBLIC SECTOR (3) CSU
Lecture: 3 hours
This course covers public employment practices, policies, laws and labor relations at the federal, state and local levels.
Student Learning Outcome(s):
Students will identify the legal framework of public sector labor relations and the impact of public policy on public sector unions.

LABR ST 012 BUILDING STRONG UNIONS (3) CSU
Lecture: 3 hours
This course examines how to manage and lead a union: including strategic planning and goal setting; effective communications; time management; team building; increasing member participation; leading organizational change.
Student Learning Outcome(s):
The student will be able to develop a strategic plan to motivate and mobilize members.

LABR ST 013 UNION LEADERSHIP (3) CSU
Lecture: 3 hours
This class covers basic leadership skills for building influence and advancing in a union. Includes public speaking, parliamentary procedure, strategic planning, staff development, motivating and mobilizing members.
Student Learning Outcome(s):
Students will develop a strategic plan to build power for their union to organize and mobilize members for contract and political campaigns.

LABR ST 020 WORKERS’ RIGHTS (3) CSU
Lecture: 3 hours
Basic legal rights for workers, including: wage and hour laws, overtime, leaves, workplace privacy including e-mail and computers, accommodating disabilities, including pregnancy, and combating sexual harassment and employment discrimination.
Student Learning Outcome(s):
Students will identify workers’ rights deriving from federal, California and local labor laws.

LABR ST 021 THE WORKING CLASS AND CINEMA (3) UC/CSU
Lecture: 3 hours
This course will examine and analyze how feature film portrayals of the working class and labor unions may shape public perception.
Student Learning Outcome(s):
The student will be able to describe how Hollywood portrayals affect Americans’ views of unions.

LABR ST 024 ENFORCING WORKERS’ RIGHTS (3) CSU
Lecture: 3 hours
Skills needed to work in the Labor Commissioner’s office and other state agencies to ensure workers are paid their wages.
Student Learning Outcome(s):
Students will be able to investigate, analyze, prepare and write cases to enforce labor laws.

LABR ST 101 INTRODUCTION TO UNIONS (1) CSU
Lecture: 1 hour
Overview of union impact on wages, benefits, working conditions and public policies by industry. Surveys basic union structures, operation and governance.
Student Learning Outcome(s):
Students will identify the role of unions in society and how unions work in a particular industry.

LABR ST 102 CONTRACT NEGOTIATIONS SKILLS (1) CSU
Lecture: 1 hour
This course covers the basics of union contract negotiations, including preparation of demands, negotiations strategies and tactics, contract language, and major bargaining trends.
Student Learning Outcome(s):
Students will learn and demonstrate the skills and techniques needed to bargain union contracts.
LABR ST 103  LABOR LAW UPDATE (1) CSU
Lecture: 1 hour

This course covers recent changes in labor law related to labor relations, state and local bargaining, federal, state and local labor boards, employment and discrimination, union organizing, and campaign election laws.

Student Learning Outcome(s):

The student will be able to identify recent changes in labor relations and related laws which govern the relationships between labor unions, employees and employers.

LABR ST 104  CURRENT ISSUES FOR LABOR (1) CSU
Lecture: 1 hour

This course explores issues facing the American Labor Movement, including strategies to address them.

Student Learning Outcome(s):

Students will describe key issues facing Labor and strategies to address them.

LABR ST 105  GRIEVANCE HANDLING SKILLS (1) CSU
Lecture: 1 hour

The student will investigate, write and present union grievances.

Student Learning Outcome(s):

Students will acquire knowledge of the grievance process, including how to investigate, evaluate, document, write and present a union grievance.

LABR ST 106  LABOR AND DISASTER RELIEF (1) CSU
Lecture: 1 hour

Training labor representatives to respond to disasters, emergencies, acts of terrorism or union/employer economic actions through utilizing appropriate community, public and private resources and agencies.

Student Learning Outcome(s):

Students will be able to identify public and private agencies that provide assistance to members in need. Students will be able to develop a program to assist your members in need.

LABR ST 107  ORGANIZING FOR POLITICAL ACTION (1) CSU
Lecture: 1 hour

A primer for political activists; phone banks, precinct walks, polling, get out the vote, and vote-by-mail, campaign financing regulations, and communication strategies to mobilize members and the public.

Student Learning Outcome(s):

The student will be able to identify the essential elements of a grassroots political campaign and how to recruit and mobilize members.

LABR ST 108  LABOR AND GLOBALIZATION (1) RPT 3
Lecture: 1 hour

Explores how globalization affects the economy and jobs.

Student Learning Outcome(s):

Students will be able to describe current economic issues regarding globalization and labor strategies to address the issues.

LABR ST 109  UNION BUILDING STRATEGIES (1) CSU
Lecture: 1 hour

Skills and techniques to build a strong union through strategic planning, leadership development, communication techniques, 1-to-1 techniques.

Student Learning Outcome(s):

Student will develop a plan to organize and build strong unions.

LABR ST 113  UNION LEADERSHIP SKILLS (1) CSU
Lecture: 1 hour

Basic leadership skills for building influence and advancing in your union. Includes strategic planning, parliamentary procedure, running effective meetings, communications and public speaking.

Student Learning Outcome(s):

Students develop leadership skills to be effective union leaders.

LABR ST 114  WORKER’S LEGAL RIGHTS (1) CSU
Lecture: 1 hour

Basic workers’ rights such as privacy, leaves, wage and hour laws, accommodating disabilities, including pregnancy and protections against wrongful discharge, etc.

Student Learning Outcome(s):

Students will be able to identify and explain the basic legal rights and protections of workers.

LABR ST 115  WORKPLACE HEALTH AND SAFETY (1) CSU
Lecture: 1 hour

Strategies to identify and address current issues in workplace health and safety, such as stress, understaffing, workload, chemical hazards and ergonomic problems. Strategies covered: hazard identification, legal rights, Cal/OSHA, contract language, effective Health & Safety Committees, outside resources, and training programs.

Student Learning Outcome(s):

The student will be able to identify and create an action plan to address workplace health and safety hazards.
LABR ST 118  EMPLOYEE BENEFITS PLANS (1) CSU
Lecture: 1 hour

This course covers employee health and retirement plans: how they work, how they are funded, how workers can maximize their benefits, proposed changes in these plans, and labor's role in negotiating and preserving employee benefits.

Student Learning Outcome(s):
The student will list and describe the three basic elements of employee retirement security - employer-based pensions, social security, and personal savings. The student will recognize how health plans are negotiated, funded, and maintained.

LABR ST 121  LABOR COMMUNICATIONS (1) CSU
Lecture: 1 hour

This course surveys methods and techniques that modern labor organizations use in e-communications, including web sites, text messaging, Twitter and Facebook, list serves, and e-blasts.

Student Learning Outcome(s):
The student will be able to list and explain the different new media tools currently available.

LABR ST 122  FRAMING THE MESSAGE FOR LABOR (1) CSU
Lecture: 1 hour

Students examine the language of labor and progressive action and learn to sharpen the message to broaden public support, build power, and gain political results.

Student Learning Outcome(s):
The student will be able to craft effective messages based on the union's goals and audience assessment.

LABR ST 123  STEWARD TRAINING (1) CSU
Lecture: 1 hour

In this course, students will survey the role of union stewards and practice basic skills necessary. Students will overview skills and procedures for communicating with members, processing grievances, solving problems, organizing and mobilizing members.

Student Learning Outcome(s):
Students will employ the steps necessary to handle employee grievance under a union contract. Students will develop a plan to mobilize members.

LABR ST 125  LABOR ARBITRATION (1) CSU
Lecture: 1 hour

The arbitration process covers: selection and authority of arbitrators, preparation and elements of cases, how arbitrators decide cases, settlement techniques, and tips for effective use of arbitration.

Student Learning Outcome(s):
The student will be able to prepare and present a case for labor arbitration.

LABR ST 126  ISSUES IN LABOR ARBITRATION (1) CSU RPT 3
Lecture: 1 hour

This course provides an overview of the two major issues in arbitration: discipline and discharge cases, covering: just cause, absenteeism, insubordination, substance abuse, and theft/dishonesty.

Student Learning Outcome(s):
The student will be able to evaluate facts and contract language to present an effective discipline and discharge case.

LABR ST 127  WORKER'S COMPENSATION (1) CSU
Lecture: 1 hour

The course provides a basic understanding of how Workers Compensation works, including: types of injuries and disability benefits, medical care, rehabilitation and financial support, and procedures for filing a claim and appeals.

Student Learning Outcome(s):
Students will describe basic California Workers' Comp benefits, procedures, and how to file claims.

LABR ST 128  SEXUAL HARASSMENT AND DISCRIMINATION (1) CSU RPT 1
Lecture: 1 hour

This course surveys sexual harassment and job discrimination including: criteria for claims, the law, court decisions, and protective agencies, policies and procedures for prevention.

Student Learning Outcome(s):
The student will be able to describe the legal elements of employment discrimination and sexual harassment and identify ways for employers, employees and unions to prevent job discrimination.

LABR ST 132  STRATEGIC BARGAINING (1) CSU
Lecture: 1 hour

Building bargaining power through the strategic use of leverage and pressure tactics, such as power analysis and member and community involvement.

Student Learning Outcome(s):
Students will develop a strategic contract campaign which includes pressure and leverage techniques.

LABR ST 134  CALIFORNIA WORKERS' RIGHTS (1) CSU
Lecture: 1 hour

This course examines how the California Labor Code extends basic rights beyond federal law, including: minimum wage, maximum hours, timely pay, overtime and meal periods, right to know, parental and other leave rights, and enforcement procedures.

Student Learning Outcome(s):
Students will learn and demonstrate an understanding of California labor laws and protections, leaves and enforcement procedures.
LABR ST 136 WHEN THE PAYCHECK STOPS (1) CSU

Lecture: 1 hour

Union representatives occasionally must counsel members when the paycheck stops due to strikes, layoff, or plant closure. This course overviews professional services available for referral and teaches strategies for negotiating with landlords, mortgage companies, utility companies and other creditors.

Student Learning Outcome(s):

Students will identify public and private agencies that provide assistance to members in need. Students will develop a program to assist members in need.

LAW

LAW 018 MARRIAGE AND FAMILY LAW (3) CSU

Lecture: 3 hours

Students will examine and evaluate the ramifications of marriage, legal separation, divorce, custody and support, adoption, and guardianship on parental prerogatives and/or their statuses and capacities as legally recognized adults.

Student Learning Outcome(s):

Upon successful completion of this course a student will be able to: 1. Brief family law cases 2. Prepare legal documents, complete legal forms pertaining to marriage dissolution, or domestic violence, or modification of child support and custody orders.

LAW 038 CRIMINAL LAW & PROCEDURE (3)

Lecture: 3 hours

This course will introduce the student to Criminal Law and Criminal Procedure. The student will learn the elements of a crime that must be proven as to the allegations of the commission of that particular crime. The student will learn the regulatory procedures, both federal and state, that must be followed in order to realize criminal culpability. The student will also examine the roles of the parties to a criminal action.

Student Learning Outcome(s):

1) Student will be able to define a crime in terms of its elements and properly classify it. 2) Student will be able to determine if the parties to a crime have met their requisite juridical obligations and procedures in defending against the allegation of having engaged in a criminal act.

LEARNING SKILLS

LRNSK 001B READING (1) RPT 1

Lab: 3 hours

This course is an intermediate reading course which focuses on developing reading comprehension, analysis, and interpretation skills. Students develop strategies that assist them in understanding and responding to intermediate level reading material. Students will learn reading skills including: inferencing, predicting outcome, drawing conclusions, comparing and contrasting, recognizing cause and effect, and paraphrasing. This course is the second in a sequence of three progressive modules and prepares students for academic and vocational success.

Student Learning Outcome(s):

Upon successful completion of this course, students will be evaluated on competency in the following skills: Words In Context Recalling Information Constructing Meaning Evaluating Meaning Interpreting Graphs.

LRNSK 001C READING (1) RPT 1

Lab: 3 hours

This course focuses on developing advanced reading skills including interpretation, analysis, and evaluation of fictional and non-fictional prose. Students utilize strategies to improve their understanding of the structural features of expository and narrative texts. This course is the third in a sequence of three progressive modules and prepares students for academic and vocational success.

Student Learning Outcome(s):

Upon successful completion of this course, students will be evaluated on competency in the following skills:

LRNSK 002B ENGLISH FUNDAMENTALS (1) RPT 1

Lab: 3 hours

This course covers the standard English writing conventions and language structure including grammar, punctuation, capitalization, spelling mechanics, and sentence structure. Students learn how to write simple, compound, and complex sentences. Students also learn to recognize and correct sentence fragments, run-on sentences, and demonstrate proofreading skills. Students are introduced to paragraph structures and learn to identify topic sentences, supporting details, and concluding sentences.

Student Learning Outcome(s):

Paragraph Writing Assessment Produce an MLA page formatted typed written unified and cohesive paragraph on an assigned topic with a topic sentence, relevant supporting details, and a concluding sentence. Grammar Assessment Use grammar and structural knowledge to successfully complete a post-grammar test.

**Student Learning Outcome(s):**

1. Identify the procedures and show ability to solve problems in computation.
2. Identify the procedures and show ability to solve problems in applied mathematics.

**Student Learning Outcome(s):**

1. Use appropriate learning skills to enhance math efficacy and success.
2. Identify the place value of whole numbers and how whole numbers and decimals relate to simple fractions.

**Student Learning Outcome(s):**

1. Writing Assessment: A 4 paragraph essay following the writing process (prewriting, drafting, revising, editing and proofreading) to produce typed academic paragraphs using MLA page format. 2. Grammar Assessment Use grammar and structural knowledge to successfully complete a post-grammar test.

**Student Learning Outcome(s):**

Students will: Social Studies 1. Apply reading comprehension skills to prose of practical and historic documents. 2. Complete multiple choice, drag and drop, hot spot, and fill in the blank questions to answer questions on Civics and government, United States history, Economics, Geography and the world. Science: Apply reading and writing skills to show analysis and understanding of data representation, inference skills, and problem solving techniques.

**Student Learning Outcome(s):**

1. Use computational and applied mathematic skills to complete TABE Level D Math post test.
LIBRARY SCIENCE

LIB SC 101  LIBRARY RESEARCH METHODS (1) UC/CSU
Lecture: 1 hour

Students learn to conduct research using the library’s print and electronic resources, to distinguish between academic and popular sources, to develop research and organizational strategies for research assignments, to apply citation rules to their assignments, and to understand the basic requirements of copyright law and academic integrity.

Student Learning Outcome(s):

At the completion of the course, students will be able to: -Access books and articles electronically -Gather, identify, and analyze library resources -Appraise a Web site for its currency, accuracy and authority -Evaluate sample paraphrases to detect plagiarism and explain how a paraphrase is or is not plagiarized -Construct MLA and APA citations and a Works Cited List.

MACHINE SHOP

MSCNC 111  PRINCIPLES OF MACHINE TOOLS I (2) CSU
Lecture: 1.5 hours / Lab: 1.5 hours

MSCNC 111 (Principles of Machine Tools I) is a course that will engage students with Machine Shop specific topics including; safety practices, hand tools, precision measuring tools, set-up and operation of band saws, drill presses, lathes, mills, pedestal grinders, power saws as well as computer numerical control (CNC) machine tools. Theoretical and manipulative exercises will challenge students’ understanding of practical subject matter.

Student Learning Outcome(s):

Students will utilize applied machine shop theory to identify and know the safe use of various basic hand and machine tools.

MSCNC 112A  TECHNOLOGY AND APPLICATION OF MACHINING IA (3)
Lab: 9 hours

MSCNC 112A (Technology and Application of Machining IA) is a lab course that will engage students with machine shop specific topics including; shop safety, speeds, feeds, set-up, operation and technology of basic machine tools. Band saws, drill presses, lathes, mills, pedestal grinders, power saws as well as computer numerical control (CNC) machine tools will be introduced and used by the students. Along with the machine tools, students will be expected to identify, manipulate and properly use and read basic hand tools and precision measuring instruments.

Student Learning Outcome(s):

Students will demonstrate knowledge of safety practices in the shop.

MSCNC 112B  TECHNOLOGY AND APPLICATION OF MACHINING (CAD) IB (1)
Lab: 3 hours

MSCNC 112B (Technology and Application of Machining (CAD) IB) is a course that will engage students with Machine Shop specific topics related to computer aided design (CAD). Topics will include solid model creation, blueprint creation, dimensioning, product development and assembling individual parts into completed assemblies.

Student Learning Outcome(s):

Students will utilize the computer aided design (CAD) software to create a solid model and generate a blueprint.

MSCNC 114  PRINT INTERPRETATION & SKETCHING (BLUEPRINT I) (3) CSU
Lecture: 3 hours

MSCNC 114 (Print Interpretation & Sketching (Blueprint I)) is a course that will engage students in Machine Shop topics that are related to blueprint reading, interpretation and sketching techniques. Mechanical drawings of multiple views, different drawing standards, dimensioning techniques, as well as sketching techniques for free hand drawings will also be covered.

Student Learning Outcome(s):

Students will utilize industry specific blueprint reading skills to visualize and communicate part shape, form and function

MSCNC 115  BASIC APPLIED MATHEMATICAL CALCULATIONS (3) CSU
Lecture: 3 hours

MSCNC 115 (Basic Applied Mathematical Calculations) is a course that will engage students with machine shop specific topics related to calculations and calculator manipulation. Number theory, inch & metric calculations, algebra, ratios & proportions and fractions will all be covered in this course.

Student Learning Outcome(s):

Students will utilize applied machine shop calculations to perform addition, subtraction, multiplication & division of whole numbers, decimals, fractions & mixed numbers.

MSCNC 121  PRINCIPLES OF MACHINE TOOLS II (2) CSU
Lecture: 1.5 hours / Lab: 1.5 hours

MSCNC 121 (Principles of Machine Tools II) is a course that will engage students with Machine Shop specific topics including; safety practices, Principles of lathes, milling machines, attachments, and special lathe and milling operations. Introduction to other special machinery and basic CNC programming will also be covered.

Student Learning Outcome(s):

Students will utilize applied machine shop theory to identify and know the safe use of various milling and turning machines as well as their accessories.
MSCNC 122A TECHNOLOGY AND APPLICATION OF MACHINING IIA (3) CSU
Lecture: 3 hours

MSCNC 122A (Technology and Application of Machining IIA) is a course that will engage students with Machine Shop specific topics, such as implementation of safety, speeds, feeds, form tools, setups including related attachments and accessories for lathe and milling machine operations. Inspection techniques and CNC machine set-up and operations will also be covered.

Student Learning Outcome(s):
Students will utilize CNC programming techniques to write and run part programs.

MSCNC 122B TECHNOLOGY AND APPLICATION OF MACHINING IIIA (1)
Lecture: 3 hours

MSCNC 122B (Technology and Application of Machining IIB) is a course that will engage students with Machine Shop specific topics related to computer aided design (CAD). Topics will include geometric dimensioning and tolerancing (GD&T), section views, auxiliary views and advanced modeling and assembling techniques.

Student Learning Outcome(s):
Students will utilize a computer aided design (CAD) program to create intermediate part models, product assemblies and related blueprints.

MSCNC 124 PRINT INTERPRETATION AND INSPECTION (BLUEPRINT II) (3) CSU
Lecture: 3 hours

MSCNC 124 (Print Interpretation and Inspection (Blueprint II)) is a course that will engage students in Machine Shop specific topics regarding advanced interpretation of machine shop-CNC related drawings with introduction to inspection, geometric tolerancing, and SPC.

Student Learning Outcome(s):
Students will utilize industry accepted standards for reading, form, fit and function of parts described on MSCNC related blueprints.

MSCNC 125 INTERMEDIATE APPLIED MATHEMATICAL CALCULATIONS (3) CSU
Lecture: 3 hours

MSCNC 125 (Intermediate Applied Mathematical Calculations) is a class that will engage students with Machine Shop specific topics such as; algebraic formulas related to good machining practices and geometric relationships and formulas are used to get correct cutting positions and programming code.

Student Learning Outcome(s):
Students will utilize applied machine shop calculations to perform machine shop related algebraic & geometric calculations.

MSCNC 131A PRINCIPLES OF MACHINE TOOLS IIIA (2)
Lecture: 1.5 hours / Lab: 1.5 hours

MSCNC 131A (Principles of Machine Tools IIIA) is a course that will engage students with Machine Shop specific topics including; shop safety, engine lathe, milling machine, vertical milling machine, grinders as well as materials, inspection techniques and machining topics. Theoretical and manipulative exercises will challenge students understanding of practical subject matter.

Student Learning Outcome(s):
Students will utilize applied machine shop theory to identify and know the safe use of various materials, sawing machines, grinding machines & specialized tools and equipment.

MSCNC 131B PRINCIPLES OF MACHINE TOOLS (CNC) IIIB (3)
Lecture: 3 hours

MSCNC 131B (Principles of Machine Tools (CNC) IIIB) is a course that will engage students with Machine Shop specific topics related to machine tool programming. Both numerical control (NC) and computer numerical control (CNC) machine tools must have 'part programs' written for them to perform their intended function and create parts that are correct in fit, form and function.

Student Learning Outcome(s):
Students will utilize CNC programming knowledge to draw a picture that represents the "part" that the machine tool program would make.

MSCNC 132A TECHNOLOGY AND APPLICATION OF MACHINING IIIA (3)
Lab: 9 hours

MSCNC 132A (Technology and Application of Machining IIIA) is a course that will engage students with Machine Shop specific topics related to the set-up, operation, and/or programming of grinding machines, milling machines, engine lathes, CNC machining centers, CNC turning centers and EDM machines. Assigned projects will allow students to continue to build their skills on previously encountered machine tools as well as being introduced to new technologies, including unconventional machining techniques.

Student Learning Outcome(s):
Students will utilize industry accepted procedures to create shop projects.

MSCNC 132B TECHNOLOGY AND APPLICATION OF MACHINING (CAM) IIIB (1)
Lab: 3 hours

MSCNC 132B (Technology and Application of Machining (CAM) IIIB) is a course that will engage students with Machine Shop specific topics regarding computer aided manufacturing (CAM) computer programs. Students will create geometry, cutting tools, process information in order for the CAM program to create cutter paths that will create the correct fit, form and function on the part.

Student Learning Outcome(s):
Students will utilize the computer aided manufacturing (CAM) program to create simple geometry, cutting tools and processes and then have the CAM program write a part program.
### MSCNC 135 Advanced Applied Mathematical Calculations (3) CSU

**Lecture:** 3 hours

MSCNC 135 (Advanced Applied Mathematical Calculations) is a course that will engage students with Machine Shop specific topics as they relate to trigonometric and compound angular calculations.

**Student Learning Outcome(s):**

Students will utilize applied machine shop calculation problems related to machine shop trigonometric problems and programming related problems.

### MSCNC 141 Principles of Machine Tools (CNC) IV (2) CSU

**Lecture:** 1.5 hours / **Lab:** 1.5 hours

MSCNC 141 (Principles of Machine Tools (CNC) IV) is a course that will engage students with Machine Shop specific topics: Advanced theory related to safety, programming, set-up and operation of CNC machine tools. Introduction to specialized machining for intricate parts and/or tool and die and/or mold making will also be covered.

**Student Learning Outcome(s):**

Students will utilize applied machine shop theory to program various computer numerical control machine tools.

### MSCNC 142A Technology and Application of Machining IV A (3)

**Lab:** 9 hours

MSCNC 142A (Technology and Application of Machining IV A) is a course that will engage students with Machine Shop specific topics: advanced safety, application, programming, set-up and operation of CNC lathes and milling machines. Set-up and operation of precision machine tools for intricate parts and/or tool and die and/or plastic mold fabrication will also be covered.

**Student Learning Outcome(s):**

Students will utilize industry approved techniques and procedures to program, set-up and machine several parts to create a multiple part assembly.

### MSCNC 142B Technology and Application of Machining IV B (1)

**Lab:** 3 hours

MSCNC 142B (Technology and Application of Machining IV B) is a course that will engage students with Machine Shop specific topics: shop safety, advanced manufacturing techniques, CNC operations, advanced inspection techniques and manufacturing economy.

**Student Learning Outcome(s):**

Students will utilize knowledge of computer aided design (CAD) and computer aided manufacturing (CAM) programs to model, generate a part program and then cut the part on a CNC machine tool.

### MSCNC 161A Computer Assisted Machine Programming (CAM) IA (3) CSU

**Lecture:** 3 hours

MSCNC 161A (Computer Assisted Machining Programming (CAM) IA) is a course that will engage students with Machine Shop specific topics: advanced topics of computer aided design (CAD), computer aided manufacturing (CAM) and computer numerical control (CNC) programs for complex two and three axis machined parts. Use of 3-D graphics and part verification software systems will also be explored.

**Student Learning Outcome(s):**

Students will utilize the computer aided manufacturing (CAM) program to generate a part program for a specified CNC machine tool control.

### MSCNC 161B Computer Assisted Machine Programming (CAM) IB (3)

**Lecture:** 3 hours

MSCNC 161B (Computer Assisted Machine Programming (CAM) IB) is a course that will engage students with Machine Shop specific topics: advanced topics of computer aided design (CAD), computer aided manufacturing (CAM) and computer numerical control (CNC) and the integration of these three technologies in modern manufacturing.

**Student Learning Outcome(s):**

Students will utilize the computer aided manufacturing (CAM) program to generate a part program to run a CNC machine with a specified control.

### MGMT 002 Organization and Management Theory (3) CSU

**Lecture:** 3 hours

As part of the study of industrial organization, this course covers such topics as financing enterprise, building the internal organization, and plant layout. The study of industrial operations includes production planning and control, inventory and materials handling, quality control, and methods analysis and work simplification. In addition, this course includes a consideration of the principles of industrial relations and personnel management, office management, and internal coordination and environmental issues.

**Student Learning Outcome(s):**

1. Students will understand the overview of organization development.
2. Students will understand the nature of planned change in organizations.
3. Students will be able to diagnose organizations along with groups and jobs.
4. Students will understand individual, interpersonal and group process approaches in organizations.
5. Student will be able to evaluate the restructuring of an organization.
6. Student will understand work design and performance management.
7. Student will understand organizational transformation that includes cultural change, organization learning and knowledge management.
8. Student will understand organizational development in global settings.
9. Students will be able to examine future trends in organizational development.
GRADUATION REQUIREMENTS AND EDUCATIONAL PROGRAMS

MGMT 013  SMALL BUSINESS ENTREPRENEURSHIP (3) CSU
Lecture: 3 hours

This course will present a systematic approach to successful small business operation. The course covers personnel evaluation, pre-ownership evaluation, management and leadership, financing, location, taxation, records, employees, purchasing, advertising, sales, and credit. The course emphasizes the development of a business plan.

Student Learning Outcome(s):
1. Students will learn the environment of Human Resource Management by being able to demonstrate an understanding of the Human Resource Management functions in organizations. 2. Students will learn the elements of planning, recruiting and staffing as they relate to Human Resource Management. 3. Students will learn and understand the elements of workplace training, performance management and career planning.

MGMT 033  HUMAN CAPITAL MANAGEMENT (3) CSU
Lecture: 3 hours

This course is concerned with the development of the personnel function, personnel tools and records, and the use of psychology in personnel administration. Training and education of employees, incentives, special problems of personnel administration and management, employee representation, and social controls are included as topics of discussion.

Student Learning Outcome(s):
1. Students will be able to research, compose, and write a comprehensive business plan. Students will be able to apply the principles of marketing, financial requirements, operations, and management to a small business. Students will be able to analyze and evaluate the competitive environment and identify direct competition. Students will be able to understand, evaluate and compare starting a business versus buying an ongoing business.

MGMT 941  COOPERATIVE EDUCATION - MANAGEMENT (4) CSU RPT 3
Lecture: 4 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):
1. The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

MANUFACTURING & INDUSTRIAL TECHNOLOGY

MIT 220  INTRODUCTION TO ROBOTICS (3) CSU
Lecture: 2 hours / Lab: 2 hours

This introductory course in robotics emphasizes hands-on experience to build a basic functional robot. Students learn about electric motors, servos, sensors, switches, actuators and their application in a robot. Students learn computer programming and its integration into a working robotic unit. The course also includes mechanical assembly, connecting electronic components, wiring and soldering, and testing.

Student Learning Outcome(s):
1. Student will construct a fully functional robot by assembling components such as Servo motors, sensors, switches and actuators. 2. Student will utilize learned algorithms to program a Basic Stamp micro-controller and integrate it into a fully functional robot.

MIT 221  SEMI-AUTOMATIC WELDING I (GMAW) IN ADVANCED MANUFACTURING (4.5)
Lecture: 1.5 hours / Lab: 9 hours

This course provides detailed knowledge including welder’s performance qualifying skills using the Gas Metal Arc Welding (MIG) process used in the modern manufacturing industry. This course follows the American Welding Society Curriculum Guide for the Training of Welding Personnel: Level I-Entry Welder leading to qualifications outlined in American Welding Society (AWS) D1.1-Structural Steel Welding Code and the American Society of Manufacturing Engineers/ASME Section IX Code.

Student Learning Outcome(s):
1. Students will perform a safety inspection while identifying GMAW and equipment components. 2. Upon completion of this course students will (1) add, subtract, multiply, divide whole numbers, fractions, mixed numbers and decimals, (2) round off decimals to one or more places, (3) use measuring devices to determine size, length, angle or distance, (4) use a calculator to perform basic arithmetic operations, and (5) convert mixed numbers fractions to decimals and vice versa. 3. Students will pass the GMAW-S welder performance qualification test (AWS EDU-3) on carbon steel. 4. Students will pass the GMAW welder performance qualification test (AWS EDU-3) on carbon steel.

MIT 222  GAS TUNGSTEN ARC WELDING I IN ADVANCED MANUFACTURING (4.5)
Lecture: 1.5 hours / Lab: 9 hours

This course is designed to provide students with basic performance qualification skills in Gas Tungsten Arc Welding (TIG) needed for employment in the modern manufacturing industry. This course follows AWS standardized curriculum leading to students performance qualifications to the AWS Specifications for Fusion Welding for Aerospace Applications.

Student Learning Outcome(s):
1. Students will perform a safety inspection while identifying GTAW equipment components. 2. Students will interpret the GMAW welder performance qualification test (Module 3) on carbon steel.
MIT 223  SEMI-AUTOMATIC WELDING II (FCAW) IN ADVANCED MANUFACTURING (4.5)
Lecture: 1.5 hours / Lab: 9 hours

This course provides detailed knowledge including welder’s performance qualifying skills using the Flux-Cored Arc Welding process used in the modern manufacturing industry. This course follows the American Welding Society Curriculum Guide for the Training of Welding Personnel: Level I-Entry Welder leading to qualifications outlined in American Welding Society (AWS) D1.1-Structural Steel Welding Code and the American Society of Manufacturing Engineers (ASME) Section IX Code.

Student Learning Outcome(s):
1. Students will perform a safety inspection while identifying GMAW and FCAW equipment components. 2. Upon completion of this course students will make metric system measurements, geometric measurements, angular measurements, and bends, stretchouts, economical layout, and takeoffs. 3. Students will pass the FCAW welder performance qualification test (AWS EDU-1) on carbon steel using both FCAW-S and FCAW-G processes.

MIT 224  GAS TUNGSTEN ARC WELDING II IN ADVANCED MANUFACTURING (4.5)
Lecture: 1.5 hours / Lab: 9 hours

This course is designed to provide students with advanced performance qualification skills in Gas Tungsten Arc Welding (TIG) needed for employment in the modern manufacturing industry. This course follows AWS standardized curriculum leading to students performance qualifications to the AWS Specifications for Fusion Welding for Aerospace Applications.

Student Learning Outcome(s):
1. Students will interpret advanced elements of a drawing or sketch. 2. Students will pass the GTAW welder performance qualification test (AWS EDU-1) on stainless steel. 3. Students will pass the GTAW welder performance qualification test (AWS EDU-5) on aluminum.

MIT 225  GAS TUNGSTEN ARC WELDING III (PIPE) IN ADVANCED MANUFACTURING (4.5)
Lecture: 1.5 hours / Lab: 9 hours

This course provides the advance knowledge needed to weld pressure vessels using the Gas Tungsten Arc Welding (TIG) process. This course follows the American Welding Society Curriculum Guide for the Training of Welding Personnel: Level II-Advance Welder, leading to welder’s qualifications outlined in the American Society of Manufacturing Engineers (ASME) Section IX Code.

Student Learning Outcome(s):
1. Students will interpret advanced elements of a drawing or sketch. 2. Students will pass the GTAW Welder’s Performance Qualification Test on Pipe in the Fixed 45° Position to AWS Standard-Level II-Advance Welder-Workmanship Test. (AWS2-S) and (AWS2-6).

MIT 226  INTRODUCTION TO ROBOTIC WELDING AND AUTOMATION (4.5)
Lecture: 1.5 hours / Lab: 9 hours

The course provides fundamental theory and hands-on application of robotic welding and automation. Emphasis is placed on safety awareness, programming techniques, and basic gas metal arc welding applications using a six-axis robotic welding systems.
MARKET 025 SMALL BUSINESS MARKETING INTERNSHIP
(3) RPT 3
Lecture: 3 hours

This course will provide students with the opportunity to test their entrepreneurial potential and experience firsthand what entrepreneurship entails. Students will immerse themselves in the entrepreneurial process by participating in a comprehensive real-world small business simulation and participating in an external internship provided by local small businesses. Students will also work with entrepreneurial faculty to successfully develop and launch their own small business in addition to receiving valuable knowledge, resources and one-on-one support to aid them in sustainable, long-term small business success.

Student Learning Outcome(s):

Students will be able to recognize entrepreneurial opportunities and demonstrate the understanding of how to launch their entrepreneurial career. Students will be able to utilize their critical thinking and problem solving abilities to develop a small business operations, marketing, human resources and financial plan, develop strategies for ongoing small business advancement and success, utilize computer technology to support small business management and determine relevant federal, state, and city licensing regulations and requirements.

MARKET 040 RETAIL MANAGEMENT (3) CSU
Lecture: 3 hours

This course provides a systematic approach to the principles and procedures of retailing, including a study of store location, store layout, store organization, buying, pricing, stock planning, and the retail communication mix.

Student Learning Outcome(s):

Students will be able to analyze and apply various marketing concepts in the industry of retail management, such as identification of market needs and/or wants and buying behavior. They will also understand marketing planning, retail strategies, and the retail mix to design, to develop and operate a retail business.

MATH 105 ARITHMETIC (3)
Lecture: 3 hours

This course reviews fundamentals of arithmetic in college and business. Topics include basic operations with fractions, decimals, percent, and measurement. The course emphasizes problem solving techniques that are useful in practical situations.

Student Learning Outcome(s):

Upon the completion of the course students will be able to: Perform the four basic operations on rational numbers. Apply and follow the mathematical principles and order of operations to evaluate numerical expressions involving rational number problems. Solve application problems by using critical-thinking skills.

MATH 110 INTRODUCTION TO ALGEBRAIC CONCEPTS (5)
Lecture: 5 hours
Prerequisite: Placement Exam

This course discusses abstract ideas necessary for understanding algebra and reviews selected topics in arithmetic relevant to algebra. Students are introduced to fundamental notions of algebra including signed numbers, variables, simple equations, proportional reasoning, applications, and modeling. This course also includes instruction in mathematics study skills.

Student Learning Outcome(s):

Upon successful completion of this course 1. Students will define and manipulate signed number and variables. 2. Students will solve simple linear equations in one variable. 3. Students will locate signed numbers on the number line and use a number line to add and subtract signed numbers. 4. Students will apply a known formula to a given situation.

MATH 112 PRE-ALGEBRA (3)
Lecture: 3 hours
Prerequisite: Math 105

This course prepares students for their first course in Algebra. Topics include brief review of arithmetic, operations with signed numbers, evaluate and simplify variable expressions, solve linear equations in one variable, introduce number line, and apply known formulas to given situations in word problems.

Student Learning Outcome(s):

Upon successful completion of this course 1. Students will be able to define and manipulate signed numbers and variables. 2. Students will be able to solve simple linear equations in one variable. 3. Students will be able to locate signed numbers on the number line and use a number line to add and subtract signed numbers. 4. Students will be able to apply a known formula to a given situation.

MATH 113 ELEMENTARY ALGEBRA A (3)
Lecture: 3 hours
Prerequisite: Mathematics 112.

Topics include review of signed numbers, variables, the order of operations; addition and subtraction of polynomials; solve and graph linear equations, solve inequalities; solve systems of equations.

Student Learning Outcome(s):

1. Perform operations on real numbers and algebraic expressions 2. Apply and follow the mathematical principles, operations and strategies to write, solve, graph and interpret linear equations and inequalities. 3. Solve systems of linear equations in two variables. 4. Perform operations on polynomials 5. Solve application problems by using critical-thinking skills.
MATH 115 ELEMENTARY ALGEBRA (5)
Lecture: 5 hours
Prerequisite: Mathematics 110 or 112.

Topics include signed numbers, variables, the order of operations; addition, subtraction, multiplication, and division of signed numbers and polynomials. Solve linear equations, inequalities, factoring, graphs. Solve word problems, systems of equations, rational equations, radicals and quadratic equations.

Student Learning Outcome(s):
Upon successful completing this course: 1. The student will be able to define and manipulate linear expressions and polynomials. 2. The student will be able to solve any linear equation, factorable quadratic equations and various systems of two-variable linear equations. 3. The student will be able to plot points and graph linear equations on a Cartesian coordinate system. 4. The student will be able to set up linear equations representing situations, solve, justify, and interpret the solution in the context of the problem.

MATH 121 ELEMENTARY GEOMETRY FOR COLLEGE STUDENTS (3)
Lecture: 3 hours
Prerequisite: Mathematics 115.

This course is an introduction to Euclidean geometry and it is equivalent to one year of high school geometry. This course reviews the basic geometric construction, definitions, postulates, theorems and their proofs for triangles, parallel lines and circles.

Student Learning Outcome(s):
SLOs: Determine angle measures in different geometric figures. Construct geometric figures using a straightedge and compass. Write direct and indirect proofs of theorems and corollaries. Solve problems involving geometric figures using definitions, postulates, and theorems.

MATH 125 INTERMEDIATE ALGEBRA (5)
Lecture: 5 hours
Prerequisite: Mathematics 114 or Mathematics 115.

This course is a study of the properties of real numbers, laws of exponents, radicals, equations & inequalities in linear and quadratic form, system of equations, matrices, graphing in two variables, rational expressions & equations, complex numbers, conic sections & their graphs, exponential and logarithmic functions.

Student Learning Outcome(s):
Upon successful completion of the course, student will be able to: 1. Analyze a wide range of applications from many disciplines and graphically or using simplex method to solve optimization problems in two variables with linear constraints. 2. Understand the principles of borrowing and saving to compare different financial opportunities and make informed decisions. 3. Use some of the principles from probability and statistics to extract useful information from raw data.
MATH 263 CALCULUS FOR BUSINESS AND SOCIAL SCIENCE (5) UC/CSU

Lecture: 5 hours

Prerequisite: Mathematics 125.

This course is an introduction to one and two variable calculus as applied to business, economics, and social sciences, including applications of partial derivatives and multiple integrals to extremum problems.

Student Learning Outcome(s):

1) Apply the methods of differential calculus to analyze problems in Business and Economics, as well as Life Science, Physical Science and Social Science. 2) Apply the methods of differential calculus to sketch the graph of functions, determine maxima and minima in optimization problems, find rates of change and tangent lines and analyze revenue, cost and profit, in addition to marginal revenue, marginal cost and marginal profit. 3) Apply the methods of integral calculus to solve problems in Business and Economics.

MATH 240 TRIGONOMETRY (3) CSU

Lecture: 3 hours

Prerequisite: Mathematics 125; Mathematics 121.

Topics in this course include trigonometric functions, circular functions; trigonometric equations; trigonometric identities; solutions of right and oblique triangles; inverse trigonometric functions, graphing; complex numbers and Demoivre’s Theorem; polar coordinates; vectors and applications.

Student Learning Outcome(s):

Upon successful completion students will be able to: 1. Develop reciprocal, quotient and Pythagorean identities from the definitions of the trigonometric functions. 2. Solve application problems that are right-triangle based. 3. Graph the trigonometric functions; define and graph the inverse circular functions. 4. Use the Law of Sines and Law of Cosines to solve vector applications. 5. Solve such application problems as length of an arc, area of a triangle, sector, velocity and angular speed.

MATH 245 COLLEGE ALGEBRA (3) UC/CSU

Lecture: 3 hours

Prerequisite: Mathematics 125.

Upon successful completion of this course, students will reinforce the concept of functions and their graphs important in later courses of mathematics, science, business, nursing, or computer science. Polynomial, rational, radical, exponential, and logarithmic equations, both linear and nonlinear systems, sequences and series, and basics of probability are covered to allow students to solve a wide variety of real-life applications.

Student Learning Outcome(s):

Upon successful completion of the course student will: (1) Graph and model with polynomial, rational, exponential and logarithmic functions. (2) Solve polynomial, rational, exponential and logarithmic equations. (3) Solve linear and nonlinear system of equations and inequalities and their applications.

MATH 260 PRECALCULUS (5) UC/CSU

Lecture: 5 hours

Prerequisite: Mathematics 240.

After a brief review of algebra with real and complex numbers, this course will cover the following topics: polynomial and rational functions with informal limits; exponential, logarithmic and trigonometric functions; systems of equations and matrices; sequences, series and the binomial theorem; conics and polar coordinates.

Student Learning Outcome(s):

Upon successful completion students will be able to: 1. Analyze and graph exponential and logarithmic functions; solve exponential and logarithmic equations. 2. Analyze and graph trigonometric functions; solve trigonometric equations; verify and use trigonometric identities and formulas. 3. Write recursive and explicit formulas for sequences; evaluate partial sums and infinite series; apply the Binomial Theorem. 4. Write equations of conics, and graph conics; convert equations from rectangular to polar coordinates, and vice versa.

MATH 265 CALCULUS WITH ANALYTIC GEOMETRY I (5) UC/CSU

Lecture: 5 hours

Prerequisite: Mathematics 260.

The first Calculus course in a three-course sequence. Topics include: functions, limits, continuity, techniques and applications of differentiation and integration, mean value theorem, Fundamental Theorem of Calculus, definite integrals.

Student Learning Outcome(s):

Upon successful completion students will be able to: 1. Use and interpret derivatives algebraically, graphically, and numerically to model rates of change in application problems (for example, velocity, acceleration, population growth). 2. Use and interpret integrals algebraically, graphically, and numerically to model summation in application problems (for example, distance traveled, average value, and areas of geometric figures).

MATH 266 CALCULUS WITH ANALYTIC GEOMETRY II (5) UC/CSU

Lecture: 5 hours

Prerequisite: Mathematics 265.

This is the second course in the Calculus sequence. Topics include: application of the definite integral to geometry, science and engineering; techniques of integral evaluation; introduction to differential equations; sequences and infinite series; parametric and polar curves, conic sections.

Student Learning Outcome(s):

Upon completion of the course, a student will be able to: 1. Select and use the appropriate technique to evaluate a given non-elementary integral. 2. Use the definite integral to solve problems in geometry, science and engineering. 3. Select an appropriate test and apply it to determine whether a given infinite series converges; apply the theory of power series to applications.
MATH 267 CALCULUS WITH ANALYTIC GEOMETRY III (5) UC/CSU
Lecture: 5 hours
Prerequisite: Mathematics 266.

This is the third course in Calculus series. It reviews operations with vectors in two and three-dimensional spaces as well as vector-valued functions with their applications. Topics include partial derivatives, Lagrange multiplier, Line integrals, multiple integrals in polar, cylindrical and spherical coordinates, Green’s theorem, Surface integrals, Divergence and Stokes’ theorems.

Student Learning Outcome(s):
Upon the successful completion of this course, students will be able to 1. Use and interpret derivatives algebraically, graphically, and numerically to model rates of change in application problems such as: locate relative and absolute extrema of functions of several variables; derive equations of lines and planes, analyze the motion of a particle in space, use differentials to find local linear approximations, find directional derivatives, and gradient. 2. Use and interpret integrals algebraically, graphically, and numerically to model summation in application problems such as: find volume of a solid region, center of a mass, moments of inertia, surface area, flux, work, and energy.

MATH 270 LINEAR ALGEBRA (3) UC/CSU
Lecture: 3 hours
Prerequisite: Mathematics 267.

Introduction to linear algebra and matrix theory. Topics include: linear systems, matrices and determinants; vector spaces and linear transformations; eigenvectors and eigenvalues; inner product spaces and canonical forms.

Student Learning Outcome(s):
Upon the successful completion of the course students will: 1.- Solve systems of linear equations using Linear Algebra methods. 2.- Prove basic results in Linear Algebra using appropriate proof-writing techniques. 3.- Use orthogonal and orthonormal bases to solve problems in Linear Algebra. 4.- Find eigenvalues,eigenvectors and the dimensions of the spaces of a matrix or a linear transformation and use them in applications.

MATH 275 ORDINARY DIFFERENTIAL EQUATIONS (3) UC/CSU
Lecture: 3 hours
Prerequisite: Mathematics 267.

Topics include ordinary differential equations with concentration on first and higher-order, homogeneous and non-homogeneous linear differential equations with or without initial-value conditions; system of linear first-order differential equations; Cauchy-Euler equation; series solutions; Laplace transform; numerical solutions.

Student Learning Outcome(s):
Upon the successful completion of the course students will: 1. Solve first-order separable linear differential equations and use these methods to solve applied problems. 2. Solve higher order constant-coefficient linear differential equations and systems of differential equations and use these methods to solve applied problems. 3. Apply appropriate transform methods to solve differential equations. 4. Construct power series solutions for various classes of ordinary differential equations.

MICROBIOLOGY

MICRO 001
INTRODUCTORY MICROBIOLOGY (5) UC/CSU
Lecture: 3 hours / Lab: 6 hours
Prerequisite: Biology 003 or 005 or 006 or 020 or 036 or Physiology 001 and Chemistry 051 or 065 or 101.

This course covers fundamental principles of microbiology and standard laboratory techniques. It includes systematics, morphology, physiology, genetics, ecology and evolution of microorganisms. Medical applications include concepts in microbial growth and control, epidemiology, immunology and disease. Industrial and environmental applications cover use of microorganismsâ€™ diverse metabolic abilities in the production of food, chemicals and medicine, including role in biotechnology and environment.

Student Learning Outcome(s):
1. Be able to apply basic chemical principles in microbiology. 2. Be able to differentiate cellular structures in procaryotic and eucaryotic cells. 3. Be able to discuss fundamental concepts in microbial metabolism, microbial growth, and microbial genetics. 4. Be able to compare and contrast bacteria, fungi, algae, protozoa, helminthes, and viruses. 5. Be able to differentiate non-specific and specific defenses of the host. 6. Be able to discuss infectious diseases of the human organ systems.

MICRO 020
GENERAL MICROBIOLOGY (4) UC/CSU
Lecture: 3 hours / Lab: 3 hours
Prerequisite: Biology 003 or 005 or 006 or 020 or 036 or Physiology 001 and Chemistry 051 or 065 or 101.

This is a comprehensive course for nursing and allied health majors. It covers fundamental principles and laboratory techniques related to systematics, morphology, physiology, genetics, ecology and evolution of microorganisms. Medical applications include basic concepts of microbial growth and control, epidemiology, immune response and a survey of important human diseases.

Student Learning Outcome(s):
1. Be able to apply basic chemical principles in microbiology. 2. Be able to differentiate cellular structures in procaryotic and eucaryotic cells. 3. Be able to discuss fundamental concepts in microbial metabolism, microbial growth, and microbial genetics. 4. Be able to compare and contrast bacteria, fungi, algae, protozoa, helminthes, and viruses. 5. Be able to differentiate non-specific and specific defenses of the host. 6. Be able to discuss infectious diseases of the human organ systems.
GRADUATION REQUIREMENTS AND EDUCATIONAL PROGRAMS

MICROCOMPUTER TECHNICIAN

MICROTK 077  CISCO NETWORKING ACADEMY - SEMESTER I (3)
Lecture: 2 hours / Lab: 3 hours

The first in a four course sequence that qualifies the student to take the
CISCO CCNA Certification Test; and covers Fundamentals of Computer
Internet-working, Safety Technology, Protocols, Network Theory and Stan-
dards, Cabling, Electrical Considerations, OSI Models, IP Addressing and
basic networking Hardware.

Student Learning Outcome(s):
The student will have an understanding of network terminology and theory,
recognize various Ethernet configurations.

MICROTK 078  CISCO NETWORKING ACADEMY - SEMESTER II (3)
Lecture: 2 hours / Lab: 3 hours
Prerequisite: Microcomputer Technician 77.

This is the second course in a four course sequence that qualifies the
student to take the CISCO CCNA Certification Test; and covers router
fundamentals, beginning router setup and configuration, routed and rout-
ing protocols, WAN fundamentals, network troubleshooting and network
management.

Student Learning Outcome(s):
The student will understand beginning router setup and configuration, routed
and routing protocols, wide area inter networking fundamentals, network
troubleshooting, and network management.

MICROTK 079  CISCO NETWORKING ACADEMY - SEMESTER III (3)
Lecture: 2 hours / Lab: 3 hours
Prerequisite: Microcomputer Technician 78.

This is the third course in a four course sequence that qualifies the student
to take the CISCO CCNA Certification Test; and covers advanced router
set-up and configurations, LAN switching theory and VLANs, advanced LAN
and LAN switched design, Novell IPX, and Threaded case studies.

Student Learning Outcome(s):
The student will demonstrate an understanding of the following: Single-Area
OSPF, EIGRP, Switching Concepts, Switches and Switch Configuration,
the Spanning Tree Protocol, Virtual LANs, Trunking Protocols, and Scaling
IP Addresses. The WAN technologies PPP, ISDN and DDR, and Frame
Relay are introduced. The student will also become familiar with Network
Administration.

MICROTK 080  CISCO NETWORKING ACADEMY - SEMESTER IV (3)
Lecture: 2 hours / Lab: 3 hours
Prerequisite: Microcomputer Technician 79.

This is the fourth course in a four course sequence that qualifies the student
to take the CISCO CCNA Certification Exam; and covers advanced WAN
theory and design, WAN Technology, PPP, Frame Relay, ISDN; Application
of National SCANS skills in managing a network and network threaded case
studies.

Student Learning Outcome(s):
Students will demonstrate an understanding of the following: advanced WAN
design, WAN technologies PPP, Frame Relay, ISDN, applications of
national SCAN skills in managing a network, and Network Threaded case
studies.

MICROTK 160  IT ESSENTIALS APPLICATION SOFTWARE
FUNDAMENTALS (2) CSU
Lecture: 1 hour / Lab: 3 hours

Instruction and demonstrations are provided on the application, set-up,
configuration and operation of a wide range of computer programs.

Student Learning Outcome(s):
Students will demonstrate the ability to install a computer Operating System
with all its driver devices.

MICROTK 162  IT ESSENTIALS NETWORKING PERSONAL
COMPUTERS (4)
Lecture: 2 hours / Lab: 6 hours

The course will assist students in designing, selecting, configuring and
installing local area networks. System administration and troubleshooting is
also covered in detail.

Student Learning Outcome(s):
Upon completion students will be able to connect to the Internet and share
resources in a network environment.

MICROTK 164  IT ESSENTIALS MICROCOMPUTER THEORY
AND SERVICING (5)
Lecture: 3 hours / Lab: 6 hours

The course provides servicing techniques for microcomputers and their
related peripherals. Hands-on instruction is provided in diagnosing a range
of microcomputers malfunctions.

Student Learning Outcome(s):
Students will assemble a computer system and troubleshoot the system
using appropriate tools and diagnostic software.
MICROT 165 LINUX SURVIVAL COURSE (3) CSU
   Lecture: 2 hours / Lab: 3 hours
This course provides an introduction to the world of Linux (considered the success story of Open Source Software development). Linux and Open Source fundamentals will be taught as well as configuration and basic troubleshooting.
Student Learning Outcome(s):
Students will be able to deploy and troubleshoot a Linux installation.

MICROT 166 CCNA SECURITY (3)
   Lecture: 2 hours / Lab: 3 hours
This course provides knowledge and skills to administer network devices and applications in a security infrastructure, recognize network vulnerabilities, and detect security threats. This course offers an overview of security challenges and solutions, and installing, monitoring, and troubleshooting Cisco security solutions to secure a network.
Student Learning Outcome(s):
Students will be able to control administrative access to network devices using ssh and configure administrative roles on network devices for network security.

MOTORCYCLE REPAIR MECHANIC

MCYCMEK 210 MOTORCYCLE FUEL INDUCTION AND POLLUTION CONTROL (4) CSU
   Lecture: 3 hours / Lab: 3 hours
Instruction is offered in the areas of motorcycle fuel systems including carburetion, fuel injection, and pollution controls.
Student Learning Outcome(s):
Disassemble, reassemble, and adjust carburetors, fuel injection system and pollution controls.

MCYCMEK 212 MOTORCYCLE TUNE-UP AND CHASSIS MAINTENANCE (4) CSU
   Lecture: 3 hours / Lab: 3 hours
Course offers instruction in the areas motorcycle tune-up, general motorcycle repair and maintenance, including chassis components.
Student Learning Outcome(s):
Perform tune-up, valve adjustment and clutch/brake system maintenance.

MCYCMEK 214 MOTORCYCLE ELECTRICAL PRINCIPLES AND REPAIR (4) CSU
   Lecture: 3 hours / Lab: 3 hours
Instruction is offered in electrical theory, diagnosis, and repair as applied to the electrical systems of multi-cylinder motorcycles. Shop practices are given on testing procedures and test equipment, and repair.
Student Learning Outcome(s):
Perform diagnosis, repair and adjustment of motorcycle electrical systems.

MCYCMEK 216 MOTORCYCLE ENGINE OVERHAUL AND DIAGNOSIS (4) CSU
   Lecture: 3 hours / Lab: 3 hours
Multi-cylinder engine principles, operation and overhaul methods are stressed. Shop instruction on diagnosis, disassembly, repair, overhaul and assembly of multi-cylinder engines is offered.
Student Learning Outcome(s):
Perform engine overhaul.

MUSIC

MUSIC 101 FUNDAMENTALS OF MUSIC (3) UC/CSU
   Lecture: 3 hours
This course provides an introduction to Western music theory and composition. The goal is to increase students’ enjoyment and appreciation of music by understanding musical terminology, theory, and techniques. By the end of the course, students will be able to write a short musical composition.
Student Learning Outcome(s):
1. Students will understand the fundamentals of Western music theory and composition through an awareness of music terminology, theoretical structures, and techniques. 2. Students will be able to identify the notes of a piano keyboard. 3. Students will be able to write and read melodic, harmonic, and rhythmic notation in treble and bass clef. 4. Students will be able to write a short musical composition.

MUSIC 116 SURVEY AND HISTORY OF ROCK, POP AND SOUL MUSIC (3) UC/CSU
   Lecture: 3 hours
Introduction to rock, pop, and soul music styles covering their origins, stylistic development and cultural impact. This course is designed to increase student awareness of the relationship between popular music and society.
Student Learning Outcome(s):
1. Students will know and understand the origins and development of the diverse elements/styles associated in rock music and identify and distinguish the various style periods aurally. 2. Students will identify various people important in the creation of rock music and identify the musical instruments they played and/or other important accomplishments by them. 3. Students will analyze the sociological trends as reflected in musical styles and song lyrics.
MUSIC 141  JAZZ APPRECIATION (3) UC/CSU
Lecture: 3 hours
A survey of twentieth century ragtime, blues, New Orleans and Chicago jazz, stride piano, swing, bebop, cool jazz, hard bop, modal jazz, third stream, avant-garde and free jazz, fusion, and experimental jazz styles.
Student Learning Outcome(s):
Students will be aware of and breakdown various styles and genres of jazz music.

MUSIC 650  BEGINNING GUITAR (2) UC/CSU
Lecture: 1 hour / Lab: 2 hours
Learning the basics of guitar with emphasis on right and left hand techniques, tuning, chords, strumming and notation. Students will learn to read and play simple melodies and accompaniments to gain a firm grasp of the instrument. Student must possess a guitar.
Student Learning Outcome(s):
1. Students will demonstrate the understanding of the fundamentals of left and right hand technique for both finger style and pick style guitar playing.
2. Students will be able to read standard notation. 3. Students will be able to identify Major, minor, and seventh chords. 4. Students will use the skills they have learned to perform melodies and songs. 5. Students will be able to perform a song demonstrating proper left hand and right hand technique.

REGNRSG 119  INTRODUCTION TO NURSING (1)
This course will introduce nursing students to the RN Program Conceptual Framework and ethics as applied to nursing. It will identify student learning styles and guide students in study and test taking techniques to promote success in the program.
Student Learning Outcome(s):
Student will demonstrate basic understanding of conceptual framework of nursing education.

REGNRSG 121  FUNDAMENTALS OF NURSING (3) CSU
Lecture: 1 hour / Lab: 6 hours
This course is an introduction to the philosophy of nursing, nursing history, Maslow's Hierarchy of needs, and legal and ethical issues in nursing. Concurrent with the theory, the nursing student will have basic client care experience in the skills lab and hospital setting.
Student Learning Outcome(s):
1. The student will demonstrate knowledge and understanding of fundamental principles of nursing care.
2. The student will be able to provide basic nursing care to a hospitalized patient using principles of nursing process and Maslow's Hierarchy of Needs.

REGNRSG 122  INTRODUCTION TO MEDICAL SURGICAL NURSING (3) CSU
Lecture: 1 hour / Lab: 6 hours
Prerequisites: REGNRSG 121 & 123.
This course is designed to introduce the student to the concept of medical surgical nursing using Maslow's Hierarchy of Needs as a framework.
Student Learning Outcome(s):
The student will be able to utilize the nursing process and Maslow's Hierarchy of Needs to assess and plan how to meet the basic needs of medical surgical client.

REGNRSG 123  NURSING PROCESS AND COMMUNICATION (2) CSU
Lecture: 2 hours
This course will introduce nursing students to the RN Program Conceptual Framework and ethics as applied to nursing. It will identify student learning styles and guide students in study and test taking techniques to promote success in the program.
Student Learning Outcome(s):
Students will use Nursing Process in conjunction with Maslow's Hierarchy of Needs to make appropriate nursing judgments.

REGNRSG 125  NURSING PHARMACOLOGY (2) CSU
Lecture: 1.5 hours / Lab: 1.5 hours
This course focuses on the effects of drug therapy on human body systems. The body systems include: the central nervous system, autonomic nervous, cardiovascular, renal, endocrine, respiratory and Gastro-intestinal systems. Also included are anti-infective, anti-inflammatory, immune and biological modifiers, chemotherapeutic, hematological, dermatologic, ophthalmic and otic agents. The students will learn and practice principles of medication administration.
Student Learning Outcome(s):
1. Students will be able to identify uses, actions, side effects, and adverse reactions to commonly used medications. 2. Students will demonstrate administration of oral, enteral, and parenteral medications.

REGNRSG 126  MEDICAL-SURGICAL NURSING I (5) CSU
Lecture: 3 hours / Lab: 6 hours
Prerequisite: Registered Nursing 122 and Registered Nursing 124 and Registered Nursing 125 and Registered Nursing 134
This basic course focuses on the nursing care of the adult client with moderate stress posed by common endocrine, gastrointestinal, cardiac and respiratory disorders. The student will function as a member of the health care team and begining leadership skills will be presented. Emphasis will be placed on classroom and clinical application of critical thinking and therapeutic nursing interventions in acute, chronic and community health care settings.
Student Learning Outcome(s):
Student will be able to care for clients with fluid and electrolyte imbalances, acid-base imbalances, infections, endocrine disorders, gastrointestinal disorders, cardiovascular disorders, and respiratory disorders in the acute healthcare setting.
REGNRSG 127  MEDICAL-SURGICAL NURSING II (5) CSU
Lecture: 3 hours / Lab: 6 hours
Prerequisite: Registered Nursing 126 and Registered Nursing 129 and Registered Nursing 130 and Registered Nursing 134;

This intermediate level medical/surgical nursing course focuses on nursing care of adult clients with high acuity problems within hospital and community settings. Students will use nursing process and Maslow’s Hierarchy of needs to plan and implement nursing care. The course builds on the theory and skills presented in RN 126. Leadership role will be expanded.

Student Learning Outcome(s):
Student will formulate a comprehensive plan of care, organize and prioritize the needs of high acuity clients based upon Maslow’s Hierarchy of Needs and nursing process for clients with intermediate high acuity problems, and multi-system illnesses in the acute healthcare environment.

REGNRSG 128  MEDICAL-SURGICAL NURSING III (3) CSU
Lecture: 1.5 hours / Lab: 4.5 hours
Prerequisite: Registered Nursing 127 and Registered Nursing 131 and Registered Nursing 134;

This course focuses on the nursing care of medical-surgical clients in a variety of setting. Emphasis will be on classroom and clinical application of critical thinking and caring interventions in chronic, acute, critical care and community health care settings.

Student Learning Outcome(s):
Students will demonstrate classroom and clinical application of critical thinking and caring interventions for medical-surgical clients in chronic, acute, critical care and community health care settings.

REGNRSG 129  GERONTOLOGY & COMMUNITY BASED NURSING (2) CSU
Lecture: 1 hour / Lab: 3 hours
Prerequisite: Registered Nursing 122; Registered Nursing 123; Registered Nursing 125; Registered Nursing 134;

This course focuses on nursing care of the older adult client with common health and illness needs. Emphasis will be on classroom and clinical application of critical thinking and caring therapeutic nursing interventions in acute, chronic and community health care settings for the older adult population.

Student Learning Outcome(s):
Students will assess and provide care for elderly clients in acute and community settings.

REGNRSG 130  PSYCHIATRIC-MENTAL HEALTH NURSING (3) CSU
Lecture: 1.5 hours / Lab: 4.5 hours
Prerequisite: Registered Nursing 122 and Registered Nursing 124 and Registered Nursing 125 and Registered Nursing 134;

This course focuses on nursing care of clients with common psychiatric mental health needs/disorders across the lifespan. Students will apply the nursing process, critical thinking, psychosocial theory and Maslow’s Hier-

Student Learning Outcome(s):
Students will use the nursing process in providing psychiatric and mental health care to patients. Student will use therapeutic communication techniques to form therapeutic alliances with psych-mental health patients.

REGNRSG 131  REPRODUCTIVE NURSING AND WOMENS HEALTH (3.5) CSU
Lecture: 2 hours / Lab: 4.5 hours
Prerequisite: Registered Nursing 126 and Registered Nursing 129 and Registered Nursing 130 and Registered Nursing 134;

This course focuses on the nurse as a provider of care, manager of care and a member of the profession in a variety of maternal/newborn and women’s health settings.

Student Learning Outcome(s):
The student will demonstrate an understanding of the reproductive system and the characteristics of normal pregnancy, physiological and psychological elements, process of labor and delivery, post-partum care, and care of the newborn.

REGNRSG 132  CARE OF CHILDREN AND FAMILY (3.5) CSU
Lecture: 2 hours / Lab: 4.5 hours
Prerequisite: Registered Nursing 126 and Registered Nursing 131 and Registered Nursing 134;

This course focuses on the nurse as a provider of care, manager of care and member of the profession in a variety of settings involving children and families. Course content includes physiological, psychological, developmental and socio-cultural needs of children and families. Course content in Pediatric Nursing will be presented within the framework of the wellness/illness continuum of the client and family from birth through adolescence.

Student Learning Outcome(s):
Utilize biopsychosocial concepts and theories, communication skills, and principles of critical thinking to apply the nursing process when caring for children and their families.

REGNRSG 133  NURSING LEADERSHIP & MANAGEMENT (3) CSU
Lecture: 0.5 hours / Lab: 7.5 hours
Prerequisite: Registered Nursing 126 and Registered Nursing 132 and Registered Nursing 134;

This course focuses on the transitioning role of the graduating Associate Degree nurse as a provider of care, manager of care and member of the profession. Concepts and issues to be examined include effective leadership styles, advanced therapeutic communication, delegation, conflict resolution, time management, nursing ethics and professional issues. Clinical experience is in the form of a preceptorship.

Student Learning Outcome(s):
Demonstrate leadership skills and ability to practice as entry-level registered nurse.
REGNRSG 134   NURSING SIMULATION LAB (1) CSU
Lab: 3 hours
This course is designed to allow students to practice nursing skills in a structured setting. It will make use of patient care scenarios in which evidence based practice will be emphasized. It must be taken in semesters 1, 2 and 3. It is optional in semester 4. The class will be individualized to meet students needs.

Student Learning Outcome(s):
Demonstrate proficiency in applying patient care skills to simulated clinical setting.

REGNRSG 135   TRANSITION FROM LVN TO RN (2)
Lecture: 2 hours
This is a bridge course for students who have a valid current California Vocational Nursing License. It focuses on content necessary to make the role transition from LVN to RN. Content will include Professional Nursing, Nursing Process, Maslow’s Hierarchy of Needs, communication skills, ethical and legal issues affecting nursing practice, cultural assessment techniques and pharmacology and dosage calculation review.

Student Learning Outcome(s):
Student will compare and contrast current LVN role with RN role. Student will demonstrate competence in applying Nursing Process and Maslow’s Hierarchy of needs to RN Nursing Care Plans. Student will demonstrate understanding of basic concepts in pharmacology and dosage calculation.

REGNRSG 136   NURSING SIMULATION LAB INTERMEDIATE (1)
Lab: 3 hours
This course is designed to allow students to practice nursing skills in a structured setting. It will make use of patient care scenarios in which evidence based practice will be emphasized. The class will be individualized to meet students needs.

Student Learning Outcome(s):
Demonstrate proficiency in applying patient care skills to simulated clinical setting.

REGNRSG 137   NURSING SIMULATION LAB ADVANCED (1)
Lab: 3 hours
This course is designed to allow students to practice nursing skills in a structured setting. It will make use of patient care scenarios in which evidence based practice will be emphasized. The class will be individualized to meet students needs.

Student Learning Outcome(s):
Demonstrate proficiency in applying patient care skills to simulated clinical setting.

OFF MCH 002   ADDING AND CALCULATING MACHINES (1) CSU
Lab: 2 hours
Advisory: Mathematics 105.
This course demonstrates the 10-key touch method and explains the various computerized calculator function keys. The methods used help develop the proper skills needed to use computerized 10-key calculators in the workplace. The review of basic math functions, with emphasis on practical business problems.

Student Learning Outcome(s):
1. Understand calculator functions. 2. Calculate complex functions used in business. Calculations will include interest, discounts, investments in stocks and bonds, and converting fractions to percentages. 3. Understand touch method addition, subtraction, decimal point key, percents, constant multiplication, division rounding, mixed operations, and decimals.

PALEGAL 003   CIVIL RIGHTS AND THE LAW (3) CSU
Lecture: 3 hours
This course will analyze United States Supreme Court decisions as they relate to civil rights in the context of their historical periods. Its ultimate purpose is to give the student an understanding of how the United States Supreme Court has had to respond to social movements within the United States, including but not limited to movements relating to racial equality, gender equality, religious expression, and sexual orientation, and how its interpretations of associated laws have impacted those movements as to their objectives, carriage, and reach.

Student Learning Outcome(s):
1. Student will be able analyze the sociopolitical impact of Court decisions upon specific societal groups as those groups perceive protections guaranteed by the United States Constitution. 2. Student will be able to assess conflicts between U.S. Supreme court mandates and Congressional prescriptions.
PALEGAL 004 LEGAL INTERNSHIP (3) CSU
Lecture: 1 hour / Lab: 6 hours
Prerequisite: Paralegal 10; Advisory: English 101.

Under the instructor’s direction and according to guidelines, paralegal student will be assigned to a law related institution, a local court, district attorney’s office, city attorney’s office, private law firm or a law library to demonstrate their career technical education skills and abilities.

Student Learning Outcome(s):
Student will gain an intimate understanding of how a legal institution operates. Student will experience first-hand the demands of a legal institution such as those of a law office. Student will experience first-hand how to interact with office personnel and clients/customers of diverse interests and socioethnic backgrounds.

PALEGAL 010 INTRODUCTION TO LAW AND LEGAL PROFESSION (3) CSU
Lecture: 3 hours
Prerequisite: English 28.

This introductory course provides an introduction to legal terminology, research of legal problems, law and ethics, and the role of the paralegal as a legal assistant.

Student Learning Outcome(s):
1. Comprehend and use legal terminology. 2. Access and utilize traditional and electronically formatted resources related to legal research. 3. Draft documents outlining and/or summarizing their research findings and conclusions based on those findings.

PALEGAL 011 INTRODUCTION TO CIVIL LITIGATION II (3) CSU
Lecture: 3 hours
Prerequisite: Paralegal 10; Corequisite: Paralegal 10.

Continuation of Paralegal I with the study of composition, location, and jurisdiction of all courts including an introduction to legal drafting and writing with continued study of document production and administration within the judiciary and a detailed examination of civil and criminal litigation.

Student Learning Outcome(s):
1. Student will be able to complete documents needed to begin civil litigation. 2. Student will be able to write motions necessary to advance a litigation in favor of one party or another. 3. Student will become familiar with and complete other court forms such as subpoenas, etc.

PALEGAL 012 TORT LAW (3)
Lecture: 3 hours

This course provides an overview of the fundamentals of Tort Law including intentional torts to the person and to property, negligence, and strict liability. Additionally students will study personal injury investigation, preparation of legal pleadings, preparation and analysis of discovery materials, and how to prepare for tort litigation.

Student Learning Outcome(s):
1. Comprehend when and under what circumstances another owes them a legal duty to prevent harm to their person and/or property. 2. Initiate and engage an appropriate course of lawful action toward realizing a commensurate remedy for the harm or harms suffered to themselves and/or their property.

PALEGAL 013 WILLS, TRUSTS, AND PROBATE ADMINISTRATION (3)
Lecture: 3 hours

Study of the fundamental principles of the law of wills, trusts, and probate including an examination of the organization and jurisdiction of the California Probate Court and the administration of estates through that court.

Student Learning Outcome(s):
1. Determine legal characteristics of different forms of property possession 2. Devise a plan for the distribution of a decedent’s property according to the rules of California Probate Law as it applies to intestacy or contested wills. 3. Compose a legal will or establish a legal trust as to the disposition of a person’s personal and/or real properties.

PALEGAL 014 LAW OFFICE MANAGEMENT AND PROCEDURES (3)
Lecture: 3 hours
Advisory: English 101 and Paralegal 010.

Students will examine the role of the paralegal in realizing fundamental objectives of managing a law office including understanding basic accounting principles, client services, personnel oversight, use of office technology, case indexing and filing, and office correspondence between colleagues and between clients.

Student Learning Outcome(s):
At the completion of this course student will be able to: 1. Establish and maintain a client file. 2. Research a case and provide a case brief for that researched case.

PALEGAL 016 CIVIL AND CRIMINAL EVIDENCE (3) CSU
Lecture: 3 hours

Students will examine the rules of court including deposition and interrogatory preparations and how each affects the admissibility of evidence in a civil or criminal proceeding.

Student Learning Outcome(s):
1. Utilize resource materials in determining applicable evidentiary rules as codified at the federal and state levels of the judiciary. Apply rules of evidence in determining whether offered evidence may be legally admitted for consideration at a civil or criminal proceeding.
PALEGAL 017 LEGAL WRITING (3)
Lecture: 3 hours

Students will be introduced to traditional sources of law related information. Students will also be introduced to electronically-formatted sources of law related information. Students will utilize both source types in researching legal issues and preparing documents related to their findings.

Student Learning Outcome(s):
1). Perform legal research utilizing traditional and electronically-formatted resources. 2). Draft legal documents including memorandi, briefs, and opinion letters.

PALEGAL 019 PROPERTY AND CREDITOR RIGHTS (3)
Lecture: 3 hours

Students will be introduced to the study of the different classifications of property interests including community property, tenancies, leases and other property interests. Students will also be introduced to the study of systems of recording those interests and how to search those databases. Students will examine secured transactions and bankruptcy laws.

Student Learning Outcome(s):
1). Demonstrate a comprehension of terminology associated with various classifications of property and property interests. 2). Property assess and evaluate the legal ramifications and attendant rights related to the acquisition and distribution of property interests as an individual possessor or as co-possessor of that interest. 3). Demonstrate a comprehension of and properly evaluate their rights as a creditor or debtor toward resolution of a debt issue.

PALEGAL 051 LEGAL RESEARCH (3) CSU
Lecture: 3 hours

Corequisite: Paralegal 10; Advisory: English 101.

Student will learn to acquire information from traditional and electronic resources. Student will perform research in law libraries and through computer-based catalogs. Student will be taught to access and utilize primary, secondary, and CALPR research resources to resolve legal problems. Resources will include federal and state statutes, federal and state cases, federal and state regulations, digests, law reviews, treatises, citators, and other practice works.

Student Learning Outcome(s):
Student will be able to conduct legal research using primary and secondary authorities.

PHILOSOPHY

PHILOS 001 INTRODUCTION TO PHILOSOPHY (3) UC/CSU
Lecture: 3 hours

This course introduces students to philosophy, covering the topics of ethics, logic and language, metaphysics, theory of knowledge, philosophy of religion, and political philosophy. Some of the questions examined include: ‘What is the good life?’ ‘What is right and wrong, and how do we know?’ ‘What is knowledge and what are its sources? Is it possible that we know nothing at all?’ ‘Does God exist?’ ‘Could we ever know?’ ‘What is the mind?’ ‘What is justice?’ ‘What is the basic nature of reality?’ An emphasis is placed on developing critical reasoning skills, and relating the topics to larger cultural issues and debates.

Student Learning Outcome(s):
The student will be able to describe the impact of philosophy on past and present society and to begin to critically examine their own ideas about truth, methods of thinking, and the nature of reality.

PHILOS 008 DEDUCTIVE LOGIC (3) UC/CSU
Lecture: 3 hours

This is an introductory course in logic. The student is introduced to the standards and techniques of correct thought with regular practice with short specimens of correct and incorrect reasoning taken from daily life. Consistency, thoroughness, and other aspects of rational thought are fostered.

Student Learning Outcome(s):
(a) identify parts of simple arguments (premises and conclusions) (b) identify basic logical fallacies in short passages (c) test categorical syllogisms for validity (d) translate simple English sentences into categorical logic.

PHYSICS

PHYSICS 001 MECHANICS OF SOLIDS (4) UC/CSU
Lecture: 3 hours / Lab: 3 hours

Prerequisite: Physics 11 or Physics 12; Corequisite: Mathematics 265;

This course covers elements of classical mechanics, including motion in three dimensions, vectors, laws of motion, circular motion, energy and energy transfer, linear momentum, rigid body rotation, angular momentum, static equilibrium and elasticity.

Student Learning Outcome(s):
To deduce the value and its uncertainty of physical observables based on empirical values. To deduce the value of the density of a liquid based on measurements of the mass and the volume of the liquid. Use the experimental uncertainties in the measurements of the mass and the volume to determine the uncertainty in the deduced value of the density of the liquid. A level of performance of 60% is expected as a minimum.
PHYSICS 002 MECHANICS OF FLUIDS, HEAT, AND SOUND (4) UC/CSU
Lecture: 3 hours / Lab: 3 hours

Prerequisite: Physics 1; Corequisite: Mathematics 266.

This course covers elements of classical mechanics, thermodynamics, fluid dynamics, mechanical waves and geometrical optics, including universal gravitation, hydrostatics, hydrodynamics, oscillations, wave motion, sound, superposition of waves, temperature, first and second laws of thermodynamics, kinetic theory, entropy, nature of light and lenses. Differential and integral calculus are often needed.

Student Learning Outcome(s):

To deduce the mass of the Moon from data taken by the NASA Explorer satellite. Using the experimental uncertainties of the satellite orbit parameters and the orbital period, one should determine the uncertainty in the deduced value of the Moon mass.

PHYSICS 003 ELECTRICITY AND MAGNETISM (4) UC/CSU
Lecture: 3 hours / Lab: 3 hours

Prerequisite: Physics 1; Mathematics 266.

This course covers the elements of electricity and magnetism, including electric and magnetic fields and circuits and their application as well as inductance. Capacitance, Gauss’s law, Ampere’s law, Faraday’s law, and resonance.

Student Learning Outcome(s):

1) Be able to demonstrate the understanding of theoretical and experimental concept of Coulomb’s law, electrical and magnetic forces, electrical circuits and Ohm’s law. 2) Be able to describe the Gauss’s law, batteries, generators, motors and electrical circuits. 3) Be able to discuss the Faraday’s law of Induction, properties of electromagnetic waves, and electromagnetic spectrum. 4) Be able to describe the Maxwell’s equations of Electromagnetism and the principles of optics.

PHYSICS 004 OPTICS AND MODERN PHYSICS (4) UC/CSU
Lecture: 3 hours / Lab: 3 hours

Prerequisite: Mathematics 267.

This course covers the fundamentals of physical optics including radiation, spectra, wave mechanics, uncertainty principle, radioactivity and nuclear physics.

Student Learning Outcome(s):

For the lecture course content: 1) Be able to describe Young’s double-slit experiment using the Michelson Interferometer, and demonstrate the understanding of diffraction of light from narrow slits and diffraction gratings. 2) Be able to discuss the nature of light as an electromagnetic wave, and how it is expressed in Maxwell’s equations. 3) Be able to discuss Einstein’s Special Theory of Relativity, especially in terms of time dilation, length contraction and relativistic energy and momentum. 4) Be able to discuss Quantum Physics, including the photoelectric and Compton effects, the dual nature of matter and Heisenberg’s Uncertainty Principle, Schrodinger’s wave equation and different particle scenarios. 5) Be able to discuss atomic spectra and Bohr’s Model of the atom, the wave function of hydrogen, the Pauli Exclusion Principle and the Periodic Table. 6) Be able to describe the molecular bonds in solids, energy states and spectra of molecules, electrical conduction in metals, insulators and semiconductors. 7) Be able to discuss the nature of atomic nuclei, different forms of radioactivity, nuclear fission and fusion, and Elementary Particle Physics. For the lab course content: 1) Be able to use a red Helium/Neon laser shining through a double slit plate and analyze the separation of the bright fringes and calculate the average wavelength of the laser. 2) Be able to use the Michelson Interferometer and demonstrate that if the path distance changes, the fringe pattern changes also, and calculate the number of fringes that travel for a given change in path difference. 3) Be able to use known spectra of Helium and calculate the spectrometer, and measure the wavelength of the incoming light and compare to the standard value. 4) Be able to use a prism spectrometer to calculate the group velocity of packets of waves based on the Quantum Mechanics theory. 5) Be able to use the Hall Effect apparatus and measure the Hall voltage of two different metal strips, and compare to their actual Hall voltage. 6) Be able to use the Frank Hertz apparatus and analyze the quantization of atomic energy levels, and measure/calculate the amount of energy absorbed by an electron in the mercury atom in the gas. 7) Be able to plot a graph of radioactivity and examine the half-life of radioactive decay.
PHYSICS 011  INTRODUCTORY PHYSICS (4) UC/CSU
Lecture: 3 hours / Lab: 3 hours
Corequisite: Mathematics 114 or Mathematics 115 or Chemical Technology 111 or Chemical Technology 113.

This is a survey course describing the major areas of physics: mechanics, heat, wave motion, electricity and magnetism, electromagnetic radiation and optics. Mathematical solutions of simple problems are covered. This course is not open to students receiving credit for Physics 12.

Student Learning Outcome(s):
Students will: 1) Convert measurements into metric and US system of units. 2) Determine accuracy and precision of a given measurement or calculation. 3) Demonstrate knowledge and to solve problems on kinematics, force, momentum, work, energy, power, rotational motion, density, pressure, heat energy, electricity, magnetism, light, sound, and optics.

PHYSICS 012  PHYSICS FUNDAMENTALS (3) UC/CSU
Lecture: 3 hours
Corequisite: Mathematics 113 or Mathematics 115 or Chemical Technology 113 and Chemical Technology 111.

This is a survey course describing the major areas of physics: mechanics, heat, wave motion, electricity and magnetism, electromagnetic radiation and optics. Mathematical solution of simple problems are covered. This course is not open to students receiving credit for Physics 11.

Student Learning Outcome(s):
The student will be able to convert measurements into metric or US units.

PHYSICS 014  PHYSICS FUNDAMENTALS LABORATORY (1) UC/CSU
Lab: 3 hours
Corequisite: Physics 12;

This course covers laboratory experiments in basic measurements, mechanical, thermal, sound, electrical and optical phenomena at an introductory level.

Student Learning Outcome(s):
The student will be able to convert measurements into metric or US units.

PHYSICS 029A  BASIC PHYSICS FOR TECHNICIANS (3)
Lecture: 3 hours
Corequisite: Mathematics 114 or Mathematics 115 or Physics 11.

This course covers basic mechanical, fluid, thermal, electrical, magnetic, and optical topics at an introductory level.

Student Learning Outcome(s):
The student will be able to analyze a problem in the area of mechanics.

PHYSICS 029B  BASIC PHYSICS FOR TECHNICIANS (1)
Lab: 3 hours
Corequisite: Mathematics 114 or Mathematics 115 or Physics 11.

This course covers basic mechanical, fluid, thermal, electrical, magnetic, and optical topics at an introductory level.

Student Learning Outcome(s):
The student will be able to analyze a problem in the area of mechanics.

PHYSIOLOGY

PHYSIOL 001  INTRODUCTION TO HUMAN PHYSIOLOGY (4) UC/CSU
Lecture: 3 hours / Lab: 3 hours
Prerequisite: ANATOMY 001 and CHEM 051 or CHEM 065 or CHEM 101

A detailed study of the function of major systems of the human body. Laboratory experiments will be based on physiological processes covered in lecture.

Student Learning Outcome(s):
The student will demonstrate technical skills to study physiology including use of computer simulations and ECG recording devices. The student will apply scientific method to lab experiments. The student will describe physiological processes and control mechanisms of the human body. The student will explain health applications and pathologies for each body system.

PLUMBING

PLUMBNG 026  PLUMBING LAYOUT AND ESTIMATING I (3)
Lecture: 3 hours

This course covers fundamentals of blueprint reading for residential plumbing with an introduction to piping layout and design and basic estimating procedures. An overview of piping and fitting nomenclature, measurements and related calculations, as well as techniques in sketching, along with orthographic, and isometric drawing creation are included.

Student Learning Outcome(s):
The student will be able to read a basic blueprint for plumbing symbols and requirements. The student will take information from a set of plumbing plans.
PLUMBNG 027  PLUMBING LAYOUT AND ESTIMATING II (3)
Lecture: 3 hours

This course is a study of blueprints and specifications as related to plumbing layout and estimating. Knowledge and experience of students, including the application of codes and standards, are utilized in the creation of estimates. Principles of estimating, including materials, labor, overhead, and profit are reviewed. Layout procedures for one-and two-story residential, commercial and industrial units are examined as well as estimating procedures for each of these units. Pricing methods and bidding practices are included.

Student Learning Outcome(s):

PLUMBNG 028  PLUMBING CODE I (3)
Lecture: 3 hours

Introduction is given in plumbing codes and ordinances that affect rough-in work, in city and county areas. Installation of wastes, vents, clean-outs, traps, gas fittings, gas vents and water pipe requirements are reviewed.

Student Learning Outcome(s):

SLO 1: Student will apply plumbing trade calculations and measurements. 2: Student will calculate fixture unit values for DWV. 3: Student will design a basic residential drainage system.

PLUMBNG 029  PLUMBING CODE II (3)
Lecture: 3 hours

Instruction is given in the uniform plumbing code that involves the current regulations of water and gas systems, fixture installation, water heaters, joints and connections, introduction to appendix ‘A’ and reference standards.

Student Learning Outcome(s):

Student will calculate building available pressure, fixture load values by the application of plumbing trade mathematical techniques.

PLUMBNG 031  BACKFLOW PREVENTION DEVICES (3)
Lecture: 1.5 hours / Lab: 4.5 hours

This course is designed to prepare student for Backflow Prevention Assembly Tester Certification. Instruction is given in fundamentals of cross-connection control including State, County, County Health Department, and Municipal codes. Water Purveyor rules and regulations are also reviewed in this course. Emphasis is given to laboratory work in installing, operating, testing, troubleshooting, and maintaining Pressure, Spill Resistant Pressure, and Two Check Type Pressure, Vacuum Breakers as well as Double Check Valve, Double Check Valve-Detector, Reduced Pressure Principle, and Reduced Pressure Principle-Detector Backflow prevention Assemblies.

Student Learning Outcome(s):

The trainee will use hand tools to perform plumbing operations by using the differential pressure test gauge and the test tubes to fully test a Pressure Differential test gauge procedure. Skill #1 The trainee will: test air inlet using test tube procedure Skill #2 The trainee will: test checking member using test tube procedure. Skill #3 The trainee will: test air inlet using differential test gauge procedure. Skill #4 The trainee will: test checking member using differential test gauge procedure.

PLUMBNG 033  PLUMBING CODE III (3)
Lecture: 3 hours

This course presents in-depth coverage of plumbing standards, including acceptable installation practices and acceptable materials. All standards are based on the current IAPMO uniform plumbing code.

Student Learning Outcome(s):

It is expected that student will be able to: calculate load values for fuel gas systems design a fuel gas system identify basic materials and agencies convert heat calculations of buts.

PLUMBNG 111  INTRODUCTION TO PLUMBING (3)
Lecture: 1 hour / Lab: 6 hours

This course surveys the history of the Plumbing Industry; Highlights occupational information, Evokes job ethics and instructs on career information; The course also covers occupational health and safety hazards, provides an overview of Plumbing systems, and introduces the tools of the trade.

Student Learning Outcome(s):

Student will use common power tools to perform basic plumbing operations by drilling holes through wood framing members using the Milwaukee Hole Hawg. Skill #1 The student will Measure and mark stud bay and calculate to locate center of drilled hole in stud bay. Drill hole in center of bay and plumb using Hole Hawg and self-feeding-bit safely without binding drill bit. Mark second hole in simulated fireblock plumb and centered under first hole in top plat Drill second hole centered and plumb through top plate using auger bit safely without binding bit.

PLUMBNG 112  FUNDAMENTALS OF PLUMBING (3)
Lecture: 3 hours

This course studies fundamentals of plumbing calculations and elementary drawings for beginners. Topics include pipe sizes and calculations, flow in pipe, friction design application, Instruction is given in the principles and design of water supply, fuel gas distribution, and D.W.V. (Drain,Waste and Vent).

Student Learning Outcome(s):

1. The student will be able to calculate grade and fall of drainage and building drain to sewer.
PLUMBING 113  BASIC PLUMBING PRINCIPLES AND PRACTICES (6)
Lecture: 3.5 hours / Lab: 7.5 hours

This course introduces fundamentals of plumbing principals and practices. Topics include installation, repair, and nomenclature of pipes, fittings, and fixtures. Instruction is given on elementary drawings, plan reading, general specifications, and trade calculations as related to construction documents.

Student Learning Outcome(s):

The student will be able to scale drawings using an architects scale or a rule. The student will take measurements off a scaled floor plan using the architects scale. The student will use an architect scale and a floor plan to: Measure how far apart, center to center, the stub outs are for the water closets in the Girls Restroom. Measure and calculate number of feet of 2 type L copper tubing required for job plus/minus 20ft. Measure how far apart, center to center, the urinals are in the Boys Restroom. Measure distance from exterior of South Wall West side of building to center line of Plumbing Wall behind water closets on South Side of Girls Restroom.

PLUMBING 121  WORKING DRAWINGS AND LAYOUT I (3)
Lecture: 3 hours

This course offers instruction in basic blueprints, estimating and drafting related to the plumbing industry; proper methods and procedures of plan interpretation and application. This course also offers exposure to the plumbing code, manufacturer’s data sheets, and plumbing specifications.

Student Learning Outcome(s):

Student will utilize basic drawing tools to create and design a basic isometric plumbing systems according to the current UPC. Student will identify and list load values and pipe sizes according to the current UPC.

PLUMBING 122  PLUMBING MATHEMATICS AND PROCEDURES II (3)
Lecture: 3 hours

This course offers instructions in measuring, material purchases and return procedures, capacity loading, pressure calculations and gas conversions related to the plumbing industry, with emphasis on formulas and calculations peculiar to the industry.

Student Learning Outcome(s):

Student will apply plumbing trade calculations and measurements to calculate fixture load values, pipe sizes, and grade and fall.

PLUMBING 123  PLUMBING PRACTICES AND INSTALLATION (6)
Lecture: 1.5 hours / Lab: 13.5 hours

This course offers the study and practice of the proper methods and procedures used in installing plumbing fixtures and accessories. Installing, fabricating and testing fixtures applicable to residential and commercial plumbing are covered.

Student Learning Outcome(s):

The student will list various plumbing system components: gas, water, and DWV. The student will identify and calculate fixture unit values and capacities for fixtures and pipes. The student will apply current and legal installation methods, procedures, and practices as adopted by the UPC.

PLUMBING 131  WORKING DRAWING II (3)
Lecture: 3 hours

This course is a study of blueprints, plans, and drawings as related to the plumbing trade. Skills, including the interpretation of applicable code and standards. Basic principles of estimating, including materials and their quantities are reviewed.

Student Learning Outcome(s):

Students will be able to demonstrate knowledge of and proficiency in the study blueprints, plans and drawings including the interpretation of applicable plumbing codes and standards. The student will locate and properly mark the centerline of water closet. The student will locate and properly mark the centerline of the closet flange. The student will locate and properly mark the height and distance for the center of the water closet for the water supply stub out.

PLUMBING 132  PLUMBING CALCULATIONS AND PROCEDURES II (3)
Lecture: 1 hour / Lab: 6 hours

Instruction is given in layout procedures involving applied calculations concerning the plumbing trades. Instruction is also given in layout and design criteria with hands on laboratory procedures.

Student Learning Outcome(s):

Students will apply trade calculations related to sizing roof drainage systems, roof drains, conduits, and horizontal pipe usage.

PLUMBING 133  INSTALLATION AND PLUMBING FIXTURES (6)
Lecture: 3.5 hours / Lab: 7.5 hours

This course covers fabrication, erection of piping, layout methods, process piping, blueprint installations and testing of plumbing fixtures and appliances.

Student Learning Outcome(s):

Using technical documents and manuals student will calculate developed lengths on branch lines, pipe sizes, and fittings for a gas system.

PLUMBING 141  ADVANCE LAYOUT AND PROCEDURES (3)
Lecture: 3 hours

This course covers proper methods of layout and installation procedures, fabrication, and erection of piping in commercial buildings in compliance with local and national codes.

Student Learning Outcome(s):

Students will apply information in plumbing manuals to determine adequate size DWV piping utilizing correct correct table.
PLUMBING 142  SERVICING OF PLUMBING FIXTURES AND APPLIANCES (3)
Lecture: 1.5 hours / Lab: 4.5 hours
This course covers proper methods of repairing plumbing fixtures and appliances, preparing for the repair job, and estimating the job.

Student Learning Outcome(s):
Finding Information in manufacturers manuals to repair basic parts of a water closet. Student will correctly identify different parts in a water closet. Student will correctly find replacement parts in manufacturer manual. Student will correctly find and total price of replacement parts.

PLUMBING 143  PLUMBING CODE I (3)
Lecture: 1.5 hours / Lab: 4.5 hours
This course covers building codes as they relate to plumbing, with emphasis on the effective use of applicable codes and hands-on laboratory projects.

Student Learning Outcome(s):
Students will be able to use Technical Plumbing Manual to calculate support systems for piping systems. Students will be able to correctly calculate support of ABS DWV piping systems. Students will be able to correctly calculate support for copper potable water piping. Students will be able to correctly calculate support for PEX potable water piping.

PLUMBING 144  SPECIAL PURPOSES INSTALLATION (3)
Lecture: 1.5 hours / Lab: 4.5 hours
This course covers fabrication and erection of piping for the proper installation of special appliances and fixtures and special methods used in the construction of these fixtures, as well as testing procedures.

Student Learning Outcome(s):
Students will be able to demonstrate knowledge and proficiency in finding and applying information from technical plumbing manuals. The student will be able to identify wet vented sections. The student will be able to determine correct fixture unit values. The student will be able to determine proper pipe size.

PLUMBING 185  DIRECTED STUDY-PLUMBING (1)
Lecture: 1 hour
This course allows students to pursue a directed study in plumbing technology on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in plumbing technology.

PLUMBING 185L  DIRECTED STUDY, PLUMBING TECHNOLOGY (LAB) (1)
Lab: 3 hours
This course allows students to pursue a directed study in plumbing technology on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
The outcome will vary depending on the contract with the instructor. The student will design and construct a lab project based on a topic in plumbing technology.

PLUMBING 246  PRINCIPLES AND PRACTICES OF PLUMBING DESIGN (4)
Lecture: 2.5 hours / Lab: 4.5 hours
Students are trained on skills such as measuring with an architect's scale, construction drawings that include piping layout, fixture layout, disability requirements, orthographic drawings and basic isometric drawings.

Student Learning Outcome(s):
Apply basic plumbing calculations. Utilize basic drawing tools. Name basic plumbing tools.

PLUMBING 285  DIRECTED STUDY - PLUMBING (2)
Lecture: 2 hours
This course allows students to pursue a directed study in Plumbing technology on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in plumbing technology.

PLUMBING 285L  DIRECTED STUDY, PLUMBING TECHNOLOGY (LAB) (2)
Lab: 6 hours
This course allows students to pursue a directed study in plumbing technology on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
The outcome will vary depending on the contract with the instructor. The student will design and construct a lab project based on a topic in plumbing technology.

PLUMBING 385  DIRECTED STUDY - PLUMBING (3)
Lecture: 3 hours
This course allows students to pursue a directed study in plumbing technology on a contract basis under the direction of a supervising instructor.
Student Learning Outcome(s):
The outcome will vary depending on the contract with the instructor.
The student will formulate a research paper based on a topic in plumbing technology.

PLUMBING 385L DIRECTED STUDY, PLUMBING TECHNOLOGY (LAB) (3)
Lab: 9 hours
This course allows students to pursue a directed study in plumbing technology on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
The outcome will vary depending on the contract with the instructor.
The student will design and construct a lab project based on a topic in plumbing technology.

PLUMBING 941 COOPERATIVE EDUCATION - PLUMBING (4) RPT 3
Lecture: 4 hours
Cooperative Education is a work experience program involving the employer, the student-employee, and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

POLITICAL SCIENCE

POL SCI 001 THE GOVERNMENT OF THE UNITED STATES (3) UC/CSU
Lecture: 3 hours
Advisory: English 28;
Political Science 1 is an introductory course in the principles, institutions and policy processes of the American Political System and an examination of major tenets in Federalism, Representative Government and the scope of the Executive, Legislative and Judicial powers. It offers an overview of local, state and national governance.

POL SCI 002 MODERN WORLD GOVERNMENTS (3) UC/CSU
Lecture: 3 hours
Advisory: English 28.
This course will explore a selected variety of major nation-states to develop a comparative overview of political philosophies, constitutions, political processes, systems and institutions. Emphasis is placed on geographic, cultural, historic, economic, and demographic factors that contribute to differences in the development and establishment of nation-states.

Student Learning Outcome(s):
To increase knowledge of diverse political systems around the world, including empirical area-based knowledge; broader theoretical understanding of different political systems, institutions and processes; and the changing domestic and global contexts within which they operate.

POL SCI 007 CONTEMPORARY WORLD AFFAIRS (3) UC/CSU
Lecture: 3 hours
Advisory: English 28.
This course will focus on the relationships of nations in modern times emphasizing the nation-state system, diplomacy, international law, and international organizations. Students will explore the causes, consequences, and methods of resolving international conflicts, and the impact of internal economic, political, and military factors on foreign policy.

Student Learning Outcome(s):
Students will demonstrate an ability to analyze relations between nations, international government and non-governmental organizations, and global actors, organize ideas and synthesize the critical overall objectives of the assignment or presentation.
POWERLINE MECHANIC TRAINEE

ELECL 601 POWER LINE MECHANIC - TRAINEE (600 HOURS) (15)
Lecture: 6 hours / Lab: 27 hours

Prerequisite: Electrical Construction and Maintenance 119 or Electrical Construction and Maintenance 173 or Electrical Construction and Maintenance 1 and Building Construction Techniques 4 or Electrical Construction and Maintenance 116;

The goal of this course is to produce qualified candidates for various Power Line Mechanic training programs. Development of basic pre-apprentice skills needed to be successful will be emphasized. These skills include: overall safety considerations, power pole and tower climbing skills, knowledge of the basic tools and materials involved with the electrical line crafts, general construction standards, basic rigging principles, and basic electrical theory that is specific to this trade. A power pole-climbing certificate of competencies is granted to students who successfully complete this course. This course meets or exceeds the equivalent industry recognized 600 hour programs. Special Note: Students during the course of instruction will be required to lift up to 60 lbs with repetition and will be required to climb and perform installation and maintenance operations at the top of 30 foot power poles. Physical or psychological impairments that might limit your abilities to succeed should be considered.

Student Learning Outcome(s):
SLO: Students will complete pole climbing certificate including successful completion of three climbs: Climb 1 - Free climb, circle, adjust belt. Climb 2 - Combination free climb and belted climb over obstructions. Climb 3 - 55 foot pole climb with maximum reach left and right.

ELECL 601A POWER LINE MECHANIC - TRAINEE (600 HOURS) PART A (6)
Lecture: 6 hours

Prerequisite: Electrical Construction and Maintenance 1 Electrical Construction and Maintenance 173 or Electrical Construction and Maintenance 119;

The goal of this course is to produce qualified candidates for various Power Line Mechanic training programs. Development of basic pre-apprentice skills needed to be successful will be emphasized. These skills include: overall safety considerations, power pole and tower climbing skills, knowledge of the basic tools and materials involved with the electrical line crafts, general construction standards, basic rigging principles, and basic electrical theory that is specific to this trade. A power pole-climbing certificate of competencies is granted to students who successfully complete this course. This course meets or exceeds the equivalent industry recognized 600 hour programs. Special Note: Students during the course of instruction will be required to lift up to 60 lbs with repetition and will be required to climb and perform installation and maintenance operations at the top of 30 foot power poles. Physical or psychological impairments that might limit your abilities to succeed should be considered.

Student Learning Outcome(s):

ELECL 601B POWER LINE MECHANIC - TRAINEE (600 HOURS) PART B (3)
Lab: 9 hours

Prerequisite: Electrical Construction and Maintenance 116 or Building Construction Techniques 4;

The goal of this course is to produce qualified candidates for various Power Line Mechanic training programs. Development of basic pre-apprentice skills needed to be successful will be emphasized. These skills include: overall safety considerations, power pole and tower climbing skills, knowledge of the basic tools and materials involved with the electrical line crafts, general construction standards, basic rigging principles, and basic electrical theory that is specific to this trade. A power pole-climbing certificate of competencies is granted to students who successfully complete this course. This course meets or exceeds the equivalent industry recognized 600 hour programs. Special Note: Students during the course of instruction will be required to lift up to 60 lbs with repetition and will be required to climb and perform installation and maintenance operations at the top of 30 foot power poles. Physical or psychological impairments that might limit your abilities to succeed should be considered. Part B is the first of 3 laboratory modules of the standard 601 class, allows for offering the program over an extended period.

Student Learning Outcome(s):
SLO: Students will complete first 1/3 of pole climbing certificate including successful completion of one climb: Climb 1 Free climb, circle, adjust belt.

ELECL 601C POWER LINE MECHANIC - TRAINEE (600 HOURS) PART C (3)
Lab: 9 hours

Prerequisite: Electrical Construction and Maintenance 116 or Building Construction Techniques 4;

The goal of this course is to produce qualified candidates for various Power Line Mechanic training programs. Development of basic pre-apprentice skills needed to be successful will be emphasized. These skills include: overall safety considerations, power pole and tower climbing skills, knowledge of the basic tools and materials involved with the electrical line crafts, general construction standards, basic rigging principles, and basic electrical theory that is specific to this trade. A power pole-climbing certificate of competencies is granted to students who successfully complete this course. This course meets or exceeds the equivalent industry recognized 600 hour programs. Special Note: Students during the course of instruction will be required to lift up to 60 lbs with repetition and will be required to climb and perform installation and maintenance operations at the top of 30 foot power poles. Physical or psychological impairments that might limit your abilities to succeed should be considered. Part C is the second of 3 laboratory modules of the standard 601 class, allows for offering the program over an extended period.

Student Learning Outcome(s):
SLO: Students will complete second 1/3 of pole climbing certificate including successful completion of one climb: Climb 1 Combination free climb and belted climb over obstructions.
GRADUATION REQUIREMENTS AND EDUCATIONAL PROGRAMS

**ELECL 601D**  
**POWER LINE MECHANIC - TRAINEE (600 HOURS) PART D (3)**  
Lab: 9 hours  
Prerequisite: Electrical Construction and Maintenance 116 or Building Construction Techniques 4;  

The goal of this course is to produce qualified candidates for various Power Line Mechanic training programs. Development of basic pre-apprentice skills needed to be successful will be emphasized. These skills include: overall safety considerations, power pole and tower climbing skills, knowledge of the basic tools and materials involved with the electrical line crafts, general construction standards, basic rigging principles, and basic electrical theory that is specific to this trade. A power pole-climbing certificate of competencies is granted to students who successfully complete this course. This course meets or exceeds the equivalent industry recognized 600 hour programs. Special Note: Students during the course of instruction will be required to lift up to 60 lbs with repetition and will be required to climb and perform installation and maintenance operations at the top of 30 foot power poles. Physical or psychological impairments that might limit your abilities to succeed should be considered. Part D is the third of 3 laboratory modules of the standard 601 class, allows for offering the program over an extended period.  

Student Learning Outcome(s):  
SLO: Students will complete third 1/3 of pole climbing certificate including successful completion of one climb: Climb 1 55 foot pole climb with maximum reach left and right.

---

**PRPLTEK 102**  
**PROCESS MEASUREMENT AND CONTROL FUNDAMENTALS (3) CSU**  
Lecture: 3 hours  

The purpose of this course is to provide an introduction to the fundamentals of process variables and a variety of instruments used to sense, measure, transmit, and control process plant operations within chemical manufacturing, oil refineries and wastewater treatment industries.  

Student Learning Outcome(s):  
Define terms associated with industrial instrumentation Describe the major process variables controlled in the Process Industry Explain the relationship between common process variables Describe the components of control loops Explain the function of control loop diagrams Define and describe the symbols used in Process and Instrumentation Diagrams and Process Flow diagrams.

---

**PRPLTEK 103**  
**PROCESS PLANT EQUIPMENT (3) CSU**  
Lecture: 2 hours / Lab: 3 hours  

This course introduces the student to the generic equipment used in the process plant industry. Students will learn the fundamental principles of operation, construction, and application of piping, pipe fitting, steam traps, valves, pumps compressors, steam turbines, electric motors, furnaces, heat exchangers, cooling towers, storage tanks, distillation towers reactors and process instrumentation.  

Student Learning Outcome(s):  
Define terms associated with process equipment Explain the function of process equipment Describe the internal components of the equipment Explain the operating principles of the equipment Explain the operators role in safe operation of equipment Explain the operators role in troubleshooting equipment malfunction. Describe the general maintenance procedures that operators are expected to perform.

---

**PRPLTEK 104**  
**INTRODUCTION TO PROCESS PLANT SAFETY (3)**  
Lecture: 3 hours  

This course provides an introduction to the field of environmental, safety, and health within the chemical laboratory, biotechnology, biomanufacturing, waste water treatment and chemical process industries. Students will be introduced to various types of laboratory and plant safety techniques and hazards. In addition an overview will be provided of safety and environmental systems and equipment, and state and federal regulations under which laboratory testing, plant processses, bio and chemical manufacturing are governed.  

Student Learning Outcome(s):  
1. Students will ID and describe four main types of hazards 2. Students will recognize physical and chemical hazards in the chemical, bio-manufacturing and process industries 3. Students will ID and describe GLP and cGMP regulations.
PRPLTEK 200  PETROLEUM REFINING FUNDAMENTALS (3) CSU
Lecture: 3 hours
The purpose of this course is to provide an introduction to the unique combinations of equipment and systems used to separate materials in chemical manufacturing, oil refineries, wastewater treatment, pharmaceutical industries, biomanufacturing and others. The study will include process systems such as, reactions, water treatment, distillation, absorbing/stripping, evaporation, extraction and fundamental organic chemistry principles involved in process systems.

Student Learning Outcome(s):
Define terms associated with process systems Explain the function of process systems Describe the components and equipment in process systems Explain the operating principals of the process systems Explain the operators role in safe operation of process systems Explain the operators role in troubleshooting process system malfunction. Identify the different equipment systems used to make up a distillation system. Explain how the methods of heat transfer apply to the distillation process.

PRPLTEK 202  INTRODUCTION TO PROCESS PLANT TROUBLESHOOTING (3)
Lecture: 3 hours
This course introduces students to the troubleshooting processes involved in the investigation, identification and eliminating of the type of faults which are common to process plant operations.

Student Learning Outcome(s):
- Recognize the difference between trial and error and systematic troubleshooting methodologies. - Differentiate the categories of potential causes: probable, plausible and possible. - Describe the phases and steps that constitute an effective troubleshooting methodology. - Successfully apply the phases of the troubleshooting process to a variety of operational problems. - Recognize the adverse impact that human, organization and system behavior have on effective troubleshooting.

PRPLTEK 204  PTECH INSTRUMENTATION - COMPUTER APPLICATIONS (2)
Lecture: 2 hours
This advanced course introduces students to the computerized software used to manipulate process operations in chemical industries including petrochemical, wastewater, pharmaceutical and numerous other operations.

Student Learning Outcome(s):
1) Define terms associated with industrial instrumentation 2) Describe the major process variables controlled in the process industry 3) Explain the relationship between common process variables 4) Describe the components of control loops 5) Explain the function of process control loops 6) Define and describe the symbols used in process instrumentation diagrams and process flow diagrams 7) Define terms associated with process control 8) Demonstrate the following Console Operator duties: -change controller mode -change setpoint -change valve output -access process history

PRPLTEK 206  PTEC-ADVANCED INSTRUMENTATION II (3)
Lecture: 3 hours
This course provides students with exposure to advanced process operation variables and a variety of instruments used to sense, measure, transmit, and control plant operations within the chemical manufacturing, biopharma/manufacturing, oil refinery, wastewater treatment and other chemical industries.

Student Learning Outcome(s):
Define terms associated with process control and controllers. Describe the relationship between measuring instruments and their role in control loops. Explain the purpose and operation transmitters and transducers. Describe / demonstrate how to switch between control modes. Given a process control schematic, explain how the control loop functions. Identify the components of a control valve. Describe how the components of a control valve interact. Explain fail Safe positions for various types of control scheme. Describe and explain the operation of regulators. Describe common switches and their function. Explain how relays are used in process industries. Describe methods for maintaining integrity and reliability of signal transmission. Perform scaling calculations. Identify and describe the various control schemes used in process industries. Describe/demonstrate bumble transition between control modes.

PRPLTEK 210  APPLIED INSTRUMENTATION ANALYSIS - I (4)
Lecture: 3 hours / Lab: 2 hours
This class offers students hands-on experience with the analytical instruments used in typical laboratories such as gas chromatography and chemical titrating equipment. Students will learn to apply various methods of sampling and analyzing to determine the composition of typical liquids, solids, and gases used by the chemical industry.

Student Learning Outcome(s):
Describe the types of petrochemical and refining industry drawings that contain instrumentation. Explain the importance of process knowledge in troubleshooting. Describe the differences between analog and digital control. Explain and define the terms associated with PLCs. Define terms associated with instrumentation power supply. Explain advantages of a DCS system. Define terms associate with ESD. Recall the methods used for determining if a sensing device functions properly.

PRPLTEK 214  PTECH IV-QUALITY PERFORMANCE (3)
Lecture: 3 hours
The purpose of this course is to provide a relevant introductory overview involving process and laboratory validation and quality performance regulations for product and process operations in the biotechnology, biopharmaceutical, waste water treatment, cosmetic, food and beverage, biofuels, quality control, petroleum refining and other chemical and health industries. Some topics covered will be monitoring quality and process performance, operating consistency, continuous improvement, government regulations and guidelines.

Student Learning Outcome(s):
1. Students will describe the origin of validation and its function in the pharmaceutical and biopharmaceutical processes. 2. Students will discuss the various aspects and importance of validation principles and practices including total quality control and economics involved in successful chemical and biotech/biomanufacturing industries. 3. Students will describe the development studies and validation that are carried out through pre-approved protocols. 4. Students will discuss analytical methods scientifically developed to evaluate product residual reduction and other pre-determined acceptance limits.
PSYCHOLOGY

PSYCH 001  GENERAL PSYCHOLOGY I (3) UC/CSU
Lecture: 3 hours
Prerequisite: English 028 or 100 or 101 or Placement Exam

This is an introductory course in psychology as the scientific study of behavior and mental processes. Topics treated include history and systems of psychology, biological bases of behavior, sensation and perception, states of consciousness, learning, memory, cognition, personality, human development, motivation and emotion, health and stress, psychological disorders, and therapies.

Student Learning Outcome(s):
Per the APA Guidelines: Demonstrate psychology information literacy a. Read and summarize general ideas and conclusions from psychological sources accurately b. Describe what kinds of additional information beyond personal experience are acceptable in developing behavioral explanations (i.e., popular press reports vs. scientific findings) c. Identify and navigate psychology databases and other legitimate sources of psychology information d. Articulate criteria for identifying objective sources of psychology information e. Interpret simple graphs and statistical findings.

PSYCH 002  BIOLOGICAL PSYCHOLOGY (3) UC/CSU
Lecture: 3 hours
Prerequisite: Psychology 1; Advisory: English 28.

This course introduces the scientific study of the biological bases of behavior and its fundamental role in the neurosciences. Physiological, hormonal, and neurochemical mechanisms, and brain-behavior relationships underlying the psychological phenomena of sensation, perception, regulatory processes, emotion, learning, memory, and psychological disorders will be addressed. The course also notes historical scientific contributions and current research principles for studying brain-behavior relationships and mental processes. Ethical standards for human and animal research are discussed in the context of both invasive and non-invasive experimental research.

Student Learning Outcome(s):
Per APA Guidelines: Goal 1: Knowledge Base of Biological Psychology Students will demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in Abnormal psychology.

PSYCH 014  ABNORMAL PSYCHOLOGY (3) UC/CSU
Lecture: 3 hours
Prerequisite: PSYCH 001; Advisory: ENGLISH 028

This course examines the definition, possible causes, signs and symptoms and treatment of psychological disorders. Topics such as anxiety, mood disorders, schizophrenia, substance-related disorders, and personality disorders are emphasized. Additional topics will include cognitive disorders, disorder’s of childhood and adolescence, as well as sexual dysfunctions and substance-related disorders.

Student Learning Outcome(s):
Per APA Guidelines: Knowledge Base of Psychology: Students will demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in Abnormal psychology.

PSYCH 032  PSYCHOLOGY OF WOMEN (3) UC/CSU
Lecture: 3 hours
Advisory: English 28

This course explores the biological and cultural determinants of women’s personality development. Explores cultural stereotypes, sex role development, female sexuality, and women’s health issues in terms of the implications for personal and social change.

Student Learning Outcome(s):
Students will demonstrate their knowledge of the biological and cultural determinants of women’s personality development, including cultural stereotypes, sex role development, female sexuality, and women’s health issues in terms of the implications for personal and social change.

PSYCH 041  LIFE-SPAN PSYCHOLOGY: FROM INFANCY TO OLD AGE (3) UC/CSU
Lecture: 3 hours
Prerequisite: Psychology 1; Advisory: English 28;

This course examines the interaction of physical, psychological, and social factors and their impact on human development and behavior from conception to death.

Student Learning Outcome(s):
Students will demonstrate their knowledge in the physical, cognitive, and socio-emotional domains at various points throughout the human lifespan.
PSYCH 069  PSYCHOLOGY IN FILM (3) UC/CSU

Lecture: 3 hours

Advisory: English 28

This course will survey a variety of films that portray specific human behaviors, characteristics, and disorders as discussed in General Psychology I. A lecture/discussion will accompany each film that provides a more in-depth analysis of the relevant topics than are covered in General Psychology I. Topics covered will be drawn from research methods, biological psychology, sensation & perception, states of consciousness, learning, memory, intelligence, motivation, human development, personality, emotions & stress, human sexuality & gender, social psychology, abnormal psychology, and clinical psychology.

Student Learning Outcome(s):

Students will demonstrate critical observational skills through a rubric designed to evaluate students' ability to deconstruct and analyze films for accuracy in their depictions of the associated psychological topics discussed.

PUBLIC RELATIONS

PUB REL 001  PRINCIPLES OF PUBLIC RELATIONS (3) CSU

Lecture: 3 hours

This course provides students an understanding of the broad aspects of relationships with the public as they apply to business, education, public agencies, and other organizations. It includes methods of either promoting favorable relations with various segments of the public or coping with situations involving adverse public opinion.

Student Learning Outcome(s):

Apply public relations communication theory in order to create essential public relations tools including news releases and a strategic public relations plan for a client. Formulate a publicity campaign using effective communication strategies.

PUB REL 002  PUBLIC RELATIONS TECHNIQUES (3) CSU

Lecture: 3 hours

Advisory: Public Relations 1;

This course is a comprehensive study of various public relations techniques utilized in campaigns by businesses, educational institutions, public agencies, and other organizations. Case histories are used to stimulate student initiative in problem solving. The social impact of the various communications media and their role in public relations will also be stressed. The accompanying practicum gives students the opportunity to work with an on-campus or non-profit organization to create and implement a public relations plan.

Student Learning Outcome(s):

Students will be able complete basic contracts used in residential real estate transactions. Students will learn the basics in conducting effective sales of lease transactions with clients. Students will construct a rent roll for commercial properties.

PUB REL 003  WRITING FOR PUBLIC RELATIONS (3)

Lecture: 3 hours

Advisory: Public Relations 1 and English 101.

This course will provide students with the persuasive powers of the written and spoken words that are explored and utilized in creating viable communicative messages, such as, news releases, feature stories, interviews, public service announcements, speeches, and institutional advertising.

Student Learning Outcome(s):

Students will be able to demonstrate excellent oral and written communication skills using print, broadcast, digital and social media.

REAL ESTATE

REAL ES 001  REAL ESTATE PRINCIPLES (3) CSU

Lecture: 3 hours

This course covers the nature of real property, types of estates and tenancy, real estate and contract law, types of agency, title and title insurance, trust deeds/mortgages, liens/encumbrances, taxes, zoning, community property, financing and real estate math concepts. This course is one of three required courses as preparation for the examination given by the State of California for real estate brokers and salespersons.

Student Learning Outcome(s):

Students will describe and analyze the real estate industry with regards to residential sales in California. Students will understand the nature of encumbrances, liens, easements and encroachments.

REAL ES 003  REAL ESTATE PRACTICES (3) CSU

Lecture: 3 hours

This course covers office procedures and practices in listings, advertising, prospecting, financing, exchanges, property management, salesmanship, land utilization and public relations. This course also provides students necessary information and materials a real estate agent utilizes in the day-to-day operations of a real estate business.

Student Learning Outcome(s):

Students will be able complete basic contracts used in residential real estate transactions. Students will learn the basics in conducting effective sales of lease transactions with clients. Students will construct a rent roll for commercial properties.
REAL ES 005 LEGAL ASPECTS OF REAL ESTATE I (3) CSU
Lecture: 3 hours
This course covers the principles of property ownership and management with special emphasis on the law as it applies to community property, conveyances, deeds, trust deeds, leases, brokerage activities, liens, homesteads, wills, estates and taxes. Attention is also given to logical reasoning and the application of rules of law to everyday affairs in business.

Student Learning Outcome(s):
Students will understand the options for vesting and holding title in a real estate transaction. Students will understand the elements of contract formation. Students will be able to differentiate between single and dual agency.

REAL ES 007 REAL ESTATE FINANCE I (3) CSU
Lecture: 3 hours
This course provides and explains the real estate lending process in detail—from the initial loan application to the closing of the transaction. It provides a practical, step-by-step guide to the most popular real estate financing programs available in the country today. Subjects include: the loan application process, loan underwriting standards, conventional, FHA, and VA loans, seller financing, fair lending practices, and predatory lending.

Student Learning Outcome(s):
Student will identify different types of mortgages available in the market and explain their characteristics. Student will understand how to calculate fixed-rate mortgages (FRM) and adjustable-rate mortgages (ARM) as monthly payments. Student will identify the major players in the United States secondary mortgage market and explain how the market is functioning.

REAL ES 009 REAL ESTATE APPRAISAL I (3) CSU
Lecture: 3 hours
The principles and methods for the estimation of value and price of land and improvements, factors affecting income and values of real estate, and trends in real property values are covered in this course. The role of the appraiser in determining the highest and best use for a particular site is presented. The importance of appraisal to the lender, insurer, seller, and potential buyer are discussed as are appraisal of partial real estate interests.

Student Learning Outcome(s):
1. Student will be able to identify various methods of appraising real property. 2. The student will be able to prepare the Sales Comparison Appraisal Report (page) of the Freddie Mac Standardized Appraisal Form for a single family home. 3. The student will recognize, evaluate, and explain the appraisal process as to the appropriate classical approach for the different types of property.

REAL ES 014 PROPERTY MANAGEMENT (3) CSU
Lecture: 3 hours
This course will give students an in-depth view of practical issues facing practitioners, such as maintenance, accounting, administrative, and legal activities, and has up-to-date content on federal regulations, such as civil rights, fair housing, ADA issues, and environmental concerns.

Student Learning Outcome(s):
Students completing this course will understand the legal relationship between a landlord and a tenant. Students completing this course will know what a trust fund is and the importance of maintaining records on trust fund receipts.

REAL ES 016 REAL ESTATE APPRAISAL II (3) CSU
Lecture: 3 hours
This course expands on the principles and methods of appraisal and provides the student with a deeper understanding of the role of the appraiser in determining the highest and best use for a particular site. The importance of appraisal to the lender, insurer, seller, and potential buyer are discussed as are appraisal of partial real estate interests.

Student Learning Outcome(s):
1. Student will be able to identify various methods of appraising real property. 2. The student will be able to prepare the Sales Comparison Appraisal Report (page) of the Freddie Mac Standardized Appraisal Form for a single family home. 3. The student will recognize, evaluate, and explain the appraisal process as to the appropriate classical approach for the different types of property.

REFRIGERATION & AIR CONDITIONING MECHANICS

REF A/C 100 AIR CONDITIONING PROJECT MANAGEMENT (3)
Lecture: 3 hours
This course provides HVAC Industry Project Manager instruction. Topics covered will include blueprint reading, Microsoft spreadsheets, Microsoft Word documents, Microsoft Project, design build criteria, estimating, change orders, request for information, GANTT Charts, scheduling, schedule of values, purchase orders, submittals, transmittals, reading of air balance reports, warranty letters and close out packages.

Student Learning Outcome(s):
The student will be able to correctly identify different mechanical symbols that would appear on a blue print. The student will be able to give a 5 minute oral presentation on a subject related to project management. The student will be able to identify the tools used by a project manager.

REF A/C 101 AIR CONDITIONING AND REFRIGERATION PRINCIPLES AND PRACTICES-FIRST SEMESTER (9)
Lecture: 3 hours / Lab: 18 hours
This course covers Refrigeration and Air Conditioning Theory, Fundamentals, and practices for entry level students. Topics discussed include refrigeration and air conditioning system components, maintenance procedures, service procedures, and Thermodynamics.

Student Learning Outcome(s):
1. Students properly identify the 4 major components of a refrigeration system. 2. Students will use technical manuals to select appropriate compression system components. 3. Students will identify the operating characteristics of the (5) major compressor types. 4. Students will identify appropriate maintenance procedures for air and water cooled condensers.
REF A/C 105  SOLAR WATER & POOL HEATING SYSTEM PRINCIPLES (3)

Lecture: 3 hours

This is an introductory lecture course on Solar Thermal. The need for renewable energies, along with planning and installing solar thermal systems will be covered. The solar heating of swimming pools, domestic hot water, and building air will be emphasized.

Student Learning Outcome(s):

The student will be able to: List the reasons for Solar and Green Technologies List the Components of a Solar Thermal System Recite the sequence of operation of a solar thermal system.

REF A/C 110  SOLAR WATER & POOL HEATING SYSTEM PRACTICES (2)

Lab: 6 hours

This course is designed for students interested in a career in the solar thermal industry. The fundamental practices and functions of the solar thermal industry will be introduced. This course covers the skills and practices for planning, installation, and maintenance of all the necessary components for a solar thermal water system.

Student Learning Outcome(s):

1. Discuss the history of solar thermal as a renewable energy and its development. 2. List the regions of the globe where solar thermal as a renewable option is most or least viable. 3. List the components needed for various solar thermal renewable energy sources and systems.

REF A/C 123  PIPE AND TUBE JOINING PROCESSES (1)

Lab: 3 hours

This course assesses assembly of components into operating systems using techniques employed by the industry.

Student Learning Outcome(s):

After students construct a copper form, called a “monster”, using the various tube joining methods, the monster will be pressure tested and vacuum tested.

REF A/C 124  REFRIGERATION ELECTRICAL CIRCUITS AND CONTROLS (5)

Lab: 15 hours

This course covers the application of electrical principles and practices, including safety and PPE, utilized in the performance of the duties required of a HVACR Technician.

Student Learning Outcome(s):

The Student Learning Outcome consists of reading an electrical schematic that simulates the TV show “Jeopardy” and constructing a project board that functions properly.

REF A/C 125  REFRIGERATION SYSTEM COMPONENTS (3)

Lecture: 3 hours

Instruction is given in basic electricity and electrical components as they relate to the HVAC&R industry. The use of electrical schematic diagrams is stressed throughout the semester.

Student Learning Outcome(s):

1. List the types of copper tubing and appropriate applications, along with connection and leak detection techniques. 2. List refrigeration and A/C electrical systems, furnace ignition systems, and other related controls. 3. List the types of electric motors used in the HVAC&R industry and their applications.

REF A/C 133  REFRIGERATION SERVICE PROCEDURES I (3)

Lab: 9 hours

Prerequisite: Refrigeration and A/C Mechanics 123; and Refrigeration and A/C Mechanics 124; and Refrigeration and A/C Mechanics 125; Corequisite: Refrigeration and Air Conditioning Mechanics 134; and Refrigeration and Air Conditioning Mechanics 135;

This course involves servicing procedures applied to commercial and domestic refrigeration systems including restaurants, supermarkets and industrial process cooling. Students are required to inspect and analyze coolers, freezers and ice makers.

Student Learning Outcome(s):

133 Student Learning Outcomes The student will be able to use test equipment in order to diagnose a refrigeration and air conditioning system. The student will use refrigerant gages and thermometers to calculate superheat subcooling, and air temperature readings, and interpret their meaning. The student will use volt, ohm, and amperage readings to check the function of individual refrigeration system components.

REF A/C 134  SERVICE FOR COMMERCIAL REFRIGERATION (3)

Lab: 9 hours

Prerequisite: Refrigeration and A/C Mechanics 123; Refrigeration and A/C Mechanics 124; Refrigeration and A/C Mechanics 125; Corequisite: Refrigeration and Air Conditioning Mechanics 133; and Refrigeration and Air Conditioning Mechanics 135;

This course focuses on troubleshooting procedures in diagnosing and repairing malfunctions in domestic and commercial refrigeration systems. The lab work emphasizes the analyzing and repairing of mechanical and electrical components, with the proper use of tools and test equipment.

Student Learning Outcome(s):

The student will gain mastery of Refrigeration and Air Conditioning Tools. The student will use a torch safely. The student will take amperage, voltage, and ohm readings. The student will evacuate a system with a vacuum pump. The student will utilize a gage manifold safely.
REF A/C 135  AIR CONDITIONING AND REFRIGERATION
(3)
Lecture: 3 hours
Prerequisite: Refrigeration and A/C Mechanics 123; Refrigeration and A/C Mechanics 124; Refrigeration and A/C Mechanics 125; Corequisite: Refrigeration and Air Conditioning Mechanics 133; and Refrigeration and Air Conditioning Mechanics 134;

This course focuses on refrigeration principles including theory of heat, automatic controls, electric motors, and commercial refrigeration. This course gives an in depth look at the refrigeration cycle and refrigeration components. This course discusses thermodynamics, including the pressure temperature chart, latent heat, and system efficiency.

Student Learning Outcome(s):
The student will evaluate various air conditioning and refrigeration symptoms. The student will evaluate how different heat load conditions affect a refrigeration system. The student will utilize superheat and subcooling readings to determine system performance.

REF A/C 141  APPLIED REFRIGERATION AND AIR CONDITIONING PRINCIPLES (3)
Lecture: 3 hours
This course focuses on Chemistry as applied to the HVAC and R industry. Areas covered include Hydronics, heating and cooling load calculations, control wiring, introduction to the Uniform Mechanical Code, pneumatic controls, troubleshooting approaches, and employment.

Student Learning Outcome(s):
Students will calibrate a direct acting thermostat.

REF A/C 143  REFRIGERATION SERVICING PROCEDURES II (3)
Lab: 9 hours
Prerequisite: Refrigeration and A/C Mechanics 133; Refrigeration and A/C Mechanics 134; Refrigeration and A/C Mechanics 135; Corequisite: Refrigeration and Air Conditioning Mechanics 141; and Refrigeration and Air Conditioning Mechanics 145;

Troubleshooting procedures in diagnosing and repairing malfunctions in refrigeration systems are studied in this course with emphasis on mechanical problems.

Student Learning Outcome(s):
Students will install a time clock.

REF A/C 145  AIR CONDITIONING AND REFRIGERATION MECHANICS (3)
Lab: 9 hours
Prerequisite: Refrigeration and A/C Mechanics 133; Refrigeration and A/C Mechanics 134; and Refrigeration and A/C Mechanics 135; Corequisite: Refrigeration and Air Conditioning Mechanics 141; and Refrigeration and Air Conditioning Mechanics 143;

This is a study on diagnosis and repair of refrigeration, air conditioning, and gas heating systems with emphasis on the correct application of electrical theory.

Student Learning Outcome(s):
Students will replace a three phase hermetic compressor.

REF A/C 159  PRINCIPLES AND PRACTICES OF ELECTRICAL CIRCUITS AND CONTROLS (4)
Lecture: 2.5 hours / Lab: 4.5 hours
This course covers basic electricity, magnetic starters, contactors, and relays. Pressure and temperature controls, millivolt and low voltage systems, modulating controls, time clocks, and defrost systems are studied.

Student Learning Outcome(s):
SLO #1 Gather information on the various components of a HVACR control system using; but not limited to volt, ohm, and amperage reading to check the function of an individual refrigeration system. Relates to REF A/C Program PLO #1: Properly selecting and safely using tools and #2 locating and reading for information. Relates to CDM Department PLO’s: #1. Locating Information and Reading for information. #2. Working safely with tools. Relates To College Core SLOs: A: Critical Thinking D: Communications.

REF A/C 160  REFRIGERATION SYSTEM PRINCIPLES AND PRACTICES (4)
Lecture: 2.5 hours / Lab: 4.5 hours
Students learn the fundamental refrigeration system principles, including system components refrigerants, basic electricity, motors, controls, and test equipment in domestic and commercial systems. Students get an introduction to air conditioning with an emphasis on the refrigeration cycle, and appropriate temperatures.

Student Learning Outcome(s):
The student will be able to identify and describe the function of the compressor, condenser, metering device, and evaporator. The student will be able to identify the suction line, discharge line.
REF A/C 161 AIR CONDITIONING SYSTEM PRINCIPLES AND PRACTICES (4)
Lecture: 2.5 hours / Lab: 4.5 hours
This is a study of human comfort, psychometrics and heat loads. Air distribution and duct sizing, air conditioning equipment, test instruments and measurements and servicing are explored.

Student Learning Outcome(s):
Students will troubleshoot and replace a defective contactor.

REF A/C 162 PIPING PRINCIPLES AND PRACTICES (4)
Lecture: 2.5 hours / Lab: 4.5 hours
Instruction is given on refrigerant tubing and fittings, water piping and fittings, pipe sizing, soft soldering, silver brazing and schematic drawings.

Student Learning Outcome(s):
After students construct a copper form, called a “monster”, using the various tube joining methods, the monster will be pressure tested and vacuum tested.

REF A/C 164 GAS HEATING SYSTEMS (4) CSU
Lecture: 2.5 hours / Lab: 4.5 hours
This course will provide the necessary skills needed for proper installation, servicing and troubleshooting of natural gas furnaces. Topics include principles of gas combustion, gas ignition, controls, installation, and ventilation.

Student Learning Outcome(s):
Students will replace a defective gas valve.

REF A/C 165 ICE STORAGE AIR CONDITIONING (4)
Lecture: 2.5 hours / Lab: 4.5 hours
Thermal Energy Storage theory and component selection based on load profile and cost.

Student Learning Outcome(s):
Analyze heat recovery load profile and explain the ramifications of electric cost.

REF A/C 166 WATER TOWERS, EVAPORATIVE CONDENSERS AND CHEMICAL TREATMENT (4)
Lecture: 4 hours
This course will focus on the fundamentals of water towers and evaporative condensers used to obtain high efficiency performance of refrigeration and air conditioning systems. Students will learn how to select the proper size depending on local humidity and desired operating conditions, proper maintenance, additives and procedures and techniques available to the technician.

Student Learning Outcome(s):
Students will develop water treatment procedures for cooling towers and evaporative condensers.

REF A/C 176 HEATING AND AIR CONDITIONING I (3)
Lecture: 3 hours
Instruction is given in heating for workers in the heating and air conditioning field. Fundamentals of fuels, venting, and heat transfer are covered. An introduction to natural gas furnaces, hot water systems and heat pumps are emphasized.

Student Learning Outcome(s):
The student will be able to differentiate the main types of heating systems and explain their operation. The student will state the sequence of operation of a residential furnace. The student will define the major components of a heat pump.

REF A/C 177 HEATING AND AIR CONDITIONING II (3)
Lecture: 3 hours
The cooling portion of the air conditioning field for employed mechanics is explored in this course. Types of systems, the refrigeration cycle, heat gain and heat loss calculations, air distribution equipment, selection of controls, and sales procedures are reviewed.

Student Learning Outcome(s):
1. Perform heat gain and heat loss calculations. 2. Perform air duct sizing of air ducts in a residential A/C system.

REF A/C 185 DIRECTED STUDY - AIR CONDITIONING/REFRIGERATION (1)
Lecture: 1 hour
This course allows students to pursue a directed study in Air conditioning & Refrigeration on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in HVACR.

REF A/C 187 SERVICING I (3)
Lecture: 3 hours
This course reviews servicing procedures, manufacturer’s recommendations, installation and servicing of commercial and industrial refrigeration and air conditioning systems.

Student Learning Outcome(s):
Students will describe the operation of a water-source heat pump.

REF A/C 188 SERVICING II (3)
Lecture: 3 hours
Topics covered in this course include: electrical diagrams for testing control circuits; the total electrical system and protection devices on package units; analysis of failure and compressor motor burnout cleanup procedures.

Student Learning Outcome(s):
1. Discuss soldering and brazing techniques as they relate to servicing. 2. Discuss refrigeration and A/C electrical schematics,
REF A/C 199 MECHANICAL CODE I -HVACR (3)
Lecture: 3 hours

Basic heating, air-conditioning and refrigeration (HVACR) mechanical codes and ordinances are the focus of this course. General codes, installation methods and equipment, electrical requirements and other specified areas in the various ordinances are reviewed.

Student Learning Outcome(s):
1. List mechanical codes by topic and article. 2. Identify topic specific HVAC code requirements such as; tubing size, circuit protection, branch circuits, and equipment sizing. 3. Interpret various mechanical codes applied to various installation examples.

REF A/C 202 REFRIGERATION FUNDAMENTALS (3) CSU
Lecture: 3 hours

This course covers applied thermodynamics, types of energy, gas laws, sensible and latent heat transfer.

Student Learning Outcome(s):
1. Students properly identify the 4 major components of a refrigeration system. 2. Students will use technical manuals to select appropriate compression system components.

REF A/C 203 COMPRESSION SYSTEMS OF REFRIGERATION (3) CSU
Lecture: 3 hours

Instruction is given in the vapor cycle of refrigeration systems, including the study of refrigerants and their behavior in the system.

Student Learning Outcome(s):
Students will develop a checklist for leak checking vapor refrigeration systems.

REF A/C 204 FUNCTIONS AND COMPRESSION SYSTEM COMPONENTS (3)
Lecture: 3 hours

This Course covers the technical aspects of all major refrigeration system components. Topics covered include the principles of operation of various types of compressors, refrigerant flow controls, and system design.

Student Learning Outcome(s):
1. Students will select the correct type of compressor for various applications. 2. Students will select the most appropriate metering device for various refrigeration systems.

REF A/C 208 REFRIGERANT MANAGEMENT - EPA SECTION 608 CERTIFICATION (4) CSU
Lecture: 4 hours

This course covers Refrigerant Management including the EPA Section 608 ruling, the Montreal Protocol, Ozone depletion and Global Warming. Preparatory course for the EPA section 608 technician certification. Type I, II, III, and Universal Certification. NOTE: Certification test will be available at the end of the semester for an additional fee.

Student Learning Outcome(s):
1. Students will define the three Rs, Recovery, Recycle and Reclaim. 2. Students will identify TYPE I, Type II, and TYPE III equipment. 3. Students will describe the EPA Section 608 ruling.

REF A/C 209 NORTH AMERICAN TECHNICIAN EXCELLENCE (NATE)-AIR CONDITIONING SPECIALIST CERTIFICATION PREPARATION (4) RPT 2
Lecture: 4 hours

This course is a preparatory course for the industry standard NATE A/C Specialist certification examination. Topics covered in this course include safety, thermodynamics, electrical system diagnostics, airflow measurements, mechanical code, installation, service, tools, and more!

Student Learning Outcome(s):
1. Students will identify refrigerant types and appropriate application. 2. Students will define recovery, recycle, reclaim. 3. Students will define high, medium, and low temperature ranges.

REF A/C 210 REFRIGERATION SYSTEM EFFICIENCY FACTORS (3)
Lecture: 3 hours

This course will cover refrigerant, pressure enthalpy diagram, refrigeration piping, system evacuation, charging, and maintenance. The beginning of the class will include a review of terminology and the refrigeration cycle.

Student Learning Outcome(s):
Students will develop a checklist for performing preventive maintenance on a packaged air conditioning unit.

REF A/C 250 INDOOR AIR QUALITY (3)
Lecture: 3 hours

This course emphasizes on operation of systems to provide quality air to indoor environments. AQMD requirements and pending regulations are reviewed. Organizing and implementing maintenance programs that include indoor air quality assessment and air balancing HVAC systems are covered.

Student Learning Outcome(s):
SLO 1. Discuss the health aspects of IAQ. SLO 2. Discuss airflow as it relates to IAQ. SLO 3. Discuss chemicals that can have a negative impact on IAQ.

REF A/C 255 ENERGY MANAGEMENT (4)
Lecture: 4 hours

The course covers the use of computers in the HVACR industry and the application of energy management technology in the improvement of energy efficiencies. The goal is to prepare the HVACR Technician in the use of modern technology, including computers in the continuing quest for improved energy management.

Student Learning Outcome(s):
SLO #1 The student will gather information on the various components of an energy management system. SLO #2 The student will critically analyze and then organize information on the application of a energy management system. The student will properly apply the English language to write an explanatory paper about rationals for using various energy management systems or practices. system.
**Graduation Requirements and Educational Programs**

**REF A/C 285  DIRECTED STUDY - AIR CONDITIONING/REFRIGERATION (2)**

Lecture: 2 hours

This course allows students to pursue a directed study in the HVACR industry on a contract basis under the direction of a supervising instructor.

**Student Learning Outcome(s):**

The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in HVACR.

**REF A/C 385  DIRECTED STUDY - AIR CONDITIONING/REFRIGERATION (3)**

Lecture: 3 hours

This course allows students to pursue a directed study in HVACR on a contract basis under the direction of a supervising instructor.

**Student Learning Outcome(s):**

The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in HVACR.

**REF A/C 941  COOPERATIVE EDUCATION - REFRIGERATION & AIR CONDITIONING MECH (4) CSU RPT 3**

Lecture: 4 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

**Student Learning Outcome(s):**

The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

**SIGN GRAPHICS**

**SGNGRPH 101  INDIVIDUAL LETTERING (10)**

Lecture: 5 hours / Lab: 15 hours

Instruction covers identification of materials, tools, and brushes. Training is offered in drawing and brush lettering Gothic, Roman, Script, and casual letter styles. This course also includes training in techniques of layout, letter spacing, color mixing in reference to the production and sale of temporary signs. Students prepare showcards, paper signs, and other temporary display saleable items.

**Student Learning Outcome(s):**

Students will be able to design and execute a show card using basic layout and design techniques using industry standard tools to produce a finished product. Students will be able to design and execute a paper banner using basic layout and design techniques and employing the proper materials and tools to complete a finished product.

**SGNGRPH 102  EXTERIOR DISPLAY SIGNS (10)**

Prerequisite: Sign Graphics 101;

This course covers the tools and materials used to produce outdoor signs. In addition, students design, paint, and letter signs inside and outside the classroom. Students will work on a variety of materials including; canvas, plywood, aluminum, and plastic substrates, Introduction to computer generated lettering and application techniques for vinyl letters. Instruction will emphasize sign layout and design. Students will produce a 4’X8’ plywood sign and an exterior wall sign.

**Student Learning Outcome(s):**

Students will design, layout and create a 4’ X 8’ plywood sign. Students will produce a plaque and gild with 24 karat gold.

**SGNGRPH 103  WINDOW SIGNS (10)**

Prerequisite: Sign Graphics 102;

Instruction covers the use of specialized tools and materials used to produce window signs. Training includes painting on exterior and reverse windows, stippling techniques, and applications of vinyl letters on glass, both exterior and reverse. In addition, students will paint a temporary splash window and apply 23K gold leaf (water gilding). Intermediate computer design including the use of plotters and application techniques.

**Student Learning Outcome(s):**

Students will produce an exterior window sign using computer generated vinyl letters. Students will hand paint a reverse window sign.

**RESTAURANT MANAGEMENT**

**RESTMGT 100  RESTAURANT MANAGEMENT (3) CSU**

Lecture: 3 hours

Introduction to managing in the restaurant industry. Effective communication, goal setting, management theory, problem solving and creating a team work environment will be discussed.

**Student Learning Outcome(s):**

Student will compare and contrast legal issues as they pertain to the hospitality industry. Student will evaluate proper management practices in the hospitality industry.

Student will identify proper Hospitality Restaurant Management styles, techniques, goal setting, problem solving, motivating and protocol.
**SGNGRPH 104 ADVANCE COMPUTER & DESIGN (10)**

**Lecture:** 5 hours / **Lab:** 15 hours

**Prerequisite:** Sign Graphics 103;

Students will learn advanced design techniques, backgrounds, and color theory. Practical experience will be gained on advanced computer study, applications, and a variety of computer sign software. In addition, information will be given on small business practices - including management and pricing. Students will produce a sandblasted sign, a custom contour-cut sign, and an antique sign.

**Student Learning Outcome(s):**

- Students will design and layout a sandblasted dimensional sign
- Students will research design and hand paint an antique sign
- Students will design and print a digital ink jet sticker or decal

---

**SGNGRPH 201 FUNDAMENTALS OF MURAL PAINTING (2)**

**Lab:** 6 hours

This course will teach basic mural painting techniques including; design, layout, and execution. Students will be introduced to the proper tools and paints for exterior, long term murals.

**Student Learning Outcome(s):**

- Students will research historical material and contemporary mural designs to facilitate layout and design of a large wall mural
- Students will grid off and participate in the direct layout to the wall
- Students will paint a finished wall mural as part of a team

---

**SGNGRPH 203 SILK SCREEN PROCESSING I (2) RPT 1**

**Lab:** 6 hours

This course will provide an introduction to the screen printing trade. Students will learn to make silk screens and will learn about copy preparation, mesh selection, frames, stencil systems, printing techniques, ink & substrate compatibility, reclamation of screens. Students will print on a variety of surfaces.

**Student Learning Outcome(s):**

- Students will create a finished screen and printed project including two color using photo emulsion
- Students will set up and print a multi color textile

---

**SGNGRPH 204 SILK SCREEN PROCESSING II (2)**

**Lab:** 6 hours

**Prerequisite:** Sign Graphics 203 and 205.

Students will be introduced to the use of solvent based inks; including; color mixing, application, and clean-up. This course also offers practice on a variety of substrates and uses including four color process printing.

**Student Learning Outcome(s):**

- Students will create artwork using Photoshop for photo reproduction and execute finished screen and print a minimum of 25 consistent copies
- Students will develop a multi color design using a dark textile substrate

---

**SGNGRPH 205 COMPUTER TECHNIQUES FOR SCREEN PRINTING (2)**

**Lecture:** 1 hour / **Lab:** 2 hours

This is a computer course that will provide the basic skills necessary for students to prepare files for output to be used in the silk screen process. Topics covered: spot color, trapping, 4 color process and simulated color separations.

**Student Learning Outcome(s):**

- Students will create an electronic file for single and multi color screen printing output

---

**SGNGRPH 211 AUTOMOTIVE GRAPHICS (2)**

**Lecture:** 1 hour / **Lab:** 2 hours

**Prerequisite:** Sign Graphics 203 and 205.

Students will be introduced to the use of solvent based inks; including; color mixing, application, and clean-up. This course also offers practice on a variety of substrates and uses including four color process printing.

**Student Learning Outcome(s):**

- Students will research historical material and contemporary mural designs to facilitate layout and design of a large wall mural
- Students will grid off and participate in the direct layout to the wall
- Students will paint a finished wall mural as part of a team

---

**SGNGRPH 212 SIGN DESIGN AND LAYOUT (2)**

**Lecture:** 1 hour / **Lab:** 2 hours

**Prerequisite:** Sign Graphics 103 and 201.

Students will research design and hand paint an antique sign. Students will design and print a digital ink jet sticker or decal.

**Student Learning Outcome(s):**

- Students will research and execute a computer generated stencil for an automobile graphic
- Students will execute a basic casual letter style directly onto a vehicle surface

---

**SOCIOLGY**

**SOC 001 INTRODUCTION TO SOCIOLOGY (3) UC/CSU**

**Lecture:** 3 hours

This course is designed to acquaint students with the major principles of sociology as they are applied to contemporary social issues. With the use of several theoretical perspectives it examines social structures within American society and other cultures from macro and micro perspectives. There are extensive references to contemporary research findings on social structure, group dynamics, social stratification, and social institutions.

**Student Learning Outcome(s):**

1. Students will utilize basic theoretical perspectives and identify their strengths and weaknesses
SOC 002  AMERICAN SOCIAL PROBLEMS (3) UC/CSU
Lecture: 3 hours

This course provides identification and analysis of contemporary social problems in the United States with an attempt to establish criteria by which an individual can judge the probable effectiveness of various schemes for social betterment.

Student Learning Outcome(s):

Students will be able to answer the following questions: 1. What is a Social Problem and discuss the objectives and subjective elements of social problems. 2. Be able to define and give examples of the following elements of social structure and culture (institutions, social groups, status, roles, beliefs, values, norms, sanctions and symbols). 3. Be able to explain "social imagination" and discuss its relevance to the study of social problems.

SOC 028  THE FAMILY: A SOCIOLOGICAL APPROACH (3) UC/CSU
Lecture: 3 hours

This course provides a sociological analysis which contributes to an understanding of the origin, structure, and functions of marriage and family life. This course includes, but is not limited to, studies of gender roles, legal controls, religious attitudes, mixed marriages and financial and family planning.

Student Learning Outcome(s):

Students will be able to do understand family trends from the past sixty years and analyze the changes in family dynamics.

GRADUATION REQUIREMENTS AND EDUCATIONAL PROGRAMS

1. Be able to demonstrate the understanding of how to communicate with the public in a positive manner 2. Be able to identify and list the purpose of public information exchange as it affects his/her responsibility in Solid Waste Management. 3. Be able to demonstrate the understanding of organized refuse collection through efficient routing techniques. 4. Be able to demonstrate the knowledge of different types of collection systems and vehicles. 5. Be able to demonstrate the understanding of how to measure productivity and routing and how to specify equipment to maximize route productivity.

SWM TEK 107  WASTE REDUCTION AND RECYCLING (3)
Lecture: 3 hours

This course is an introduction to the science of solid resource recovery. It presents a broad overview of the methods and techniques, equipment and facilities required in recovery processes. Emphasis is placed on costs and management of the recovery process. Nuclear and non-nuclear types of resource recovering are studied.

Student Learning Outcome(s):

1. Be able to demonstrate an understanding of solid waste characteristics as it pertains to resource recovery 2. Be able to differentiate various methods of collection, handling and disposal of a multi-faceted municipal solid waste stream 3. Be able to demonstrate the understanding of increasing prominence of recycling programs along with resultant regulatory developments in the solid waste field.

SWM TEK 108  SOLID WASTE FACILITIES (3)
Lecture: 3 hours

This course covers history and legislation of solid waste generation, and the need for effective transfer stations and landfills. It contains an overview of the handling of materials for both resource recovery and disposition of hazardous and non-hazardous waste. The future needs of the public and private sectors are studied.

Student Learning Outcome(s):

1. Be able to demonstrate an understanding of the history, concept, and development of landfills 2. Be able to discuss the concept, importance, and design of transfer stations 3. Be able to describe the concept of materials recovery facilities 4. Be able to demonstrate an understanding of compost and mulch processing facilities 5. Be able to discuss the concept of waste-to-energy and conversion technology.

SWM TEK 911  COOPERATIVE EDUCATION - SOLID WASTE MANAGEMENT TECHNOLOGY (1) RPT 3
Lecture: 1 hour

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):

The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.
**SWM TEK 921  COOPERATIVE EDUCATION - SOLID WASTE MANAGEMENT TECHNOLOGY (2) RPT 3**

*Lecture: 2 hours*

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

**Student Learning Outcome(s):**

The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

---

**SWM TEK 931  COOPERATIVE EDUCATION - SOLID WASTE MANAGEMENT TECHNOLOGY (3) RPT 3**

*Lecture: 3 hours*

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

**Student Learning Outcome(s):**

The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

---

**SPANISH**

**SPANISH 001  ELEMENTARY SPANISH I (5) UC/CSU**

*Lecture: 5 hours*

This course stresses the fundamentals of pronunciation and grammar, practical vocabulary, useful phrases, and the ability to understand, read, write and speak simple Spanish. It includes basic facts on geography, customs, and culture of Spain and Latin America.

**Student Learning Outcome(s):**

Students will communicate in Spanish, orally and in writing, at a novice high level (see ACTFL), using the present tense, the present progressive, the periphrastic future tense and the pretense tense: 1) Students will be able to hold a conversation at a novice high level, 2) Students will be able to read a graded paragraph containing elementary vocabulary, and 3) Students will be able to write sentences in Spanish dealing with daily life.

**SPANISH 002  ELEMENTARY SPANISH II (5) UC/CSU**

*Lecture: 5 hours*

Prerequisite: Spanish 1; Spanish 22;

This course is a continuation of Spanish 1. It stresses further aspects of pronunciation and grammar, practical vocabulary, useful phrases, and the ability to understand, read, write and speak Spanish. It includes further facts on geography, customs, and culture of Spain and Latin America.

**Student Learning Outcome(s):**

1. Students will be able to describe their childhood in the imperfect tense of the indicative mood.

---

**SPANISH 035  SPANISH FOR SPANISH SPEAKERS I (5) UC/CSU**

*Lecture: 5 hours*

This course is intended for fluent Spanish speakers who have had no formal instruction in Spanish. Students are introduced to Spanish grammar and spelling rules with a focus on reading and writing skills and vocabulary expansion. Students practice the four language skills in the context of the geography, customs, and cultures of the Spanish-speaking countries and of the Latino experience in the United States. No prerequisites. Credit is given for either Spanish 35 or Spanish 2, but not both.

**Student Learning Outcome(s):**

The student will write a short essay in Spanish about a cultural tradition or a family celebration that is personally meaningful.

---

**SPANISH 036  SPANISH FOR SPANISH SPEAKERS II (5) UC/CSU**

*Lecture: 5 hours*

This course is a continuation of Spanish 35 and it completes the study of grammar and continues the development of reading and writing skills.

**Student Learning Outcome(s):**

The student will write a 3 page essay analyzing a short story in spanish.

---

**STREET MAINTENANCE**

**ST MAIN 103  STREET MAINTENANCE (APPLIED CALCULATIONS IN PUBLIC WORKS) (3)**

*Lecture: 3 hours*

This course is a practical mathematics exploration with an emphasis on application problems encountered in 'Street Maintenance', 'Street Services', and other areas of 'Public Works'.

**Student Learning Outcome(s):**

1. Apply appropriate mathematical rules to solving electrical calculations such as: whole numbers, fractions, percentages, ratios and proportions, basic algebra, order of operations, multiplication, division, addition, and subtraction, etc. 2. Apply appropriate units of measure such as; percentages, volt, ohms, amperes, watts, sq ft, cubic volume, etc. 3. Select situational appropriate formula and or apply proper measurements and calculations to solve various word problems such as: inventories, material estimates, volume, area, size, etc.
ST MAIN 200  SURVEY OF STREET SERVICES (3)
Lecture: 3 hours

This course provides an introduction to all common functions of Street Services, as an element of ‘Public Works’. The history, current practices in Street Services, trends, and programs will be covered.

Student Learning Outcome(s):
1. Discuss the history and development of the “Bureau of Street Services.” 2. Identify the principles and practices of Urban Forestry. 3. Describe resurfacing operations.

ST MAIN 201  STREET MAINTENANCE I (3)
Lecture: 3 hours

This course covers the history and current practices in street maintenance techniques and programs. This is a basic course in the general theory of street maintenance as applied to concrete and asphalt.

Student Learning Outcome(s):
1. Discuss the history and development of asphalt and concrete pavements. 2. Identify tool & techniques for preventive maintenance on asphalt and concrete pavements. 3. Identify appropriate codes related to asphalt and concrete maintenance work.

ST MAIN 202  STREET MAINTENANCE II (3)
Lecture: 3 hours

This course provides an in depth study of asphalt, preventative maintenance of asphalt and of concrete pavements, and applicable codes for improvement and repair. Also included is the introduction of estimating and calculations for materials usage.

Student Learning Outcome(s):
1. Discuss the principles and practices for asphalt and concrete usage as a road material. 2. Describe the cleaning and sanitation of roadwork equipment. 3. Describe the laws and ordinances pertaining to resurfacing operations.

ST MAIN 203  STREET MAINTENANCE III (3)
Lecture: 3 hours

This course covers engineering plan reading and math concepts necessary for the calculation of amounts of material required for public works maintenance operations. Emphasis on solving practical math problems in estimating concrete, asphalt, and other materials necessary for the completion of street, sidewalk and other types of maintenance work.

Student Learning Outcome(s):
1. Discuss the principles and practices of estimating. 2. Demonstrate estimating for a classroom defined job requirement.

ST MAIN 204  REPORT WRITING FOR PUBLIC WORKS (3)
Lecture: 3 hours

This course covers report writing in the public works arena. The basic mechanics of the English language and analysis and preparation of reports for public works will be covered.

Student Learning Outcome(s):
1. Write clear and concise public work reports. 2. Improve basic grammar and apply the grammar rules to writing public work reports.

ST MAIN 205  ISSUES AND PRACTICES IN PUBLIC WORKS (3)
Lecture: 3 hours

This course covers street use, street lighting, street trees, lot cleaning, sanitation, engineering and personnel management. State and Municipal Codes, property descriptions and public relations will also be covered.

Student Learning Outcome(s):
1. Using a map, locate several location for calls of service. 2. Drive to various predetermined map locations.

ST MAIN 206  STREET MAINTENANCE VI (3)
Lecture: 3 hours

This course covers an overview along with hands on experiences with heavy equipment used in street maintenance. Safety and preventative maintenance included.

Student Learning Outcome(s):
1. Discuss the principles and practices of heavy equipment operations. 2. List safety concerns and discuss mitigation when operating heavy equipment.

ST MAIN 207  STREET MAINTENANCE VII (HAZARDOUS MATERIALS EMERGENCY MANAGE (3)
Lecture: 3 hours

This course covers the prescribed responses in the first hour of a hazardous materials incident. This course satisfies OSHA 29CFR1910.120O. The course includes specific training requirements of hazardous waste workers and emergency responders.

Student Learning Outcome(s):
1. List hazardous materials. and describe how to identify and limits exposure. 2. Describe how to mitigate various hazardous material under normal and emergency situations.

ST MAIN 208  STREET MAINTENANCE TECHNOLOGY (3)
Lecture: 3 hours

The basic concepts of management and supervision in the area of public works are introduced. Topics include motivating employees, effective communication, problem solving, leadership skills and current practices.

Student Learning Outcome(s):
1. Discuss the principles and practices of organizational management. 2. List the pros and cons of various management approaches.

ST MAIN 209  DRIVERS LICENSE PREPARATION (CLASS “B”) (2)
Lecture: 1.5 hours / Lab: 1.5 hours

This class prepares the student to successfully obtain a California Class B Drivers License. Information is provided to prepare the student for the written portion of the exam and laboratory/field driving is provided to prepare the student for the driving portion of the exam.

Student Learning Outcome(s):
1. Obtain a Class “B” Drivers License.
ST MAIN 210  MOTOR SWEEPER OPERATOR (3)
Lecture: 1.5 hours / Lab: 4.5 hours
Prerequisite: Street Maintenance 209;
Motor Sweeper Operator School is to serve as the focal point for the
development and training of Street Services personnel to enhance the
capability and effectiveness of street cleaning operations. This course
spans the entire spectrum of safety, maintenance, and operations.

Student Learning Outcome(s):
1. Discuss the safety aspects of sweeper operation. 2. Discuss main-
tenance aspects of sweeper operation. 3. Demonstrate proper set up,
operation, and shut down of a motor sweeper unit.

ST MAIN 240  INTRODUCTION TO MANAGEMENT IN
PUBLIC WORKS (3)
Lecture: 3 hours
The course will address the scope and nature of the field of public
administration with attention given to the Public Works field as well as
to practical elements of the current conceptual framework within which
American Public Administration is practiced. The general format for the
class will be discussion/participation with student analysis of selected
articles and case studies taken from American Public Administration
literature.

Student Learning Outcome(s):
1. Discuss the theory of Management as applied to Public Works. 2.
Identify the principles and practices Common Public Works Manage-
ment.

ST MAIN 242  MANAGEMENT IN PUBLIC WORKS (3)
Lecture: 3 hours
The course will increase the depth, scope and nature of the principles
and practices in the field of public administration that was gained from the
introduction to management course. ST MAIN 242. With increased atten-
tion given to the Public Works field as well as to practical elements of the
current conceptual framework within which American Public Administration
is practiced.

Student Learning Outcome(s):
1. Compare & Contrast the theories of leadership as applied to Public
Works. 2. Re-State the principles and practices Common to Public Works
leadership.

ST MAIN 252  MANAGEMENT IN PUBLIC WORKS II (3)
Lecture: 3 hours
The course will develop skills that address the scope and nature of the
field of public administration with attention given to the Public Works field as well as
to practical elements of the current conceptual framework within which
American Public Administration is practiced. The general format for the
class will be discussion/participation with student analysis of selected
articles and case studies taken from American Public Administration
literature.

Student Learning Outcome(s):
1. Discuss the theory of Management as applied to Public Works. 2.
Identify the principles and practices Common Public Works Manage-
ment.

ST MAIN 240  INTRODUCTION TO MANAGEMENT IN
PUBLIC WORKS (3)
Lecture: 3 hours
The course will address the scope and nature of the field of public
administration with attention given to the Public Works field as well as
to practical elements of the current conceptual framework within which
American Public Administration is practiced. The general format for the
class will be discussion/participation with student analysis of selected
articles and case studies taken from American Public Administration
literature.

Student Learning Outcome(s):
1. Discuss the theory of Management as applied to Public Works. 2.
Identify the principles and practices Common Public Works Manage-
ment.

ST MAIN 242  MANAGEMENT IN PUBLIC WORKS (3)
Lecture: 3 hours
The course will develop skills that address the scope and nature of the
field of public administration with attention given to the Public Works field as well as
to practical elements of the current conceptual framework within which
American Public Administration is practiced. The general format for the
class will be discussion/participation with student analysis of selected
articles and case studies taken from American Public Administration
literature.

Student Learning Outcome(s):
1. Discuss the theory of Management as applied to Public Works. 2.
Identify the principles and practices Common Public Works Manage-
ment.

ST MAIN 245 LEADERSHIP IN PUBLIC WORKS (3)
Lecture: 3 hours
This course is designed to provide students with a solid foundation
about leaders, the leadership process, and motivation. Topics include
the theories of leadership and motivation, leadership power, leader
behavior, leadership characteristics, the role of gender, substitutes
for leadership, and dysfunctional leadership. SM 245 serves as a
self-assessment of the student's own leadership and motivation skills,
knowledge, and attitudes, and addresses the questions: Who am I as a
leader? What are my most distinguishing leadership traits? What lead-
nership style am I most comfortable being around? How do I influence
others? How do I motivate others?

Student Learning Outcome(s):
1. Discuss the theory of Management as applied to Public Works. 2.
Identify the principles and practices Common Public Works Manage-
ment.

ST MAIN 240  INTRODUCTION TO MANAGEMENT IN
PUBLIC WORKS (3)
Lecture: 3 hours
The course will address the scope and nature of the field of public
administration with attention given to the Public Works field as well as
to practical elements of the current conceptual framework within which
American Public Administration is practiced. The general format for the
class will be discussion/participation with student analysis of selected
articles and case studies taken from American Public Administration
literature.

Student Learning Outcome(s):
1. Discuss the theory of Management as applied to Public Works. 2.
Identify the principles and practices Common Public Works Manage-
ment.

ST MAIN 242  MANAGEMENT IN PUBLIC WORKS (3)
Lecture: 3 hours
The course will develop skills that address the scope and nature of the
field of public administration with attention given to the Public Works field as well as
to practical elements of the current conceptual framework within which
American Public Administration is practiced. The general format for the
class will be discussion/participation with student analysis of selected
articles and case studies taken from American Public Administration
literature.

Student Learning Outcome(s):
1. Discuss the theory of Management as applied to Public Works. 2.
Identify the principles and practices Common Public Works Manage-
ment.

ST MAIN 245 LEADERSHIP IN PUBLIC WORKS (3)
Lecture: 3 hours
This course is designed to provide students with a solid foundation
about leaders, the leadership process, and motivation. Topics include
the theories of leadership and motivation, leadership power, leader
behavior, leadership characteristics, the role of gender, substitutes
for leadership, and dysfunctional leadership. SM 245 serves as a
self-assessment of the student's own leadership and motivation skills,
knowledge, and attitudes, and addresses the questions: Who am I as a
leader? What are my most distinguishing leadership traits? What lead-
nership style am I most comfortable being around? How do I influence
others? How do I motivate others?

Student Learning Outcome(s):
1. Discuss the theory of Management as applied to Public Works. 2.
Identify the principles and practices Common Public Works Manage-
ment.

ST MAIN 240  INTRODUCTION TO MANAGEMENT IN
PUBLIC WORKS (3)
Lecture: 3 hours
The course will address the scope and nature of the field of public
administration with attention given to the Public Works field as well as
to practical elements of the current conceptual framework within which
American Public Administration is practiced. The general format for the
class will be discussion/participation with student analysis of selected
articles and case studies taken from American Public Administration
literature.

Student Learning Outcome(s):
1. Discuss the theory of Management as applied to Public Works. 2.
Identify the principles and practices Common Public Works Manage-
ment.

ST MAIN 242  MANAGEMENT IN PUBLIC WORKS (3)
Lecture: 3 hours
The course will develop skills that address the scope and nature of the
field of public administration with attention given to the Public Works field as well as
to practical elements of the current conceptual framework within which
American Public Administration is practiced. The general format for the
class will be discussion/participation with student analysis of selected
articles and case studies taken from American Public Administration
literature.

Student Learning Outcome(s):
1. Discuss the theory of Management as applied to Public Works. 2.
Identify the principles and practices Common Public Works Manage-
ment.

ST MAIN 245 LEADERSHIP IN PUBLIC WORKS (3)
Lecture: 3 hours
This course is designed to provide students with a solid foundation
about leaders, the leadership process, and motivation. Topics include
the theories of leadership and motivation, leadership power, leader
behavior, leadership characteristics, the role of gender, substitutes
for leadership, and dysfunctional leadership. SM 245 serves as a
self-assessment of the student's own leadership and motivation skills,
knowledge, and attitudes, and addresses the questions: Who am I as a
leader? What are my most distinguishing leadership traits? What lead-
nership style am I most comfortable being around? How do I influence
others? How do I motivate others?
Graduation Requirements and Educational Programs

TAILRNG 250  TAILORING TECHNIQUES I (2)
Lab: 6 hours
Advisory: Fashion Design 222 or Fashion Design 111;
Training is offered in basic tailoring techniques. Students are instructed in welt pockets, hand tailored stitching, and finishing techniques. This course will consist of a basic and stylized tailored vest.

Student Learning Outcome(s):

TAILRNG 251  TAILORING TECHNIQUES II (2)
Lab: 6 hours
Prerequisite: Tailoring 226 or Tailoring 250.
Students will receive training on trousers and casual men’s style jackets. Instruction will include fly closures, welt pockets, and half linings, and jacket tailoring techniques.

Student Learning Outcome(s):

TAILRNG 252  TAILORING TECHNIQUES III (2)
Lab: 6 hours
Prerequisite: Tailoring 227 or Tailoring 251.
Students receive training in tailored coats, men’s style shirts. Instruction will include stylized seams, cold weather techniques.

Student Learning Outcome(s):

TAILRNG 253  TAILORING TECHNIQUES IV (2)
Lab: 6 hours
Prerequisite: Tailoring 228 or Tailoring 252.
Students will receive instruction on man’s style tailored jacket including inner construction using traditional tailoring techniques.

Student Learning Outcome(s):

TAILRNG 255  MEN’S PATTERN DRAFTING I (2)
Lab: 6 hours
In this course students will learn the fundamentals of taking and using men’s measurements for pattern making. Students will draft patterns for basic trousers, men’s sport shirts, and a basic man’s vest. Each pattern will be tested for fit.

Student Learning Outcome(s):

SUPV 004 SUPERVISOR’S RESPONSIBILITY FOR MANAGEMENT OF PERSONNEL (3) CSU
Lecture: 3 hours
This course teaches personnel techniques for the supervisor. Selection, placement, orientation, training, counseling, promotion, evaluation, discipline, grievance handling, and affirmative action are topics included in this course.

Student Learning Outcome(s):
1. Students will be able to apply supervision principles and skills in a variety of situational settings. 2. Students will be able to identify the skills and examine the roles and responsibilities of a supervisor 3. Students will demonstrate problem solving and appropriate decision-making skills.

SUPV 011 ORAL COMMUNICATIONS (3)
Lecture: 3 hours
This course will focus on the basics of the oral communication process and how it is intertwined with the work of a supervisor. Students will plan, compose, and deliver oral presentations designed to strengthen verbal and nonverbal skills. Finally, the student will be exposed to the basic principles of management and supervision and how successful communication is fundamental to the success of supervisors.

Student Learning Outcome(s):

SUPV 941 COOPERATIVE EDUCATION - SUPERVISION (4) CSU RPT 3
Lecture: 4 hours
Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/ internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):

The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.
TAILRNG 256  MEN'S PATTERN DRAFTING II (2)
Lab: 6 hours

This course in men's pattern making will introduce students to advanced styling including, jackets, and stylized pants. Students will make complete patterns for each element of a three piece suit.

Student Learning Outcome(s):
Students will draft a classic or contemporary jacket with easy or close fit incorporation required elements, and will construct a muslin sample.

THEATER

THEATER 100  INTRODUCTION TO THE THEATER (3) UC/CSU
Lecture: 3 hours

This course surveys the history of theater from the ancient Greek to modern times. Stage vocabulary, production crafts and acting techniques are introduced. Students will analyze how theater relates to motion pictures, television, and radio in contemporary American life, as well as compare themes in literature, compare and contrast adaptations of famous plays to their original written form and apply critical analysis to live dramatic productions.

Student Learning Outcome(s):
1. Students will have knowledge of the various genres of theater as determined by historical period or time. 2. Students develop a critical perspective of what it takes as theater artists to create a play, including the actor, playwright, director and technical personnel. 3. Students will research a play to their interest, make reservations to the play, the proper etiquette for attending the performance and critically evaluate the play in a written essay as their final project.

VISUAL COMMUNICATIONS

VISCOM 100  GRAPHIC DESIGN I (2) CSU
Lecture: 0.5 hours / Lab: 4.25 hours

An introduction to the profession of Graphic Design. Projects will stress design basics, typography, the computer as a design tool, the basics of visual problem solving, and art production and advertising.

Student Learning Outcome(s):
Student Learning Outcome: 1. Students will apply color systems to their graphic design solutions that provide color harmony. 2. Students will be able to utilize typography for the purpose of effective visual communication. 3. Students will create a self mailer for a current MOCA exhibition.
VISCOM 112  DIGITAL PREPRESS II (2) UC/CSU
Lecture: 0.5 hours / Lab: 4.5 hours
Intermediate level course where students design and produce projects that utilize the Macintosh computer and Apple applications. Printing processes, techniques and requirement for digital and offset lithography will be covered.

Student Learning Outcome(s):
1. Students will utilize Toolbox Tools and Menus to create and manipulate images and typography. 2. Students will save files in multiple formats (AI to PDF) for the purpose of working cross platform Mac to PC and in different application versions (CSS to CS6). 3. Students will develop Vector concepts and translate bitmapped images to Vector formats.

VISCOM 113  DIGITAL PAGE LAYOUT (2) CSU
Lecture: 0.5 hours / Lab: 4.5 hours
A hands on course in the digital page layout application Adobe InDesign. Students will learn to construct page layouts for print, including the specification of typographic fonts, setting type in columns and wrap-arounds, working with spreads and long copy documents, using photographs and illustrations, and the preflight preparation of finished document files for print reproduction.

Student Learning Outcome(s):
1. Students will understand typesetting terms. Students will comprehend layout and design of magazine articles in relation to advertising and graphic design.

VISCOM 114  DIGITAL TYPESETTING (2) CSU
Lecture: 0.5 hours / Lab: 4.5 hours
Introduction of the principles of computer typesetting as a career. The course will cover the standards and guidelines used to set type for ads, brochures, and stationery. Proofreading and setting copy in multiple computer programs will be stressed.

Student Learning Outcome(s):
1. Students will produce images and material preparing for a printed project. Pantone and process color printing and photography, proofing, separations and package.

VISCOM 115  GRAPHIC DESIGN II (2) CSU
Lecture: 0.5 hours / Lab: 4.5 hours
An advanced level course in digital picture-making techniques. It combines the Adobe software applications “Illustrator” and “Photoshop” for the creation of digital illustrations that include drawing, photo manipulations, and typography stylizations for advertising and editorial purposes.

Student Learning Outcome(s):
1. Students will organize and present textual information demonstrating gestalt and visual hierarchy of different typestyles for the viewer to navigate and easily access the information he seeks.

VISCOM 116  ADVERTISING CONCEPTS (2) CSU
Lecture: 0.5 hours / Lab: 4.5 hours
Introduction to the development of advertising concepts for magazines, television, and the internet. Use research, brainstorming and standard advertising methodology to plan, design and produce an advertising campaign.

Student Learning Outcome(s):
1. Students will compare and assess both the editorial and advertising content of a cross section of retail magazines and then prepare a written summary of their findings and write a general description of the magazines readership based on those findings. The student will then present this information orally to the class and answer spontaneous questions from the teacher and class members.

VISCOM 117  COMPUTER ILLUSTRATION I (2) CSU
Lecture: 0.5 hours / Lab: 4.5 hours
Students will utilize Toolbox Tools and Menus to create and manipulate images and typography. 2. Students will save files in multiple formats (AI to PDF) for the purpose of working cross platform Mac to PC and in different application versions (CSS to CS6). 3. Students will develop Vector concepts and translate bitmapped images to Vector formats.

Student Learning Outcome(s):
1. Students will utilize Toolbox Tools and Menus to create and manipulate images and typography. 2. Students will save files in multiple formats (AI to PDF) for the purpose of working cross platform Mac to PC and in different application versions (CSS to CS6). 3. Students will develop Vector concepts and translate bitmapped images to Vector formats.

VISCOM 118  DIGITAL DRAWING (2) CSU
Lecture: 0.5 hours / Lab: 3.75 hours
Advisory: Visual Communications 103;

Basic training in computer illustration using the Adobe software application Illustrator. Toolbox familiarity and manipulation, menu items, and general skill application will constitute the criteria for the course.

Student Learning Outcome(s):
1. Students will organize and present textual information demonstrating gestalt and visual hierarchy of different typestyles for the viewer to navigate and easily access the information he seeks.

VISCOM 119  DIGITAL PAGE LAYOUT (2) CSU
Lecture: 0.5 hours / Lab: 4.5 hours
A hands on course in the digital page layout application Adobe InDesign. Students will learn to construct page layouts for print, including the specification of typographic fonts, setting type in columns and wrap-arounds, working with spreads and long copy documents, using photographs and illustrations, and the preflight preparation of finished document files for print reproduction.

Student Learning Outcome(s):
1. Students will understand typesetting terms. Students will comprehend layout and design of magazine articles in relation to advertising and graphic design.

VISCOM 120  DRAWING II (2) CSU
Lecture: 0.5 hours / Lab: 4.5 hours
An advanced drawing course in which indoor and outdoor observational drawing concepts are linked with magazine and book publishing for the creation of cover art and feature article page layouts.

Student Learning Outcome(s):
1. Students will be able to draw from observation with correct proportions, value variations in their line applications, and with an overall understanding of composition including positive and negative space.

VISCOM 121  COMPUTER ILLUSTRATION II (2) CSU
Lecture: 0.5 hours / Lab: 4.5 hours
An advanced level course in digital picture-making techniques. It combines the Adobe software applications “Illustrator” and “Photoshop” for the creation of digital illustrations that include drawing, photo manipulations, and typographic stylizations for advertising and editorial purposes.

Student Learning Outcome(s):
1. Students will redesign the packaging graphics for a consumer food product, or the #10 brochure for a SoCal theme park. 2. Students will create photography and illustration for container packaging. 3. Students will create digital files for all packaging components.

Viscom 122  PORTFOLIO DEVELOPMENT I (2) CSU
Lecture: 0.5 hours / Lab: 4.5 hours
This is a course in the production of a finished portfolio; all course projects will be reviewed for portfolio consideration. Some projects will require re-working. Preparation of 10 completed works with preliminary developmental books culminates in a simulated job interview with Advisory Board members.

Student Learning Outcome(s):
1. Students will apply organizational and design systems to a multi page portfolio book document. 2. Students will create original digital files in Photoshop, Illustrator, Indesign, and other visual digital software applications and format each as PDFs for the purpose of printing. 3. Students will build the first half of a marketable portfolio.

<td></td>
</tr>
</tbody>
</table>
Student Learning Outcome(s):
The outcome will vary depending on the contract with the instructor. The student will formulate a project based on a topic in Visual Communications and related topics.

WASTEWATER TECHNOLOGY

WASTE 012 WASTEWATER OPERATIONS I (3)
Lecture: 3 hours
This course is a survey and introductory course into wastewater systems for operations and maintenance personnel. Administrative, engineering and laboratory personnel may benefit from this course.

Student Learning Outcome(s):
1. Students will discuss the origin, chemical and biological compositions, and treatment methods of wastewater.

WASTE 013 WASTEWATER OPERATIONS II (3)
Lecture: 3 hours
A comprehensive study is made of preliminary, primary, and secondary treatment systems and operations including selected field studies.

Student Learning Outcome(s):
1. Students will describe the origins, composition and characteristics of wastewater.

WASTE 014 WASTEWATER OPERATIONS III (3)
Lecture: 3 hours
This course is a comprehensive study of disinfection methods, tertiary treatment, water reclamation, solids treatment, solids and effluent disposal practices.

Student Learning Outcome(s):
1. The student will be able to convert measurements from US units to metric.

WASTE 016 WASTEWATER OPERATIONS V (3)
Lecture: 3 hours
This course is a comprehensive study of the practical application of engineering fundamentals, such as hydraulics, mechanics, electricity and instruments as practiced in wastewater treatment.

Student Learning Outcome(s):
1. Be able to discuss direct and alternating current, terms, definitions, power, and motors in elementary electricity.
WASTE 017       WASTEWATER OPERATIONS VI (3)
Lecture: 3 hours

Public health, the environment, regulations, management/supervision and report writing as practiced in wastewater and water reclamation plants safety are covered.

Student Learning Outcome(s):

1. Be able to describe pre-treatment, collection system, public treatment system, and disposal system in a wastewater system. 2. Be able to discuss energy levels for various treatment methods, the costs involved, and social impacts of the effects on energy and natural resources. 3. Be able to describe the different levels of operator certification including the educational and experience requirements. 4. Be able to discuss public relations and professional organizations. 5. Be able to describe oral and written forms of communications, and the importance of record keeping. 6. Be able to discuss the administrative methods, human relations, Cal-OSHA, and labor relations in plant management. 7. Be able to describe how to fill out job applications, what to do in job interviews and discuss personnel practices.

WASTE 018       WATER AND WASTEWATER MATHEMATICS (3)
Lecture: 3 hours

This is a review and practice of basic mathematical concepts required to solve wastewater treatment problems. (Note: this is not a remedial math class).

Student Learning Outcome(s):

1. Be able to discuss basic mathematics concepts such as fractions, decimals, exponents, percentages, averages, ratios, proportions, and unit conversions.

WASTE 921       COOPERATIVE EDUCATION - WASTEWATER TECHNOLOGY (2) RPT 3
Lecture: 2 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):

The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

WASTE 931       COOPERATIVE EDUCATION - WASTEWATER TECHNOLOGY (3) RPT 3
Lecture: 3 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required.

Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):

The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

WATER 001       WATER DISTRIBUTION I (3) CSU
Lecture: 3 hours

This course provides instructions to water works design and operation for operators and others involved in the operation and design of water distribution systems. Included are special considerations of pipe types and uses, reservoirs, maps, records applied hydraulics as applied to Distribution Systems. Emphasis will be placed on the practical layout, operation and maintenance of a water distribution system. Students are prepared for a Grade 2 Distribution Operation Certification of the AWWA.

Student Learning Outcome(s):

1. The student will compare and contrast treatment processes such as blending, iron and manganese removal, and organic chemical treatment.

WATER 002       WATER DISTRIBUTION II (3) CSU
Lecture: 3 hours

This is an advanced course in water distribution systems. Included are special considerations of pipe types and uses, reservoirs, maps, records applied hydraulics as applied to Distribution Systems. Emphasis will be placed on the practical layout, operation and maintenance of a water distribution system. Students are prepared for a Grade 2 Distribution Operation Certification of the AWWA.

Student Learning Outcome(s):

1. The student will describe the components of the drinking water distribution system and their functions.

WATER 004       WATER PURIFICATION I (POTABLE WATER) (3) CSU
Lecture: 3 hours

This beginning course in water treatment covers regulations related to water treatment and water quality control, basics of water treatment plant processes and inter-relationship of processes, and introduction to operation and maintenance of water treatment plant. One of the objectives of the course is to prepare students for Grade 1 and Grade 2 Water Treatment Operator Certification by the Department Of Public Health (CDPH).

Student Learning Outcome(s):

1. The student will be able to identify drinking water regulations related to Surface Water Treatment Rule (SWTR) and Total Coliform Rule (TCR). 2. The student will be able to discuss the basic design and operation of the Water Treatment Plant (WTP) including coagulation, flocculation, and sedimentation.
WATER 005  WATER TREATMENT II (POTABLE WATER) (3)
Lecture: 3 hours

This is a more detailed and more in-depth course (compared to the beginning course) in water treatment. This course covers public health, water quality control, elements and functions of the water treatment plant processes. It covers in detail the water treatment plant performance in relation to Surface Water Treatment Rule. Also, covers the operation and maintenance of water treatment plant. One of the objectives of the course is to prepare students for Grades 3 and 4 Water Treatment Operator Certification by the State Department Of Public Health(CDPH).

Student Learning Outcome(s):
1. Students will differentiate storage reservoirs and drinking water wells, and their purposes and function. 2. Students will apply distribution system calculations and measurements.

WATER 101  INTRODUCTION TO SUPPLY WATER TECHNOLOGY (3) CSU
Lecture: 3 hours

The purpose of this course is to introduce the basics of water supply, sources of water supply, water chemistry, drinking water regulations, water microbiology, water quality control, and some basic arithmetics related to water distribution and water treatment problems.

Student Learning Outcome(s):
1. Student will discuss measurements and calculations used in the water industries. 2. Students will list components of water supply systems.

WATER 102  CALCULATIONS AND MEASUREMENT FOR WATER TECHNOLOGY PROGRAMS (3)
Lecture: 3 hours

This course covers the basic math skills needed to perform in the supply & waster water fields. Emphasis is placed on the basic operations and how they are applied to the industry. Measurement calculations will be performed in both standard and metric measurements.

Student Learning Outcome(s):
Students will complete national certification test for Introduction to Construction Math.

WATER 921  COOPERATIVE EDUCATION - SUPPLY WATER TECHNOLOGY (2) RPT 3
Lecture: 2 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/ internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

WATER 931  COOPERATIVE EDUCATION - SUPPLY WATER TECHNOLOGY (3) RPT 3
Lecture: 3 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/ internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

WATER 941  COOPERATIVE EDUCATION - SUPPLY WATER TECHNOLOGY (4) CSU RPT 3
Lecture: 4 hours

Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/ internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

WELDING GAS AND ELECTRIC

WELDG/E 020  WELDING LABORATORY - GAS & ELECTRIC (1)
Lab: 3 hours

In Welding Gas and Electric 020, students refine their hands-on skills with gas cutting, welding, and basic electric arc welding processes. Additionally this course is often used in preparation for outside welding certification exams.

Student Learning Outcome(s):
SLO #1 Students will complete twelve basic weld to AWS standard D 1.3

WELDG/E 030  WELDING LABORATORY - ELECTRIC I (1)
Lab: 3 hours

In Welding Gas and Electric 030, students pursue additional hands-on time with the electric stick welding process. Additionally, it is often used in preparation for outside welding certification exams.

Student Learning Outcome(s):
SLO #1 Student will complete four basic welds to AWS standard D 1.3

WELDG/E 112   WELDING RELATED TECHNICAL
INSTRUCTIONS I (3)
Lecture: 3 hours

This course will cover the principles of oxy-acetylene welding, brazing and cutting; safety, material selection, equipment assembly, fuels torch adjustments, and movements.

Student Learning Outcome(s):

Students will describe how to safely light and adjust an oxyacetylene flame.

WELDG/E 113   APPLIED MATHEMATICS I (3)
Lecture: 3 hours

This is an entry level course in welding calculations and measurements with special emphasis on the application problems encountered in the welding industry.

Student Learning Outcome(s):

SLO: Students will interpret and solve; Common Fraction, Decimal Fractions, Percent, Algebraic, and Ration & Proportion problems.

WELDG/E 115   STRUCTURAL STEEL AND BOLTING SPECIAL INSPECTION (3)
Lecture: 3 hours

This course provides instructions on obtaining a certification as a Structural Bolting Special Inspector by the International Code Council. This course includes a review of the technical aspects of structural bolting inspection and quality-assurance activities. Topics include: duties and responsibilities, safety practices, materials sampling, testing verification, high-strength bolting, steel framing observation, referencing appropriate building codes and standards, structural steel plan reading, and report writing.

Student Learning Outcome(s):

1. Upon the completion of this course all students will obtain the skill required to pass the Structural Steel and Bolting Special Inspector license issued by the International code council. Skills include: duties and responsibilities, referencing appropriate building codes and standards, materials identification and sampling, high strength bolting procedures, structural steel plan reading, and report writing.

WELDG/E 120   STRUCTURAL WELDING SPECIAL INSPECTION (3)
Lecture: 3 hours

This course provides instructions on obtaining a certification as a Structural Welding Special Inspector by the International Code Council. This course includes a review of the technical aspects of structural welding inspection and quality-assurance activities. Topics include: duties and responsibilities, safety practices, metal joining and cutting process, weld joint geometry and welding symbols, weld and base metal discontinuities, visual inspection, nondestructive testing referencing appropriate building codes and standards, materials identification and sampling, high strength bolting procedures, structural steel plan reading, and report writing.

Student Learning Outcome(s):

1. This course includes a review of the technical aspects of structural welding inspection and quality-assurance activities.

WELDG/E 121   ELECTRIC WELDING I (5) CSU
Lab: 15 hours

Students perform basic manipulative exercises in electric welding using low alloy and mild steel materials in all positions, safety precautions, and fire prevention.

Student Learning Outcome(s):

Students will set up and safely light and adjust oxyacetylene flame.

WELDG/E 124   BLUEPRINT READING I (3) CSU
Lecture: 3 hours

This course covers the principles of reading and interpreting basic industrial blueprints as applied to the welding trade.

Student Learning Outcome(s):

Outcome: Students will sketch oblique, isometric and pictorial views.

WELDG/E 125   APPLIED MATHEMATICS II (3)
Lecture: 3 hours

Related mathematical problems in welding in project design and construction using the fundamental principles of algebra, right angle trigonometry, and basic geometry.

Student Learning Outcome(s):

SLOs: 1. Interpret and solve complex common fraction, decimal fraction problems, percent, algebraic, basic trigonometry, and geometry problems.

WELDG/E 131   ELECTRIC WELDING II (5) CSU
Lab: 15 hours

This course will offer students an opportunity to prepare for certification testing in SMAW. There will be opportunities for improvement through supervised practice and individual coaching in SMAW technique.

Student Learning Outcome(s):

SLOs: Students will use shielded metal arc welding (SMAW) techniques to weld in vertical position using a 7018 electrode.

WELDG/E 132   BLUEPRINT READING II (3) CSU
Lecture: 3 hours

Prerequisite: Welding 113;

The course covers the principles of lines, view, size, description, print formats, fasteners, and different types of fabrication drawings; review of industrial welding prints.

Student Learning Outcome(s):

Students will sketch oblique, isometric and pictorial views.
WELDG/E 133  WELDING RELATED TECHNICAL INSTRUCTION III (3)  
Lecture: 3 hours  
The course places an emphasis on materials, design, assembly procedures, electrodes selection, equipment, welding joints, terminology, welding metallurgy, and preparation for AWS and ASME welding examination.

Student Learning Outcome(s):  
SLO: Identify five types of welding joints and seven common structural steel shapes used in industry.

WELDG/E 141  ELECTRIC WELDING III (5) CSU  
Lab: 15 hours  
Students complete activities in sheet metal welding, cast iron welding, inert gas welding (MIG and TIG) and semi-automatic gas shielded welding.

Student Learning Outcome(s):  
SLO #1 Students will weld a lap joint in flat position on aluminum using GTAW process.

WELDG/E 142  INERT GAS WELDING (TIG & MIG) (3) CSU  
Lecture: 3 hours  
The course covers principles in welding aluminum, stainless steel, carbon steel and the maintenance and operation of welding equipment.

Student Learning Outcome(s):  
Identify three types of shielding gases used in GMAW and explain the functions of the shielding gasses.

WELDG/E 143  WELDING RELATED TECHNICAL INSTRUCTION IV (3)  
Lecture: 3 hours  
The course covers the principles and theory of operating semi-automatic gas shielded welding equipment and the metallurgy of metals.

Student Learning Outcome(s):  
Identify three types of shielding gases used in GMAW and explain the functions of the shielding gasses.

WELDG/E 151  INTRODUCTION TO ROBOTIC WELDING AND AUTOMATION (4.5) CSU  
Lecture: 1.5 hours / Lab: 9 hours  
The course provides fundamental theory and hands-on application of robotic welding and automation. Emphasis is placed on safety awareness, programming techniques, and basic gas metal arc welding applications using a six-axis robotic welding systems.

Student Learning Outcome(s):  
1. At the completion of this course all students will select an electric arc welding process covered in the course and demonstrate a common knowledge of basic operating principles, component identification, equipment setup and performance.

WELDG/E 185  DIRECTED STUDY - WELDING GAS AND ELECTRIC (1)  
Lecture: 1 hour  
This course allows students to pursue a directed study in welding technology on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):  
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in plumbing technology.

WELDG/E 200  METAL SCULPTURE II (3) CSU  
Lecture: 1.5 hours / Lab: 4.5 hours  
Prerequisite: Welding 100.  
Expand beginning welding skills and metal working techniques into an exploration of metal sculpture. This course covers hot and cold working of steel. Shielded metal arc welding, oxy-fuel and plasma arc cutting, weld design and finishing techniques. Technical skills will be emphasized through hands on instruction and practice. There will be opportunity for creative expression and practical application.

Student Learning Outcome(s):  
Students will complete metal sculpture using welding processes such as oxy-fuel and SMAW and GTAW.

WELDG/E 201  TUNGSTEN ARC WELDING I IN ADVANCED MANUFACTURING (4.5)  
Lecture: 1.5 hours / Lab: 9 hours  
This course is designed to provide students with basic performance qualification skills in Gas Tungsten Arc Welding (TIG) needed for employment in the modern manufacturing industry. This course follows AWS standardized curriculum leading to students performance qualifications to the AWS Specifications for Fusion Welding for Aerospace Applications.

Student Learning Outcome(s):  
1. All students will perform a safety inspection while identifying GTAW equipment components. 2. All students will interpret basic elements of a drawing or sketch. 3. All students will pass the welder performance qualification test (Module 3) on carbon steel.

WELDG/E 201A  WELDING-GAS AND ELECTRIC IA (1)  
Lab: 3 hours  
Basic manipulative exercises in electric welding using low alloy and mild steel materials in all positions, safety precautions, and fire prevention.

Student Learning Outcome(s):  
Student will set up and weld an overhead but joint using 6010 rod.
WELDG/E 210B WELDING-GAS AND ELECTRIC IB (1) 
Lab: 3 hours
This course will offer students an opportunity to prepare for certification testing in SMAW. There will be opportunities for improvement through supervised practice and individual coaching in SMAW technique.

Student Learning Outcome(s):
- Students use shielded metal arc welding (SMAW) techniques to weld in vertical position using a 7018 electrode.

WELDG/E 210 METAL SCULPTURING LABORATORY (2) CSU
Lab: 6 hours
Prerequisite: Welding 100.
Expand beginning welding skills and metal working techniques into an exploration of metal sculpture.

Student Learning Outcome(s):
- Student will weld a Vee Groove in the vertical position using 3/8 steel plate with 100% joint penetration, using a baking strip.

WELDG/E 251 INTRODUCTION TO ROBOTIC WELDING AND AUTOMATION (4.5)
Lecture: 1.5 hours / Lab: 9 hours
This course provides the advance knowledge needed to weld pressure vessels using the Gas Tungsten Arc Welding (TIG) process. This course follows the American Welding Society Curriculum Guide for the Training of Welding Personnel: Level II-Advance Welder, leading to welder’s qualifications outlined in the American Society of Manufacturing Engineers (ASME) Section IX Code.

Student Learning Outcome(s):
1. All students will interpret advanced elements of a drawing or sketch. 2. All student will pass the GTAW Welder’s Performance Qualification Test on Pipe in the Fixed 45° Position to AWS Standard- Level II- Advance Welder- Workmanship Test, (AWS2-5) and (AWS2-6).

WELDG/E 285 DIRECTED STUDY - WELDING GAS AND ELECTRIC (2)
Lecture: 2 hours
This course allows students to pursue a directed study in welding technology on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
- The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in plumbing technology.

WELDG/E 385 DIRECTED STUDY - WELDING GAS AND ELECTRIC (3)
Lecture: 3 hours
This course allows students to pursue a directed study in welding technology on a contract basis under the direction of a supervising instructor.

Student Learning Outcome(s):
- The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in plumbing technology.

WELDG/E 941 COOPERATIVE EDUCATION - WELDING GAS AND ELECTRIC (4) CSU RPT 3
Lecture: 4 hours
Cooperative Education is a work experience program involving the employer, the student-employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcome(s):
- The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.
NON CREDIT COURSES

BASIC SKILLS

BSICSKL 002CE  BASIC ENGLISH SKILLS (0) NDA RPT 9
This course focuses on basic listening, reading, speaking, and writing skills for students with minimum English language skills.

Student Learning Outcome:

Students will be able to:
1. Demonstrate knowledge of introductory grammatical conventions in their writing.

BSICSKL 008CE  FOUNDATIONS: CRITICAL THINKING (0) NDA RPT 9
This course will help foster students' habits of mind and character that are required to develop a generous receptivity to new ideas, from whatever source and a disposition for applying the most rigorous criticism to all ideas and institutions. Critical thinking is central to student success in college, career and in life-long communication and leadership.

Student Learning Outcome:

Student will be able to:
1. Carefully interpret, analyze, and evaluate evidence, statements, graphics, questions, etc.
2. Construct well supported, clearly articulated, and sustain arguments to justify conclusions.
3. Construct clearly defined vision of success in college and career.

BSICSKL 023CE  COLLEGE AND SCHOLASTIC ASSESSMENT PREPARATION (0) NDA RPT 9
This course provides students with study, computational, writing, and critical thinking skills to prepare for the college assessment test.

Student Learning Outcome:

Students will be able to:
1. Writing – Students will compose a grammatically correct and coherent written summary and response to assigned material
2. Reading—Students will identify authorial intent, main ideas, and supporting details in various texts read silently and aloud.
3. Students will develop effective study, note-taking, organization, communication, critical thinking, and learning skills that support their success in college and vocation.
4. Calculate whole numbers, fractions, mixed numbers, and decimals through addition, subtraction, multiplication and division functions.
5. Determine and employ the necessary sequence of steps to solve and graph algebraic linear equations.
6. Select and use appropriate units to estimate and calculate measurements of an area and volume of geometric figures.
7. Recognize and interpret math vocabulary and cues to set up and correctly solve math word problems related to whole numbers, fractions, decimals, signed numbers, algebra and geometry.

BSICSKL 035CE  BASIC MATH SKILLS (0) NDA RPT 9
This course is designed to strengthen basic math skills. Topics include properties, rounding, estimating, comparing, converting, and computing whole numbers, fractions, decimals. Upon completion, students should be able to perform basic computations and solve relevant mathematical problems.

Student Learning Outcome:

Students will be able to:
1. Perform basic computations and solve relevant mathematical problems.

BSICSKL 042CE  SOFTSKILL BASICS 1B - THE SUCCESSFUL JOB SEARCH (0) NDA RPT 9
This course covers the basic knowledge and skills necessary for gaining employment. Topics include telephone contact of prospective employers, resume writing, employer expectations, and interviewing skills.

Student Learning Outcome:

Students will be able to:
1. Create a portfolio that includes resume, cover letter, and reference sheet

BSICSKL 043CE  SOFTSKILL BASICS 1C - PRE-EMPLOYMENT READINESS (0) NDA RPT 9
This course provides an introduction for starting successful employment or a new job. Topics include: making good first impressions, basic workplace expectations, developing good work habits, time management, communication skills, dealing with job-related stress, and techniques for good interpersonal relationships.

Student Learning Outcome:
Graduation Requirements and Educational Programs

Students will be able to:

1. List common interview questions and compile effective answers

BSICSKL 045CE  MICROSOFT OFFICE APPLICATION BASICS (0) NDA RPT 9
This course provides an introduction to basic functions of Microsoft Office® applications namely Word®, Excel®, Outlook®, and Powerpoint®.

Student Learning Outcome:

Students will be able to:

1. Identify and demonstrate proper use of formatting tools in Microsoft Word, Excel and Powerpoint software programs.

BSICSKL 047CE  MICROSOFT WORD BASICS (0) NDA RPT 9
This course provides an introduction to basic functions of Microsoft Word®. Topics include: document management, editing techniques, and formatting text and documents.

Student Learning Outcome:

Students will be able to:

1. Demonstrate how to properly create, save, open and close MS Word documents.
2. Demonstrate proper use of common editing and formatting tools for text, paragraphs and documents including headers and footers.
3. Demonstrate proper creation and formatting of tables and data entry.

BSICSKL 050CE  MICROSOFT POWERPOINT BASICS (0) NDA RPT 9
This course provides an introduction to basic functions and features of Microsoft Powerpoint ®. Topics include: PowerPoint ® definitions and terminology, using fonts, colors, graphics, and much more!

Student Learning Outcome:

Students will be able to:

1. Use common MS PowerPoint screen elements and the different views.
2. Create MS Powerpoint presentations using the various templates, designs, layouts and formatting and animation tools.
3. Create notes and outlines and print their desired handouts from their MS Powerpoint presentations.

BSICSKL 051CE  INTERNET BASICS (0) NDA RPT 9
This course provides an introduction to basic functions and features of the internet. Topics include internet providers, web browsers, and search engines, navigating the internet, methods for handling worms and viruses, and more.

Student Learning Outcome:

Students will be able to:

1. Demonstrate ability to exchange messages and documents through email.

BSICSKL 054CE  SOFTSKILL BASICS 3A - CUSTOMER SERVICE & RELATIONS (0) NDA RPT 9
This course introduces basic customer service and relations skills. Topics include principles of customer service and relations, employee responsibilities in customer relations, communication skills, handling customer complaints, telephone skills, and using new technologies related to customer service.

Student Learning Outcome:

Students will be able to:

1. Demonstrate effective customer service and relations skills.

BSICSKL 055CE  SOFTSKILL BASICS 3B - IMAGE, ETIQUETTE, AND INTERPERSONAL COMMUNICATIONS (0) NDA RPT 9
This course covers the interpersonal and professional image skills necessary for succeeding in the workplace. Topics include basic business manners and etiquette, interacting with people or “people skills”, how to develop a professional image, problem solving, and handling workplace conflict.

Student Learning Outcome:

Students will be able to:

1. Demonstrate basic business manners and etiquette.
2. List the concepts, attributes and importance of professional self-image.
3. Demonstrate effective communication, interpersonal and listening skills.
4. Demonstrate effective steps and techniques to resolving conflict in the workplace.

BSICSKL 060CE  BASIC COMPUTER LITERACY (0) NDA RPT 9
This course introduces basic computer components and functions including computer hardware, software, using the internet, operating systems, and software applications, (e.g. word processing, spreadsheets, email and communications).

Student Learning Outcome:

Students will be able to:

1. Identify and utilize the main parts of the computer, monitor, keyboard, mouse, tower, port, disk drive, printer, etc: install software, and identify and use computer icons.
2. Strengthen skills in text entry, formatting, spell check, and grammar checking; bulleted, numbering and making tables in Microsoft Word.
GRADUATION REQUIREMENTS AND EDUCATIONAL PROGRAMS

BSICSKL 065CE  FINANCIAL LITERACY - CREDIT BASICS (0) NDA

This course develops a foundation of credit management concepts to enable students to understand credit management, credit risk management, lending objectives, and how to measure credit risk. The course also describes the credit rating systems and discusses the impact of deferred and defaulted education loans on credit scores.

Student Learning Outcome:

Students will be able to:

1. Develop a plan for improving credit scores and managing education loans within a one-year timeline.

BSICSKL 066CE  FINANCIAL LITERACY - PERSONAL MONEY MANAGEMENT (0) NDA

This course develops a foundation of money management concepts to enable students to understand how to develop a financial plan to meet their educational goals using various strategies: FAFSA, BOGG, scholarships, social fund raising and banking products, such as checking and savings accounts.

Student Learning Outcome:

Students will be able to:

1. Identify the various strategies to fund higher education while balancing personal financial responsibilities.

BSICSKL 073CE  INDUSTRY OVERVIEW AND CAREER OPPORTUNITIES (0) NDA

This course provides students with the basic information about the targeted industry and sectors they are focused on for their career, including essential facts, key institutions, history, career pathways and trends. This course provides students with the basic research and networking skills to become well-informed job seekers so they can effectively prepare for their career and become employed.

Student Learning Outcome:

Students will be able to:

1. Identify and discuss the structure, key employers and career options and paths within the target industry.

BSICSKL 074CE  EMPLOYMENT TEST PREPARATION (0) NDA

This course is designed to review construction and utility sector employment entry requirements and expectations. The course will include the review of test-taking, math, reading, writing skills, and industry expectations to prepare students for employment in various construction and utility sector job classifications. This course includes a module specific to civil service exam preparation.

Student Learning Outcome:

Students will be able to:

1. Compose a grammatically correct and coherent multi-paragraph response to a prompt.

2. Develop and utilize effective study, note-taking organization, communication, critical thinking, and learning skills that support their success in college and in their career.

3. Correctly solve numerical and word problems related to whole numbers, fractions, decimals, signed numbers, algebra and geometry.

BSICSKL 075CE  INTRODUCTION TO POST-SECONDARY EDUCATION (0) NDA

This course introduces students to the opportunities and benefits post-secondary education offers them. This course helps dispel many of the myths and reduce information overload that may discourage students and their caregivers from applying to and attending post-secondary education institutions. Students will learn tips and strategies that will help them select and successfully apply to and enroll in post-secondary institutions that best fit their educational and career goals and needs.

Student Learning Outcome:

Students will be able to:

1. Express familiarity with the purpose of the various levels of post-secondary education and begin to identify how it relates to their educational and career goals.

2. Navigate the college campus and access various campus resources through the college website, catalog, departments and student service programs.

3. Identify the purpose and difference between the Accuplacer, and the TABE locator tests and determine which test(s) best fit(s) their academic goals and financial needs at the time of orientation.

4. Utilize TABE locator test scores to develop their strategy for strengthening their English and Math basic skills.

5. Develop a higher level of comfort in building relationships and communicating with faculty and staff to become more connected to the college community.
BSICSKL 077CE  FUNDAMENTAL FOR WORKPLACE SUCCESS - TEAMWORK (0) NDA

This course will prepare students to successfully collaborate and work effectively with their colleagues and co-workers in diverse settings by strengthening their employability, interpersonal and leadership skills. Students will gain insights about themselves and learn new tools and strategies that optimize their strengths and help them increase their effectiveness and efficiency at work.

Student Learning Outcome:

Students will be able to:

1. Describe the 4 elements of the (O.R.I.D.) critical thinking process, distinguish between fact and interpretation, analyze and evaluate information, and utilize the elements in solving problems or making decisions.

BSICSKL 078CE  FUNDAMENTALS FOR WORKPLACE SUCCESS II - EFFECTIVE COMMUNICATION AND LEADERSHIP SKILLS (0) NDA

This course gives students the opportunity to develop their listening, communication and leadership skills appropriate for the workplace in a supportive and interactive environment. Students will be introduced to skills that can help them become active, purposeful listeners and more effective communicators and leaders for career success.

Student Learning Outcome:

Students will be able to:

1. Analyze data using the Inter-Relationship Diagram (IRD) collaborative process tool in organizing, coordinating, and participating in simulated team project management activity.

ENGLISH AS A SECOND LANGUAGE - NONCREDIT

ESL NC 006CE  ENGLISH AS A SECOND LANGUAGE - 0 (0) NDA RPT 9

This open entry exit course emphasizes listening/speaking skills, and reading/writing skills at a literacy level. The focus of the course is on basic survival English skills, English sound/symbol correspondence, and reading and writing of simple English sentences.

Student Learning Outcome:

Students will be able to:

1. Demonstrate the rules of reading and comprehension of the basic written and spoken English language related to daily life in America.
2. Demonstrate the proper punctuation, mechanics and grammar for the English language related to daily life in America.

ESL NC 008CE  ENGLISH AS A SECOND LANGUAGE - (0) NDA RPT 9

This is an open entry open exit course, which emphasizes listening/speaking and reading/writing skills at a high-beginning level. This class focuses on comprehending and engaging in extended conversations related to familiar contexts. Students read simple authentic or adapted narrative and descriptive passages and use basic grammatical structures to write short, clearly organized paragraphs and messages.

Student Learning Outcome:

Students will be able to:

1. Demonstrate ability to use listening and speaking skills to engage in basic survival skills in the home, social and work environment.
2. Demonstrate ability to use reading and writing skills to engage in basic survival skills in the home, social and work environment.

ESL NC 010CE  VOCATIONAL ENGLISH AS A SECOND LANGUAGE (0) NDA RPT 9

This ESL course is primarily for limited English speaking students who need to learn and enhance their English survival skills necessary for the working world. Instruction will focus on proper grammar and pronunciation, safety, queries, and verbal and written reports.

Student Learning Outcome:

Students will be able to:

1. Demonstrate the rules of reading and comprehension of the basic written and spoken English language related to daily life in America.
2. Demonstrate the proper punctuation, mechanics and grammar for the English language related to daily life in America.
ESL CIVICS

ESLCVCS 010CE  ESL AND CIVICS 1 (0) NDA RPT 9
This competency based open entry citizenship course introduces the U.S. history and government with appropriate English vocabulary and structure for ESL students who are preparing to take the U.S. Citizenship examination.

Student Learning Outcome:
Students will be able to:
1. Demonstrate understanding of applicable English vocabulary.
2. Demonstrate knowledge of applicable U.S. history and citizen concepts related to the U.S. Citizenship examination.

ESLCVCS 013CE  ESL AND CIVICS IV (0) NDA RPT 9
This is an open-entry/open-exit course. This course is intended for English speakers at an intermediate level. Intermediate low listening, speaking, reading, and writing skills are emphasized. Learners engage in discussions on education and early United States history.

Student Learning Outcome:
1. Students will identify and differentiate the public education system from preschool through the community college system.
2. Students will be able to evaluate and correctly respond to questions related to U.S. history.
3. Students will be able to express thoughts and ideas in well-developed paragraphs and short essays using proper grammar.

VOC ED 311CE  WORKPLACE SAFETY: FIRST AID/CPR BASICS (0) NDA RPT 3
This course combines lecture, demonstrations, video and hands-on practice to provide students with the knowledge and skills necessary to obtain their OSHA 10 hour safety certification and to recognize and provide basic care for injuries and sudden illnesses at their workplace until advanced medical personnel arrive and take over. The course materials and hours are consistent with and meet American Heart Association, American Red Cross and National Safety Council certification requirements.

Student Learning Outcome:
1. Recognize appropriate training requirements and training methods for CPR/First Aid/AED
2. Define OSHA specific construction terms such as: competent person, construction work, confined space, working space, general duty clause.
Academic Probation

After attempting 12 units, a student whose cumulative grade-point average falls below 2.0 is placed on academic probation. A student whose cumulative grade point average falls below 2.0 for three consecutive semesters is subject to dismissal from the College.

Academic Renewal

A student may initiate a petition to have his/her record reviewed for the removal of grade(s) from their permanent record for the purpose of computing the grade-point average. A student must meet specific conditions and may have a maximum of 18 units removed.

Add Permit

A form issued by an instructor which permits the student to add the class if the instructor determines that there is room. Enrollment in the class is official only if the add permit is processed by the office of Admissions and Records.

Advisory

An advisory is condition of enrollment that a student is advised (but not required) to meet before, or in conjunction with, enrollment in a course.

Appeal

A student request for reconsideration of a decision made affecting disciplinary action, grade change, prerequisite challenge, etc.

Assessment

Assessment is the process the college uses to evaluate student skills in areas such as Reading, English and English as a Second Language (ESL), and Mathematics.

ASO (Associated Student Organization)

An organization which all enrolled students are eligible to join.

Associate Degree

A degree (Associate in Arts, A.A., or Associate in Science, A.S), granted by a community college which recognizes a student’s satisfactory completion of an organized program of study consisting of a minimum of 60 degree applicable semester units.

Audit

A student’s attendance in a class with permission of the instructor and payment of a fee. No college credit nor grade is given.

CalWORKS Program

CalWORKs (California Work Opportunity and Responsibility to Kids) program offers training and support services to students receiving TANF (Temporary Assistance to Needy Families), previously AFDC.

Catalog Rights

Catalog rights refer to the right of every continuing student to choose one, and only one, catalog under whose course requirements the student is to be evaluated for the purpose of determining whether the student meets the requirements for graduation or for certification to transfer to UC or CSU. The continuing student may select the catalog which was in effect when the student initially enrolled at LATTC, or the catalog in effect when the student petitions for graduation or transfer certification.

Certificate of Achievement

Programs designed for students who are looking for instruction with a
high degree of specialization. Certificates of Achievement vary in length and may require less than two years of full-time study, and may be pursued on a part-time basis. At the point of completion, students may request the issuance of a Certificate of Achievement.

Certificate of Completion

A document confirming that a student has completed a program or sequence of noncredit courses that prepares him or her to progress in a career path or to undertake degree-applicable or nondegree-applicable credit courses.

Certification of CSU General Education Requirements

Completion of a body of transfer courses which meet the general education requirements of the California State University system (CSU).

Concurrent Enrollment

A student may enroll in two mutually dependent courses within the same semester and/or may be simultaneously enrolled at both LATTC and a K-12 or another college.

Continuing Student

A student who maintains continuous attendance which is defined as no more than one semester absence within a school year, excluding Summer Sessions and Winter Intersessions.

Cooperative Education

An instructional program that is designed to complement the student’s academic training with on-the-job experiences.

Corequisite

A condition of enrollment consisting of what course a student is required to simultaneously take in order to enroll in another course.

Counseling

Guidance provided by professional counselors in academic, vocational, and personal matters.

Course

A subject of study identified by Title and Number; for example: Art 101.

Credit by Examination

Credit granted for proficiency accomplished through testing.

Dismissal

A student on academic or progress probation for three semesters may be dismissed from the College. Once dismissed, the student may not attend any college within the Los Angeles Community College District for a period of one year and must petition for re-admittance at the end of that period of time.

Drop

A student’s official withdrawal from a class.

Elective

Courses recommended for a given major in addition to prescribed requirements.

Full-Time Student

A student enrolled and active in 12 or more units during the Fall or Spring Semester.

General Education Requirements

A group of courses from several subject areas which are required for graduation by state law.

Grade Point

The numerical value of a college letter grade. A=4, B=3, C=2, D=1, F=0, times the number of units of the course: An “A” in a 5 unit course equals 20 points.

Grade-Point Average (GPA)

The GPA is determined by dividing the total grade point earned by the
number of attempted units.

IGETC (Intersegmental General Education Transfer Curriculum)
Completion of all the requirements in the Intersegmental General Education Transfer Curriculum (IGETC) will permit a student to transfer from a community college to a campus in either the California State University or the University of California system.

INC (Incomplete)
The administrative symbol “INC” is recorded on the student’s permanent record in special situations in which the student has not been able to complete a course due to circumstances beyond the student’s control.

IP (In Progress)
A symbol which indicates a course which continues over parts or all of two semesters.

Lower Division
College courses at the freshman and sophomore levels.

Major (Program of Study)
A concentration of study in a specified discipline.

MW (Military Withdrawal)
This occurs when a student who is a member of an active or reserve United States military service receives orders compelling a withdrawal from courses. Upon verification of such orders, a withdrawal symbol may be assigned at any time after the last day of the fourteenth week of instruction or 75% of the time the class is scheduled to meet, whichever is less.

NDA (Non-Degree Applicable)
Credit courses that do not apply toward a degree and are not transferable.

Non-Penalty Drop Period
The first two weeks of a regular Fall or Spring semester during which a student’s enrollment in a class is not recorded on the student’s permanent record if the student drops by the deadline. This deadline will be different for short term and summer session courses.

Pass/No-Pass
A form of grading whereby a student receives a grade of Pass (P) or No Pass (NP) instead of an A, B, C, D, or F. A grade of “P” is assigned for class work equivalent to a “C” or above. “NP” denotes work below a grade of “C.”

Prerequisite
A condition of enrollment that a student is required to meet in order to demonstrate current readiness for enrollment in a course or educational program.

Progress Probation
A student will be placed on progress probation if, after enrolling in 12 units, the total number of units for which a W, NP or INC has been assigned equals 50 percent or more of the units enrolled.

RD (Report Delayed)
This temporary administrative symbol is recorded on the student’s permanent record when a course grade has not been received from the instructor. It is changed to a letter grade when the grade report is received.

Returning Student
A previously enrolled student who did not attend the College during the previous two semesters. Attendance during the summer session is not included in this determination.
Satisfactory Completion
Completion of a course with a grade of "C" or better.

Schedule of Classes
A schedule giving directions for enrollment and detailed information about the times, locations, and instructors of the classes to be offered. It is issued before the beginning of each semester and summer session.

Units Attempted
Total number of units in courses for which a student was ever actively enrolled.

Units Completed
Total number of units in courses for which a student received a grade of A, B, C, D, or P.

Units Enrolled
Total number of units in which the student is enrolled at the end of the non-penalty drop period, which is the total number of units for all courses appearing on the student’s transcripts.

W
An administrative symbol assigned to a student’s permanent record for all classes which a student has dropped or has been excluded from by the instructor after the end of the non-penalty drop date, but by the last day to drop.

Withdrawal
The action a student takes in dropping all classes during any one semester and discontinuing coursework at the College.

Substandard Grade
An earned grade of “D” or “F”.

Transcripts
A student’s permanent record and an official list of all courses taken at a college or university showing the final grade received for each course.

Transfer
A student may change from one collegiate institution to another after having met the requirements for admission to the second institution.

Transfer Courses
Courses designed to match lower-division courses of a four-year institution and for which credit may be transferred to that institution.

Transferable Units
College units earned through satisfactory completion of courses acceptable for credit at a four-year college or university (e.g. UC – University of California, CSU – California State University)

Units
The amount of college credit earned by satisfactory completion of a specific course taken for one semester. Each unit represents one hour per week of lecture or recitation, or a longer time in laboratory or other exercises not requiring outside preparation.

Full Time Faculty and Administration

Abraham, Angeles (2005)
Academic Treasurer
Associate Professor, Counseling
Director & Counselor, EOPS
Coordinator - Student Support Program
B.A., CSU, Dominguez Hills
M.A., Loyola Marymount University

Acosta, Manuel

Ahmad, Jamil (2000)
Professor, Business Economics
B.A., Panjab University, Lahore
M.A., Dhaka University, Dhaka, Bangladesh
M.B.A., University of Texas Pan-American, Edinburg, Texas

Ahn, Inhae (2007)
Department Chair, Counseling
Associate Professor, Counseling
B.S., SUNY at Buffalo
M.S., CSU, Northridge
MBA, University of Nevada, Las Vegas
Licensed MFT

Aguilar, Julieta (2016)
Instructor, Biology
B.S., CSU, Northridge
PhD, UC Berkeley

Aguilar, Carlos (2013)
Instructor, Sign Graphics

Alcala, Carlos (2010)
Instructor, Fashion Design
A.A., Los Angeles Trade-Technical College

Alvarez, Jaime (2016)
Instructor, Construction/Carpentry

Anderson-Houlihan, Carole (1994)
Department Chair, Design & Media Arts, Co-op
Instructor, Fashion Design
A.A., Los Angeles Trade-Technical College
B.V.E., CSU Los Angeles

Ashby, Cynthia (2007)
Associate Professor, Nursing
B.S.N., St. Mary’s College
M.S.N., University of Phoenix

Avila, Luis (2009)
Assistant Professor, Math
B.S (physics), M.S. (Mathematics), CSU Los Angeles

Bailey, Paulette (2000)
Professor, CAOT-Business
B.S., Grambling State University
M.S., CSU, Dominguez Hills
MOUS Certified

Bakman, Dr. Anna A (1999)

Professor, Mathematics
M.S., Ph.D., Moscow University of Railing Transport

Barcoft, Thnith (2016)
Associate Professor, Counseling

Barnett, Craig J. (1987)
Professor, Refrigeration & Air Conditioning
M.S. University of Maryland
California State Contractors Licenses: C20 & C38

Barajas, Leticia (2005)
Vice President, Academic Affairs & Workforce Development
B.A., UC Irvine
M.P.A., CSU Dominguez Hills

Bentley, Mara (2012)
Associate Professor, Psychology
B.A., CSU Long Beach
M.A., Pepperdine University

Bird, Bethany (2013)
Assistant Professor History
B.A. CSU Dominguez Hills
M.A. CSU Dominguez Hills
M.A. American University System

Blake, George (2016)
Instructor, English
B.A., Morgan State University
M.A., Morgan State University

Braxton, Phyllis (2016)
Counselor, Counseling

Brent, Lourdes M. (1996)
Professor, Counseling
Coordinator, Volunteer Program
B.A., Immaculate Heart College
M.S., Mount St. Mary’s College

Botma, Scott (2013)
Assistant Professor, Cosmetology
B.S. University of Phoenix

Brown, Stephen (2010)
Instructor, Nursing
ADN, Santa Ana College

Professor, Health Kinesiology
B.A., Duke University
M.A., University of Florida

Professor, Counseling
Counselor, CARE
EOPS Coordinator
B.S., CSU Dominguez Hills
M.A., National University

Burke, Dennis C. (2006)
Professor, Electrical Construction & Maintenance
B.S., Los Angeles Trade-Technical College
Electrical Contractors License C-10

Burnett, Maurice L. (2006)
Professor, Counseling
AA., El Camino College
B.A., CSU Dominguez Hills
M.S.W., Howard University

Buscaglia, Renatta (2003)
Instructor, Spanish
A.A., Rio Hondo College
B.A., M.A., CSU Los Angeles

Cajayon, Dr. Chito (2016)
Dean, Workforce Development (SFP)
B.S., CSU Long Beach
M.P.A., CSU Dominguez Hills
Ph.D., University of Southern California

Campbell, Deborah N. (2007)
Associate Professor, Counseling
B.A., Whittier College
M.A., San Diego State University

Chang, Che’ (2005)
Associate Professor, Welding
B.S., M.A., CSU, Long Beach
A.S. Welding, Los Angeles Trade-Technical College

Chandler, Christine C. (2007)
Associate Professor, Nursing
B.S.N., CSU Los Angeles
M.S.N., CSU Long Beach

Chavez, Eric (1984)
Professor, Electronics
A.S., East Los Angeles College
B.S., M.A., CSU Los Angeles

Cheang, Michelle

Chen, Lina (1988)
Professor, Cosmetology
B.A., University of Taiwan
Certificate, Pomona Valley Vocational College
Licensed Cosmetologist, State of California

Cioffi, Gabriel (1996)
Professor, Refrigeration & Air Conditioning
B.S., Los Angeles Valley College
B.S., CSU, Los Angeles
M.P.A., CSU, Northridge
Contractor’s License, C20 & C38

Los Angeles Trade-Technical College 2016 - 2018 GENERAL CATALOG
Dam, Marie Christine
Assistant Professor, Cooperative Education

Cole, Dr. Linda Eva (1994)
Director, GAIN/CalWORKs Program
Professor, Counseling
B.A., Douglass College, Rutgers University
M.A., P.D., New Jersey City University
Ph.D, Bible Believers College & Seminary

Cordero, Maggie (2016)
Associate Dean, EOPS/CARE/CAYFES
B.S., University of Southern California
J.D., Syracuse University

Cruz, Cindy (2016)
Instructor, English
B.A., CSU Long Beach
M.A., CSU Long Beach

Damaso, Stacy (2008)
Instructor, Culinary Arts
A.A., Diablo Valley College
B.S., Cal Poly Pomona
CEPC Certification ACF

Davis-Kendrick, Maggie (2007)
Associate Professor, Nursing
B.S.N., CSU Dominguez Hills
M.N., Regis University

Dawkins, Thomas (1988)
Counselor, Counseling
Professor, Counseling
B.A., Ripon College, Wisconsin
M.S., CSU, Los Angeles

Delzeit, Linda D (1995)
Professor, Health
Kinesiology
B.A., M.A., CSU, Long Beach

Denton, Dr. Timothy (2000)
Instructor, Biology
B.A., M.S., CSU Northridge
Ph.D., UCLA

Diaz, Dr. Martin (2007)
Academic Senate 1st Vice President
Instructor, Chemistry
B.A., M.S., CSU Los Angeles
Ph.D., UCLA

Dolan, Theresa (2001)
Instructor, English
B.A., University of Massachusetts
M.A., Boston College

Dominguez, Cynthia (Cindy) (2016)
Instructor, Math
A.A., East Los Angeles College
B.A., CSU Long Beach
M.S., CSU Long Beach

Dozier, Kelly (2007)
Refrigeration & Air Conditioning Mechanics

Duarte, Ana

Dunn, Roger W. (1992)
Instructor, Carpentry
A.S., Los Angeles Trade-Technical College

Department Chair, Construction, Design & Manufacturing
Apprenticeship Coordinator, LATTTC
Professor, Electrical Construction & Maintenance
B.S., Southern Illinois University
M.A., CSU Dominguez Hills

Esparza, David (1996)
Director, University Transfer Center
Associate Professor, Counseling
B.A., UCLA
M.A., CSU, Dominguez Hills

Evans, George (1997)
Instructor, Visual Communications
B.F.A., California Institute of the Arts

Feigenbaum, Susan B. (1991)
Instructor, Culinary Arts
A.A., Paul Smith’s College

Ferri, Brian (2005)
Instructor, Automotive Collision
A.A., Cerroitos College
I-CAN Certified
ASE Master Certified

Frank, Laurence B. (2013)
President
B.A., St. Lawrence University
J.D., UCLA School of Law

Galindo, Maryanne (2012)
Associate Professor, Noncredit Basic Skills-Interdisciplinary
B.A., CSU, Los Angeles
M.S., Union Institute & University, Ohio

Gallagher, Dr. Mary P. (2008)
Vice President, Administrative Services
B.S., Cal Poly Pomona
M.B.A., Pepperdine University
Ph.D., Claremont Graduate University

Galvan, Willie (2010)
Instructor, Plumbing
A.S., Los Angeles Trade-Technical College
Certified Green Plumbing Trainer
Certified BPI Trainer
Nate Certified

Gamlowski, Robert
Assistant Professor, Fashion Design

Gangel-Vasquez, Janice (2000)
Department Chair, English/ESL
Associate Professor, English
B.S., CSU Long Beach
M.A., CSU Dominguez Hills

Garnica, Edith (2016)
Instructor, Culinary Arts

Gary, Dr. Karl L. (2002)
Professor, Paralegal
B.A., Occidental College
M.B.A., J.D. Willamette University
Licensed Attorney, State of California

Gee, Dr. Angela (2012)
Assistant Professor, Biology

B.A. UC Berkeley
Ph.D., Columbia University

Glass-Villalobos, Nurit (2005)
Instructor, Fashion Design
A.A. Los Angeles Trade-Technical College

Glavan, Dr. John (2006)
Department Chair, Language Arts/Humanities
Associate Professor, Communications Studies
(formerly Speech)
B.A., University of San Francisco
M.A., Pepperdine University
Ph.D., Oregon State University

Goldstein, Benjamin (2015)

Golzuba, Brano (2008)
Associate Professor, Electrical Construction & Maintenance
A.S., Los Angeles Trade-Technical College
Electrical Contractor’s License C-10

Guerra, Carlos (2016)
Instructor, Diesel & Related Technology
A.S., Los Angeles Trade-Technical College

Guerra, Jesus “Jess” (2005)
Department Chair, Advanced Transportation and Manufacturing Technologies
Professor, Diesel and Related Technology
A.S., Los Angeles Trade-Technical College

Guerrieri, Joseph (2007)
Instructor, Design & Media Arts
B.A., University of Virginia
M.F.A., U.S.C.

Guthrie, Ralph T. (1993)
Instructor, Sign Graphics
A.A., Los Angeles Trade-Technical College
Emeritus

Hardy, LaTanga (2012)
Director, Child Development Center
Assistant Professor, Child Development
B.A., M.S., M.A. CSU Northridge

Herbert, Pamela Jo (1980)
Instructor, Fine Arts

Hermosillo, Angelica (2016)
Counselor, Counseling
A.A., American River College
B.A., UCLA
M.S., CSU Northridge

Hopper, Michael L. (2008)
Counselor, GAIN/CalWORKs
Assistant Professor, Counseling
B.A., M.S.W., San Francisco State University

Hosseini, Ashraf (1999)
Professor, Counseling
Counselor, Counseling
B.S., Coc College, Iowa
M.S., U.S.C
M.F.T. Certification

Full Time Faculty and Administration

Rojas, Carlos (2011)
Assistant Professor, Diesel & Related Technologies
A.S., Los Angeles Trade-Technical College

Romero, Sally (2013)
Assistant Professor, Library Science
B.A., CSU Fullerton
MLS, San Jose State

Roosta, Soraya (1998)
Professor, Electronics
B.S., University of Colorado
M.S., Gannon University, Erie, PA

Department Chair, Library
Associate Professor, Library Science
B.A., UCLA
MLS, San Jose State University

Shackelford, Sondra (2000)
Associate Professor, Cosmetology
A.A., Pasadena City College
B.S., University of South Illinois
M.A., Cambridge College
Licensed Cosmetologist, State of California

Shakir, Rashidah (2000)
Associate Professor, English
B.A., Spelman College
M.A., Michigan State University

Shibuya, Steven T. (1999)
Professor, Machining Technology
A.A., Ventura College
B.S., CSU, Long Beach

Shields, Dr. Virgil (2015)
Assistant Professor, Physics

Siccardi, Maria (2016)
Instructor, Fashion Design
A.S., Los Angeles Trade Technical College

Simpson-Rodgers, Nii (2008)
Instructor, Mathematics
B.S., M.S., CSU Long Beach

Counselor, EOPS
Instructor, Counseling
B.A., U.S.C.
M.A., Loyola Marymount University

Slade, Timothy

Smith, Dorothy (1977)
Dean, Student Services
B.A., M.A., North Carolina A&T State University

Sonnier, Dr. Greta D. (2012)
Assistant Professor, Business

S.B., University of La Verne
M.B.A., CSU Pomona
J.D., University of La Verne
Licensed Attorney, State Bar of California
Certified Mediator

Sowter, Sally (2016)
Instructor, English
B.A., UC Berkeley
M.A., CSU, Long Beach

Spear, George (1976)
Assistant Professor, Automotive Technology
A.S., Los Angeles Trade-Technical College

Spence Roslyn (2008)
Instructor Culinary Arts
Grand Diploma: Cordon Bleu Culinary School, Paris
B.A., California State University, Long Beach

Sullivann, Dr. Sally, (1997)
Professor, Health & Kinesiology
(formerly Physical Education)
A.A., Santa Monica College
B.A., M.A., PhD., USC

Sweeten, Christopher (2016)
Dean, Pathway & Student Affairs

Sylevs, Anthony

Tarrant, Dr. Kaneeshia (2014)
Vice President, Student Services
B.S., M.S. Boston University
Ed.D U.S.C.

Tishler, Sheila D. (1992)
Professor, Counseling
B.A., UCLA
M.A., Azusa Pacific University

Uchida, Hiroshi (1985)
Professor, Electrical, Construction & Maintenance
B.A., Clarsmont McKanna College

Uribe, John (1998)
Instructor, Automotive Technology
A.S., Los Angeles Trade-Technical College

Vachon, Jerry (2008)
Instructor Culinary Arts
AS Culinary Institute of America
BS Ohio Dominican
CEC Certification ACF

Vaden, Dr. Bradley D. (2001)
Instructor Political Science
B.A., Brigham Young University
Ph.D., University of Hawaii

Vega, Cecilia (2004)
Associate Professor, Child Development
B.A., M.A., CSU Northridge

Velez, Magda (2016)
Instructor, American Sign Language

Villegis, Carmen (2012)
Instructor, English
B.A., M.F.A., CSU Long Beach

Villora, Dr. Rosalie (2007)
Associate Professor, Nursing
B.S.N., M.N., UCLA

Walker, Thomas “T.J.” (2013)
Instructor, Fashion Design
A.A., Meridian Junior College
B.A., Delta State University
M.A., Louisiana Tech University

Wagenbach, Michael (1994)
Instructor, Health Kinesiology
B.A., M.A., CSU, Long Beach

Associate Professor, Nursing
B.S.N., CSU Northridge
M.S., CSU Northridge

Instructor, Fashion Design
A.A., Los Angeles Trade-Technical College
B.A., San Diego State University

Wells, Richard L. (1979)
Professor, Health Kinesiology
B.A., Whittier College
M.A., Azusa Pacific College

Wemischner, Robert B. (1992)
Instructor, Culinary Arts
B.A., University of Pennsylvania

Wilson-Aus, Aileen (2012)
Assistant Professor, Business
B.A., Loyola Marymount
M.B.A., Azusa Pacific University

Wong, Ricky K. (1992)
Professor, Biology & Microbiology
B.S., University of Hawaii at Manoa
M.S., CSU, Los Angeles

Professor, Automotive Related Technology
A.A., East Los Angeles College

Yasuda, Kathleen (2003)
Consulting Instructor - Labor Studies

Young, Carolyn (2016)
Instructor, Cosmetology
A.A., Los Angeles Trade Technical College

Zarpas, Ani (2016)
Dean, Pathways, Innovation & Institutional Effectiveness
B.A., CSU Northridge
M.A., CSU Northridge

Zapata, Carmen (2012)
Assistant Professor, Business

B.A., M.F.A., CSU Long Beach

EMERGENCY INFORMATION

The college is concerned about your safety in case of an emergency. De
Detailed instructions are posted in every classroom and throughout the
LATTTC campus. Additionally, you may visit the Environmental Health and
Safety Website for more information: http://college.lattc.edu/ehs/

In case of emergency, remember these key points.

- Secure yourself
- Assess the situation
- Forward information
- Enact according to the campus Emergency Evacuation Plan

EMERGENCY RESPONSE INFORMATION

LATTC-Sheriff Telephone Numbers for Emergency

In case of an emergency, you should immediately contact the College’s
Sheriff’s Office on campus.

- Dial Ext 3611 or 911 to reach the College Sheriff’s office from any
  campus phone.
- You also may dial 911 to reach the sheriff’s office.
- You may also press the extension button marked “EMERGENCY”, on
  all campus phones.
- Pick up the campus emergency blue telephone station “dial direct” to
  the College Sheriff’s Office.
- If you use your cell phone you may dial 213-763-3611 to connect to the
  College Sheriff’s office.

Please note if you dial 911 from your cell phone or pay phone on campus, it
will not connect directly to the College Sheriff’s, but it will connect to outside
emergency services.

MEDICAL EMERGENCY

- Call the College Sheriff if the injury is life threatening and calmly
  provide detailed information to the Sheriff’s Office.
- Stay on the line to answer any questions.
- Comfort the injured person by talking to them until help arrives.

BOMB THREATS

Bomb threats are usually received by telephone.

The person receiving a bomb threat should remain calm and attempt to obtain
as much information as possible from the caller by using the “TELEPHONE
THREAT” listed below.

Call the Sheriff’s Department ext. 3611(from your mobile phone dial 213-
763-3611). Give your name, location and telephone number. Inform the
dispatcher of the situation, including any information you may have as to the
location of the bomb, time it is set to explode, and time when you received
the call.

Inform your supervisor and/or department head.

SUSPICIOUS OBJECT OR PACKAGE

In the event a suspicious object or potential bomb is observed on campus, do
not handle the object. Immediately clear the area and call the college sheriff
office at ext. 3611(from your mobile phone dial 213-763-3611)

EARTHQUAKE

In the event of earthquake:

- Stay Calm.
- If inside
  - Stay inside.
  - IMMEDIATELY get away from windows and large objects that may
topple; DROP, COVER, and HOLD ON
  - DROP to the ground.
  - COVER by getting under a sturdy desk or table, and
  - HOLD ON to it until the shaking stops.
- If outside
  - Stay outside.
  - Go to your designated evacuation area on campus, away from
buildings, trees, and power lines.

FIRE/SMOKE

If you detect fire or smoke

- Immediately activate the nearest fire alarm pull station.
- Call the College Sheriff and notify them of the location of the fire.
- If you hear a fire alarm
  - Immediately EVACUATE the area.
  - Turn off all equipment and close doors as you leave.
  - Proceed to the nearest exit and to your designated “Evacuation Area”.
  - Remain calm and await further instructions.

ELEVATOR ENTRAPMENT

If you become trapped in an elevator, remain calm.

- Press the red emergency button to activate the audible elevator alarm
  system which automatically notifies College Sheriff and Physical Plant
  Ext: 3612, then
- Wait for qualified personnel to respond and assist. DO NOT ATTEMPT
  TO STEP OFF THE ELEVATOR unless specifically instructed to do so.
You are responsible for knowing LATTC parking rules and regulations. This information is intended to provide students with basic guidelines on parking at the college. Student Parking Guidelines may be obtained from the LATTC Sheriff's Station, Cypress Hall D-150, the Business Office, Juniper Hall ST-Lobby, and the Administrative Services Office, Juniper Hall ST-305.

- Student parking regulations are enforced starting the first day of classes each semester through final examinations. A student parking decal is valid for the current academic term only and must be displayed at all times a vehicle is parked on college property, Saturday and Sunday parking rules and regulations are enforced in the same manner as weekdays.
- Parking decals are made of removable mylar and should be affixed to the inside rear window, (lower right side, facing outward). Vehicles with tinted rear windows may display the decal in the lower right or lower left front window. Any vehicle displaying a decal which is expired, altered, restored lost or stolen, or not completely visible is subject to a citation.
- A valid college parking decal and a DMV placard must be displayed on any vehicle parked in a designated disabled stall.
- Regulations governing disabled parking, red curbs, no-parking zones, fire lanes, special permit areas, and areas that have parking time limitations are enforced 24 hours a day, including weekends and holidays. Failure to display a parking decal or parking in an area not authorized for student parking, including designated staff lots and levels and reserved spaces will result in the issuance of a citation. Negligently parked vehicles may be towed away at owner's expense.
- All traffic laws must be obeyed. Vehicles must be parked in stalls within the designated lines. The college speed limit is 7 miles per hour.
- The purchase of a student parking decal does not guarantee a parking space; it is only a permit to park one vehicle in the designated areas specified below (See Campus Map on reverse side):
  - Preferred Student Parking ($27.00 for Fall & Spring Semesters and Includes $7.00 ASO Membership) is available:
    - Flower St. Lot (Oak Hall) - Entrance: Southbound Flower St., between 22 St. and 23rd St.
    - East Parking/24th Street Parking Structure, Entrance on 23rd and 24th Streets, between Grand Ave. and Olive St.
  - Valid in all Preferred and General Student Parking Lots.

PLEASE NOTE: After 3:00 p.m. a student with any parking permit (general or preferred) is allowed to park in any designated student parking area (whether preferred or general).

- LATTC assumes no responsibility or liability for your car or its contents while parked in the lots. Also walking/wheelchair escort service only is provided upon availability for students with physical or other limitations. Note: This is not a shuttle service. Call the College Sheriff's Station at (213) 763-3600 and an officer will be dispatched to your location.
- Inquiries regarding the college’s parking program, parking rules and regulations, parking decal use and enforcement should be directed to the following offices during normal business hours: Business Office, (213) 763-7225, and the Administrative Services Office, (213) 763-7040. However, LATTC Sheriff’s Station personnel are on duty 24 hours a day, 7 days a week to assist with parking decal use and enforcement issues. Please call (213) 763-3600.
- Decal Sales, Refunds, and Exchanges: Please contact the Business Office, Juniper Hall ST-Lobby, (213) 763-7225.
- Parking Citation Appeals: Individuals who believe a parking citation was issued to them in error must appeal it immediately by completing an Administrative Review form (available at the Sheriff's Station, Cypress Hall D-150). Appeals must be mailed to: Los Angeles Trade Technical College, c/o Parking Citation Service Center, P.O. Box 11923, Santa Ana, CA 92711. You may contact the LATTC Sheriff's Station for results within approximately three weeks. Failure to immediately pay or appeal a citation may result in substantial penalties and a Department of Motor Vehicle (DMV) hold on your vehicle registration.

Note: This information is subject to change without notice.
