

## Program Review Student Survey, Fall 2003

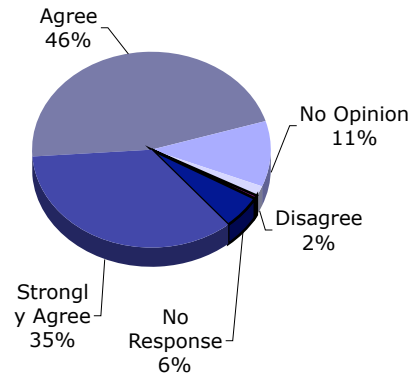

### Math

Number of respondents=1,355

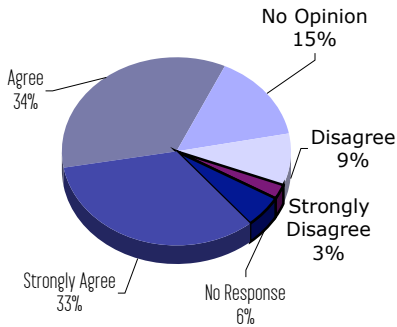

1. I was sufficiently prepared in my prerequisite course.

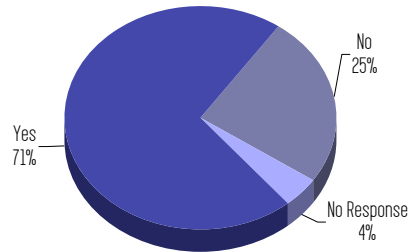

2. I read all assigned sections of the textbook and do the associated homework.

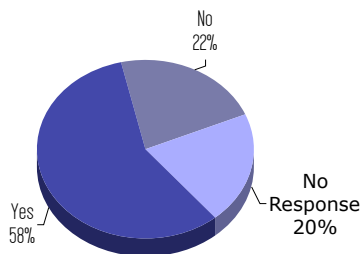

3. I am familiar with the math classes needed to transfer to a 4-year institution.

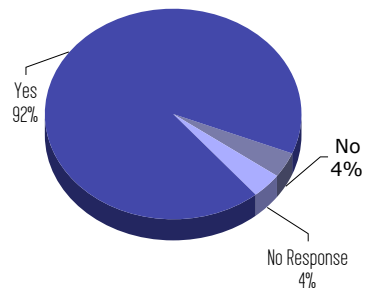

4. If you are getting tutoring, do you feel that your math skills have improved?

5. Do you know how to use the college catalog to determine your required classes?

6. Do you think the assessment test has placed you in the right course?

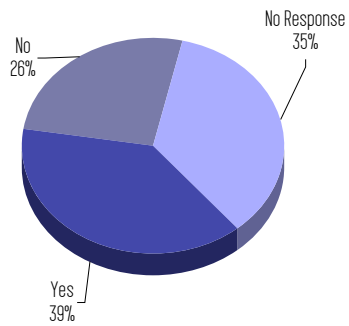

# Program Review Student Survey, Fall 2003

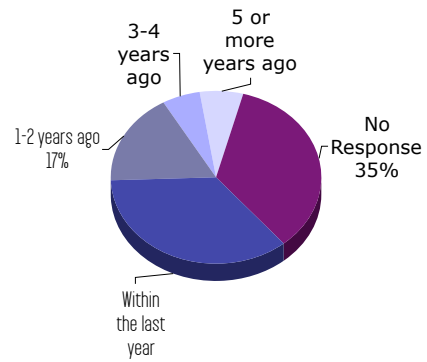

## Math

Number of respondents=1,355

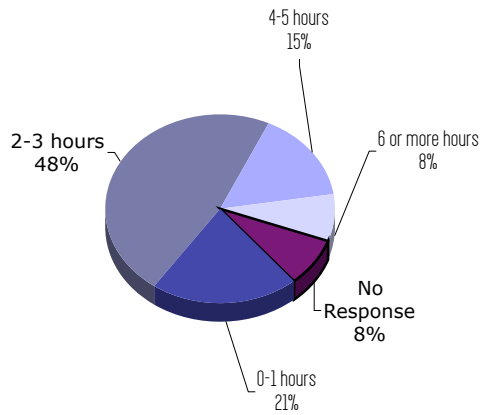

7. Are you taking this math course as part of your major?

8. If this isn't your first math course, when did you pass the prerequisite?

9. I spend \_\_\_ hours per week on this course, outside the classroom

## LATTC Math Survey Results

- I think that this class needs a little more time with each chapter and we should have to do more math homework and turn it in and also in the book the par test should have the answers so we can check our work.
- I want to take the placement test over
- This class is good and it helped me a lot.
- In my short life I have been terrible in math.
- Thank You
- I think this course is helping me a lot because I am remembering things that I forgot and I'm learning new things
- It's not hard at all I just need more practice. Tutoring would do me much better. Just don't have the time.
- This math class is fun. You have fun while you learn.
- I need more Math?
- This is my first course in any subjects and math has been my favorite because I know I need a class to help me understand more about math.
- Classroom and restrooms are filthy
- Employees aren't aware of school procedures causing a lot of confusion.
- Its very good but I need a lot of tutoring
- This course is fascinating and I'd like to do more.
- I love my class.
- It's a good class ☺
- This course is better. Because the student was interesting this semester.
- The only problem that is bothering us students is that the classrooms are left dirty, unattended, and seats for students are missing.
- Classroom is too small and I always see a lot of gangsters in my class. Plus, a student always brings two or three kids everyday to class.
- This math class is very good.
- Math course was great.
- Very good course.
- I have enjoyed taking Math 115.
- I feel this class is a review of Math 105.
- It has helped me remember what was once forgotten. So it has helped me get back in track and I thank you for it.
- Some of the classmates were not ready to take this class. They often kept us behind because the teacher had to pay special attention to them. There should be another test for anyone who wishes to enter this class.
- Since Math 105 and 112 are really similar it seems that the 112 requirement is unnecessary especially since it is necessary to pass 105 with a "C" or higher.
- I have learned some new ways to do math that I did not before
- This math class is pretty good to me, but I want to work on studying so I could prepare to pass this math class
- I have never been very good in math, but I have found that I've gained more knowledge about the subject in this class.
- I was taking math 113 and was doing great. They dropped me and sent me to this class in which I feel I'm wasting my time.
- That I am learning a lot more and math became to me easy and be smart with it.
- I enjoyed this class for the first time. I believe that this math course was helpful. I was able to understand everything clearly.

- Classroom needs to be at least painted or reconditioned.
- I believe that the cost for units is too expensive. It is too much.
- Units are too expensive.
- I love math and I feel I am learning even more every time I take a new math course
- Very fun, where people really actually learn and enjoy the class.
- The assessment test required that I take Math 115 matriculation waived my assessment results
- Excellent class.
- Provide more chairs
- Dislike the fact that the units are getting too expensive however, overall I enjoy my math class. Math 114
- Not enough disks in the classroom.
- Not enough chairs/desks.
- Not need more desks in our classroom.
- We need classrooms with more chairs. The classroom needs to be clean.
- This department should also keep in mind that night classes get filled out pretty fast and that the number of students is great in volume. The department should provide appropriate classroom for the size of the class.
- If we have enough chairs and a better classroom would be wonderful.
- I left math a long time, taking this class has made me to love math again and improved in Math for the next class.
- I learned a lot math.
- Taking this math course made me realize math isn't so boring after all. I have become better in Math.
- I loved taking this course.
- It is very important to take this course as a basic for upcoming courses.
- Yes, it would be so nice if this math course and all algebra classes was on the Internet as Interactive math
- I love this class.
- Tutoring lab hours need to accommodate night students!
- Very challenging if you've had a gap in instruction for more than 2 years.
- \*I believe a more thorough explanation of the lesson and more tutoring sessions were offered for Math 245, it when benefit many students who either dropped then class or those that are struggling still.
- I'm glad for this math course. Southwest college does not offer Math 115 broken down. The computer lab tutoring hours are at a very inconvenient time. Could you please do something about that. Thanks. (Math 113 MW 11:45-1:10)
- This math course is like a review of the prerequisite math. I don't think or believe we even need it. I haven't learned anything new that I didn't already know.
- I think that the cost of the math books should be less expensive. Thank you.
- Please keep this class it is so greatly needed. Thank you very much for thinking of the student.
- It's the same think I learned in 105, so it's a waste of time.
- Yes, I love math. It challenges my mind. Computers are push button; old fashion thinking (human computer) needs usage.
- Since I've taken this class, I clearly understand math now. I never did grasp it in elementary through high school. This is preparing me for future math courses.
- It is great! I finally feel like I'm in the level I belong in.
- This math course has helped me better understand the concepts of math. It has made me like it as well.
- It will prepare me for future algebra classes and accounting.
- There should be more math classes available during winter/summer sessions.
- It was fun.

- I love this math course.
- This is an excellent math course. This math course teaches us the basic methods of math and new techniques to solving equations.
- The assessment test placed me in Math 112. I don't feel that it is a good idea to place a student in front of a computer to determine the level of math they are to take up, reason being if a (really person in the math department) were to have given me the test they would have clearly noticed that I should be place in math 105, I don't understand a lick of Algebra and there I was in a Math 112 class. There has to be a better way to determine a student's math level.
- This Math 105 class is good for me.
- Homeworks
- Textbooks cost too much
- This math course has made it possible for me to clearly understand mathematics.
- Not everything accomplished in the class.
- This is a great class. I have learned a lot.
- Good
- It's good. It really helps
