### Course Description:

Students will receive individualized, small group, and computer assisted instruction designed to build skills for entry into basic math classes and other college courses.

### Student Learning Outcomes:

Students will increase their facility with the four basic arithmetic operations applied to fractions, decimals, and positive and negative numbers. They will know and use common measuring units to determine length and area and know and use formulas to determine the volume of simple geometric figures. Students will understand the concept of angle measurement and use a protractor and compass to solve problems. They will use grids, tables, graphs, and charts to record and analyze data.

### Student Learning Objectives:

Upon successful completion of this course, students will be able to:

1. Choose the correct math operation(s) for specific math problems
2. Calculate mathematical problems using fractions, decimals, and percents
3. Demonstrate proper use of fraction, decimal, and percent calculations
4. Solve basic math word problems relevant to the operations covered
5. Understand the use of basic math calculations in work and everyday experiences

### Textbooks Recommended for the Course but not required

1. Contemporary's Number Power # 2 - A Real World Approach to Math – Fractions, Decimals, and Percents by J. Howett (2000)
2. Additional websites and online assignments/readings (You will need Internet access)

### Supplies Required for the Course:

1. Yellow Highlighter (for emphasizing important rules, notes, and/or information during reading)
2. Paper/Notebook
3. Pencils and Colored Ink Pens (in addition to blue and/or black, for correcting your work)

### Class Format:

This is a lab class where useful learning and demonstration take place. A laboratory is the hands-on, practical

component of the course that will accompany the lecture and course material. During the lab, students will be provided with individual tasks designed for additional practice and the mastery of concepts and strategies presented in class. The lab assignments may include work from computer-assisted instruction (also known as CAI), books, tapes, and/or workbooks that may cover a variety of skills and levels. A lab assignment may be completed on campus (Learning Skills Computer Lab or Instructional Resources Lab (IRL)), online, or off-campus). If the lab you are completing does not automatically provide a report of hours, you must manually log the hours you complete.

**Attendance:**

The student is expected to work in the Learning Skills Computer lab using Plato (the computer software) to complete the assignments for the class. Students are expected to develop a schedule for completing their weekly work and to keep up with their progress.

If a student stops attending classes or withdraws from school, proper notification must be given to the admissions office and instructor. Students are responsible for dropping a class that they stop attending. If the class is not dropped, the student may receive a grade of “No Credit” for the class.

**Procedures and Etiquette for all Learning Skills Labs:**

1. Keep your voices low while working in the lab. It is a classroom environment.
2. Refrain from eating or drinking in the lab.
3. Silence or place your cell phones and pagers on vibrate. If asked by an instructor or staff member to turn off your cell phone or use it outside, please follow the given instructions.
4. Do not bring visitors (of any age) to the lab.
5. Put the help cone on top of your computer if you need technical or computer assistance.
6. Go to an instructor for help if you have questions or need assistance with your work.
7. Refer to the Computer Lab User Agreement for additional information.

## LEARNING SKILLS CONTACT LIST

### Peer Contact List:

Get a “study buddy.” Find someone in the class who cares as much about doing well in the class as you do. Make a habit of getting together to do your homework, or talking about the homework on the phone. School can be so much more interesting when you have a friend with whom you can work together. When you are absent, call your study buddy to find out what you missed. Keep this top portion for your own records.
