

**Exemplar California Community College Offering BOTH Comprehensive Transfer AND Career-Technical Programs**

Trade-Tech occupies a unique position among institutions of higher education. Throughout eight decades, the college has remained true to its' founding premise of vocational education, while expanding to provide transfer programs, adapt to rapidly changing technologies and remain responsive to the needs of the surrounding community. Trade-Tech offers the complete transfer curriculum—a series of courses that community college students use to satisfy lower division general education requirements at any CSU or UC campus. And Trade-Tech offers certificate and degree programs in 65 career-technical disciplines. As a result, students come from all over the Los Angeles basin to participate in our unique mix of programs, some of which have been in existence since the school's inception.
